Concert gets out of hand at annual Vet's Hall bash

By Alison Skratt Staff Writer

Poor organization plagued SAE's annual Red Party Friday, leaving many stranded outside, unable to even try and cope with the crowd inside.

As many as 200 people piled up outside the Veteran's Hall, trying to see the Untouchables.

Tami Martin waited in line to get in for two hours, and then decided to leave. "It wasn't worth it," she said. "There was kind of a line at first, then everybody rushed to the door, leaving my friend and I in the back.'

Kristy Duncan was on the guest list and waited an hour to get in.

"The actual show was really good," she said, "but the crowd outside was a mess."

Senators: It won't work

According to Duncan, a packed crowd inside, along with violent slam dancing and poor ventila-tion, were all signs that the event "was not well organized at all."

"The building was too small to hold an Untouchables crowd," she said.

"It was so hot in there that the walls were dripping water from the condensation," Duncan said. "I was just getting shoved from. one end of the hall to the other."

"The crowd was a little wild," said Jason Gress, last year's Red Party chairman. "But the band went over really well."

SAE was required to hire Five Cities Security Services to watch the party. But they also had about 50 fraternity brothers and 20 local bouncers to help with crowd control.

"It was a bad situation," said Alec Little, member of the open-

ing band Rhythm Akimbo and SAE member. "The organizers didn't have much experience in crowd control."

K.C. Bowman, Rhythm Akimbo leader, agreed. "It turned out all right. But it could have come off so much better. It's kind of unfortunate."

Bowman also faulted the security at the show. Tables were set on their sides in front of the stage as barricades, he said. "Picnic tables and 15 SAE brothers aren't going to hold 1,500 people surging toward the stage. It's silly to expect people to stay 50 feet in front of the stage (with the barricade)."

Members of the Untouchables were unavailable for comment at press time.

Rhythm Akimbo's performance was stopped twice by See RED, page 10

Plus/minus grading under fire

By Alison Skratt Staff Writer

The capability of Cal Poly's new computer system, OASIS, to change the university's grading system to plus/minus has prompted two student senators to write a resolution condemning the modification. Apparently the idea of changing Cal Poly's grading system is not a new one. The administration first proposed it in 1982. The Academic Senate even recommended it as superior to the present system before it was discovered that the computers of the time could not accommodate the switchover. After the technological obstacle was detected, the matter was dropped. However, now that OASIS has the capability, the issue has returned. But School of Agriculture Senator Ricardo Echeverria and School of Business Senator Nelson Chen don't think the system should be altered, and

pressing their views.

Resolution 88-12 strongly recommends that the Academic administration is the key. Senate re-evaluate their decision They're the actual decisionregarding plus/minus grading making source." and that the administration not implement it.

they've written a resolution ex- below the satisfactory grade point standard of 2.0."

According to Echeverria, "the

Baker says resources scarce at universities

By Lawrence Anton Staff Writer

As the year 2000 approaches, Cal Poly faces some tough decisions.

CSU Chancellor W. Ann Reynolds has asked the university to look into increasing enrollment by the year 2000 and a state law has placed limits on funding for higher education, making resources scarce.

Above all else, Cal Poly President Warren Baker said during a recent interview, the administration remains committed to providing students with a quality education.

"We should not expand if we cannot maintain the quality," he said. "The quality of our educational program ... is the most significant factor that we have to consider."

At the President's Council in February, the chancellor asked Cal Poly and four other universities to consider increasing enrollment to accept their share of projected CSU growth. Between 1994 and the year 2000,

CSU enrollment is expected to grow about 12 percent.

Baker said 12-percent growth would mean about 2,000 additional students. "So whatever we're talking about, we're not talking about a huge increase," he said.

But new classrooms, faculty offices and parking lots would need to be planned and constructed to accommodate more students because current facilities - the new Agricultural Science Building and the proposed business building addition included - were designed to handle only 15,000 full-time students, which is the university's projected enrollment for 1994.

"Any increase we would want to entertain would be predicated on receiving adequate facilities,' Baker said.

With a finite amount of space available for growth in the campus core, competition for land could become an important issue when considering sites for future construction. Dean Lark P. Carter of the School of See BAKER, page 10

It will be introduced at Wednesday's meeting and will be voted on in three weeks.

An older Student Senate resolution, passed in 1982, that opposed the change is used in the new resolution to give evidence of past disagreement.

However, the resolution's strongest defense is its discussion of the 1.7 GPA.

It cites the Academic Senate's old recommendation of a 1.7 GPA equalling a C-, or passing grade. However, a 1.7 is also grounds for academic probation, and/or possible dismissal from the university.

Also, a student who received a C-, or passing grade, in a course would not be allowed to retake the class "even though a 1.7 is

If refuted by the Student and Academic senates, the plus/ minus system could still be implemented by the administration, because the senates' decisions are only recommendations.

"It's a double-edged sword," said Academic Senate Chair Charlie Crabb. It depends on if the student is above or below the straight grade.

"I think the GPAs won't really change," he said, because of students' fluctuations above and below a straight grade.

"Most cases aren't really borderline," said Chen. "The chances that you'll need the added plus/minus are very slim."

Chen also added that with the new system most people wouldn't get A's. The A grade would be moved up to the 95 See GRADES, page 10

Senate seeks effective evaluations

Resolution option that standardizes faculty critiques not recommended

By Alison Skratt

Staff Writer

The Academic Senate's instruction committee has drawn up six resolutions in response to a report on how to measure effectiveness of instruction, one of which supports the optional use of the Student Senate's recommended faculty evaluation system.

The resolution strongly recommends that the Student Instructional Report (SIR) be used optionally "in a complementary fashion with the current evaluation system in order to provide faculty with confidential constructive feedback of classroom performance."

Having the instructors be the only ones who see the evaluations is a key part of getting the faculty to accept the idea, said Academic Senate Chair Charlie Crabb.

The SIR is a system of evaluation put out by the Educational Testing Services, the same organization that runs the SAT and LSAT. The evaluation

consists of 50 questions that rate the instructor on a one-to-five scale and an optional section to write one's own comments. The estimated cost per usage is \$29,300.

The SIR would only be used during a quarter when the instructor was not using the department evaluations that are now being used.

All but one of the six resolutions were approved by the committee, and they will all go before the Academic Senate in spring quarter for a vote.

The other resolutions that were approved by the committee dealt with surveying Cal Poly graduates See EVALUATIONS, page 3

Library needs less mess, more concern

With the recent prominent posting of anti-consumption signs in our Kennedy Library, it is clear that the majority of students cannot be trusted to care for valuable books.

The library boasts an enormous amount of free resource material that is not conveniently available anywhere else in the area. Yet many students seem to treat this resource as their private oasis for snacktime studying. With backpacks full of goodies, they climb the stairs and fill the pages with crumbs and coffee stains. They leave small mountains of garbage and even more crumbs behind for others to enjoy. And they get upset when they are told to do their snacking outside the library.

If food and drink were allowed to run wild throughout the library, the deterioration of our volumes would be quick and certain. The privilege would be as abused as the rules are today. We would begin to feed openly and sloppily during our studies, without fear of retribution or care for the damage done. Just how hard is it, anyway, to take a few minutes away from the books to snack?

Actually, most of us are responsible in our library lunching, but crumbs and messes are unvoidable. Therefore, we need a place *inside* the library to relax away from the books and do our munching or have that important cup of java. A place where nourishing ourselves would be legal and unfettered by the heavy-handed fear of retribution, where books would not be threatened by the inevitable upper-level snackers. Such a place might be the reserve room, which is already blessed with an informal and even raucous atmosphere.

Public poverty is hidden under a white lab coat

n the past decade, the word "technology" has been exalted with the prefix "high," as in "God on High" or "High Heaven." The phrase "High Tech" has outgrown its original role as a Madison Avenue sales gimmick and become a national mantra, exalting all that it touches.

We don't use gasoline anymore, the car of the eighties runs on "Techroline" or "SU 2000." I can still remember a TV ad

for High Tech orange juice, whose oranges were supposedly superior because they were selected by computer. Whenever Madison Avenue really wants you believe the to demonstration you're seeing on television, they invariably trot out a man in a white lab coat ... a Scientist, a High Priest of Objectivity and Truth. After all, who can distrust someone in a white lab coat?

The Church of Big Science uses a number of fear tactics to get its way. A generation of parents has rushed out and bought home computers, driven by advertising that declares that Tomorrow will leave their children behind. Remember the TV commercial with the fat kid who came home from college on the train? If the masses balk at supporting multi-billion dollar government research projects, the priests of Big Science will cast their arms heavenward and invoke the great black god of Because The Russians Are Working On It Too. It works most every time.

Sitting in the front pew of the Church of Big Science is our president. Mr. Reagan's gaze is fixed upon the scientist at the pulpit, his mouth is wide open in reverent awe and spittle runs down his chin. He nods approvingly throughout the sermon, prepared to grant every request, no matter how expensive.

A few years ago, in a bizarre addendum to a routine televised speech, Reagan tossed Star Wars out to a baffled American public. He called it the too late now — the Frankenstein has been born and he's stomping around for taxpayer dollars.

The Strategic Defense Initiative is really nothing more than a huge welfare check for the aerospace industry, whose final amount is completely openended. It will cost exactly as much as the Pentagon can squeeze out of Congress. Meanwhile, the national debt multiplies, our economy loses more

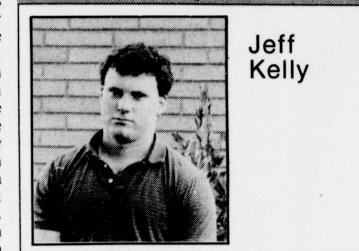

> ground to other nations every year, and the AIDS epidemic continues in an atmosphere of complete inaction by the federal government.

> But reality has never been a problem for Ronald Reagan, who takes his cues from The Great Teleprompter in the Sky. Determined to outdo John Kennedy's space legacy at any cost, in addition to SDI, Reagan has called for a \$13 billion space station

and endorsed the Super Collidor, a huge new particle accelerator. If federal money is so readily available, perhaps the Reagan administration could throw a little at the victims of technology, such as the Agent Orange Veterans, the Atomic Veterans and all of us living downwind from Casmalia.

The Super Collidor is supposed to cost \$6 billion, but problems with the proposed superconducting technology could easily double that. It collides head on with the budgetary realities of our age. It is not a great benificent instrument of knowledge, but, like SDI (to which it is linked), it is an enormous political plum dripping with money, jobs and political patronage for the lucky state that gets it. Governors across the nation are fighting like female mud wrestlers to land it.

At the risk of being burned at the stake of heresy for questioning the Church of Big Science, I would like to speak on behalf of the taxpayer.We are the fellaheen who keep the Pentagon/Science establishment going, carrying it on our backs while it decides its own budget needs. With the nation awash in debt, the Space Station, SDI, and Super Collidor must be justified in terms of real benefits to the *majority* of the American people. Will they make us richer? Will they fight communism in Central America? Vague generalizations about scientific advancement and national security are no longer enough. These toys are getting too expensive.

Ulterior motives

We need to save our books, the bastion of historic permanence itself. But we also need to consume at odd moments, so why not compromise? High Frontier, a title that neatly combines God, adventure, and heroic American legend. A hugely expensive proposal, no matter how ridiculous, takes on a life of its own once the Pentagon gets ahold of it, and Star Wars is no exception. Yes, the scientific community now concedes, perhaps the President was "oversold" on Star Wars. But it's

Letters to the editor

Apathy robs the future

Editor:

Any questions? The class sits in silence, clearly too tired at this hour of the morning to ask anything.

The instructor waits a few seconds for a student to show at least some sort of interest and ask a question, or at least offer an opinion. But none do and the instructor goes.

This is the scene in one of my classes, but I see it in most. It's apathy. I sit and wonder what kind of generation I belong to.

It seems most of us are in college to put in the time and get out as easy as possible so we can buy our futures. A degree merely becomes a stepping stone to materialistic isolationism. Granted, we need to work to live, but while in college I thought we were supposed to be broadening our perspective, not just trying to coast through with an attitude of "looking out for number one."

Our generation will have to confront major socio/political/ economic problems in the future and I'm wondering if we'll be honestly prepared. We need some interest in world affairs to at least partially understand these problems when they occur.

I'm not saying all this is the student's fault, this apathy. Every generation seems to pass on this attitude that the future generation will do something. We are the future. Teachers too have a part. Many that I've seen are like tape recorders — they walk into a class, talk in monotone for an hour, and then they turn off. All with the enthusiasm of a rock. How do they expect us as students to get interested in what they are teaching when they barely care?

It seems we're missing some-

thing in the college educational process: genuine interest. Yes, there are teachers and students who are exceptional, but why should they be? Shouldn't enthusiasm for learning be universal? The issues and dilemmas that confront us as human beings demand understanding. If we're in college merely for a degree so we can get a "good" job, we are cheating ourselves out of a rich life of knowledge that will unlock the doors to more than just our materialistic future.

and while as

Involvement appreciated

Editor:

The English club and the Cal Poly chapter of Sigma Tau Delta, the national English honor society, extend our utmost gratitude to professor Roger Kenvin, who donated hours of service and resources on behalf of our dramatic reading presentation during Liberal Arts Week.

When asked to be a consuitant for our dramatic reading of Wit and Science, professor Kenvin not only agreed to help, he in fact became the group's motivating force. Professor Kenvin advised us on characterization, blocking and costumes. In addition, not only did he attend all of our evening and weekend rehearsals, he arranged a room on campus where we could meet. Furthermore, professor Kenvin edited, typed, copied and rebound the original script and distributed them to the cast, saving us considerable expense and trouble.

Thus, let professor Kenvin be seen as an ideal model for full faculty involvement and support of student activities. Unfortunately for all of us, Dr. Kenvin is

retiring after winter quarter. We challenge all Cal Poly faculty to cooperate with students to the extent that Roger Kenvin did.

Art overdose

Editor:

My peeve is about your newspaper artist, Grant Shaffer. I've been reading *Mustang Daily* regularly for the two years that I've been attending Poly. In that period of time I have received enough doses of Grant Shaffer art to last a lifetime, many times five times in a single *Daily*!

I must admit that I think some of Shaffer's work is very good ... but how about some variety? Guest artists? I'm sure there are plenty of sketchers here on campus willing to draw the next Woodstock's ad.

Fergie, Andrew hit California to promote British trade, art

LOS ANGELES (AP) — Britain's Prince Andrew and his wife Sarah were warmly welcomed by dignitaries, entertained by children and cheered by crowds Saturday as they began the official duties of a 10-day California visit to promote British trade and art.

The duchess got the City Hall ceremony off to a light-hearted start by topping off her black-and-white outfit with a hat sporting the inch-high white letters LA sticking out on wires from the back.

Prince Andrew, in a gray suit and tie and a pastel green shirt, gave a short speech in the City Council chambers which stressed the three-month UK-LA '88 Festival of cultural and business exchanges between the two nations, along with the joint U.S.-British efforts to maintain peace in the world.

Noting that he and his wife will visit the aircraft carrier USS Nimitz at sea, the prince said:

"For us, our visit to one of your ships will remind us of those many parts of the world in Central Europe, in the Persian Gulf and elsewhere in which your armed forces and ours stand side by side in common defense or our shared democratic values."

Though still displaying a jovial nature, the prince was more restrained than he was during his visit to Los Angeles four years ago. While visiting a housing project he playfully sprayed paint on accompanying reporters.

Nation

NEWSBRIEFS

Parties battle to pass Contra aid rival plans in Congress

WASHINGTON (AP) — Congress faces a confusing choice this week between two rival versions of a plan to help the Nicaraguan rebels.

A vote is scheduled for Thursday to decide whether the U.S.-backed Contras will get an aid package drafted by House Democrats, a similar one drawn up by House Republicans, or nothing at all.

Current authority to aid the Contras expires at midnight Monday, and the rebels are said to be rapidly running out of items like food, clothing and medicine that the new aid plans would provide.

Both versions of the new aid package would keep non-lethal supplies flowing to the rebels at their positions inside Nicaraguan territory. Neither would provide new weapons. And both would set up a \$14 million program to help war-injured children on all sides of the conflict.

But while similar in what they would do for the rebels in the short term, the two versions set starkly different ground rules for an impending rematch between the Reagan administration and the Democratic Congress over military aid for the rebels.

The Democratic version, which House leaders say they are confident will pass, holds out the possibility that a new military aid package could be considered sometime after June 1.

World

Noriega denounces president; Delvalle flees house on foot

PANAMA CITY, Panama (AP) — Deposed President Eric Arturo Delvalle fled from his house on foot hours after government agents warned him to get out of the country, his brother-in-law said Saturday.

"Delvalle left the house to protect himself," Raul Diaz, the brother-in-law, told reporters. He declined to say where the former president was.

Diaz said the former president had slipped away on foot to avoid arrest and deportation by military strongman Gen. Manuel Antonio Noriega.

Noreiga engineered Delvalle's ouster after Delvalle called on Noriega to resign Thursday. Noriega had been indicted in the United States on drug charges.

Soldiers came to Delvalle's house at 8 a.m. Saturday and were met at the door by Delvalle's wife, Mariela. While the soldiers were telling her they wanted to take Delvalle, the president escaped out a back door, according to U.S. officials in Washington.

State Department sources, speaking on condition of anonymity, confirmed Delvalle's departure and said he had been in telephone contact with U.S. Ambassador Arthur Davis in Panama City and that his children and grandchildren were at that American embassy.

Noriega is expected to file criminal charges against the deposed president, who is still recognized by the United States.

EVALUATIONS

From page 1

and their employers for useful information, encouraging common final exams when possible, providing opportunities for faculty to improve testing instruments and officially en-couraging distribution of syllabi

in all classes.

The one that was rejected dealt with standarizing testing instruments for students. It called for "all student evaluation instruments to include: a quantifiable element, a significant percentage that is common across the school or university, some means of evaluating the internal consistency and responsibility of the respondents and some means of correlating it with peer evaluations."

In an added comment on the

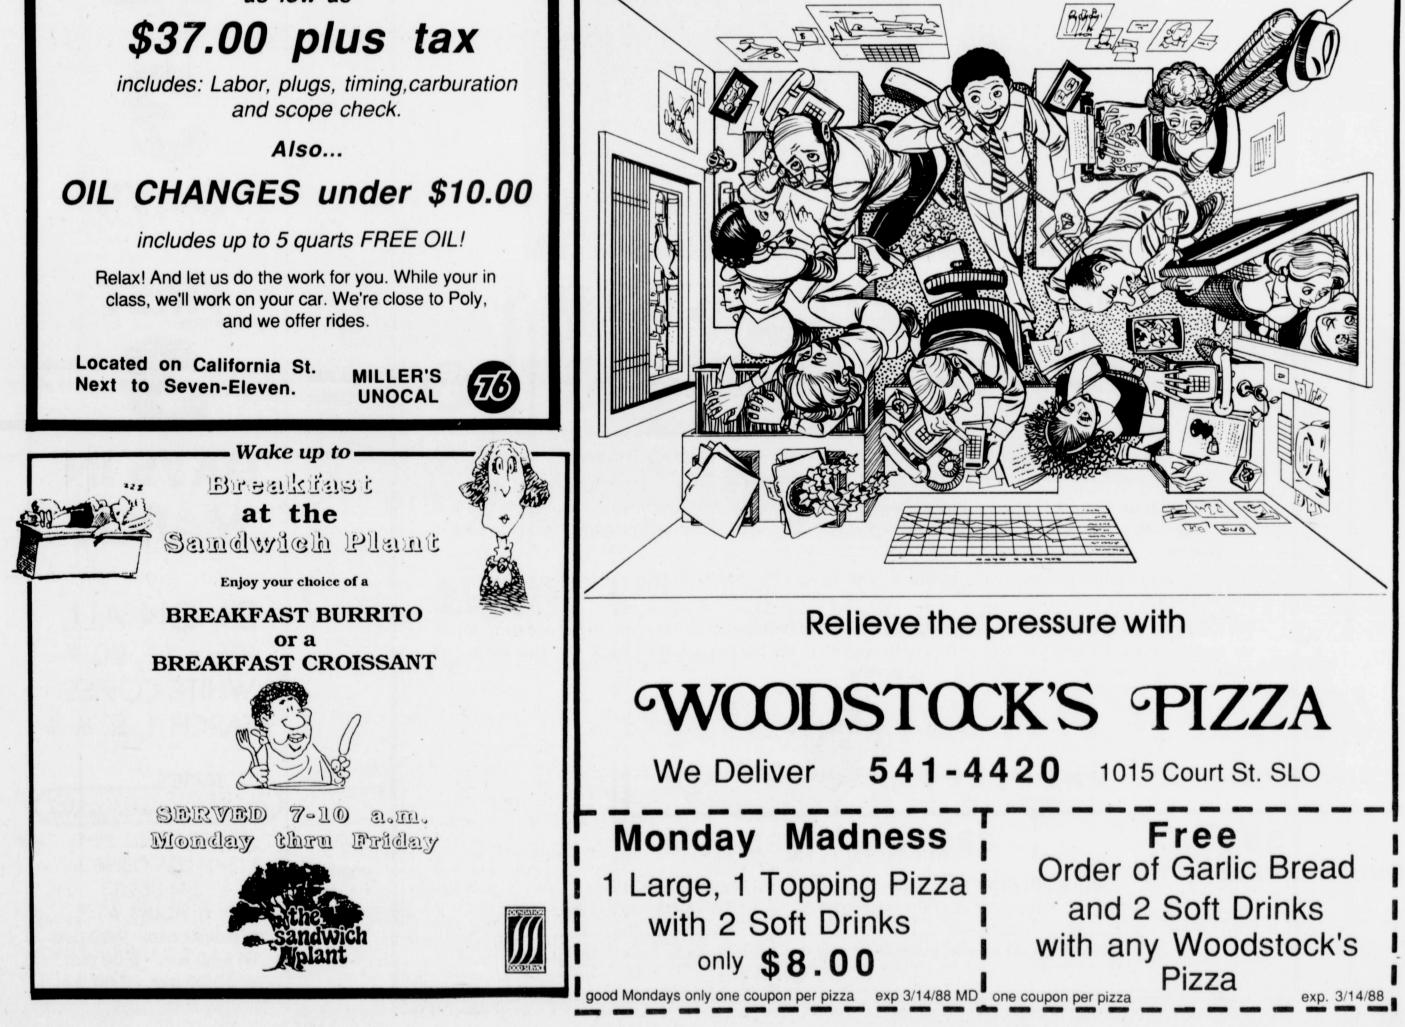

resolution, the committee said, "It is not terribly important that the present evaluation forms are not standard. Each department/ school should seek to improve the form it uses, but not necessarily along standardized lines.

The committee agrees with

having some means of internal consistency and responsibility of the respondents, but believes that correlating it with peer evaluations is impossible to achieve."

Madness on Monday.

Women's Week concludes

Soviet, American women share element of powerlessness

By Joan M. Halpin Staff Writer

People are basically the same all over the world, said a Cal Poly professor of Russian studies.

No matter what the political and cultural differences are, similarities between people across the North Atlantic Ocean are

Bianca Rosenthal

Leristin Handster

thal of the foreign language department, during a Women's Week speech titled "Women in the U.S.S.R."

Along with the lecture, the award-winning foreign film, "Moscow Does Not Believe in Tears," was shown. Rosenthal said except for the subtitles, Americans would find

it difficult to tell the difference between many of the Soviet's day-to-day experiences than and their own.

Although alcohol, teen-age pregnancy, female oppression, and food, clothing, and shelters were some of the Soviets' major problems shown in the film, many Americans would testify to having the same concerns, said Rosenthal.

Rosenthal pointed out some of the stereotypes in the movie were exaggerated, but did find a common thread in the lifestyles of women in both countries.

Women from the

remarkable, said Bianca Rosen- Soviet Union and the United States share the same thread of powerlessness, she said. Even though Soviet women have what American women strive for equal rights under the Constitution — it is not upheld in practice, Rosenthal said.

In the U.S.S.R., the majority of women work outside the home, said Rosenthal, but also handle the domestic responsibilities.

According to "Women and Russia," a book on feminist writing, the U.S.S.R. has the highest female labor force in any modern industrial society. Women dominate the medical, law and engineering fields but also work in agriculture, construction and other heavy labor positions.

Although women dominate the medical fields, doctors in the U.S.S.R. do not carry status and are considered as ghetto workers who are sponsored by the government, said Rosenthal. Space exploration, defense and higher education are some of the Soviets' priorities.

A clip from the film showed a woman factory worker getting her engineering degree and being promoted to the director of the same factory. Rosenthal said this promotion was unlikely because top executive positions are usually held for male members of the Communist Party, the Soviet Union's only political party. The U.S.S.R. is considered an atheist state and only 6 percent of the population — the elite — are affiliated with the Party.

Oppression of women in a patriarchal society is seen in a Soviet phrase that still circulates today: "If the wife works and makes more money it will ruin the family."

Domestic chores, like grocery shopping, are considered the Soviet woman's responsibility. But unlike the United States, supermarkets are rare and customers have to stand in many lines to purchase, pay and receive their goods. Meat is rare and shopping includes separate trips to the bakery, dairy, fruit and vegetable stores. Men stand in lines for alcoholic beverages.

Other social concerns, like birth control methods, were ignored, especially after World War II when 20 percent of the Russian population were killed. Today Soviet contraception is abortion and the average Soviet woman has had eight abortions. "They just don't make women a priority," said Rosenthal.

"Free a woman from the kitchen and you will give her the freedom of a silly hand," said Rosenthal, quoting another popular Soviet phrase.

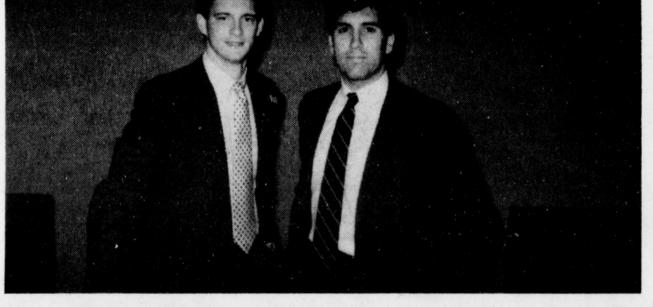

Although women have the responsibilities of working outside the home, they are also supposed to stay female, gentle and weak, said Rosenthal. After the revolution, the Russian leader Lenin publicly announced he supported the woman's movement and believed women had equal rights in regards to the family and state. But his ideas were never implemented. And it was here, after the revolution that the popular Russian phrase changed to, "the kitchen would belong to anyone who wants to eat." said Rosenthal.

"Russian women who are liberated look for romantic love," she said, but added marriage is officially supported by the U.S.S.R.

Rosenthal admits some parts of the film idealize men, especially in the scene where the man cooks dinner for his girlfriend and her daughter. Although this may happen, Rosenthal said, it was a novelty.

Although the Soviet Union and the United States have similar concerns on many issues, economics is not one on them, See WOMEN, page 11

Team.

Cal Sta

RIVERSIDE — So it wasn't the most important game of the season. So both teams weren't fighting for a ticket into the California Collegiate Athletic Association Tournament. But you'd never have known it by watching this game.

Whether it was an illusion caused by U.C. Riverside's claustrophobic breadbox gym, the loudspeaker's late-game announcement, or the fact that it was the last game of the regular season — something made head coach Steve Beason and his

Mustangs smell blood.

Trouble was, the Highlanders smelled it too, and slowly tore the victory carcass from the Mustangs with a 69-58 win Saturday night.

With that win, Riverside shares the CCAA title with Cal State Bakersfield, ending the Mustangs' two-year reign at the top. The Mustangs finished second at 9-5.

Bakersfield, which gets the No. 1 seed in the CCAA Tournament and will host the event, will face Cal State Northridge in the first round Friday. No. 3 seed Cal Poly and No. 2 Riverside will have a rematch in the other half of the draw. The winners play in the final Saturday.

Bakersfield had the best record going into Saturday's games. But Bakersfield lost to Pomona,

MEN'S HOOPS

meaning the winner of the Cal Poly-Riverside game would tie Bakersfield for first place.

In the first few minutes, scoring went tit for tat, but halfway through the period the Mustangs pulled away to lead, 23-17. The Highlanders answered with two outside shots to come within one, but then it was Mark Otta time. No, not a three-pointer. An inside move. A BIG inside move, on which the senior guard drew a foul. He sank the freethrow to cap a three-point play.

Even though Otta scored a very quiet team-high 13 points, it's awfully hard to miss a bull in the paint — especially when he's only 6-2. Otta's newfound play inside the key was indicative of how hard the Mustangs were going to play.

Every Mustang to hit the floor played ferociously, not the least of whom was senior guard Jeff Gray, who ripped down nine rebounds and dished off six assists.

Tri-meet victory

Lady Mustangs post another record score

By Cindy McAndrew Staff Writer

Cal Poly gymnast Mimi Phene set two school records Saturday to lead the Lady Mustangs to victory over Northern Michigan and Division II's top-ranked team, Seattle Pacific. The Lady Mustangs, the nation's No. 4 team, took the triangular meet with 181.15 points, the highest score the team has ever achieved. Northern Michigan, ranked sixth in the nation, placed second with 176.7, while Seattle Pacific placed third with 176.5. Phene's first place in the allaround with 37.05 points was good for a school record, as was her first in the floor exercise at 9.45. Kim Wells, with a score of 36.4, placed third in the allaround. She also won the balance beam, usually Cal Poly's weak area, with a score of 9.3. Wells said Seattle Pacific had some difficulties on the balance beam. This left a little breathing room and Cal Poly was able to take advantage of the weakness. Mary Kay Humble came in fifth in the all-around with a 35.45.

The team's overall score of 46.4 in the floor exercise was their highest score of the season.

Cal Poly head coach Tim Rivera said the Lady Mustangs' performance means they have a

good shot at winning nationals. They are striving to stay in the 180s for team scoring, he said.

"The team needs to keep working hard so they know getting in the 180s was not just a fluke," he said. "We are a 180s team."

Wells said the team worked hard to prepare for Saturday's meet because Seattle Pacific is a tough team. It was easier to compete at home, she said. But the Western Region championships, to be held at Seattle Pacific in March, may be a different story.

"It's going to be neck and neck when we compete against them (Seattle Pacific) in the regionals." said Wells.

The Lady Mustangs will travel to Sacramento Saturday for a meet against Sacramento State, Chico State, U.C. Davis and Cal Poly Pomona.

DARRELL MIHO/Mustang Daily

Cal Poly's Michelle Kiess dismounts the balance beam.

One-point loss closes Poly's season

Possible berth in conference tournament not enough incentive for victory

By Floyd Jones Daily Correspondent

RIVERSIDE — Maybe it was fatigue — or lack of concentration. But for the Lady Mustangs Saturday night, it was just plain depressing.

They dropped the season's last game to the U.C. Riverside Highlanders, 66-65. It was the final game for seniors Julie Jordan and Theresa Smith.

The Lady Mustangs ended the season with a 4-8 record in the California Collegiate Athletic Association play. The Highlanders brought their CCAA record to 4-8. Had the Lady Mustangs won, they would have tied Chapman College's 5-7 record, which could have given them a berth in the

WOMEN'S HOOPS

CCAA tournament being held in Bakersfield Thursday.

Thursday's games will pit regular-season champion Cal Poly Pomona against Chapman and Cal State Northridge against Cal State Los Angeles.

"I just can't believe it ended like this," said freshman guard Jody Hasselfield. "We kept thinking we had it, and to blow a lead like that was depressing." By halftime the game had been equally matched, with the Lady Mustangs going into the locker room ahead, 33-29. The early minutes of the second half were not much different. The Lady Mustangs held a six-point lead for four minutes.

The Highlanders consistently got the ball underneath to center Debbie Arnold, but Arnold missed her first three chances on three trips downcourt, letting the Lady Mustangs move further ahead, 42-33.

With 12:58 left, the Highlanders had cut the deficit to four, but Hasselfield nailed a three-pointer from the top to

n widen the gap to 48-41.

Then, slowly, things started coming apart for the Lady Mustangs. Two points from the Highlanders center, Patti Held, combined with stolen passes thrown by Smith and Hasselfield resulting in Riverside buckets, closed the score to 48-47 with 10:29 remaining.

Forty seconds later Riverside guard Monette Miller swatted another Hasselfield pass and fed Held for an easy layup, putting Riverside up 49-48.

Hasselfield gave up seven of Poly's 23 turnovers. The Highlanders turned over 18.

Mustangs rally to take conference quad meet

Unknowing mile relay team puts the icing on win

By Rob Lopez Staff writer

The Cal Poly men's track and field team came from behind to

MEN'S TRACK

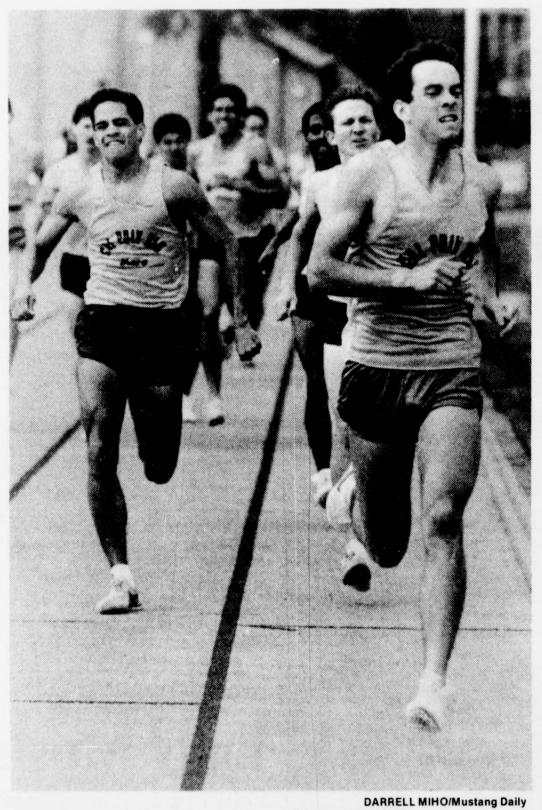

win a close four-way conference meet under rainy skies Saturday afternoon.

The Mustangs defeated Cal State Bakersfield, Chapman College and Cal Poly Pomona. They scored 103 points, with their toughest competition coming from Bakersfield, which finished second with 72 points. Pomona scored 22 and Chapman only six. It was the Mustangs' California Collegiate Athletic Association opener.

The Mustangs trailed Bakersfield by five points with only two events left. The men went into the last event, the mile relay, thinking it was a do-or-die situation when, in fact, they had clinched first place in the previous event.

Head coach Tom Henderson knew the results but decided not to pass them on until after the relay. The Mustangs proved they can compete under pressure by winning the event.

"Our coach told us it would

Mark Steuer, Doug Hancock and Chris Craig swept the 800.

come down to winning the mile relay," freshman Kreg Kowarsch said. "Everybody stuck together. People started clapping before the last race. It sent a chill up and down my spine, it really pumped me up."

Kowarsch used a powerful kick in the last 100 meters to pass a Bakersfield runner en route to victory. The team of Kowarsch, Mike King, Rich Batiste and Rudy Huber posted a time of 3:18.10.

Henderson said Kowarsch did a great job filling in for Brian Strieff, the No. 1 400-relay runner and anchorman of the "A" mile relay team. Strieff had to sit out the mile relay because of stiffness in his leg.

"We had some real solid performances today, but nothing spectacular," said Henderson. "Given the weather conditions the team performed well."

The Mustangs swept the top four places in the 5,000 and the top three in the 800. They also placed in the top three in the pole vault despite the strong wind, which Henderson said was blowing directly in the vaulters' faces.

Sprints — The Mustangs took third and fourth in the 100. Huber ran an 11.26 and freshman Robert DeBorde an 11.55. In the high hurdles, Kowarsch took second with a time of 15.35. The Mustangs also placed third, fourth and fifth in that race. Huber finished third in the 200 with a time of 22 seconds flat.

Batiste took third place in the 400 with a time of 49.47. Mark Briggs of Bakersfield won the distance in a time of 49.25. In the intermediate hurdles, King finished first in 53.7 seconds. Hans Kardel finished fourth with a time of 55.4.

Middle Distance — Junior Chris Craig led the sweep of the fifth in the 15-man field.

Long Distance — Pomona was the only school entered in the 3,000 steeple chase. The Mustangs Erich Ackermann won the 5,000 with a time of 14:59.8. Senior Michael Miner, junior Paul Ghidossi and freshman Mike Parrott finished second through fourth, respectively.

Jumps — In the high jump Cal

'Everybody stuck together.
People started clapping ... It sent a chill up and down my spine.'
Kowarsch

Poly's Mark Conley placed third, clearing 6-0. Bakersfield won the event. Huber finished second in the long jump, traveling 22-1. DeBorde finished third with a jump of 19-5. Conely gave the Mustangs first place in the triple jump with a leap of 44-6. Sophomore Kevin Rankin led the sweep of the pole vault, clearing 15-6.

Throws — In the shot put, freshman Casey Gretlein finished first with a throw of 43-8. Junior Dave Mosbacher and junior Scott Jacobsen placed third and fourth. In the discus, junior Brant Warren took second with a launch of 134-11. Mosbacher finished fourth. In the hammer throw, Cal Poly's best finisher

BELIEVE YOUR EYES

You've heard it before: leading edge technology, team involvement and growth opportunities. Fine talk, but so many companies claim to be special. We at Acuson would like the opportunity to show you the difference at our On-Campus Presentation/Démonstration.

The visible difference begins with our technology: real-time medical imaging systems that enable physicians to "see" inside the human body with greater precision and resolution than ever before. It's why we're known as the industry's "Gold Standard," a reputation we're expanding through ambitious R&D and accelerated paths from idea to implementation. Dynamic, young and successful, Acuson is achievement and excitement you won't see elsewhere.

But don't take our word for it. If you're a BS, MS or PhD graduate in one of the following areas, come see and believe for yourself.

Win streak continues with shutout

Poly routs Chapman for seventh straight

By John Alexiou Staff Writer

The Cal Poly women's tennis team dominated Chapman College, 9-0, to win its fourth conference and seventh straight match Friday afternoon.

second in Division II, raised their record to 7-2 overall and 4-0 in the California Collegiate Athletic

Association. Cal Poly head coach Miguel results and wasn't surprised by

said Phelps, who let his less experienced players compete higher on the ladder. "It was a blowout with my lower squad. It just showed we have a lot of good players and a lot of depth."

The Lady Mustangs team is unique because they have a large number of players, including a reserve team.

"Most of the other teams in this league are fighting to have seven players," said Phelps. "I'm sitting here with 15 players and can put most of them in a match and feel confident that we'll hold our own."

Case in point: Cal Poly's No. 6 player, Amy Lansford, faced Michelle Dobeck, Chapman's No. 1. Lansford came out on top, 6-1, 6-4.

Tracy Matano, No. 4 for the Lady Mustangs, easily defeated Karen Bonnett, 6-0, 6-0. Danica Armstrong, ranked seventh, went up against Chapman's No. 3 player, Jenny Siebel. Armstrong won, 6-1, 6-0.

In tougher competition, Cal Poly's No. 8, Ci-Ci Barbe, scored against the Panthers No. 4, Chris Peper, 6-3, 6-1. Lisa Callin, No. 10 on Cal Poly's ladder, had the

'I'm sitting here with 15 players and can put most of them in a match and feel confident that we'll hold our own.

Phelps

edge on No. 5 Michelle Cotter, which translated into a 6-0, 6-1 win.

Laurie Moller and Maria Prietto easily defeated their opponents, both winning in straight sets, 6-0, 6-0.

In doubles competition, Wendy Elliot and Lansford rolled to an easy win over Dobeck and Bonnett, 6-1, 6-0.

Cal Poly's No. 1 player, Vicki Kanter, and No. 5 Susan Norman beat Siebel and Peper, 6-0, 6-2. Cal Poly's Chris Calandra and Barbe easily won their match, 6-0, 6-0.

Timely hits missing as Long Beach nips Poly

By Sherry Wittmann Staff Writer

After a confident win Friday against Cal State Long Beach, the Cal Poly baseball team fell short Saturday in the second of a three-game series, 3-2.

BASEBALL

"We had a very good and courageous game by our pitcher, Chad Holmes," said 49ers coach John Gonsalves.

Holmes' performance was a vast improvement for Long Beach, which had allowed 92 walks in the previous 102 innings.

The 49ers controlled the first three innings, scoring all three of their runs. Cal Poly saw only 10 of its batters come to the plate during that time.

However, the Mustangs rallied in the fourth. Second baseman Joe Rumsey belted a line drive to center field. Leftfielder Todd Rice followed with a double that allowed Rumsey to score. Another line drive to center by rightfielder Rich Shepperd brought in Rice to make the score 3-2.

The inning ended when third baseman Justin McCray grounded to 49ers shortstop Chris Gill, resulting in a double play.

The Mustangs had a chance to score again in the seventh inning shortstop Chris when Vodanovich came to the plate with two outs and the bases loaded. But he grounded out to 49ers second baseman Mike Lujan to end the inning. "We didn't get the big hit when we needed to," said Cal Poly head coach Steve McFarland. See BASEBALL, back page

Poly wins every event but one to post 88 points

By Rob Lopez Staff writer

The Cal Poly women's track and field team was storming just like the weather Saturday afternoon.

Cal Poly won a four-way conference meet against Cal State Bakersfield, Chapman College and Cal Poly Pomona under rainy skies. It was the Lady Mustangs' California Collegiate Athletic Association opener.

WOMEN'S TRACK

They scored 88 points. Their closet competition came from Pomona, which scored 59. Bakersfield scored 26 and Chapman had only two. The Lady Mustangs dominated the meet from start to finish.

In every event but one, Lady Mustangs swept the top two places. The one exception was the 100 hurdles, which was won by Geri Courtwright of Bakersfield with a time of 14.37 seconds.

"It's amazing," said head coach Lance Harter. "Cal Poly Pomona usually finishes in the top four or five in the United States."

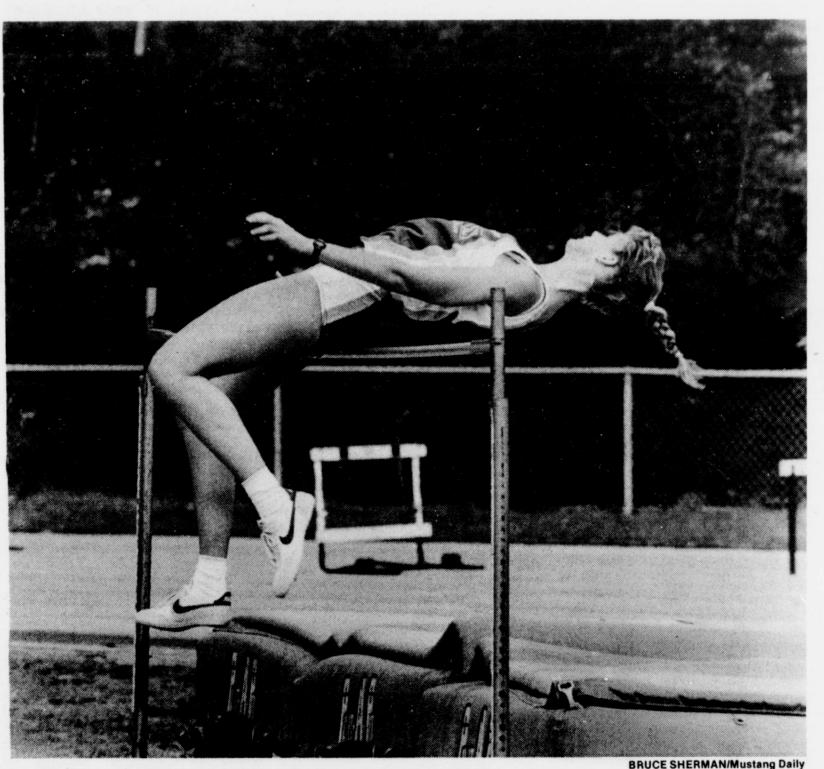

Harter said the younger Lady Mustangs continue to rise to the competition. The team was not even close to full strength Saturday, he said, pointing out that changes were made in the lineup to allow "B" team competitors to step up a notch.

The team has been under a heavy work load this season.

"We have been having hard workouts on Monday and Wednesdays and the girls are sluggish by the time they get to the track on Saturday," Harter said.

By late March he will begin to taper the work loads in preparation for the nationals in May.

Sydney Thatcher said the key

Cal Poly high jumper Anne Campbell clears the bar in Saturday's meet.

"Lance's program has been really consistent," she said. "It's real good. The team is like one big family, we're all real good friends. We always support each other. Today I could hear everyone doing the field events rooting when I was running and we did the same when they were

victories:

Sprints — Erin Erber won the 200 with a time of 25.9 seconds. Teena Colebrook, a Division II record holder in the 800 and 1,500, took third. In the 100 freshman Karen Lawson finished second in 12.50 seconds. Erber took fourth. Freshman Gina

four seconds faster than the second-place finisher. In the 400 Colebrook won in 57.87 seconds and Karrie Rexford took second with a time of 61:58.

Middle Distance — Thatcher placed second in the 1,500 with a time of 4:34.89, a personal best.

Aeron Arlin placed second in the 800, finishing in 2:16.

Long Distance — The Mustangs' Amanda Marks won the 3,000 in 10:13.39. Senior all-American Noreen DeBettencourt placed second in 10:37.40. In the 5,000 all-American Sherri Minkler won in 17:20.12. Marks placed second.

'We have been having hard workouts ... girls are sluggish by the time they get to the track. — Harter

Jumps — Lawson outdid everyone in the long jump with a leap of 18-6. In the high jump Kim Fluegal cleared 5-4 1/2, which was good for second place.

Throws — In the shot put junior all-American Celeste Paquette's toss of 40-11 3/4 was good for second place. Freshman Melissa White took second in the javelin with a throw of 141-2. Laurie Edelbrock, another freshman, took fourth in that competition.

Relays — The Lady Mustangs placed second in the 400 relay with a time of 49.34 seconds. In the mile relay the Cal Poly "A" team finished first with a time of 4:02.2. The "B" team finished third and the "C" team fourth.

SAE attempting to calm the crowd down. Threats of the Untouchables not performing were also used, but only made the crowd more hostile, said Matt Lepow, audience member. "That's when the tables started

BAKER

From page 1

Agriculture said poorly planned growth might jeopardize fertile fields near the core that agriculture students now use for class projects.

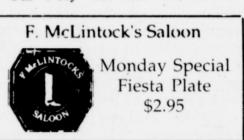

Baker was quick to affirm the educational value of conveniently located, arable lands: "We have consistently stated that these (fields) are laboratories just like an electronics laboratory or a laboratory ... You chemistry can't move good, high-quality land to somewhere else and we don't intend to do that."

Instead, buildings that don't need to be located in the academic core - the warehouse, motor pool and farm shop for example will be moved to outlying areas so the land can be used for teaching facilities, Baker said.

In fact, Baker said, according to the master plan, these building are scheduled to be moved.

Another concern shared by many of the deans is that growth, if not properly planned, could hamper student-faculty interaction, which is a cornerstone of a Cal Poly education.

"Cal Poly has the impression

of being a small university," said Dean Pmilip S. Bailey Jr. of the School of Science and Mathematics, because there is a close relationship between students and faculty.

The overwhelming solution to

the crowd problem suggested by

those in attendance was advance

ticket sales. If they had sold

tickets in advance, reasoned con-

cert-goer Allen Do, who also

waited for two hours to get in to

no avail, they could have told

everyone to go home when it was

Rhythm Akimbo member Lit-

breaking."

sold out.

Baker said size at Cal Poly is influenced as much by perception as with actual student enrollment.

"We have 16,000 students here, and our students think it's a small school," he said. "I think the reasons that they think it's a small school is the way in which we're structured.

"Maybe we won't endanger that view and that close relationship" if enrollment is in-

Though enrollment growth decisions are still down the road, the administration must face funding decisions today. And because of the Gann inititive, which sets limits on state spending, funding has become a maior concern for Cal Poly as well

As a polytechnic university, Cal Poly has a large investment in equipment that is required to teach technical majors. And acquiring the latest equipment can cost millions of dollars. Add the need for additional computers, office supplies and funds for faculty development and the appearance is that of a financial crisis.

tle said tickets weren't sold in advance because of the remote possibility of the party being shut down for noise or alcohol violations. If they were sold in advance, he said, and then it was shut down, the refund process would be too extensive and hard to regulate.

Gress said that the police praised SAE for doing a good job with crowd control outside the

"It's nearly impossible to keep

concert. Police on duty that night were unavilable for comment.

Friday's police log listed the following disturbances: a broken stop sign, an underage drinker, a DUI, a citation for disturbing the peace and "numerous subjects drinking in public" within a one block radius of the Vet's Hall.

plexity of the many decisions now facing the administration, said one underlying principle will remain firmly in place: "Good teaching is what we're here for, and helping students learn. And that's all we should be doing at a university. I am personally committed to that, and I have this administration committed to that."

GRADES

From page 1

percentile, he said, and that scale would be too difficult for most students.

Stanford and some CSU and UC campuses, such as U.C. Berkeley, use the plus/minus system.

The Business, Agriculture and Engineering School Councils have all backed the resolution against the plus/minus system, said Echeverria. And this week, he and Chen will be asking the remaining councils for feedback and support.

"I'd like to have students give feedback to their school councils," he said, "so we can have more (representative) feedback from the councils on the senate floor."

rangements made with computer companies are examples of outside support achieved through the Development Office, Baker said. "The sum total of all (donations) is more than we get from the state (for equipment)," he said.

Baker.

Also, Baker said the lottery has provided some money for purchasing new equipment.

Though new facility construction will be funded by general obligation bonds passed by state voters, which are outside the Gann spending limit, funding for everyday operation is affected, Baker said.

"If (the Gann limit) is not changed, it's going to be a mounting problem," he said, because the CSU system "will be in the very serious situation of trading off improvements of quality against growth."

Baker, addressing the com-

creased 10 or 12 percent, he said.

as many other universities.

Dual careers are increasing child care needs

By Caroline Boullon Staff Writer

Dual career families are causing an increased need for child care, and San Luis Obispo residents need to be more aware of the problem, according to two psychology and human development seniors.

Robin Pledger and Tracy Marayuna are organizing a corporate child care symposium for Cal Poly students and city residents to increase community awareness on the growing problem. The symposium will also fulfill their senior project requirements.

In 1984, about one-half of American working women were American population have a

in need of child care, up from 32 percent in 1970.

Statistics show working women, single and double-parent working households to be on the rise. Companies are responding to the needs of these families because "women in this generation are the first ones to feel that their career is as important as their husband's," said Marayuna.

In her book, "Employer-Supported Child Care: Investing in Human Resources," Sandra Burud states 60 percent of all American families are dual career families, single-parent families have doubled over the past decade and only 11 percent of the

"traditional family," where the father is the breadwinner or sole provider. In addition, women are working for economic reasons. Two-thirds of women are single or married to men who earn less than \$10,000 per year. "Economically, women can't afford to stay home," Maruyana said.

The San Luis Obispo area needs to be made aware of corporate child care, said Pledger.

"Corporate child care is where employees take part in meeting employees' child care needs" by providing a child care facility on or near the site of employment -"to me, it's the way of the future," said Marayuna.

Pledger said, "It's a new career

opportunity for business and human development majors. Who should be concerned with corporate child care? Anyone who's considering having a family should be concerned."

Consortiums - three or four businesses getting together to "have a centrally located child care facility" - are also on the rise, said Maruyana. A new city ordinance in San Francisco says new business parks, hotels or large corporations must provide square footage for child care or put money into a child care fund for employees. So, businesses pool resources to form a consortium. "It's a lot cheaper," reported Marayuna. An example of a consortium near San Francisco is Hacienda Business Park in Pleasanton.

Benefits of CCC to employers are retention of quality employees and increased production "because if you keep your employees happy they'll be more productive," said Pledger. Also, absenteeism is cut back, employee turnover is lower, it's an asset for recruitment and company morale is boosted because "the idea is 'you scratch my back and I'll scratch yours' and commitment and motivation are higher," Pledger said.

Benefits to employees include less stress and worry because they know their child is in safe hands. CCC is safer for children because it helps eliminate the "latch key" syndrome.

The symposium will be held March 5 from 9:30 to 4:30 in U.U. 220.

WOMEN

From page 4

said Rosenthal. Finances are not the most important status for Soviets. Access to travel is their reward, but this is usually reserved for male scientists. Although the work force is payed the same regardless of sex, the male is apt to move up faster, said Rosenthal.

Rosenthal, who has traveled to the U.S.S.R., said a modern Soviet complaint, besides female injustice, was that everyone watched television too much and hardly knew their neighbors. Here, the audience surmised the same about Americans.

Other examples of likeness in the film included Soviets going to single clubs, said Rosenthal.

Another scene from the movie showed a teen-age daughter wearing a set of headphones listening to music while her mother was trying to get her attention. Another resemblance between cultures showed a Russian woman pinching her husband's stomach at a barbecue picnic exposing his extra weight.

WOMEN

From page 5

Throughout the second half, the Lady Mustangs were limited to cross-court passes and perimeter shots. Meanwhile, the Highlanders took advantage of an overplaying defense and continued to get the ball in low.

The next seven minutes were bucket answering bucket, turnover for turnover.

With 2:33 left and Riverside game-high 21 points and giving nover.

the Lady Mustangs a 64-63 lead. With 51 seconds to go, Cal Po-

ly forward Cindy Morris was fouled in the key. Her first free throw went, the second missed.

The Lady Mustangs stayed in their full-court press, but the Highlanders got the ball inside to Held, who missed. However, Arnold grabbed the rebound and banked it in to tie the score at 65.

Setting up the offense with 28 leading 63-60, Smith turned on seconds remaining, Smith threw the heat with a 10-footer, a steal a routine pass into empty space, at halfcourt and an assist to a void left by Jordan's sudden Hasselfield. Hasselfield scored cut for the bucket. Riverside reoff the pass, adding to her tained possession on the tur-

two hits and one RBI. The

With six seconds left, Poly's Morris fouled Held, sending her to the line. Held sank the first free throw. The second bounced off the rim and waiting hands and bodies until the buzzer sounded.

"I think what killed us were turnovers in the middle of the game," said Hasselfield. "We dropped the intensity level a little bit. We allowed them to get back in the game."

Said Smith: "We didn't take advantage of our steals. We just started letting them back."

Hasselfield said playing with only seven players all season has been difficult — that it has been physically draining. The Lady Mustangs had fallen into momentum swings all season.

"It's physically impossible to run at 100 percent for 40 minutes," Hasselfield said.

Editor's note: Riverside's exceptionally fine senior guard, Chris Lambrose, closed her collegiate career with eight points.

MEN

From page 5

half, the Highlanders launched a few three-pointers, all of which bounced away and fell into Mustang hands. The Mustangs didn't exploit the failed threepointers with buckets of their own, but held the lead until halftime.

The Mustangs came out hard in the second half, but so did the Highlanders.

In the first five minutes, Riverside outscored Poly 11-6 to tie the game at 42.

Then it happened. It was in the back of everyone's mind, and then it happened. With Riverside ahead, 51-49, and 9:38 to go, the speakers crackled and the gym fell silent: "The final score of the Bakersfield-Pomona game ... Pomona 71, Bakersfield 70."

Both sets of fans burst into a roaring cheer. This game suddenly took new meaning.

But the Highlanders must have gotten more adrenalin than the Mustangs. The Mustangs

began scratching for whatever points they could get, missing three-point shots and failing to score twice underneath off offensive rebounds.

Riverside went into the 45second stall with 1:58 on the clock and the score 64-58. Chris Jackson drained a three-pointer to extend the Highlanders' lead.

Otta missed a final three-point try, and with 48 seconds left the Highlanders Maurice Pullam broke for a final layup.

"When they called out the Bakersfield scores it got both teams pumped," said Cal Poly freshman forward Coby Naess, who had 10 points. "We wanted to win really bad after the Bakersfield score, but their shots went in and ours didn't."

Said Riverside head coach John Masi: "I'll be honest. I was waiting for that score. Our work ethic lagged in the first half. We were reeling from Thursday's (loss to Bakersfield), maybe feeling a little sorry for ourselves."
