# Students warned not to drink and drive

Nick Coury  
MUSTANG DAILY

The days of drivers breaking DUI laws have yet to go by the wayside.

On Sep. 23, the San Luis Obispo Police Department (SLOPD) conducted a DUI checkpoint at the intersection of Santa Rosa and Oak streets. Between 10:15 p.m. and 2:30 a.m., SLOPD screened 834 vehicles, and arrested four students, two of them from Cal Poly, and cited two other drivers under the age of 21 for having alcohol in

their system, according to a press release by SLOPD.

Additional violations included "a driver who was asked by a Cal Poly

*"If you're over 21, your license will be suspended for at least six months and underage DUI's will have a suspended license for at least one year."*

— PETER HUBBARD  
SLOPD Traffic Sgt.

police officer to report to a secondary screening point near campus,

because he did not have his driver's license," said Peter Hubbard, SLOPD Traffic Sgt. "The driver, a local male college student, fled from the checkpoint at a high speed and hit a fire hydrant near 1262 Hathaway St., then drove off."

The vehicle was found in a local apartment complex, and was later impounded. The driver was identified and will be charged with a hit and run, as well as evading a police officer, Hubbard

said.

# California Faculty Association sued

Chris Gunn  
MUSTANG DAILY

The Right to Work Committee, based in Virginia, has sued the California Faculty Association alleging that the CFA has been using non-member agency funds for political action.

"Money coming from non-members is not spent on politics," CFA Communications Director Alice Sunshine said. "We think that this is a frivolous lawsuit, trying to prevent teachers from speaking out about propositions 74, 75 and 76, which are bad for education."

CFA members pay annual dues,

which are used on matters concerning the union as well as collective bargaining agreements. These dictate salaries and contractual stipulations for teachers.

California teachers are not required to join the union, but those who do not join are required to pay agency fees, which help finance collective bargaining agreements that benefit all California teachers.

"They are trying to stop teachers from sending money in order to communicate on political issues," Sunshine said.

Sunshine said that The Right to Work Committee is a corporate-funded entity that claims to support

workers, but is working for its own agenda.

"Some people don't agree with the union speaking on politics, but most people do think that the union should speak on politics," Sunshine said.

Proposition 76 would take away \$4 billion from public schools, and allow the governor to freely cut schools and state universities, according to a CFA press release.

Proposition 75 would prevent publicly funded entities from speaking out against budget cuts, specifically among teachers, nurses, firefighter and police, according to the CFA.

# Collision under investigation

Emily Rancer  
MUSTANG DAILY

An investigation is underway as to what caused a fire truck to run a red light and crash into a car carrying two Cal Poly students on Friday.

The collision injured the car's driver, biology junior Athena Norton, fracturing her rib.

Passenger Mia White, a nutrition senior and president of the Cal Poly Democrats club, suffered minor scrapes and bruises.

The fire engine was part of the California Department of Forestry sent in from Sonoma County. The San Luis Obispo Fire Department sent several engines down to Southern California to control the wild fires and filled in with ones from other counties.

Engineer Ohlen Briant, 28 of Santa Rosa, was driving the CDF truck at the time of the accident.

"He had a firefighter in the cab and a firefighter in the back end of

# Graphic Communication department awarded

COURTESY PHOTO

Xerox presented the award to GrC professor Lorraine Donegan at a graphic arts exposition in Chicago.

Brittany Ridley  
MUSTANG DAILY

The Xerox Printing Innovation Award was originally a competition for professional printing companies throughout the country. But three years ago, Cal Poly's graphic communication department (GrC) decided that it had the resources and the talent to compete with the best.

After its third year of entering a

publication, "4-forty Magazine: A Compilation of Student Work," the GrC 440 (Magazine and Newspaper Design Technology) class was awarded second place.

"This award is for professionals that have the highest technology for achievement," said Harvey Levenson, head of the graphic communication department. "We said, 'Look, it doesn't say that

see Award, page 2

**DUI**

continued from page 1

A week following the incidents, Cal Poly President Warren Baker sent out a mass e-mail to students concerning his thoughts on drinking.

"Within the last few weeks, seven Cal Poly students have been arrested off-campus for underage drinking. Please avoid placing yourselves in situations that might jeopardize your long-term health and well-being, your future at the university or your career goals," Baker said in the e-mail.

Students do not realize the long-term consequences when they decide to drink and drive, Hubbard said.

"If you're over 21, your license will be suspended for at least six months. Underage DUI's will have a suspended license for at least one year," Hubbard said. "Many people do not think of the price they will have to pay over the long haul when they receive a DUI. For example, their insurance costs will increase immensely."

Within the next year, SLOPD is planning various screening checkpoints around highly trafficked areas in San Luis Obispo and near Cal Poly. Hubbard said the police department plans to target major roadways in order to stop drivers of all ages from drinking and driving.

Hubbard said that a majority of DUI's occur around the holiday season, with ages ranging from early 20s to late 40s and 50s.

The SLOPD will continue to push its Designated Driver program.

**Award**

continued from page 1

schools can't compete, so why not?"

Students enrolled in the class determined the genre and target audience for their magazine, often using their own artwork, photography and articles when designing each of the pages, said Lorraine Donegan, assistant professor for the graphic communication department and GrC 440 professor.

"When I started teaching this class I said, 'Can we print a magazine?' And everyone was like 'I don't know,'" Donegan said.

In seven weeks, the students were required to provide a cover logo, front cover design, back page advertisement, masthead, table of contents, editorial content and a two-page feature spread.

"The project spans over the first seven weeks of the quarter and then the last three weeks," said Dongan. "Bob Pinkin, GrC technician and I work together on printing and producing the magazine."

Xerox presented the award to Donegan on Oct. 3 at a graphic arts exposition in Chicago.

The company was impressed with the success Cal Poly's graphic communication department,

which had used tools donated by the Xerox Corp., Donegan said.

"They were so impressed that number one, these students were doing great work, and number two, they were utilizing their equipment," Donegan said. "What's great is that it has really brought Cal Poly into this and they (Xerox) are saying 'Wow, Cal Poly is utilizing this technology.'"

Donegan has not only succeeded within her department, but has also been recognized for her accomplishments by Cal Poly.

"This year she won the Prestigious University Adviser of the Year. She was voted No. 1 adviser in the whole university," Levenson said. "Lorraine's knowledge balances creativity and technology. She is astute when it comes to digital media, she manages our Web site and she is very studious in print/non-print digital imaging."

Donegan said that she looks forward to re-entering a new "4-forty Magazine" next year, and winning first place.

"The objective of this project is for the students to learn the process of preparing digital files for submission," Donegan said. "The students do such a great job at this and they really love it."

**Crash**

continued from page 1

the engine," CDF Investigator Mike Cole said.

The cause of the accident is still under investigation and the police report has not yet been finished. Whether or not Briant will be cited is also unknown.

Because the fire truck was damaged in the collision, Sonoma County sent down another truck to replace it, and took Briant back to his unit.

Cole said he is looking into whether Briant's unfamiliarity with the area was a factor in the accident. Briant might be penalized for

causing the crash.

"The process is reviewed very carefully," Cole said. "And if the circumstances dictate disciplinary actions, disciplinary actions will be taken."

The fire truck was on its way to a medical call at Camp San Luis when it crashed into Norton's car at the intersection of Marsh and Santa Rosa streets.

The engine had its siren on, but Norton said she never heard it.

"We didn't see it coming at all," White said. "We had a green light and we were going through the intersection and I think I heard the siren about half a second before it hit us."

## Driverless VW from Stanford wins \$2 million robot race

ASSOCIATED PRESS

Twenty-three robots raced to crisscross 132 miles of rough desert and mountain trails without a human driver or remote control. The Stanford racing team's vehicle finished in first place.

Alicia Chang

ASSOCIATED PRESS

PRIMM, Nev. — A driverless Volkswagen won a \$2 million race across the rugged Nevada desert on Saturday, beating four other robot-guided vehicles that completed a Pentagon-sponsored contest aimed at making warfare safer for humans.

The race displayed major technological leaps since last year's inaugural race, when none of the self-driving vehicles crossed the finish line.

Stanley the VW Touareg, designed by Stanford University, zipped

through the 132-mile Mojave Desert course in six hours and 53 minutes Saturday, using only its computer brain and sensors to navigate rough and twisting desert and mountain trails. The Stanford team celebrated by popping champagne and pouring it over the mud-covered Stanley.

"This car, to me, is really a piece of history," Stanford computer scientist Sebastian Thrun said Sunday after receiving an oversized check for the \$2 million prize, funded by see Race, page 4

## Critics say explorer's holiday questionable

Megan Cox

OKLAHOMA DAILY (U. OKLAHOMA)

NORMAN, Okla. — Observance of Columbus Day, a federal holiday honoring Christopher Columbus, has become a nationwide controversy as some schools cancel classes for the day while others do not.

Part of the controversy lies in the fact that many Native Americans do not feel that Christopher Columbus, the explorer the holiday was named after, should be honored as a national hero.

Nicholas Wahpepah, American Indian Student Association public affairs representative and psychology senior, said he has never observed the holiday. He said Columbus was a man who saw Native Americans only as slaves and that he and his men used brutal methods to subdue Native Americans.

Wahpepah said other Native Americans he knows also choose not to commemorate Columbus Day.

Rambo said there are other federal holidays that are not included as vacation days, such as Presidents Day and Veterans Day.

Amber Pointer, marketing sophomore, said she would like to have the day off from classes because she always has in the past, but she understands the controversy it could cause. "They can give the day another designation so it doesn't create any (racial) waves," she said.

Rambo said the choice to have class is not based on the ideology surrounding the holiday, but on the lim-

ited number of vacation days allowed.

But, many students and faculty are still discussing the controversy, and Clara Sue Kidwell, director of Native American Studies at OU, said she thinks talking about the Columbus Day controversy is a good exercise in education. She said the day "glorifies one of the myths of American history."

Kidwell said that instead of renaming the holiday in honor of Native Americans, which has been suggested in past years, it might be better to create a holiday in the month of November, which is Native American month.

Columbus Day was first observed by the state of Colorado in 1905 to commemorate Columbus sailing to America in 1492. It was named a federal public holiday by President

Johnson in 1968. Although Native Americans have protested parades in the past, many Italian Americans continue to celebrate the day and feel it is an important part of their heritage.

Chris Romannose, Native American Studies sophomore and vice president of the American Indian Student Association, said he has never thought the controversy over Columbus Day was a big deal.

"I'm glad we don't have it off (at OU), and I don't think we should," he said. "What did Columbus really contribute?"

Erin Sullins, elementary education senior, said cultural clashes like this have been discussed in her classes. "It's good to talk about both perspectives, but it may not be best to have a day off for (Columbus)," she said.

## Women struggle with decisions regarding balance of family, career

Meredith Bowen  
DAILY ORANGE (SYRACUSE)

SYRACUSE, N.Y. — The choice between being a stay-at-home mother or a working woman may be a far more complex decision for middle-class college women than recent surveys of graduates and current students seem to make it.

Surveys of past and current Yale University women show nearly half of women name mothering as their primary occupation by age 40. Subsequent surveys of current students showed that nearly 30 percent plan to stop working to raise their children.

The same decision for Syracuse University women is not as black and white, reflecting constantly changing attitudes about a woman's role at home and the workplace, as well as economic differences.

"There's still kind of a judgment on both sides," said sophomore business major Elizabeth Swanson. "Some women in business look down on women who stay home, but then there's also that guilt about leaving the kids home with a stranger."

Interviews with 18 current female students showed a desire to experience both the hearth and the board room and a realization that most marriages do not end in white picket fences and happily ever after.

Fifteen said they would consider being stay-at-home mothers only after working for a few years, many adding they would stay at home only if it was financially easy to do so and only until their children were ready for school.

None said they want to have children right after college. Many hoped to work for a few years, gaining experience in their fields and enjoying their youth before taking a few years off to raise their children. Most said they plan on returning to work part time after their children start school.

This is the option mathematics professor Kari Shaw took after her sons Connor, 12, and Tiernen, 8, were in preschool. Shaw chose to return to teaching part time. Though it was hard to leave things such as tenure and research behind, Shaw said she has no regrets.

"Even if I didn't have to, I still would have gone back," Shaw said. "It's nice to be around adults, and to just get out of the house to do what you're trained to do."

Though her husband, Declan Quinn, also a mathematics professor, would love to be home with the children more often, differences in pay and benefits made it better for the family for her to be part time, she said.

Several of the SU women said having professional or work skills was an important backup in case a marriage failed.

Having an escape plan and realizing most marriages are not perfect is an important part of making the decision to be a full-time mother, said Linda Alcott, director of women's studies.

"There's still so much naiveté?" Alcott said. "You make all these plans, and then the world intervenes."

Of the three SU women who said they would not want to be a full time mother at any point, one based her decision on a personal understanding of the risks.

Sophomore political science major Jessalyn Mastrianni's parents divorced when she was young, leaving her stay-at-home mother bankrupt.

"It's all about your personal experiences," Mastrianni said. "But I just wouldn't want that to happen to me."

Alcott was able attend school by putting her children in government-subsidized day care, paying \$1 per week. However, affordable day care and more rights for mothers on maternity leave are constant losing battles, Alcott said.

According to a spring 1999 Census survey, the most recent on the topic, mothers ages 25 to 38 pay an average of \$90 per week for childcare.

"Not everybody has the option to be a stay-at-home mom," Alcott said. "The Ivy League kids probably can. One of the theories is that parents send their children to Ivy League schools so they can marry someone in the right class."

Surveys of SU alumni comparable to the ones done at Yale do not exist; however, according to Career Services data, only 0.2 percent of graduates from 2001 to 2004 are seeking neither employment nor graduate school.

Students at all-female Wells College in Aurora rarely express interest in full-time parenting, said Career Services Director Nancy Karpinski.

"We certainly have students who are leaving and getting married, but they're also looking for jobs and graduate school," she said. "When I was in school, so many women got married right away. Now, you have so many opportunities we didn't have."

## Gigantic pumpkin prize awarded

ASSOCIATED PRESS

Joel Holland's prize-winning-record, 1,229-pound Atlantic Giant pumpkin sits at the annual Safeway World Championship Pumpkin Weigh-Off in Half Moon Bay, Calif., on Monday.

ASSOCIATED PRESS

HALF MOON BAY, Calif. — A retired Washington firefighter won the annual Safeway World Championship Pumpkin Weigh-Off on Monday, presenting a gigantic pumpkin that weighed 1,229 pounds.

Joel Holland said the pumpkin could make roughly 600 pumpkin pies but instead will be displayed in a parade in Half Moon Bay this coming weekend, then carved into a jack-o'-lantern for Halloween.

"Maybe we'll set a record for the size of a pumpkin pie next," said Holland, who has won the competition five years in a row. He won last year with a pumpkin that

weighed exactly the same amount.

Holland's pumpkin had to be removed from the back of a pickup truck with a crane.

Holland, 56, said he worried when the contest began because another pumpkin was bigger dimensionally than his entry.

He attributed his success to two decades of pumpkin growing experience and the favorable climate at his Puyallup, Wash., home. The Atlantic Giant was hand-pollinated and grew from July to October.

Contenders beware: Holland plans to use the seeds from this year's giant to spawn another behemoth.

## Race

continued from page 3

taxpayers. He said he did not know how he would spend the money, but jokingly said he needed to buy cat food.

Stanford spent \$500,000 on the race, some of which was provided by sponsors.

In second place was a red Humvee from Carnegie Mellon University called Sandstorm, followed by a customized Hummer called Highlander. Coming in fourth was a Ford Escape Hybrid named Kat-5, designed by students in Metairie, La., who lost about a week of practice while some lost their homes when Hurricane Katrina blew into the Gulf Coast.

The Humvee, which finished in seven hours and four minutes, traveled further than any other vehicle

last year despite completing only 7 1/2 miles of the course.

A fifth vehicle, a 16-ton truck named TerraMax, was the last to finish the course Sunday, though not within the contest's 10-hour deadline. It paused Saturday night so it wouldn't have to race in darkness.

It's unclear how the Pentagon plans to harness the technology used in the race for military applications. But Thrun said he wanted to design automated systems to make next-generation cars safer for everyone, not just the military.

"If it was only for the military, I wouldn't be here today," Thrun said.

Volkswagen plans to use Stanley in promotions, and the vehicle will then be retired to a museum in Germany, Thrun said.

Called the Grand Challenge, the race began Saturday with a field of 23 autonomous vehicles. Eighteen failed to complete the course.

continued from page 7

technicians designs and produces the most advanced navigational surveying, logging and computer electronics drilling operations.

**Asymtek**

Asymtek®, a world leader in automated fluid dispensing, designs and manufactures a full line of equipment for semiconductor package assembly, printed circuit board assembly, opto-electronics assembly, and precision industrial manufacturing. Our mission is to maintain a leading role in dispensing technology by consistently providing innovative, quality solutions that exceed our customers' needs and expectations.

**Bamboo Pipeline**

Bamboo Pipeline is one of Southern California's fastest growing green goods businesses. We serve landscape professionals throughout the Southland with the highest quality materials needed to build great landscapes at quality homes and commercial sites. Our materials are sold to some of the most prestigious sites in Southern California; including the J. Paul Getty Museum, The Biltmore Hotel of Santa Barbara and Disneyland, as well as hundreds of other top quality-building projects.

**Bay Alarm Company**

Bay Alarm Company is a 60-year old statewide company highly respected for superior products and client services. We have 80,000 residential and commercial customers

serviced by branches in Anaheim, Burlingame, Martinez, Oakland, Petaluma, Redding, Sacramento, Santa Clara, Stockton, Van Nuys and Ventura. We sell and install fire, burglar, CCTV, and card access electronic security systems in home and businesses throughout the state. Sales Representatives have protected territories and sell to either residential or commercial customers. The Sales Representatives are provided with outstanding support: the award-winning marketing department and positive name recognition, the telemarketing department provides leads, and the Sales Coordinator provides administrative support.

**Bei Systron Donner**

Manufacturer of quartz rate sensors for automotive, aerospace & defense applications.

**Bobrick Washroom Equipment, Inc.**

Bobrick, a leading manufacturer of high quality commercial washroom equipment, has been serving the washroom accessory and toilet partition needs of North American and International building owners, designers, architects and distributors since 1906. The Bobrick system for total washroom design combines innovative engineering, quality manufacturing and outstanding service, to offer a wide variety of accessory and partition products to meet the requirements of all building types.

**Boeing Company**

Boeing designs, produces and sup-

ports a variety of aerospace and defense products. Boeing is committed to global leadership in every aspect of our business. We are passionate about continuing the proud aerospace legacy that began over 80 years ago. A diverse array of career challenges with long-range potential are now available throughout Southern California.

**Bridge Bank**

Bridge Bank combines the resources and services typically associated with larger banks with an unparalleled commitment to personal service. Bridge Bank offers banking solutions created specifically to help businesses grow and prosper.

**Cahill Contractors, Inc**

Cahill Contractors, Inc. is a San Francisco based medium sized commercial construction company. We specialize in fast track/phased development projects, multi-unit residential projects and seismic rehabilitation. The majority of our work is negotiated. Founded almost 90 years ago, Cahill has maintained a healthy balance of project types in the San Francisco Bay Area for many decades, and continues to be a leader in the Northern California construction industry with respect to quality, integrity, innovation, technology, and reputation.

**California Dept Of Toxic Substances Control**

The California Department of Toxic Substances Control (DTSC) protects Californians from exposures to hazardous wastes. Approximately

1,000 scientists, engineers and specialized support staff work in nine offices statewide. DTSC is a department of the California Protection Agency (Cal/EPA).

**Caltrans**

The California Department of Transportation (Caltrans) strives to be the highest performing transportation agency in the country. Caltrans has more than 23,000 employees with an annual budget of \$10 billion. Headquartered in Sacramento, the Department has 12 district offices situated in Eureka, Redding, Marysville, Oakland, San Luis Obispo, Fresno, Stockton, Bishop, Los Angeles, San Bernardino, Irvine, and San Diego.

**Chevron**

Chevron is a World-Wide Energy Corporation. See our website at [www.chevron.com](http://www.chevron.com) and a complete overview of the corporation.

**Cintas**

Cintas is the leader in corporate identity uniform programs, helping companies of all sizes consistently present a clean, crisp, professional look. We also have specialized flame resistant garments and garments for cleanroom environments. In addition to offering the largest variety of uniform colors and styles in the industry, our Facility Services group helps our customers keep their businesses looking clean and professional with floor mats, restroom supplies, mops, and shop towels. Our floor mats, which can be customized with corporate logos, check dirt at the door while reducing slips, falls and

housekeeping costs. We handle all of the details so our customers don't have to.

**Cisco Systems, Inc.**

Cisco Systems, Inc. is the world-wide leader in networking for the Internet. Today, networks are an essential part of business, education, government and home communications, and Cisco Internet Protocol-based (IP) networking solutions are the foundation of these networks.

**Clark Construction**

Founded in 1906 and headquartered in Bethesda, MD, Clark Construction Group, LLC is a premiere provider of construction services. Public and private clients capitalize on Clark's extensive management, development and construction experience. From museums to power plants, and dams to laboratories, Clark's resources meet the unique challenges of a variety of project types. Consistently ranked among the top contractors in the nation, Clark's current annual revenues are approximately \$2 billion.

**Coastland Civil Engineering**

Coastland Civil Engineering, founded in 1991, specializes in providing municipal and civil engineering services to governmental agencies in Northern California. Clients include municipalities, counties, utilities, schools and other public agencies. In addition to Municipal Engineering, our professional services include Construction Management, Building Department, see Directory, page 8

### EMC

EMC Corporation is the world leader in information storage systems, software, networks, and services that store, protect, move, manage and access the explosion of content. EMC solutions are enabling enterprises of all kinds to unite information as one resource, harness it as one source of value and leverage it as one asset to reach the goals of the organization. If you thrive in a challenging, results-oriented, and rewarding environment take a closer look at EMC Corporation. Team up with the world leader and achieve your own ambitious goals!

### Enterprise Rent-A-Car

Enterprise Rent-A-Car is the largest rental car company in North America. It operates more than 700,000 Rental and Fleet Services vehicles worldwide and has annual revenues of \$7.4 billion. Last year, Enterprise opened more than 500 new locations, increasing its total locations to more than 6,000 with offices in the United States, Canada, Germany, Ireland, and the United Kingdom. Enterprise is currently number 16 on the Forbes "500 Largest Private Companies in America" list.

### Family Care Network, Inc.

The Family Care Network, Inc. (FCNI) is the largest private

provider of children's mental health and social services on the California Central Coast. Over 1200 children, youth and families are served annually through 12 unique evidenced based programs in five service divisions: Alternative Family Services; Family Support Services; Delinquency Prevention Programs; Transitional Housing & Special Programs. FCNI serves the community through multiple collaborative partnerships with numerous governmental agencies, community-based organizations, schools, churches, local businesses and volunteers.

### Fastenal

Fastenal is the fastest growing industrial supplier in North America with over 1600 locations across the United States, Singapore, Canada, Mexico, Puerto Rico, and the Netherlands. Sales in 2004 were 1.3 billion with a growth plan to achieve 3 billion by 2008. Please view our financials on our website at [www.fastenal.com](http://www.fastenal.com). We have experienced over 20% growth since we opened in 1967. There is tremendous opportunity for advancement with Fastenal as we continue to open new locations.

### Fehr & Peers

Fehr & Peers has specialized in transportation planning and traffic engineering for 20 years. Here are some of the reasons Fehr & Peers is a respected leader in transportation consulting: Other major engineering and planning firms seek our help to solve difficult transportation problems. Many Fehr & Peers engineers and planners hold leadership

roles in the industry's most prestigious organizations.

### Ferguson Enterprises, Inc.

Ferguson is the country's largest wholesale distributor of construction materials including plumbing; pipes, valves and fittings; waterworks; and heating and air conditioning products. We buy from quality manufacturers and sell to residential and commercial contractors, developers, plumbers, industrial clients, as well as the general public. Ferguson has sales of over \$7 billion and over 16,000 associates in about 973 service centers located in 50 states, the District of Columbia, Puerto Rico, and Mexico.

### Flowserve Corporation

Flowserve is the recognized world leader in supplying pumps, valves, seals automation and services to the power, oil, gas, chemical and other industries. With more than 14,000 employees in more than 56 countries, we combine our global reach with a local presence.

### Fluor Corporation

Fluor Corporation is one of the world's largest publicly owned engineering, procurement, construction, and maintenance services organizations. Rated as one of the world's safest contractors, Fluor's objective is to develop, execute, and maintain projects on schedule, within budget, and with excellence. Fluor maintains offices, with over 30,000 total employees internationally, in more than 25 countries. Fluor is a FORTUNE 500 company. Over the past six years, Fluor has ranked No. 1 four

times on FORTUNE magazine's America's Most Admired Companies list in the Engineering & Construction.

### Foster Farms

Foster Farms is the largest Poultry Industry in the West. It has been a family-owned and operated company for four generations. Since our founding days back in 1939, we have always been committed to providing consumers with the highest-quality, best-tasting poultry products available. We are an equal opportunity employer.

### Frito-lay North America

Frito-lay North America is a leader of fun food products with production operations in over 40 locations throughout North America. Frito-lay produces some of your favorite fun food items with solid brands that include Doritos, Fritos, Rold-Gold, and Tostitos. Frito-Lay is a division of PepsiCo, a world leader in snack foods and beverages, with revenues of about \$27 billion and over 143,000 employees. PepsiCo brands are available in nearly 200 countries and territories.

### Gap Inc.

It was the summer of 1969: Man took his first walk on the moon. Nearly 450,000 people gathered in upstate New York to witness the historic Woodstock concert. And Doris and Don Fisher opened the first Gap store in San Francisco. Today, Gap Inc. is one of the world's largest specialty retailers, with about 3,000 stores and fiscal 2004 revenues of

\$16.3 billion.

### General Atomics Aeronautical Systems, Inc.

General Atomics Aeronautical Systems, Incorporated (GA-ASI) is among the leading technology employers in the San Diego area and the world leader in the design, development and manufacture of unmanned aircraft surveillance systems (UAVs) and associated hardware. In addition to a challenging and rewarding work environment, GA-ASI offers competitive salaries and a comprehensive benefits package including medical and dental insurance, Life/AD&D insurance, disability insurance, a 401(k) Plan, a defined benefit retirement plan, recreation facilities, and other benefits.

### Graphics Microsystems

## CAREER FAIR

Tuesday, October 11, 2005 11

### Directory

continued from page 9

Software was the first company to apply mainframe optimizing compiler technology to 32 bit microprocessors. Since 1982, Green Hills Software has developed optimizing compilers and related tools for 33 bit microprocessor architectures. Green Hills Software continues to develop compilers for today's new architectures as well, such as the Motorola StarCore, PowerPC, AltiVec, ARM9E, and MIPS 4kc and 5kc.

### Growers Express

Growers Express was founded in 1987 by eight partners, farmers who all believed in a few simple values: Producing our own premium quality products, consistent supply and superior service. Our partners have taken three generations of knowledge and respect for the land and have developed it into one of the nation's largest suppliers of fresh vegetables. Headquartered in the Salinas Valley, our total year-round ground base exceeds 40,000 acres.

### Guidant Corporation

Guidant Corporation and its subsidiaries provide therapeutic medical solutions for customers, patients, and healthcare systems worldwide. The company develops, manufactures and markets products that focus on the treatment of cardiac arrhythmias, heart failure and coronary and peripheral disease, including implantable defibrillator systems, implantable pacemaker systems, coronary stent systems, angioplasty systems, cardiac surgery systems and

Peripheral systems.

### Halliburton Energy Services

Founded in 1919, Halliburton leads the world providing products and services to the petroleum and energy industries. With a workforce of over 92,000 employees, operations in over 100 countries, and revenues of \$12.5 billion in 2002, Halliburton is a global leader in energy services, engineering, and construction. Wherever in the world oil and gas reserves are being discovered, drilled, extracted, produced, or refined, from dense jungles to deepwater wells, chance are Halliburton's people are working, sharing, contribution, and creating value for our customers, our shareholders, our employees, and our world. Halliburton is the only company that can do it all from start to finish on land or at sea.

### Hilti, Inc.

Hilti is virtually everywhere construction is taking place. From our legendary red tool cases and vehicles to our innovative products and value-added services, Hilti can be found on construction and building maintenance sites in more than 100 countries around the world. Professionals in the building maintenance, construction, electrical and plumbing industries continue to rely on Hilti for high-quality tools and products as well as system solutions for their construction and maintenance needs.

## We want you to join our Nursery Professional Team

I'm Greg. I am a lead buyer with Bamboo Pipeline.

I work to supply the highest quality plant material in California for quality landscape projects. We offer the broadest and best selection of landscape materials delivered direct to the contractor's jobsite.

My colleagues and I visit hundreds of growers across the West to deliver the best plants currently available - a concept we call "Market Best." We supply more than 10,000 varieties of plants, trees and shrubs, frequently delivered within 24 hours of order.

We also supply thousands of irrigation, drainage, outdoor lighting and other landscape supply items to complete the project list.

We are looking for top-notch nursery professionals to join our team based in Camarillo, California. Our Buyers and Account Specialists have outstanding plant knowledge and strong computer and communications skills. Experience working in a nursery environment or in a wholesale/retail green industry distribution business is a plus. We offer excellent salary and great benefits.

*My personal enterprise.*

We are an equal opportunity employer. MFDV

As a leading designer and manufacturer of power management semiconductors specialized for use in portable electronic products, AnalogicTech offers you many exciting and challenging career opportunities. We currently have openings in our fast-paced Silicon Valley headquarters. Join our dynamic engineering team today!

**Immediate Openings:**

- ◆ Application Engineer - Power Management Products
- ◆ Test Development Engineer - IC Products
- ◆ Product Engineer - Analog and Mixed Signal

**Want to learn more?  
Visit us at Cal Poly's Fall Job Fair  
Wednesday, October 12**

**Who We Are:**

AnalogicTech (Nasdaq: AATI) is a power management semiconductor design and manufacturing company specializing in Total Power Management solutions based on innovative analog and mixed-signal integrated circuits. Playing a critical role in system design, these devices manage battery life, voltage regulation, power-saving load switching, and electronic port protection.

**Directory**

continued from page 13

diverse and experienced staff offers independent engineering services in Architectural lighting design, electrical systems design and LEED.

**Ingersoll Rand Company**

For the past 100 years, Ingersoll-Rand people and products have contributed to the advancement of global industry and commerce, and as a result, have played a key role in worldwide economic development and social progress. Some of the world's greatest engineering achievements were built using our products - the New York City subway system, Panama Canal, China's Three Gorges Dam, Mt. Rushmore and more.

**Internal Revenue Service**

The Internal Revenue Service is the largest bureau within the Department of the Treasury. The mission of the Internal Revenue Service is to provide America's taxpayers top quality service by helping them understand and meet their tax responsibilities and by applying the tax law with integrity and fairness to all.

**Intuit**

As an industry leader for 20 years and best known for developing products including Quicken, QuickBooks and Turbo Tax, Intuit transforms business and financial management for small businesses, accounting professionals and consumers. For additional information about our company and recent initiatives, please visit our website at [www.Intuit.com](http://www.Intuit.com).

**Investors Bank & Trust**

Welcome to Investors Bank & Trust, a financial services company committed to providing the best securities processing services in the world. Investors Bank & Trust specializes in fund administration and accounting, custody, and transfer agency services. We specialize in securities processing. And we're one of the best in the business in meeting the back office needs of mutual fund companies, banks, investment managers and insurance companies. With our innovative back office support, our clients, including many of the world's most recognized mutual fund, investment advisory and insurance companies, are able to expand their distribution systems, strengthen their money management capabilities, and bolster their competitive advantage. [www.ibtco.com](http://www.ibtco.com)

**J.M. Smucker Company**

J.M. Smucker Company is the nation's leading producer of jam's jellies, preserves and ice cream toppings. Consistently ranked on Fortune Magazine's "Top 100 Companies to Work For" list.

**J.R. Filanc Construction**

J.R. Filanc Construction Company (Filanc) is a Class A general engineering contractor specializing in the construction of wastewater and water treatment facilities. Our Contractor's license number is 134877. Filanc has been in the business of constructing, renovating and expanding new and existing wastewater and water treatment facilities since 1952.

**The Keith Companies**

The Keith Companies, Inc. is a multi-disciplined engineering and

consulting services company. The Keith Companies' professionals provide a wide spectrum of skilled resources including land planning, civil engineering, surveying, mapping, environmental and water and cultural resources that are needed to effectively plan, engineer, and design state-of-the-art facilities. The Keith Companies benefits from a diverse public and private client base varying from residential, commercial, and real estate projects to institutional, manufacturing, and processing facilities. Our team-oriented environment offers an opportunity to grow your career!

**Keyence Corporation**

Keyence ([www.keyence.com](http://www.keyence.com)) is global leader in industrial automation and manufacturing technologies. We are listed in Business Week's Global 1000 Best Valued Companies in the world and on Nikkei Index Top Ten Companies in Japan. Keyence has experienced rapid growth of 30% annually since its beginnings in 1974. We offer extensive training to qualified individuals who are seeking a career in Sales and Territory Management. Our career development program trains our professionals to be experts on our products and to be highly regarded in our industry by our customers for solution based sales.

**Kiewit Pacific Co**

Founded in 1884, Kiewit has grown from a small masonry-contracting firm to a Fortune 500 company with more than 15,000 employees and \$3.4 billion in revenue. Kiewit is involved in nearly all segments of the construction industry and currently is North America's second largest transportation contractor; building projects such as airports, mass transit systems, railroads and tunnels. The company is also a leader in commercial buildings, power plants, water supply and treatment facilities, underground construction, telecommunications and many other types of heavy construction projects.

**Kraft Foods**

Kraft Foods (NYSE: KFT) is a global leader in branded foods and beverages with 2004 net revenues of more than \$32 billion. Built on more than 100 years of quality and innovation, Kraft has grown from modest beginnings to become the largest food and beverage company headquartered in North America and second largest in the world, marketing many popular brands in more than 155 countries.

**Lam Research**

Founded in 1980, Lam Research Corporation is a leading supplier of wafer fabrication equipment and services to the worldwide semiconductor industry. The Company's innovative etch technologies empower customers to build the world's highest-performing integrated circuits. Lam's etch systems shape the microscopic conductive and dielectric layers into circuits that define a chip's final use and function. The Company also offers a next-generation wafer cleaning solution, which employs proprietary technology and can be used throughout the semiconductor manufacturing process, including in post-chemical mechanical planarization (CMP) and pre- and post-chemical vapor deposition (CVD) applications.

Headquartered in Fremont, California, see Directory, page 15

## CAREER FAIR

Tuesday, October 11, 2005 15

### Directory

continued from page 14

California, Lam maintains a network of facilities throughout the United States, Asia, and Europe to meet the complex and changing needs of its global customer base.

#### Lawrence Livermore National Laboratory

Lawrence Livermore National Laboratory (LLNL) is a premier research and development institution for science and technology applied to national security. We are responsible for ensuring that the nation's nuclear weapons remain safe, secure, and reliable. LLNL also applies its expertise to prevent the spread and use of weapons of mass destruction and strengthen homeland security. Our national security mission requires special multidisciplinary capabilities that are also used to pursue programs in advanced defense technologies, energy, environment, biosciences, and basic science to meet important national needs. These activities enhance the competencies needed for our defining national security mission.

#### Lennar Corporation

Lennar Corporation is one of the nation's largest homebuilders and a provider of financial services. Our homebuilding operations include land development, construction and the sale of single-family attached and detached homes, as well as the purchase, development and sale of residential land directly and through our unconsolidated partnerships. Our financial services subsidiaries provide mortgage financing, title insurance, closing services and insurance agency services for both buyers of our homes and others and sell the loans they originate in the secondary mortgage market.

#### Lockheed Martin

Lockheed Martin is a highly diversified \$31.8 billion advanced technology company and the strategic leader in the aerospace industry with major positions in information systems, software development, space, launch vehicles, aeronautics, electronics, environmental services, and energy programs. The vision of the Corporation is to be the world's premier systems engineering and technology enterprise.

#### Los Angeles County Dept. Of Public Works

The Department is a public agency that is responsible for the design, construction, installation, operation, maintenance, and/or repair of roads, bridges, airports, sewers, water supply, flood protection, watershed management and water conservation facilities, and regulatory and ministerial programs for the County of Los Angeles, Los Angeles County Flood Control District, other special districts, and contract cities that request services. A 24-hour Emergency Operations Center is maintained to respond to problems reported by the public and other agencies as well as major emergencies, such as floods, windstorms, snowstorms, earthquakes, etc., and to monitor various Departmental Facilities.

#### Los Angeles Unified School District

As the nation's second largest school district, the Los Angeles

Unified School District serves more than 730,000 students. Our diverse and culturally rich student population is increasing and so is our need for qualified, dedicated teachers and school support staff. We believe teachers are shapers of the future and we are committed to educational reform and innovative instructional programs that are aligned to state standards. The District, through its schools and offices, provides many teacher resources and support services to complement and strengthen the instructional program.

#### Maxim Healthcare Services

Maxim Healthcare Services provides medical staffing, home health and wellness services. Founded in 1988, Maxim has rapidly expanded to include 9 divisions and over 250 branch offices in 38 states. We have earned a position as an innovative competitor in the health care industry through our quality of patient care, commitment to employee development and emphasis on customer service. Today, Maxim is one of the largest privately owned companies in our industry, with projected growth for the year 2005 exceeding 30 percent.

#### Maxim Integrated Products

Established in 1983, Maxim Integrated Products is a worldwide leader in design, development and manufacture of linear and mixed-signal integrated circuits (ICs).

Maxim circuits "connect" the real world and digital world by detecting, measuring, amplifying, and converting real-world signals, such as temperature, pressure, or sound, into the digital signals necessary for computer processing.

#### McIntosh & Associates

McIntosh & Associates has been serving Calif., since 1980 & Ariz. & Nev. since 1992. Our services include civil engineering, planning, landscape architecture, photogrammetry, petroleum engineering & construction management.

#### Medtronic Vascular

Medtronic Vascular in beautiful Santa Rosa, California, offers state-of-the-art solutions for vascular diseases. These medical devices include the new Endeavor, Drug Eluting Stent system and the Valiant Thoracic Stent Graft System. Please visit our website at [www.Medtronic.com](http://www.Medtronic.com) for more information.

#### Microsoft Corporation

Headquartered in Redmond, Washington, Microsoft (NASDAQ symbol: MSFT) employs thousands of talented people in a wide array of fields. Our core mission: create groundbreaking technology that unleashes creativity, connects businesses, and makes learning more fun.

#### Milgard Manufacturing

In 1958, Maurice Milgard, Jr. and his son Gary started Milgard Glass Company in a small building in Tacoma. Gary's brother, Jim, joined the company in 1961. Within a short time, the Milgard's diversified into aluminum windows. Our more than 4,500 employees work hard each day to deliver high quality products and superior customer service. In fact, both of these are so important to Milgard that they're part of the Milgard Corporate Philosophy.

#### Moore Wallace

see Directory, page 16

### SPRING 2006 INTERNSHIP OPPORTUNITIES

The J.M. Smucker Company is the nation's #1 producer of jams, jellies, preserves, ice cream toppings and fruit syrups. We are ranked on *Fortune Magazine's* list of "The 100 Best Companies to Work For", and we are currently offering spring internship opportunities at our Fruit Processing facility in Oxnard, CA.

More than just an internship, this is an excellent opportunity to actually work in a food-processing environment and gain "hands-on" experience in operating a food plant. Qualified candidates must be available to work 6 to 7 days per week and up to 14 hours per day (any shift) as needed. These are paid positions and furnished housing is provided.

The following internship positions are available:  
(Approximately April - August 2006)

- ◆ Quality Control Supervisors (All Majors)
- ◆ Shipping and Receiving Supervisors (All Majors)
- ◆ Processing/Industrial Supervisors (All Majors)
- ◆ Human Resources Generalist (Spanish Fluency Required)
- ◆ Safety Coordinator (Spanish Fluency Required)
- ◆ Inventory Control Coordinator (Accounting & Finance Majors)
- ◆ Wastewater Pre-Treatment Plant Technician (Engineering Majors)
- ◆ Grower & Field Representative (Santa Maria, CA)

For more information please contact:

Jared Klein  
Human Resources Manager  
Smucker Fruit Processing Company

## CAREER FAIR

16 Tuesday, October 11, 2005

### Directory

continued from page 15

Moore Wallace, an RR Donnelley company, is the largest printing company in North America, providing customers with the industry's broadest array of print products and services, from magazines, books, catalogs, and financial documents, to billing statements, highly personalized direct mail, labels, collateral materials, forms and logistics services.

### National Semiconductor

National Semiconductor Corporation engages in the design, development, manufacture and marketing of a range of semiconductor products, which are analog and mixed-signal integrated circuits. National Semiconductor was founded in 1959 and is headquartered in Santa Clara, California.

### Naval Air Systems Command

The Naval Air Systems Command (NAVAIR) serves the nation and the Navy by providing advanced warfare technologies to American interests all over the world. In its quest to be the best, NAVAIR is always on the lookout for those willing to embark on an exciting new career. Over 26,000 NAVAIR employees work hand in hand to deliver advanced Naval aviation technologies. This talented team of business and technical professionals research, design, develop and test aeronautical and aeronautical-related systems. NAVAIR's products include state-of-the-art sensors, aircraft, weapons, training, launch and recovery equipment, and communications technologies.

### Neil O. Anderson & Assoc.

Neil O. Anderson & Assoc., Inc. is a dynamic, successful, geotechnical engineering firm based in Lodi, California with locations in Sacramento, Modesto and Walnut Creek, California and Sparks, Nevada. NOA offers a wide range of engineering services including Geotechnical Engineering, Environmental Services, Engineering Geology, Hydrogeology, Materials Testing, Non-destructive Testing, Construction Inspection, Laboratory Services, Swimming Pool Structural Design, Instrumentation and Post Tension Design.

### Northrop Grumman Corporation

Northrop Grumman Corporation is a global defense company headquartered in Los Angeles, Calif. Northrop Grumman provides a broad array of technologically advanced, innovative products, services and solutions in systems integration, defense electronics, information technology, advanced aircraft, shipbuilding, and space technology. The company has 125,000 employees and operates in all 50 states and 25 countries and serves U.S. and international military, government and commercial customers.

### Northwestern Mutual Financial Network

The mission of Northwestern Mutual Financial Network is to develop enduring relationships with our clients by providing expert guidance for a lifetime of financial security with the help of our Network of Specialists and Staff who provide innovative solutions using world-class insurance products and investments. The Northwestern

Mutual Financial Network is the exclusive sales and distribution arm of Northwestern Mutual and its subsidiaries and affiliates.

### Novellus Systems

Novellus Systems is an S&P 500 company and a component of the Nasdaq-100 Index ®. It is a leading supplier of thin film deposition, surface preparation and chemical mechanical planarization (CMP) systems used in the fabrication of integrated circuits. The company is designed to deliver innovative products and technologies that meet the increasingly complex and demanding needs of the world's largest semiconductor manufacturers.

### O'Dell Engineering

Full service civil engineering and land surveying firm, also providing landscape architecture and planning services.

### PG&E

The key to our success is our employees. We take tremendous pride in our people. At home or on the job, our employees represent PG&E's commitment to providing safe, reliable energy to our customers 24 hours a day 7 days a week. And, just as they are committed to providing excellent customer service, we are committed to providing our employees with the tools and training to help them succeed. PG&E is here for you.

### Palm, Inc.

Palm, Inc. (formerly palmOne, Inc.) — a leader in mobile computing — strives to put the power of computing in people's hands so they can access and share their most important information. The company's products include smartphones, under the Treo(TM) brand; mobile managers, under the LifeDrive(TM) brand; handheld computers, under the Tungsten(TM) and Zire(TM) brands; as well as software and accessories. More information about Palm, Inc. is available at <http://www.palm.com>.

### Panda Restaurant Group

At Panda, you will experience a culture dedicated to serving our guests and providing delicious Chinese food. We are committed to developing our team as the best investment toward a future of quality operations and growth. Show us your strengths and build a ladder to success by being part of a growing team — World Leader in Quality Chinese Food. Because we value our people, Panda offers you excellent benefits and rewarding opportunities from entry-level to management positions.

### Parsons

With over 9,000 employees worldwide, Parsons is one of the world's leading engineering, planning and construction management companies. Parsons has established an outstanding performance record over many decades and our employees have worked on major projects throughout North America and in more than 25 countries. We are committed to continually enhancing our organizational capability by attracting, retaining and developing exceptional talent.

### Pepsi Bottling Group

The Pepsi Bottling Group is the world's largest manufacturer, seller

## CAREER FAIR

Tuesday, October 11, 2005 17

### Directory

continued from page 16

and distributor of Pepsi Beverages. Formerly a Division of PepsiCo, we are a world-class company employing 38,000 and generating nearly 11 billion dollars in annual sales. Each day, 7,000 trucks leave 90 bottling plants and 284 distribution centers delivering the product directly to stores; arranging it on the shelves and building promotional displays.

#### Pinnacle Engineering

Pinnacle Engineering is a multi-disciplined Civil Engineering and Surveying Company, specializing in land development, surveying and public works infrastructure.

#### Progressive Insurance

Progressive is the nation's third-largest auto insurance company. Founded in 1937, Progressive offers consumers choices in how they shop for, buy, and own a Progressive policy. The company provides most drivers with competitive rates and in-person service 24 hours a day, and sells its products over the phone, online, and through more than 30,000 independent agencies throughout the United States.

#### Provost And Pritchard

Founded in 1968, 74 employee-owners represent a mix of seasoned engineering veterans, complemented by younger professionals with fresh ideas and cutting-edge skills. We specialize in water resource engineering and planning, engineering surveying services, design and planning of municipal infrastructure, dairy design services, planning and design of on-site and off-site improvements for private development, and engineering services for agricultural clients.

#### Pulte Homes, Inc.

Pulte Homes, Inc., (NYSE: PHM), based in Bloomfield Hills, Mich., is a FORTUNE 200 company with operations in 54 markets and 28 states. In 2004, the company closed 38,612 domestic home sales and generated revenues of \$11.7 billion. During its 55-year history, the company has constructed more than 408,000 homes. In 2004, J.D. Power and Associates named Pulte the inaugural recipient of its Platinum Award for Excellence in Customer Service among America's leading homebuilders.

#### Quad Knopf Inc.

Quad Knopf, named by The Zweig Letter Hot Firm 2005 list as 1 of the top 100 Fastest-Growing U.S. Architecture/Engineering/Planning & Consulting Firms in the nation, a known leader in the Central Valley for its services in engineering, architecture, biological sciences, land use planning, policy planning, and environmental assessment. Quad Knopf's total service approach to our clients encompasses the disciplines of civil and structural engineering, land use and environmental planning, biology and architecture. Quad Knopf's staff is large enough, and has sufficient diversity of skills and capabilities, to assure our clients that project requirements can be fully met on both a technically sound and timely basis. At the same time, the firm remains small enough that the principals and key senior staff remain personally involved in a project. Quad Knopf is located in 5 offices

up and down the Central Valley and in Reno, NV.

#### Raytheon Company

Raytheon Company is a global leader in defense electronics and complex integrated information systems. We are focused on defense, government and commercial electronics and business aviation and special mission aircraft. The company is well positioned for growth in missile defense, intelligence, surveillance and reconnaissance; precision strike; homeland security and technical services. Raytheon is also positioning its technologies its technologies to meet evolving high-growth commercial markets.

#### Rockwell Automation

Rockwell Automation is a leading industrial automation company focused to be the most valued global provider of power, control and information solutions. With a focus on automation solutions that help customers meet productivity objectives, the company brings together leading brands in industrial automation, including Dodge® mechanical power transmission products, Reliance Electric motors and drives, Allen-Bradley® controls and engineered services and Rockwell Software® factory management software. Global technical and customer service is an integral part of Rockwell Automation, with nearly 5,600 distributors, system integrators and agents serving customers in 80 countries.

#### RSC Engineering, Inc.

RSC Engineering, Inc. is a civil engineering consulting firm located in Roseville, CA that specializes in the branch of Commercial Land Development.

#### Safeway Inc.

Safeway Inc. is one of the largest food and drug retailers in North America. As of January 1, 2005, the company operated 1,802 stores in the Western, Southwestern, Rocky Mountain, and Mid-Atlantic regions of the United States and in western Canada. In support of its stores, Safeway has an extensive network of distribution, manufacturing and food processing facilities.

#### Sandisk Corporation

SanDisk was founded in 1988 and serves as the world's largest supplier of flash data storage products. The company pioneered industry development of flash memory cards for data storage and played a key role in setting many flash industry standards. SanDisk designs, manufactures, and markets flash memory data storage products used in a wide variety of electronic systems. The company has optimized its flash memory storage solution, known as system flash, to address the needs of many emerging applications in the consumer electronics and industrial/communication markets.

#### Seminis Vegetable Seeds

Seminis is the largest developer, grower and marketer of fruit and vegetable seeds in the world. Our hybrids improve nutrition, boost crop yields, limit spoilage and reduce the need for chemicals. We have a vision that with age-old wisdom and modern science we can lessen hunger and promote the health of both the planet and its people.

When we asked our employees why they thought Wood Rodgers was the fastest growing engineering firm west of the Rockies, what do you think they said?

- Management gives us a lot of autonomy and respect...
- The owners have a 'share the wealth' mentality...
- We have lunchtime basketball...
- Everybody is rowing in the same direction...
- It's a very employee-friendly place...
- It's a young, energetic company...
- The work is exciting and varied...
- We have fun recognition programs like Spin the Wheel...
- Our customers keep coming back for more...
- We have all you can eat lunchrooms...
- It's versatile and diversified even within each discipline...
- Management is flexible with work/life issues...
- The people are just good people...
- ☑ All of the above!

To learn more about our fabulous opportunities and the superb benefits of working at Wood Rodgers, navigate online to [www.woodrogers.com](http://www.woodrogers.com) or email [hr@woodrogers.com](mailto:hr@woodrogers.com).

WOOD RODGERS

**Shaw Industries**

Shaw, a subsidiary of Berkshire Hathaway Inc., manufactures and sells floor covering for residential and commercial applications throughout the United States and exports to most markets worldwide. To be exact, we manufacture more than 600 million square yards of floor covering every year — enough to wrap a 6-foot wide path around the earth's equator 7 times.

**Shimmick Construction**

Established in 1990, Shimmick Construction Company, Inc. (SCCI) is a general engineering/heavy civil contractor based in Hayward, CA. SCCI has completed over one billion dollars worth of work and has rapidly succeeded in earning a reputation for excellence in heavy construction. This was achieved by following its founders, John C. Shimmick and Mike Stranberg's, simple yet effective business philosophies of, 'Get work for the right price, construct high-quality projects on or ahead of schedule and complete the projects within budget,' but, above all, 'Make It Happen'. (SCCI's company motto). A recent list of clients includes: Golden Gate Bridge Authority, Los Angeles Metropolitan Transportation Authority, Alameda Corridor Transportation Authority, Caltrans and San Francisco Municipal Transportation Agency. Over the years the Company has developed a reputation for completing high quality projects while maintaining rigorous schedules and ensuring that safety be given a top priority.

**Siemens**

Siemens is a technology company committed to developing a portfolio of innovative global products, services and solutions. Siemens Energy & Automation, Inc. (SE&A) is dedicated to providing an environment that will allow the opportunity to learn, grow and drive personal and professional value throughout one's career.

**Southern Wine And Spirits**

Southern Wine & Spirits' history began decades ago in Florida.

Founded by Harvey Chaplin, Southern Wine & Spirits of America, Inc. is a privately held alcohol beverage distributorship with its corporate office in Miami. Since being founded SWS has established distributorships across the nation. It is currently the largest distributor of wines and spirits in the United States and its impressive portfolio of products includes wines, spirits, beers and non-alcoholic beverages.

**Sprint**

Sprint is a global integrated communications provider serving more than 26 million customers in over 100 countries. With approximately 68,000 employees worldwide and nearly \$27 billion in annual revenues, Sprint is widely recognized for developing, engineering and deploying state-of-the-art network technologies, including the United States first nationwide all-digital, fiber-optic network and an award-winning Tier 1 Internet backbone. Sprint provides local voice and data services in 18 states and operates the largest 100-percent digital, nationwide PCS wireless network in the United States.

**SRI**

SRI is a nonprofit corporation founded in 1946 and chartered by the state of California. As an institute dedicated to diversified scientific and engineering research and development, SRI performs client-sponsored research for industry, government, and foundations in the United States and abroad. Research is conducted in engineering technologies and systems, pharmaceuticals and biotechnology, chemistry and physics, advanced materials, computing and information sciences, environmental and atmospheric sciences, education, health sciences, and economic development.

**Stantec Consulting, Inc.**

Stantec is a dynamic multi-disciplinary consulting engineering and design firm with a 75-year history of serving public and private clients throughout the world. Stantec provides civil engineering, landscape architecture, environmental planning, land use planning, surveying and geomatics, transportation engineering.

**CAHILL CONTRACTORS, INC.  
PROJECT ENGINEER POSITION**

Cahill Contractors, Inc. is a San Francisco based medium sized commercial construction company. We specialize in fast track / phased development projects, multi-unit residential projects and seismic rehabilitation. The majority of our work is negotiated. Please refer to our home page, [www.cahill-sf.com](http://www.cahill-sf.com), for more information.

Cahill Contractors, Inc. is an equal opportunity employer. We offer our employees generous compensation and benefit packages including top salaries, profit sharing and full health and dental coverage.

This is a junior level management position that offers individuals with limited experience in construction the opportunity to learn hands on estimating, management and commercial construction practices. The ideal candidate for this position is motivated, organized, possesses excellent communication skills, and is eager to learn.

Project Engineers are typically assigned to one large or two medium sized projects. They split their time between our main office and the jobsite as necessary to meet the demands of their projects. In the office, Project Engineers assist with quantity take-offs, bidding and estimating.

They also assist project managers with tracking of contract documents and resolving field-generated questions. At the jobsite, Project Engineers are responsible for learning safe construction practice, documenting changes, tracking schedules, overseeing subcontractors and assisting the project superintendent with record keeping. They also participate in jobsite coordination meetings.

Our intent is to expose Project Engineers to all aspects of a construction project by giving them significant level of responsibility. They are not limited to a specific group of tasks.

benefits and the experience of a lifetime.

**USG Corporation**

USG CORPORATION For almost 100 years, Chicago-based USG has been a leader in producing innovative products and systems to build the environments in which we live, work and play. USG is the world's leading producer of gypsum wallboard, joint compound and a vast array of related construction products. We are also the global leader in the manufacture of ceiling suspension systems and are recognized as the acoustical panel and specialty ceiling systems innovator.

Our family of products provides creative building solutions that set new standards for productivity and efficiency, helping contractors and architects deliver high quality and innovative designs.

**USS Posco Industries**

A world-class steel manufacturer located in Pittsburg, California. USS-POSCO Industries was founded in 1909 as Columbia Steel. We are now a joint venture company established in 1986 between U.S. Steel and Pohang Iron and Steel of South Korea. One of the most modern steel mills in the world, USS-POSCO ships over 6,000 tons of steel per day to customers primarily in the 13 western states, Canada, Mexico and the Pacific Rim.

**Valero Energy Corporation**

Valero has been recognized as #23 on Fortune Magazine's 100 Best Companies to Work For in 2004 and as one of IndustryWeek's 100 Best Managed Companies in the world. We are proud to be the first refiner to win the Governor's Award for Environmental Excellence in Texas and to be one of nine US companies to receive the Points of Light Award for Excellence in Corporate Community Service.

**Valleycrest Companies**

Our four Business Units operate through a national network of branch offices, providing a full array of landscape services to a wide variety of customers. In addition, ValleyCrest Companies has one wholly owned subsidiary, U.S. Lawns, a national landscape franchise business. With more than 50 years of experience, no landscape company in America can claim greater depth of expertise or a more comprehensive track record of effective problem-solving and consistent execution.

**VeriSign Inc**

VeriSign Inc (NASDAQ:VRSN) operates intelligent infrastructure services that enable people and business to find, connect, secure, and transact across today's complex, global networks. Every day, we enable over 14 billion internet interactions, 3 billion telephony interactions, and \$100M of e-commerce. We also provide the services that help over 3,000 enterprises and 400,000 Web sites to operate securely, reliably and efficiently.

**ViaSat, Inc.**

ViaSat produces advanced digital wireless communications and signal processing products for commercial and government markets. Our technology development and products all involve digital communications and cover specialties such as satellite communications, tactical communications, network security and communication simulation and training.

**Walgreens**

Walgreens, the nation's premier retail drugstore, has opportunities nationwide. With 7,000 stores planned by the year 2010, we're creating opportunities for talented, ambitious individuals to be ready to contribute to future success. So, if you're a motivated, enthusiastic, people-oriented person with a knack for organization and who thrives in the fast-paced world of retail management, we want to talk to you.

**Wells Fargo Financial**

Wells Fargo (NYSE: WFC) is a

diversified financial services company providing banking, insurance, investments, mortgage and consumer finance from 5,800+ stores, the world's leading internet banking site (www.wellsfargo.com) and other distribution channels across North America and elsewhere internationally. We're headquartered in San Francisco, but we're decentralized so every local Wells Fargo store is a headquarters for satisfying all our customers' financial needs and helping them succeed financially. Wells Fargo has \$370 billion in assets and 136,000 team members. We are one of the United States' top-40 largest employers. We ranked fourth in assets and third in market value of our stock at March 31, 2003, among our peers.

**Wilbur-Ellis**

Wilbur-Ellis is a full service agricultural chemical and fertilizer retailer whose main goal is to provide THE most advanced crop production technology to our customers with the goal of maximizing our customers' return on investment.

**Wood Rodgers, Inc.**

Wood Rodgers was recently recognized as the third fastest growing engineering firm in the country! Shortly following receipt of the Zwieg White Hot List award, we received top honors by CE News in the national contest recognizing the "Best Engineering Firms to Work For." Is there a reason our name keeps popping up? We think so! Wood Rodgers provides a wide array of services in Land Development and Public Projects in Northern California and Nevada.

**Workbrain, Inc.**

Workbrain provides Web-based software to optimize the deployment and management of large workforces. Customers such as Lowe's, International Steel Group, JB Hunt have chosen Workbrain solutions to automate workforce planning, scheduling, time and attendance, employee self-service and business intelligence. Workbrain delivers fast return on investment to clients in focus industries such as retail, manufacturing, transportation, healthcare, financial services, and law enforcement. The company employs over 600 employees in 26 offices in the United States, Canada, Australia and the UK.

**WorleyParsons**

Global supplier of engineering and construction management services for the petrochemical and power industries. Primary offices in Houston, TX, Arcadia, CA, Reading, PA, and London, UK. A WorleyParsons Company.

**York International**

York is a Fortune 500 company formed in 1874 in York, Pennsylvania. Focused exclusively on the HVAC&R industry, with over 23,000 employees in over 100 countries. York designs, manufactures, sells and services commercial air conditioning systems, industrial refrigeration systems, residential and light commercial heating and air-conditioning systems and compressors for residential and commercial air-conditioning.

# Places to pick the perfect pumpkin

Tiffany Dias  
MUSTANG DAILY

Many Cal Poly students are preparing for Halloween by decorating their homes with pumpkins. Some go to the same spots every year to buy their pumpkins, while others buy to support local farmers.

"I'm either buying my pumpkins from the Sierra Vista's farmers market or at a patch just off of Los Osos Valley Road," graphic communication senior Nicole Krause said. "I need jack-o'-lanterns in my house for ambiance."

The only pumpkin senior architectural engineer Dave Lambert is buying will go into a pie crust.

"I leave the pumpkin buying to my girlfriend," Lambert said. "She already purchased them from Avila Valley Barn."

Tenley McGurk, architecture senior, buys her pumpkins at the same place each October.

"Last year I bought them from Albertsons, so that's what I'm probably going to do this year, too," McGurk said.

But in case you're still looking for the perfect spot to pick a pumpkin, here are a few local pumpkin patches that offer more harvest activities for your buck. Here are three nearby spots that are currently selling pumpkins:

Want to support other Cal Poly students? Then visit **Cal Poly U-Pick**. This patch is located on farm 25 and is open every Saturday from 10 a.m. to 2 p.m. through the end of October.

Cal Poly U-Pick features a corn maze and pick-your-own gourds. Pumpkins range from \$1 to \$5. They will also have a haunted corn maze Oct. 30.

Want another way to support Cal Poly? Buy your pumpkins at the student **Farmers' Market** in Sierra Vista. The market is held every Monday from 4:30 to 6:30 p.m. Pumpkins range from \$2 to \$5.

When a regular pumpkin excursion just won't do, **Avila Valley Barn** provides hay rides, fruit and vegetable stands, roasted corn and a difficult adult hay maze.

BRENNAN ANGEL MUSTANG DAILY

The farm offers a wide selection and is open from 9 a.m. to 6 p.m. Pumpkins cost 25 cents per pound.

Avila Valley Barn is located at 560 Avila Road. Call 595-2816.

For those who like to mix pumpkins and ponies, **La Familia Ranch** is just off U.S. Highway 1 in San Luis Obispo and offers a baby animal farm and petting zoo, along with a traditional pumpkin patch. The Ranch is open until dusk through Oct. 31.

La Familia Ranch is located at 4757 Los Osos Valley Road. Call 544-6142.

Pumpkins are currently priced three for \$12 at the **Albertsons** in the Laguna Shopping center on Los Osos Valley Road. Pumpkins at the Albertsons on Foothill Boulevard are priced at three for \$10.

Pick up tomorrow's Mustang Daily for a guide on how to carve your pumpkin into a spooky jack-o'-lantern.

## Mustangs on the run

Where are you buying your  
pumpkins this Halloween?

"I think I was going to get some from the Avila Barn."

Ryan Pether,  
city and regional planning major

"I don't know where to get them around here, but I saw some huge ones driving through Paso."

Bucky Scott,  
art and design junior

"Cal Poly has a sign out on Highland, they're selling pumpkins."

Todd Fawley,  
city and regional planning major

drink the same or less on Mardi Gras weekend

# GOP should embrace Supreme Court nominee Miers

**Joshua Huck**  
DAILY TEXAN (U. TEXAS)

AUSTIN, Texas - Substantial amounts of ink have been dedicated to dissecting Harriet Miers, Bush's Supreme Court nominee to replace the departing Sandra Day O'Connor. Even in the pages of The Daily Texan, two editorials have already taken on Bush's pick, both in negative light.

The internet "blogosphere" is in overdrive with both the Left and Right wondering exactly what Bush was thinking when he settled on Miers. Her history indicates a rainbow of ideological interests. With no judicial experience and a middling record, she has big shoes to fill, following the O'Connor legacy.

What's more, her nomination is fresh on the heels of the recent con-

firmation of Chief Justice John Roberts, a man that Republican Sen. Sam Brownback rightfully called a "rock star" in his field. Roberts argued in front of the Supreme Court 38 times, winning 25 of those cases. Harriet Miers has never faced our county's high court in a case.

Because of her inscrutability, prominent right-wingers are furiously calling for a "do-over" asserting that Bush has wasted a chance to secure a solid conservative in the court and possibly is inadvertently pulling a "Souter." David Souter, a George H.W. Bush Supreme Court nominee, has leaned left on many court rulings during his tenure on the bench.

From Pat Buchanan to Ann

Coulter, volleys are coming from all directions on the Right, pitting party factions against each other and the President.

So what's all the fuss about?

One of the GOP's most repeated

*From Pat Buchanan to Ann Coulter, volleys are coming from all directions on the Right, pitting party factions against each other and the President.*

talking points regards those pesky "activist judges" that "legislate from the bench." This always has always been a disingenuous attack on our judicial system. The real problem the GOP has with these activist judges is that they don't "legislate from the bench" in the Right's favor.

During the Roberts confirmation

hearing, some Democrats worked themselves into a tizzy trying to gauge where Roberts stood on issues such as abortion and privacy rights. Roberts showed no cards, and was confirmed without any significant revelations.

Republicans stuck to their guns throughout and defended Roberts' dissembling on the grounds that lucidity would compromise his future position on the court.

Now the Right is stuck between a rock and a hard place, having carried the Fifth Amendment into the Roberts confirmation as their standard, they have no leg to stand on in trying to figure out Miers, a nominee even more frustratingly opaque than Roberts. So instead of feeling her out and appearing to flip-flop,

they're merely calling for her nomination to be withdrawn.

Unfortunately, Bush isn't budging. Friday morning he told reporters that, "she [Miers] is going to be on the bench."

I have no doubt that Bush, his advisers and Miers have spoken very frankly about the gravity of this appointment in an issue-specific matter, despite Bush's oft-repeated metaphor that he has no "litmus test." The White House has mounted a fierce campaign to reassure the conservative leaders that Miers will represent their agenda, but one wonders what information they're using if not the "alkalinity" or "acidity" of Miers' convictions.

Anyone who believes that the White House didn't test the waters of Miers' ideology before presenting her to the public is delusional.

## LETTERS TO THE EDITOR

### Salsa censorship attacks First Amendment rights

The censoring of the Cal Poly Salsa Club appalls me. To cover a poster that is printer paper-sized is ridiculous. I fully agree with Billy Chenoweth when he says it is not illegal; it's our right stated in the First Amendment, Freedom Of Expression.

Charlie Roberts is a beautiful woman, and if she has no problem with the picture, why should anyone else? I found that the poster attracted the curiosity of many people and the results were phenomenal. But for people to be offended is ludicrous. Why not censor Maxim, or FHM? They show the same, if not more, than the club's poster ever showed. God forbid you see a little cleavage on a poster, as if you don't see enough on campus. Or worse, a man's bare chest. Guys walk around without shirts all over campus. If you don't want a guy walking around without his shirt, don't look at him. Same for the poster. If you don't like it, don't look. Pure and simple.

**Phil Bowman**  
Animal science sophomore

### Salsa complaints are ludicrous, as is club's response

I am writing in response to the appalling censorship of the CPSalsa

posters which have fallen under heavy fire for their "offensive" content. As a student at Cal Poly, I take great offense to the complaints of those who call the advertisements "inappropriate."

How is a photograph featuring Charlie Roberts, which contains less exposed skin than all of your favorite TV shows, music videos and possibly your own reflections, to be considered offensive? OK, now also answer me this: Is there an entire college at Cal Poly devoted to the arts, which include graphic design, drawing and photography?

Being an art student, among other things, I can understand why the club would choose such an image to represent their ideals. Salsa is a sensual dance that melds two people in a whirlwind of music and movement - the ads symbolize the excitement and emotion of the dance. And besides, it's not as if the poster contains any "nudity" in the first place.

On a polar note, I scold the CPSalsa Club for simply laying down to the kind of oppression that threatens our creative thought on a larger battlefield outside our quiet campus. I can understand the club's desire to avoid unwanted damage to their growing popularity, but after seeing those unfortunate (although pleasantly amusing) advisory stickers that claim to be "protecting innocence," I have to question any reason I might have for joining the club. Do I want to associate myself with a group that cannot fight for what they believe in? My answer is most definitely "no."

**Jim Weise**  
Art and design sophomore

### Comparing salsa and scuba posters

You thought THAT salsa was hot!

I just finished reading the article about the CPSalsa poster and instantly thought of this poster I saw last year right as I walked into the gym. Yeah, I'm sure a few of you out there already know which one I'm talking about. It's that scuba diving club poster with the very attractive, very naturally beautiful woman, who I'm certain is one of the nicest girls on campus. She just looks like that cool girl you always want as a friend because she's so down to just kick back whenever and laughs a lot and always has a good time.

I'll apologize to her in advance for pointing her out in this letter, but you have to run a picture of that poster alongside the CPSalsa poster, and you tell me which one shows more. I haven't seen one on any of the walls around campus because I'm sure they're all framed and hanging over people's beds, but there is one left in a glass showcase bulletin board right next to one of these CPSalsa posters on the bottom floor of the UU.

Yeah the poster isn't banned, it's enshrined!

It just amazes me; if we can handle that flaming hot poster we should be able to handle this new mildly spicy salsa poster. Once again, I apologize to the nice girl for bringing you into this debate. Don't hold it against me if we meet someday.

**Aric Stone**  
Mechanical engineering senior

### Professor Lynn's actions highly offensive

I find professor Lynn's stance on the CPSalsa club's posters absolutely appalling. In my opinion, censorship should only be used in instances that warrant its use. This is obviously not one of them. The posters are not displaying pornographic images nor are they displaying full nudity. All I see is one quarter of one breast!

In the Monday edition of the Mustang Daily, professor Lynn professes that we must "preserve the innocence" of the Cal Poly students, faculty and guests. Are you kidding me!? This is a university, not a convent. Lynn also adds that "We're coming from a standpoint of being professionals and having a dignified work environment." Once again, my point stands that this is a university and I doubt that these images really threatened anyone's work environment. If professor Lynn is offended over this issue, I think that she is in the wrong line of work.

Censoring quasi-questionable material is highly offensive to me and to most students, faculty and

others who value living in a society free from such control. I am truly sorry that something like this makes a very small minority uncomfortable, but censorship is not the answer. Half of the girls on campus wear more revealing clothes on a daily basis. Do you want to cover them up with a gigantic Cal Poly advisory sticker too? Women have breasts - deal with it!

**Ryan Kompanik**  
Microbiology senior

## Football continues upward trend, No. 6 in ESPN/USA Today poll

Cal Poly is one position away from its highest ranking ever in Division I-AA football.

Cal Poly climbed three positions to No. 6 in the two NCAA Division I-AA polls following its 37-6 victory over then-No. 12 North Dakota State on Saturday in Mustang Stadium. The Bison fell to No. 18 in the two polls.

Cal Poly was ranked as high as No. 5 in the 2004 polls, winning its first seven games before suffering back-to-back losses to UC Davis and Eastern Washington. Prior to the 2004 season, Cal Poly's highest ranking was No. 14 after winning its first three games of the 2003 season. Cal

Poly was ranked No. 16 in the final poll of the 1997 season, finishing 10-1.

The Mustangs were ranked 17th in both 2005 preseason polls. After a 38-10 win over then-No. 11 Montana State on Sept. 17, Cal Poly climbed to No. 12. The Mustangs opened defense of their Great West Football Conference title with a 24-16 victory at South Dakota State on Sept. 24 and jumped to No. 10 in the polls, then climbed one more position to No. 9 following their 31-14 triumph at Northern Colorado.

Besides No. 2 Montana and No. 18 North Dakota State, other Cal Poly opponents in the rankings this

week include No. 8/9 Montana State and No. 12 Eastern Washington. Idaho State dropped out of the top 25 after falling 32-10 to Montana on Saturday.

The initial Gridiron Power Index (GPI) was released by I-AA.org last week. The BCS-style rankings placed Cal Poly No. 4 with a 7.67 score. New Hampshire was No. 1, followed by North Dakota State, Appalachian State, the Mustangs and, tied for No. 5, Montana and James Madison.

Cal Poly has a bye this week and visits Montana for a 12:05 p.m. Pacific kickoff on Saturday, Oct. 22, in Missoula, MT.

# Women's soccer overcomes Anteaters in Irvine

MUSTANG DAILY STAFF REPORT

Cal Poly rebounded from its 4-2 loss at Long Beach State Friday to knock off UC Irvine 2-1 at Anteater Stadium Sunday.

Fueled by goals from senior Becky Clark and junior Heidi McQuitty, Cal Poly improved to 9-2-3 overall and 1-1 in Big West Conference play.

"It was a tale of two halves," coach Alex Crozier said at a news conference Monday.

Crozier said that the first half was one of the best the team had played and that the second half was one of the worst.

Clark got the scoring started in the 17th minute as teammate Sarah Squires lofted a free kick to Clark near the goalpost and Clark rifled it

into the net for her sixth goal of the season.

A red card in the 31st minute led to Cal Poly junior Kelsey Carroll's ejection, leaving the Mustangs short-handed for the remainder of the game.

Despite being a player down, Cal Poly scored again in the 46th minute. Cal Poly's Alix Cohen sent a free kick into the Irvine's box, setting up McQuitty for her first goal of the season.

Using the player advantage in its favor, Irvine stayed competitive. The Anteaters scored in the 64th minute as freshman Kathleen Lemieux delivered a corner kick into the box. The Anteaters' Makenzie Beahm came up with the ball and beat Mustang goalie Liz Hill, cutting Cal Poly's lead to 2-1.

Irvine couldn't muster enough offense to score the equalizer. Cal Poly's defense clamped down with two-time Big West defensive player of the year, Sierra Simmons, leading the Mustangs.

Hill finished the day with two saves. Irvine goalie Rosie Aguilera had three saves.

Cal Poly out shot Irvine 8-6 in a highly penalized match — Irvine was whistled for 21 fouls to Cal Poly's 17.

Besides Carroll's red card, Cal Poly's Sharon Day also received a yellow card, her first of the season.

Carroll will be unable to participate in Friday's game against Cal State Fullerton due to the red card. Carroll's absence may turn out good for the team Crozier

said. "It's going to allow someone to step up and maybe bring a new dynamic onto the field," Crozier said.

Cal Poly plays its next match on Friday at Mustang Stadium against the Titans (10-3, 2-1) at 7:30. The Mustangs also host UC Riverside on Sunday at 1 p.m.

## Garnett garners Great West player of the week

SPORTS INFORMATION REPORT

Players from Cal Poly and South Dakota State have earned Great West Football Conference player of the week honors for their performances in games on Saturday.

Cal Poly quarterback Anthony Garnett was selected as offensive player of the week while South Dakota State cornerback Hank McCall earned defensive player of the week honors.

South Dakota State place kicker Parker Douglass was named special teams player of the week for the second time this season.

In a pair of Great West Football Conference games Saturday, No. 9 Cal Poly defeated No. 12 North Dakota State 37-6 at Mustang Stadium, while South Dakota State edged UC Davis 16-14 in Sioux Falls, S.D. Northern Colorado and Southern Utah had byes.

This Saturday's schedule includes just one Great West Football Conference game. Southern Utah (0-4, 0-0) at UC Davis (2-3, 0-1). The remaining four Great West Football Conference members, North Dakota State (4-2, 0-1), Cal Poly (5-1, 3-0), South Dakota State (3-3, 1-1) and Northern Colorado (2-3, 0-1), all have byes this week.

Garnett, a senior from Seaside, Calif., threw a season-high three touchdown passes in Cal Poly's win over North Dakota State.

The senior completed 11 of 16 passes for 166 yards, including scoring strikes of 63 yards to Tredale Tolver, 16 yards to Ramses Barden and three yards to Adam George, all in the second quarter as the Mustangs built a 27-0 halftime lead.

McCall not only led South Dakota State in tackles with 11, but he made two of the biggest plays in the Jackrabbits' win over UC Davis. McCall broke up a two-point conversion attempt by UC Davis with 2:05 to play, preserving SDSU's 16-14 lead, and had an interception, returned 13 yards, to set up SDSU's lone touchdown drive. He also broke up two passes.

Douglass kicked three field goals and an extra point in South Dakota State's victory over UC Davis. His middle field goal was a school-record 54-yarder.

Earlier in the game, he connected from 55 yards, but the play was nullified by a holding penalty after which he just missed from 65 yards. Douglass' other noteworthy kicks were from 38 and 32 yards.

## Player spotlight: Troy Swier, cross country

Nick Coury  
MUSTANG DAILY

When your father used to run, and your brother was an acclaimed runner at your college before you arrived, all you can do is run too.

Troy Swier is a 19-year-old business administration major and a native of San Diego. This is his second year at Cal Poly, but under NCAA regulations, he is a freshman in terms of eligibility because he red-shirted last year.

Swier runs long distance on both the cross country and track team, where he specializes the 5 and 10K races. With the amount of running he does, Swier is following, literally, in the footsteps of his family.

"My dad used to run when he was a kid,

and he kind of got me into it," Swier said. "My brother was running really well at the time (in high school), and he is one of my heroes, and I want to be just like him."

Swier started running in seventh grade on a small-time track team, and ran on a club team in high school. He graduated in 2003 from Mar Vista High School where he ran both cross country and track. Swier then moved to San Luis Obispo where he continued running, this time under the training of his brother Blake's former coach, Mark Conover.

"Troy brings a lot (to the team)," Conover said. "He has a great personality. He is just a guy that you got to like." Conover is the head coach of the cross country team and an assistant track coach.

Conover said it is nice to have a well-

rounded runner on the team, and encourages Swier to go all the way with his goal of one day making it on the Olympic team. Some may say running is boring, but Swier takes it all in stride.

"It's good exercise and a good confidence booster. But if you're in a sport and you're doing well there it helps in other aspects of life too," Swier said. "Running encouraged me to do well in school as well."

Swier has been running so long, he is not sure of what else he could be doing.

"At this point I couldn't fathom a life without running right now," Swier said. "It's crazy to think about how I have been running so long that if I just stopped cold turkey right now, it would be weird."
