Financial VP ready to retire

By **Evann Gastaldo**
MUSTANG DAILY STAFF WRITER

Frank Lebens was a chemical engineering major from Nebraska, but as soon as he came to Cal Poly in 1971 to get his master's degree, he was hooked.

But after over 26 years of working for Cal Poly, Lebens plans to retire around the end of fall quarter.

"It was a desire to stay in the area that first attracted me to take a position at Cal Poly," said Lebens, vice president for administration and finance. "To do that I had to change careers, and I was willing to do that since my family was extremely enchanted with the area."

Lebens went from working as a chemical engineer in Washington to working as assistant to the director of Personnel Relations when he accepted a job at Cal Poly in 1972. Lebens worked his way up from his position as university budget officer to associate vice president for Academic Resources. He has held his current job for the last decade.

"I can't think of any place I would rather have spent the vast majority of my career," he said. "It's an institution in which we can all take pride."

Lebens grew up in Nebraska and received a bachelor's degree in chemical engineering from Iowa State University. A Vietnam veteran, he then served in the U.S. Navy as an engineer officer for five-and-a-half years. It was while in the Navy that he experienced California living for the first time.

"California was always a draw after my initial exposure," he said.

After moving to Washington in 1970, he worked as a chemical engineer in the paper-making industry. He came to Cal Poly in 1971 to get his master's degree in business administration. He has been here ever since, with the exception of three years spent in Texas as vice president and treasurer of the Federal Intermediate Bank of Texas.

Since Lebens became a vice president 10 years ago, Cal Poly has gone through many changes, said Dan Howard-Greene, executive assistant to Cal Poly President Warren Baker.

"Frank has been responsible for managing significant change, includ-

ing the implementation of a number of projects and initiatives that have brought functions to the campus that were previously managed more centrally in Long Beach," Howard-Greene said.

Some of these changes that Lebens worked on include the budget, housing and parking programs, he said.

"Frank's leadership has been important in making sure that we

have been able to accept those expanded (responsibilities)," he said. "Many of the initiatives that Frank has led here on the Cal Poly campus ... are often cited as models for other campuses in the CSU system."

Baker said he appreciated the role Lebens has played in representing Cal Poly at the system level, especially in areas of technology initiatives and the budget.

Lebens' division has also been heavily involved in development of the new Master Plan, Howard-

"We're going to have a difficult time replacing him. He's done an excellent job."

Alternative transportation

AMY LOBSINGER/MUSTANG DAILY

Matt Carney, mechanical engineering junior, rides an electric scooter at the Electric Vehicle Expo and Rally near Dexter Lawn Saturday. The event was originally held in February, but was cut short and postponed due to rainy weather. The event included electric and hybrid vehicles and bicycles.

Students 'SNAP' to it when it comes to noise

Editor's note:
This feature article on SNAP was written as a result of the reporter's ride-along with SNAP officers Saturday night.

By **Aaron Lambert**
MUSTANG DAILY STAFF WRITER

Getting insulted, spit on and having everyone think that they are a pawn in a citywide conspiracy against the college community wouldn't appeal to most students.

But it's the belief that SNAP (Student Neighborhood Assistance Program) is helping the community that keeps them going.

The SNAP program is run through the San Luis Obispo Police Department as a warning system for out-of-control parties. SNAP officers are students who apply for the job and go through training. Currently, the program is understaffed with only four officers, instead of the usual eight.

"When we're driving around, I feel like I'm helping in a way by keeping things off the street," said Chris Tougeron, biological sciences junior and two-year employee of SNAP. "I want them to be aware that they are bothering people. ... I also want them to be aware not to be drinking and then driving home right afterwards."

On an average night, Tougeron and Jessyca Cochran, civil engineering sophomore and SNAP student coordinator, visit as many as 15 parties issuing Disturbance Advisement

Cards (DAC) in hopes that the patrons of the house will quiet down, avoiding a \$270 citation from the police department.

They spend a majority of their time driving their police-issued white Mercury Sable and conversing with each other about their lives and what happened in class the week before.

When the call of a neighbor's complaint comes over the radio, they drive to the scene and search for violations of the 24-hour city noise ordinance. To determine whether or not there is a noise violation, they pull up to the front of the house, kill the engine and listen.

"The violation is kind of a judgment call," Cochran said as she walked away from a house after giving a warning.

A warning is a verbal advisement to the residents that a neighbor had called and complained about noise but they were not in violation. A DAC is issued when the party noise can be heard from 50 feet from the point of origin.

"We use this pure police strategy of warning, so hopefully the parties will police themselves," said Rob Bryn, the Neighborhood Services Manager in the Operations Division of the San Luis Obispo Police Department.

Saturday night started early as the first disturbance call came in at 9:20 p.m. As SNAP officers came up to the house, someone was immediately

continued from page 1

Greene said. The Master Plan is a document outlining future plans for the campus. Under this plan, many new facilities have been erected under Lebens' administration, including the Performing Arts Center, the Rec Center and the Advanced Technology Lab, Lebens said. More facilities are still in the planning stages, he added.

"It's been a very dynamic time from a facilities perspective," Lebens said. "It's been a busy 10 years. We've had some major challenges."

The accomplishment Lebens is most proud of, though, is not an initiative or a building.

"What makes me look good is how well my talented staff performs," he said. "I've been fortunate in building a very effective and talented organization that works very well together."

Lebens said he feels the cohesiveness of his staff, the 350 people who make up all the departments in the Administration and Finance Division, is a benefit to him and to the university.

"They're a real inspiration to me," he said. "They push me to be better. I've derived a lot of joy from watching them develop and perform."

The feeling is mutual, said Vicki

Stover, associate vice president for administration.

"He's been a great person to work for and with," she said. "He lets us work hard and we enjoy it because we're working for him, and it's been a great pleasure."

Lebens has no doubt his staff will get along fine without him, he said.

"What I would hope for is that they get a leader who appreciates what they are capable of doing," he said. "They deserve a good leader."

Though he will be missed, Lebens and his co-workers know he will enjoy retirement.

"We know he has some fun times ahead," Stover said.

Lebens, who has two married sons

and four grandchildren, said he looks forward to having more time to be a grandpa. Both his sons' families recently moved to the area.

"Family is a big part of my life," he said. "My wife and I very much enjoy our sons and their families."

He also has activities planned with his wife that they both enjoy, such as ballroom dancing.

He hopes to be able to spend some more time doing volunteer work, he said, after he first "take(s) time to smell some roses." He serves on a hospital board and is active in his church.

"And I wouldn't mind picking up a golf club once in a while," he said.

He and his wife may also travel,

but they will continue to live in San Luis Obispo, he said.

A national search for Lebens' replacement will begin soon, Baker said.

"We're going to have a difficult time replacing him," he said. "He's done an excellent job. He's been here a long time and he knows the ins and outs of the system."

Lebens' dedication to his job has not gone unnoticed, said both Stover and Howard-Greene.

"He comes from a perspective of doing the best for the university, so he really strives to do that," Stover said. "He has Cal Poly in his heart, and it shows in what he does."

UNLOCKED DOORS. Windows left

open. Valuables left uncovered. Is your car

an easy mark for thieves? Most burglars

prowl for targets strike when the pickings

are simple.

KEYLESS ENTRY

Use common sense and take precautions to limit your chances of becoming a victim of auto burglary:

- Always lock your car
- Roll up your windows when leaving the car, even in hot weather
- Store CD cases, laptops and other valuables in the trunk; never leave them visible in the car
- Park in well-lighted areas if at all possible

SAN LUIS OBISPO POLICE DEPARTMENT

SNAP

continued from page 1

there to greet them. While SNAP officers waited for two residents of the house to talk to them, a call came back to them saying that the house had been "premiered." Being "premiered" means that the house had already received two DACs within the last 60 days, which results in a citation without warning.

While explaining what had happened and what to do next time to avoid the situation, Cochran and Tougeron received a slew of bribe attempts as well as compliments on their looks from the patrons attempting to get out of the fine.

Once realizing it wasn't going to help, the attitudes changed. The compliments changed to insults and accusations of searching out parties hoping to break them up. Cochran and Tougeron stood there calmly and never remarked back. They simply told the residents to have a nice night and walked back to their car.

"It doesn't bother me," Tougeron said of the yelling and insults. "They think they're making a difference. ... I just wish they would get more creative."

Getting back into the car, they

instantly received another call over the radio.

Across town, SNAP headed to a small house party. As soon as they arrived, profanities were heard coming from a car leaving the property. At the door, the hostess was appreciative to see that it was SNAP, and not the police. She even apologized for the inconvenience.

"At first, they're kind of upset because you're killing their party, but then they're like, 'OK this is better than a ticket,' and they kind of calm down," Cochran said.

SNAP teams do not receive calls for college parties only. Around 11:45 p.m. Saturday, they visited the San Luis Obispo Veterans Hall. The band had been playing too loudly, Cochran told the organizer as she asked him to remove his license from his wallet.

"This is a pretty typical night," Tougeron said of the 15 visits paid to noisy parties. Of these 15 parties visited on Saturday night, SNAP served eight DACs as well as three warnings.

"Most parties are typical," Cochran said. "They're students just like I am - they've got calculus just like I do."

For questions about SNAP or to report a noise violation, call 781-7317.

Your Cheapest, Best & Safest Travel

Did you know that Traveltime/American Express, located in the Union Building on campus exists specifically to serve students, faculty & staff while providing very important financial support to ASI and its student programs? This office specializes in obtaining lowest priced travel & in providing comprehensive travel services. As a long-standing licensed member of the worldwide Student Travel Association (STA), it provides Int'l ID & Hostel cards; direct Eurail & all other student discount international & domestic ticketing services; 24 hour 7 day a week worldwide toll free emergency phone services; a worldwide network of STA & American Express offices to provide assistance wherever you are; free travel counseling & planning for individuals, teams & groups; packages & prices usually the same or lower than available through internet web sites, directly booking with airlines or using an off-campus agency. Plus you get the human touch, personalized professional services, with local people you get to know & who get to know you. And when you utilize Traveltime/American Express you are contributing financially to ASI and its programs! (805) 544-9442 www.tvltm.com

What's it like to write for Mustang Daily?

For some, it's like running a marathon; for others, it's like being chased by a fire-breathing dragon.

This Wednesday will mark the fifth year Mustang Daily will give the inside scoop and go "gonzo."

"Gonzo journalism" is a journalist's opportunity to free his or herself from the confines of traditional reporting and tell the untold stories about getting a story.

Quite often, the measures taken to get the information, find the source or get to the scene make far better stories than what we actually get to write about. This Wednesday, we will tell those stories.

In 1970, Hunter S. Thompson coined the term "gonzo journalism" to describe his style of writing - a style developed through the avid use of hallucinogens.

"Gonzo" stories may distort the truth a bit (or quite a lot), but they allow the reader into the mind of the journalist to see the story from the story-teller's perspective.

Wednesday will be our one chance this year to let our distorted views of reality get into newsprint.

Have a question about campus? Ask Adam. E-mail him at ajarman@calpoly.edu.

'Buckle up for safety' becomes new Memorial Day message

WASHINGTON (AP) — Advocates of tougher seat belt laws give more than a third of the states a below-average grade for their efforts to protect against highway deaths.

The report by the National Safety Council kicks off a nationwide police crackdown on drivers who don't wear seat belts and don't buckle up kids. More than 10,000 U.S. law enforcement agencies will have checkpoints and increased patrols beginning Monday and lasting through Memorial Day.

"Our message is simple - we don't want to write tickets, but if necessary, we will," said Col. Anna Amos of the South Carolina Transport Police.

The study found that people use belts more often and die in traffic accidents less frequently in the District of Columbia and 17 states that allow officers to stop and ticket unbuckled motorists.

Nineteen states got D's and F's in the report. Chuck Hurley, executive director of the Air Bag & Seat Belt Safety Campaign, said politicians in those states refuse to pass laws that are proven to save lives.

The report graded the states based on a government-approved seat belt use survey, the strength of restraint laws, fatality rates and participation of law enforcement in the crackdown.

"The U.S. ranks behind virtually

every other developed country when it comes to seat belt use, with deadly consequences," said Alan McMillan, president of the National Safety Council. "We know that high-visibility enforcement gets people to buckle up and saves lives."

Traffic crashes killed 32,061 Americans in 1999 - or 15 per 100,000 people, much higher than most other developed countries, the report said. For example, Canada has 92 percent seat belt use and a traffic fatality rate of about 9 per 100,000.

California, which at 89 percent has the highest seat belt use in the country, is the only state to earn an A. Twelve other states and the District of Columbia receive a grade of B or above. All of those states except one - Washington - have primary enforcement laws.

Several other states are considering primary seat belt laws. Florida state Rep. Irv Slosberg sponsored a bill this year to strengthen the state's law after his teen-age daughter died in a traffic crash when she was not wearing a seat belt.

"The only proven way to stop these senseless deaths is to strengthen our seat belt law and motivate people to buckle up," he said. "No father should ever have to face the kind of pain I did when Dori was killed."

Sure-fire secrets to fill an opinion page with drivel

There comes a time in every opinion editor's life when he realizes he is out of ideas. This problem is exacerbated when columnists regularly neglect to turn in columns. I make no personal jabs when I say this, but the fact remains that when one pallbearer steps out for a pint, the rest have to shoulder a bit more of the load.

Unfortunately, if this happens too often, those left holding the coffin tend to get tired a bit more quickly. If nothing is done to remedy the situation, all it takes is one bum knee to buckle, and the entire funeral procession is treated to a view of a smartly-suited corpse.

Or, in my case, a whole lotta white space.

In an effort to keep the leftmost side of the opinion page looking as little like the gutter of a bowling lane as possible, I've whipped up dozens of columns on the fly. Over the past year, as regular columnists repeatedly became

Ryan Miller

regular column-forgetters, I've treated readers to wild stories and holiday gift ideas. I even offended a good portion of the nasally-challenged student body with my sarcastic tirade against allergy sufferers. (Yes — it was sarcastic!) (Or was it?)

And now, after it all, I find I have nothing left to say and a vast amount of space in which to say it.

There are, however, certain tricks of the trade I've picked up since September to hide the fact that I'm not always busting with content. So now, with only a dozen issues of Mustang Daily remaining to grace your hands with newsprint, I am ready to reveal my shady, opinion-editing secrets.

First off, if I have a large amount of space to fill, I often simply cut material from Cold War-era Russian dailies and paste it onto my page. Hardly anyone ever notices, or, if they do, they don't say anything. The one exception is a certain computer engineering junior who e-mails me each time I employ this method. It's become something of a game with us. (Keep those eyes sharp, Fyodor!)

When there aren't any copies of "Perestroika Now!" lying around, I usually just leave the space blank with instructions to the reader on how to fill it. Mustang Daily has had coloring contests, drawing contests and limerick contests. The most recent winner, mechanical engineering freshman Andrea Bear, will receive a near-new arc welding set and a \$5 gift certificate to the Madame Bovinary Steakhouse for the following contribution:

*I'll tell you a story, by golly,
of a sad lad, his car and his folly:
He finally found closure
when he died from exposure
by trying to park near to Cal Poly.*

Congratulations, Andrea, enjoy the gift certificate. I recommend the tripe.

When all else fails, I leave the space blank. Sometimes, I just can't think of anything to fill the large gaps on my pages until they've already gone to be printed. For these times, I wake very early the next morning, then run around to each Mustang Daily drop off point and scribble something in the hole. It's very hard to match the exact fonts, but after several months of this, I've become quite adept at imitating 9.5-point Goudy extra bold.

Now that I've got all that off my chest, I feel so much better. And now, this week's contest: Compose a stunning haiku about the perils of campus dining. Winners will be judged on poise, originality and whether anyone actually enters. Use this space:

Ryan Miller is a journalism senior and Mustang Daily opinion editor.

Where have all the good knights gone?

The famous blue dress with the "stain" will always leave an image in our minds about former president Bill Clinton. How about the famous way a cigar was touched and used? Or the scandalous phone calls between Monica Lewinsky and Linda

Commentary

Tripp? American society will never forget the sex scandal in the White House that led to the downfall of Clinton's wholesome image.

According to British and American sources, Britain is considering bestowing an honorary knighthood on Clinton. After the scandals over pardons and gifts during his final days in office, Clinton is hoping to rebuild his reputation. An honorary knighthood could be seen by his supporters as the kind of international recognition he needs and deserves. England is making a mockery of honor, and it cheapens the image of a knight.

The earliest knights were minor knights who held land in exchange for military service rendered to a sovereign or lord. In the Middle Ages, noblemen were the rulers. They were powerful military leaders who could command the people who lived on their lands. The knights would lead their people into battles (not sex scandals) for the king. They had military defense, which included manning castles, mounting patrols and accompanying the king to war.

Not too long ago England also recognized Elton John as an honorary knight, and his title is now Sir Elton John. The world is recognizing and awarding two of the biggest sins: homosexuality and adultery. I love Sir John's music; he is probably

the sweetest person in the world, but to make a gay knight is not honorable. Noblemen spent their time hunting and tending to the courts. It was the knight's duty to ensure that the peasants and churchmen were defended so that they could live in peace and act as judges to handle disputes.

Can anyone see Elton John hunting and fighting wars with a big gun? We all have the image of King Arthur and the Round Table, with the big strong men sitting down to discuss issues. Imagine Sir John and Bill Clinton on that table. These days, as we all see, it doesn't take much to be a knight — just learn how to act, sing and have a scandalous four-year presidential term.

Actor Sean Connery was actually denied the honor of being a knight. The United Kingdom said Connery hadn't done much politically to be given an honor. Just because he played King Arthur in the movie "Camelot" doesn't mean he

"England is making a mockery of honor, and it cheapens the image of a knight."

should be automatically given the honor of being a noble man.

The image of a knight is one of a hero, and now the British are giving this image to people no one would consider. Clinton is no knight in shining armor; he may have done good toward restoring our economy, but he has carried no merits. He has no honor to be a knight, because there is no honor in lying under oath and committing adultery. Knights come from the belief that they were to act in a noble manner.

Since the Round Table does not exist anymore and with times changing, I understand that it would be difficult to act as the knights in the Middle Ages. But we shouldn't make a mockery out of the honor. Next thing I know we will have Michael Jackson, Prince, Boy George, Hillary Clinton, or even better, Lassie, on that famous Table.

"You're not circumcising my news, that's for sure!"

Independence is a state of mind

There is something exciting about scrawling a signature on that first binding contract. This sounds weird, but everyone knows it's true. There is a feeling of exhilaration that washes over

Commentary

every 18-year-old upon the realization that they are truly self-sufficient and responsible for all decisions. From video stores to lease agreements, a person's signature gains significant importance the day of legal adulthood.

Then one day, that euphoria of self-reliance is shattered. After weeks of searching, my roommates and I found a house to rent. The day we went to sign the contract, we found that we're required to have a parental agreement signed. Suddenly, I could feel my freedom of responsibility slipping through my hands. We weren't looked upon as adults responsible for the roof over our heads, but rather as children, still needing the help of Mommy and Daddy.

Americans have been known to pride themselves upon their strong independence. College students are

certainly no different. The age at which a person becomes legally responsible is a badge signifying independence to the world. Independent to make significant decisions, students forget about the role of parents in the lifestyle they lead.

One of the best examples of the significance of parents' roles in a student's life is through financial support. Every year in March, the FAFSA, a form that is instrumental to funding most college educations, is due. Students filling out a FAFSA understand the impact of parental support through the final estimated contribution expected from parents. This is for students who file as dependent (which can be done if born after Jan. 1, 1978, according to the Cal Poly Financial Aid Web site). There are special circumstances under which a person can file independent, when parental earnings aren't considered, but these are very specific. Otherwise, students are filed as dependent, and financial aid is established through this.

A parent's role in a student's life is also demonstrated through the issue of

housing. As I mentioned earlier, there is a parental agreement that a number of property management companies require to be signed. This is a guarantee that the parents will make sure the rent is paid and will be responsible for any legal action (yikes). Besides the parental agreement, a number of students live in houses purchased by their parents to rent out. This is a huge benefit to any house-hunting students, knowing that they don't have to worry about having a roof over their heads.

Another important role of parents is guidance. That first taste of freedom is sometimes tainted by the absence of parental guidance and support. From the first illness in the dorms when no one was there to bring soup and comforting words, to the first failed test without warning words encouraging improvement, a lot of students miss the wise advice of their parents. Many people are still really close with their parents and will be throughout their entire lives.

The day I turned 18 I thought I was truly free, only to realize I cannot live without the financial and emotional support of my parents. I wouldn't have it any other way. Somewhere in the back of every 18-year-old's mind is the knowledge that they will always look to the support from their parents, no matter how significant. Until that day when turning 21 ... 23 ... 32 ... self-reliance is a state of mind rather than a number recognized by the government.

Dena Horton is a journalism sophomore and Mustang Daily staff writer.

Letter to the editor

Death threats mar free speech Editor,

I would like to commend the Mustang Daily on its recent article ("Events aim to combat intolerance," May 15). It's good to see that there's front-page awareness for the multi-racial, multi-ethnic gay, lesbian, bisexual, transgender community.

I was quoted in the article regarding an incident last year when a fellow student was talking about wanting to "kill fags." He was discussing how he and his friends go out and "beat them up back home," and if he "saw one of those fags right now," he'd "crack his skull with a baseball bat."

In response to Mr. McGurk's letter to the editor ("Eliminate offensive, dissenting opinions," May 17) I'd like to reiterate: That student was talking about killing another human being. The issue here is not about "political correctness" or being offended by an opinion, it's about real people being hurt.

I believe in freedom of speech as essential to our

democratic ideals and vision, but when someone starts talking about killing another person (for any reason!) a line must be drawn. Freedom of speech does not include talking about killing someone - any person - because that person's right to live is the more vital freedom and takes precedence.

In high school, my friend Christopher experienced a member of the football team walking up to him in art class and breaking his finger, saying, "Now try and draw, faggot." The violence is real.

Matthew Shepard and Tina Brandon are examples of people who were recently murdered because of their sexual orientation. In a time of high school shootings, talk of wanting to kill someone needs to be addressed. My point is that hate speech is wrong. Any time. Any place.

We all have the right to live free from threats of being murdered.

Angela Blewitt is an English graduate student.

Cal Poly's Center for Community Volunteerism and Service Learning invites all to attend...

THE PRESIDENT'S SERVICE AWARDS

WEDNESDAY, MAY 23
2:30-4:30PM
AT THE PAC LOBBY

Come hear about how Cal Poly students have made a difference in the community.

You will be amazed!

Director Positions Available
for the
2002 Cal Poly
Open House Committee

We're looking for energetic and motivated people to help organize one of the biggest events here at Cal Poly! If you're interested in a Director position on next year's committee, apply now.

Applications available outside the Open House Office (UU 203C).
Applications due May 25
Office Phone 756-7576

Mustang Daily ... our days are numbered

Apply to be an
EDITOR

Mustang DAILY

Positions available:

Managing Editor

News, Opinion, Sports and Arts Editor

Qualifications

Two quarters' experience with Mustang Daily

Also accepting applicants for Photo Editor and Photographers

*Photo Editor must have experience, transportation
and be competent in Photoshop*

To apply, submit a cover letter and resume' to:

Matt Smart, 2001-2002 editor in chief

Mustang Daily, Building 26, Room 226

All application materials are due by noon, May 30, 2001

Distinguished Lecturer Award Nominations

The Cal Poly chapter of the California Faculty Association (CFA) is seeking nominations for the "Distinguished Lecturer Award." The Cal State system is making fewer and fewer permanent tenure-track hires and replacing these positions with "temporary" lecturers. Though categorized as "temporary," many lecturers have taught at Cal Poly for ten years or more. Lecturers work without job security and often without health benefits and are ineligible for most teaching awards. Nonetheless, some of Cal Poly's best teachers are lecturers. We encourage students and faculty to nominate a lecturer they think is deserving of special recognition. This is your chance to make your voice heard. Three \$500 awards will be presented at CFA's end-of-the-year banquet in June.

Below is a list of lecturers at Cal Poly. Please take a moment to peruse the list to see if there is someone you like to nominate (if you're a student, it may be that your favorite instructor is a lecturer and you didn't know it). Then write the nominee's name on the form below with the reasons for your nomination. Thank you.

TENNIS

continued from page 8

that they're going to be out there working on it, then I'll have to take her word on it," he said.

Cal Poly received the project bids from various contractors on April 13. The project is moving according to a schedule Dunklau outlined last month, as reported in Mustang Daily on April 12. In that article, she said that construction would start about 30 days after the bid date.

The project should start within the next 10 days to two weeks,

McCutcheon said, which puts the project within a few days of the original 30-day estimate.

The on-campus tennis courts were removed between November 1998 and October 2000. Since losing their home courts, the men's and women's tennis teams have been practicing and competing off campus. This season, the women's team practiced and held most of its home matches at Cuesta College. The men's team practiced at Sinsheimer Park and held its matches at various locations including Cuesta, Morro Bay High School and Avila Bay Country Club.

HASKELL

continued from page 8

year, just a down year."

After that, Haskell played summer baseball up in Alaska where he "opened some eyes." This brought him to Cal Poly.

"This year's been kind of an average year," Haskell said. "A kind of a below average year, but I think I've done OK."

Haskell is a left-handed pitcher who switched earlier in the year from pitching Sundays to pitching Fridays during a series.

College baseball usually plays three-game series from Friday to Sunday.

"Now, since I'm a stable Friday guy, I usually mentally prepare the night before," Haskell said. "I see who we're playing, go over some of the batters and the things they do, and what they don't do too well."

Haskell pays attention to who the batters are that he will face and what he needs to do to help get the win.

"The games are really important to him and he works hard," said head baseball coach Ritch Price. "He's a good competitor and he carries himself well on the mound."

Besides mental preparation and

practice time, Haskell puts in a lot of time with his own running, stretching and throwing.

"He's very baseball-oriented," said catcher Keith Anderson. "He likes to talk about baseball and be around baseball. He's got a pro future ahead of him and he knows that."

With the amount of time Haskell puts in on the baseball field, devoting time in the classroom can be difficult.

"If I was to differentiate between baseball and schooling, I'd say I'm definitely on the field more often than I'm in class," Haskell said. "Not saying I miss classes, I go to class all the time, but I'm definitely on the field more times than I'm in class."

As for Madison, she currently lives more than four hours away with her mother and Haskell's parents in Corona.

"They prefer she stay there and live there until I'm able to support her," Haskell said. "I wish I could see her more often. It's cool to hear about her growing, but it'd be even better if I was there."

Although Madison doesn't live with Haskell, she still attends a lot of his games, and Haskell sees her fairly often. Most recently, she attended the series against Long Beach State.

"(Haskell) has a tremendous amount of love and admiration for his daughter," Price said. "He's very proud of her, has accepted responsibility for her, and is maintaining his financial obligations."

Haskell enjoys the changes he sees in Madison, including her growing speech and personality.

"She has a personality that I don't know where the hell it came from," Haskell said. "She's just always happy, seldom does she cry, she's in her two's right now, and people call them the terrible twos, but it's not that bad."

In 10 years, Haskell plans on playing professional baseball and making enough money to support a family.

"Who can complain about playing baseball?" Haskell asked. "Getting paid to play a game every single day?"

Haskell balances baseball and baby

By Dena Horton
MUSTANG DAILY STAFF WRITER

With June's draft rapidly approaching, baseball players throughout the state are getting nervous. Years of dreaming of pro baseball all come down to this month for many players, including Cal Poly's Brian Haskell.

For Haskell, the draft is more than an opportunity to fulfill his baseball dreams, but also an opportunity to support his girlfriend and 2-year-old daughter Madison.

"If the draft goes well and is in my best interest, I can get some money and support Madison and Cassidy to the best of my ability," Haskell said. "So I have a lot to look forward to this June."

The draft isn't anything new to Haskell. During his freshman year at Northeastern Oklahoma Junior College,

Haskell was drafted in the 15th round of the 1998 draft by the Minnesota Twins. He turned them down, however, and according to Haskell, "that's not a bad thing."

"When I was talking to the Twins, I had no idea (about Madison) so it wasn't really a factor," Haskell said. "It really isn't a factor now, but some people think it might be...with the draft and everything. You have a teenage college father, they think that's it, but it's really not."

▼ "He's very baseball-oriented. ... He's got a pro future ahead of him and he knows that."

Keith Anderson
Cal Poly catcher

Before Christmas of 1998, Haskell found out his girlfriend was pregnant.

"When I first found out, I was deathly afraid," Haskell said. "I didn't know how to tell my parents. When they found out, they were cool about it; that was the first time I could sleep through the night."

Continuing with baseball his sophomore year at Oklahoma, Haskell said he "had a down year. Not a bad

AARON LAMBERT/MUSTANG DAILY

Pitcher Brian Haskell has a 4-5 record this season for the Mustangs, with a 4.90 ERA in 82.2 innings. He also leads the pitching staff with 72 strikeouts.

see HASKELL, page 7

Track and field takes third place

MUSTANG DAILY STAFF REPORT

Cal Poly men's and women's track and field teams both took third place this weekend at the Big West Conference Championships.

The Mustangs took eight conference championships at the meet, with four each from the men's and women's side.

For the women, Maggie Vessey won the 400 meters, Lacy Tennenberg took first in the javelin, Jen DeRego won the 10,000 meters and Stephanie Brown took home first in the shotput.

On the men's side, Paulo Carvalho won both the 5,000 meters and 10,000 meters, while Andrew Badger took home the triple jump title and Travis Vandrovec won the pole vault.

The University of Idaho swept both sides of the event, finishing first in the men's and women's team events.

Baseball finishes on high note

MUSTANG DAILY STAFF REPORT

Cal Poly finally found its winning ways this weekend at UC Santa Barbara, and it just might be enough to keep the Gauchos out of the NCAA Tournament.

With a 3-2 win Sunday, Cal Poly took the series from UC Santa Barbara after splitting the first two games.

Starting pitcher Jared Blasdell pitched eight innings and allowed only two runs to record the victory.

UC Santa Barbara finishes the season with a 12-6 mark in the Big West, which does not guarantee them a spot in the NCAA Tournament.

Saturday's game featured an offensive onslaught by UCSB (39-15), as they pounded out a 9-1 victory. Pitchers Tyler Fitch and Josh Morton were hit hard for Cal Poly (30-26).

The Mustangs won Friday's opener 5-3 behind seven innings of one-run ball from Kevin Correia. Correia, who stepped in to pitch when Brian Haskell was scratched from the lineup with an injury during warm-ups, Cal Poly took a 5-1 lead into the eighth inning and held on after the Gauchos scored two late runs.

Tennis courts project on schedule

By Katherine Gernhardt
MUSTANG DAILY STAFF WRITER

The square-shaped plot of land still lies vacant in the shadow of a looming concrete structure. Dirt and rocks have covered the site for more than two years. This barren landscape behind Mott Gym will soon be turned into a home for the Cal Poly men's and women's tennis teams, after the completion of the tennis court reconstruction project.

After playing on what women's coach Hugh Bream called "poor courts," senior Danielle Brandlin referred to as "the Grand Canyon," and then no courts at all, Cal Poly's tennis teams will have a proper home court by fall 2001.

The project is set to begin in about two weeks, according to Project Manager Katherine Dunklau. She said that the project is currently in the contract phase. The contractor, Sansone Company of San Luis Obispo, has the contract and is obligated to sign and return it after obtaining permit and insurance information.

► Construction on the courts is set to begin in two weeks.

► The courts were removed in 1998.

Dan Swingley, vice president of Sansone Company, said his company was notified a week ago that it would be working on the Cal Poly

project. "We're just working through paperwork right now," he said.

Cal Poly and Sansone are aiming to start the project this summer.

"I believe we're scheduled for an early June start," Swingley said.

When Sansone returns the contract, Dunklau said that the project will move ahead.

"I'll go ahead and schedule a pre-construction meeting and we'll start," she said.

Athletic Director John McCutcheon said he continues to have faith in the project's development.

"If Katherine (Dunklau) says

Bucks advance to East finals

MILWAUKEE (AP) - Milwaukee's "Big Three" came up big Sunday and put the Bucks into the Eastern Conference finals for the first time since 1986.

Glenn Robinson scored 29 points and Ray Allen had 28, matching their career playoff highs, and Sam Cassell added 17 as the Bucks beat the Charlotte Hornets 104-95 in Game 7.

Cassell also tied a playoff career high with 13 assists as the Bucks overcame Baron Davis' career-high 29 points.

Robinson and Allen took turns stifling Hornets star Jamal Mashburn, who missed 18-of-25 shots and finished with 21 points.
