Foundation: Poly's lifeblood

The Cal Poly Foundation, a multi-million dollar organization, holds the purse strings to most of the major money-making operations on campus. This public nonprofit corporation has become vital to student services and activities. At the same time, however, the Foundation must remain responsive to the needs of the university.

The foundation is a self-supporting legal entity separate from Cal Poly, yet it is an integral part of the university in terms of its financial strength. But it can provide only the services and activities requested by the university and must remain subject to the regulations of the California State University and Colleges system, according to Foundation Executive Director Al Amaral.

"We exist solely to support the educational mission of this university," said Amaral.

**Story by Sherry Heath
Photos by Brian Travis**

"The Foundation started years ago when faculty would go downtown to co-sign bank notes for students with no credit to buy livestock for class projects. But sometimes the livestock died and then the faculty were stuck paying off the loans. So this business was set up to provide money for student projects and avoid those problems," he said.

Please see page 5

Curb enters race, proposes cuts

SAN FRANCISCO (AP) — Lt. Gov. Mike Curb launched his campaign for the Republican nomination for governor Wednesday with a call for spending cuts in all state agencies and a new stance opposed to the Peripheral Canal.

Curb conceded that his opposition to the proposed canal, which would send water from the northern part of the state to Southern California around the Sacramento-San Joaquin Delta, was a change in his previous position. But Curb added that he might yet be persuaded to support the project.

"In the past, coming from Southern California, I have supported it. But I have made a decision...not to support it," he said of the canal.

He said new estimates boosting the cost to \$3.6 billion to \$5 billion for the canal and related water projects in a referendum on the June 1982 ballot may have raised the price so high that California cannot afford it.

"At the present time, I would not vote yes, I would vote no on the referendum," an issue which sharply divides Californians.

Newsline

Endangered sea otter killings up

PISMO BEACH (AP)— Along a 200-mile stretch of California shoreline from Santa Cruz to Pismo Beach an increasing number of dead sea otters have washed ashore this year.

The sea otter's appetite matches that of humans—consuming large quantities of abalone, clams and other shellfish. Environmentalists are worried that some of the deaths were caused, intentionally or not, by humans competing for the same foods.

Three of the five who were shot were found along Monterey Bay, where the Audubon Society also is concerned about protected migratory birds and sea mammals known to be caught and drowned in giant fishing nets.

Other sea otter shooting victims were found near the southern end of the mammals' California range, one in Morro Bay and one at Pismo Beach.

Brown seeks toxic use checks

SAN FRANCISCO (AP) — Gov. Edmund Brown Jr. said Wednesday he will ask the Legislature to authorize a new program allowing increased government vigilance of pesticide and toxic chemical uses.

Brown said in a news conference that his office will "go forward with the right-to-know program" which he said would make available to the public lists of carcinogens and their health effects.

"I think it is time to end the chemical coverup and let people know what is going on," Brown told reporters. "There are enormous pressures moving in the opposite direction. I predict this will be the number one topic over the next 12 months."

Brown's comments came as he accepted a petition of 12,000 signatures calling on the state and federal governments to "initiate without delay a full public inquiry into the question of long-term effects of pesticides on human health."

The petition, gathered in 12 days last summer by the Palo Alto-based Build the Earth of the Creative Initiative Foundation, was delivered also in Washington Sept. 29, said Tom Moutoux, director of the foundation's toxic chemical project.

Brown said if the Legislature balks at his proposal, he will work to establish a right-to-know toxic chemical program through initiative, local ordinances or statute.

With Varian, You Have A Choice

Varian Associates is a broadly diversified high technology company that offers you a choice of career paths. If you're about to receive your degree in EL, EE or ME, you can choose our, **Palo Alto Microwave Tube Division**, the world's leading producer of microwave tube products. With an EL or EE Degree, you could work with our solid state amplifiers, microwave oscillators, microwave semiconductors or YIG devices in our **Solid State Microwave Division in Santa Clara**.

If your major is in EE, ME, EL/ET or Computer Science, you could get involved with the leading technology in gas and liquid chromatography products in our **Instrument Division across San Francisco Bay in Walnut Creek**. Wait, there's more! Our **Medical Division in Palo Alto** has opportunities in our Co-Op Program for IEs and EL grads to help us advance our leading technology in linear accelerators, the most widely accepted method for cancer therapy and research in the medical profession.

As you follow your career path at Varian, your choices will be aided by your association with some of our industries' leading scientists and engineers. And the availability of graduate programs and counseling at schools like Stanford and UC Berkeley. Make an appointment today with your Career Planning and Placement Center. Or write to **Employment, Varian Associates, 611-DH Hansen Way, Palo Alto, California 94303**. We are an equal opportunity employer.

On-Campus Interviews October 14

AAFDBI Meeting
The American Association for Fitness Directors in Business and Industry will hold a meeting for all students interested in public and private fitness on Thursday, Oct. 8 at 11 a.m. in Computer Science, Room 250.

Birth Control Talks
Birth control information talks for men and women are available every Thursday from 11 a.m. to 12:30 p.m. Interested students will learn about all the different contraceptive methods, their cost, advantages and disadvantages. The talks are free.

Environmental Meeting
The Association of Environmental Professionals will hold its first meeting of the year this Thursday, Oct. 8 at 11 a.m. in Agriculture, Room 231. There will be a Mono Lake slide presentation.

Sign Language Club
A sign language club is being formed for those hearing and hearing-impaired students who are interested in practicing and improving their sign language skills. Contact the Disabled Students Service office at 546-1395 or Jacquie Calvet at 544-7069 for more information.

Tennis Tryouts
The Cal Poly Women's Tennis Team is holding tryouts until Oct. 20. Any interested women should come dressed to the courts at 3 p.m. any day, or contact Coach Orion Yeast at 544-8142.

Interface Meeting
Interface will hold its first meeting of the year on Thursday, Oct. 8 at 6 p.m. in Computer Science, Room 252. A new publicity director will be elected and t-shirts will be discussed.

EAC Table
The Ecology Action Club will set up an information table in the University Union Plaza from 10 a.m. to 2 p.m. on Thursday, Oct. 8. The group meets every Tuesday at 11 a.m. in Science North, Room 201.

Hispanic Engineers Meeting
The Society of Hispanic Engineers will meet Thursday, Oct. 8 at 6 p.m. in Science, Room E47. The agenda includes a speech by David Cantu, organization of committees and the taking of pictures of members.

Women's Water Polo
All women interested in

playing water polo are invited to attend the meetings every Wednesday at 7:30 p.m. at the outdoor pool (behind the main gym). No experience is necessary, good swimming ability preferred. For more information, call Kym at 544-8325.

Softball Game
The Child Development and Mechanical Engineering clubs will play softball together at Teach School on Saturday, Oct. 10 at 12 p.m. All club members are encouraged to participate or come out and watch.

Foresters Meeting
The Society of American Foresters will meet

Thursday, Oct. 8 at 11 a.m. in the Science building, Room B-5. The agenda includes a logging team presentation, a trip to the Melodrama and the Mt. Fig thinning project.

Horse Club
The Cutting and Reining Horse Club will hold its first meeting of the year on Thursday, Oct. 8 at 7 p.m. in the Beef Pavilion. New officers will be introduced, and horse showteam members will be announced. An ice cream social and free aggie stomp lessons will follow.

Newman Gathering
The leader of the Christian Peace Group will speak on "A Christian Biblical Perspective on Non-violence" on Friday, Oct. 9 at 1 p.m. in UU 220. The event is sponsored by the Newman Catholic Fellowship. The cost is \$1.

ASI Film
ASI films will present "Tees", Friday night Oct. 9, at 6 and 9:30 p.m. Tickets are \$1.

Pizza Feed
The Chinese Students Association will hold a pizza feed at Crest Pizza following a meeting Thursday, Oct. 8 at 7:30 p.m. in Science, Room A11. The event is free for members, \$2 for non-members.

Horseback Riding
The ASI Outings Club is sponsoring a horseback riding excursion at Oceano Beach followed by a trip to Burnardoz for ice cream. Sign ups and more information in the Escape Route, downstairs in the University Union. The event will take place on Saturday, Oct. 17 at 3 p.m. The cost is \$8.20.

INGERSOLL-RAND

We invite you to explore the many professional opportunities offered by Ingersoll-Rand, a Fortune 500, multi-national manufacturer, with sales close to the \$3 billion mark. Recognized as one of the most prestigious companies in the world's marketplace, with superior and innovative diverse product lines, we still remain a people-oriented organization. Ingersoll-Rand offers excellent benefits and salary advancement, which will always remain commensurate with demonstrated contribution.

We have exciting career paths for individuals with the following majors:

- Mechanical Engineering
- Electrical Engineering
- Business Administration
- Accounting/Finance
- Personnel
- Sales Engineering

We also have summer intern opportunities for MEs and IEs

Join our representatives from the **SCHLAGE LOCK COMPANY** at a reception Monday, October 12th at 8 PM in Science E46

We will be accepting resumes for summer positions for those not able to sign up on our recruiting schedules. REFRESHMENTS WILL BE SERVED

We will be interviewing on Campus TUESDAY, OCTOBER 13th

As Cal Poly expanded over the years, the need for auxiliary services became more varied and complex. Today, the Foundation provides "a diverse number of activities under one umbrella," said Amaral. These activities include food services, textbook and school supplies sales, and instructional and service aids not furnished by the state.

A seven-member corporate board of directors meets monthly to establish policies and procedures on activities requested by the university president. Day-to-day management of the programs is then the responsibility of the executive director and his staff, according to the Foundation's 1979-80 Annual Report.

Agriculture loans

One such activity is the Agricultural Enterprise Program. Through this instructional aid, 3,300 agriculture and natural resource management students have the opportunity to become entrepreneurs in commercial agriculture production. Loans from the Foundation enable students to operate dairies, raise livestock, and plant and harvest crops.

This program has developed into a financially and educationally rewarding endeavor, said Amaral. The student gets two-thirds of the profit and the Foundation receives the remaining third which it then uses to improve the program's equipment, facilities and herds.

Another money-raising service unit under the Foundation umbrella is the El Corral Bookstore. In terms of sales, El Corral is the fourth largest bookstore in the CSUC system, and the net income goes to funding reserves, capital im-

provements and equipment, according to the store's manager, Ivan Sanderson.

Last year El Corral grossed nearly \$5 million, with book sales accounting for 51 percent of the intake, said Sanderson. This year many books have increased in price at a \$1-2 jump per book, he said.

"Some are going to say, 'Wow! Somebody's getting rich,' when they pay such big bills for textbooks. But you have to recognize that if you go back 25 years, that book you paid \$19.50 for, I paid \$5.95. But that was more than I could afford then just like this is too much for you now," he said.

"We do surveys around the system to remain competitive and we think we're the best. In the gift area, prices would be higher in another store," he added.

Bookstore lines shrinking

One noticeable improvement has been made this year. The bookstore opened in early September and the long waiting lines during the first week of school were cut substantially. Sanderson said that possibly within three years there will be a 30 percent increase in the store's capacity to move lines, because a more efficient computer now being installed for Foundation use will enable them to use scanner price tags.

Another essential Foundation operation is Food Services. Students are offered a variety of facilities at prices the Foundation maintains are comparable to similar institutions and local commercial operations. Through Vista Grande Restaurant, the Dining Halls, Snack Bar, Sandwich Plant, Burger Bar and Ice Cream Parlor. The Foundation at-

tempts to meet the nutritional needs of the university community.

Food services grossed nearly \$5 million in 1979-80, with a net income of \$138,000 after all expenses were paid. The meal plan program accounts for more than 65 percent of the total Food Services income.

Amaral said prices reflect product and operating cost increases and the Foundation does surveys of similar operations downtown to make sure Food Services prices are "in line." Amaral said when they "compare apples with apples and oranges with oranges," Food Services prices hold up favorably.

Much of the money generated through Food Services is used for paying 180 full-time employees and the 900 part-time student employees who assist them, said Amaral.

Aid to research

The Foundation also places high priority on student and faculty involvement in professional development. Through its newly established Sponsored Programs Department, the corporation "provides fiscal services for many research and educational activities funded by federal, state, and private sources," according to the 1979-80 Annual Report.

Poly President Warren Baker's new emphasis on research at Cal Poly places research "second only to its (Poly's) teaching mission. The university must seek to create a campus environment which facilitates creative contributions," said Baker in a September bulletin entitled "Role of Research."

Poly's director of research, Robert A. Lucas, said the Foundation assists in contracting and administering grants for the various research projects while the faculty

"does the technical stuff."

The Research Department "does the fishing for projects and once the fish is caught and landed, the Foundation fillets it," said Lucas.

"There's been a strong increase in research and we're getting more and more private sponsors, such as the National Science Foundation, and less and less from the federal government," he said.

Much of this research has been interdisciplinary in character, involving teams drawn from agriculture, engineering, architecture, and science and mathematics, in which the university is distinguished nationally," said Lucas.

Some of the current projects include the development of a solar heated and cooled poultry brooder house, marine biological studies near Diablo Canyon and the Morro Bay Power Plant, studies on what causes the earth's magnetic field to switch its polarity, and experiments in gasohol production.

"These projects would be difficult to do through various school departments," said Lucas, and Foundation-sponsored hands-on learning experience is the University Graphic Systems. "UGS functions as a commercial printer under the aegis of the Cal Poly Foundation. It prints up a variety of products ranging from *Mustang Daily*, *Cal Poly Today*, club yearbooks and Poly Royal posters, to the imprinting of envelopes," according to the 1979-80 Annual Report.

"UGS is a faculty supervised, self-sufficient student enterprise like the Ag Enterprise program, and we supply funds for them in a similar manner because of the revenues they generate," said Amaral.

"Isolated" group blamed with Sadat assassination

CAIRO, Egypt (AP) — Egypt said Wednesday that an "isolated" group of four soldiers including a Moslem fanatic assassinated President Anwar Sadat, and the government quickly scheduled a referendum next week to approve Vice President Hosni Mubarak as Sadat's successor.

Parliament held an

emergency session to overwhelmingly endorse the nomination that Egypt's ruling party gave Mubarak within hours of Sadat's assassination Tuesday.

The Parliament's action meant Mubarak's name will be the only one on the ballot Oct. 13. The date falls within Egypt's 60-day constitutional limit.

Defense Minister Abdel Halim Abu Ghazala told reporters during a break in the parliamentary session that Sadat's assassins were not part of a coup plot but were "an individual group and they are not even related to any group or country."

Secretary of State Alexander M. Haig Jr. echoed

that assessment at a news conference in Washington, saying there was no evidence of external involvement in the assassination.

But Haig served notice to Libya and other radical Arab states opposed to Sadat's peace treaty with Israel that the United States "would view with great concern" any at-

tempt to seize upon the assassination to fan instability in the Mideast.

Haig will lead the U.S. delegation to Sadat's funeral Saturday. President Reagan will not attend for security reasons, the White House said, but he asked former Presidents Jimmy Carter, Richard Nixon and Gerald Ford to

go with Haig. Carter and Nixon accepted, but there was no word from Ford.

Israeli Prime Minister Menachem Begin also will attend the funeral, and in a letter to Mubarak said, "We are confident that the legacy of peace of President Sadat will live on... This is a sacred trust we have to fulfill."

Off-road vehicles may be banned from local dunes

BY TWYLA THOMAS
Staff Writer

Off-road vehicle enthusiasts may not be able to use South County dunes and beaches if the State Coastal Commission approves the decision of the San Luis Obispo Board of Supervisors to temporarily ban off-road vehicles from the dunes.

The Board of Supervisors voted unanimously in favor of the plan last week. The ban is part of the county's Local Coastal Plan, which also includes construction of restrooms, campsites and trailer sites at Oso Flaco Lake near Pismo Beach.

If the ban is approved, it would be in effect until the state starts construction, after which controlled access to the beaches will be allowed.

The Coastal Commission will be sent the county's Local Coastal Plan after Oct. 13, and it will take the state between 30 and 90 days to adopt or amend it.

The action does not inhibit free day use of the

beaches by people or access to street licensed vehicles on wet sand. Camping overnight or driving recreational or off-road vehicles on the beach or dry sand areas will be prohibited.

Supervisor Howard Mankins said weekends at the Pismo Dunes, a popular area for off-road

vehicle fans, were a free-for-all that had gotten out of hand.

"The main reason (for the ban) is to give the state time to develop an off-road vehicle area and to revegetate the dunes," Mankins said.

The board's action drew mixed reactions from people at Cal Poly concerned

with the issue.

Dirk K. Walters, a Poly biology professor, is concerned about the ecology of the area. He notes the Coastal Act prohibits destroying the coast, which is exactly what vehicles do.

The dunes are so fragile, he says, that it takes only a matter of seconds to make

tracks through undamaged vegetation, after which it is legal for vehicles to drive through.

Chairman for the Sierra Club Task Force for the Dunes, Walters said, "My off-the-cuff reaction (is) the vehicles should be removed."

He acknowledges the problems caused by the sheer mass of people and vehicles crowding the beaches on weekends, and that the state must develop adequate methods

of patrolling the area.

David Shankle, a senior mechanical engineering major and a dune buggy owner for five years, feels there should be a place for off-road recreation.

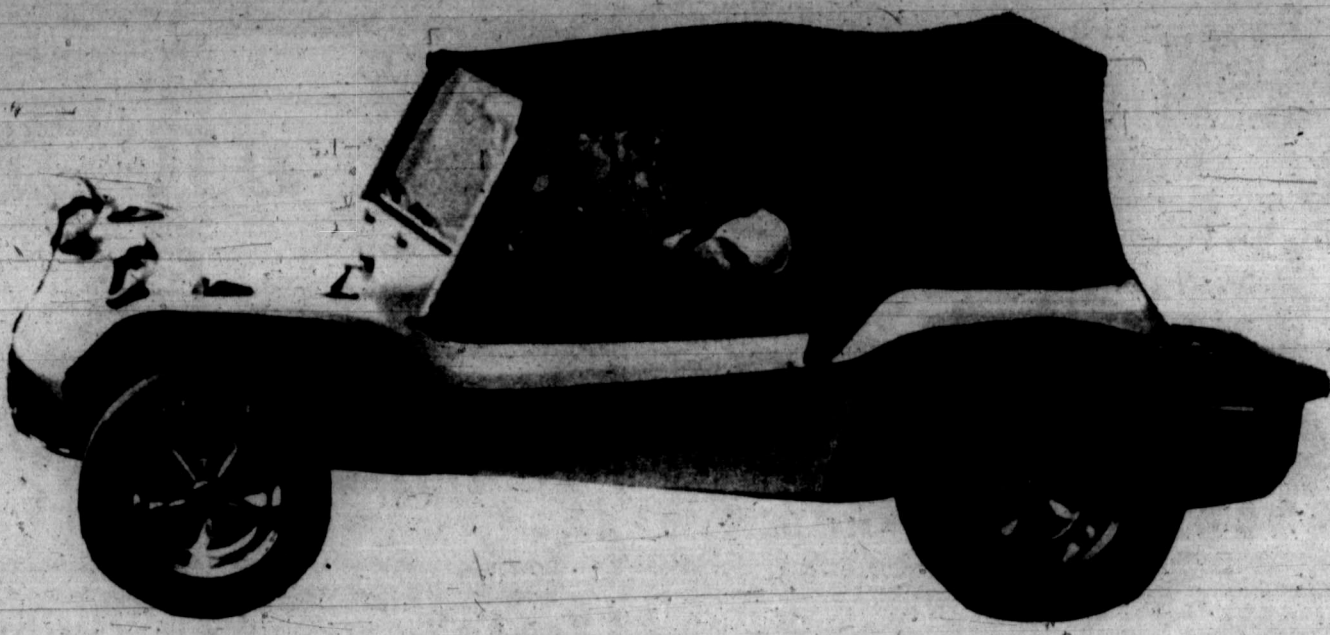

"A ban keeping everyone off would be a mistake. It would hurt the economy and everyone who enjoys off-roading," he said.

According to Shankle, a lot of businesses in the area rely solely on the off-road customers.

Shankle said it would be a small effort to compromise and make everyone happy, including the off-roaders and environmentalists. He insists that there are plenty of areas for both to enjoy.

Off-road vehicle buffs will not be pleased if they cannot use the dunes and beaches, since so much money is put into this hobby. Vehicles made specifically for this sand can range up to \$30,000, said Shankle.

Supervisor Mankins said there was a lot of testimony at the board meeting urging a permanent ban of off-road vehicles, but that this is unlikely to happen on a widespread basis.

'Doctor' makes obscene calls to 3 Poly students

BY DEBRA KAYE
Staff Writer

Three Cal Poly students have been victims of an obscene caller posing as a doctor from Cal Poly's Health Center.

The women received about three calls in the months before school started, the last one being received the first day of fall quarter.

The caller posed as a 'Dr. Wilson' doing venereal disease studies, asking personal questions about their sexual habits. He told them he would be examining all the women in their neighborhood and asked

when they would be home. He already knew and named their address. When they refused to answer he referred them to the Health Center to check his credentials.

When one of the women, a foreign student, contacted the Health Center and was assured there was no such person on the staff, campus security was called. "The woman described the caller as seeming very professional, confident and kind," said Marilyn Dauffenbach, the Health Center nurse contacted by the woman.

Campus security recom-

mended she report it to the San Luis Obispo Police Department and the phone company, so they could make a phone tap.

A report was never filed with the police department, "probably because she was too shy, not knowing our culture very well," said Dauffenbach. No similar calls have been reported to either the Health Center or police.

The police department's advice to victims of obscene calls is to hang up and even if it happens only once, to report it. "Lots of people think, 'It was just me and only one time,' so

they don't report it. But it might be happening to hundreds and investigators can't stop it if it's not reported," said

Sgt. Joe Hazouri of the SLO Police Department.

If it happens more than once, he recommended recording the times calls

occur and other pertinent information. Then an investigation will be conducted and the police will request a phone tap.

Royal theme contest deadline nears

There's still time for Cal Poly students, faculty and staff to select the theme for the 1982 Poly Royal.

Friday, Oct. 9 is the deadline for submission of entries of a theme for Poly Royal's Golden Anniversary celebration, to be held

on campus the last full weekend of April, 1982.

The grand prize will be dinner for two at Mason and Stills restaurant, followed by an hour in the hot tubs at Sycamore Mineral Springs.

Runner-up prizes will be

dinner for two at 1865; dinner for two at Yancy McFadden's, and ten lunches at The World Famous Darkroom.

Submissions may be left in the Activities Planning Center of the University Union.

No hype. Just some straight talk about achievement...and about the opportunity available with the achievers who are reshaping the world of microelectronics. We developed the first semiconductor memory. Next came the news of a computer on a chip. Our recent announcement of the iAPX 432 micro mainframe represents another quantum leap in computer technology.

We have achieved this success by cutting through the red tape, ignoring the status quo and giving talented people the space and support to try new ideas. We've prospered with this approach, and today, it is our standard.

Check out an Intel career. You'll get straight talk about rapid advancement. We'll explain how you'll have easy access to whatever level of management you need to get the job done right. And we'll discuss the advantages of choosing to work in Oregon, California, Arizona and Texas.

SIGN UP FOR CAMPUS INTERVIEWS

OCTOBER 22

We want to have some straight talk with graduates. If you are unable to meet with our recruiters, send us your resume or a letter that outlines your education, work experience and your career ambitions, in care of "INTEL COLLEGE RELATIONS," to the location of your choice: Oregon, 5200 N.E. Elam Young Parkway, Hillsboro, OR 97123; California, 3065 Bowers Avenue, Santa Clara, CA 95051; Arizona, 5000 W. Williams Field Road, Chandler, AZ 85224; Texas, P.O. Box 9968, 12675 Research Blvd., Austin, TX 78766. We are an equal opportunity employer.

Reagan's new budget cuts considered by House

WASHINGTON (AP) — Congressional support for President Reagan's new round of spending cuts faced its first test Tuesday as the House considered an \$87.3-billion appropriations bill which the administration deemed hundreds of millions over budget.

The House voted 383-30 to cut \$74 million from the measure, but the decisive vote was expected later on a Republican move to send it back to a committee drawing board in light of a potential presidential veto.

Reagan's House allies argued that the appropriations bill for the departments of Labor, Education and Health and Human Services must be trimmed.

"This is the best of bills and the worst of bills," said Republican Leader Robert H. Michel of Illinois. "On

another day and another time" it would have received nearly unanimous support, he said.

But the bill "is excessive and the president surely will veto it," Michel said in a speech on the House floor.

Reagan vowed last week to veto any "budget-busting" bills Congress sends him.

Republicans acknowledged that making further cuts in the measure would be difficult.

"This bill is the safety net for the truly needy," said Rep. Ralph Regula, R-Ohio, a member of the House Budget Committee. But "in the final analysis it's \$763 million over the budget resolution" Congress enacted in May.

But Republicans were not unanimous in their effort to get further cuts.

Rep. William H. Natcher, D-Ky., chairman of the Appropriations subcommittee on Labor, Health and Human Services, offered the amendment—backed by the Democratic leadership—to reduce the bill by \$74 million and technically bring it within the guidelines set by a preliminary budget resolution enacted by Congress in May.

Rep. Silvio O. Conte of Massachusetts, the ranking Republican on the subcommittee, supported Natcher's move calling the measure "America's investment in humanity."

"We cannot bring out a better bill," he said.

Haig pledges continuing U.S. support for Egypt

WASHINGTON (AP) — Secretary of State Alexander M. Haig Jr. pledged U.S. support Wednesday to the government of Egypt and to the Middle East peace efforts of Anwar Sadat—then warned outside powers not to meddle in the uncertain situation left by Sadat's murder.

"We would view with great concern at this juncture any effort by external powers to manipulate the tragic events of the last 24 hours," Haig said at a news conference in the first administration policy statement since Tuesday's assassination.

Told that his words sounded like a message to Moscow to keep hands off, Haig said he did not intend to imply "anything untoward."

"I think the Soviet Union knows our position, our friendship and our relationship with Egypt," Haig said. "They know that we consider that relationship vital to our interests in the region and that we would treat it accordingly," he said.

Haig spoke more directly of possible Libyan interference, although he said there was no evidence that radical regime was involved in the shooting of Sadat.

"We would hope that they would not be tempted," he said, adding the United States has no evidence "of external manipulation of events."

He said intelligence reports indicate Sadat's murder was an assassination, not an attempted coup. Moreover, he said, there is not evidence of external involvement in the assassination.

At about the same time in Cairo, Defense Minister Abdel Halim Abu Ghazalla was telling reporters: "There is no coup. It is an individual group and they are not even related to any group or country."

Haig spoke more directly of possible Libyan involvement of Sadat on Saturday, said he may visit other Middle Eastern nations while on that mission. He said no decision has been made. Other State Department officials said his journey of reassurance might take him to

Israel, The Sudan, Saudi Arabia and Oman.

Haig said the assassination has not shaken the Reagan administration's determination to sell \$8.5 billion worth of U.S. arms, including AWACS surveillance planes, to Saudi Arabia. He noted that Sadat supported that sale, which Israel opposes.

He said "we would make a mockery of all President Sadat stood for" if the AWACS sale were stalled or blocked because of his death.

Haig also said defeat of the AWACS deal in Congress would suggest that "equivocation and uncertainty have become the characteristic American style in the conduct of American foreign policy."

The House Foreign Affairs Committee, as expected, approved a resolution today to veto the AWACS deal. The deal will go through unless both houses of Congress vote to veto it by Nov. 1.

Christian non-violence stance reviewed in lecture Friday

Richard Baggett Deats, Executive Secretary of the Fellowship of Reconciliation, will speak about "A Christian/Biblical Perspective on Non-Violence" at Cal Poly on Friday, Oct. 9. The talk, which is sponsored by the Newman Catholic Fellowship, will begin at 1 p.m. in room 220 of the University Union. A \$1 donation is requested.

Deats, who holds degrees in theology and social ethics, has traveled widely in Europe, Asia, Africa,

and North America. He has been deeply involved in many local and international religious and peace programs. Since 1972, he has worked with the Fellowship of Reconciliation, a long standing world wide organization which seeks to find and promote non-violent methods of resolving human conflicts and meeting human needs. Deats' writings include *Nationalism and Christianity in the Philippines*, several books, and numerous articles.

MID-STATE ELECTRONICS

We have been serving the needs of Cal Poly for almost 25 years. The store has grown during that time until we have been able to say for years that we handle more parts to repair, build or rebuild things electronic than any store between Los Angeles and San Francisco.

Water polo strength is All-American player

BY VALERIE BRICKMAN
Staff Writer

Michael Birnbaum, also known as Bernie, brings perseverance and dedication to Cal Poly's water polo team.

An All American for the Mustangs last year, Birnbaum continues to show his knowledge for the game. "Bernie was the most consistent and the lone standout in the Whittier tournament held on Sept. 26 and 27," said Assistant Water Polo Coach Paul Cutino.

Birnbaum, a six-foot senior from Stockton, transferred from San Joaquin Delta Junior College where he holds All League and MVP honors in water polo. He didn't play polo his first year at Cal Poly. He's been playing water polo for seven years.

Two-year Head Coach Russ Haferkamp was the inspiration that got Birnbaum back in the pool.

"Russ is by far the best coach I've ever had, he is organized and dedicated," Birnbaum said.

Birnbaum has been playing hole man for the Mustangs, which is the equivalent to a center in basketball or a quarterback in football, Cutino said. He

is the one who usually initiates the plays.

Birnbaum loves the sport of water polo and said one reason for the continual play is to get his mind off school. He has also competed in five years of AAU action during the summer months back home.

"To utilize his strong shooting arm, we are going to start putting him on top on the outside wings," said Cutino.

The strong and dependable Birnbaum should be an asset in helping the team to another CCAA league title.

Both Birnbaum and Cutino said the team has a lot of depth this year.

Birnbaum said he feels that his team should make it to the finals in the second annual Cal Poly Invitational this weekend. "We should be up against Fresno State in the finals. They are the toughest team," he said.

Cal Poly will open tournament play on Saturday with a match against Cal Maritime at 8 a.m. In afternoon competition, the Mustangs will take on Pomona-Pitzer at 1 p.m. All games will be played in the outdoor pool behind the gym with the playoffs starting at 1 p.m. Sunday.

Weekend sports slate

Friday, Oct. 9
WOMEN'S VOLLEYBALL — Pepperdine at Cal Poly (Main Gym), 7:30 p.m.

Saturday, Oct. 10
FOOTBALL — Santa Clara at Cal Poly, 7:30 p.m.

WOMEN'S VOLLEYBALL — University of the Pacific at Cal Poly (Main Gym), 7:30 p.m.

MEN'S and WOMEN'S CROSS COUNTRY — Cal Poly at Stanford Invitational, 11 a.m.

WATER POLO — Cal Poly Invitational (Outdoor Pool), all day.

SOCCER — Cal Poly at Cal State Northridge, 2 p.m.

Sunday, Oct. 11
WATER POLO — Cal Poly Invitational (Outdoor Pool), all day.

SOCCER — Cal Poly at Cal State Dominguez Hills, 1 p.m.

Sports

Houston beats LA

HOUSTON (AP) — Pinch-hitter Denny Walling's two-out, line-drive single into right-center field with the bases loaded in the bottom of the 11th inning carried the Houston Astros to a 1-0 victory over the Los Angeles Dodgers Wednesday and gave them a 2-0 edge in the National League West Division playoffs.

Walling's clutch hit on a 1-1 pitch from reliever Tom Niedenfuer scored Phil Garner from third base with the winning run.

The loser for the second day in a row was reliever Dave Stewart.

The Dodgers walked Cesar Cedeno intentionally to load the bases to set the stage for Walling, who was pinch-hitting for shortstop Dickie Thon.

The winner was Joe Sam-

bito, who came on in the top of the 11th and got out of a jam after yielding a double to pinch-hitter Steve Yeager.

Starters Jerry Reuss and Joe Niekro were locked in a tense duel until Niekro left after eight innings. Reuss was replaced after nine innings of work in which he allowed only five hits.

With two outs in the second, Mike Scioscia singled and shortstop Bill Russell walked, but Niekro struck out Reuss to end the inning.

In the third, Davey Lopes singled sharply to right field leading off and moved to second on Dusty Baker's one-out single. However, Steve Garvey popped up and Rick Monday grounded out.

Los Angeles failed to score in the sixth after loading the bases with two outs. Singles by Rick Monday and Pedro Guerrero and a walk to Russell set the stage for some high drama when Reuss came to bat.

Reuss worked the count to 3-1 on Niekro, who came back with two called strikes to escape the Dodger noose.

Lopes led off the seventh with a double over center fielder Scott's head and moved to third on Ken Landreaux's sacrifice. Baker and Garvey grounded out to strand Lopes.

3 DAYS ONLY

It's our birthday. So this is the time of year that we like to say "Thank You for your support." Our goal remains, "striving to be worthy of your high esteem." Only by maintaining our own high standards for service and products can we hope to achieve that. Your genuine appreciation of our efforts is our greatest reward.

Hard-hitting sophomore modestly leads spikers

BY SHAWN TURNER
Staff Writer

When Sandy Aughinbaugh plays volleyball, the usually graceful game of swiftness and deception becomes a brutal contact sport.

Her hand swats the ball for a spike. Contact. The ball splats hard into the opponent's court. Contact. Point, Cal Poly. Brutal.

That's Aughinbaugh's job, as a hitter for the women's volleyball team. At 5'11", she does the job well—in three home games this year she has had 35 kills in 65 attempts with 10 errors, for a kill percentage of .385.

Add to that 16 defensive saves, six aces, two solo blocks and four assists, and you have a strong performance by an athlete who Cal Poly Sports Information Director Steve Rutledge calls "a bonafide All-America candidate" and who Volleyball Coach Mike Wilton calls a team leader.

Not bad for a sophomore on a team dominated by juniors and seniors.

"She's quiet," Wilton said of Aughinbaugh. "She leads by her play. She's real intense and real intelligent."

Aughinbaugh agreed, modestly, with her coach. "Well, I don't know about intelligent, but I guess I'm a quiet leader," she said. "I'm not as quiet as I was last year."

Wilton also said Aughinbaugh can handle mistakes better now than she did last season. "Last year she may have lost a point and that old chin would go down. But this year she's better at it. If she loses a point, she gets right back up for the next play."

Again, Aughinbaugh agreed. "I guess he's right about that. But dealing with mistakes comes from experience," she

said. "The more games you play, the better you are at getting up at every shot. Of course, playing this summer helped me a lot."

Aughinbaugh played on the national volleyball team when it competed this summer at the University World Games in Bucharest, Romania. Although the team didn't do too well—China, Cuba and Brazil took the medals—she said she improved her own game considerably.

"I was consistent, and I improved a lot," she said. "We couldn't compete with the other teams because they had played together so long and at a high level of competition."

By contrast, the U.S. team practiced for two and a half weeks in Colorado before entering the games.

Aughinbaugh returned this season to prove some of the experience she gained this summer. An Aughinbaugh spike, a really good one, slaps into the opponent's court and bounds away almost before the opposing team can react.

"When you get a good kill, it's totally satisfying, but when you get blocked, it's totally frustrating," she said. "It helps fire up the team."

Aughinbaugh said she doesn't know how far she'll go in her volleyball career. "The Olympics is a possibility," she said, "but the national team lives and breathes volleyball for four years and I don't know if I could give that much time for it."

A political science major, she would eventually like to go to law school. Of course, there aren't any volleyball scholarships to law school, but she said she's met people through the sport to help her in her career goal.

Sandy Aughinbaugh displays her setting talents while Chris Collett looks on. Aughinbaugh is one of the premier spikers in the nation and a prospective All-American candidate. The Mustangs will end a week lay off when they face Pepperdine at home Friday, 7:30 p.m., and Pacific on Saturday night.

Explore NCR's world of San Diego opportunities

On-Campus Interviews:
Thursday
Oct. 22nd

The Challenges

You'll be involved in a broad range of stimulating software projects ranging from Interactive Operating Systems to System Architecture and High-level Languages/Compilers.

You'll lend support to worldwide marketing organizations in the proposal and technical program management of complex systems for major customers.

The Environment

You will be working in a state-of-the-art environment, centered around research, design and development challenges.

You'll live and work near the ideal setting of San Diego offering year-round outdoor recreational, cultural and

educational opportunities.

The Scripps Ranch facility is modern in design, with a stimulating atmosphere where high visibility and advancement go hand in hand.

Learn more by scheduling an ON CAMPUS INTERVIEW through your Placement Office or by writing: Mr. Doug Sjoberg, NCR Corporation, Dept. SLO, 9900 Old Grove Road, San Diego, CA 92131.

Voting rights

What a difference a law can make. In 16 years, the Voting Rights Act, one of the most effective civil rights bills in the 1960's, has accomplished more than the 14th and 15th Amendments could in 100 years.

After more than a century of subtle and blatant discrimination, the right (not privilege) to vote has finally become a fulfilled promise for millions of minority Americans. Since the act's passage in 1965, minority registration and voting rates have risen dramatically nation-wide, as has the number of minorities holding public office.

A bipartisan coalition in the House of Representatives reaffirmed this basic right on Tuesday by voting 389-24 to extend the act's provisions indefinitely *without any revisions or amendments*. Unfortunately, extension of the act in its present form still faces an uncertain future.

Before the legislation is sent to President Ronald Reagan for his signature, it must first be approved by the Senate. That's where the catch comes in. A battle has been brewing in the Senate between forces who want to preserve the act's special enforcement provisions and those who want to weaken or eliminate these provisions, particularly Section 5.

Section 5 has required election officials in areas with a past record of voter discrimination to submit any proposed changes in their election laws to the federal government for approval. This section has been the foundation of the act, because it is the basis for federal protection of minority rights.

And yes, there still are those who would, and continue to try denying minorities their right to vote as guaranteed by the Constitution.

Rep. Peter Rodino Jr. (D-N.J.) pointed out that during hearings on the act in the House, witness after witness unfolded subtle, but effective schemes used in many states and communities to deny minorities their right to vote or dilute the strength of their votes.

The number of tactics used by states and communities to bar minorities from voting is almost endless. Among the more common means are dual registration and re-registration of voters, gerrymandering, at-large elections, annexations of new land by communities, inconvenient registration times, not to mention out-and-out intimidation used in some areas.

Still, the accomplishments of the act have been great, but without provisions such as Section 5, further reforms in discriminatory practices would become more difficult, if not impossible.

Opponents argue such provisions as Section 5 violate states' rights, but as long as the basic rights of so many citizens remain in jeopardy, states' rights must take a back seat.

It may take five years; it may take a thousand years, but as long as the voting rights of minorities are threatened by attitudes of prejudice and discrimination, we will need a full, unrevised Voting Rights Act. The Senate would do well not to ignore the mandate handed down by the House.

Gracious man

Editor:

Bob McKee, the assistant director of food services is a very gracious man. He apologized about the mishap between the cashier and myself on the first day of classes (*Mustang Daily* - September 24). He good-naturedly refunded the overcharged sum of five cents that I paid for the yogurt.

We both hope the incident will not happen again. I told McKee that if it ever does, I would come to him first, before sharing my dilemma with the readers of the *Daily*.

Creola Miller

He understood how I could have mistaken the medium cups for the small due to the former arrangement. The Snack Bar has a new cup display that clearly distinguishes the size of the cups.

McKee explained why the citrus juices (lemonade and orange) are expensive. Lemonade is expensive because of the sugar content. Orange juice is expensive on the market, and therefore it is expensive on campus.

Warm glow

Editor:

Last Tuesday's edition of the *Mustang Daily* created a warm glow in my heart. I was very enthused to see the "ASI Times" full page informing the general student body of the events available to them.

Not only were the upcoming events publicized, but open positions in the ASI as well. Dennis Hawk holds the position that, "we want to make the ASI a more visible entity to the students for after all—we are working for them and they are each a stockholder." He personally encourages the "ASI Times," a bi-weekly publication in the *Daily*. It is being produced by the Student Relations Board and the hard work of Margaret Stanton, the SRB Chair—"Our determination and

hard work this summer is finally starting to pay off," said Stanton.

This publication produced by the Campus Media Committee isn't the only work we've been conducting this summer. We also have two other committees in the SRB; Polling and Briefing and Marketing, each of which will play an important part in keeping the students aware of the ASI's actions and the benefits the ASI makes available to them. We are going to need help from the students in the SRB, as well as other positions in the ASI. I feel students should become involved in making the decisions that will directly effect them. Become Involved!!

Michael Grennier
Vice Chair, Student Relations Board

World mover

Editor:

Whatever has happened in the past can never be altered. It is the future that we must look forward to. Destinies cannot be determined, for the world holds too many unknowns. We must live life one day at a time and thank God for the life that he has so graciously given us.

As children of God, we cannot ac-

complish all that we would like to, but there is nothing that says we cannot join together and help each other. God's gift of life is meant to be taken advantage of. We must live life to its fullest. We must learn to cope with its ups and downs and we must always remember that it is *love* that makes the world go 'round.

Jane Walsh Christol

Mike Curb just announced he's running for governor.

Wasn't he already running?

Since 1978.

Ross Griggs

Letters

Kill Merv

Editor:

I have been reading the letters about the GRLM (Gametic Right to Life Movement) with mounting righteous anger.

Robert Lee, the founder of the GRLM, said that intercourse must be made compulsory to give all gametes a chance at life. Some students say that this is just a joke, and that anyone taking the GRLM seriously is to dum two spel. That's a lie!

Not only is the GRLM morally twisted, but it doesn't take Darwin's theory into account. A slaughtered cow, a swatted mosquito and cruelly masticated bacteria in Dannon yogurt (anyone know where I can buy some out here?) could have evolved into intelligent life in a million years or so. The GRLM should not tolerate killing any form of life, and thus should advocate eating only synthetic food made from oil.

To counter the GRLM, I'm forming my own group, whose doctrine Robert Lee mentioned; "Current consensus science informs us that the only basic difference between ourselves and other organisms lies in the complexity of our verbal behavior." Therefore, we who have this have the right to kill those who don't. Those who don't include include animals, fetuses, crying babies in movie theatres, game show hosts, philosophy professors, and anyone found at a keg party.

Students who have written angry letters about the GRLM should join my group, the DYKSWYRI?M (Don't You Know Sarcasm When You Read It? Movement). The DYKSWYRI?M's first order of business will be the mercy killing of Merv Griffin.
