This Project is brought to you for free and open access by the School of Computing and Information Systems at ScholarWorks@GVSU. It has been accepted for inclusion in Technical Library by an authorized administrator of ScholarWorks@GVSU. For more information, please contact [scholarworks@gvsu.edu](mailto:scholarworks@gvsu.edu).

**ScholarWorks Submission Agreement - School of Computing & Information Systems**

ScholarWorks@GVSU is an open-access repository maintained by the Grand Valley State University (GVSU) Libraries to showcase, preserve, and provide access to the scholarly and creative work produced by the GVSU community. **To complete the submission of your project please send this form along with your final project document(s) to [cis@gvsu.edu](mailto:cis@gvsu.edu) and copy your Faculty Member or Advisor.** For more information, email [scholarworks@gvsu.edu](mailto:scholarworks@gvsu.edu), or visit our webpage at <http://scholarworks.gvsu.edu/about.html>.

Please select **one** of the following options:

I agree to grant the GVSU Libraries a non-exclusive license to provide online **open access** to my submitted scholarly/creative work via ScholarWorks@GVSU. *You retain all copyright in your work, but you give us permission to make it available online for anyone to read and to preserve it in ScholarWorks@GVSU.*

I agree to grant the GVSU Libraries a non-exclusive license to provide **limited access** to my scholarly/creative work to the GVSU community via ScholarWorks@GVSU. *You retain all copyright in your work, but give us permission to make it available to users logged in to the GVSU network, and to preserve it in ScholarWorks@GVSU. The public abstract and the title of your work will be visible online for anyone to see, but your full work will only be available to the GVSU community.*

---

**Embargo – Optional:** *You may choose to restrict electronic access to your work for up to three years from the date the work is submitted to ScholarWorks. When the embargo expires, your work will become available.*

**Note:** *Your title and public abstract will still be visible online during the embargo. If your title or abstract contains confidential, patent-related, or sensitive information, please ensure you change it.*

Length of Embargo: \_\_\_\_\_

**Keywords:** *Provide several relevant words that describe the content of your work.*

distributed systems, android, smartphone

**Public Abstract/Description:** *Provide a short description of your work. You may use the abstract from your work, modify it, or create a new description.*

As mobile devices continue to grow in power and number, their combined computing capacity has grown as well. Much of this capacity sits unused, smartphones often sit idle throughout the day and while charging at night. This project explores the possibility of harnessing that otherwise unused computing power through the implementation of a mobile-based distributed system designed to tackle large computing tasks. To demonstrate the capabilities of the system, an example challenge is borrowed from the medical field: identification of genes associated with the development of renal cancer. The system is set to work identifying such genes using only the processing power of smartphones and a central server to coordinate them. Finally, the performance of the system is compared to a similar system that is adapted to run on desktop computer hardware.
