Shilelagh Contest to Rid Snakes for St. Pat

Legend tells us that St. Patrick once drove all the snakes from Ireland; therefore, prior to his annual visit, we are compelled to rid our town of snakes. This is accomplished by means of shilelaghs. Each year about a week before the celebration, certain members of our student body hunt

the woods for tree limbs, or what have you, paint them so they are not too repulsive, and proceed to chase the snakes from Rolla.

This year every Miner is to carry a small shilelagh to make an all out effort to make this the best St. Pats in the history of our alma mater.

The Blue Key Fraternity once again is proud to announce its annual Shilelagh Contest. Each organization is to enter their finest Shilelagh which should be the size of a walking stick and will be judged on the basis of originality and novelty. There will be three prizes: First prize will be a ticket for Friday and Saturday night of St. Pats, second prize is a ticket for the dance Saturday night and third prize will be a ticket for the dance Friday night.

The judging will take place at 2:00 p. m., Friday, March 16th, at the Lions Park so all Snake Beaters should start working on their shilelagh to be entered in the contest.

RICH SWANSON

Blue Key Names Man-of-Month

This month the Blue Key Fraternity has selected Richard Swanson as man of the month. Rich was chosen because of his outstanding record in a wide variety of campus activities.

As a member of Sigma Pi Fraternity, Rich has been quite active, serving as President and

RICH SWANSON

Treasurer. He has represented Sigma Pi in the Student Council for two years and has participated in intramurals.

Rich is a Chemical Engineering major and it was natural that he should be a leader in AICHE, the chemical engineering society. As President, Vice President, and Treasurer of the organization Rich has been instrumental in making AICHE an active organization.

In addition to these activities Rich has made an excellent scholastic record. He has maintained a 3.0 plus average and this fall was initiated into Tau Beta Pi.

Ramsey Lewis' Trio to Appear Here March 14

The Ramsey Lewis Trio has built up a solid following in Chicago and other Midwestern cities over the past two years via records (Argo) and personal appearances; it has both a sound and a

The Miner Sets New Pay Scale for Writers

As a result of new and more efficient methods of presenting the weekly school newspaper, a new line rate has been set for the spring semester. Line rate is the rate of pay for one inch of one column of printed newsmatter. The new rate is forty cents per column inch. The Miner is presently a five column, fifteen inch, newspaper averaging eight to ten pages weekly. This rate is also a result of excellent advertising sales and presentation.

vice local board for an application and a bulletin of information.

Following instructions in the bulletin, the student should fill out his application and mail it immediately in the envelope provided to SELECTIVE SERVICE EXAMINING SECTION, Educational Testing Service, P. O. Box 586, Princeton, New Jersey. Applications for the April 17 test must be postmarked no later than midnight, March 27, 1962.

According to Educational Testing Service, which prepares and administers the College Qualification Test for the Selective Service System, it will be greatly to the student's advantage to file his application at once. Test results will be reported to the student's Selective Service local board of jurisdiction for use in considering his deferment as a student.

MISSOURI SCHOOL OF MINES AND METALLURGY

VOLUME 48

FRIDAY, MARCH 2, 1962

NUMBER 19

Dr. Donald J. Siehr Directs Instruction in Biochemistry

Dr. Donald J. Siehr, Associate Professor of Biochemistry at the Missouri School of Mines and Metallurgy, is directing instruction on the Doctoral level in the field of Engineering Biochemistry. Work in this field is being offered at the Missouri School of Mines under the National Defense Education Act of 1958, and studies available at present include General Biochemistry, Industrial Biochemistry, Enzymology, Intermediate Metabolism and Biosynthesis, and Advanced Biochemical Techniques.

Engineering Biochemistry (and particularly Industrial Microbiology) is assuming a new and expanded importance in society and an ever increasing need is being felt for specialists in the field both as teachers and in industries. Engineering Biochemistry programs, of the type now offered at the Missouri School of Mines and Metallurgy, are limited throughout the nation. This field applies

to everyday life through its concern with complex chemicals. Complex chemicals include, in one aspect, the products of fermentation—such as antibiotics including penicillin, fine chemicals such as citric acid, an important component

of the field of Engineering Biochemistry are treatment of industrial wastes to preserve the nations water supply, and development of biological warfare agents.

Dr. Siehr, who directs this program within the Missouri School of Mines and Metallurgy's Department of Chemistry and Chemical Engineering, received his training at the University of Wisconsin, receiving his B. S. Degree in Chemistry in 1951, his M. S. Degree in Biochemistry in 1955 and his Ph. D. in 1957. While serving in the U. S. Army in 1952-1953 he worked as a research assistant in the biophysical research areas at the Army Chemical Center, Edgewood, Maryland. From 1957 through August 1961 he was a Research Biochemist at Abbott Laboratories, North Chicago, Illinois. In September 1961 he began to develop the Engineering Biochemistry program at the Missouri School of Mines and Metallurgy. He is a member of the Society of Sigma Xi, the American Chemical Society, the Biochemical Society and the American Association for the Advancement of Science.

Spring Semester Enrollment Shows Total of 2996

The enrollment statistics for the 1961-62 spring semester at MSM reveal a total of 2996 men in attendance. Six hundred and fifty six men are enrolled in the Electrical Engineering curriculum. The Mechanical Engineering Department is second in number, boasting of a total of 608 men in their curriculum. The Civil Engineering Department is third in size with 582 men.

The following chart is a schematic breakdown of the number of freshmen, sophomore, junior, senior, and graduate students enrolled in each curriculum:

Curriculum	Fr.	So.	Jr.	Sr.	Grad.	Total
MINING ENGR. (Ia-Ib)	14	15	37	22	19	107
Ia Mining	10	7	22	9	15	63
Ib Petroleum	4	8	15	13	4	44
METAL. ENGR. (II-IIb)	51	71	86	47	26	281

Miner Editorial

America is being suffocated by Americans. The threat is communism, but the tools and workers are American, loyal Americans. We are so quick to cry-out when we are being deprived of our rights but we are so insensitive to the fact that our insensitivity is making it easy for subversive elements to infiltrate the American scene and lay it open for conquest.

The Student Union and Alpha Phi Omega are jointly sponsoring a series of films and lectures on the communist threat. They realize that to fight an enemy as well organized and wide spread as communism the people must be educated as to its workings and principles. The machinery of the party is being laid open to our inspection so that we may look upon it and not be fooled by its promises and hoaxes. While in the air there hangs the thought that we may be too late in the realization, still ninety per cent of the campus is un-informed and doesn't bother to take the time to come to these programs.

The "I don't care" and "It can't happen to me" are the attitudes that the communists anticipate and want. How easy it is to conquer a country that won't even fight back. While we are sitting at home, the Reds have gobbled-up one billion people. This is almost half of the world's population. This monumental task has only taken half a century, and every day the rate at which the world "goes down" increases appallingly. The communists have a very simple plan: The first step is to conquer all the free world except the United States. The second step is to walk in and accept the surrounded and isolated America.

Those who have followed the series of films thus far realize the diabolical scheme that the communists are working. The Reds are not bashful about telling us about their plans for they are counting on the traditional American apathy to deliver us into their hands. They have been so bold as to give 1973 as the date they expect to have taken over. In 1973 the average Miner will be in his early thirties. That's awfully young to become a slave. There has also been published a time schedule of objectives that the communists will conquer and the year they will do it. So far they are ahead of schedule. They intend to take Australia in the next seven years. Grim thought, isn't it?

The primary target of the communists is the college student. He is out to make a name for himself, to right the world. The party sounds good in its lies, and then he is duped into being one of the pawns that they move around the board spreading confusion and communist doctrines. The only weapon is knowledge of the tactics that these people will use to con students into their power. The communist lies are easy to see through if one knows what to look for. To combat communism at Missouri School of Mines is the purpose of this film lecture series. There are subversive factions even on this campus. This brings out the urgent need for more people to attend these films. Let's get them before they get us.

Fighting communism has become the moral duty of every loyal American. There is no excuse to fail in this obligation for its cost will be the relinquishment of our freedom. Let's start the fight now, Friday at seven-thirty in the Student Union ballroom. Lets see what this enemy really is.

Letters to the Editor

I was very shocked by a letter in last week Miner by Mr. William Colantuano concerning the presentation of "Operation Abolition" by APO and the student council. While I respect Mr. Colantuano's opinions on other subjects which have been printed in previous issues of the Miner, I feel that his latest article is an absurd collection of prejudiced viewpoints and completely false statements.

In the first sentence it is stated that "Operation Abolition" has been "admonished by reputable Christian (Catholic and Protestant) organizations." I question the use of the word "reputable," and I think the reader should also know that the film is part of a series distributed by the Cardinal Mindszenty Foundation, a Catholic organization dedicated to exposing the dangers of communism.

In the latter part of his article, Mr. Colantuano says, "I am sure that a third party could take the

film and prove that HUAC (House UnAmerican Activities Committee) was in cahoots with the communists." This is the most ridiculous statement of the entire article. The greatest objection to the film has been that the house committee was a bit too strong in their accusations against suspected communists. I fail to see how someone who has been accused of being too diligent in his campaign against an enemy can also be charged with being in cahoots with the enemy.

As a substitute for "Operation Abolition" Mr. Colantuano offers "Operation Correction." I think that the readers should know that "Operation Abolition" is still supported by the HUAC and the FBI and that "Operation Correction" was produced by the American Civil Liberties Union, an organization that has been denounced as being a communist front.

Sincerely,
David Hemmel

In a heroic effort to keep thin and young, a lot of beautiful ladies are in a state of exhaustion.

In a well-run household what isn't said is often thought and could not be printed in this paper.

Letters to the Editor

Thomas Jefferson said, in his First Inaugural Address, that "the minority possess their equal rights, which equal laws must protect, and to violate would be oppression." For three years I have been a student on this campus, contributing to the General Lectures Fund. To date I have found none of the programs paid from this fund of interest to me, and I have found a surprising number of other students who feel likewise. We, therefore, represent a minority whose interests are seemingly ignored.

We would be interested in hearing something other than so-called "popular" programs. We realize that it is not possible to hire a symphony orchestra, or any group

of artists, but once or twice a year some outstanding solo artist could be presented on these programs—some pianist, violinist, or vocalist. We believe a school should help to develop some culture among its students instead of catering to undeveloped tastes. Anyone knows that all taste is developed.

We also feel that it should be the responsibility of a school to stimulate interest in students when a program of quality is presented instead of depending upon the turnout of students capable of enjoying good music.

We hope that we, the minority may have our interests recognized in the future, and that our contributions will not be "charity" for the uncultured masses.

"Service Is Our Business"

Learning never stops for engineers at Western Electric

There's no place at Western Electric for engineers who feel that college diplomas signify the end of their education. However, if a man can meet our quality standards and feels that he is really just beginning to learn... and if he is ready to launch his career where learning is an important part of the job and where graduate-level training on and off the job is encouraged—we want and need him.

At Western Electric, in addition to the normal learning-while-doing, engineers are encouraged to move ahead in their fields by several types of educational programs. Western maintains its own full-time graduate engineering training program, seven formal management courses, and a tuition refund plan for out-of-hours college study.

This learning atmosphere is just one reason why a career at Western Electric is so stimulating. Of equal importance, however, is the nature of the work we do. Our new engineers are taking part in projects that implement the whole art of modern telephony, from high-speed sound transmission and solar cells to electronic telephone offices and computer-controlled production techniques.

Should you join us now, you will be coming

to Western Electric at one of the best times in the company's history. In the management area alone, several thousand supervisory jobs are expected to open up to W.E. people within the next 10 years. And our work of building communications equipment and systems becomes increasingly challenging and important as the communications needs of our nation and the world continue to increase.

Challenging opportunities exist now at Western Electric for electrical, mechanical, industrial, and chemical engineers, as well as physical science, liberal arts, and business majors. All qualified applicants will receive careful consideration for employment without regard to race, creed, color or national origin. For more information about Western Electric, write College Relations, Western Electric Company, Room 6206, 222 Broadway, New York 38, New York. And be sure to arrange for a Western Electric interview when our college representatives visit your campus.

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J. Teletype Corporation, Skokie, Ill., and Little Rock, Ark. Also Western Electric distribution centers in 33 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.

(Author of "Rally Round The Flag, Boys", "The Many Loves of Dobie Gillis", etc.)

THE MANY LOVES OF THORWALD DOCKSTADER

When Thorwald Dockstader—sophomore, epicure, and sportsman—first took up smoking, he did not simply choose the first brand of cigarettes that came to hand. He did what any sophomore, epicure, and sportsman would do: he sampled several brands until he found the very best—a mild, rich, flavorful smoke—an endless source of comfort and satisfaction—a smoke that never palled, never failed to please—a smoke that age could not wither nor custom stale—a filter cigarette with an unfiltered taste—Marlboro, of course!

Similarly, when Thorwald took up girls, he did not simply select the first one who came along. He sampled. First he dated an English literature major named Elizabeth Barrett Schwartz, a wisp of a girl with large, luminous eyes and a soul that shimmered with a pale, unearthly beauty. Trippingly, trippingly, she walked with Thorwald upon the beach and sat with him behind a windward dune and listened to a conch shell and sighed sweetly and took out a little gold pencil and a little morocco notebook and wrote a little poem:

*I will lie upon the shore,
I will be a dreamer,
I will feel the sea once more,
Pounding on my femur.*

Thorwald's second date was with a physical education major

He did not simply select the first one who came along...

named Peaches Glendower, a broth of a girl with a ready smile and a size 18 neck. She took Thorwald down to the cinder track where they did 100 laps to open the pores. Then they played four games of squash, six sets of tennis, 36 holes of golf, nine innings of one o'cat, six chukkers of lacrosse, and a mile and a quarter of leapfrog. Then they went ten rounds with eight ounce gloves and had heaping bowls of whey and exchanged a firm handshake and went home to their respective whirlpool baths.

Thorwald's final date was with a golden-haired, creamy-browed, green-eyed, red-lipped, full-calved girl named Totsi Sigafoos. Totsi was not majoring in anything. As she often said, "Gee whillikers, what's college for anyhow—to fill your head full of icky old facts, or to discover the shining essence that is YOU?"

Totsi started the evening with Thorwald at a luxurious restaurant where she consumed her own weight in Cornish rock hen. From there they went to a deluxe movie palace where Totsi had popcorn with butter. Then she had a bag of chocolate covered raisins—also with butter. Then they went to a costly ballroom and did the Twist till dawn, tipping the band every eight bars. Then they went to a Chinese restaurant where Totsi, unable to translate the menu, solved her problem by ordering one of everything. Then Thorwald took her to the women's dorm, boosted her in the window, and went downtown to wait for the employment office to open.

While waiting, Thorwald thought over all of his girls and came to a sensible decision. "I think," he said to himself, "that I will stick with Marlboros. I am not rich enough for girls."

© 1962 Max Shulman

* * *

Marlboro, however, is rich enough for anybody. It takes mighty good makin's to give you unfiltered taste in a filter cigarette. That's the flavor you get in the famous Marlboro recipe from Richmond, Virginia. You get a lot to like.

Last semester the sixteen social fraternities at MSM pledged approximately 313 men. Out of that number 159 or 51% have been or will be initiated shortly. Sigma Nu, Kappa Sigma, Kappa Alpha, and Lambda Chi Alpha led the way, initiating the most men.

Here is a rundown of the new men pledged this semester:

ACACIA: Glenn Vaughn, Jerry Kallor.

BETA SIGMA PSI: Jerry Hutchinson, Jerry Teson, Ron Hampel.

DELTA SIGMA PHI: Tom Leslie, Bob Bray, Jim Fletcher, Bill Kruse.

KAPPA ALPHA: Tom Mack, Terry Tesson, Pete Johnson.

KAPPA SIGMA: Martin Howard, Jim Dycus, Jimmy Murrell, Alex Ocsody, and Bob Kadwell.

LAMBDA CHI ALPHA: Larry Boberschmidt, Gene Branson, Howell Brannum, Charles Busenhart, Dennis Brauer, Ed Wieland.

PHI ALPHA: Roger Hudson, David Neale, Bob Porterfield.

PHI KAPPA THETA: Charles DiFiglia, Terry Wenger, Jerry Arnold.

PI KAPPA ALPHA: Kent Ball.

SIGMA NU: Art Handshy, Gary Shippy, Walt Pate, Bob Wheeler, Robert Ronzo, Bill Faulke.

SIGMA PHI EPSILON: Mike Fahrni, Jim Korbelik, Mike Sharp, Mike Maher.

SIGMA PI: Robert Hall, Robert Myrick, Al Hulett, Roger Ubaudi.

SIGMA TAU GAMMA: Jim Ragland, Larry West, Darrel Lukroca, Keith Wagner.

TAU KAPPA EPSILON: Jerry Triplett, Harb Henry, Howard McCormick, Richard Otto, Bob Rice, Don Williams.

THETA XI: Lawrence H. Ellett, Robert Ryser.

Delta Sigma Psi To Hold Initiation

Last weekend Beta Sigma Psi and Lambda Chi Alpha had Valentine's Day parties. Over the weekend the Beta Sigs started a new tradition by picking a house sweetheart from among the dates that were pinned to members. Diane Maron was selected to be the first Beta Sigma Psi Sweetheart.

Lambda Chi is preparing a trip to Oklahoma City for its basketball team. A tournament among all the Lambda Chi chapters in this region is planned.

Two Piker alumni, Dick Moeller and Rolly Johnson, visited their fraternity brothers here in Rolla over the weekend. Beta Sigma Psi was given a new high-fidelity phonograph speaker by its pledges.

Delta Sigma Phi has announced that it plans to hold its initiation over the weekend of March third.

My fortune, good or bad, has been to live with women who ate sparingly because of excess weight whereas I can eat anything I please without gaining an ounce.

Provided he's solvent, a wife never lets her husband forget that her clothes are rags.

Back of ninety-nine out of one hundred assertions that a thing cannot be done is nothing but the unwillingness to do it.

During the latter part of September, the fraternities on campus agreed through the IFC to send a pledge representative from each fraternity to Kappa Alpha for a small but important meeting. This meeting was concerned with the forming of a Pledge Interfraternity Council. The pledge representatives and Mr. Karl Moulder, IFC counselor, agreed unanimously that the PIFC was needed and wanted at MSM.

The PIFC was then formed. From then on it was up to these representatives of the fall pledges of 1961 to form and consolidate the pledge classes into a closer and stronger union.

The PIFC's first major project was to write a constitution to be presented to the Student Council. A constitution committee was formed and work was started. A few more projects were mentioned but it was soon evident that the business of writing a constitution to satisfy all the fraternities, the council carrying over from one pledge class to another, the electing of officers etc . . . was to prove quite a task.

Near the end of the semester, following previous attempts by the constitution committee to get the PIFC constitution voted in by all the fraternities, a constitution was finally agreed upon by the representatives. This constitution will soon be before the Student Council for approval.

Some of the more important articles that were agreed upon by the PIFC concerning the constitution were its name, the Pledge Interfraternity Council, and its motto, to promote the Greek system through a more united pledge body. Internal organization will be much the same as the IFC, but the electing of officers will differ.

At the beginning of each semester, the meetings will be presided by the last semester president for a period of three regular meetings. Then the retiring president will turn his job over to a rotating chairmanship among the representatives. Chairmanship shall be designated to the representative at whose house the meeting will take place. A secretary shall be appointed early in the semester. At the last meeting of the semester, a president shall be elected by the council to finish all unfinished business and to preside at the incoming council for the first three regular meetings.

At the end of the first semester of '61, the election of the president was held and, Craig Dunn of Sigma Phi Epsilon was elected. Joe Waldron of Acacia was the previously appointed secretary.

The PIFC is now working in conjunction with the IFC for the betterment of the Greek system at MSM.

Personality Column

Miss Barb Chamberlain was pinned to Jim Stark of Triangle.

Paul Becher of Sigma Pi pinned Miss Shirley Scott this past week.

In our old age the ideal of my generation would be to keep the old job, at full pay, with shorter hours, fewer responsibilities, longer vacations, and sick leaves extended.

The grade point standings were released this past week and showed the all-men's average to be 2.29. Topping all organizations, dormitories, and other groupings on campus this past semester, was the Lambda Chi Alpha fraternity. Their grade point average was a 2.54. Eighty-six members and pledges comprise this organization. They took a total of 1,532 credit hours and accumulated 3,895 grade points. Congratulations to Lambda Chi Alpha on their fine showing.

Following Lambda Chi in the top ten were the seniors, dormitory house number five, dormitory house number four, the women, dormitory house D, unclassified students, Sigma Tau Gamma, Kappa Alpha, and Beta Sigma Psi.

The list of fraternity grade points, calculated from members and pledges, was also released. Lambda Chi Alpha was first, in second place Sigma Tau Gamma, Kappa Alpha a very close third, with Delta Sigma Phi and Tau Kappa Epsilon in the fourth and fifth spots respectively.

Rankings of fraternities, using just the grades of the members, has also been made public. Lambda Chi again headed the list with a 2.61. The remaining four of the top five and the grade points are as follows:

- (1) Tau Kappa Epsilon .. 2.45
- (2) Acacia 2.43
- (3) Sigma Tau Gamma .. 2.40
- (4) Kappa Alpha 2.38

In respect to the fraternities' future, the pledges showed a promising outlook for the majority of the fraternities. The individual fraternities standings were quite changed in this list. Kappa Sigma's pledge class was tops with a 2.59 grade point. Following them were Sigma Tau Gamma, Kappa Alpha, Sigma Pi, and Lambda Chi Alpha. It is very evident that pledges' grades are very important to the fraternity system. In many cases their grades have made position differences in the standing of their fraternity on campus.

Students: From Youth to Age 84

(ACP)—UCLA may have both the oldest and youngest students in the country on its campus.

Lance Kerr, a 12-year-old physics major, began a regular schedule of classes this fall, says the DAILY BRUIN. He is exempt from ROTC, however, since he's four years shy of the minimum age.

Enrolled as a junior is 84-year-old Fred Kitt. A professional inventor and retired employee of the Los Angeles Department of Water and Power, he says: "I plan to spend the rest of my life at the University."

Lance, who commutes to the campus from Sun Valley, finished elementary school in "about one year." He continued his rapid pace through junior high and high school.

This semester he is studying trigonometry, algebra, English, psychology and Russian.

Kit, an English major, has returned to UCLA after an absence of 37 years. He plans to use a current course in critical writing to help him in editing his manuscript of a book on religious doctrines and dogmas.

MSM ROTC Concert Band and Lindenwood College Choralaires

Shown above are the MSM ROTC Concert Band and Lindenwood College Choralaires in concert in the Student Union Ballroom on February 15th. An estimated 750 persons attended this concert, with more than 200 standing. On the following day the band performed to more than 6000 high school students at schools in Labanon, Marshfield and Springfield. This was sponsored by the Student Council. This is the third concert tour of this nature made by the band since Mr. Oakley has been director. A concert tour to the St. Louis area is planned in April.

The Ramsey Lewis Trio

(Continued From Page 1)

flavor, somewhat in the Ahmad Jamal-Modern Jazz Quartet tradition. But it is not as sparse as the Jamal group nor as esoteric at the MJQ. Instead, the Lewis threesome strike a middle ground of easy, listenable music, sparked by the piano lead of Lewis himself, and hefty assists from bassist El Dee Young and drummer Red Holt. Funky or wingy, ro-

mantic or bright, the combo can handle any type of tune, and the music they play is as easy to take for a jazz-oriented audience as for the musical but-not-so-hip club-goer. The trio turns out a lovely performance on "My Ship," a down-home reading of "When the Spirit Moves You," a neat swingy "Bye Bye Blackbird," and stylish performance on "Anything Goes."

DON'T FORGET

SHILELAGH

WEEK

ESPECIALLY FRESHMEN!

Prospector's Club Elects Officers

The Prospector's Club held its regular monthly meeting on February 22 with the following new officers being elected: Milt Murry was voted in as Secretary-Treasurer for the following year, and Bill Kaufman was chosen to be the new Sergeant-At-Arms.

"Volunteers" were chosen from the Club membership to aid in the building of the GDI St. Pat's float now under construction.

Communism Lecture To Be in Parker Hall

Tonight at 7:30 an Anti-Communism speech will be given. Professor of Government at SIU, Kurt Glaser will lecture in the Student Union Ballroom and will answer any questions and discuss any problems connected with communism in the U. S.

As Professor Glaser is well qualified, the presentation will be very interesting. Be sure to attend.

The BSU Is Being Remodeled

If you have passed the Baptist Student Center lately and wondered about the falling bricks, billowing dust, and coughing and sneezing students; you can stop wondering. The BSU is being remodeled because of a slanted floor in the ping pong room, bricks falling out of the chimney, and the kitchen slowly sinking.

Some people can read a 500-page novel in a couple of hours and when they are through, they can't tell you the author, the title of the book, or the name of any character in the book.

NEW Mennen SPRAY DEODORANT FOR MEN

* NEW FINE MIST BOTTLE. SQUEEZE QUICKLY AND RELEASE.

A man with Alopecia Universalis* doesn't need this deodorant

He could use a woman's roll-on with impunity. Mennen Spray was made for the man who wants a deodorant he knows will get through to the skin . . . where perspiration starts.

Mennen Spray Deodorant does just that. It gets through to the skin. And it works. All day. More men use Mennen Spray than any other deodorant. Have you tried it yet? **64¢ and \$1.00 plus tax**

*Complete lack of body hair, including that of the scalp, legs, armpits, face, etc.

Cardinal Newman Week to Begin

Catholic students in secular colleges and universities all over the nation are joining together in celebrating Cardinal Newman Week beginning February 25 through March 4.

John Henry Newman first started planning an organization for Catholic students when he realized the needs of the Catholics at Oxford University in the 19th century. Although his idea did not materialize at Oxford, his concept has taken hold in the form of Newman organizations and centers throughout the country.

The theme of the week's observance is "Cardinal Newman in the World Today." At the MSM Newman Club meeting on March 1, members were treated to an interesting talk on the "History of Newmanism and Newmanism Itself," by Monsignor Gerald Kaiser. This Sunday, March 4, the Club is sponsoring a Communion breakfast after the ten o'clock Mass as part of the recognition to the patronage of Cardinal Newman.

Participation in these Newman activities gives all Newmanites an opportunity to rediscover the object of Newmanism and the purpose of its organization.

Miners Place Second in National Student Union Bowling Tournament

On Saturday, February 17, a Student Union Bowling Tournament sponsored by the national association of student unions was held in the Memorial Union on the campus of the University of Nebraska, Lincoln, Nebraska. This Region VIII tournament competed MSM and thirteen other colleges against each other. The representatives from MSM were Alan Shaffer, John Parks, Tom Ferguson, Jerry Britton and George Van Horne. These men placed second in the team event, losing first place to Missouri University by a total of only four pins. Their team total was 2818 scratch.

From these fourteen teams, including Missouri School of Mines, Missouri University, Iowa University, Iowa State, Kansas University, Kansas State, Nebraska University, and Omaha University, will come the top five all-event winners, who will compete

where many contributions were received.

The committee that made this drive run so smoothly was headed by Barry Hayden, who worked in coordination with Mrs. Joan Ebersmeyer, district chairman of Philips County. Other members of the committee were Tom Cowser, in charge of the business district; Bob Bakula, in charge of publicity; Creig Dunn, treasurer; Don Whitlock, in charge of the coin collectors; Jay Tibbles, in charge of special events; and Mike Sharp and Jim Korglic, who were in charge of special gifts.

Sig Ep was more than glad to take over the Heart Fund drive as do all other Sig Ep Chapters across the United States.

Sigma Phi Epsilon Runs Local United Heart Fund Drive

This year during the month of February, the Missouri Gamma Chapter of Sigma Phi Epsilon handled the annual United Heart Fund drive. In the past Sig Ep has just participated in the canvassing of the business district of Rolla. This year Sig Ep ran the entire drive from beginning to end.

The drive was started at the beginning of the month with the distribution of coin collectors in all of the main business of Rolla. The next event to follow was the contacting of many local citizens and asking them to collect from door to door during Heart Sunday, February 25, 1962. The third and final operation was the canvassing of the business district

A Man's Lot Is a Tough One

Who gets the short end of the stick when it comes to dates?

The man, of course, says Del Faddis, writing in the DAILY UNIVERSE, Brigham Young University.

Just consider this ritual he describes:

"Man usually makes a few preparations before going out on a date.

"One of these is a process in which he cuts away the hair growing out of his face. He then applies a solution to his face. This solution keeps his face from getting sore — if he hasn't already cut it. The main purpose for using this solution, however, is the pleasing odor it has.

"After all preparations have been made and he is dressed in what is considered the latest style,

he drives all the way across town to pick up his date, when it would be much easier to meet her at some convenient midpoint.

"He has to find a parking place and go to the door to get her. (This way if it's raining they both get wet.)

"He waits while she finishes dressing, he helps her on with her coat, he helps her across the street, and he helps her into the car. All this he does as though she weren't able to do it for herself.

"They then drive back downtown (what a waste of gas and tire tread). They stop at the theater where the fellow stops the car, gets out, runs around to the girl's side to open the door, helps the girl out of the car, finds a spot for her to wait while he runs

MSM Band Director Is Guest Conductor

David L. Oakley, Director of the MSM-ROTC Bands was guest conductor and clinician for one of three South Central Missouri Junior High Clinic Bands on March 24th. The all-day and evening clinic consisted of 350 junior high area musicians divided into three bands. Rehearsals throughout the day were climaxed by a concert held at Rolla High School in the evening. This is the second year that Mr. Oakley has been asked to conduct this group. He will also serve as adjudicator for the district school band, solo, and ensemble festival, and state level concert band festival, to be held in April.

back to the car, drives it to a parking place and then runs back to the theater.

"He then stands in line to buy the tickets when she could have been doing that while she was waiting. He pays for both of them.

"Once in the theater lobby he buys her some refreshments, leads her to a seat and helps her off with her coat.

"After the movie he walks back to get the car, and then drives back to his date where he gets out and helps her get in the car. It is customary that he ask her if she would care for something to eat and if she says yes, the same courtesies are extended at the restaurant as at the theater.

"After they have eaten and he has paid the check, he usually drives her straight home. When they get to the door of her home, he takes her key and struggles to open the door for her.

"He then turns to her and asks if he may have the privilege of doing it again sometime.

"Ah yes, it's a man's world."

SPACE, MISSILE & JET PROJECTS AT DOUGLAS

have created outstanding career opportunities for

SCIENTISTS and ENGINEERS

B.S. degrees or better

Assignments include the following areas:

Servo-Mechanisms—relating to all types of control problems

Electronic Systems—relating to all types of guidance, detection, control and communications

Propulsion—relating to fluid-mechanics, thermodynamics, dynamics, internal aerodynamics

Environmental—relating to air conditioning, pressurization and oxygen systems

Human Factors—analysis of environment affecting pilot and space crews, design of cockpit consoles, instrument panels and pilot equipment

Heat Transfer—relating to missile and space vehicle structures

Structures—relating to cyclic loads, temperature effects, and the investigation of new materials, methods, products, etc.

Aerodynamics—relating to wind tunnel, research, stability and control

Solid State Physics—relating to metal surfaces and fatigue

Space vehicle and weapon system studies—of all types, involving a vast range of scientific and engineering skills

Larry Twidwell Gets Fellowship

A fellowship in the Department of Metallurgical Engineering of the Missouri School of Mines has been recently established by the Electrothermic Zinc Division of the St. Joseph Lead Company. The holder of the fellowship is Larry G. Twidwell, who received his B. S. degree in Metallurgical Engineering from the Missouri School of Mines and Metallurgy in 1961. He is the son of Mr. and Mrs. W. L. Twidwell of Farmington, Missouri. He attended Flat River Junior College one year before transferring to the Missouri School of Mines and Metallurgy.

In the summer of 1960 and again in 1961, Twidwell worked for the St. Joseph Lead Company in their research department. At the Missouri School of Mines and Metallurgy he is a member of the American Institute of Mining, Metallurgical and Petroleum Engineers, the American Society for Metals, Alpha Sigma Mu, Tau Beta Pi and Phi Kappa Phi.

As a subject for his Master of Science research, Twidwell is studying the influence of certain oxides and sulfides on the decomposition rate of zinc sulfate. His research is being directed by Dr. A. H. Larsen, metallurgy professor.

MSM to Provide Training Program

The Missouri School of Mines and Metallurgy will for the fourth time provide a Summer Science Training Program for high school students of exceptional ability. The program, under the direction of professor of mechanical engineering Charles R. Remington, Jr., is supported by a \$12,500 grant from the National Science Foundation and will run from June 10 through July 27th. The program will include about 36 high school students who will be introduced to the various phases of engineering during the 7 week session. Selected on the basis of ability, these students will be placed in contact with teachers and scientists recognized in their field through lectures, demonstrations, conferences and field trips. The overall program will show the student the many phases of science or engineering as a profession and the student will be advised how he may better prepare himself in his pre-college studies. Included in the program will be physical fitness training.

MSM also offers Summer Institutes for High School Mathematics and Science Teachers under a grant from the National Science Foundation.

LITTLE MAN ON CAMPUS

"IN SPITE OF SCORING NEW LOWS ON OUR ENTRANCE EXAMS, MISS LACY, WE BELIEVE THAT BY APPLYING YOURSELF YOU COULD TAKE ADVANTAGE OF US HERE IN COLLEGE."

I continue to look at the clock to see what the time is; now I also look in the newspaper to be sure what day it is.

Unsolicited advice is obnoxious.

None of us improves his well-being by harboring resentments.

Career Cues:

"Whatever your major, make sure to include a course in 'people'!"

W. Emlen Roosevelt, President
National State Bank, Elizabeth, N. J.

"If my college adviser had prophesied that studying psychology would some day help promote my career in banking, I'd have scoffed. Yet that is exactly what has happened. And when I think about it now the reason seems obvious. The facts and figures of banking, or of any other field, are mechanical devices. They take on real meaning

only when related to people.

"Good psychology is also the basis of all teamwork. And, since most of today's business and scientific problems are too complicated for 'one man' solutions, teamwork is essential. If you want to be a valuable team player, and a likely candidate for captain, be the person who understands people. Learn what it takes for people to work together in harmony. Learn how to win trust and confidence. Learn basic human psychology.

"Bear this in mind, too. World tension, community tension, business tension, even family tension are the facts of everyday life. The more you know of human behavior, the better prepared you will be to deal with these problems.

"So, if you have the chance, take a course devoted to 'people.' Your class adviser can probably help you fit a psychology elective into your schedule. I don't think you'll regret it... I know I didn't."

W. Emlen Roosevelt first became a bank president while still in his early thirties. Today he heads still another bank and is a leader in New Jersey financial circles. Em's been a CAMEL fan ever since his undergraduate days at Princeton.

Cape Tops the Miner 95-91 In Overtime After 85-85 Tie

By John Cannaday

Saturday, February 24, the Miners were host to Cape Girardeau, one of the oldest rivals, here at Jackling Gym. The gym was filled and overflowing with Miners who had arrived to watch the game. This game was the last basketball game of the 1961-62 season, and it was plain to see that the Miners were out to win it.

During the first half the Miners were ahead in points only a couple of times while the Cape team led them the rest of the time. Then just before half-time Cape increased the margin, and the half-time score was 47 to 34 in favor of Cape.

In the second half Cape stayed ahead by a 10 to 13 point lead until the last five minutes of the game. The Miners with new spirit began closing the gap until the score was finally tied. Each team

then began trying to get those extra points that would mean the game. But time ran out, the score tied 85-85.

A five minute overtime was called to break the tie. This five minutes showed some good ball handling and defensive measures. Two of the Miners top point men fouled out during this time compared to only one from Cape. This fouling gave Cape the top hand, and they continued to score and won the game 95 to 91.

Schuchman, Good, and Martin were the Miners high point men with 26, 18, and 16 points, respectively. Both Martin and Schuchman fouled out during the game, and the team had to continue playing with the loss of their two high scorers. This handicapped the team a great deal as was evidenced by their falling behind in those last valuable minutes.

Capes outstanding men were

Giessing, Read, and Ransen who scored 36, 24, and 20 points, respectively.

This game will be the last one for the seniors in the group which number five. These are: Jim Lemon, Larry Martin, Richard Ploeger, Ben Rozell, and Terry Wiegard. Next season we will see a rather green team with only three men with two or three years playing experience. As in the past you know from one season to the next how the team will go. Next season is bound to be different, but lets hope it's even better than this year's record.

Norm Schuchman Is Picked Athlete-of-Month

By John Brown

The M Club's selection as athlete of the month for December was Norman Schuchman, a fellow who is sure to be given careful consideration when the All-Conference basketball selections are made later this month. His all-around fine play was one of the

Junior College, he made the All-Conference squad two years in a row. More recently, playing in an MSM uniform, he was picked for the All-MIAA Tournament team in the annual holiday tournament.

NORM SCHUCHMAN

brighter spots in the recently completed basketball season. Norm set two all-time records this year, his 439 points and 287 rebounds being the highest totals ever for an MSM cager. Although a small man as college centers go — Norm weighs 200 pounds and is 6' 2½" tall — he is tough under the basket and hard to stop from his pivot position. Very maneuverable, he gets his close shots over men six or seven inches taller, yet has one of the best outside shots on the team.

Honors have been coming Norm's way since his school days at Centralia Township High School in Illinois, where he was twice selected to the All-State basketball team, while earning letters in football, basketball, and track. After entering Centralia

MSM Wins Two From SMS and Kansas State

The MSM Rifle team defeated Pittsburg State College of Kansas and Southwest Missouri State College of Springfield, Missouri, Saturday in a three-way shoulder to shoulder match held at Rolla, at the MSM range. Out of a possible 1500 points for each of the competitors, the MSM team scored 1387, Pittsburg State College 1369 and Southwest Missouri State fired 1334.

The high man for the match was Moorehead of Pittsburg State with 289 points out of a possible 300 points. High man for MSM was Fred Shaw with 280 points. Other MSM team members comprising MSM's top five scorers for

the match were Lonnie J. Blackwell, Carl Steib, Floyd Bingham, and David Elliott.

The MSM Rifle team is coached by Captains Robert Tawes and Robert Weeks of the Department of Military Science. The team has fired against many other schools in matches by mail as well as shoulder to shoulder matches. In the postal matches, the team has defeated the University of Idaho, Knox College, Westminster, North Carolina State, Alliance, Lincoln University, Marquette (twice), Wentworth and Washington University. The record for the team in postal matches is 10 wins and 10 losses.

November 10 — Warrensburg	here
*October 6 — Parent's Day	
*October 27 — Homecoming	

SIDELINES

by Chuck Leslie

Last Saturday the Miner's basketball team played their first game of the season and came very close to defeating the conference leaders as the game went into overtime.

The Miners in the Conference were unable to win a game but in the 21 games played this season they were able to pick up 7 wins to get 5th place in the overall standings.

Schuchman is without a doubt the star for the Miners in the conference. He now holds the school record for total number of points in a season with 439. He has also picked off 287 offensive rebounds which may be a record for a long time. This is not as yet classified as a school record because this is the first time that rebounds were counted. Although the official list of those nominated to the All-Conference has not been published, Norm Schuchman is sure to be among them.

Good, Lemon, and Martin also did very well this season and but Lemon will be eligible to play again next season.

Here is how the Conference standings looked at the end of the season:

Team	Won	Lost
Cape	9	1
Springfield	8	2
Warrensburg	7	3
Kirksville	5	5
Maryville	2	8
M. S. M.	0	10

Miners Lose to Warrensburg 78-91 as Martin Scores 21

By Jim Brown

Last Monday night the Miners took another beating on their own basketball court, this time, from the Warrensburg Mules. No one on the Miner squad had a particularly hot night, except possibly Martin, who scored 21 points. On the other hand, no one had a poor night either. It was just another one of those games in which the MSM opponent just ran up their score so high that our own squad could not keep up.

At half-time the Mules were

only 3 points ahead as the score read 34-37. The Central Missouri State team romped in the second half to score 54 more points and win the game by a final score of 78-91.

This leaves the Miners with only one remaining game in this dismal season. This one game is against Cape, who is in first place in the conference, and who, few feel, will lose to the last place team in the conference. Whether the Miners win or lose we know they gave their best to win as it is tough to put all that sweat into practices, just to continually walk off the court as the loser.

Not to succeed when you think you have talent must be gruesome to you and your relatives.
