Faculty of Computer & Mathematical Science

July 2012

ABSTRACT

A person signature has many potential to be duplicated. The high risk of signature duplication happen nowadays that involve with high value of financial transaction. By using manual detection it is difficult to verify because of the similarity of duplication. Therefore, these problems need a mechanism that is capable to detect and protect their assets from being harmed and exploited by attackers. This project focuses on signature verification using Artificial Neural Network algorithm. The objective of this project is to develop a signature verification prototype system using Artificial Neural Network technique that is capable to verify whether the signature belongs to the same person or not. This project is using an offline method where the signature needs to be scanned first before entering the next phase in order to verify the signature. As a result of this project, the system successfully verifies the signature based on the Neural Network algorithm. It is hoped that this project will give benefits to other researcher in order to continue the same research in the same field.

TABLE OF CONTENT	vi
LIST OF FIGURES	viii
LIST OF TABLES	ix
CHAPTER 1: INTRODUCTION	1
1.1 Introduction	1
1.2 Problem Statement	2
1.3 Objective Research	3
1.4 Scope Research	3
1.5 Significant Research	4
1.6 Summary Research	4
CHAPTER 2: LITERATURE REVIEW	5
2.1 Signature Verification	5
2.1.1 Offline Signature	7
2.1.2 Online Signature	9
2.2 Artificial Neural Network	11
2.2.1 Feed Forward	14
2.2.2 Back Propagation	16
2.3 Related Works	21
2.3.1 Signature Verification Using Particle Swarm Optimization	21
2.3.2 An Offline Signature Verification Technique	22
2.3.3 Handwritten Signature Verification Using Neural Network	22
2.4 Summary	23

CHAPTER 3: RESEARCH METHODOLOGY	24
3.1 Overview of Research Methodology	24
3.2 Identifying Type of Parameters That Contains In a Signature	26
3.2.1 Preliminary Study	27
3.2.2 Knowledge Acquisition	27
3.3 Designing the Signature Verification	28
3.3.1 Artificial Neural Network	29
.3.1.1 Phase 1 : Data Preprocessing	31
.3.1.2 Phase 2 : Data Training	33
.3.1.3 Phase 3 : Data Testing	35
3.3.2 Prototype Design	36
3.4 Developing Prototype System	37
3.4.1 Prototype Development	37
3.4.2 System Testing and Evaluation	38
3.5 Hardware and Software Specifications	39
3.6 Documentation	40
3.7 Summary	40
CHAPTER 4: RESULT AND FINDINGS	41
4.1 Introduction	41
4.2 Results and analysis on Signature Verification using Artificial Neural Network algorithms	42
4.3 Summary	46
CHAPTER 5: CONCLUSION AND RECOMMENDATIONS	47
5.1 Conclusion	47
5.2 Research Benefits	49
5.3 System Limitations	49
5.4 Recommendations	49
5.4.1 System Reusability	50
5.4.2 System Extendibility	50
5.5 Summary	50
