### A REVIEW ON HERBO MINERAL FORMULATIONS CONTAINING LAUHA (IRON) W.S.R TO RASENDRA SARA SANGHRAHA

Telaga Satya Priya<sup>1\*</sup>, Sai Prasad A. J. V<sup>2</sup>, Murali Krishna C<sup>2</sup>, Babu. G<sup>3</sup>

\*<sup>1</sup>Senior Research Fellow, <sup>2</sup>Research Officer (Ay), <sup>3</sup>Assistant Director Incharge, Regional Ayurveda Research Institute for Skin Disorders, Vijayawada, A.P., India.

#### ABSTRACT

*Rasendra Sara Sangraha* is the oldest and most exhaustive treatise of *Rasa Shastra*, an important branch of Ayurveda, which revolutionised Ayurveda Pharmacopeia in the medieval period. It is one of classical works of 14<sup>th</sup> century period written by Sri Gopala Krishna Bhatt consists of 5 chapters with 2531 verses. *Rasendra Sara Sangraha* comprising the compilation of various times tested and therapeutically proved *Rasayoga* formulations. *Lauha* (iron) is a very essential element of the body system for treating many disease conditions as well as for physiological existence. Iron used as medicine from the Vedic period. *Lauha* preparations are extensively used from *Acharya Charaka's* period in the form of *Ayasruti* and *Navayasa loha*. *Rasendra Sara Sangraha* has mentioned a total of 222 herbo mineral formulations having *Lauha* (iron). The present study deals with the chapter wise review of formulations of *Rasendra Sara Sangraha* containing *Lauha* as an ingredient mentioned in various disease conditions like *Jwara*, *Arsas*, *Krimi*, *Pandu*, *Soola*, *Pradara*, *Sodha* and *Gulma* etc. These *Lauha* containing Herbo mineral Formulations has been elaborately compiled in 222 formulations.

**KEYWORDS:** *Rasendra Sara Sangraha*, Herbomineral Formulations, *Lauha*, *Chikitsa Prakarana*.

#### INTRODUCTION

Ayurveda is a holistic and divine medical science narrated Pharmaceutical preparations and technology in the texts of *Rasa Shastra* and *Bhaishajya Kalpana*. *Rasendra Sara Sangraha* is an important book of *Rasa Sastra*, excellently explains the therapeutic uses of herbomineral formulations. It is one of classical works of 14<sup>th</sup> century period written by Sri Gopala Krishna Bhatt consists of 5 chapters with 2531 verses. The book starts with processing of minerals and metals, following usual salutations. It proceeds further to the manufacturing and therapeutic utilization of the prepared medicines. The purification of mercury has been advised by use of herbal drugs and perhaps it is the first book to explain the rationale method of manufacturing based on the therapeutic utility e.g. *Lauha Bhasma* (incinerated Iron). Overall 600-650 *Rasayogas* (herbo mineral formulations) have been compiled, among them 222 herbo-mineral formulations containing *Lauha* have also gained place. The word *Lauha* has two meanings. The first is Metal and second is Iron. Iron used as a medicine from Vedic period. Herbomineral formulations contain iron starts from 2<sup>nd</sup> century. The Science of Metallurgy was well advanced in Indian Subcontinent. Preparation of Iron from Various ores

was known in that period. The Main ores of Iron are Red haematite (Fe<sub>2</sub>O<sub>3</sub>), and Magnetite (Fe<sub>3</sub>O<sub>4</sub>). In addition Siderite (FeCO<sub>3</sub>), Iron pyrite (FeS) Chalcopyrite (CuFeS<sub>2</sub>) are also Known Iron ores. *Rasendra Sara Sangraha* has mentioned that *Lauha Bhasma* is useful in *Kapha* and *Vata* disorders, *Sodha* (Oedema), *Soola* (colic), *Arshas* (hemorrhoids), *Krimi* (worm infestations), *Pandu* (anemia), increases the life span, *Bala* (strength), *Veerya* (potency) and beneficial to eyes.

#### Material and methods

222 Herbo-Mineral formulations containing *Lauha* as one of the ingredient have been compiled among 650 *Rasayogas* mentioned in *Rasendra Sara Sangraha*.

#### In the First Chapter

*Lauha Marana* (calcinations) Procedure (*Putapaka Vidhi*), *Lauha Niruttikarana* (unable to acquire physical state), *Lauha Bhasma Guna* (qualities), *Apathya* (unwholesome) during *Lauha Bhasma* intake were described. *Rasendra Sara Sangraha* has specially mentioned *Vajra panyadi Lauha* (various types of *Lauha*) with Superiority in quality as *Samanya Lauha* is 2 times than *Krounch Lauha*, *Krounch Lauha* is 8 times than *Kalinga Lauha*,

Kalinga Lauha is 100 times than Bhadra Lauha, Bhadra Lauha 1000 times than Vajra Lauha, Pandi Lauha is 10 times than Niranga Lauha, Niranga Lauha 1000 crore times than Kanta Lauha, which is unique point not seen in any other treatise.

#### DISCUSSION

Rasendra Sara Sanghrraha explains the rationale method of manufacturing based on the therapeutic utility e.g, Lauha Bhasma. Lauha Bhasma

having the properties Seeta veerya, Seeta guna, Madhura Rasa, Pitta Samaka and Deepana has been used in many effective utilities, mentioned not only in the therapeutic indications of Pandu, Krimi but also in Arsa, Prameha, Somaroga etc. 1<sup>st</sup> chapter of Rasendra Sara Sanghrraha has specially mentioned Vajra panyadi Lauha (various types of Lauha) with Superiority in quality as Samanya Lauha is 2 times than Krounch Lauha, Krounch Lauha is 8 times than Kalinga Lauha, Bhadra Lauha 1000 times than Vajra Lauha, Pandi Lauha is 10 times than Niranga Lauha, Niranga Lauha 1000 crore times than Kanta Lauha, which is unique point not seen in any other treaties.. Lauha Marana Procedure (Putapaka Vidhi), Lauha Niruttikarana, Lauha Bhasma Guna, apathya during Lauha Bhasma Sevana were described. In 2<sup>nd</sup> Chapter in Jwara chikitsa 26 formulations were mentioned. In Jwaratisara chikitsa 15 formulations, in Arsha Chikitsa 16 formulations, in Krimi Chikitsa 4 formulations, Pandu kamala Chikitsa 12 formulations, Raktapitta Chikitsa 7 formulations, Yakshma Chikitsa 9 formulations, Kasa Chikitsa 15 formulations, Unmada Roga Chikitsa 2 formulations, Apasmara Chikitsa 13 formulations, Pitta Roga Chikitsa 3 formulations, Vata rakta Chikitsa 3 formulations, Amavata Chikitsa 3 formulations, Soola Roga Chikitsa 10 formulations, Gulma Roga Chikitsa 5 formulations, Mutrakriccha Roga Chikitsa 2 formulations, Prameha Chikitsa 8 formulations, Soma Roga Chikitsa 5 formulations, Stoulya Chikitsa 4 formulations, Pliha Roga Chikitsa 14 formulations, Sodha Roga Chikitsa 4 formulations, Slipada Chikitsa 1 formulation, Bhagandara Roga Chikitsa 1 formulation, Kushta Roga Chikitsa 6 formulations, Amlapitta Chikitsa 5 formulations, Visarpa Vispota Tantuka Chikitsa 1 formulation, Netra Roga Chikitsa 4 formulation, Siro Roga Chikitsa 3 formulations, Pradara Roga Chikitsa 2 formulations, Sootika Roga Chikitsa 7 formulations containing Lauha were mentioned. In 4<sup>th</sup> Chapter, in Visha Chikitsa 1formulation containing Lauha was mentioned. In 5<sup>th</sup> Chapter: Rasayana Vajikarana adhyaya 11 formulations containing Lauha were mentioned. Most of the formulations have Lauha in the form of Bhasma, and in a few Lauha is the ingredient in the form of Choorna.

An experimental study conducted on humans to determine the role of Iron in fevers showed significant reduction in serum Iron levels. Chronic blood loss from hemorrhoids may cause anemia. Further in patients with anaemia there is retention of salt and water which may result in Oedema. In Krimi roga the parasites feed on nutrition and distort the GI System which may lead to anemia due to uneven absorption of Iron from food supplements. Jaundice is caused by abnormally

elevated or high blood levels of bilirubin which is made by the breakdown of red blood cells. *Loha bhasma* supplements may help to maintain the RBC count. Mycobacterium tuberculosis (M.tb), the main cause of *Yakshma* requires iron for survival, acquires this element by synthesizing iron-binding molecules known as siderophores and by recruiting a host iron-transport protein, transferrin, to the phagosome. Serum Iron & ferritin levels are commonly lower in the condition like Febrile seizures, anemia, Hemorrhage, haemorrhoids, metrorrhagia, Splenomegaly, Obesity, etc. Chronic acid reflux, gastroesophageal reflux disease (GERD) can erode the oesophagus and cause bleeding to cause Iron deficiency anemia.

### CONCLUSION

*Rasendra Sara Sangraha* is an important book of Indian Alchemy. *Lauha* (Iron) is one of main element of human body, deficiency leads to Iron deficiency anaemia and is controlled by supplementation of iron preparations. *Rasendra Sara Sangraha* has mentioned therapeutic uses of iron not only in *Pandu* (Anaemia) but in a variety of ailments like *Arsha*, *Sotha*, *Kustha*, *Sthoulya* etc. *Rasendra Sara Sangraha* gains the height of excellence in the period of 13- 14<sup>th</sup> century AD. The book focused on the practical applicability of formulations. The herbomineral formulations can be time tested for applicability.
