Campus Queen is Contestant In Miss Texas Pageant

Wednesday evening, June 17, 1970, "seven lovely ladies" participated in the final competition for the coveted title of "Miss Prairie View." Knowing that the honor was great and the competition keen, all the girls showed their best in poise, modeling skill, personality and talent.

Participants were Ellen Holland, Sophomore; Francine Nolly, Sophomore; Yvonne Harrison, Junior; Elaine Alexander, Sophomore; Cynthia Charles, Junior; Viola Jacquo, Junior; and Margaret Penn, Adv. Sophomore.

Winning the award for "Miss Congeniality" was

Yvonne Harrison who was elected by the other contestants for putting forth the most effort to keep up everyone's spirits during the contest. The talented Biology major is from Lufkin.

Second runner-up, Miss Viola Jacquo, a music major is from Beaumont. The first runner-up, Cynthia Charles, hails from Port Arthur where she once held the title of Miss Lincoln.

The highest award of the evening, that of our leading campus beauty and co-ed, was given to Margaret Penn of Houston — a former Miss Black America. See MISS PV, Page 7

MISS PRAIRIE VIEW 1970-71 AND ATTENDANTS ARE CONGRATULATED BY PRESIDENT THOMAS — Margaret Penn (center) new campus queen will represent the College in the Miss TEXAS PAGEANT in Fort Worth in July.

Industrial Education Grad Enrollment Increases

According to Professor L. R. Boyden, Chairman of the Industrial Education Graduate Program, the graduate enrollment for the 1970 Summer session has increased by over 100%. The enrollment for the first summer of 1969 was over 30 students. The grad enrollment for the current summer session is 62 students; an increase of slightly over one-hundred percent.

Mr. Boyden further stated that the program enjoyed tremendous growth during the regular 1969-70 school year with

a record breaking enrollment of 36 and 38 students for each respective session.

Mr. Boyden accounts for the fact that the support and recruitment efforts of recent graduates has helped to bring about such an outstanding increase in enrollment. Earlier he stated that the I. E. Graduate Program has a goal of at least 150 graduate students by 1975. He later stated that with the continuation of support that they have been getting, they will easily surpass the 1975 projection.

Recognition Banquet Held For Support Staff Group

The College paid honor to the Mid-Management Support Group with a Faculty-Staff Recognition Banquet on Friday, June 26, 1970, in the Memorial Center Ballroom at 8:00 p.m. Awards (Pins and Certificates) were presented to each individual with recognition according to the number of years of service you have rendered to Prairie View.

The Mid-Management Support Group include persons from the following areas.

1. All Secretaries
2. Fiscal Office Staff
3. Registrar Office Staff

4. College Exchange Staff
5. Information Office Staff
6. Data Processing Staff
7. Telephone - Telegraph Staff
8. Student Financial Aids Staff
9. Placement Office Staff
10. Athletic Assistant
11. Alumni Affairs Staff
12. Experimental and

Dow Chemical Workshop Held

The 1970 Dow Chemical High School Workshop was underway Sunday, June 14, 1970. It is the intent of the High School Workshop at Prairie View Agricultural and Mechanical College to explore as many industrial related areas as possible in the two week program. The motive underlying the exploration is to initially arouse interest and teach basic understandings within the areas of general metals, general woodwork, electronics, crafts, power mechanics, as well as other related vocational areas such as: Agriculture, Business, and Nursing. The instruction is of a practical nature dealing with action-oriented activities. These activities, moreover, are designed to stimulate those of the world of work. See DOW CHEM., Page 2

Construction Contracts Awarded by Directors

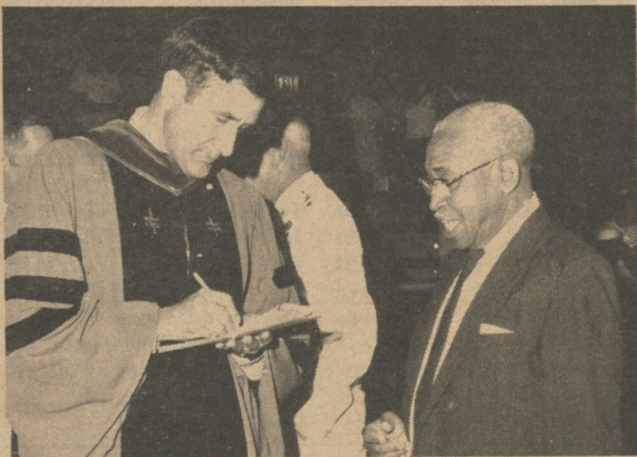

College Station — Contracts for construction of a new classroom building and fire station-campus security office at Prairie View A&M College were awarded recently by the Texas A&M University System Board of Directors.

There was 1 person in the 29 years of service group; 3 people in the 23 years of service group and 2 people in the 21 years of service group.

There were 5 departments and 2 individuals who have become members of the Century Club by virtue of having contributed \$100.00 or more to the College Development Fund.

Rowe and Mayfield, Inc., of Houston was awarded a \$129,700 contract to construct a building containing eight classrooms and four offices, in addition to support facilities.

A \$126,449 contract for the fire station and campus security office went to Chappell Hill Construction Co. of Brenham.

RHODE ISLANDERS — Secretary of the Navy John H. Chaffee, signs autograph for a former Rhode Islander, retired staff member, H. R. Turner. Secretary Chaffee is a former Governor of the Northeastern State.

MAY COMMENCEMENT — Dean Flossie Byrd prepares to lead home economics graduates in the procession on May 17. A total of 36 received degrees.

PV Receives \$10,000 Grant

Two architectural groups have given \$10,000 to Prairie View A&M College near Houston toward creating a "new and innovative" program in architectural education.

William J. Martin of the Texas College Coordinating Board said the new program may include new types of degrees such as architecture with courses in construction management and will help heavily on computer technology.

The money was donated by the Texas Society of Architects and the American Institute of Architects.

STAFF RECOGNITION — President Thomas presents Century Club plaque to Mr. and Mrs. H. A. Perkins during banquet for the Support Staff. The Superintendent of Buildings and Grounds served as Toastmaster for the occasion held on June 12.

Vocational Trade Teachers In Training Course

Forty day trade teachers and coordinators of state approved occupational training programs throughout Texas are currently enrolled in certification courses at Prairie View A. and M. College. Included are 32 Day Trade Teachers, 6 I. C. T. Coordinators, and 2 Health Occupations Coordinators.

Most of the teachers are from schools in the greater Houston area; however, others are from cities as far away as Beaumont, Beeville, Pleasanton, McAllen, Fabens, McKinney, Dallas, and Fort Worth.

Dr. A. T. Kynard, Teacher Trainer, Prairie View A. and M. College, and Mr. C. A. Harrison, I. C. T. Coordinator, Dallas Public Schools, serve as instructors for the group.

First row, left to right: Ashton Alexander, Houston; Juan T. Bennett, Fort Worth; Mark Rea-

gan, Houston; Wilbert Alexander, Houston; Justine Boone, Houston; James Nix, Beaumont; James Marrs, El Campo; John Palmire, San Antonio; Joe Cotton, Houston:

Second row, left to right: Dr. A. T. Kynard, Instructor, Prairie View; Jerry Chambers, Dallas; Eugenia White, Houston; Juel Smallwood, Fabens; Ted Hill, Houston; Concepcion Gonzalez, McAllen; Roy Baughman, Houston; Vernon McGee, Houston; Arthur Rosenfelder, Baytown.

Third row, left to right: Dolores Beller, Houston; Leola Taylor, Houston; D. M. Moore, McKinney; Ella Rollins, Dallas; Scottie Fulford, Del Valle; Clarence Gunter, Houston; Osborne Anderson, Houston; Arnest Kime, Fort Worth; Norvell Caraway, Pleasanton; Frank Truitt, Sheldon; John Barclay,

Sweeny; Harvey Spiller, Brenham; Frithjof Beck, Beeville.

Fourth row, left to right: Ray Ford, Houston; C. A. Harrison, Instructor, Dallas; Milton Palmer, Beaumont; Clarence Olson, Houston; Hester Gilliam, Houston; James Tidwell, Houston; Arvis Barlow, Houston; Charles Ainsworth, Houston.

Not shown: Georgia Rainey, Dallas; and Henry Lowery, Houston.

Dow Chemical

CONTINUED from Page 1 as closely as possible.

The transition between laboratory work and industrial practice is affected through field trips. This exposure gives the student an opportunity to make decisions and pass judgments concerning vocational occupations. These exploratory experiences then, become the motivational springboard employed to acquaint the student with the educational requirements needed to enter these occupations.

The workshop was seemingly an overwhelming success. This annual Workshop began on Sunday, June 14, with boy and girl participants meeting at their prospective dormitories for registration procedures. After registration, the participants and their advisors ate dinner in the MSC Dining Room. Following the dinner, the participants and the advisors went to the MSC Ballroom for general orientation.

This year's attendance record of workshop participants was 36; 23 girls and 13 boys. Participants and advisors attended a sum of 4 field trips. These field trips included tours of the Texas Instrument Plant, Goodwill Industries, Manned Spacecraft Center, Astrodome, and tour of the Dow Chemical Company.

It is obvious that through this High School Workshop, the experiences gained can provide the opportunity for students to confront employers with a question such as: "Given the proper training, what are my chances of gaining

Early Childhood Education Institute Underway Here

A total of sixteen prospective teachers from 10 different Texas cities are attending the Early Childhood Education Institute which began on June 2 at Prairie View A&M College.

According to Dr. Evelyn Strong, director of the Institute, the purpose of the program is to prepare qualified teachers for service in public school early Childhood Education. The training includes course work this summer at Prairie View A&M College and internship experience during the fall session.

The program is sponsored by the Division of Education at Prairie View A&M College, Prairie View, Texas, Consortium C Region 4 of Texas Education Agency and the Education Professional Development Act of Health Education and Welfare Department, Washington, D. C. The program is Co-Ordinated by the Department of Research Experimentation, Development and Service at Prairie View A&M College, Prairie View, Texas.

employment in these occupations?" These experiences may in turn help to change students' perceptions of their occupational opportunities. Moreover, it should provide new incentives for the students to perform better while in school. In this respect, the High School Workshop may become a unique vehicle by which we can move toward the solution of an urgent educational problem.

Teacher: "Who was the greatest inventor?"

Billy: "Edison."

Teacher: "Why Edison?"

Billy: "Because he invented the phonograph so people would sit up all night and use his electric light bulbs."

Funds Approved for Research On Nutrition of Soybeans

The Cooperative State Research Service, U. S. Department of Agriculture has granted the sum of \$21,999 to Prairie View A&M College for the support of research entitled, "Mineral Nutrition of Soybeans In Relation to Fertilization and Plant Growth Regulators."

The importance of soybeans as a cash-crop cannot be over-looked since it ranks second after corn. It is significant that in recent years the United States has produced 70% of the world's supply.

In Texas, intensive cultivation of soybeans has begun to replace some of the important traditional crops. Soybeans are limited to irrigated areas with most of the crop being produced in the Lubbock-Plainview area of the Tex-

as plains. There is increased interest in production along the Gulf Coast, the Brazos River, and the Red River Valley. The increase in yields is primarily due to the significant increase in acreage since 1966.

The basic goal of the research project is to gain some insight into the problem of unresponsiveness of soybeans to direct fertilization and make estimates of specific nutrient requirements of soybeans at different stages of growth. Practical applications of the principles involved should lead to consistent increases in yield.

The project will be under the direction of James I. Kirkwood, Professor in Soul Science and B. K. Chopra, Assist. Prof., Department of Natural Science.

PV Designated Test Center

Prairie View A&M College has been designated as a test center for administering the National Teacher Examinations on July 18, 1970, Dr. George H. Stafford announced today.

College seniors preparing to teach and teachers applying for positions in school systems which encourage or require applicants to submit their scores on the National Teacher Examinations along with their other credentials are eligible to take the tests. Last year more than 107,000 candidates took the examinations, which are prepared and administered by Educational Testing Service of Princeton, New Jersey.

The designation of Prairie View as a test center for these examinations will give prospective teachers in this area an opportunity to compare their performance on the examinations with candidates throughout the country

who take the tests, Dr. Stafford said.

At the one-day session a candidate may take the Common Examinations, which include tests in Professional Education and General Education, and one of the seventeen Teaching Area Examinations which are designed to evaluate his understanding of the subject matter and methods applicable to the area he may be assigned to teach.

Bullets of Information describing registration procedures and containing Registration Forms may be obtained from Dr. Stafford, 208 Adm. Bldg., Prairie View A&M College, Prairie View, Texas or directly from the National Teacher Examinations, Educational Testing Service, Box 911, Princeton, New Jersey 08540. Prospective teachers planning to take the test should obtain their **Bulletins of Information** promptly, Dr. Stafford advised.

AG Prof Presents Paper

Dr. Arthur S. Mangaroo, Professor in the School of Agriculture, at Prairie View A&M College, presented a technical research paper entitled, "Computer Utilization in the Modeling of Metal-Chelate Equilibrium System in Soil," at the Third Annual Computer Simulation Conference which was held at Denver, Colorado, June 10-12.

The Simulation Conference is co-sponsored annually by the Association for Computing Machinery, The Institute of Electrical and Electronics Engineers, SHARE (an IBM group), and Simulation Councils,

Inc. This year's conference was devoted to technical exchange in the field of dynamic system simulation. The paper by Dr. Mangaroo was classified as a computer application in the physical sciences. Papers were also presented at this inter-disciplinary conference from the fields of social sciences, engineering, biomedicine, and socioeconomic.

The paper, which is the product of a coordinated effort between Dr. Mangaroo and Mr. Wesley D. Ratcliff, Assistant Professor in the Mathematics Department, publicized a computer model that was developed here at Prairie View which is applicable to the simulation of the strength of bonding of cations in equilibrium systems such as those in metal-soil compound formation reactions. This model will be used by Dr. Mangaroo to classify a representative group of the soils of Texas according to their ability to retain zinc ions as part of a Texas Agricultural Experiment Station research project.

Dr. A. S. Mangaroo

Faculty Members Receive Doctorates

Purvis Carter

The Department of History is proud to announce that Purvis Malvin Carter, Associate Professor of History and Departmental Officer received the Ph.D. Degree in Diplomatic History in the Spring Convocation of the University of Colorado at Boulder. His Dissertation was entitled "Congressional and Public Reaction to Wilson's Caribbean Policy — 1913-1917" and was supervised by Dr. Daniel M. Smith. Mr. Carter has been with the Department of History for fourteen years. He is a graduate of Tillotson College and holds the Masters from Howard University, having completed a manuscript on the Astigmatism of the Social Gospel Movement, 1877-1901 under the supervision of Rayford Logan. His latest achievement caps a career of service and scholarship which honors both himself and his department.

Mr. Carter is a member of Bethlehem Methodist Church, and is a member of The Association for the Study of Negro Life and History, The Southern Historical Association, The Association of American Historians, The American Association of University Professors. He has published articles in several of the Journals of His association memberships. He is married to the former Gwendolyn M. Burns and

Raymond P. Welch

The Department of History is happy to announce the completion of Ph.D. by one of its staff members. Mr. Raymond P. Welch came to the Department two years ago as a Woodrow Wilson intern, and has been in charge of the Departmental upper college enrichment program. This program covers both experimental courses of Honor's Level, but also programs that encourage the advance student to plan for a graduate career.

Mr. Welch will receive his degree in the spring commencement of the University of Pennsylvania. He presented a dissertation entitled, "The Impulse to Reform: A Study of the Advocacy of Socialism". This piece of research involved experimental techniques in content analysis which, as an approach has become currently useful in the social sciences as a means for in depth understanding of the inner content of thought in this particular body of materials. We salute Dr. Welch and take pride in this milestone he has reached in his professional life.

is the father of three children, two boys and a girl. He is a member of the Alpha Phi Alpha Fraternity and is a member of the Local Epsilon Tau Lambda Chapter.

I. D. Starling

The I. D. Starling family, of 710 Canker St., in Nacogdoches, brought home the first of possibly several diplomas and the last of three degrees — all in one week-end, May 29 and May 30.

I. D. Starling, Jr., received his high school diploma from Cleveland High School, in Cleveland, Texas, on Friday, May 29. Saturday, I. D. Starling, Sr., received his Ed.D. degree from the University of Houston.

Dr. Starling was born and reared near Mt. Enterprise of Rusk County in Texas, and attended Concord High School there. He received the first of his degrees, a B. A. degree, from Texas College in Tyler, Texas, in 1950.

In 1954 Dr. Starling received the M. Ed. degree from Texas Southern University in Houston. On May 30, 1970 the culmination of a life-long dream will take place when Dr. Starling will receive his Ed.D. degree in education.

His dissertation study concerned "The Predictability of Vocational Choices of College Freshmen Based on their Extracurricular Activity and Participation During High School."

A third generation school teacher, Dr. Starling was inspired by his parents, Rev. and Mrs. Arthur Starling of Mt. Enterprise, both of whom have taught school for many years.

While working toward his degrees, Dr. Starling served for 20 years as a secondary high school principal in Tomball, Grapeland, Mt. Pleasant, and Cleveland.

He has served for two years as president of the East Texas District Teachers Association, and is currently director of research in education at Prairie View A. and M.

His wife, Nola, and sons, I. D. Jr., and John, who he has supported all while working for his doctorate, were among the proudest of families attending the University of Houston commencement exercises May 30.

Earliest wrist watches date from 1790.

NEWMAN HALL

Summertime 1970 for Students, Teens

The St. Martin de Porres Catholic Church, Prairie View, is sponsoring a Summer Program for lively learning with Bible Stories, music sessions, arts and crafts, games of all sorts, movies and field-trips for boys and girls, ages 6-12 years from July 20th through August 14th, Monday through Fridays, 8:30 a.m.-noon, at St. Martin de Porres' newly built Newman Hall, FM 1098 in the city of Prairie View. The cost for this four week program, which includes art materials, snacks, movies, and field-trips is \$22.00 per child.

All children should be pre-registered by June 1, 1970. Arrangements can be made for those parents sending two or more children. No child, however, will be turned away for lack of funds. Sister Joan Amore from St. Elizabeth's Hospital, Houston, will conduct the "Summertime 1970" assisted by Fr. Robert Bowen, S. S. J. and two Newmanities from the community.

The Catholic Youth Organization of St. Martin de Porres will sponsor weekly events this summer for the youth of the area. They will include: dances, game nights, trips to the beach, astroworld, CYO Convention and movies.

The CYO is now organizing a baseball team and welcomes all oncoming competition on its new outside basketball court at the St. Martin de Porres Hall: The CYO teams would like to form a band (interested?) A special fourth of July picnic, parade, social, fireworks display and pet show is now being talked about by the teams. If any youth is interested in "Summer Action," drop by the Newman Hall any Thursday night at 7:30 p.m. for a CYO meeting.

The Newman officers will be in charge of the Summer CYO program.

PV Students Study Dentistry

Prairie View students have continued to receive admittances to Medical and Dental schools. The most recent, Robert Mallock, has been accepted to the Freshman Class of 1970 to the University of Texas School of Dentistry. He will receive the B. S. Degree in August with a major in biology and a minor in Chemistry.

Economy is just a way of spending money without getting any fun out of it.

Gloria Jean Jessie

Recent Graduate Is Airline Stewardess

Miss Gloria Jean Jessie, daughter of Mr. and Mrs. Jodie Jessie, 1814 North Ross, Tyler, Tex., has been awarded the silver wings of an American Airlines stewardess and has now been assigned to flight duty out of New York City.

She received her wings as a graduate in the ninth class this year at the American Airlines Stewardess College, Fort Worth.

Miss Jessie was born in Tyler where she graduated from Emmett Scott High School in 1965. She received her B. A. degree in English from Prairie View A & M College in Prairie View where she was a member of Alpha Kappa Alpha. She was listed among the Who's Who in American Colleges and a member of Alpha Mu Gamma.

She is 5' 5" tall with brown hair and brown eyes.

Miss Jessie studied more than 100 different subjects during her six weeks' training at American's Stewardess College. Subjects ranged from makeup and grooming to in-flight food service and theory of flight.

Tidbits

Chamber Choir Voyages To Bahamas, Plane Hijacked to Cuba

Final exams were barely over when the twenty or thirty odd members of the Prairie View Chamber Choir packed up their dishies and bikinis for an ocean voyage to the Bahama Islands. The directors Dr. Henry (head of the Music department) and Dr. von Charlton along with English department head, Dr. Campbell acting as chaperone, made the

trip via airplane. They had the unique experience of being highjacked to Cuba where they remained about seventeen hours before being rescued. Once in Bahama, the choir gave two performances, one in the Governor's Palace.

Students and faculty alike enjoyed the short vacation and are anxiously awaiting their tour of Jamaica in July.

Baptist Student Movement Choir Under The Direction of Alvin Dread Makes Record

The Baptist Student Movement Choir using the title "The Alvin Dread Singers" has recorded a record on the label of a recording company affiliated with KYOK. The single is led by Eleanor Bigely, and precludes an album the choir is presently working on which might be finished by September. The single, "I Could Tell the World"

should be on the market within a few weeks.

Prairie View's New Students

Approximately 700 new students enrolled in P. V. for the first term this summer. Most are in college for the first time! Many are transfer students from our sister colleges: Grambling, TSU, etc. All of them deserve the best that we can offer them as old students to help them adjust to, enjoy and grow in our academic community.

This neighborly aid should not be restricted to help with problem subjects, but should be extended to include recreation — cultural and social. Academics are the major concern at any college, but remember, without social and cultural interests, students to fail in their foremost goal — to attain as much knowledge as possible.

Let's help our new students and at the same time help ourselves to enjoy college life more by organizing and participating in activities.

Senior Attempts to Open Coffee Shop On Campus

Joseph Hathaway, former SGA vice-president made a gallant attempt to improve social conditions here at Prairie View. He asked permission to open a coffee shop across the street from Suarez Hall in a house it seems was already in the process of being torn down. The only other possible location for his coffee shop is a house now occupied by the Dean of Women.

Joe says that he's still interested in opening the shop, but at this point he and the administration have lost "communication" on the subject.

NROTC Returns from Corpus

Sixteen midshipmen from Prairie View returned from a three-week training cruise at Naval Air Station, Corpus Christi Saturday afternoon. They were accompanied by Commander Gerald E. Thomas, commanding officer of the Naval ROTC Unit at Prairie View A & M College.

The three-week indoctrination program was conducted by Cdr. Thomas and five members of his staff, and was designed to Augment campus NROTC instruction by providing exposure to a military en-

vironment. In addition to classroom instruction, the midshipmen received daily physical training and swimming lessons, as well as indoctrination flights in naval aircraft.

Five of the returning freshmen midshipmen, who are NROTC scholarship students, will depart shortly for six-weeks cruises on navy ships overseas. The rest of the midshipmen proceeded home to summer jobs or to the second session of summer school, prior to returning to Prairie View in the fall.

NROTC Fall Application Open

Prairie View's Naval ROTC Unit is currently receiving applications from students interested in joining the program. The NROTC program gives young men the opportunity to become a commissioned officer in the Navy or Marine Corps while earning their college degrees. If you are accepted into the program you will receive free NROTC textbooks, uniforms, and \$50.00 per month during your last two years in school. A select few may also receive full scholarships which provide tuition, fees, all textbooks, and \$50.00 per month for four years.

A graduate of NROTC can specialize in any of a number of areas, including: flying, submarine duty, the Marine Corps, Civil Engineering and the Supply Corps.

NROTC students pursue their chosen degree studies, much as other students, except that they also take one naval science course per semester and participate in drill once a week. Midshipmen also participate in summer cruises on ships and naval bases throughout the world.

Anyone interested in learning more about the Naval ROTC program should visit the NROTC offices on the third floor of Spence Hall. Those who feel they want to apply can begin the application process this summer, and save themselves much valuable time during Freshman Orientation week. In either case, there is no obligation.

To be eligible for the program you must be expecting to graduate not less than four years from now and have a strong

high school record and/or good ACT scores.

Investigate the great opportunities awaiting you as a Navy or Marine Corps Officer. Stop in at the NROTC Unit, Spence Hall, today.

Fashion First at PV

FASHION FIRST AT P. V. — The "midi" has hit the yard! The invasion took place June 17, at the Miss Prairie View Pageant when prospective PANTHER editor, Geneva Chapman styled her black midi creation.

Faculty News

been selected by the National Council for Geographic Education to serve on the membership committee of that national organization.

Mr. Hulen M. Davis, Acting Head, Political Science Department, served as a panel member during a Conference on Minority Politics in the Southwest, at the University of Texas, June 26-27, 1970.

Coach Hoover Wright has been named Track Coach of the Year for an unprecedented second straight time by the National Association of Intercollegiate Athletics.

Experiment in Living Program Underway

A new and exciting enrichment program for high school graduates officially began June 1. The program is called Experiment In Living. The objectives of this program are to create a sense of confidence in the freshman student as he enters his college career, to expose him to a new academic climate, and to help talented young students become outstanding scholars and citizens.

Significantly, the participants of Experiment In Living are from all parts of Texas, including Houston, Port Arthur, Dallas, Waco, Grapeland, Atascosa, and also Lake Charles, Louisiana. There are twenty-five students enrolled in the program.

Coach Drafts Beaumont Grid Heroes

Head Coach Alexander Durley, is responsible for the summer attendance of 5 Beaumont football heroes. Each of these players received 4-year scholarships. The most interesting fact about the newcomers is that the quintet consist of two quarterbacks of cross town rival schools! Quarterbacks Hardy Malvo of Charlton Pollard High School and Curtis Ceasor of Hebert High School must now accustom themselves to working together. This act of togetherness may seem like an awkward situation but these two athletes have already "hit-it-off". Ceasor and Malvo are not only roommates but they also attend the same classes. They are both majoring in the field of Industrial Education.

In a recent interview with Malvo and Ceasor, Malvo stated that he and Ceasor never had any form of hostility toward each other and that now they would try their best to withhold and meet the expectations of their home town high schools.

I. A. Instructor Attends Seminar

Archie A. Manning, instructor of the metal work department in the Prairie View School of Industrial Education and Technology, was invited by the Texas Chapter American Foundrymen's Society, to be a guest at the 9th Metalcasting Instructors Seminar.

This seminar, which was held at North Carolina State University, June 11-13, 1970, is one of the vital services rendered for the Industry and the people in the industry. The workshops and discussion groups consist of seven sessions. The sessions included: Gating & Riserling, Crucible Melting, Patterns, Coremaking, Sand Technology, Molding & Melting, and Special Casting Processes. It is intended that these activities would

provide a "learn by doing" atmosphere.

One of the recreational events at the seminar was held on Thursday, June 11, 1970. This event was a big picnic for all instructors. It was held on Pullen Park Island. It proved to be most enjoyable as stated by Mr. Manning.

Mr. Manning stated that his main objective for attending the seminar was to gain further information that will aid the instructional program in metalcasting and technology.

The seminar is literally a priceless opportunity for the education of educators in learning about latest metalcasting techniques from leading foundry technologists.

SURVIVAL VALUES IN MORAL CHANGES

Adequate treatment of this subject requires clarification of the words, value, moral and survival.

1. Survival value (used here as a noun) utility in the struggle for existence.

B. The quality or state of being useful, capable of serving, in various roles or positions; kept for the production of a useful product rather than for show or as pets.

Are spiritual things merely synonymous with culture, education, material progress and human happiness or have those words a deeper meaning?

Karl C. Garrison — Psychology of Adolescence p. 182

Values refer to what we regard as important rather than what we know.

B. Values are organizing factors with in the personality and are especially important in relation to morals and character.

C. Ideals and values are a function of the socialization process. What do we mean by moral standard? (pp. 570 Child Development and Personality By Mossen, Conger and Kagan.

1. This term refers, in its broadest sense, to a belief regarding the appropriateness or inappropriateness of certain forms of behavior.

2. D. D. Roncs — A Book of Contemplation pp. 90-91. Morality is the observance of the rights of others. One can not be immoral but in relation to others.

Rev. I. C. Gordon
Professor of Education

3. An individual may change one or more of his moral standards because of certain experiences, sometimes traumatic and sometimes resulting from interpersonal relations, which lead to question the consistency of his value system.

1. Whenever human beings make themselves instruments of goodwill, marvelous things happen through them, and produce values for the new ongoing ever changing world.

2. The Sociologists believe man needs rehabilitation, but Jesus said man needs regeneration.

3. The Psychologists say "clean up man's mind", but Christ said man needed a new heart if love.

4. We must never let go of righteousness, justice and peace.

5. There are values such as peace, love, goodness, faith, joy, and temperance.

6. We must always maintain self respect and the privacy and sanctity of

of man's home.

7. Acknowledge the inherent dignity of every man.

8. Maintain a sense of mission, keen minds, love for people, strong faith, emotional stability, sense of humor and common sense.

9. Since life is but the preparation for the larger life in the world to come, we have missed the point completely if we do not come to know God and develop ourselves spiritually.

There are many ways by which we relate, ourselves to life that gives us immorality. One way of course, is by the type of contribution we make by our life work. And as one rests from his labors, his works will follow him.

Text: Galations 6:9 "Let us not (get) not be weary in well doing: for in due season we shall reap, if we faint not.

... do not cast from you your confident hope... you have need of patient endurance."

Hebrews 10:35, 36 (Weymouth)

Man is by nature a creature of hope. He is steadfast in the assertion that "Every cloud has a silver lining", or "Tomorrow will be a better day" or "Everything will turn out for the best". Hope springs eternal in the human breast.

The Prophet Isaiah asked the question, Hast thou not known? Hast thou not heard, that the everlasting God, the Creator of the ends of the earth, fainteth not, neither is weary. Yes, God giveth power to the faint: and to them that have no might he increaseth strength. But they that hold on to God's word their strength shall be renewed, they shall mount up with wings as eagles; they shall run and not be weary: and they shall walk and not faint.

How significant, then, are the words of Jesus: "Not every one that saidth unto me Lord, Lord shall enter the Kingdom, but he that doeth the will of my father." The race is not given to the swift, nor the battle to the strong — are searching words that express the experience of a man who had learned

HONOR SOCIETY INSTALLED — Prairie View A. & M. College, Prairie View, Texas, installed the Theta Iota Chapter of Sigma Delta Pi, La Sociedad Nacional Hispanica on May 12, 1970.

The honorary members are Dr. Willa Hood and Dr. Lonnie Sadberry. The associate member is Dr. Alvin J. McNeil.

The charter members are Brenda Berry, Dolly M. Conner, Naomi Clink-

scales, Goldie Kelly and Hilda Soto.

Dr. Amatha W. Mosely and students from the Department of Foreign Languages and Literature of Texas Southern University installed the chapter. The installers are members of Epsilon Chi Chapter of Sigma Delta Pi. All new members were presented pins, carnations and certificates.

The sponsor for the newly formed chapter is Dr. Lonnie Sadberry.

Nurses Hold First Alumni Tea

The Prairie View A. & M. College School of Nursing held its first annual Alumni Tea on May 9,

much from life.

Jesus again affirmed the moral meaning of this Kind of Constancy when he warned that "no man who puts his hand to the plow and looks back is fit for the kingdom."

Young people you ought to have a goal or find one early in life and pursue it diligently. For people rarely drift into success. In the same sense, people rarely attain a goal if there is no goal in view.

This is your day and world. Study it, understand it, conquer it. You have a job to do. Are you going to work until your dying days or are you going to drift through life? Some wise man once said, "There is plenty of room at the top, but the elevator is not running." We must climb the ladder for every round goes higher and higher. Therefore, build into the foundation of your being, the best materials - - honesty, integrity, habits of accuracy, punctuality, strong loyalties and faithfulness. For he who builds his life like that will be secure like the

1970, at the Houston Clinical Center. Invited guests were as follows: Alumni of the School of Nursing, Dr. A. I. Thomas, President, heads of departments at Prairie View A. & M. College, interested professionals in the Houston community, and students housed at the Clinical Center.

man of whom Jesus speaks: "He built his house upon a rock and when the storm came it stood. The great philosopher Cicero is telling his young comrades that his strength is as ten men because his heart is pure.

A virtuous youth, "he says bring one to a vigorous and happy old age. Let us not get tired of doing right, for at the proper time we shall reap if we don't faint.

Paul tells us that the things which are seen are temporal, but the things which are not seen are eternal.

III What Ought Christians to do?

1. Christians ought to stand in the ways, and see, and ask for the old paths, that is the good way, and walk there in (Jer. 6:16)

2. The Christian should be strong in the Lord and never be weary in well doing.

3. The Christian on his knees sees more than the philosopher in tiptoes.

The survival of the nation depends upon the preservation of high ideals of family life.

We can have hope for this world and for all who dwell herein, because in the midst of the seeming futility of the struggle against evil and wickedness in high and low places, we see Jesus, who for the joy which lay before him, endured the cross despising its shame... because of his confident assurance and hope

Ross Laboratories representative, Mr. Hugh Kane, contributed a check to the School of Nursing in the amount of \$20.00 as a donation from his company to help defray the cost of the tea.

The School of Nursing Faculty participated in the preparation of the tea. The centerpiece was very tastefully arranged on the table in the College colors of purple and gold. Refreshments were also served.

Dr. Mangaroo, Dean, was present to greet the attending guests.

that God would fulfill His promise.

Is not truth more elevated, and beauty more refined, and honor more worthy, and love more noble and profound? These are the things that give life its worth. The value of life grows with our growth, and the desire for more life can never be separated from the conviction that life is good.

NSF SUMMER PROGRAM AT PRAIRIE VIEW — First row (seated) L to R Randy Kelley, Allen Graham, Shreenath Doctor, JaMarie Holt, Kathy Michulka, Carolyn Lyons, Deborah Casey, Alonza Sadberry, Bing Bayer, Robert Wooten. Second row (standing) L to R: Dr. E. E. O'Banion,

Director; Mike Raybuck, Mr. W. E. Reid, Assoc. Director; John Adams, Jeal McMullian, John Schnase, Steve Talley, Michael Thomas, Donald MacAllister, Mike Nowak, Chander Kasiraj, Michael Drake, Jim Moiseve, Mrs. Doris Senette and Mr. J. E. Standifer, Counselor-Teacher.

Chemistry Dept. Holds 12th Science (NSF) Summer Program

The Twelfth Summer Science Program for high ability secondary school students in the field of chemistry began on June 7, 1970. The program is sponsored by the NSF and Prairie View A & M College and has had more than 300 students to participate since its beginning. Each student is assigned an individual fee according to his financial status, and 23 were selected for this summer's program out of more than 100 applicants.

The director of the program is Dr. E. E. O'Banion, who presided at the orientation program which was held Monday, June 8, with Dr. A. J. McNeil as the keynote speaker. Mr. W. E. Reid, coordinator of the program, made remarks to the students on their role in the summer program. The orientation program also included a tour of the campus and the administration of the ACS - NSTA Cooperative Examination in Chemistry, which is administered again at the termination of the program.

The main objective of the program is to enrich the educational experiences of the students and to provide challenging opportunities beyond those usually available in high school. The institute also provides an environment where creative work can be done and an opportunity to use the college facilities.

The twenty-three students participating in this summer's program were selected because of their proficiency in Mathematics and English, and their un-

derdeveloped potential in the field of the biological and physical sciences. In selecting individuals for participation other factors are also considered such as character, dependability, and good physical health. Admission to the program is based entirely upon the students' qualifications, without regard to financial need. Funds have been provided by the National Science Foundation which can be allocated to help meet part of the expenses for participants who would otherwise be unable to attend. Applicants had an opportunity to make their financial needs known when they filled out forms expressing their desire to attend.

The courses are non-credit, but will be very informative and of special interest to participating students. Field trips to research laboratories, museums, industrial plants, and other places of interest are planned. Some phases of the program will emphasize laboratory experiences, research participation, and individual creative work.

Participating in the 1970 program are students from California, Louisiana, Oregon, and Wisconsin. Past participants have represented most all the states in the Union.

Assisting with the program are Miss Shirley Bryant, a 1970 Prairie View graduate in the field of biology, and Mr. Joe Standifer, Chairman of the Science Department at Como High School in Fort Worth.

The Biology Department's first two students to complete the Medical Technology Curriculum on our campus. L to R; Misses Harriet L. Else, Myrtle Comcaux and Dr. L. C. Collins, Head, Department of Biology.

Medical Technology Curriculum Established

The Biology Department submitted a proposed curriculum to the Administration and the Coordinating Board for approval to offer a B. S. Degree in Medical Technology at Prairie View A&M College. Approval was recently granted and Prairie View A&M becomes the eighth school in the State of Texas to offer this type of degree.

The Biology Department wishes to congratulate

these two attractive young ladies on being accepted in the School of Medical Technology, Houston, Texas, where they will spend a year in clinical practice. During this year these students will receive a stipend for \$200.00 per month to defray their expenses.

Next to runaway prices, a shower bath in a strange hotel is the hardest thing to regulate.

Miss PV-Miss RMS

CONTINUED from Page 1
erica contestant. The new Miss Prairie View was crowned by President Thomas and received her first congratulations from the former Miss Prairie View, Polly Elmore. Her mother, Mrs. Hattie Jones, and sisters, Sandra and Jackie, were also on hand to congratulate her.

Others to honor Prairie View's most highly esteemed beauty queen were Mrs. Cheryl McIntyre Taylor — a former Miss Prairie View and Mistress of Ceremonies for the evening, John Pittman — General Director of KYOK radio, Houston, Charles Porter — News Director for KCOH radio, Houston, Bennie Boone — Sports Director for KYOK radio, Houston, cameramen from Houston's Channel 11, reporters from the *Forward Times* of Houston and a number of Houston's leading photographers.

Miss Penn will be the first Miss Prairie View to participate in the Miss Texas Pageant in Fort Worth in July.

Congratulations to the sponsors, directors and judges. You've given Prairie View a new social dimension and a wider competitive scope. Congratulations "Seven Lovely Ladies" for your time and effort that made this pageant one of the most colorful, most entertaining and most beautiful social events of the year. And finally, congratulations Margaret Penn, our Miss Prairie View.

PV Students Accepted For UT Summer Medical Program

Four students who are interested in paramedical professions were selected to attend a nine week program at the University of Texas Medical Branch, Galveston, Texas, beginning June 15th. The students are Rita Bostic, Car-

olyn Robinson, Juanita McKeever, and Theodore Brown.

The students will receive \$200 per month and room and board. The first week will include a comprehensive orientation to the medical school and the community. Subsequent weeks will provide clinical experiences, seminars, research, special lectures and demonstration, unstructured group discussions, and programs for development of advanced learning skills.

PV Grad Appointed To A&M Committee

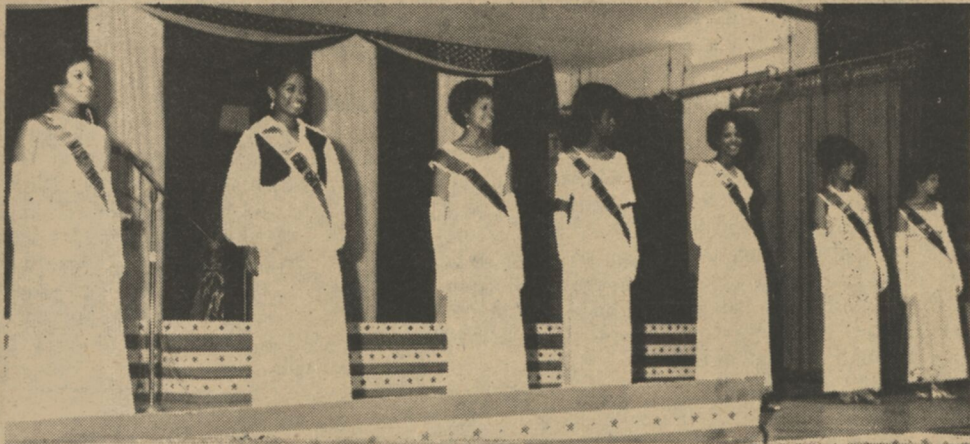

College Station — Wendell R. Smith, 1965 graduate of Prairie View A&M College, has been appointed to a new advisory committee for Texas A&M University's College of Architecture and Environmental Design.

Smith, who earned a master's degree in urban and regional planning at Texas A&M in 1967, is now an urban planner for their Department of Housing and Urban Development in San Francisco.

Texas A&M Architecture Dean Edward J. Romieniec said the commit-

tee will assist in appropriate decisions, provide communication advice, react to educational programs and ideas and generally represent the alumni and public.

The university's former School of Architecture was elevated to "college" status last year and broadened in scope to encompass environmental design.

SEVEN CONTESTANTS PICTURED IN THREE DIFFERENT APPEARANCES

Football Team Expects Good Yr.

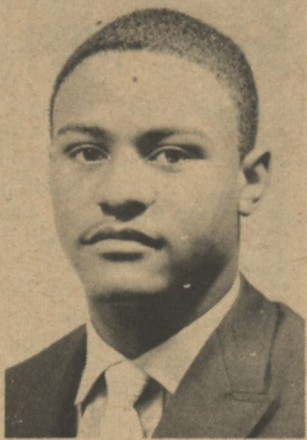

Bivian Lee, Prairie View's 6-3-200 pound senior All-American defensive back has high hopes for the Panthers to enjoy the rarified atmosphere of a winning season.

"I think we will have a good team," stated Lee who is regarded by pro scouts, as the best defensive back in college football. Most of the players that played last year will be back. "If we can keep them in school we will be in the race for the Conference Championship."

Lee, who was an All-State quarterback and defensive back in high school is tied with Tommy Williams with 18 career interceptions and with a full season to go he should move into the number one slot.

Coach Durley, who is beginning his second year as Prairie View's Mentor isn't too hopeful at the present and won't be until he finds out how some of his key veterans do in reading and writing this summer.

In spring training, Durley did a lot of work on his offense which was last in the Conference last season and he has installed some

Bivian Lee — PV's All-American defensive back tied for all-time PV interception record with 18.

new tactics that should make sullen Panther grads happy. Durley has been known to put together a push-button offense, but last season he didn't have a Charlie Green to call the shots at quarterback.

With Luther Hudson, the number four passer in SWAC last season returning with two seasons of experience and some fine freshmen quarterback recruits, the Panthers should move the ball up and down the field in remote style.

The defense with All-

Wright is Again Named Track Coach of the Year

Billings, Mont. (AP) — Coach Hoover Wright of Prairie View A&M of Texas was named track coach of the year for an unprecedented second straight time by the National Intercollegiate Athletics at the organization's annual hall of fame banquet Thursday night.

Named to the hall were Ray Vaughn, track coach of Oklahoma Christian University, and former Omaha University track and football star Roger Sayers, brother of Chicago Bears football star Gayle Sayers.

American Candidate Dewey Rogers paving the way should move up a notch from last season's number three SWAC standing. Dewey, according to pro scouts is one of the finest defensive ends in college. The 6-4-245 pound junior chases opposing ball-carriers ferociously.

If you sacrifice your principles for popularity you lose much and gain nothing worth having.

PV Golfer Named NAIA All-American

Paul Reed, PV's senior golfer was named to the N. A. I. A. All-American golf team at the N. A. I. A. National Championship. He was the only black player to be named to the team. PV finished 9th out of 30 teams in the tournament. Reed is the first PV golfer to make All-America.

For the first time in the history of the N. A. I. A. a black golfer was named to the 1st team All American list. He is Paul Reed, a senior at Prairie View. This golfer also finished in 3rd place for medalist out of a field of 206 golfers. Paul is also the first golfer from Prairie View to make All American on any team.

According to his coach Wendell Davis, Paul

studies, thinks, and plays golf. He adjusts to different course conditions very quickly. If he is lucky enough to make the tour; he'll be one of the great ones before long. Based on the records, I would have to say Paul is the greatest golfer to attend Prairie View.

The N. A. I. A. was held in Liberty, Missouri, at Wm. Jewel College.

PV Inks 8 on National Letter

William Cofield, who is in his second year as head basketball coach at Prairie View A & M College signed eight cagers to the National Letter of Intent.

Signed by Cofield were Leonard Duffield, 6-1 guard from Yates-Houston. He was the third leading scorer in the city last season with a 23.4 game average. Tommy Fortson, 6-2 guard from Southeast High in Kansas City. He averaged 16 points per game. Also signed from Kansas City was 5-11 guard Jerry Brown from Manual High. Lawrence Johnson, 6-8-210, center from Cleveland, Texas who had 22 point game average and 21 rebounds per game. He also averaged 19 blocked shots a game. John Jones, 6-7-217 from Campbell High in Nacogdoches. He averaged 16 points a game and 15 rebounds.

Myron Rogers, a 6-0 honorable mention All-American guard from Northwest Junior College in Powell, Wyoming. He averaged 20 points a game and 9 assists. Other signers were Emmitt Oliver,

6-7-215 forward who had a 20 point game average and a 18 rebound average. He hails from Barton High in Philadelphia, Pa. and Leroy Lay, a 6-7-216 pound forward from Crane Tech in Chicago. He had a 17 point game average and a 21 rebound average.

"I have to be happy with the people we have signed to the National Letter of Intent. I believe they have given us the potential to have a running team.

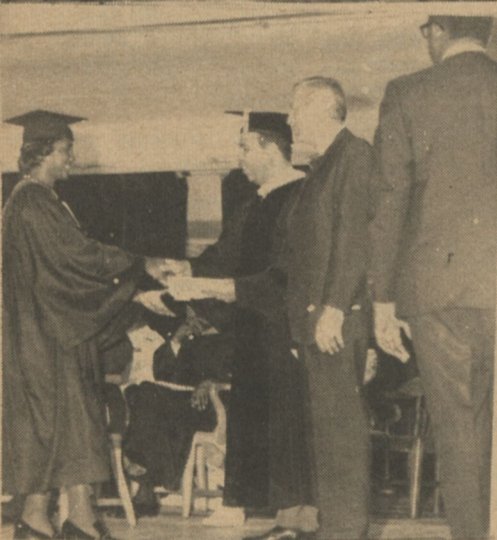

The only thing is we don't have experience.

"The competition for starting spots is going to be very interesting and very keen," stated Cofield.

"We will also have the red-shirts from last season. Raymond Reynolds, a 6-8-229 center from St. Thomas College of the Virgin Island and Tommy Keyes, a 6-9-210 pound forward who I coached at Lincoln University at Lincoln, Pa." he added.

Reynolds, who averaged 18 points a game and 20 rebounds and Keyes, who had a 18 point game average and 17 rebounds, will join six returning vets, five of which are starters.

News Highlights In Pictures

Coach Drafts

CONTINUED from Page 5

School is hard-fighting, block-bursting fullback Alvin J. Broussard. Head Coach Clifton Ozen of Hebert High, defines Al's ability as having the power of a "run-away-locomotive". During the '68-'69 football season, Broussard was the only Hebert player to be named to the all-district team. He was also named the most outstanding football player during the '68-'69 season. In an interview with Broussard, he stated that his objective for coming to Prairie View was mainly to become a part of the football team and also to get the best education possible. Broussard also plans to major in Industrial Education.

Another Hebert hero, who has not yet made his arrival is split-end Phillip Brazille. Phil will begin his attendance at Prairie View in August. Brazille was named all-state player to the second team in Texas. He has really done the Hebert Panther team proud!

Quarterback Hardy Malvo will not be alone during the continuation of the summer session because also from Charlton Pollard are split-end C. L. Willington and offensive guard John Pickens. These 3 players worked together during their past high school football days and made their school, Charlton Pollard, one of the best known schools in Beaumont.

These 6 Beaumont players, along with the other outstanding veterans of the Prairie View football squad, should make the

FASTEST IN THE WORLD — PV's Fred Newhouse, who owns the World Indoor Record with a 46.5 440 ran the fastest time in the world in Paris, France two weeks ago when he clocked a 45.2. Newhouse also has a 20.5 clocking in the 220 which is also one of the top times in the world.

Luther Hudson, PV junior quarterback from Dallas expects to have a successful year.

'70-'71 football season of interest to everyone.
