PREFACE

The scientific staff of the Central Marine Fisheries Research Institute have been engaged in research on various aspects of marine fisheries and oceanography since the establishment of the Institute in 1947. The results of research were published by them in various scientific papers incorporated in the Institute's publications like the *Indian Journal of Fisheries, Bulletins, Special Publications, Marine Fisheries Information Service, Annual Reports* and also in the *Journal of the Marine Biological Association of India* over the past 38 years. Papers have also been published in standard Indian and foreign journals and in the proceedings of the national and international Symposia and Seminars.

An attempt has been made in 1967 to compile a list of publications of the staff of the Institute yearwise in the Souvenir released by the Recreation Club of the Institute on the 20th year of establishment of the Institute. The scientific output of the Institute has greatly increased in recent years and the papers resulting out of the research efforts have also been wide spread in different journals. However, no further attempt has again been made to bring together all the publications of the scientific staff of the Institute at one place. Such an endeavour, it is felt, would not only reflect the entire work of the Institute, but also facilitates easy reference to the work of the Institute making it a valuable source of reference for the scientific community engaged in marine sciences research.

Therefore, in the present publication entitled '**Bibliography: the publications by the staff of Central Marine Fisheries Research Institute 1948-1985**', all papers published by the staff from the year 1948 to 1985 have been compiled yearwise and authorwise in alphabetical order. In doing so, care has been taken to include as many publications as possible. But there can still be some omissions. It should be possible to include such references at a later date when the Bibliography may be updated. It is earnestly hoped that this comprehensive volume of references would serve a very useful purpose for the scientific community within this country and abroad.

In this connection, I have great pleasure to record my sincere appreciation of the efforts put in by Dr. K. Rengarajan, Scientist S 2, Miss. Jancy Jacob, Scientist S I and Shri V. Edwin Joseph, Senior Library Assistant to collect, consolidate and arrange in a systematic manner all the titles of the papers included in this volume. I also appreciate the services of Smt. N. Ambika, Miss. N. R. Lotha Devi, Miss. K. V. Sajitha and Shri C. N. Chandrasekharan for the meticulous care exercised in typing the draft of the bibliography.
