Number 15

BIBLIOGRAPHY OF THE ECHINODERMS OF THE INDIAN OCEAN

By
D.B. James and R.S. Lal Mohan

September, 1969
CENTRAL MARINE FISHERIES RESEARCH INSTITUTE
Marine Fisheries P.O.
Mandapam Camp
Ramanathapuram District
India

THE BULLETIN OF THE CENTRAL MARINE FISHERIES
RESEARCH INSTITUTE IS PUBLISHED AT IRREGULAR
INTERVALS AS AND WHEN INFORMATION OF A GENERAL
NATURE BECOMES AVAILABLE FOR DISSEMINATION.

FOREWORD

Echinoderms from the point of view of their taxonomy and evolution form one of the most interesting groups of marine animals. Except for the R.I.M.S. "Investigator" collections reported on by various authors there has been no sustained work on this group in this country till detailed investigations were initiated recently by Mr. D.B. James of this Institute. In the course of extensive work carried out, he had taken considerable pains to collect a vast number of references to form a comprehensive bibliography which has been augmented with some of the references collected by Mr. R.S. Lal Mohan for Bulletin Nos. 4 and 11 issued by this Institute. There are in all 691 references listed in the present Bulletin covering all the classes of echinoderms and it is hoped that the availability of a consolidated bibliography like this would act as an incentive to interested workers to take up this group for study. The authors have done their best to make the list as comprehensive as possible. However, it would very much be appreciated if omissions and errors if any, are kindly brought to our notice.

I wish to express my sincere thanks and appreciation to Mr. D.B. James and Mr. R.S. Lal Mohan for all the pains and interest taken in the preparation of this bibliography. My thanks and appreciation are also due to other members of the staff of this Institute who have helped in various ways in the issue of this Bulletin.

S. JONES
