Virginia Juvenile Finfish Trawl Data

Several management efforts during recent years have used the juvenile or young of the year index as a "trigger mechanism" for relaxing or tightening harvest controls. Most notable among these are the striped bass (1982 and 1989) and bluefish (1987) management plans of the Atlantic States Marine Fisheries Commission and Mid Atlantic Fisheries Management Council. Juvenile indices have also been used by numerous researchers to predict adult abundance or understand recruitment controlling environmental forces.

When, in 1987 the Status of Stocks Knowledge Work Group of CBSAC produced its Status of Stocks Knowledge Report, it was expected that the final product of the Work Group would be an annual report similar to the NMFS/NOAA Northeast Fisheries Center's annual Status of Fishery Resources off the Northeastern United States Report. The Work Group produced, in 1988, its first annual Chesapeake Bay Status of Stocks Report. The report, patterned after the NMFS's report included annual commercial landings in tabular and graphic format. The 1988-1989 report was to be an update of the 1987-1988 report, and would include data on the juvenile indices. During preparation of this report, what was to be the third Status of Stock Knowledge Work Group report, CBSAC reorganized and the Work Group was dissolved. At this time a "red book", the Chesapeake Bay Fisheries: Status, Trend, Priorities and Data Needs (September 1989) was produced by the fishery management

planning work group. Consequently, no Status of Stocks Report was produced, and the efforts of this study were directed toward producing a juvenile finfish index for the Virginia trawl survey. The results presented here are the tabular Catch-per-Unit-Effort (CPUE) Virginia trawl data for young of the year and yearling finfish from the inception date of the survey (1954) to the present. Cut-off size for young of the year fish is given in Table 1. It is expected that future "red book" revisions will include these data.

These data will also be the basis for developing a Virginia juvenile finfish index in 1989-1990.
