President Kennedy welcomes new students

During the next few days, I will have an opportunity to meet with many of the new students arriving on campus for the first time. The Week of Welcome. committee has arranged a schedule of campus tours, which

will again include an opportunity to visit with the president, this year at the president's home on campus. This is a highlight of the year for me, because it gives me a first-hand opportunity to ask what kind of students have

Opinions expressed in this paper in signed editorials and articles are the views of the writers and de not necessarily represent the opinions of the staff, or views of the Associated Bludents. Inc., or official coinions. decided to prepare for their careers by work and study at Cal Poly.

I know in advance that the answer will be "all kinds of students." During your visit, I will ask you questions and you will ask me questions. And, hopefully, we will both be able to understand each other better as a result of the answers we receive.

The growth of the university during-the seven years since I became president has been great, even though it is restricted by lack of funds, hampered by lack of sufficient campus and community housing and other facilities, and affected by the need for a sorting out of priorities both in higher education and among potential students.

need for a sorting out of priorities both in higher education and among potential students. I balieve that this year is one we can begin with optimism and confidence. I have just returned from a statewide visit with alumni, and I have been thrilled and pleased to hear from them graduates ranging from the 1930's to 1974—what Cal Poly means to them. I hope it will come to mean as much, and more, to you.

After a student has been here for two quarters, he is eligible to

be considered an alumnus. We will try to help you to further your education, not only during the remaining years on campus, but as you enter your career and find your life's goals and challenges. Both freshmen and those who have transfered to Cal Poly from

other institutions are equally welcome. I hope you will develop a deep loyalty to this university, an appreciation for Cal Poly that is based on the sum of your experiences while you are a student at this campus.

Planning one's future, no less than the future of an institution of higher learning, requires a combination of flexibility and determination. We have learned that flexibility is a valuable quality and a necessary one if we are going to come to grips with the challenges of change. And yet, we know that dedication to a purpose and the identification of goals are essential if we are not to be buffeted about into purposelemenes.

The university itself must be governed on the basis of looking ahead and planning for the future. Yet, even as we look forward several years, a decade, or more, we must be able to tend to the work at hand.

Your Cal Poly experience can be seen in similar terms. Whatever high goals you have, however dedicated you may be toward a distant future, now, this year, is the time to accomplish much towards those goals. A university has the natural advantage of containing within a single community the knowledge of the ages, the wisdom of experienced faculty and staff, energy and enthusiasm and inquiring spirit of youth, and the combined resources to make significant things happen. 1 welcome you to your part in that enterprise. Robert E. Kennedy

President

John Denver is not coming to Cal Poly

John Denver will not be coming to Cal Poly.

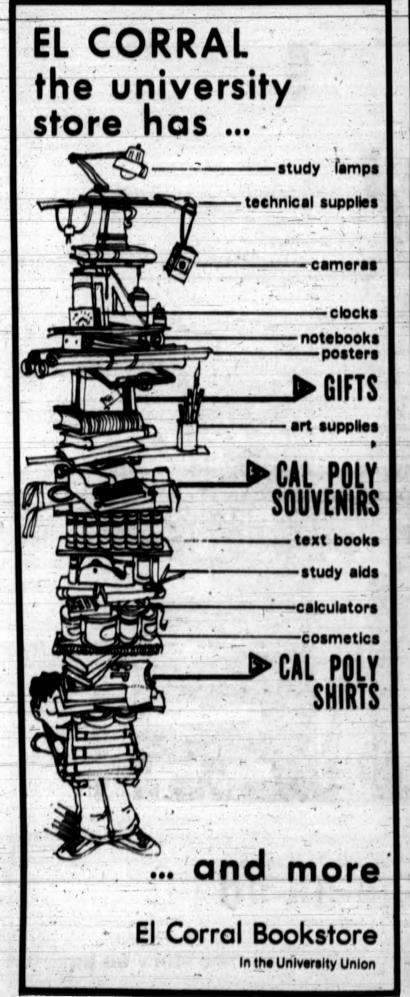

The concert appearance of Denver, scheduled for Sept. 22, has been cancelled, according to an announcement from the Concert Committee of the ASI. Steve See, concert committee chairman, said production of a television special to be broadcast this fall by ABC Television will make it impossible for Denver to be in San Luis Obispo and forced cancellation of the Cal Poly concert.

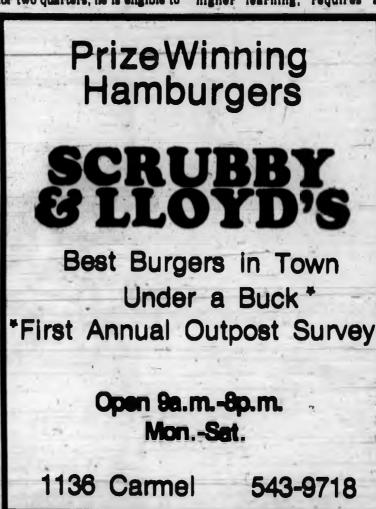

See said the Concert Committee has cancelled plans for a major campus concert in late September and will concentrate on developing other concerts later in the fall.

Newspaper goals for academic year

On behalf of the outgoing Summer Mustang and the incoming Mustang Daily staff I want to extend a welcome to allstudents; those returning and those new to this campus.

This registration issue is the last effort of the Summer Mustang staff, who produced a weekly paper during Summer Quarter. The next issue of Mustang Daily will be under the direction of Marji Nieuwama, editor for the upcoming academic year.

Whether in the Summer Quarter or the regular action year, the student journalists who put together the paper have the same basic goals. One of those goals is to report campus events in the most truthful and unbiased way possible.

We produce the Mustang as a part of our educational experience at Cal Poly. The entire production is handled by students; something of which we are rather proud.

Mustang Daily attempts to be totally self-supporting. The paper receives a budget every year from the Associated Students, Inc., and pays it back with the revenue from advertisements solicited by the student ad staff.

There are probably no other students on campus who know the weak points and problems of the paper as we do. We only want to

stress that this is a learning experience for us. We are not professionals but we hope to, become professionals in our various a fields of interest. Working on the Mustang Daily entails much the same thing as working on any other small daily newspaper. The journalism students learn to cope with deadlines, ad copy that doesn't reach the ad staff, photos that disappear, reporter's who can't spell-the list at times seems to go on and on.

But the real reason that we continue to put out the paper is to inform and, at times, provide entertainment for the student attending Cal Poly. For this reason, the staff of Mustang welcomes suggestions for articles, comments and criticism. Communication is the major we have chosen at Cal Poly, but we have learned that communication is most effective. when it is two-way. Come down to the Mustang Daily newsroom to let us know what is of concern or interest to you. In this way, we can strenghten and improve our product. Students at this university are the people we want to reach.

Health plans now offered

You are on your way to class and blamo, a bicyclist swerves to miss a dog and hits you instead. You are dazed and a little scrapped up. What can you do about it? The student Health Center is the place for you.

business beginning fall quarter. The center

Open Monday through Friday from 8 a.m. to 5 p.m. the Health Center provides an outpatient clinic, 34 hour emergency care, licensed pharmacy and a clinical laboratory.

Along with that the center also provides a diagnostic X-ray department, physical therapy, on-campus hospitalization and an oral health program.

Three health plans are

available to students. The basic plan is included in the Materials and Services Fee and pays for outpatient service to all students at no additional charge.

The Health Center Augmented Plan provides students with a health card for \$13 a quarter or \$30 a year.

The card entities a student to free on-campus hospitalization, up to a 50 per cent discount on pharmacy items, free oral hygiene and free augmented clinic including, routine physical examinations, premarital counseling, cancer detection examinations, and headache clinic.

Dr. Billy Mounts, director of the Health Center, said that the move into the new health facilities would bring more services to the students such as an improved oral hygiene program and x-ray facilities.

Mounts explained that the oral hygione program which began Spring Quarter will be started again in fall with the dentist Dr. Miller on campus from 10 a.m. te 12 and two paramedical aids available from 8 a.m. to 12 noon.

The interest of the dental program, according to Mounts, is not restorative dantistry, but is aimed at preventive and

Do-it-yourself again for registration day

To get classes, or not to get classes—this question is often pondered by registering Cal Poly students.

St. comments in

Students can expect to go through the usual do-it-yourself registration procedures this fall, and most will be happy by the outcome. According to Cal Poly Registrar Gerald Punches, the best aspect of our registration system is that the student retains the ultimate choice in selecting classes.

The Registration and Scheduling Committee, composed of faculty and administrative officials, has been studying the feasibility of implementing computer assisted registration at Cal Poly. The school has been directed to implement such a system by 1979.

There are problems to be overcome. For one thing, the campus computer facility is not adequate to handle the task of registering and funding for better equipment has not come through. At present, only 61 days per year are spent in registering students, while computer assisted registration would take considerably longer. Cal Poly could have moved to this type of registration starting next Winter Quarter had a decision been made by the Registration and Scheduling Committee by last May, but there were too many questions and unsolved problems.

Punches indicated that enrollment next quarter may reach 14,000. If that is the case, and you must register after 13,000 of them have selected their classes, your tendency to bemoan the present system could be readily understood.

Dorm costs are increased in fall by five percent

Students living in residence halls are paying five per cent more this fall for their living quarters than last fall.

quarters than last fall. According to Robert M. Bostrom, director of housing at Cal Poly, the five percent increase was approved in the spring by the Office of the Chancellor of the California State-University and Colleges. The increase from \$600 to \$630

The increase from \$600 to \$630 for double occupancy rooms in campus residence halls took effect June 20. The \$630 rate, which is in effect for Fall Quarter, will also apply during the Winter and Spring Quarters of 1974-75.

WOW Week helps inform new students

y LEA BROOKS

Two thousand new students have just been through probably the most fantastic and exhausting time of their lives the Week of Welcome. About 250 yellow-sweatshirted WOW counselors have been orientating the new students to the campus through tours and activities since September 15.

Going to college for the first time can be quite an experience. The purpose of WOW is to help each new student feel at home at Cal Poly. Not only does WOW familiarize students to the campus but it tries to help them meet new friends.

About 100 groups of 20 new students were led on tours by their WOW counselors. Tours centered around the most important buildings on campus such as the Library, El Corral Bookstore, Health Center and the University Union.

WOW week started out by letting the new students become acquainted with their groups and counselors. Then came SLO Day, where the groups were hauled downtown in National Guard trucks and led on a rally to help them become faililiar with the town. New students also visited faculty homes before going to the dance that night.

The most exciting time of WOW was University Union night. The Union was opened up for exploration by the new students. A gambling casino complete with dancing and bar women was held in Chumash Auditorium.

Beach Day at Port San Luis finished off the week for the new students after they had registered for the first time. Once again, the National Guard trucks provided the transportation.

After a week of touring, partying, eating cafeteria food for the first time and little sleep, students were ready to settle down for classes. The careful planning of WOW week by Chairman Matt Loudon paid off.

Coordinating 2,000 students in 100 different groups was a gigantic job. Hopefully, each new student learned his or her way around Cal Poly. But the most important task of WOW is to help the students meet new friends to share the experiences college life has to offer.

Health care ...

diagnostic dentistry.

Another plan the health center provides is the Supplemental Insurance plan which is designed for students. It gives financial coverage for major medical and surgical problems and emergency outpatient care when away from the university. The cost is \$34 with a health card and \$56 without one.

Mounts believes there is a real need for student insurance. Medical care is "prohibitively expensive," he states, "and if a student is not covered by some other plan such as Blue Cross, this program is a good one."

Executives' views on student government

Message from the new ASI president.

Student government can and will be an exciting prospect this year. After spending the entire Summer Quarter dealing with such important issues as the ASI Attorney, the Gay Student Union, and the Materials and Service Fee reduction, we are confident of our ability to pursue these matters in the best interests of the entire student body. The sense of deep commitment and personal sacrifice that we have already experienced for the summer will continue - and you can rest assured that the feathers are going to fly. Although I im-mensely enjoy the job of ASI President - that's not why I'm here. I am a resource and vehicle to alleviate any and all problems of the students that are within my power. To be sure, we have as much authority and power as we choose to exercise; for example the very fact that we are pursuing the Gay Student Union case to the highest body in this state, the California Supreme Court, should speak for itself. We are asserting our authority and our responsibility, to insure the Constitutional rights of the student. Towards this end we are going to make use of the state-wide organizations open to us to deal with the Residence Hall License, Parking Revenue Fund and other matters that are directly or indirectly related to the personal rights and responsibilities of the student.

There are many areas which require the attention of a progressive and concerned student government. We are not a high school dealing with decorations for the Senior Prom but a financial corporation concerned that an adult living on campus cannot consume alcohol in the privacy of his room.

Mike Hurtado and I are not here for the money. God knows that can't be the case; we are the lowest paid student body officers in this state. We are also not here for glory or long-lasting recognition. By the time the new freshman class graduates, we will be forgotten. Our short-term goal is to leave a legacy and

structure that people can build upon and improve - all to the betterment of the students we represent. We are not a caretaker government, but an active one.

We also cannot do it alone. We are here to provide direction, support, and ammunition for the attainment of the students' goals. You have given us the opportunity to speak for you; but we need the help of many students who feel as we do - that to perform a public service is more important than money or public recognition. The Academic and Staff Senates offer us ample opportunity to voice our views, and we need students to act as our representatives on the various bodies that welcome this input. Much to his credit, President Kennedy offers much of the same representation on University-wide committees. We invite you to come see us in the University Union - see what's going on and join us in an attempt to be a part of this small isolated segment of society.

Student government is alive and well at Cal Poly. We are working hard for you- any student who discounts that is foolish at the very least. I challenge him to confront me with that - and I will show him dorm reform, the City Bus Service, concerts, guest speakers, athletics, the extensive music program, Roundhouse, Student Legal Services, public typewriters, the Child Day Care Center and above all else, the recognized and bona fide student voice.

Does this appeal to you ? Come and join us. A bunch of garbage? Come in and dare me to prove you wrong. I will accept that dare, gladly

continued on page

Message from the new ASI vice-pres.

This coming year we as students here at Cal Poly will have the opportunity to seek solutions to the many problems we face. This year the issues at stake are much greater than previous years. The fact that this is an election year and that enrollment will be much larger than past years will make it an interesting year. With the increase in enrollment

we will see and feel an extreme dissatisfaction with problems and issues of housing availabil-ity, outrageous housing costs, landlord hassles, and possible violations of constitutional rights relating to living conditions on and off campus, the parking situation which is tied in with with the "parking citation mania," the need for a more efficient legal aid, the need forstudent input in the destiny of our educational careers, especially in terms of our evaluation of curriculums and instructors and the need for a more effective hiring policy in regard to women and minorities. I could go on with many other serious problems and issues that prevail on this and other campuses.

It is not merely a question of what we will do to see this year through, but what we can do for the future generations of students who continue to inherit these problems. I have come to the conclusion that the main reasons for the continuance of these problems are due to the lack of student participation, interest and bureaucratic procedures.

The real issue is not whether students will survive the multitude of problems, but will

we stand up for what we believe is affirmative and improve those things we feel are not right. Perhaps we should re-evaluate our educational environment, in order to determine if what is going on is in the best interest of the student body. Every year

each student administration has its own policies and methods of dealing with problems of students. Regardless of the methods used, student govern-ment should be judged on its ability to meet the needs of continued on page 5

KCPR programming for Fall Quarter Poly radio station plays variety of music

by MARY ANNE LAPOINTE

Now that KCPR is back to 2000 watts, Cal Poly's radio station will be able to transmit as far as Santa Maria. These far away residents, as well as Poly students can enjoy the programming that KCPR will be offering Fall Quarter.

KCPR plays a variety of music, from hard rock to classical music. Steve Sylvester, programming director, said that KCPR will continue most of the programs aired in the past. Sylvester added that KCPR will be on the air 24 hours a day.

During the weekday mornings, KCPR plays "wake-up" music. As the day continues, rock and roll can be heard. From 3 to 6 p.m. daily, the semi-classical and classical music of the Pacific Concert is played. Evening music includes "hard rock," while the hours from midnight to 5 a.m. are devoted to "things not normally heard" on radio stations.

Special programs on weekends include the oldies show, the big bands and jass programs and a program of old radio and movie themes. "Sunday by Request" tops off Sunday evening, when listeners can call in their favorites

Sylvester said there will

probably be two new weekly music programs, one soul show and the other country and western. Both shows will last for three hours.

Along with the nightly newscast from 6 to 6:30 p.m., KCPR offers the "Earth News Service" three times daily." Sylvester said the five minute newscast discusses special interest stories.

The radio station will also broadcast the San Luis Obispo City Council meetings, on the first and third Tuesday evenings of each month. Sylvester said the station will continue "Open Channel," a call-in show where students can question the Associated Students, Inc., president and vice-president.

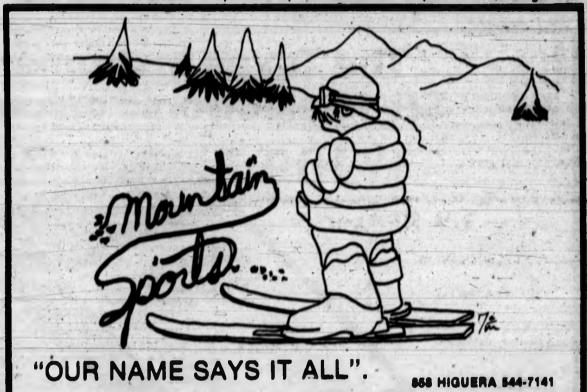

KCPR was born in 1968 as a function of the Journalism Department. In October 1969, the station went from 1.8 watts to 10 watts. Shortly after the station went to 2000 watts in May, 1975, the transmitter blew up, leaving the station to transmit on 10 watts until transmitter parts were received in August. The station is back to 2000 watts.

Students in Journalism 341 run the radio station. The class is open to all students who are interested in going "on the air." The class offers two units of credit.

Gene Mario is on the air at Cal Poly's radio students enrolled in Journalism 341. KCPR is station, KCPR. The station is operated by located in the Graphic Arts Building.

Associate dean is appointed for school position

Dr. Richard Sanchez has become the new associate dean of the School of Human Development and Education.

Sanchez, who replaced Dr. John Connely, has been a member of the school's faculty since 1972. He was formerly a teacher with the San Luis Obispo Coastal Unified School District.

An alumnus of Cal Poly, Sanchez earned his bachelor's degree from Northern Arizona University, his master's degree from Cal Poly, and his doctorate from Western Michigan University.

Dr. Sanchez has been a participant in the Academic Administration Internship Program (ACE) for the past year. He was one of 39 persons selected from 134 nominees throughout the United States for the ACE program.

One purpose of the ACE program, which includes participation in seminars in Chicago and Washington D.C., is to strengthen leadership in higher education and improving preparation of persons available in academic administration.

Poly park sanctuary from studies

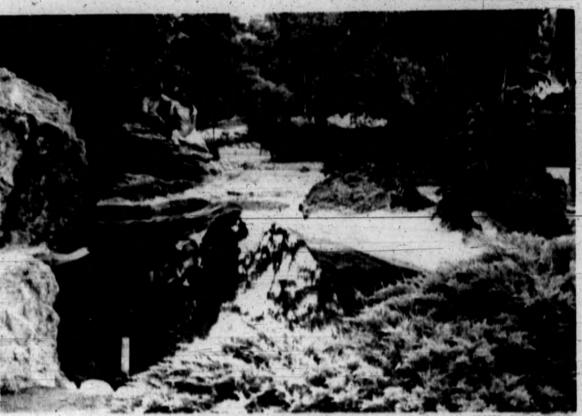

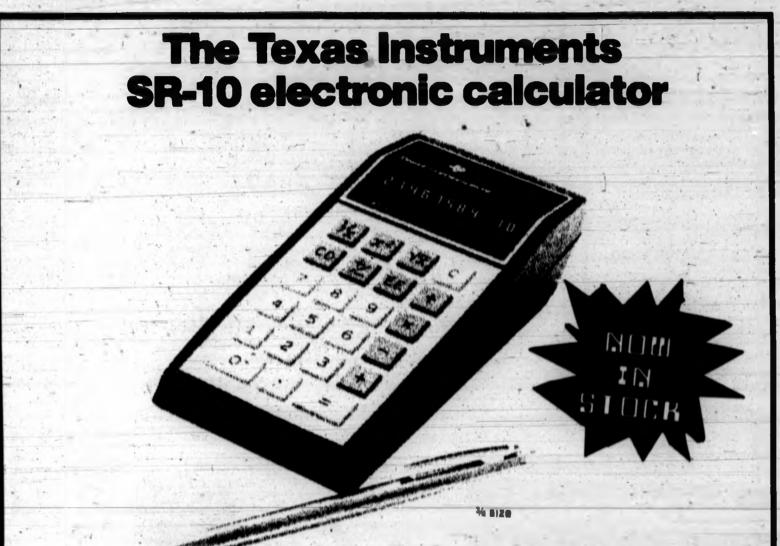

photo by PHIL BROMUND

Time for reflection can come easily in a quiet, solitude setting. The park north of the stadium is such a setting. One can enjoy the fish pond, the flowers and the trees.

by PHIL BROMUND

Would you like to spend a relaxing hour between classes or have a picnic lunch in a landscaped setting? You can do so at the fish pond on campus north of the stadium. Just sit back on one of the benches and smell the fragrance of flowers, watch the goldfish and enjoy nature at its finest.

The story behind this setting begins with Wilbur Burdick Howes. "Ted," as he was called, as a young man of 33 accepted a teaching post at a small agricultural college, Cal Poly, which had a total enrollment of not more than 250 students in that year of 1932.

Ted's first assignment was to teach horticulture and landscaping. During the next 20 years, the college campus at San Luis Obispo benefited as well as the students from his instruction. He capitalized on the college motto, "Learn by Doing," by developing projects of beautifying the campus. Ted was responsible for planting trees, shrubs, flowers and lawn areas with hedges outlining the campus.

The Ornamental Horticulture Department grew as a result of his efforts. In 1936, he was assigned to teach classes in landscaping which became Landscaping and Plant Science in 1938. Ornamental Horticulture became a major department under Ted Howes in 1947 and he constantly continued his efforts for the improvement of the department.

Once a year he invited former students, nurserymen, and those working in horticulture to attend special refresher seminars at the college. His work was dynamic until his death, December 18, 1952, at only 53 years of age.

A memorial was constructed in his honor at the site of an old Chumash Indian cooking grounds, which was still in existence on a Cal Poly campus lawn southwest of the clock tower. The old fish pond was developed to include a waterfall over rocks, a flagstone path with stones brought from Arizona and shrubs and trees donated by students, staff, and townspeople. The park was dedicated June 8, 1955, to honor Wilbur "Ted" Howes, founder of Cal Poly's Ornamental Horticulture Department. Today this park is a sanctuary from studies. This is one place on campus where one can relax and enjoy the quiet beauty of the area that Ted s had seen in his lifetime.

...a good deal more for your money.

- an extra-function calculator at an economical price
- does square roots, squares, reciprocals as well a: Jdition, subtraction, multiplication and division.
- Instant 8-place accuracy, from simple arithmetic to complex equations
- handles numbers as large as 9.9999999 x 10** or as small as 1.0000000 x 10 **
- Fast-recharge long-life NiCad batteries. AC adapter/charger included
- Pocket portability. Weighs only 9 ounces.
- Automatic (full floating) decimal placement in answers
- Bright red display shows 8-digit numbers, 2-digit exponents, minus signs, overflow sign and low-battery warning.
- Simple to operate.
- Guaranteed by TI to be free from defects in parts and workmanship for one full year

Miller is named finance manager

Harold R. Miller has been named financial manager at Cal Poly, replacing Robert J. Miller, who has been acting manager since early this year.

Harold Miller, a member of the Cal Poly faculty and administrative staff for the past six years, will head the financial operations department and direct, accounting, cashiering, budget planning and administration.

Along with those duties he is in charge of payroll, student financial aid accounts and investment services.

After earning a bachelor and master's degree in accounting at the University of Missouri, he worked as an accountant and as controller for a manufacturing and distributing company in the Midwest, and from 1966-68 taught accounting and data processing at Southwest Missouri State University. He joined the Cal Poly faculty in 1968.

Hungry appetites satisfied

by LEA BROOKS

"Eat well, eat regularly and eat enough," is the slogan of the Foundation Food Services at Cal Poly. Most students seem to take this advice because around half of them gain excess weight during the academic year.

Gaining weight is not only caused by the starchy meals

Auditions for fall production to be held next week

Auditions will be held Sept. 24 and 25 for the Fall Quarter play, The Front Page. The auditions will be held at 7:30 p.m. each day in the H. P. Davidson Music Center, Rm. 212.

The play is an action-comedy-drama of the newspaper and political circus of the late twenties in Chicago. The cast willconsist of 19 men and five women.

The Front Page will be produced by the Speech Communication Department and directed by faculty member Murray Smith. Performances will be on Nov. 7, 8 and 9.

The audition will consist of reading from the script but persons auditioning need not prepare an audition scene. If you have one, the director will hear it. Smith stresses, "No experience in the theater is necessary but, if you've had some, that's fine."

served in the student dining halls. The abundance and range in choices of food and snack outlets on campus make it easy for students to eat before, after and during meals.

John Lee, foundation food services director said the food service program offers a variety of ways to get a well-balanced meals at a flexibility of times and dining atmospheres. Students can purchase three different meal plans. The 19 meal plan offers three meals per weekday and two meals on each weekend day. The 15 meal plan gives a choice of the 19 meals served per week and the 12 meal plan offers any 12 meals from the 19 offered during the week. Meal tickets may be used in the Student Dining Hall, the Snack Bar and in the Vista Grande cafeteria.

Meal plans can be purchased for the year or by the quarter. Meal tickets can be picked up during registration or purchased at the Foundation Business Office in the University Union.

The Student Dining Hall serves complete meals cafeteria style including a choice of two main dishes. All food except the main dishes are placed in the dining rooms so the quantities of drinks, deserts, salads and bread are unlimited.

The snack bar, open on weekdays, offers the widest variety of foods on campus. Hamburgers, sandwiches, fruit, salads, drinks

and pastries made in the campus bakery are always available. Students can eat outside or in the dining room where the tables usually contain copies of the morning papers. A television set is in one room for entertainment and the through traffic from the Men's Gym to the campus provide for never a dull moment.

A choice of a la carte dishes are available at the Vista Grande cafeteria, open Monday through Friday. Many students living in the residence halls like this cafeteria because they don't have to walk as far to get there. The food is usually pretty good but is more expensive and in less quantities than in the Student Dining Hall

Meals are carefully planned by Mrs. Pauline Shaffer, Cal Poly nutrition consultant. She works with student volunteers who meet with her on a Student Menu Advisory Committee. Suggestions and new ideas are welcome from students.

The Burger Bar in the University Union offers quick and friendly service. Besides hamburgers, students can purchase hot sandwiches, salads. desserts and drinks. The Burger Bar is convenient for students who enjoy eating in the Union Plaza, want to grab a bite to eat on the way to class or are thirsty after a game of bowling in the game room of the University Union. The Burger Bar is open continued on page 15

Recycling helps relieve disposal costs for cities

Newspaper recycling programs sponsored by cities in California are showing a profit, according to the Committee for Resource Recovery. Recycling makes a large dent in solid waste disposal costs, proving that resource recovery is the only reasonable method for solid waste disposal.

Recycling helps fight inflation. Rising costs result, in part, from competition for scarce resources as well as from the extra expense involved in obtaining lessavailable materials. As more industries contribute recycled products to the marketplace, supplies are expected to match demand, thus holding prices stable.

According to state figures, Californians send over 54,800 tons of refuse to the dump daily. Nearly all of this material can be reused. Whatever is left over can be converted to energy

Many state agencies are considering methods to make total resource recovery a reality. The success of newspaper recycling should be encouraging to step-up new programs. Solid wastes, previously an expensive burden on the taxpayer, can be turned into a profitable resource. Every person can profit from recycling. Citizens can support newspaper recycling either through the community or various charitable paper drives.

San Luis Obispo Municipal Bus Routes

Municipal buses to help students travel to school

Students living off campus sometimes find it difficult to get to school. If you find yourself in that position, the San Luis Obispo Municipal Bus can come to your rescue.

Busses are in operation from 7 a.m. to 7 p.m. Monday through Sunday, except on Thursday, when busees run from 7 a.m. to 10 p.m. One can also take the bus on holidays.

Poly students can buy bus tokens in the Associated Students Inc. office in the University Union for 20 cents. If tokens are purchased on the bus, it will cost the rider 25 cents. Passengers are expected to have the correct change.

The busses travel on two routes. Route 1 includes the corners of Osos and Marsh, Johnson and Lauret, and Foothill and Chorro, among others. Route 2 includes Nipomo and Higuera Streets, Madonna Road Plaza, Laguna Village, and South and Parker Streets. Both routes in-clude the Poly campus.

Busses can be flagged down at any corner along the routes. Transfers may be made only at Palm and Oses. Smoking is prohibited on the busses.

For more detailed information on times of arrival and departure, bus schedules are available. at the Information Desk in the University Union.

10 percent increase in meal ticket plans

Cal Poly students will be

Cal Poly students will be paying 10 per cent more for their meal ticket plans this fall. John Lee, food services director, Cal Poly Foundation, said the meal ticket plans were still a bargain. The cost of the 19-meals-per-week ticket for the scademic year will increase from \$750 to \$825.

academic year will increase from \$750 to \$825. Besides the 19-meals-per-week ticket, a 15 meal plan and a 12 meal plan are available to the student. Students will pay \$275 a quarter for the 15 meal plan in-stead of the \$250 charged last year. The 12 meals-per-week plan is \$225 a quarter, up \$25 from the previous year. Lee said that 400 per cent more meal tickets have been sold this year than at the same time last year. "The students know costs are going up for everything and they have assurance that by getting their meal tickets on the annual plan, or quarterly, they can have some security in

annual plan, or quarterly, they can have some security in planning their university ex-penses for the year," he said. According to Lee, Cal Poly has experienced cost increases of six per cent to 500 per cent on various items, with an average increase of 17 per cent on all food items during the first eight months of the current fiscal year. "Is the lest three months, meat products and statterns containing, matrix the first eight months of the current fiscal year. "Is the lest three months, meat products and statterns containing, matrix the first eight months of the current fiscal year. "Is the lest three months, meat products and statterns containing, matrix the first eight months are producted on the terms are up to be plate the being are up to be plate the being are up

not have a sext year. the

When the prices for the meal tickets are set, Lee said that he takes into account the absenteeism factor of students missing meals. "During the academic year, students on the meal plans miss six to 12 per cent. of their meals," he said. "If students ate all their meals, we would not be able to offer miss! tickets for the current price." Meal tickets can be picked up during registration or purchased senteeism factor of students

during registration or purchased at the Foundation Business Office in the University Union.

Bilingual degree a first in nation

California is the first state in the nation to have a bilingual teaching credential.

The California Commission for Teacher Preparation and Licensing saw the need for bilingual teachers and drew up a proposal that was reviewed by more than 750 teachers and professionals. From this proposal, a specialist credential in

Pinballs contain own mind

by JOHN SHAW

"You know", a student observed at the UU the other night "I always thought bowlers were the funniest people to watch, but those guys over there are sure running a close race."

"Those guys", as it turned out, were standing four abreast with their backs to the rest of the people in the room and moving in time to the beat of bells, clicks and pings. "Those guys" were pinballers.

The object of their intense concentration and expletives (deleted) was none other than the pinball machine, or perhaps more precisely, the small steel ball that bounces, spins and sometimes zips through a mase of barriers, holes and chutes.

After finding out that it was actually possible to win at pinball, I couldn't figure out why no one was. After all, the ground rules seemed simple enoughshoot the ball onto the playing area and keep it there until enough points had been accumulated to win a "free" game. Why, I wondered, did people fail to accomplish this seemingly simple task? I was determined to

Agriculture majors get on the job test

Students from several Cal Poly agriculture majors get a taste of the career they have chosen through internships with cooperating agriculture enterprises. They earn up to 112 units of credit, find out what working in a particular industry is like and learn what additional preparation they need before graduation.

play a game and find out for myelf.

Just then, a completely broke student backed away from the end machine and stumbled out of the room crying, "Why me Lord, why me?" Knowing that op-portunity knocks but once I made a beeline for the vacant machine and dropped in a quarter. Immediately, there was a series of whirrs and clicks and finally three distinct pops.

I stood there waiting for the steel ball to appear, and when it didn't, I tried to look un-concerned. I even punched the flipper buttons a couple of times, just so the people at the other machines and the ones standing around wouldn't think I was a green rookie.

But they knew I was when the 10-year-old boy standing behind me tapped my shoulder and mentioned that I would have to press the button on the front of the machine if I wanted the game to begin. With steady hand and red face, I pushed the button and the ball appeared in the shooting alot.

What had started out as an enjoyable evening suddenly turned into a desperate effort to fight off frustration. It seemed like every time the ball left the slot, it either went directly down the side slots, or it simply died on me and disappeared between two flailing flippers.

After this happened a couple of times, I just knew that somehow, the steel balls had a mind of their own, and eyes equipped with vision far better than the 30/ 20. My heart sank.

The first game vanished in a blur of nothingness, netting me less than a fifth of the points necessary for a free game. Game number two went even faster, ending abruptly with the "tilt" sign flashing at my contorted face.

Then I realized that this was it -either I won on this final same. or I too would join the neverending list of losers who had matched reflexes with this coincarniverous machine.

Setting my jaw (I had to stop my teeth from grinding), I sent the first ball into the battlefield. It bounced around for a couple of seconds, then took a this-is-an incredibly-hard-to-believe bad hop and was gone. My hopes bagged

Ball number two did pretty well actually, and I was halfway to my point goal when it finally exited via the side slots.

Balls three and four didn't live up to expectations and things looked grim with only ball number five to go. Ten thousand, three hundred and sixty-five points weren't so many, I kept telling myself. After all, hadn't I done better than that on the second ball? Sure I had, and I tried to convince myself I could do it again.

I was still reassuring myself that anything was possible when the ball entered the arena once more, and . . .

Walking home later that night, I told myself that it was no disgrace to lose a hard game like that by only ten thousand, three hundred and sixty points. Who cared?

And besides, I could still stop by the ice cream shop and get a nighttime snack on the way home. If only I had a guarter left.

photo by THOM HALLS

Pinball can often be a frustrating game. Trying to hit the correct buttons at the precise time is too much for some.

More than a story

photographs have never been found.

In 1965, the French explorer Fornand Navarra, claimed that his son found the Ark. According to Navarra his son saw the Ark beneath the clear ice. Navarra, an industrial wrecker in Paris, was quoted as saying, "What else could it be, 14,500 feet up on a mountain, 150 miles from the nearest tree, but Nosh's Ark?"

The first carbon dating of the wood that Navarra took from the mountain was reported to be at least 4,500 years old. After Navarra told the scientists that this wood was from Nosh's Ark

they changed the dating to at least 2,000 years.

Perhaps there was actually a person named Nosh who was ordered by God to build a mighty ark the size of an aircraft carrier. In light of these accounts maybe this enormous Ark "came to rest upon the mountains of Ararat" as the Bible claims. If so, there is a good possibility it might still be up there.

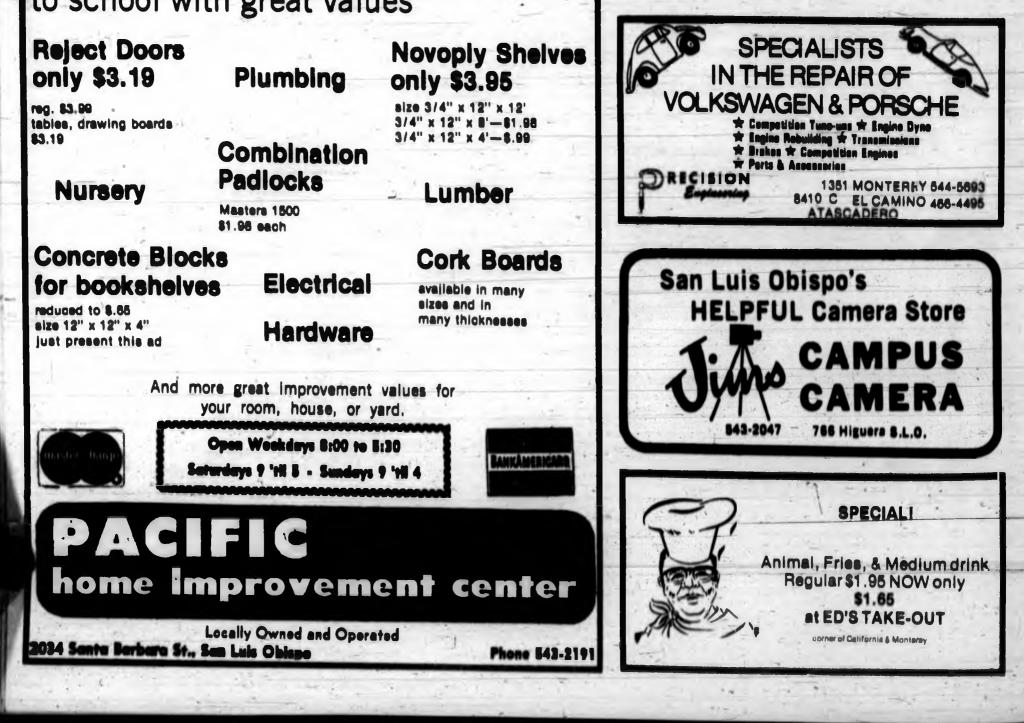

If the story of Noah's Ark and the mighty deluge that covered the earth because of man's disobedience to God is true, what about the other stories from this Bible?

Cycle safety: CHP offers tips

by LEA BROOKS

Over ten million motorcycle riders in the United States have pushed their way into the American lifestyle of transportation and recreation. Due to their smaller size, compared to cars, openness and visibility problem, the vulnerability of the

Night spots... continued from page 5

midnight and on Thursday through Saturday until 1 a.m., with entertainment every night. Laguna Village Inn, 1396 Madonna Road, is a good night spot for dancing. Sometimes the appearing band plays rock, while at other times the band is country western. Regardless of the style of music, Laguna Village Inn is a good place to boogie and socialize, with its fairly large dance floor and ample space for sitting. The bar is open every night of the week until 2 a.m. and it requires no cover charge.

Another night spot where dancing is offered is Howard Johnson's cocktail lounge, off of Highway 101 on Los Osos Valley Road. No cover charge is required at the door, but I. D.'s (for 21 and over) are usually checked. Rainforest, the band which appears regularly on Wednesday through Saturday, plays both country western and rock music. The cocktail lounge is open every night until 2 a.m. If you would like to check out

one of the night spots out of San Luis Obispo, try the Briar Pit, 1696 Main, in Morro Bay. It is a little pissa place which has a rock band every Friday and Saturday night until 2 a.m. There is a cover charge. Girls must be 18 and guys must be 21 to be admitted.

Trader's Nick's is another popular night spot out of town. The Pismo Beach restaurant and bar, 1601 Price, offers dancing in a Polynesian atmosphere. The bar is open every night until 2 a.m.

If you really want to go far out into the country for an evening, go to the Poso Saloon, 18 miles out of Santa Margarita on Poso-Road. It's a step back into an era when rustlers and sharpshooting cowboys roamed the range and men like Wyatt Earp and Doc Holliday were living legends.

The saloon is rustic and oldfashioned, with its old paintings and branding irons decorating the walls.

It's great to go up there with a group of friends, since the atmosphere, rather than the people, is the saloon's attraction. Pozo Saloon has dancing and is open on Friday and Saturday nights. "We're open until 2 a m. or whenever everyone wants to o home," drawls the jovial bartender San Luis Obispo has guite a few more night spots, but these are the most popular. Try going to a couple of these places. It's a great way to spend a Saturday ight or any night.

motorcycle rider raises important safety concerns.

Officer J. E. Huber of the California Highway Patrol said the best safety tip he could ever offer is plain defensive driving. He said motorcyclists should always be doubly sure before making a move.

Huber said, "Motorcycle riders should always wear helmets. Helmets will become mandatory if a measure is passed by the California Legislature. Without them, motorcyclists have no protection at all."

The motorcycle rider is protected from the physical impact by his clothes only. By wearing reflective or lightcolored clothing at night, the motorcyclist is more noticeable. Gloves should be worn to prevent painful hand injuries in case of a fall. Glasses or safety lensed soggles act as a face shield. Boots or high top shoes with hard soles protect the feet.

Concerning size, the driver

Food spots.

continued from page 11 from 10 a.m. to 12 p.m., Monday through Friday, 10 a.m. to 1 p.m.: on Saturdays and 12 noon to 11 p.m. on Sundays.

Delicious applesauce donuts are available in Eisie's Donut Shop, open weekdays from 6 a.m. to 1 p.m. Other kinds of fresh donuts can also be bought at Elsie's, located in the Annex between the University Union

and student dining rooms. Also located in the Annex is the Sandwich Shop, open weekdays, 10 a.m. to 2 p.m. Sandwiches filled with steaming, hot ham, pastrami, corned beef or roast beef are available with a choice of bread and cheese and an assortment of salads.

Vista Grande Restaurant is open daily from 11 a.m. to 9 p.m. for fine dining and a view of San Luis Obispo. Students can select from a wide menu while relaxing and enjoying the view.

For ice cream lovers, there is the ice cream parlor located in the University Union. The Roaring 20's theme provides for a happy atmosphere and the ice cream sundaes, malts, shakes, and cones with Cal Poly ice cream are delicious. Penny candy is also available. The ice cream parlour is open 11 a.m. to 10 p.m., Monday through Friday.

Students who like convenient vending machines can find drinks, fruit, hamburgers, burritos and snacks in the Cellar, on the first floor of the Library. A microwave oven heats food in seconds. The Cellar is open weekdays, 7 a.m. to 10 p.m. Even the El Cerral Bookstore carries a wide variety of candy, gum, and snacks for students who like to munch. No matter where a student finds himself on campus, he's not far from food. Cal Poly Food Services have really provided a lot of ways to satisfy hungry appetites.

must be able to reach the ground with his feet while sitting astride the seat. When he is seated and holding the handlebar grips, his hands must be below his shoulder height.

According to the California Driver's Handbook, all the basic rules of the road in the Vehicle Code apply to motorcycles. Speed limits and tailgate laws should be followed by motorcyclists as well as by motorists.

It is unlawful to carry a passenger except on a seat securely fastened to the machine in the rear of the driver. The passenger must be provided with footrests, on which he must keep his feet while the motorcycle is moving.

As a safety measure, motorcycle riders should never pull out from a parked position before checking for oil, water or gravel underneath their bikes. They should look out for rocks, boards, hub caps, pieces of tires and other things that may be out on the pavement. Riders should avoid riding on loose surfaces or debris that can cause the bike to go out of control.

Motorcyclists should always assume that the motorist doesn't see him. Riders shouldn't ride in the blind spots of other vehicles and be ready for unexpected hazards like left hand turns in front of them. Motorcycle riders should always be looking for a traffic "hole" into which they could dodge if trouble arises.

The front wheel brake has the greatest stopping power. Used with the rear brake, it can reduce the total stopping distance of the cycle. The possibility of getting into a skid is much greater with the use of the rear brake only.

Cyclists should learn to give hand signals to let the other drivers know what they're going to do. When preparing to leave the highway, motorcycle riders should move to the extreme right or left side of the lane from which they will exit.

J. E. Huber said frequent inspections of motorcycles for broken or worn parts could prevent mechanical failures while riding. He also said the most important safety device of all is to abide by the law.

Majors combined to form Ag Department

The majors of Farm Management and Agriculture Business Management are now grouped in one department known Agricultural Management.

According to Edgar A. Hyer, head of the Agricultural Management Department, the switch was made for two reasons.

First of all, there are many similarities in the courses required by FM and ABM. The second reason was due to general confusion of the two majors.

The curriculum emphasizes the business training phase of agriculture. An extra touch of specialization needed to analyze

Dust, Noise, Experience

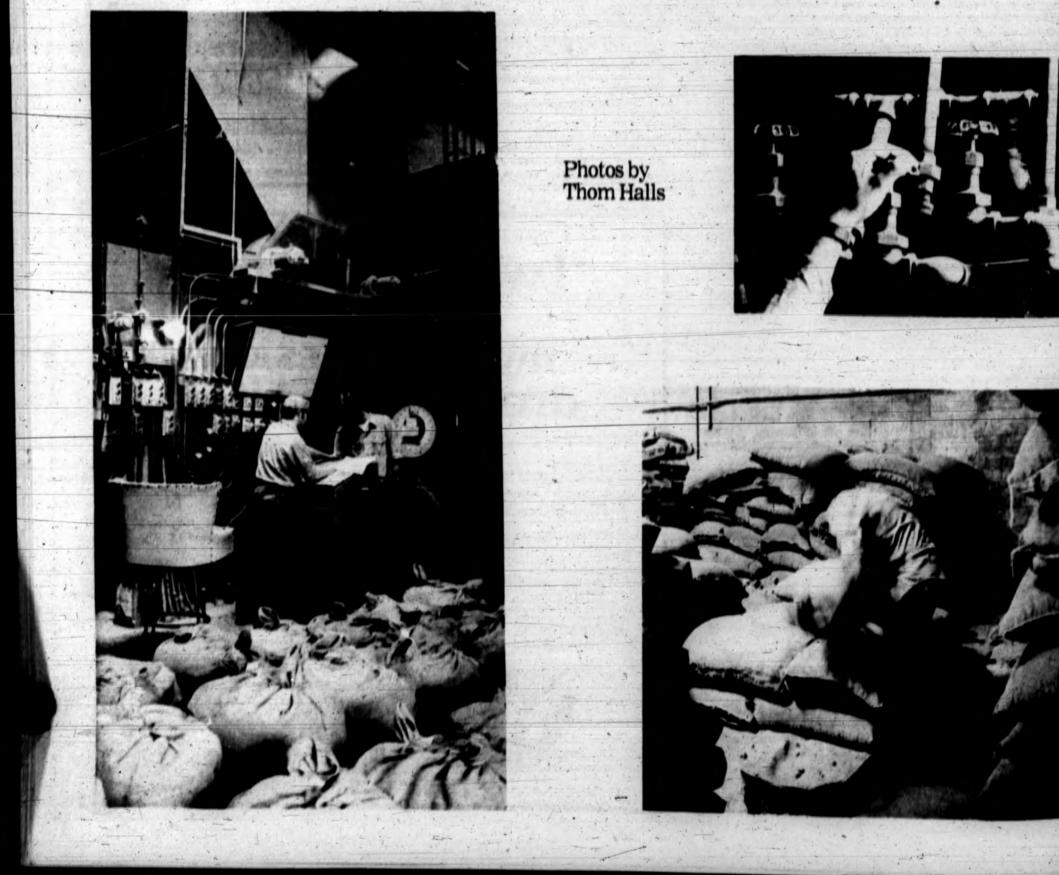

In an obscure corner of the campus lies one of the busiest operations of this university, the Feed Mill. It is here that most of the feed and grain for hundreds of projects is mixed and distributed to the various agricultural departments.

The noise at times is intense, the dust is tremendous, and the work is abundant.

The operation is all summed up by foreman Mike Elston in one word; experience. "We are kind of a hub for many of the other departments. They

could function without use, but it would cost them a lot more." "The guys who work here," continued Elston, "gain valuable experience, for while not only are we supplying feed and grain, we are supplying it for one of the largest acreage campus' in the United States." Almost everything that is edible for animals is mixed here at the mill. From Milo to Almond husks, the mill operates all year round on a 40 to 50 hour week and pro-vides an extremely realistic working environment for its employees.

Come and investigate the various floral arrangements and potted plants sold in the campus Ornamental Horticulture Florist Shop.

by LEA BROOKS

Guys! Why not surprise the woman of your dreams with a bouquet of flowers from the Florist Shop in the Ornamental Horticulture Building. Hours are from 1 to 5 p.m., Monday through Friday and 8 a.m. to 5 p.m. on Saturday.

In addition to bouquets and floral arrangements, the Florist Shop has a variety of potted plants. Indoor decorative plants are the shop's biggest sellers, said manager John Dickey, an OH major concentrating in floral design.

Started in 1969, the Florist Shop is run by the Gordon Student Chapter of the American Institute of Floral Designers. Every quarter except summer, a new manager and assistant manager is voted on by members of the chapter and approved by the OH faculty. During the summer, and assistant manager isn't needed because there's not enough business to keep him busy, said Dickey.

The full-time managers are the only paid student help. The rest of the shop's work force is comprised of the AIFD Student Chapter, which has about 30 members. Every member is expected to sign up for one hour each week and one Saturday a month. During the assigned time, students either work on sales in the Florist Shop, design or prepare floral arrangments, clean up the shop or whatever needs doing the most, said Dickey.

Membership to the AIFD Student Chapter is by invitation only, said Dickey. A student must

Energy studies conducted here by Poly faculty

Two studies expected to apply solar energy to the needs of consumers are being conducted by members of the Cal Poly faculty under federal grants.

A \$45,000 grant from the Department of Housing and Urban Development is being used to study the use of the sun's rays to heat and air condition a specially-built dwelling. The use of sunlight to dry fruits for the commercial market is the subject of a \$254,000 grant from the National Science Foundation. take a certain number of floral disign courses to be eligible for membership.

"The main purpose of the Florist Shop is to give floral design students some practical experience" said Dickey. "Our purpose is not to compete with downtown, so we don't advertise except by word of mouth.

"We're different from a commercial place in that most people come in to buy only one flower. We like to encourage that kind of buying."

Flowers for the shop are grown by OH students, either as class or student projects. The indoor tropical plants are cultured by the OH Club. Facilities of the OH Department include eight greenhouses and fields for flower cultivation.

"Holidays are the biggest time of the year for the Florist Shop," said Dickey. "We do a lot of corsages, boutonnieres, conterpleces and special orders for banquets, weddings and fraternity functions. Most of our customers are from the university community.

The Florist Shop has a policy of cash and carry because there are no facilities for delivery. Most orders are done by telephone but there are usually a few flower arrangements made up if someone wants to just drop by and pick one up.

"We sell flowers and plants that are in season," said Dickey. "It's not a question of what's most in demand, it's what we have. If it's special, for a wedding or something, we order it from the market.

"Flower arranging is an art and a very personal form of experession. It's an honor to arrange flowers, especially when you're doing a wedding." So if you're in the mood to buy

So if you're in the mood to buy flowers or potted plants, why not cruise on up the hill to the OH Florist Shop. You might even get in on one of the frequent plant sales.

OPEN DAILY 9:30-5 SUN. 10-3

Volunteer service offers information

If you find yourself at a loss for things to do on campus, why not just money on over to Roundhouse, located in the University Union, Rm. 103.

Roundhouse is an information service for Cal Poly students. Operated by some 30 volunteers, Roundhouse has all the information concerning clubs and activities on campus.

Annalisa Winde, director of Roundhouse, said the agency also releases phone numbers of students and teachers. "We should have all the phone numbers of new students by December," she said.

"If students have any questions

about who to contact on campus to help with a problem, we can tell them who to contact," Miss Winde said. "If students should have any gripes about anything. we relay the gripes to the proper people."

Roundhouse operates a bulletin board for lost and found pets and posts the weekly cafeteria menu. The agency also has a suggestion barrel in the lounge area outside the Activities Planning Center in the University Union.

Roundhouse will be open from 8 a.m. until 10 p.m. weekdays, depending on the number of volunteers working. The phone extension to Roundhouse is 4754.

Take a handful of raisins, throw in some nuts, add some MAM's and top it off with a little granola What do you have?

You have a mixture called gorp which can be stuffed in any corner of a backpack. There are as many recipes for it as there are backpackers at Cal Poly.

The Outings Committee, an Associated Students, Inc. committee which organizes backpacking trips and other outings, considers gorp its favorite energy food for those exhausting trips. Other foods the committee takes on its jaunts are mostly of the dehydrated type, such as soup, stroganoff and fruit drink mixes. Peanut butter, crackers, oranges, celery and carrots are the other popular take-along foods.

"We don't buy that dehydrated food, which is especially prepared for backpacking. It usually runs 50 percent more in cost than the dried food you can find on any supermarket's shelf," said Glenn Yamashita, a committee member.

The Outings Committee, which was started in 1962 at Cal Poly, offers its outings to any Cal Poly student, faculty and staff member. It also offers the use of its gear, which can be rented on a daily, weekend or weekly basis. The gear can be checked out from the Escape Route, the com-mittee's headquarters for information and gear rentals. The Escape Route is located on the bottom floor of the University Union, across from the El Corral Bookstore.

The committee organized three backpacking trips during the summer. The trips were taken on

weekends, with about 20 members going on each trip. The trips' locales were Mineral King; Tuolumme Meadows in Yosemite and Pear Lakes in Sequoia.

Gorp—energy for packers

The members finance their own ways on the trips, with the money being used for group food and gas. Members can bring their own food if they wish, but if they choose to pay for group food, the cost is usually three dollars for two days and four and a half dollars for three days.

The next day, the backpackers leave camp in the morning after breakfast. They usually hike about six miles and then make camp. The rest of the day is spent taking pictures, swimming and fishing. On Sunday, the members hike back to their initial campsite, rest and then head back to San Luis Obispo.

Another summer activity the **Outings** Committee organized was a bicycle riding trip to Solvang. Ten bikers rose early at

The only sleeping gear taken on overnight trips are sleeping bags. No tents are ever used and on. winter trips if there is snow on the ground, the campers dig snow pits where they place their sleeping bags.

On a typical backpacking trip, the members leave on a Friday night. As soon as they reach their destination, they "fall out the door, make camp and fall im-mediately into sleeping bags," said Bill Blakely, another committee member.

a.m. and rode 75 miles to Solvang. The ride down took them about six hours. The farsighted members placed their bicycles in two trucks, which had driven to Solvang and rode back in the trucks after a

day of sightseeing. Other types of activities the Outings Committee organizes during the school year are conceing, snow camping, in-nortubing, cave exploring, rock climbing and ski trips. For a continued on page 32

ne Ann

to by ROGER SHANK

by LEA BROOKS

A spay-neuter clinic with rabies vaccinations for dogs and cats will be built by the Depart-ment of Animal Control and Regulation. The shelter will be located in Camp San Luis Obispo and should be completed by June 1975.

1975. The shelter will hopefully be an incentive for people who can't afford a veterinarian's fees to have their pets spayed or neutered. There is presently a population explosion of animals, resulting in the destruction of millions of unwanted homeless animals. Last year, over 16,000 dogs were picked up in San Luis Obispo County. The vast majority of them were put to sleep. Interviews are currently un-derway to determine the number of dogs and cats in the County of San Luis Obispo. The total will be the base for determining the priority of needs and the scope of

priority of needs and the scope of

priority of needs and the scope of new programs. Jim Dority, head of the census, said "The main purpose of the census is to urge pet owners to license their animals. We would also like to know where our program should be emphasized; determined by the most com-plaints." plaints."

There are 10 interviewere covering the entire county deor-to-door by September 15. They will introduce the department's program, hand out a brochure concerning tesponsible pet ownership and ask five questions. The questions cover: the number and sex of your dogs and cats; are any of them spayed of There are 10 interviewers any of th

continued from page 16 and manage farms and ranches is provided by the FM option. The option of ABM provides the training experience required of firms providing supplies and services to the farmers and required of firms marketing the farm goods once produced.

Courses required of the student in the Ag Management Department, not associated with agriculture, include the general education courses required of all students; Statistics, Law, Economics and Accounting.

Career training in FM direct the graduate to farm, ranch or feedyard operation. The farm appraisal section of the major produces graduates ideal for the appraisal section of eredit institutions. persennel. Agriculture sales representative jobs leading into more contralized management positions are important career routes.

Other careers are found in farm credit institutions, farm brokerage and propertymanagement firms, advertising, food chains, brokerage firms, food processors, and even agricultural fairs needing managers.

In 1996 Cal Poly had its first graduates in FM and its first graduate in ABM was in 1992 According to Dr. Hyer the first graduates in FM were Agricultural Economics malors picking up an extra degree. Cal Poly adopted an ABM major in the school year of 1990-61 and the FM major was established in the

Book stresses self defense

by ROGER SHANS

After a night class you are walking to your car. As you unlock the door a man grabs you from behind. Are you prepared to defend yourself? Most girls aren't.

A man comes to your apartment door, introduces himself as a telephone repairman wanting to check your phone. He wears a company uniform. Should you believe him and let him in or do you first confirm his appointment with the office?

If you are unsure of your self defense techniques in either of these cases, you should hurry over to the university library and check out the book titled "Self Defense for Women: A Simple Method", by Bruce Tegner and

New plan for vet insurance

Nationwide, there are 2.7 million Vietnam-Era veterans who are eligible for a new lowcost Veterans Group Life Insurance program. This new program offers up to \$20,000 coverage for only \$3.40 per month.

Veterans Administration stated, that eligible veterans have nearly a year to apply before the deadline of August 1, 1975. The non-renewable fiveyear term insurance is available to veterans discharged from the military since April 2, 1970.

The new Veterans Administration-supervised program was authorized May 24, 1974, under the Veterans Insurance Act. This program offers coverage in amounts of \$5,000, \$10,000, \$15,000 and \$20,000. Maximum coverage rates are \$6.40 per month for veterans age 34 and under, and \$6.80 for those 35 and over.

Application forms are available from VA offices or from the Office of Servicemen's Group Life Insurance, 212 Washington Street, Newark, New Jersey, 07102, for veterans discharged prior to August 1, 1974.

Applicants must furnish evidence of good health, however, VA-rated serviceconnected disabilities will be waived.

Service personnel discharged after August 1, 1974, will receive application forms automatically. Personnel leaving active duty are permitted 120 premium-free days to convert Servicemen's Group Life Insurance to Veterans Group Life Insurance without medical examination.

Alice McGrath. "Many crimes, even brutal crimes of violence, could be prevented if the minimum rules of safety were observed," say the authors of this practical home study course.

The book stresses two aspects of self defense; decreasing the likelihood of physical attack and techniques that can be used if attack can neither be prevented nor avoided. The physical actions taught by Tegner and McGrath are so simple and effective that any woman can learn to protect herself against a larger, stronger assailant. Kicks, hand blows and finger stabs, directed to specific body targets, along with the arsenal of weapons contained in most purses, are defenses that all women have with them and could use if given instruction.

Self defense should be compared with life-saving and firstaid rather than with sports. They should be learned in the hopes that they will never be used but will be available if the emergency need arises.

With a background of effective self defense to give you some confidence, -you can maintain your composure if attacked. "Your attitude should be that of a woman prepared to act as required by the situation—you are not helpless prey," says Bruce Tegner and Alice McGrath.

The great number and variety of non-farm businesses in griculture look to ABM for

school year of 1956-57. Dr. Hyer was the first department head of PM.

Tips to prevent burglary

Do you often worry about your expensive storeo equipment or bike being ripped off? If you do, you certainly have a good reason to do so.

Burgiaries and thefts affect Cal Poly students more than does any other crime committed in San Luia Obispo. Many students have had their apartments or cars broken into, from which property has been stolen. The crimes are usually reported, but the San Luis Obispo City Police Department

Do you often worry about your often has a difficult time tracking to the store of t

You can help the police and yourself if you engrave your driver's license or social security number on anything of value in your possession. This simple procedure enable the police to identify stolen property more easily.

For over a year, the San Luis Obispo City Police Department has been offering a service of electrical marking pencils for the use of engraving. The service consists of an individual with proper identification, such as a driver's license, placing his name on a sign-out sheet and being given the use of the pencils for a few days. The pencils can be hooked up to any electrical outlet on the wall. "This service is open to

everyone in the city," said Administrative Sergeant Clifford Chelquist of the police department. "It is a very good method to get stolen property back. It also discourages thiefs from stealing because they'll see an identification number on the property and tend to shy away from it."

Chelquist offers other ideas for students to prevent burglaries against them. "Students should always keep their apartment and car doors locked," he said. "They should always keep a light on in their apartment when they are out at night. Of course, I could go on and on about different ways to safeguard ones property, but I think that most of the ways just boil down to common sense."

Often the big problem of students being ripped off is not their knowledge on preventing thefts, but their refusal to take the problem of thefts seriously.

"The problem must be made real to them," Chelquist said. "So many students think thefts only happen to the other guy. They just don't realize it can happen to them."

Heavy fall schedule for Cal Poly's band

"Just before we get out on the field, I get real excited. I want to do a good job for all the people who are out there, to give them their money's worth."

These are the words of Gary Liwanag, music board chairman and past president of the Cal Poly Marching Band, describing his feelings about a football show. The marching band will be performing at three home half

time shows and one show at Cal Poly Pomona during the 1974 fall football season.

Many plans for the upcoming season have already been made. One show, "Back to San Luis," will feature the band playing songs from musical groups who have performed at Cal Poly.

Selections will include songs by Tower of Power, Cold Blood, the Moody Blues and Gordon Lightfoot.

Another show, "Soul Train," will include soul music by Stevie Wonder, the Temptations and Tower of Power.

Liwanag said, "The band is crasy about Tower of Power. When they were here Spring Quarter, I think every member of the band went!"

The marching band is comprised of 120 members, eight letter and flag girls, two drum majors, two guitar players and William Johnson, the director since 1966.

"During the last four years or musicianship has really inproved," said Liwanag. "This is probably due to our reputation and public relations made who we go on our tour in the spring."

Every year, the band spends a week on tour playing at his schools in specific areas of California. During the tour, basis members stay overnight is private homes. Band members have a chance to tell people about the band and Cal Poly.

"We get a lot of new basi members from schools where we toured because they think our music is great and Cal Poly is a good school," said Liwanag. Liwanag said, "The marching band has a great reputation especially since a music major is not offered at Cal Poly."

"We've been compared to the best bands in the state by a lot of college band directors," said Steve Dowd, a band member and music board representative.

Dowd owes this fact to the pris and organization of the marching band. He said, "We're like a very close-knit family. We strive for perfection as a whole group. He many bands will play at Cal Perbecause they know we'll blow or march them right off the field." Tryouts for the band will be

Possible Fisher extension

A bill to extend the deadline for finishing teacher-preparation courses under the old Fisher credentialing act has passed the Senate Education Committee.

If the bill is passed by the state legislature and signed by the governor, the Sept. 15, 1974 deadline would extend to Sept. 15, 1979.

Dr. W.P. Schroeder, head of the Education Department at Cal Poly said some type of extension will be provided for the Fisher Credential, "however, there will be carefully delineated requirements that must be met for people to qualify for the extension."

Present legislation states that

Foreign

persons qualifying for the Fisher Credential must have completed student teaching prior to Sept. 15, 1971. "Otherwise, the person would have to qualify for the Ryan Act," said Schroeder.

The Ryan Act requires that student teaching must be made available to candidates in the four-year bachelor degree program, said Schroeder. "Both acts require a fifth year of work to earn a full credential, however, the student is qualified for an appropriate credential at the successful completion of student teaching," he said.

Under the Ryan Act, students must earn a diversified or liberal arts degree for an elementary credential. "Or candidates can pass a subject matter examination dealing with such content of that degree," said

Act, students could earn a degree in child development, math, biological sciences, social sciences or related fields for the elementary credential."

For secondary credentials, there is no provision of teaching minors under the Ryan Act. "The candidate must earn a bachelen degree in the subject field to be taught, or pass an examination the appropriate field or fields," Schroeder said.

"Ryan Act credentials are based on the university preparation program, requiring exceptionally high accountability of performance of each candidate," he said. "In addition, there is a much higher involvement of school districts and the communities in the professional preparaties

Fixing furniture can pad wallet

by PHIL BROMUND

Would you like to furnish your spartment elegantly? Or would you like to make a cash profit from an interesting hobby? Refinishing furniture gives the opportunity to do both.

The local paper almost always carries ads like the following in the, "For Sale, Miscellaneous" section. "Dresser with mirror and chair, \$15.00. Twin beds with headboards, \$12.00 each. Oak desk, \$15.00."

To have an attractive piece of furniture when you have com-pleted the refinishing, look for quality and stability. Many times a damaged part can be repaired very easily with some white glue and a glue clamp.

Keep alert for old pieces of furniture made of wood without a veneer or plastic surface, as this type can be refinished to improve the value and looks.

My most recent "find" was an old rocking chair that had three coats of paint and one antiquing layer. It looked as though it was caught in the flood of 1973 as it was coated with mud.

The restoration of this piece of furniture started off with a good scrubbing with soap and water to remove the mud. All cloth was stripped off.

Next, I stripped off all of the old paint and varnish from the wood surface with Speedomatic Paint Remover. This product is nonflammable, easy to use, and inexpensive. It is spread with an old paint brush and it chemically loosens the old paint layers. When the surface bubbles, it is wiped off with an old rag. Two or three applications were needed.

After all of the old layers of paint were removed and the surface smoothed by sanding, it was ready for the new finish. By choice, the finish can be stain, shellac or varnish, poly-urethane plastic, or just plain floor wax can be rubbed on. I recovered the chair seat with tapestry

This simple renovating method can be used on all wood furniture, however, not on molded plastic or laminated surfaces. When finished, you have a functional and beautiful piece of furniture to keep or advertise for sale at a profit.

Explore the Craft Center

by BRUCE WRIGHT

The University Union Craft Center is many things to many people. It's an area in which to different pursue many recreational crafts.

For the beginning craftsman, the center is a comfortable place to explore the world of crafts. By signing up for any of the shortterm low-cost workshops, the beginner can learn the best way to make things in a fairly short period of time.

The student taught workshops are offered solely for the purpose of leisure time self-development. Workshop registration for Fall Quarter will begin on September 25, and continue until workshops "fill".

For all Cal Poly students, faculty and staff, the center offers well-lighted space, the loan of tools (free of charge) and piped-in music.

For the skilled artisan, the center is a free-time workshop. It's somewhere to work at your own pace, on your own projects, with equipment and tools available whenever you come in. You need not take a workshop to use the center and the only cost is supplies you may want to purchase.

There is a total of nine-workshops offered by the center. The cost of the workshops vary from \$7.50 to \$10.00. Workshops offered this fall are lapidary, leather, jewelry, ceramics,

weaving and macrame, rawhide braiding for the horseperson, stained glass, silk screen and photography.

Do you have a rock that has great potential? Bring it to the center and people there will cut it for you. If you have a permit, you will be able to finish trimming and polishing it. Permits are obtained by either demonstrating a knowledge of the equipment to an instructor or by attending the lapidary workshops, both beginning and advanced classes.

The center has practically all the tools you'll need for tooling leather. There is a good assortment of stamps, punches, rivets and dye. The use of a sewing machine is available with a permit. To obtain a permit, you must prove your ability to the instructor before or after any leather workshop.

A centrifugal casting machine and a vacume investor is available for those who have their permits. There are also grinders, drills and buffers that will add the finishing touches to your gold or silver masterpiece. Permits can be obtained from instructors before or after the times listed for jewelry

workshops. Available for everyone: clay (price includes glazing and firing), handtools, work tables, kick wheels and a kiln. No permit is necessary.

A handout explaining all the

basics of macrame to anyone who does not wish to take the workshop will be available in the center.

For the rawhide braiding horseperson, techniques of fresh hide tanning and transforming into rawhide suitable for braiding is offered. All the basic techniques and principals are taught.

A good pocket knife, a small sharpening stone, grubby clothes and the desire to work will help perpetuate the dying traditional art of the California vaquero. Supplies available for stained

M&S fee increase for fa

Students registering for Fall Quarter will find they are paying a \$45.50 Materials and Services Fee, an increase of \$5.50 from last quarter. Yet the student services received are going to be noticeably reduced.

The reason is Gov. Ronald Reagan's veto of a \$2.1 million allotment that was to be appropriated from the state's general fund to compensate for an \$5 decrease in the Materials and Services Fee set for this fiscal year.

To meet the rising costs of instruction materials and student services the Board of Trustees of the California State University and Colleges last year raised the Materials and Services Fee that each student pays annually from \$118 to \$144.

A bill introduced to the state legislature by Assemblyman Willie Brown (D-San Francisco) cut the student expenditure to \$136 and proposed that \$2.1 million be taken from the general funds to compensate for the decrease. Reagan approved the \$136 fee but scratched the \$2.1 million.

Print museum shows methods of old and new

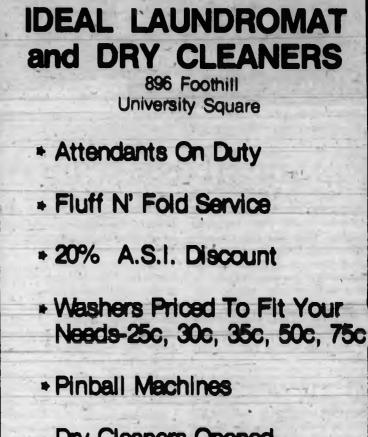

The Shakespeare Press Museum at Cal Poly is the oldest and most complete collection of antique printing and newspaper equipment in the Western United States. With its location adjacent to the University's Graphic Communication laboratories containing the latest printing and publishing equipment, the museum offers a colorful contrast between modern printing methods and those of the 19th Century.

tough," according to Everett Chandler, Cal Poly's dean of students. The \$137,000 cut to be borne by the university will be mostly in student services. One result of the cut, Chandler said, is a 90 percent reduction in student employment on campus. Other possibilities include reducing the business hours of certain student services, such as the Health

This makes things "kind of Center and financial aid office By cutting the office hours of these services, Chandler said, the employes will be spared from overwork. The university had planned on hiring new personnel before the Materials and Services was reduced. Chandler said there is a chance the legislature in January may restore the fee to the original \$144.

Cal Poly is the only member of the state university and college system with it s own campus fire department. The school's fire engines only roll 25 to 30 times each year.

Financial assistance is offered

A variety of financial aid is available to Cal Poly students, whether the aid be loans, scholarships or grants.

For any type of financial aid desired, the student must go to the Financial Aid Office, Ad-ministration Building Rm. 107. There one can obtain the necessary forms and information for the type of aid the student wants.

All loans are available to fulltime students throughout the year. The short term loans of \$30 must be paid back by the end of the quarter. An emergency loan up to \$200 can be obtained if the student has a co-signer. The cosigner must be someone other than a student, said Lawrence J. Wolf, financial aids director. The emergency loan must be paid back by the following September 1. No interest is charged if the loans are repaid in time.

Long term loans are also available. The National Direct Student Loan is distributed by the federal government, with an interest rate of three per cent. The Federal Insurance Student Loan can be obtained through local banks, with an interest rate. of seven per cent. The student must apply for these loans at the Financial Aid Office, Wolf said. Besides loans, the Financial

Office administers Aid scholarships. Wolf said there are over 250 scholarships available, 115 of which are Leopold Wrasse agriculture scholarships. The Wrasse awards are \$500 each. The remaining scholarships are

either tied to specific disciplines or they are general scholarships. Wolf said all applications for scholarships must be turned in by April 1.

Along with scholarships, grants are available for the needy student. Federal grants include the Supplement Education Opportunity Grant, the Basic Education Opportunity Program and the College Opportunity Grant and the State Scholarship and Loan Commission Grants. Applications for grants must be

turned in by June 1. To qualify for any type of financial aid, Wolf said the student must state all the resources he has available to him. This amount is subtracted from his estimated expenses for attending school.

Poly firehouse only one in state system

Cal Poly is unique in many ways. One of the most important is its status as the only member of the State University and College System with its own fire department.

According to Chief George **Cockriel of the University Police** and Fire Department, the firehouse has been answering calls ever since he's been here. Chief Cockriel goes back 17 years into Cal Poly's history. The staff includes three full

time professionals and ten students who are on call for alternate 24-hour shifts. The students receive training every other Saturday and after about a year are as proficient as professional firemen. For their efforts, they receive free room and board in addition to a salary. Their most important job, though, is the completion of their education.

Applicants are interviewed with stability and the willingness to work in mind. Stability is tressed in view of the small house behind the fire station that provides a home for the men. In such close quarter, just one belligerent person could make life difficult for the entire staff, Cockriel pointed out.

If living quarters are less than ideal, the fire equipment used is up to date and on a level with that of other fire stations. Safety is stressed, and no chances are

taken with faulty equipment. The fire engines only roll 25 to 30 times each year. An amazingly low figure, it seems, in view of Cal Poly's expansive campus of 5,000 acres. Also mildly surprising in a campus environment,

the incidence of deliberately set fires is very low: "Sure, you'll always have a few jackasses with 13,000 students," says Cockriel, "but we really don't have much of a problem," Many fires are prevented or immediately ex-tinguished by quick thinking faculty, staff and students. Thanks to people educated in fire safety, the fire trucks never have to roll on 90 percent of the fires on campus.

In the event of a fire too big for Cal Poly's fire department to handle alone, back up units of the city's fire department as well as the Forest Service will provide. assistance, just as Cal Poly has helped extinguish serious fires in San Luis Obispo. Working relations between the agencies are very good. We should be glad that the fire

department has been spending more time hitting a volley ball over the net stretched between their home and the firehouse than they have fighting fires this summer.

New bookstore phone numbers

Are you experiencing difficulties in locating certain textbooks or class materials? Or as an instructor do you want to place some textbook orders?

Mary Green, manager of El Corral Bookstore, advised new telephone numbers are being used by the bookstore. To reach the general office call 546-1101, for textbook orders phone 546-1171 and if you have need to reach the warehouse call 546-1172.

Tagging home towns tells abouts students

"Where are you from?"

That seems to be a common. among early question acquaintances both on campus and around the community. Have you ever wanted to announce to the world of Cal Poly that you're from Anaheim, Azusa, Cucamonga, or wherever?

Put away the poster board, you now have an outlet. The Tag Your Home Town maps near the main entrance to the campus snack bar still have plenty of room for the student or visitor to gain identity Anaheim, Azusa. with Cucamonga, or wherever.

Installed July 4th, the maps of California, the United States, and of the world now contain about 200 names tacked to a place of origin.

The maps are the idea of Pauline Shaffer, nutritionist for the campus Food Services. The idea came to her when she was talking with students about home and about plans for summer trips. The only promotion of the idea was slips handed to customers by snack bar cashiers on July 4th.

After that, Ms. Shaffer says,

'It spread spontaneously, just by word of mouth from the small crowd we had on the fourth, and we've had excellent response. It's become quité a conversation starter between students and with students and employees as well."

Other than just identification with home towns, several students have told Mrs. Shaffer that the maps bring back memories of past vacations, and of plans for future trips.

The maps also disprove the idea of Cal Poly as a school of Californians. Names in the United States are tagged to: Miami, Florida; Fairbanks, Alaska; Winchester, Massachusetts; Kukoihaele, Hawaii, and just about werywhere in between.

Outside the United States, you'll find names tagged to such places as: Albany, Australia: Buenos Aires, Argentina; Dar Es Salaam, Tanzania; and Chengtu, The People's Republic of China, just to mention a few.

Where are you from? Let those on campus know. All aboard, for the Anaheim, Azusa, and Cucamonga Special!

Faculty express desire to retain senior projects

Cal Poly faculty members expressed a defineite desire to keep senior projects, according to a senior project validity sur-Vey.

The survey, conducted during Spring Quarter, by the Industrial Technology 463 class, has the input of students, placement personnel, members of the In-dustrial Technology faculty, campus-wide departmental faculty and some colleges and universities.

Thirty Cal Poly students were directly interviewed by the class. Students responded that there should be more campus-wide standardization of senior projects. They also said the project could be a successful endeavor.

Responses from the I.T. department faculty were varied. Of the 13 faculty members interviewed, some said the time limit for completion of the project should be extended. Others said the department should offer a prerequisite class for orientation to the senior project. Another response was that the project should not be required of all students.

Cal Poly bill almost went to the coyotes

by JOHN SHAW

When members of the California assembly voted down a bill to establish a "normal" school in San Luis Obispo in 1899, Myron Angel, a local publisher, figured things had finally gone to the coyotes.

He had tried for years to get that bill through the legislature, and it was defeated this time because the local assemblyman from San Luis Obispo voted in favor of a bill giving bounties for coyote scalps! In retaliation, opponents of the "scalp" bill voted 30-23 against the "school" bill,

Two years earlier in 1997, an identical bill to establish a normal school in San Luis Obispo had passed both houses of the legislature, but was vetoed by Governor Budd, who cited economic pressures as a basis for his action.

Frustrated, but not beaten, Angel again approached state Senator Sylvester Clark Smith and persuaded him to reintroduce the bill the next session of the legislature. He did, but red tape kept the measure from being passed once again.

It wasn't until Senator Smith

helped push the bill through the 1901 session that it finally passed both houses of the legislature and the governer's office without detour.

As passed, the bill called for a school to furnish young people of both sexes mental and manual training in the arts and sciences, including agriculture, mechanics, engineering, business methods and domestic sconomy in order to prepare students for non-professional walks of life.

This emphasis on manual skills was largely due to an experience Angel had in San Francisco when he first arrived in California. Penniless and unemployed, he missed a job paying 86 a day because he couldn't pound nails —something he hadn't learned in the schools back East.

As he said in 1898, the whole idea of a polytechnic school was so no "young man or woman attending it need be sent into the world as helpless to earn a living as I was when I landed in San Francisco in 1849."

Fifty-three years after that experience, the California Legislature appropriated \$50,000 for the school and Myron Angel had finally beaten the coyotes.

Illegal parking on campus is one way the students can get a parking ticket. Parking ticket fines run from \$1 to \$3.

Traffic citations issued at Poly vary on offense

There is one piece of paper that most people don't like to recieve- the traffic citation,

The Cal Poly Security Office issues citations for parking offenses and moving violations. Chief George W. Cockriel, head security officer on campus said approximately 300 moving violation citations are issued annually on campus. Moving violations include running a stop sign, driving under the influence of alcohol and speeding.

If one is caught for a moving violation, an officer will write the offender a citation on a long form. The accused must appear in court, since the offense is a midemeanor. The judge issues the fine for the moving violation, which can go up to \$375 for driving under the influence.

If you receive a parking citation, the penalty ian't as stiff. If you park on campus without a parking permit, the fine is \$3. If parked in a colored sone, the payment is \$2. For parking overtime, \$1 will pay for the offense. All payments are sent to the justice court in San Luis Obispo.

Craft center... continued from page 26 dass inclues glass, glass cuters, pliere and lead.

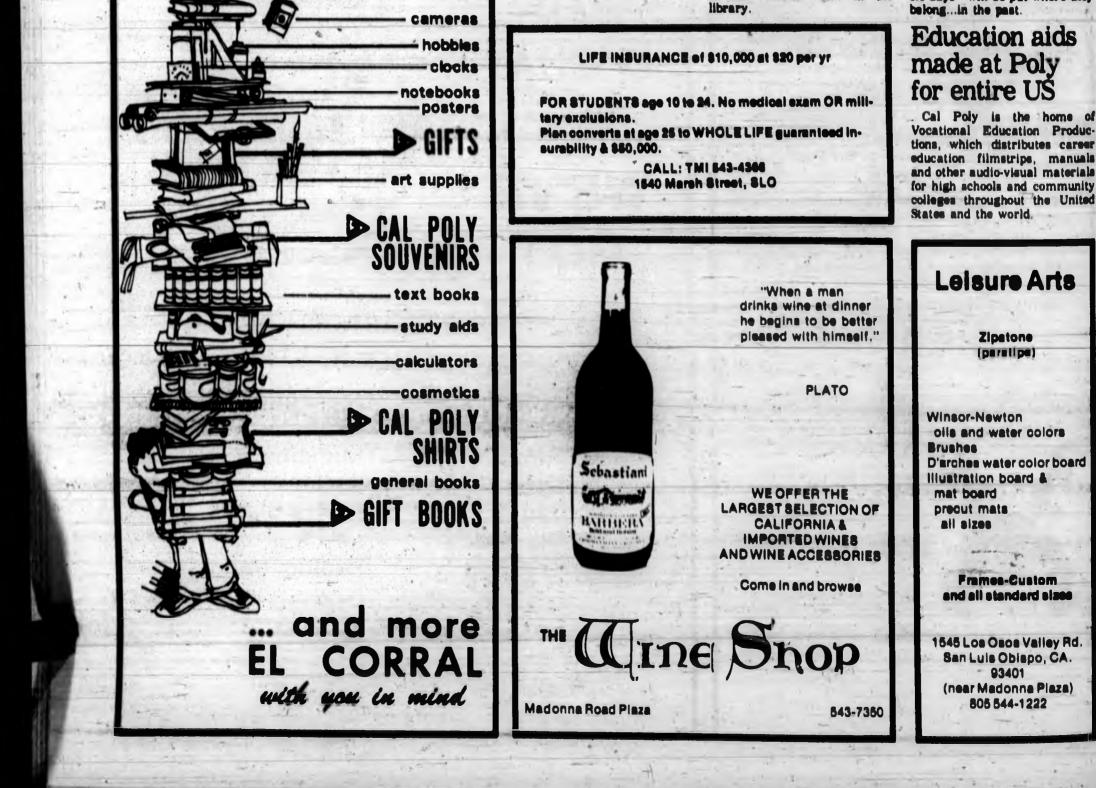

Equipment available for silk screening includes knives, brushes, frames, squeegies, solvent, developers and screen material.

There is also a darkroom available for developing film, enlarging prints and equipment for dry-mounting prints. To in-sure proper use of the quipment, it will be necessary to obtain a permit. A black and white or color permit can be obtained by passing a written test and a practical "walk-thru" test.

The staff of the University Union Craft Center extends a warm welcome to the people of the Cal Poly community. The staff will do everything possible. to make your hours spent in the center enjoyable, creative and meaningful.

A senior project validity survey...

continued from page 29 A questionnaire was sent to 40 departments at Cal Poly. According to the survey, the majority of the departments are in agreement with the goals and the purposes of the senior project. They added that there should be more specific guidelines, modified by depart-ment and student goals. They

rescued. Through pure thought and abstention from the secret sin for approximately one year.

marriage is possible. Provided you have mastered these rules of the old-time sex, one must now consider the frequency of the sex act itself.

The Professor acknowledges three timetables in this matter. First, sexual activity is limited to reproduction only. Between each encounter self-control is exercised intensely by both partners. To Shannon, this form is the most desirable.

For those who consider it an act of love, says Shannon, sexual activity may be indulged in one to three times monthly. The more extreme love advocates, the Professor says, may indulge an additional few days, midway through the "menses".

Or frequency may be based on physical necessity alone. But a word of warning from the Professor, this leads to "legal prostitution," marital excess, poor health, loss of vitality and scrawny children.

For those nostalgic sex freaks who wish to feel the true guilt and frustration of that old-time sex. the first recommendation is by far the best.

Basketball schedule begins Fall Quarter

Basketball Coach Ernie Wheeler's club opens its 1974-75 season on its home court at 8 p.m. on Friday, November 20. The Mustangs, winners of the California Collegiate Athletic Association Conference cham-pionship in basketball last enson, find their first opponents

being San Francisco State University.

The Mustangs play ten of their 26 games during Fall Quarter, with the last five fall engagements being during the Christmas break. The basketball schedule for Fall Quarter is as follows:

Date	Opponent	Place	Time
Nov. 29	San Francisco State University	Cal Poly	8:00 PM
Nov. 30	University of California, Santa Barbara	Senta Barbera	8:00 PM
Dec.3	University of Pacific	Cal Poly	8:00 PM
Dec. 6	Aggie Tournament-Cal Poly, Sacramento State		7:00 PM
Dec. 7	Westmont College, Stanislaus Callege	Cal Poly	9:00 PM
Dec. 13	California State University, Sacramento	Sacramento	8:00 PM
Dec. 14	California State University, Hayward	Hayward	8:00 PM
Dec. 30	University of California, San Diego	Cal Poly	8:00 PM
Dec. 27	Long Beach Classic- Weber State	1	7:00 PM

Mustang soccer season to open

Coach Carmen Sacco's Mustang soccer team has planned a nine game schedule for the 1974 soccer season, including six league matches and five consecutive Saturday games at home.

The Cal Poly men's soccer team will open the season, on the road in southern California, with a match versus St. Patricks on Thursday, September 26 at 2:30 p.m.

Two days later, the Mustangs will open the five game homestand. The September 28 game will be against Pacific Christian. On October 5, the 48ers of Cal State University Long Beach come in for a visit. The next foe for Cal Poly will be the Northrup Institute on October 12. Cal State Los Angeles faces the Mustangs on October 19, and closing out the last home match is Cal Lutheran on October 36.

On the road again for a nonleague match, the Mustangs travel to U.C. Santa Barbara to meet the Gauchos on October 20, at 3 p.m. Saturday, November 2 at 11 a.m., the Mustangs find themselves the guests of Loyola, Marymount, for a league game. Then on November 5, they travel to Freeno Pacific for another league match.

DOFTS

Season should give gridders a challenge

Revenge was the key note on which Cal Poly's 1974 football season opened. The Mustangs faced Boise State, the team that destroyed their chance for a perfect season last year, for their first game on September 14. Although the Boise game is

over, there are still obstacles to overcome for the Mustang gridders in the next three games. The Cal State Fullerton game on September 21 and the Freeno State game on September 28, both away, will prove to be tough for the Cal Poly team.

The fourth game, against U.C. Riverside on October 5, will be the game to watch. A defeat for the Mustangs in this home battle would be a double loss, since they would lose their chance for the **California Collegiate Athletic** Association Conference title and break their winning streak of 17 straight CCAA Conference victories.

The rest of the season should prove to be easier for the Mustangs, with the fifth game being against Cal Poly Pomona on October 15 there. Next, Cal Poly meets Cal State Northridge on October 26.

Homecoming is on November 3 against the University of Nevada at Reno. November 16 is the date for the Idaho State game in Posatello, Idaho. The Mustangs find their opponent is Cal State Hayward on November 28 here. The season ends with Cal State Los Angeles game on November 27, in Los Angeles.

Fitness course in Poly an yon

Jogging has become a popular way for Cal Poly students to exercise and keep in shape. Many of these students, caught up in the jogging mania, have devised their own running routes and programs.

A more professional jogging program is being offered this fall at Cal Poly. A fitness course at Poly Canyon has been set up by the Men's Physical Education Department. The project, started last fall, was completed in the early part of the summer.

The two and a half mile course has four exercise stations, with equipment set up for various exercises. The first exercise station is located in the middle of the canyon. The other three stations are situated near the school's botanical gardens. Diagrams are at each station, showing how the exercises are designed to strengthen the abdomen, shoulder and arm areas.

The creaters of the fitness course, Dr. James Webb of the Men's Physical Education Department and last year's cross country coach, Larry Bridges, got their idea from a professional education journal two years ago.

The two men were impressed with the way the jogging courses were set up in Switzerland and the Scandinavian countries.

"We've tried to imitate those courses as much as possible, Webb said. "The course will be used mainly for the physical education classes and athletic teem," said Webb. "But all Cal Poly students and the other residents of San Luis Obispo are welcome to the use of the course. We'd like to see as many people out there as much as possible."

Do you feel like playing a couple of sets of tennis or having a good workout in basketball? There are many recreation facilities on campus which can fill your exercising needs.

The facilities available during the 1974-75 school year are six handball courts, one outside basketball court, two playing fields (for softball, soccer, etc.), a track for jogging, 18 tennis courts and two swimming pools. The hours for the use of the two pools will be posted later in the quarter.

A new addition to the facilities is a fitness course in Poly Canyon. The two and a half mile course, which was completed in the early summer, will be mainly used for the athletic team and physical education classes. But, other students are also offered the use of it.

The Men's Gym will be open on Monday through Thursday nights, from 7 to 10 p.m. for intramural sports. Men's basketball and weight training will be held on Monday and Wednesday nights, while intramurals turns co-educational with volleyball on Tuesday and Thursday nights.

Soccer team ...

continued from page 31

There is a possibility that the Mustangs will host U.C. Riverside on November 9, but at the moment, it has been tentatively postponed.

All Mustang home games will be played on the Cal Poly soccer field, and except for the Long Beach and Los Angeles games which begin at 3 p.m., the matches will start at 1 p.m. All home games, excluding Pacific Christian, are league matches. The Mustangs were 4-4 last year.

For hikers

continued from page 19 change of pace, the committee usually takes a trip to Disneyland once a year.

The first Outings Committee activity for Fall Quarter is a backpacking trip to Garfield Grove in Sequola. The date of the trip is September 27 to 20. The next Fall activity scheduled is a 40-mile(round trip) bicycle riding trip to Lopez Lake on October 5.

A trip is planned up to Big Sur on October 18 and 19. There will be a three-day-weekend backpacking trip to Immigrant Basin from October 25 to 28. The next Outings Committee activity will be a sightseeing trip to Hearst Castle on November 8.

November 15 and 17 will be the date for a trip to Yosemita. Cave exploring in Crystal Cave will be the activity planned for November 22 to 24.

Over Thanksgiving vacation a canoeing trip to Feather River is planned. Those wishing to ge on the trip will leave on November 28 and return on December 1. It is suggested that only experienced canoeists go, since the river journey will be fairly rough and marked by some rapids.

Tentative plans are being made for a trip to Mexico over Fall Quarter break. If the committee members have enough money to finance the trip, the group will leave on the last day of finals. They will journey down to Yucatan peninsula and sightseeing will consist mainly of looking at old Mayan ruins. The group will be limited to only ten members, nine being students and one being an instructor.

Anyone interested in backpacking or any of the other activities are encouraged to join the Outings Committee. The committee holds weekly meetings, usually on Tuesday night at 7 p.m. in the University Union, Rm. 219. If you wish to have further information on the committee, contact either the advisor, Leslie Griffin at 546-2478 or chairman Gerry Estes at 541-
