STRATEGIC PROGRAM IN RESEARCH SUPPORT SERVICE

INTRODUCTION

STRATEGIC PROGRAM IN RESEARCH SUPPORT SERVICE or known as SPIRESS was established in 2013 aimed to provide range of training and consultation services for library users. This team founded by Mr Mohd Nasir Hj Md Rashid, Deputy Chief Librarian (Resource Planning and Development) to facilitate the rapid research trend and fulfills the needs in helping users to organize and manage their research work. SPIRESS team members consist of 13 young PHS librarians who was trained to become expert in specific area of knowledge. Four (4) main groups successfully established in SPIRESS team mastering specific areas including:

- ◆ **Mendeley**
- ◆ **Google Scholar as your Research Support Tools**
- ◆ **Grammar Checker Software (Consultation only)**
- ◆ **Open Access publication**

At the moment, two training was offered by SPIRESS: Mendeley and Google Scholar as your Research Support Tools. Both training received overwhelming responds from library users and now has been offered to public and other institutions.

OBJECTIVE OF SPIRESS TEAM

- ⇒ Provide training and develop skills required in research
- ⇒ Facilitate research by exposing to the latest research tools, concepts and techniques.

TRAINING OFFERED

- ◆ Scheduled Training for USM library users (Free)
- ◆ Special Request Training for public and other Institutions (Fee-based)

FACILITATORS & TRAINERS

◆ **Mendeley**

Mr. Musa Mohamed Ghazali

Mr. Abd. Halim Ismail

Mr. Mohd. Kamal Mohd. Hanapiah

◆ **Open Access publication**

Mr. Muhammad Akmal Ahmat

Mr. Ahmad Nurul Amein Ahmad @ Ramli

◆ **Grammar Checker Software (Consultation Only)**

Mdm. Noor Adilah Azmi

Mdm. Lizawati Muhammadan

Mdm. Jamilah Hassan Basri

◆ **Google Scholar as your Research Support Tools**

Mdm. Husriati Hussain

Mdm. Noor Azlinda Wan Jan

Mdm. Rosnani Ahmad

Mr. Shahriza Fadly Misaridin

Mr. Mohd. Ikhwan Ismail

JOIN US NOW!

If you are interested to join SPIRESS training and would request for consultation services, please do not hesitate to contact:

⇐ The first group of participants attended Google training.

The highest number of participants ⇐ attended for Open Access publication training @PHS (79 participants).

↑ Mendeley trainer: Mr. Abd. Halim Ismail

↑ Mendeley USM Trainers with Dr. Othman Talib, certified Trainer for Mendeley in Malaysia.

⇐ Mr. Musa Mohamed Ghazali (left) and Mr. Shahriza Fadly Misaridin (right) facilitating Mendeley and Google at Computer Lab, PHS.

Zoom in:

AAAS Publisher - Talk & Presentation on Altmetrics, Big Data Analytics, Open Access Journals and Data Mining

A Talk and presentation by AAA Publisher organized by Perpustakaan Hamzah Sendut on 29 September 2014 at Academic Lounge, PHS 1 aimed to expose USM researchers to new method of manipulating and managing the impacts of their research. Using several tools namely Altmetrics, Big Data Analytics, Open Access and Text Mining, researcher may derive more quality information that enhanced their research.

Altmetrics

Altmetrics is a new way of assessing research impact by adding on a wider set of metrics to traditional bibliographic rankings based on academic journal citation analysis. Aside from measuring citations, this tool also provides tweets, Facebook shares and saves on Delicious and Mendeley that will be helpful for researchers in organizing and sharing their discoveries.

Big Data

Big data describes any huge amount of structured, semi-structured and unstructured data that has the potential to be extracted for information. Big data analytics help researchers to analyze huge volumes of data that conventional analytics and business intelligence solutions can't touch. It is a process of examining big data to discover hidden patterns, unknown correlations and other useful information that can be used to make better decisions for research.

Open access

Open Access has grown exponentially ever since its inception just a few years ago. It allows researchers to publish their articles and making it accessible over the internet at no charge. This platform provides greater chances of visibility for researchers, academicians, and scholars subsequently leading to more citations.

Text Mining

Text mining is an analysis of data contained in natural language text. It helps researchers deriving potentially valuable business insights from text-based content such as word documents, email and postings on social media streams like Facebook, Twitter and LinkedIn. By using text mining, researchers may gain insight into content-specific values such as sentiment, emotion, intensity and relevance that may enhance their quality of research.

Talk and presentation was delivered by Kiki Forsythe, Senior Publisher Relations Specialist for American Association of Advancement of Science (AAAS). Participants including students, lecturers, researchers and librarians.

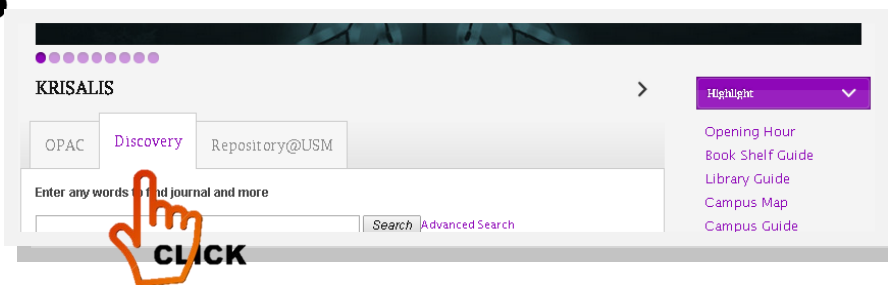

Tips @ PHS:

USM KRISALIS DISCOVERY: Easy and simple way to search for entire library collection

USM KRISALIS DISCOVERY is a new tool provided by PHS to the users to enhance and simplify the searching process to the library resources. This tool bring together online and printed resources in one platform and offers one stop searching solution to entire library collection. This tool will be accessed via library website www.lib.usm.my.

1  Go to library website : www.lib.usm.my and click on KRISALIS Discovery.

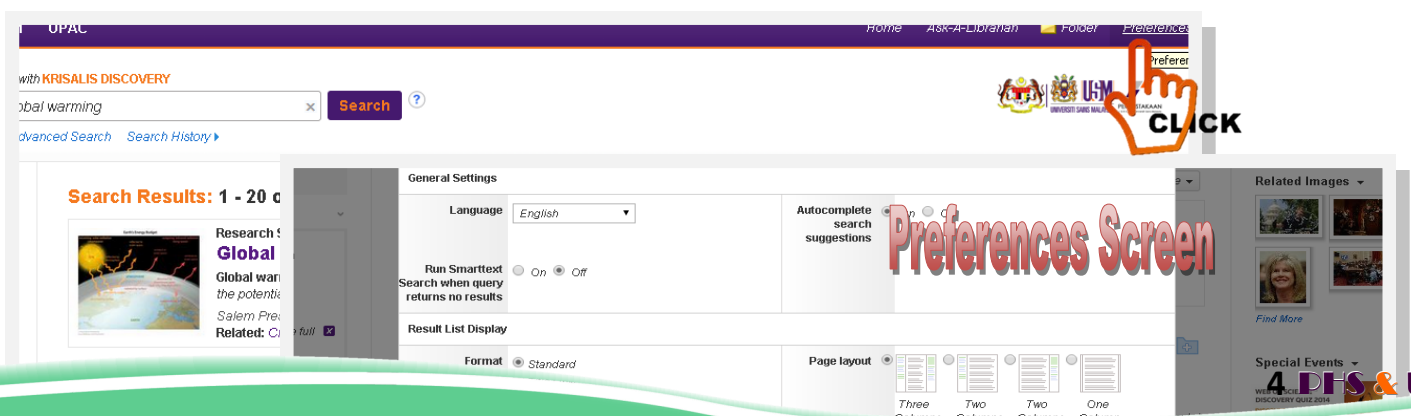

2  Type the keyword e.g. "global warming" and click on the search button.

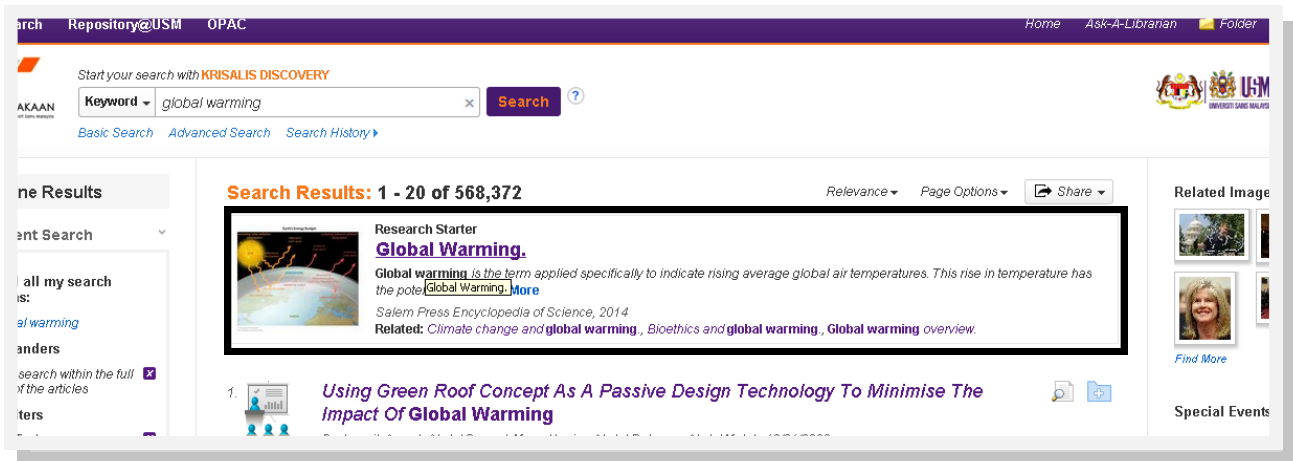

3  On the upper-right of search result screen, click on the Preferences and set your preferences as follow and click save button.

- ⇒ **General setting:** Choose language and keyword suggestion.
- ⇒ **Result List Display:** Choose the look and feel of your Result List.
- ⇒ **Print, Email, Save, Export:** Set your default for Print, Email, Save and Exporting your result.

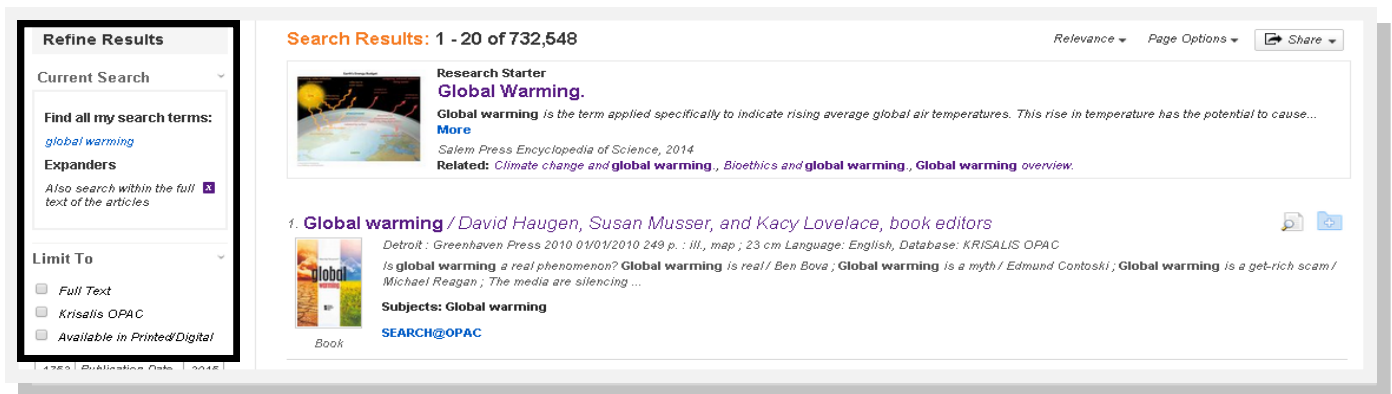

On the search result screen, the first result you may see is a **'research starter'**. This is a service that provides citable, authoritative summary articles for your keywords. Click on title or more button if you wish to read more.

Result Lists will display all resources available in the library including printed and online resources. Click on **Refine Result** menu on left-side of search results screen to refine search result. You may refine by type of resources, publication date, source type, publisher, publication, language and etc. For example, if you want to limit the result to type of resources, three options available:

- ⇒ **Full text:** Refer to online resources in subscribed databases, e-journals & e-books) & online resources in Repository@USM
- ⇒ **Krisalis OPAC:** Refer to printed resources (printed books, journals & media)
- ⇒ **Available in Printed/Digital:** Refer to printed resources & online resources in Repository@USM

You have to go to the library if you want to view or borrow printed resources. If printed resources available at other library branches, you may request to borrow via Inter Library Loan services.

For online resources, full text can only be view or downloaded within USM campus. If you are accessing from outside USM campus, please log in via off campus. The ID and password for off campus log in are your **USM email ID and own password**.

Happening @ PHS

2 July 2014

'Taklimat Kembara Perpustakaan' at Pusat Pengajian Pengurusan organized by Reference and Research Division.

9 July 2014

'Taklimat Kembara Perpustakaan' at Pusat Pengajian Seni organized by Reference and Research Division.

14 August 2014

Library Orientation for 'Rancangan Pelajar Jarak Jauh' (RPJJ).

2 September 2014

Library Orientation for 2014/2015 new
USM Undergraduate students.

8 September 2014

Students register for Jom Cari Maklumat
Workshop which was annually organized to
educate undergraduate students on
information literacy skills.

29 September 2014

AAAS Publisher Talk and Presentation:
Game changers, attended by students,
lecturers and librarians.
