

Preface

As the world's living conditions are deteriorating, the need for the regenerative and sustainable built environment is increasing. Establishment of the regenerative and sustainable built environment requires interdisciplinary work and research. For this reason, our workshop "Low carbon Buildings and Communities in the Sustainable Built Environment" supported by the British Council Researcher Links as well as our workshop "Novel Energy for the Regenerative Built Environment: Technical and Managerial Aspects" supported by the Turkish Science Foundation (TÜBİTAK) play an important role in bringing the academics from various disciplines together. This workshop proceedings book provides the proceedings of these two workshops.

We would like to thank all participants for their contribution to our workshops which will act as an efficient tool for enhancing our collaboration.

We would like to thank the British Council and the Turkish Science Foundation for supporting and enabling these workshops.

Kindest regards,

Prof. Marjan Sarshar
Dr. Anton Ianakiev
Assoc. Prof. Begum Sertyesilisik
