This performance was given during the *Feeding Creativity* workshops held at the UAB and Fundació Miró. *Ágape Insípido* recreates the traditional ceremony of a classic banquet, but transforms it into a new experimental performance 'banquet' in which the guests become the protagonists of the action. Starting with a specific situation, the idea is to lead participants towards a state of liminality, which brings with it the possibility of an opening towards new ways of behaving and perceiving reality.
