INTRODUCTION

The Institute of Commonwealth Studies' **Register of Commonwealth research** is a list of higher degree theses conducted at UK Universities and relating to the Commonwealth of Nations, its member countries, and the former British Empire. The **Register** has been maintained since 1949 and covers research both in progress and completed; its retrospective coverage extends back to the 1920s.

From the data held in the **Register**, the Institute compiles and publishes ***Theses in Progress in Commonwealth Studies*** as a snapshot of current research on the Commonwealth and Empire in Britain.

This edition of ***Theses in Progress in Commonwealth Studies*** contains titles believed to be in progress at the end of 2014 and early 2015, and supersedes all previous editions. Electronic PDF versions of previous issues of ***Theses in Progress in Commonwealth Studies*** are available online from the School of Advanced Study e-repository, **SAS Space** at: <http://sas-space.sas.ac.uk>

In December 2006, the School of Advanced Study launched its online repository, **SAS Space**. This provided the opportunity, for the first time, to make available the files of the full **Register**. These are sub-divided by region and contain almost 17,500 records in total. The files are added annually and can be found online

The **Register**, and ***Theses in Progress***, are compiled and maintained as a source of current and past research on the Commonwealth, and also as a point of contact between candidates for higher degrees in British universities. Readers of this directory may be interested to know about the Commonwealth Scholarship Commission Professional Networks, set up to encourage communication on themes of relevance across the Commonwealth. These Networks are open to past and current Commonwealth Scholars, and to anyone with an interest in the respective fields. More information on the networks can be found at: <http://cscuk.dfid.gov.uk/networks/professional-networks/>

Coverage

Commonwealth studies has been defined as study of the Commonwealth of Nations or the former British Empire and their member countries together with countries formerly under British protection. The exceptions are Great Britain herself, and the United States. A list of countries appears in the first appendix to this publication.

Subject coverage is primarily in the fields of history, politics, sociology, anthropology, economics, geography, literature, language and religion. The subjects of education, medicine, law, science and technology are included on a selective basis.

Coverage is of theses for higher degrees presented to UK universities. Dissertations submitted for the MA degree had been included in the earlier sections of the **Register**. For more recent records, MA dissertations and non degree topics are excluded.

Sources of information

Data for the register are obtained from a variety of sources. Printed sources include:

Aslib. ***Index to theses***

Institute of Historical Research, ***Historical Research for Higher Degrees in the UK: Theses in Progress and Theses Completed***

Information made publicly available by departmental websites now provides the largest source of data. However, coverage by websites is by no means universal, and a significant source of information arises from correspondence conducted with university departments and academic supervisors throughout Britain.

The contribution made by these individuals is enormous; the Institute is profoundly grateful for their assistance. The universities who contributed to this compilation, either by correspondence or by making information available on their websites, are listed at Appendix 2.

In addition, a number of students submitted personal returns. Apart from the above many other respondents replied with "nil" returns and to them also thanks are recorded.

Completed theses

This list does not include theses known to have been completed. Details of these are available in the full **Register of Commonwealth research**. The full **Register** can be found, as a series of Excel files, updated annually, and on the School of Advanced Study online repository (SAS Space), at: <http://sas-space.sas.ac.uk> Enquiries about the **Register** are welcome.

Data Protection Act 1988

The Institute's **Register of Commonwealth research** holds data supplied, including contact details, within the provisions of the Data Protection Act 1988. Data are maintained in an electronic format and details of completed theses are placed on the web with open access. Email addresses are specifically excluded. The dissemination of research data is deemed to have a legitimate purpose and the implied consent of candidates is assumed to be granted. However, individuals may apply to the editor to have information removed or amended.

The Institute will take all reasonable care to ensure that the information held is accurate but cannot be held responsible for errors or the use made of the data downloaded from the web.

Errors and omissions

The compilation of this list has relied on the co-operation of many persons but it is recognised that it may contain errors, inaccuracies and omissions. Notification of these would be most welcome.
