

TO: Engineers of Project 6345
FROM: Jay W. Forrester
DATE: March 5, 1946
SUBJECT: Electronic Staff

Discussions with members of the engineering staff yesterday have resulted in the following temporary assignments. In each case the coordinating engineer will be responsible for development schedules, technicians' time, and such other duties as may be necessary to the smooth progress of research.

A. Storage Tube Research

Dodd, Coordinating Engineer
Forbes
Nolan

B. Computing Circuits

O'Brien
Wimett
Wilson, Coordinating Engineer

C. Special Problems

R. Brown, Coordinating Engineer
Drisko
Fahnestock

Richard Brown will continue his activities in overall electronic coordination.

Fahnestock will study and summarize the present status of delay lines and have available information for use in other research activities. This will include evaluation of delay lines now being manufactured, study of the work done by the Radiation Lab. and that being done by Basic Research, and such other steps as he considers necessary.

APPROVED FOR PUBLIC RELEASE. CASE 06-1104.

Administrative Memorandum NO. A-3

- 2 -

The Special Problems group will include such activities as delay lines, pulse transformers and data scanning.
