PREFACE

This report was compiled in response to numerous requests for historical price data for the major crops and livestock classes produced in Nebraska. Prices received by Nebraska producers are reported for the 1960-1989 period.

The data was compiled from Nebraska Agricultural Statistics, Nebraska Agricultural Statistics Service and Agricultural Prices, USDA; Livestock, Meat and Wool Market News, Livestock and Grain Market News, Agricultural Marketing Service, USDA; and from Agricultural Statistics Board, National Agricultural Statistics Service, USDA. The reader should note that each table in the report indicates the price source as either an Omaha, Nebraska or (as listed) price received by producers.

Yearly average prices (simple averages of the 12 monthly listed prices) are provided in each table. A 10-year monthly and yearly average (1980-89) and a 30-year monthly and yearly average (except a 16-year average for feeder pigs, Table 18, page 18) is included at the bottom of each table.

The tables for potatoes, turkeys and eggs are lacking complete data. The authors are forced to adjust some data series for lack of consistent data and in some cases the data are unavailable for selected months. The reader should note that weight classifications for reporting feeder cattle prices changed in 1970. Specific information on the necessary changes, adjustments and data sources are contained in the footnotes of the respective tables.

It is the intention of the authors to update this report annually. Appropriate additions, revisions or deletions will be made at those times. Requests for the updated reports should be sent to the Department of Agricultural Economics, Institute of Agricultural and Natural Resources, 208 H.C. Filley Hall, UNL-East Campus, Lincoln, Nebraska 68583-0922.
