CHYDENANTHUS MIERS (LECYTHIDACEAE): A CORRECTION

KUSWATA KARTAWINATA

Herbarium Bogoriense, Lembaga Biologi Nasional-LIPI, Bogor

In my article on the genus *Chydenanthus* Miers in *Reinwardtia* 10 (1): 28, 1982, I stated that "the genus, like *Barringtonia* and *Abdulmajidia*, has one-seeded fruit". This statement is partially wrong. *Abdulmajidia* fruit has 2-5 seeds, the main reason that the genus was established (Kochumen *in Hit.* 18 March 1983; Whitmore *in Kew Bull.* 29 (1): 207-211. 1974). The type of seed germination of the three genera is, however, similar. I should like to thank Mr. K.M. Kochumen of the Forest Research Institute, Kepong, Malaysia, for drawing my attention to the above error.
