Taxonomy, homonymy, replacement name, Coleoptera, Staphylinidae, Staphylininae, *Philonthus*, Afrotropical region, Tanzania, Zambia

Abstract. *Philonthus colius* Hromádka 2016, a primary junior homonym of *Philonthus colius* Hromádka 2008, is replaced with *Philonthus lubomirhromadkai* nom. nov.

REMARKS

Philonthus colius Hromádka, 2016 was recently described based on material deposited in the Natural History Museum, London, collected in Tanzania (Mt. Hanang) by a Natural History Museum / African Natural History Research Trust expedition in 2012. Unfortunately, the name is preoccupied by *Philonthus colius* Hromádka, 2008, described from Zambia. Therefore, a new replacement name is proposed for the primary junior homonym (ICZN (1999), Art. 57 and 60).

Philonthus lubomirhromadkai nom. nov.

= *P. colius* Hromádka, 2016: 374 nec. *P. colius* Hromádka, 2008: 52.

Etymology. Named in honour of our late friend and colleague Lubomir Hromádka (1931-2016), who described the species.
