Format : 889 mm * 1194mm 1/16

Version : First edition in June , 2008 ; First printed in June , 2008

ISBN : 978-7-218-05854-2

Price : USD 200 (Two volumes)

Organizing Committee of the IGC/IRC 2008

Chairman

Hong Fuzeng	Honorary President of Chinese Grassland Society
Guo Qijun	Vice-governor of Inner Mongolia Autonomous Region
Yun Jinfeng	Professor of Inner Mongolia Agricultural University

Chief Consultant

Ren Jizhou	Academician of the Chinese Academy of Engineer
------------	--

Vice-chairman

Wang Zongli	Department of Animal Husbandry , Ministry of Agriculture of the People's Republic of China
Zhang Xiwu	Grassland Monitoring and Administration Center , Ministry of Agriculture of the People's Republic of China
Han Jianguo	China Agricultural University
Nan Zhibiao	Lanzhou University
Liu Yongzhi	Inner Mongolia Grassland Society

Committee Members

Liu Jiawen	Grassland Monitoring and Administration Center , Ministry of Agriculture of the People's Republic of China
Hou Xiangyang	Chinese Academy of Agriculture Science
Lu Xinshi	Beijing Forestry University
Wang Yuqing	Chinese Academy of Agriculture Science
Gao Hongwen	Chinese Academy of Agriculture Science
Wang Mingjiu	Inner Mongolia Agricultural University
Long Ruijun	Lanzhou University
Wang Kun	China Agricultural University
Li Xianglin	Chinese Academy of Agriculture Science

Secretary General

Zhou He	China Agricultural University
---------	-------------------------------

Secretariat

Deng Bo	China Agricultural University
Zhang Yingjun	China Agricultural University
Shen Guang	China Animal Agriculture Association
Mao Peisheng	China Agricultural University
Zhao Mengli	Inner Mongolia Agricultural University
Shen Yuying	Lanzhou University

Foreword

Human have created huge ecology crisis when they produce well-developed material civilization over the last century . A radical changing world is ahead of us , where global climate is warming , grain safety is getting urgent day by day , energy resource sinks rapidly , while mankind living surrounding worsens and biodiversity reduces .

A century change is so great that a serious problem is raised whether people can have sustainable survival and development on earth or not . It indicates that grassland making up 33.5% of the total land is a tremendous resource for mankind with various functions . Grassland is not only the material base but also a natural defense for setting plant , defending and harnessing sand , controlling soil erosion , preventing flood , water-logging and other natural calamities . Moreover there is a broad prospect for grassland to play its role on the industries of green safety food , sightseeing tourism and culture . Most importantly , grassland not only relates to the improvement of global economic development and people living standard , also refers to the living surrounding protection . In this changing world , multifunctional grassland will increasingly display its contribution and function .

The IGC/IRC is the premier forum for world grassland scientific problem . Under the support of Chinese government , Chinese grassland society bid for the 21st International Grassland Congress and the 8th international Rangeland Congress ; it is the first time that IGC and IRC will be coordinately hosted on 29th June—5th July , 2008 in Hohhot , China .

The main theme "Multifunction Grassland and Rangeland in a Changing Word" will be spilt into three simultaneous sub-themes :

- Grassland/Rangeland Resources and Ecology
- Grassland/Rangeland Production Systems
- Grassland/Rangeland People and Policies

This joint congress has wide contents ranging from protection and reasonable utilization of grasslands resources ; grassland variety breeding , cultivation , transportation and processing ; ecology of grasslands ; theory and practice of grasslands agricultural ecological system ; to policy issues , education , science and technology for grasslands , amenity and conservation turf and turf grass .

During the meeting , the forum on Chinese Grasslands will be planned within subject C . Furthermore , all delegates and registered accompanying persons are welcome to attend a series of investigations and visits so as to learn more about China and Chinese grassland/rangeland .

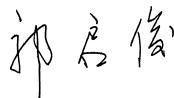

There are over 1738 papers in conference colloquia , which are divided into two volumes . In the first volume , 4 plenary papers and 21 invited papers presented at the main congress of the 2008 IGC/IRC , as well as other 747 offered papers related to subject A are included in . The other volume includes 34 invited papers referring to subject B&C and 932 offered papers .

We are very grateful to all thesis authors for their support to this joint meeting , to Dr . Nan Zhibiao and Dennis Hodgkins for their collecting and checking all the invited papers . Thanks are also due to Dr . Gao Hongwen , Dr .Li Xianglin and Dr .Hou Xiangyang for their revising offered papers , as well as to Dr . Lu Xinshi for his organizing and publicizing all the papers .

It is believed that the theme and exploration spirit of 2008 IGC/IRC in China will be encouraged through the academic exchanges of these colloquia . Facing a constant changing world , we are further aware of the importance of broadening the grassland research on ecology and living function except deeply continuous studying the function of grassland production , and exploiting some new field of Practaculture Science . All these will make grassland play bigger role in this changing world .

Mr .Hong Fuzeng
Honorary President of Chinese
Grassland Society

Mr .Guo Qijun
Vice-governor of Inner Mongolia
Autonomous Region

Mrs .Yun Jinfeng
Professor of Inner Mongolia
Agricultural University
