## INTRODUCTION TO SECOND EDITION.

**A** DEMAND for a second edition of my Spelling Book is an evidence of its excellence, and justifies me in recommending it to all who are engaged in teaching. It has met with a favourable reception in the Commercial Colleges, the School of Mines, and the Public Schools of the State. Its value has been enhanced by the addition of four extra pages.

It is especially adapted for the Upper Classes in Public and Secondary Schools, and is the result of many years' experience in commercial teaching and in preparatory work for the University Primary, Junior, and Senior and the Civil Service Examinations.

Its arrangement will commend itself to teachers who know and desire the best methods of obtaining the best results.

The old system of alphabetical arrangement is not conducive to a correct knowledge of words, and the fact that many of the words found in the average Spelling Book are either obsolete or fanciful proves the necessity of providing a book of practical use to both teacher and scholar.

Attention is directed to the words which are frequently misspelt in Examination Work. These have been specially emphasised by printing the difficult letters in *italic* type.
