## ASI considers student vote on sports complex

No decision made; complex debate carries over to next week

By Amanda Keller  
Daily Staff Writer

Money may not be the only thing students are sacrificing with the proposed Cal Poly sports complex.

Once again the complex became the main focus at Wednesday night's ASI Board meeting where students, faculty, and board members urged that students be given the chance to be heard.

After all the feelings about the complex were thrown around during the meeting, the Board finally decided no decision would be made about the fate of the complex. The \$7 fee extension — from 15 to 30 years — will not be finalized until a decision is made.

QUICK FACT

• Students at Wednesday's ASI meeting asked that the sports complex be put up for campus-wide vote.

Landscape architecture students filled the room, wallpapering it with drawings of the proposed complex. The drawings conveyed the students' message that the land is a sensitive area with animal habitats to take into consideration.

"Our main concern is regarding the design for the complex," said landscape architecture junior Beth Bowen.

Gina Chavez, also a landscape architecture junior, asked ASI: "Why are you putting a baseball field 40 feet from a natural wildlife habitat?"

Also making their presence known were some Cal Poly athletes who spoke in support of the sports complex proposal.

Cal Poly football player Alli Abrew said: "There's a lot of over-use on those fields (the L-shaped fields). It's like cement out there. It's tough for the athletes and it's a safety issue."

Luther Salinas, a member of

## Pepsi Polytechnic

As the Pepsi takeover of campus beverages continues, more and more students find its monopoly unwelcomed

By Leslie Stevens  
Daily Staff Writer

In the real world a business would take a complaint of "price fixing" to the Federal Trade Commission.

In this case, they can't. Cal Poly's student clubs operating vending machines under the Pepsi-exclusive contract must deal with the same entities that are responsible for negotiating and implementing it -- the university and Foundation.

The dilemma for these student clubs is that they are worried about the lack of competition under the pricing structure.

Almost three weeks after implementation of the new exclusive distributor agreement with Pepsi-Cola Bottling Co., student clubs are still struggling to gather information and understand the rationale behind the related uniform pricing structure. The new pricing structure requires all vendors on campus to sell Pepsi sodas at the set price of 65 cents per can.

Daily photo by Kellie Korhonen

PEPSI, PEPSI AND MORE PEPSI: Campus Store refrigerators are stocked with Cal Poly's "Choice" while students snap up the few Snapples left in the store.

### MEETING OF THE MINDS

A meeting was held Tuesday to address concerns club members had about the vending machines. It was attended by representatives from Foundation, the university, ASI and the Amateur Radio Club.

ASI President Cindy Entzi said a decision was made at the meeting to schedule another, larger meeting in early November to share information and "iron out problems." She said a letter will be sent out next week from Student Life and Activities to all clubs with their own vending machines, notifying them of the upcoming meeting.

The letter will ask clubs to compile information on how their sales compare to previous quarters so they can get a feel for what kind of impact the new arrangement has had.

"We want to see something tangible to take to the university and Foundation, and say this is what is the result of the Pepsi contract," Entzi said.

Efforts are belatedly being made to get needed information

out to the clubs operating vending machines. In an attempt to try to clarify information, Campus Dining is sending out a one-page information sheet describing the two service levels offered to clubs. The notice includes per-case costs to clubs and addresses machine maintenance service and financial arrangements.

Melissa Swanson, services assistant for Campus Dining, stressed that "the price structure of \$7 per case is the same as last year. The net cost is the same as before." She added that the two service levels have not changed from previous years either, but that "clubs are now required to purchase product through Campus Dining."

This is due to the exclusive distributor agreement the campus has with Pepsi-Cola. Any purchases from outside sources would be a violation of this agree-

ment, she said.

Swanson explained that the club vending machines are a carry-over from at least 25 years ago, before Campus Dining handled vending services. The clubs operating machines at the time of the change-over were allowed to keep and maintain them. These clubs currently operate under a year-to-year permit through Campus Dining.

### PRICE-FIXING HITS AMATEUR RADIO CLUB

Club members were disappointed not only with the decreased selection of beverages available on campus, but also with the set price.

Dean Wood, secretary of the Amateur Radio Club, does not feel Cal Poly Foundation has given the clubs a legitimate rea-

## PAC's alcohol license in limbo after hearing

The notice posted on the PAC's window last year while operating under a temporary license. The decision on a permanent license is up to a judge.

Daily file photo

By Brad Davis  
Daily Staff Writer

To sell or not to sell alcohol on Cal Poly's dry campus: There lies the controversy surrounding the Performing Arts Center's (PAC) application for a permanent beer and wine license.

A hearing held on Wednesday by the Alcohol Beverage Control (ABC) department will help to determine whether that license will be granted to the PAC.

ABC Administrative Law Judge Sonny Lo heard statements from Cal Poly Foundation witnesses and from protesters who oppose the license application.

The judge will make a decision on the hearing in the next 30 days, according to Ron Bressler of ABC.

"(Lo's) decision is an advisory decision which goes to the ABC Director in Sacramento," he said. "The director can adopt or oppose

See PAC page 3

**PEPSI** from page 1

son for the need of the uniform pricing structure. Foundation is the organization responsible for negotiating and administering the exclusive distributor agreement.

Wood said the clubs were told by Foundation that the university wanted to avoid any potential chaos amongst clubs if they were allowed to charge different prices. None of the clubs contacted by Mustang Daily could recall ever having heard of any complaints made against another club because of the different pricing allowed under the old system.

Wood said he didn't think this was the real reason for the pricing decision.

When asked about the uniform pricing structure, Robert Griffin, associate executive director of Foundation, said it was not required under the Pepsi contract.

"People at the university and Foundation agreed in concept that it would be better to have the same pricing, even though some machines are not directly operated by Foundation. We set the pricing so that none of the machines would be competing against each other. If there was one machine charging 50 cents and another charging 65 cents, it would create the impression that one machine was under- or overcharging," he said.

Several clubs have expressed concern that they will not be able to compete successfully under the new program. Many of the club-operated machines are located in out-of-the-way places, where lower price was the main customer draw.

"Students are frustrated and worried about losing their machines. Open House and the machines are how they make all their money. Losing the machines would mean they would not have adequate budgets," said Russell Cummings, club adviser to the American Institute of Aeronautics and Astronautics (AIAA).

Clubs typically operate on \$500 to \$1,000 annually, with

**"The important thing is to come up with a vending program that is both fair and even-handed; something that is fair to ourselves and the clubs."**

— Robert Griffin  
associate executive director of Foundation

\$200 to \$500 of that amount coming from machine profits, he explained.

If the clubs, in fact, experience significant loss of business after a period of time operating under the new agreement, Griffin said Foundation would look into situation. "We have offered to reconsider if they come forward with more than speculation."

The agreement was signed over the past summer without student or club knowledge or participation. Many clubs reported having their machines changed before they even received notification of the new agreement.

**AIAA AND THE PEPSI DEAL**

The experience of the AIAA club was fairly typical of how the machine changeover took place. Cummings said students were not notified before the vending machines were changed.

"It seemed like it was a midnight, clandestine operation," he said.

When the machine was removed, it still contained sodas and money, although the club was able to get its money back.

Also upsetting to club members was the sign attached to their new machine: "Temporarily operated by the AIAA."

"Does this mean they will later lose the machine?" Cummings asked.

The Amateur Radio Club, owner of one of the vending machines, has been vigorously collecting information on the new Pepsi arrangement and posting it on their web page at [www.w6bh.z.calpoly.edu/drinks](http://www.w6bh.z.calpoly.edu/drinks). When questioned about the club's keen interest, Dean Wood, club secretary, said: "The main thing was that we could no longer charge what we wanted for our products. One of the reasons we had a good business is because it was a 50-cent machine."

Other clubs share the same concern about the new agreement.

"We cannot offer our product at a lower price anymore as a service to students," said Mark Zohn, Agricultural Engineering

Society club advisor.

He explained that the club has had a vending machine for about 35 years, and for the last 15 years has offered sodas at 40 cents a can as a service to students. He also had an idea where to place the blame.

"The bottom line is the average student has to pay more for a can of soda today, and the result is that the athletic department is getting more money," Zohn said.

The university requested that Foundation pursue an exclusive distributor agreement as a means of raising money to replace some of the anticipated funding that was lost when former football star Ozzie Smith and the city of San Luis Obispo withdrew their participation from the sports complex project. Pepsi will give \$1.4 million to the Cal Poly athletics program over the course of the seven-year contract.

**STUDENT FRUSTRATION**

Many students also feel strongly about the new Pepsi arrangement. A sampling of soda consumers on campus produced the following comments.

"Personally I like Coca-Cola better than Pepsi. It's too bad they don't have it available right now," said Nam Nguyen, mechanical engineering junior.

"I think it is a little expensive for students. I heard it used to be 50 cents last year," said An Pham, architecture junior.

They had both just purchased sodas from the vending machine in The Cellar next to the Dexter building.

Shawn Harris, computer science senior, said he doesn't like the new system.

"The machine in the computer science building and this one do not take your money most of the time. It used to be 50 cents in the Coke machine. Students prided themselves on this 50-cent machine, and now it is gone. A lot of computer science students are upset," he said.

Harris' opinion at the time might have been influenced by the fact that the machine he was using kept spitting back his money without giving him any-

Daily photo by Xavier Lanier

thing to drink.

Heidi Eisenga, architecture junior, had a different problem.

"The machines work, but there is never anything in any of them. I think they do not get filled as often," she said.

The machine she attempted to use in the architecture and environmental design building only had two selections available, Pepsi Wild Cherry and Lipton Iced Tea. Eisenga walked away empty-handed.

Elizabeth Kaminaka, a dean's assistant in the College of Architecture and Environmental Design, said she also thinks the new price is too expensive.

"I could get it for 60 cents and 40 cents before, and now it is 65 cents. Why should I do that when I can bring it from home?"

There is something else Kaminaka doesn't like about the new agreement.

"It is inappropriate to have Pepsi as the sole supplier. It is like calling us 'Pepsi Polytechnic,'" she said.

The issues of quality and choice are important to Nick Brown, physics professor. His family and relatives frequently have brunch at Vista Grande Cafe on Sundays. "I tried the

Daily photo by Kellie Korhonen

(Top) A student gulps down his 65-cent soda. (Above) **ABANDONED ON DEXTER:** Sodas from Backstage Pizza all carry the Pepsi name.

pink lemonade, and it tasted like it had no lemons in it. I also tasted the cranberry juice, and it tasted thin," he said. "As far as we are concerned, we are going to get very thin juice and less choice."

Although students and staff preferred the greater choice of beverages available on campus before the Pepsi exclusive deal went into effect, the pricing structure seems to cause the most frustration. Foundation and clubs apparently do have something in common, however.

As Griffin put it, "The important thing is to come up with a vending program that is both fair and even-handed; something that is fair to ourselves and the clubs."

The student clubs' goal is to accomplish exactly that.

and reject that decision."

The PAC's license can be denied on legal grounds which include the premise's proximity to residences, its proximity to schools, or the possibility it could create a public nuisance.

It can't, however, be denied on moral grounds like the desire to remain a dry campus, though such issues were discussed at the meeting.

"A lot of (Wednesday's) issues had to do with Cal Poly being a dry campus," Bressler said. "If administration applied for the license, that may be hypocritical. It may be 'do as I say not as I do,' but it's not a reason to deny the license."

Foundation, under the direction of President Warren Baker, submitted the application for the beer and wine license.

President Baker was unavailable for comment. However, he did ask his executive assistant, Daniel Howard-Greene, to speak with Mustang Daily.

"We did receive a formal request from the Performing Arts Center Commission to alter campus policy in order to provide the PAC with limited alcohol service," Howard-Greene said. "We think the ability to serve wine, to have limited sales, is a reasonable response to a community request."

PAC Managing Director Ron Regier said the request for beer and wine sales was made after hearing inquiries from clients who toured the facility before its grand opening.

"We're interested in serving the interests of our client groups and patrons," he said. "Most Performing Arts Centers, including ones on other CSU campuses, serve beer and wine at intermission."

Regier said alcohol certainly wasn't the main issue in what makes Cal Poly's a world-class performing arts center, but he said it's an element.

On campus, the issue remains

central with ASI President Cindy Entzi, who continues to uphold ASI's dry-campus stance.

"We're just worried," she said. "Cal Poly is supposed to be a dry campus and having alcohol on campus means we are not dry."

In the city of San Luis Obispo, Entzi's feelings echo, according to Mayor Allen Settle.

"City Council unanimously voted against the sale of beer and wine at the Performing Arts Center," he said. "The Mayor's Youth Task Force, which I head, is opposed. And as a representative of the Performing Arts Committee, I voted against it."

Mayor Settle added that both last year's ASI president, Steve McShane, and Entzi approached City Council, asking for them to support Cal Poly's dry-campus policy.

"It's something we don't want to interfere with," Settle said in regard to upholding that policy. "Basically I think students should have a say in the matter."

Though the alcohol sales request can't be decided based on moral issues, it could still be doomed based on Judge Lo's advisory interpretation of the law which he will pass on to the ABC Director who will make the final decision.

When an application to sell alcohol is filed, nearby residences, churches and schools are required by law to be notified.

Foundation applied for the license on Aug. 8, 1996. Though the dorms are within 100 feet of the PAC, and residents should have been notified when the application was posted, Bressler said no one was in the dorms at the time to contact.

But according to Carole Schaffer, assistant director of residential life and education, students live on campus every summer, even on Aug. 8.

"We did have a summer housing program during the summer of '96 and we do have one every summer," she said.

**"A lot of (Wednesday's) issues had to do with Cal Poly being a dry campus. If administration applied for the license, that may be hypocritical. It may be 'do as I say not as I do,' but it's not a reason to deny the license."**

--Ron Bressler  
Alcohol Beverage Control

Housing and Assignment Supervisor Betty Smith was able to provide information regarding the approximate number of students living on campus at the time the application was posted.

"In the summer of '96 we had 153 students registered for summer quarter living on campus," Smith said.

She added that student academic services runs another program which houses additional students over the summer.

"Those students arrive at the end of July and the beginning of August," she said. "We had 80 residents on campus through that program."

Approximately 230 students lived in Sierra Madre during the summer of 1996.

None of these students living on campus were notified of the PAC's license application.

The PAC is also located near Pacheco Elementary School and an on-campus child care center.

Bressler said he contacted both Pacheco Principal Jim Miller and the director of the child care center and neither was opposed to the applicant's request to sell beer and wine.

The fate of the PAC's alcohol license lies in the hands of the judge who will decide within the next 30 days.

**ASI** from page 1

Cal Poly's baseball team, said: "Our facilities are not what we need to get all we can out of practice fields."

Most agreed that new facilities are necessary; but many students had problems accepting the present layout of plans due to ecological consequences. Some suggested drafting new plans to accommodate both the fragile wildlife and the need for new fields.

"There are lots of incredibly talented students on campus,"

Bowen said. "They need to be used as a resource and I don't think they have been this far."

Board member Ishmael Hall said "Cal Poly, being a learn-by-doing school, has an opportunity to do their own design."

However, that option may not be as easy as students suggest.

"It's a time-frame problem for students. We need someone to be there from beginning to end. We'd be happy to have students participate but it's the longevity that's the problem," Bob Kitamura, director of facilities planning, said.

While the discussion erupted, the one message repeated time and again was the students' desire to vote on the issues; both the \$7 fee extension and the sports complex as a whole.

"I really encourage you to let us vote. If this school's about hands on, why don't we use that principle," landscape architecture junior Amy Silfies asked.

Once the student audience began pleading for a vote, many board members also spoke about the issue.

**"I really encourage you to let us vote. If this school's about hands on, why don't we use that principle?"**

--Amy Silfies  
landscape architecture junior

"I urge the board to make this an issue for students to vote on," said Board member Matthew Lardy. "It is an issue that has a lot of sides and it is an issue that will span for 30 years. That's generations."

Board member Jennifer Sargent said: "We (ASI) encourage student involvement. I think it would be contradictory of us not to give the students a vote."

Putting the issues up for a vote would stretch the sports complex process out even further, which concerns some.

"If we put it to a vote, that would probably delay (the construction). We can't start then until November," Greg King, ASI vice president of operations, said.

"Any delays will negatively impact those students (athletes, recreational sports participants) mentioned," Mark

Harriman, interim director of Rec Sports, said.

A November start date is not recommended, according to Jeff Markowitz of Project Managing Associates (PMA). PMA is a firm hired by the university to do geotechnical evaluations on the proposed complex site.

It would be best to start the project in spring, to avoid the rainy season. This would result in the complex not breaking ground until the spring of 1999.

"I think we can go one extra year without it to make sure it's something that we want," ASI's Sargent said.

With the room in an uproar, ASI President Cindy Entzi said: "I think we need to have a forum on

## RESPONSES TO "FOOT BATHS AREN'T POLITICAL AGENDAS" BY MARK ARMSTRONG

### Keepers not about power

Editor,

Although this may not answer all of Ms. Hamilton's complaints about Promise Keepers (PK), at least she can't claim that I am "way off the mark about the goal." I will openly admit that I do not know much about NOW, and only vaguely what they stand for. But, at the same time, I think that many members of NOW are using selective hearing to what PK has been saying. I could say more in reference to Ms. Hamilton's letter, but I don't want my words sparking an argument or in any way accidentally offending Ms. Hamilton. So, for a true sense of what PK stands for, I offer up the opening address of this weekend's assembly by Randy Phillips, president of PK, as recorded in the Washington Post, Sunday Oct. 5.

We have not come to demonstrate our power to influence men. We have come to display our spiritual poverty that Almighty God might influence us.

Though we now stand in the political center of arguably the most influential nation on Earth, it is not political preferences we are concerned with, but biblical convictions. When it comes to politics and faith, we confess that we have had too high a view of the ability of man and too low a trust in the sovereignty of God. We choose this day to bow our lives in submission before the one true God existing in three persons, the Father, the Son and the Holy Spirit. Amen.

Here are the answers found in the Bible: We believe that

the ultimate answer to the moral crisis of society is not in partisan agendas but living truth. We have nothing to offer any special-interest group but the same mercy and grace that is available to (Ball in the Bible, God's written revelation of faith and practice).

I have a request for those of you who love Jesus Christ but may have come here to voice your opinions on specific political issues. We have dedicated this as a sacred assembly. Would you suspend today your appeals before men and would you unite with us in appealing in prayer before a righteous and just God? Is He not able to move in our land above and beyond what we could ask or think? Amen.

Amen. Amen. Join us. Amen. We have not come to exalt our gender as males. We have come to exalt the man Jesus Christ who is Savior, who is Lord, and who is God. Amen.

No woman, no woman should feel threatened by this gathering because the ground is level at the foot of the cross. In the kingdom, there is neither male nor female. Every woman should have hope. By the dwelling of the Holy Spirit, a man is empowered not to use his strength to elevate himself but to be conformed to live like Jesus, who, it says, came not to be served but to serve and to give His life.

**Andrew Scott is an electrical engineering junior.**

### Wrong, wrong, wrong!

Editor,

While the idea of Mark Armstrong's opinion article for the Promise Keepers (PK) was a good one, most of his observations are completely wrong.

First, just because the PK do not seem like a political faction (and they are) does not mean that they are not doing harm. What they are doing is wrong. They are not promoting the role of the man in the family as merely an active participant, but as the main and I mean main ingredient. They urge the man of the family not to ask, but to take the role as head of the household.

The whole idea of the PK was conceived by Bill Mc Carteny who decided that he wanted men to 'reclaim' authority from their wives—to whom they have supposedly ceded to much.

Their manifesto, "Seven Promises of a Promise Keeper" a book published for the group by the organization, Focus on the Family, specifically says, "I can hear you saying, 'I want to be a spiritually pure man. Where do I start?' The first thing you do is sit down with your wife and say something like this: Honey, I've made a terrible mistake. I've given you my role. I've given up leading the family and forced you to take my

place. Don't misunderstand what I am saying here. I'm not suggesting that you ask for your role back, I'm urging you to take it back."

GIVEN you my role? MUST reclaim that role? Don't ask, TAKE? Um, excuse me for not being able to see the equality in this relationship.

NOW is not as Mark says, "alienating a large number of people who normally support its goals of bringing equality to women" but are trying to stop the Promise Keepers movement from destroying all of the progress that women have made. The last thing that most women want or even need is a stadium full of men telling their wives that their opinion means nothing because women are not the head of the family and that women are only here to support their men.

Mark's second mistake was not a direct one. He claims that the women were not involved in the rallies of the PK, but this is not true. Many women were there but not the same way that the men were. The women were there as the vendors, the janitors and the overall subordinates of the men. Just the same way in which the people of the PK movement want the house to be run.

Mark overlooked

NOW's organization of a similar rally. Many people choose to call it a protest. Call it what you will. Now rallied around women. NOW is not saying that the idea of men coming back to their families is not a great idea, but are saying that it is time to share.

As for the political question: All I have to say is that anyone who does not consider a group whose leaders oppose abortion and gay and lesbian rights, try to block those rights and then solve their opinions into their followers a political group has got to rethink their definition of a political group.

It is my firm opinion that the Promise Keepers are a farce, and I haven't even gotten into the backlash that this group is receiving from ministers of the church all around the world. If you want to know more about this "parachurch" that does not even have a doctrine to follow, look them up on the web, or read the local paper. As for me, the only research I have left to do is to actually attend one of the rallies myself.

Of course you know I will be on the outside with NOW and not on the inside serving cocktails.

**Jaime Zuffoletto is a journalism senior.**

### Keepers have hidden agenda

Editor,

Fuck that! That was the first thing that came to mind when I read the "Foot Baths Aren't Political Agendas" article in the Mustang. I know the F-word is not the best way to settle an argument, mind you; but it can be quite elating.

See I am utterly terrified that a vast amount of students might actually subscribe to Mark Armstrong's opinion. In fact, I want to break down and cry every time I think about what the "Promise Keepers" advocate. I receive a cold chill when Wellington Boone, a Promise Keeper and African-American, states "I believe that slavery, and the understanding of it when you see it God's way, was redemptive." Mark Armstrong claims that the Promise Keepers "may not be able to dump their macho personas in front of women." It frightens me when I hear my friends discuss their "relationship" with God, and they use words like guilt, convert, and repent. I have always believed that guilt is for the weak. Those who cannot learn from their mistakes, create this entity - guilt to constantly remind themselves. Anyway, I could use this whole article to discuss religion, but that is not my mission.

I really want to believe that the Promise Keepers are just your typical Christian males celebrating Christian life. Unfortunately, I strongly feel there is a hidden agenda. I feel the Promise Keepers would be extremely happy with women back in the kitchen, gays back in the closet, and a "colored" knave at their side. Maybe that is a huge assumption. I am quite positive that not all Promise Keepers feel this way. With any group, there are always some followers who are just along for the ride.

That alone, is my issue. Mark Armstrong delivers some valid reasons to not oppose the Promise Keepers. Unfortunately with logic, both validity and truth are key elements. His argument does not provide a lot of truth.

If Mr. Armstrong is the least bit confused as to why NOW opposes the Promise Keepers, hopefully this will clear things up. I cannot speak for NOW, but I will speak for myself. The raping, beating, and enslaving of African-American men and women are not redemptive. Homosexuality is not "wrong conduct." A relationship between a man and woman does not involve leadership. Inadvertently, as I grow older I become even less sympathetic to human stupidity. See Mark it is all about equality. America is a melting pot. Not all of us believe in God, and fortunately for you, some of us are not educated.

## Studies challenge cost, control of smoking

By Daniel Q. Haney  
Associated Press

BOSTON — Would health costs go down if everyone stopped smoking? Does cracking down on underage cigarette sales make teen-agers smoke less?

If the answer to both questions seems like an obvious "yes," think again.

Two new studies support the contrary view.

One looked at the economic impact if every smoker went cold turkey tomorrow. The conclusion: Health care costs would drop for a while but would then inexorably rise for the simple reason that nonsmokers live longer.

The other study found that even with strict — and seemingly effective — enforcement of laws against selling cigarettes to anyone under 18, teen-agers can still get them easily, and they smoke just as much, if not more.

Both works challenge simple assumptions about the causes and consequences of smoking. They were published in Thursday's issue of the New England Journal of medicine.

An estimated 3,000 children

take up cigarettes each day in the United States. Making cigarettes harder to buy is the cornerstone of a new effort by the Food and Drug Administration to keep them out of the hands of teen-agers.

The FDA rules, which went into effect last February, require stores to get photo identification from anyone who looks younger than 27. A federal goal is to have at least 80 percent of stores obey the laws.

Nevertheless, such rules — which already existed in many communities — have received little testing to make sure they work. So a team led by Dr. Nancy A. Rigotti of Massachusetts General Hospital set out to compare high school students' access to cigarettes in six Massachusetts towns — three where state or local tobacco sales laws were beginning to get strict enforcement, and three where the laws were not enforced, even though underage sales were still illegal.

"It looks like keeping teen-agers from buying cigarettes will be more difficult than was first expected," Rigotti said. "Even

when 80 percent of merchants obeyed the law, young people said they had little trouble buying."

The study was conducted from 1994 to 1996. In the enforcement towns, stores were barred from selling to youngsters under 18. But they did not have to ask for an ID from everyone who looked young.

The researchers tested compliance by sending 16-year-old girls into stores to buy cigarettes.

this to get more student input."

No dates have been set for the forum yet, but with the voices heard and the facts on the table, ASI Board Chair Tom Spengler assured both the students and the board that no student money will be spent on this project until the board has voted to approve such spending.

"If students continue to have questions, then the voting will be set back," he said.

Both students and board members will tackle this debate for a third consecutive week at the ASI meeting next Wednesday night.

score 34-20, and was destroyed 74-7 in 1969.

This season their offense is led by senior running back David Mattiazo, who has 530 yards rushing in four games.

"Mattiazo had just 30 yards in the season opener, but has exploded in the last three games," Beaton said.

The Clan has a "sputtering" passing game, Beaton said, led by sophomore quarterback Terry Klinsmith, who has 52 of 122 for 578 yards and six interceptions. The game is expected to be a showdown between two great running backs.

"I am impressed by the Mustangs' running backs, but I look for us to counter with a great running game of our own," Beaton said.

The Clan is confident, but they are facing a Mustang team that is still riding high after last week's

huge overtime win over Division I-A New Mexico State, 38-35.

"People think that we are going to let down after such a big win, but we are playing this game for a purpose," said Delon Craft, sophomore offensive lineman.

The Mustangs are dedicating this weekend's game to Jeremy Jack. Jack was a Mustang defensive back who was killed in a car accident last year on Oct. 6.

"We all miss him so much that it's hard to keep going at times," Craft said. "It's only right that we get a victory this week in order to honor his memory."

The Mustangs have one big advantage over Simon Fraser; the Clan will probably have jet lag coming from British Columbia. According to Beaton, the team hasn't flown on a plane to compete since 1981.

**"We are coming to play some in-your-face, smash-mouth football."**

--Chris Beaton, The Clan's coach

CSF, while the tandem combined for 25 kills and 12 blocks against the Anteaters.

Hathaway and junior Asha Wagner should also take a lot of swings against a very tall Tiger block, who is averaging just under three blocks per game.

"The two keys to the game will be our serving aggressively and our ability to neutralize their offense," Cal Poly head coach Steve Schlick said.

Pacific is also coming off a 3-0 defeat by second-ranked Long Beach, a team which they beat last year to capture the Big West Conference crown.

**WOMEN** *from page 8*

region, and 9-3 overall.

"Hopefully we will play well on Friday and carry that to the game on Sunday," said head coach Alex Crozier. "Pepperdine also has a game on Friday so that should keep the energy level the same."

Though the game against

The Tigers lost second-team All-American Sacha Caldemeyer to graduation and All-Big West selection Elsa Stegemann this year to injury.

Outside hitter Randy Jensen, who hit .529 with 11 kills against Cal Poly in 1996, is also questionable for the match.

UOP, however, still has a very strong starting line-up with no players under 5-foot-11. Tanja Dimitrijevic, a native of Belgrade, Yugoslavia, has slid into Caldemeyer's starting setting position. Dimitrijevic is ranked second in the Big West in assists, just above Cal Poly's Louella Lipana, and is fourth in aces per game.

The Mustang defense will be under constant attack from middle

Pepperdine is not a conference match, because of the make-up of the team, it should be interesting to watch. Pepperdine has two excellent forwards, which makes the team dangerous.

"Pepperdine has been up and down," said Crozier. "If they are on they should be tough to play."

The Mustangs will play without

blockers Addie Hauschild and Tracy Chambers. Outside hitter Liina Veidemann, a former member of the Swedish national team, also will be back with her .521 career hitting percentage versus Cal Poly.

"They pass very well, they're very big in the front row and they're always productive offensively," Schlick said.

Pacific has an overall record of 10-3, 3-1 in the Big West. Their three losses have come at the hands of ranked opponents including Long Beach State, fifth-ranked Nebraska and 12th-ranked Pepperdine.

"We have a good chance against them," Hathaway said. "They're a good team, but we want to be the team to beat them."

team member Michelle George this weekend because she has a broken clavicle. George is expected to be able to play again in a week or two.

Crozier said Cal Poly is still in a good position to get to the playoffs and to win the conference. The Mustangs must be in the top four teams to get into the conference tournament.

### SPORTS TRIVIA

*Thursday's Answer:*  
The Cal Poly football team was ranked ninth in total offense in 1996.  
No one submitted the correct answer!

**Today's Question:**  
Who won the Super Bowl in 1996?

submit your answer to:  
kkaney@polymail.calpoly.edu

The first correct answer I receive will be printed along with your name in the paper the next day.

### SCHEDULE

#### TODAY'S GAMES

- Women's Soccer vs. University of Pacific @ Stockton, 7 p.m.
- Men's Soccer vs. U.C. Irvine @ Mustang Stadium, 7 p.m.
- Volleyball vs. University of Pacific @ Mott Gym, 7 p.m.

#### TOMORROW'S GAMES

- Football vs. Simon Fraser @ Mustang Stadium, 6 p.m.

#### SUNDAY'S GAMES

- Women's Soccer vs. Pepperdine @ Mustang Stadium, 3 p.m.

## Men's soccer faces must-win situation in MPSF match vs. U.C. Irvine Friday at home

By Kellie Korhonen  
Daily Staff Writer

Coming off a disappointing loss to Northridge, the Cal Poly men's soccer team is fired-up and ready to win at home Friday against U.C. Irvine.

"We are trying to win one," Head Coach Wolfgang Gartner said.

The loss at Northridge Sunday came in overtime when the Mustangs' goalkeeper Greg Connell saved a high shot on goal, hitting it out of bounds. The ball deflected off of the football goal posts and came back onto the field, hit Connell and went into the goal.

"I really didn't know what happened," Connell said.

But Friday is a new game for the Mustangs on home turf, and a new chance to improve their 3-8 record.

"We need to start winning, bottom line. Even though the games we've lost were close, we're still losing," Connell said. "We are running out of things to prove, running out of games. We know we are a good team, we just have to prove it when it comes game time."

The team has been proving

## Mustangs bump up effort to beat UOP

Daily Photo by Xavier Lanier

Freshman Melanie Hathaway returns the ball for the Mustangs as senior Trisha Jenssen looks on. The Cal Poly volleyball team faces ninth-ranked University of Pacific tonight in a Big West Conference match at Mott Gym.

By Peggy Curtin  
Daily Staff Writer

The last time the Cal Poly women's volleyball team beat University of Pacific, Ronald Reagan was in his second term in the White House, "Out of Africa" was on the big screen and Mustang Melanie Hathaway was just six years old.

That was 1985, and this is 1997.

Tomorrow, the 11th-ranked UOP Tigers will put their 15-match winning streak against Cal Poly on the line at Mott Gym in a Big West Conference match-up.

The Mustangs, who are 10-6 overall, 2-3 in the Big West, are coming off a loss to another Big West opponent, Cal State Fullerton (CSF), after sweeping UC Irvine last Friday.

"The rotation we had wasn't working," said Hathaway about the 3-1 loss to CSF. "We also weren't passing very well."

Offensively, the Mustangs have been led by middle blockers Kari De Soto and Trisha Jenssen. Both had 21 kills apiece against

See V-BALL page 7

## Football dedicates hall of fame game Saturday to Jack

By Jeffrey Varner  
Daily Staff Writer

With a victory this Saturday, the Cal Poly football team will have the best opening record in school history at 6-0, but that's something that the team is not really concerned with.

"Our goal is to stay focused on what we've been doing and continue to do what it takes to win

ball games," said wide-receiver coach Robby Smith.

But can the Mustangs go undefeated? That seems to be the question on a lot of people's minds. The team has a lot of people looking toward Nov. 22 as the day it could end the regular season with a flawless record.

But first the Mustangs must beat NAIA British Colombian team Simon Fraser in this

Saturday's Hall of Fame game. Simon Fraser, commonly known as "The Clan" (1-3) has not played as poorly as their record may indicate, said head coach Chris Beaton.

"We should be undefeated, our losses have come because of dropped passes and a couple of mistakes that never should have been made," Beaton said.

Beaton feels that his team can

beat Cal Poly if they play solid football. "They have a very athletic team, but so do we," Beaton said. "We are coming to play some in-your-face, smash-mouth football."

A win for Beaton's team will be highly unlikely if history repeats itself. The Clan was blown out by the Mustangs in 1982, by the score 34-0, lost in 1977 by the

See FOOTBALL page 7

## Mustang seniors look to playoffs

By Kelly Victoria Youker  
Daily Staff Writer

This is the last year for eight seniors on the Cal Poly women's soccer team to qualify for the NCAA playoffs. After two years of being overlooked, the Mustangs don't want to let this chance disappear.

Of the eight graduating seniors on Cal Poly's women's soccer team, seven have only known the team at the Division I level.

Tonight the women's soccer team will match up with University of Pacific in Stockton and come home to face Pepperdine on Sunday.

The Mustangs are 9-4 overall, ranked second place in the Big West, and eighth in the western region.

"This year we have a strong, deep team," said assistant coach Dan Tobias. "There hasn't been one or two players that have been more valuable than the others out there this year. We defend better as a group, and it makes it easier to attack."

One step ahead of Cal Poly, Pacific is first place in the Big West, seventh in the western

See WOMEN page 7

Daily Photo by Clay Stalter

Sophomore Andrea Sievers clears the ball away from the Mustangs' goal and downfield. The Mustangs take on Pacific and Pepperdine this weekend.
