II GOLF -

We have been pleased to observe that in recent months interest in Golf has been on the increase. Mr Perkins is to be congratulated for his persistent efforts in developing a playing field, making available equipment and instructions. Those who desire further information regarding this popular sport may talk with Mr Lee Perkins.

III DRAFT -

The National Council on Defense is making an effort to determine the necessity of calling Staff Members of colleges for training camps. It is not the purpose of the government to disturb the program of education any more than it is necessary. Consequently, I have asked Mr Hilliard to get the names and draft numbers or classifications of the enrollees on our staff, so we can give sound reasons for deferment. Kindly give Mr Hilliard within the next five days this information.

IV CAUTION!

It is said that rural people and teachers are the easiest victims on earth for salesmen to inveigle into buying anything. I am sorry that this is true! People who have a steady income like the employees of Prairie View are constantly bombarded by salesmen to purchase every conceivable thing. Just recently, I am informed that several people here were decoyed into buying a commodity which afterwards caused them much embarrassment. Always be slow about buying. Never sign an instrument under any circumstances before carefully reading it. C-A-U-T-I-O-N!

V SUMMER SCHOOL

Plans are now in the making for the operation of the Summer School for 1941. We have enough experience at hand to say that it will not be possible to carry all the present members of the staff in the Summer School. The very definite shift in the Summer enrollment from Freshman and Sophomore to Junior and Senior, Graduate and Special students, will make adjustments necessary. We must give first consideration to those staff members who are away at present and those who went to school last summer in the matter of employment.

VI TRAINING -

We should be pleased to have those who contemplate going away to school the Second Semester, this summer and next year, to let me know in writing on or by March 1. We are asking the Directors to hand the names of those who have not been to school, within the last five (5) years, for the purpose of determining their plans for going to school. Those who are eligible for out-of-state aid for attending school, should contact Dean T D Brooks, A and M College, College Station, Texas, within the next ten (10) days.

X ANOTHER LETTER -

November 15, 1940

Principal W R Banks
Campus

Dear Principal Banks:

In your News Letter of November 1940 you called our attention to the necessity of conserving our electrical energy and water supply. Carrying that idea a little further I have taken from our records and compiled the total water consumption for the College during the months of September and October 1940. This I am presenting to you enclosed.

You will note that in some instances the water consumed was well over 300,000 gallons per day and in others seldom was it less than 200,000 gallons per day. When you compare this with the generally accepted standard which allows 100 gallons per day per person it is readily apparent that our consumption is excessive. Figuring on a campus population of 1500 we should not use more than 150,000 gallons per day. You will bear in mind that the figure of 100 gallons per day is based on a set standard for the average industrial city.

I am merely presenting this report for your information and guidance. I believe it will be to our advantage to take every possible step to reduce the water consumption at this Institution.

I am

Yours very truly,

/s/ C L Wilson, Superintendent
Buildings and College Utilities

XI AND FINALLY -

"Democracy must inculcate in its children capacities for living and assure opportunities for the fulfillment of those capacities. The success of democratic institutions is measured, not by the extent of territory, financial power, machines, or armaments, but by the desires, the hopes, and the deep-lying satisfactions of the individual men, women, and children who make up its citizenship."

Yours truly,

W R Banks
