AAM Section 1100

Introduction

.01 *Audit and Accounting Manual* has been prepared by the staff of the AICPA and issued as a nonauthoritative practice aid. The materials included in it are intended primarily as a reference source for conducting audit, review, and compilation engagements. The objective is to provide practitioners with the tools needed to help plan, perform, and report on their engagements. *The manual is not intended to serve as a complete or comprehensive quality control system.*

.02 The manual, where practicable, offers choices and alternatives rather than particular positions. The use of this or any other practice aid requires the exercise of individual professional judgment. The manual is not a substitute for the authoritative technical literature, and users are urged to refer directly to applicable authoritative pronouncements for the text of technical standards.

.03 References are made throughout the manual to original authoritative pronouncements and to their section numbers in AICPA *Professional Standards* to help users locate those authoritative pronouncements. In citing generally accepted auditing standards (GAAS) and their related interpretations, references use section numbers within the codification of currently effective Statements on Auditing Standards (SASs) and not the original statement number, as appropriate. For example, SAS No. 54, *Illegal Acts by Clients*, is referred to as AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*). Similarly, when citing attestation standards, and their related interpretations, references use section numbers within the codification of currently effective Statements on Standards for Attestation Engagements (SSAEs) and not the original statement number, as appropriate.

.04 This manual is intended to be used in connection with engagements of nonpublic entities and is not intended to be used in connection with audits of public entities that are required to be audited under standards set by the Public Company Accounting Oversight Board.

.05 The authors hope that the manual will be helpful to practitioners in the conduct of their audit and accounting practice. However, no generalized material, such as that included in this manual, can be a substitute for development and implementation by a firm of a system of quality control, which is appropriately comprehensive and suitably designed in relation to the firm's organizational structure, its policies, and the nature of its practice.

.06

Explanation of References

AT =	Reference to section number in AICPA *Professional Standards* for Statements on Standards for Attestation Engagements
AU =	Reference to section number in AICPA *Professional Standards* for Statements on Auditing Standards
AUD =	Reference to section number in the Auditing and Attestation Statements of Position in AICPA *Technical Practice Aids*
ET =	Reference to section number in AICPA *Professional Standards* for the Code of Professional Conduct, Interpretations of Rules of Conduct, and Ethics Rulings
FASB ASC =	Reference to the Financial Accounting Standards Board *Accounting Standards Codification™*
GAAP =	Generally accepted accounting principles

(continued)

Explanation of References

QC =	Reference to section number in AICPA *Professional Standards* for Statements on Quality Control Standards
SAS =	AICPA Statement on Auditing Standards
SOP =	AICPA Auditing and Attestation Statement of Position
SQCS =	AICPA Statement on Quality Control Standards
SSAE =	AICPA Statement on Standards for Attestation Engagements
SSARS =	AICPA Statement on Standards for Accounting and Review Services

Guidance Considered in This Edition

.07 This edition of the manual has been modified by the AICPA staff to include certain changes necessary due to the issuance of authoritative pronouncements since the last edition of the manual. Relevant guidance contained in official pronouncements issued through June 1, 2011, has been considered in the development of this edition of the manual. Authoritative guidance discussed in the text of the manual (as differentiated from the temporary footnotes, which are denoted by a symbol rather than a number) is effective for entities with fiscal years ending on or before June 1, 2011. Authoritative guidance discussed only in temporary footnotes is not yet effective as of June 1, 2011, for entities with fiscal years ending after that same date. This includes relevant guidance issued up to and including the following:

- SAS No. 121, *Revised Applicability of Statement on Auditing Standards No. 100,* Interim Financial Information (AICPA, *Professional Standards*, AU sec. 722 par. .05)
- Interpretation No. 19, "Financial Statements Prepared in Conformity With International Financial Reporting Standards as Issued by the International Accounting Standards Board," of AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, AU sec. 9508 par. .93–.97)
- Revised interpretations issued through June 1, 2011, including Interpretation Nos. 1–4 of AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, AU sec. 9325 par. .01–.13)
- SSAE No. 17, *Reporting on Compiled Prospective Financial Statements When the Practitioner's Independence is Impaired* (AICPA, *Professional Standards*, AT sec. 301 par. .23)
- Interpretation No. 1, "Reporting Under Section 112 of the Federal Deposit Insurance Corporation Improvement Act," of AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of its Financial Statements* (AICPA, *Professional Standards*, AT sec. 9501 par. .01–.07)
- Statement on Quality Control Standards No. 8, *A Firm's System of Quality Control* (Redrafted) (AICPA, *Professional Standards*, QC sec. 10)

Users of this manual should consider guidance issued subsequent to those items in the preceding list to determine its effect on entities covered by this manual. In determining the applicability of a pronouncement, its effective date should also be considered.

FASB *Accounting Standards Codification*™

.08 The accounting guidance in this manual, where such guidance exists, has been conformed to reflect reference to FASB ASC as it existed on June 1, 2011 (through FASB Accounting Standards Update No. 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*).

New AICPA.org Website

.09 The AICPA encourages you to visit its new website at www.aicpa.org. It was launched in 2010 and provides significantly enhanced functionality and content critical to the success of AICPA members and other constituents. Certain content on the AICPA's website referenced in this guide may be restricted to AICPA members only.

Auditing Standards Board's Clarity Project

.10 In an effort to make U.S. GAAS easier to read, understand, and apply, the Auditing Standards Board (ASB) launched the Clarity Project. The majority of the clarified auditing standards will be issued as one SAS. Once finalized, the new clarity standards will supersede all prior SASs. The new clarity auditing standards are expected to be effective for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise established.

.11 The foundation of the ASB's Clarity Project is the establishment of an objective for each auditing standard. These objectives will better reflect a principles-based approach to standard setting. In addition to having objectives, the clarified standards will reflect new drafting conventions that include the following:

- Adding a definitions section, if relevant, in each standard
- Separating requirements from application and other explanatory materials
- Numbering application and other explanatory material paragraphs using an *A-* prefix and presenting them in a separate section (following the requirements section)
- Using formatting techniques, such as bulleted lists, to enhance readability
- Adding special considerations relevant to audits of smaller, less complex entities
- Adding special considerations relevant to audits of governmental entities

.12 The project also has an international convergence component. The ASB expects that, upon completion of the project, the requirements of U.S. GAAS will be converged with those of the International Auditing and Assurance Standards Board. AICPA Audit and Accounting Guides, as well as other AICPA publications, will be conformed to reflect the new standards resulting from the Clarity Project after issuance and as appropriate, based on the effective dates.

.13 This manual is expected to be updated periodically. Changes will likely arise from three main sources:

a. Comments and suggestions from practitioners. Because this manual is a product of AICPA staff and not of a committee of practitioners, it is particularly important that practitioners advise the staff on any suggestions for material that could be improved or added.

b. Issuance of new official pronouncements.

c. Other additions to or deletions from the manual as a result of continued staff study.

AAM Section 1200

How to Use the Audit and Accounting Manual

Overview

.01 *Audit and Accounting Manual* is designed to provide practitioners with the tools needed to help plan, perform, and report on audit engagements. *This manual is not intended to serve as a complete or comprehensive quality control system, and it is not intended to be used in connection with the audits of entities that are required to be audited under standards set by the Public Company Accounting Oversight Board.* This manual comprises the following sections.

Section No.	*Section Name*
1000	Introduction
3000	Engagement Planning and Administration
4000	Internal Control
5000	Designing and Performing Further Audit Procedures
6000	Audit Documentation
7000	Correspondence, Confirmations, and Representations
8000	Alerts
9000	Accountants' Reports
10,000	Quality Control

Audits

.02 To perform an engagement in accordance with generally accepted auditing standards (GAAS), an auditor must comply with the General Standards, the Standards of Field Work, the Standards of Reporting, and the Quality Control Standards.

.03 The General Standards are concerned with the qualifications of the auditor and the qualitative aspects of the work performed. They specifically address the auditor's training and proficiency, independence, and due care in the performance of work.

.04 The Standards of Field Work address the manner used by the auditor to perform the audit. Each standard begins with the appointment of the auditor and ends with the auditor communicating to those responsible for the oversight of financial reporting of the entity being audited.

.05 The Standards of Reporting are concerned with the opinion the auditor renders on the client's financial statements.

.06 This manual will assist the auditor in performing an audit, in accordance with GAAS, in the following ways:

a. Section 10,000, *Quality Control*, includes sample forms that can be used by a firm to document its adherence to the AICPA requirement for a system of quality control for a CPA firm.

b. Section 3000, *Engagement Planning and Administration*, provides guidance in the planning stage. Included in this section are various formats of audit assignment controls and engagement letters.

c. Section 4000, *Internal Control*, conforms to *Internal Control—Integrated Framework,* published by the Committee of Sponsoring Organizations of the Treadway Commission, and AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*). This section provides guidance on evaluating internal control by utilizing checklists, questionnaires, and other generalized aids.

d. Section 5000, *Designing and Performing Further Audit Procedures*, explains how the auditor should design and perform tests of controls, substantive procedures, or both, that are responsive to the assessed risks of material misstatement.

e. Section 6000, *Audit Documentation*, provides the auditor with a general discussion of the purpose of audit documentation.

f. Section 7000, *Correspondence, Confirmations, and Representations*, provides the auditor with numerous examples of confirmations, illustrative inquiries to legal counsel, representation letters, communications with audit committees, and a reliance letter.

g. Section 9000, *Accountants' Reports*, addresses the format of the accountant's report and provides numerous examples of the auditor's report.

Alerts

.07 Section 8000, *Alerts*, is intended to provide practitioners with an overview of recent economic, professional, and regulatory developments that may affect their engagements.

[*The next page is 2001.*]

AAM Section 2000
Compilation and Review

Effective January 1, 2011, the compilation and review material that historically has been included in this section was removed.

For accountants performing compilation and review engagements on financial statements for periods ending on or after December 15, 2010, the AICPA has developed the guide *Compilation and Review Engagements*. The guide was released in 2010 and provides additional information on implementing Statement on Standards for Accounting and Review Services (SSARS) No. 19, *Compilation and Review Engagements* (AICPA, *Professional Standards*), and understanding internal control services. It also includes illustrative engagement and representation letters, sample compilation and review reports, detailed illustrations, and case studies. The guide is available at www.cpa2biz.com (enter product code 0128111 for further information). This guide is also available as an online package along with the annual *Compilation and Review Developments* alert (product code WRC-XX). The most recent *Compilation and Review Developments* alert has been included in this manual and can be found in section 8015.

The AICPA has a site dedicated to the most recent compilation and review developments, as well as further information on the Accounting and Review Services Committee. Learn more at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/CompReview/Pages/CompilationandReviewServices.aspx.

In addition, the AICPA has a site with resources for SSARS No. 19, including white papers related to SSARS No. 19, a summary of SSARS No. 19, and an article from the May 2010 *Journal of Accountancy* that discusses the changes to compilation and review standards because of SSARS No. 19. These resources can be found at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/CompReview/CompRevStds/Pages/ResourcesforSSARSNo19.aspx.

[*The next page is 3001.*]

AAM Section 3000 Engagement Planning and Administration

Sections 3160 and 3165 include illustrative audit assignment control forms and engagement letters that can be used by an accountant in the planning phase of an audit engagement.

Various formats of audit assignment controls and engagement letters are in use; nevertheless, inclusion of the formats in this section in no way means that they are preferable. Refer directly to authoritative pronouncements when appropriate.

Illustrative formats of audit assignment controls and engagement letters are often helpful in developing a consistent style within a firm. However, no set of illustrative formats can cover all the situations that are likely to be encountered in practice because the circumstances of engagements vary widely.

Readers should consider other sources of illustrative presentations, such as those in authoritative pronouncements and AICPA Audit and Accounting Guides.

References to Professional Standards. When referring to the professional standards, this manual cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards No. 54, *Illegal Acts by Clients*, is referred to as AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*).

AAM Section 3100

Planning the Engagement

General

.01 The planning phase is an important part of every engagement. During this phase, the partner and the staff obtain an understanding of the entity and its environment, including its internal control, then develop an overall strategy for the expected conduct and scope of the engagement.

.02 The need for planning is highlighted in Rule 201, *General Standards* (AICPA, *Professional Standards*, ET sec. 201 par. .01), of the AICPA Code of Professional Conduct, which states that a member shall adequately plan and supervise the performance of professional services.

.03 The first standard of fieldwork of generally accepted auditing standards (GAAS) states that the auditor must adequately plan the work and must properly supervise any assistants. AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*), establishes standards and provides guidance to the independent auditor conducting an audit in accordance with GAAS on the considerations and activities applicable to planning and supervision.

.04 Proper planning also enhances the productivity of engagement personnel and may result in a more profitable engagement.

.05 The nature, timing, and extent of planning vary with the size and complexity of the entity and with the auditor's experience with the entity and understanding of the entity and its environment, including its internal control. The auditor must plan the audit so that it is responsive to the assessment of the risks of material misstatement based on the auditor's understanding of the entity and its environment, including its internal control (see sections 3120 and 3125).

Audit Planning

.06 Planning is not a discrete phase of the audit, but rather an iterative process that begins with engagement acceptance and continues throughout the audit as the auditor performs audit procedures and accumulates sufficient appropriate audit evidence to support the audit opinion. As a result of performing planned audit procedures,[1] the auditor may obtain disconfirming evidence that might cause the auditor to revise the overall audit strategy. Any modification to the initial audit strategy should be documented. An audit strategy developed before the auditor obtains an understanding of the business and the risks of material misstatement may require updating, or a whole new strategy.

Appointment of the Independent Auditor

.07 Early appointment of the independent auditor has many advantages to both the auditor and the client. Early appointment enables the auditor to plan the audit prior to the balance-sheet date. Although early appointment is preferable, an independent auditor may accept an engagement near or after the close of the fiscal year. In such instances, before accepting the engagement, the auditor should ascertain whether circumstances are likely to permit an adequate audit and expression of an unqualified opinion and, if they

[1] Paragraph .03 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), provides guidance with respect to the procedures the auditor performs in obtaining an understanding of the entity and its environment to establish a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing the risks of material misstatement of the financial statements.

will not, the auditor should discuss with the client the possible necessity for a qualified opinion or disclaimer of opinion.

Forming an Audit Strategy

.08 In establishing the overall audit strategy, the auditor should (1) determine the characteristics of the engagement that define its scope, such as the basis of reporting, industry specific reporting requirements, and the locations of the entity; (2) ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required, such as deadlines for interim and final reporting, and key dates for expected communications with management and those charged with governance; and (3) consider the important factors that will determine the focus of the audit team's efforts, such as determination of appropriate materiality levels, preliminary identification of areas where there may be higher risks of material misstatement, preliminary identification of material locations and account balances, evaluation of whether the auditor may plan to obtain evidence regarding the operating effectiveness of internal control, and identification of recent significant entity specific, industry, financial reporting, or other relevant developments. The appendix to AU section 311 provides examples of matters the auditor may consider in establishing the overall audit strategy.

The Audit Plan

.09 The auditor must develop an audit plan in which the auditor documents the audit procedures to be used that, when performed, are expected to reduce audit risk to an acceptably low level. The audit plan is more detailed than the audit strategy and includes the nature, timing, and extent of audit procedures to be performed by audit team members in order to obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level. Documentation of the audit plan also serves as a record of the proper planning and performance of the audit procedures that can be reviewed and approved prior to the performance of further audit procedures. The audit plan should include the following:

- A description of the nature, timing, and extent of planned risk assessment procedures sufficient to assess the risks of material misstatement, as determined under AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*). Because these procedures normally are the first procedures performed by the auditor to gather audit evidence to support the audit opinion, the auditor typically plans the risk assessment procedures first, or early in the audit.
- A description of the nature, timing, and extent of planned further audit procedures at the relevant assertion level for each material class of transactions, account balance, and disclosure, as determined under AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*). The plan for further audit procedures reflects the auditor's decision whether to test the operating effectiveness of controls and the nature, timing, and extent of planned substantive procedures. Because the design of further audit procedures depends on the results of the auditor's assessment of the risks of material misstatement, the auditor typically will not develop the plan for further audit procedures until the auditor has completed the risk assessment procedures.
- A description of other audit procedures to be carried out for the engagement in order to comply with GAAS (for example, seeking direct communication with the entity's lawyers). The auditor's plan for these procedures evolves over the course of the audit as audit evidence is obtained.

Establishing an Understanding With the Client and Preparing an Engagement Letter

.10 The auditor should establish an understanding with the client regarding the services to be performed for each engagement. The understanding should include the objectives of the engagement, management's responsibilities, the auditor's responsibilities, and limitations of the engagement. Such an understanding reduces the risk that either the auditor or the client may misinterpret the needs or expectations of the other

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

party. The understanding could also include matters such as the timing of field work, report deadlines, and methods of fee determination and payment.

.11 AU section 311 states that the auditor should document the understanding through a written communication with the client in the form of an engagement letter. An engagement letter helps to prevent misunderstandings between the client and the auditor regarding the services to be provided, including the limitations. The engagement letter also sets forth the responsibilities of the client and, in most states, it becomes a legally binding contract on both parties. There are other good reasons to obtain an engagement letter, including the following:

- *Reduce the risk of litigation and avoid misunderstandings with the client*. In today's litigious environment an engagement letter is needed for both old and new clients. To avoid misunderstandings, the engagement letter generally describes in detail the services to be rendered, the fee, and other terms and conditions of the engagement. Oral agreements may result in differences of recollection or understanding between the auditor and the client.
- *Avoid misunderstandings by the staff*. It is necessary for the members of the staff working on the engagement to have a complete understanding of what is required of them. A copy of the engagement letter in the working papers provides them with an authoritative reference to supplement their oral instructions.

.12 Often, entities that have never been audited resist signing a client representation letter. To avoid client resistance at the end of the audit, many firms notify the client in the engagement letter that they will be asked to sign a client representation letter.

.13 If the auditor has reason to believe the client may publish all or a portion of an audit report, he may advise the client (preferably in the engagement letter) that firm policy is to read printer's proofs of the report and any other accompanying material. This precaution protects both the client and the auditor against condensation of financial statements, omission of footnotes, erroneous layout, and other errors such as misstatement of figures used in a president's letter, other narrative, or statistics.

.14 Generally, the auditor establishes the understanding with the client and prepares the engagement letter before any significant work takes place on the engagement. The partner may personally present the letter to the client to ensure that a complete understanding has been achieved. The understanding or a signed copy of the engagement letter may be filed with the engagement's current working papers and permanent file.

Practice Tip

Be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by you on the engagement. It is a best practice to always make sure that a final engagement letter is issued in such circumstances.

.15 If the nature of an engagement changes during its progress, or if the firm is engaged for additional services during the year, a new engagement letter is generally prepared. A step-down to a compilation or review engagement, or a special engagement for preparing a forecast, are examples of changes that could necessitate a new engagement letter. Such changes are ordinarily made by the engagement partner after careful consideration of the reasons justifying the change. For example, the reasons justifying a step-down from an audit to a compilation or review may prevent the firm from reporting on the lower level of service.

Special Considerations

.16 The following matters may be considered while preparing an engagement letter:

- Whether the circumstances preclude an unqualified opinion, as in these examples:

  - The auditor is retained after the beginning of the client's fiscal year, did not observe inventories or confirm receivables at the beginning of the year and was unable to gain satisfaction through application of alternative procedures.
  - The client imposes restrictions on the scope of the audit. (AU section 508, *Reports on Audited Financial Statements* [AICPA, *Professional Standards*]).
  - Significant litigation or other matters exist which may affect the opinion.
- Whether the fee should be stated as a range, in hourly rates, as standard per diem charges for the engagement, or as a maximum or flat fee
- The person or persons to whom reports should be addressed
- The number of copies needed of the report and the people to whom they are to be distributed
- Deadlines for reports or analyses
- Out-of-pocket costs
- Additional work not contemplated in the original engagement
- The condition of records or circumstances other than those contemplated in the engagement letter (for example, deficient internal control)
- A retainer
- One time engagements
- Start up costs when the client changes auditors
- Underwriters' requirements in connection with public offerings
- The part of the work to be done by other auditors

Fee Issues

.17 Two types of fee arrangements, contingent fees and commissions, are prohibited when the arrangement involves certain attest clients (see paragraph .36 following in this section of the manual for details), even though the fee is not related to an attest service.

.18 A contingent fee is an arrangement whereby (1) no fee is charged unless a specified result is attained or (2) the amount of the fee otherwise depends on the results of your firm's services. Some examples of contingent fees are the following:

- Your firm receives a finder's fee for helping a client locate a buyer for one of the client's assets.
- Your firm performs a consulting engagement to decrease a client's operating costs. The fee is based on a percentage of the cost reduction that the client achieves as a result of your service.

The following are exceptions:

- Fees fixed by a court or other public authority
- In tax matters, fees based on the results of judicial proceedings or the findings of governmental agencies

.19 A commission is any compensation paid to you or your firm for (1) recommending or referring a third party's product or service to a client or (2) recommending or referring a client's product or service to a third party. Permitted commissions shall be disclosed to the person or entity you recommend or refer a product or service to.

.20 Examples of commissions are if you or your firm

- refers a client to a financial planning firm that pays you a commission for the referral.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

- sells accounting software to a client and receives a percentage of the sales price (a commission) from a software company.
- refers a nonclient to an insurance company client, which pays you a percentage of any premiums subsequently received (a commission) from the nonclient.

.21 The AICPA rule provides an exception for *referral fees* for recommending or referring a CPA's services to another entity person or entity. That is, you may (1) receive a fee for referring the services of a CPA to any person or entity or (2) if you are a CPA, pay a fee to obtain a client provided you disclose such receipt or payment to the client. Referral fees are not considered commissions under these specific circumstances. You must inform the client if you receive or pay a referral fee.

.22 You and your firm may not have commission or contingent fee arrangements with a client when your firm also provides one of the following services to a client:

- An audit of financial statements
- A review of financial statements
- A compilation of financial statements when a third party (for example, a bank or investor) will rely on the financial statements and the report does not disclose a lack of independence
- An examination of prospective financial statements

.23 You and your firm may have commission and contingent fee arrangements with persons associated with a client—such as officers, directors, and principal shareholders—or with a benefit plan that is sponsored by a client (that is, the plan itself is not a client).[2] For example, you or your firm may receive a commission from a nonclient insurer if you refer an officer of an attest client to the insurer and the officer purchases a policy. Even when permitted, the existence of a commission arrangement must be disclosed to the person (or entity) to whom the commission relates.

Contents of Engagement Letters

.24 An understanding with the client and an engagement letter regarding an audit of the financial statements generally includes the following matters:

- The objective of the audit is the expression of an opinion on the financial statements.
- Management is responsible for the entity's financial statements and the selection and application of the accounting policies.
- Management is responsible for establishing and maintaining effective internal control over financial reporting.
- Management is responsible for designing and implementing programs and controls to prevent and detect fraud.
- Management is responsible for identifying and ensuring that the entity complies with the laws and regulations applicable to its activities.
- Management is responsible for making all financial records and related information available to the auditor.
- At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.
- The auditor is responsible for conducting the audit in accordance with GAAS. Those standards require that the auditor obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a

[2] Also see AICPA Ethics Ruling No. 25, "Commission and Contingent Fee Arrangements With Nonattest Client," of ET section 391, *Ethics Rulings on Responsibilities to Clients* (AICPA, *Professional Standards*, ET sec. 391 par. .049–.050), of the Code of Professional Conduct.

material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.

- An audit includes obtaining an understanding of the entity and its environment, including its internal control, sufficient to assess the risks of material misstatement of the financial statements and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify significant deficiencies. However, the auditor is responsible for ensuring that those charged with governance are aware of any significant deficiencies that come to his or her attention.
- Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to the auditor in the representation letter that the effects of any uncorrected misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

.25 The engagement letter is generally addressed to those charged with governance, the chief executive, or whoever retained the firm. If the engagement letter also serves as the method of communicating the auditor's responsibilities under AU section 380, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*), the addressee should include those persons charged with governance. See further discussion in paragraph .29 in this section of this manual. The engagement partner may sign the letter on behalf of the firm. The client representative responsible for the engagement signs the letter denoting agreement with the contract. The original letter may be maintained in the engagement documentation. A copy of the letter is given to the client.

.26 An understanding with the client and an engagement letter may include other matters, such as the following:

- The overall audit strategy.
- Involvement of specialists or internal auditors, if applicable.
- Involvement of a predecessor auditor.
- Fees and billing. Estimates of fees are usually based on conservative, carefully prepared estimates. It may be useful to describe the expected billing methods and payment periods.
- Any limitation of or other arrangements regarding the liability of the auditor or the client, such as indemnification to the auditor for liability arising from knowing misrepresentations to the auditor by management (regulators, such as the Securities and Exchange Commission, may restrict or prohibit such liability limitation arrangements).
- Conditions under which access to the auditor's documentation may be granted to others.
- Additional services to be provided relating to regulatory requirements.
- Other services to be provided in connection with the engagement, for example, nonattest services, such as accounting assistance and preparation of tax returns subject to the limitations of Interpretation No. 101-3, "Performance of nonattest services," under Rule 101, *Independence* (AICPA, *Professional Standards*, ET sec. 101 par. .05).

.27 The client assistance schedule is usually tailored to each specific engagement. The following is a list of analyses, schedules and other items that are often requested from the client prior to the start of an audit engagement:

- The general ledger.
- A reconciliation for each bank account.
- A trade accounts receivable aging.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

- Accounts receivable confirmation letters, using drafts to be provided by the auditor.
- A schedule of accounts receivable from officers and employees.
- A schedule of bad debts written off during the year.
- A schedule of notes receivable. The notes should be available for inspection.
- A schedule of transactions with affiliated enterprises.
- An inventory listing.
- An analysis of transactions affecting marketable securities.
- An insurance schedule. The policies should be available for inspection.
- A schedule of property and equipment additions and retirements.
- A depreciation schedule.
- A schedule of life insurance for officers.
- A schedule of accounts payable. The creditor's regular monthly statements for [*date*] should be retained and made available.
- A schedule of notes payable.
- The corporate stock book and minutes should be up to date and available for inspection.
- A schedule of all transactions to partners' capital and drawing accounts.
- A copy of the partnership agreement or corporate charter should be available for inspection.
- Copies of all leases, including equipment rental contracts, should be available for inspection.
- Copies of employment contracts with salesmen or executives should be available for inspection.
- Copies of pension, profit sharing, deferred compensation, stock option agreements, and letters of acceptance from the Treasury Department, should be available for inspection.
- A schedule of repairs in excess of $________.
- A schedule of each officer's salary and expense account payments.
- A schedule of contributions.
- A schedule of tax expense.
- A schedule of professional fees.

.28 Following is a list of common engagement letter deficiencies:

- Reference in the letter to audit of the books and records rather than to audit of financial statements
- Adverse comments about other firms
- Failure to specify *in detail* the services to be rendered when a maximum fee is quoted
- Inclusion of a review of internal control as one of the services when what is really intended is an understanding of internal control as required by auditing standards
- Failure to identify accounting or other problems that may have an effect on the opinion
- Failure to change, in writing, the terms of the engagement when conditions are found to be different (such as the inability to express an opinion without extensive additional auditing because internal control was found deficient)
- Failure to include fee basis and payment terms
- Failure to identify subsidiaries

- Failure to identify specific tax returns to be prepared
- Failure to document the scope of the engagement

Investigatory Procedures for Individuals

.29 When credit information is requested about individuals who are new clients, the investigative procedures are subject to the Fair Credit Reporting Act.

.30 Under the Fair Credit Reporting Act, an individual is informed in writing that an investigative consumer report, including information about the individual's character, general reputation, personal characteristics, and mode of living is being made. The individual is also advised, within three days of the time the report is requested, that he or she may, within a reasonable time, by written request, be furnished disclosure of the nature and scope of the investigation.

Sample Engagement Letters

.31 See section 3165, "Sample Engagement Letters," for sample engagement letters.

Preliminary Engagement Activities

.32 In addition to the procedures mentioned previously, at the beginning of the audit engagement the auditor should (1) perform procedures regarding the continuance of the client relationship and the specific audit engagement and (2) evaluate the auditor's compliance with ethical requirements, including independence. The purpose of performing these preliminary engagement activities is to consider any events or circumstances that may either adversely affect the auditor's ability to plan and perform the audit engagement to reduce audit risk to an acceptably low level or may pose an unacceptable level of risk to the auditor.

Determining the Extent of Involvement of Professionals Possessing Specialized Skills

.33 The auditor should consider whether specialized skills are needed in performing the audit. If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should determine whether that professional will effectively function as a member of the audit team. If such a professional is part of the audit team, the auditor's responsibilities for supervising that professional are equivalent to those for other assistants. In such circumstances, the auditor should have sufficient knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified audit procedures will meet the auditor's objectives; and to evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures.

.34 The use of professionals possessing IT skills to determine the effect of IT on the audit, to understand the IT controls, or to design and perform tests of IT controls or substantive procedures is a significant aspect of many audit engagements. In determining whether such a professional is needed on the audit team, the auditor should consider such factors as the following:

- The complexity of the entity's systems and IT controls and the manner in which they are used in conducting the entity's business
- The significance of changes made to existing systems, or the implementation of new systems
- The extent to which data is shared among systems
- The extent of the entity's participation in electronic commerce
- The entity's use of emerging technologies
- The significance of audit evidence that is available only in electronic form

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.35 Audit procedures that the auditor may assign to a professional possessing IT skills include inquiring of an entity's IT personnel how data and transactions are initiated, authorized, recorded, processed, and reported and how IT controls are designed; inspecting systems documentation; observing the operation of IT controls; and planning and performing tests of IT controls.

Communications With Those Charged With Governance and Management

.36 Paragraph .23 of AU section 380 explains that, among other matters, the auditor should communicate with those charged with governance (1) the auditor's responsibilities under GAAS and (2) an overview of the planned scope and timing of the audit.

Additional Considerations in Initial Audit Engagements

.37 Before starting an initial audit, the auditor should perform procedures regarding the acceptance of the client relationship and the specific audit engagement (see Statement on Quality Control Standards No. 7, *A Firm's System of Quality Control* [AICPA, *Professional Standards*, QC sec. 10A])[3] and communicate with the previous auditor, where there has been a change of auditors (see AU section 315, *Communication Between Predecessor and Successor Auditors* [AICPA, *Professional Standards*]). The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not have the previous experience with the entity that is considered when planning recurring engagements. Paragraph .27 of AU section 311 provides additional matters the auditor should consider in developing the overall audit strategy and audit plan for an initial audit.

[*The next page is 3121.*]

---

[3] Refer to section 10,000, "Quality Control," for additional discussion of Statement on Quality Control Standards No. 7, *A Firm's System of Quality Control* (AICPA, *Professional Standards*, QC sec. 10A), and establishing and maintaining a firm's system of quality control.

AAM Section 3105

Understanding the Assignment

.01 The auditor may (*a*) meet with the client to understand the type, scope, and timing of the engagement; (*b*) understand if reports on compliance, internal control, or segments of the entity are required; (*c*) understand the client's expectations, both stated and implied; and (*d*) review the expectations of both the owners and managers.

.02 To obtain an adequate understanding of any assignment, the auditor should be familiar with generally accepted accounting principles (GAAP), which includes specialized AICPA industry guides as well as Emerging Issues Task Force (EITF) consensuses. The auditor should also be familiar with generally accepted auditing standards (GAAS), which are promulgated by the AICPA and must be followed.

Financial Accounting Standards Board *Accounting Standards Codification*™

Overview

.03 Released on July 1, 2009, the Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by topically organizing the authoritative literature. FASB ASC disassembled and reassembled thousands of nongovernmental accounting pronouncements (including those of FASB, the EITF, and the AICPA) to organize them under approximately 90 topics.

.04 FASB ASC also includes relevant portions of authoritative content issued by the Securities and Exchange Commission (SEC), as well as selected SEC staff interpretations and administrative guidance issued by the SEC; however, FASB ASC is not the official source of SEC guidance and does not contain the entire population of SEC rules, regulations, interpretive releases, and SEC staff guidance. Moreover, FASB ASC does not include governmental accounting standards.

.05 FASB published a notice to constituents that explains the scope, structure, and usage of consistent terminology of FASB ASC. Constituents are encouraged to read this notice to constituents because it answers many common questions about FASB ASC. FASB ASC, and its related notice to constituents, can be accessed at http://asc.fasb.org/home and are also offered by certain third party licensees, including the AICPA. FASB ASC is offered by FASB at no charge in a Basic View and for an annual fee in a Professional View.

FASB Statement No. 168

.06 In June 2009, FASB issued the last FASB statement referenced in that form: FASB Statement No. 168, *The FASB* Accounting Standards Codification™ *and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162*. This standard establishes FASB ASC as the authoritative source of U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the SEC, and is effective for financial statements issued for interim and annual periods ending after September 15, 2009.

.07 This standard flattened the historic U.S. GAAP hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is nonauthoritative (not in FASB ASC). Exceptions include all rules and interpretive releases of the SEC under the authority of federal securities laws, which are sources of authoritative U.S. GAAP for SEC registrants, and certain grandfathered guidance having an effective date before March 15, 1992.

Generally Accepted Auditing Standards

.08 An independent auditor plans, conducts, and reports the results of an audit in accordance with GAAS. Auditing standards provide a measure of audit quality and the objectives to be achieved in an audit. Auditing procedures differ from auditing standards. Auditing procedures are acts that the auditor performs during the course of an audit to comply with auditing standards.

.09 AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*), provides a framework of GAAS.

.10 The general, field work, and reporting standards (the 10 standards) are as follows:

General Standards

a. The auditor must have adequate technical training and proficiency to perform the audit.

b. The auditor must maintain independence in mental attitude in all matters relating to the audit.

c. The auditor must exercise due professional care in the performance of the audit and the preparation of the report.

Standards of Fieldwork

a. The auditor must adequately plan the work and must properly supervise any assistants.

b. The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.

c. The auditor must obtain sufficient appropriate[1] audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit.

Standards of Reporting[2]

a. The auditor must state in the auditor's report whether the financial statements are presented in accordance with GAAP.[3]

b. The auditor must identify in the auditor's report those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.

c. When the auditor determines that informative disclosures are not reasonably adequate, the auditor must so state in the auditor's report.

d. The auditor must either express an opinion regarding the financial statements, taken as a whole, or state that an opinion cannot be expressed, in the auditor's report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor's report. In all cases where an auditor's name is associated with financial statements, the auditor should clearly indicate the character of the auditor's work, if any, and the degree of responsibility the auditor is taking, in the auditor's report.

.11 Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, ET sec. 202 par. .01), of the AICPA Code of Professional Conduct requires an AICPA member who performs an audit (the auditor) to comply with standards promulgated by the Auditing Standards Board (ASB). The ASB develops and issues standards in

---

[1] See paragraph .06 of AU section 326, *Audit Evidence* (AICPA, *Professional Standards*), for the definition of the term *appropriate*.

[2] The reporting standards apply only when the auditor issues a report.

[3] When an auditor reports on financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles, the first standard of reporting is satisfied by stating in the auditor's report that the basis of presentation is a comprehensive basis of accounting other than generally accepted accounting principles and by expressing an opinion (or disclaiming an opinion) on whether the financial statements are presented in conformity with the comprehensive basis of accounting used.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

the form of Statements on Auditing Standards (SASs) through a due process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified within the framework of the 10 standards.

.12 The nature of the 10 standards and the SASs requires the auditor to exercise professional judgment in applying them. Materiality and audit risk also underlie the application of the 10 standards and the SASs, particularly those related to field work and reporting.[4] The auditor should be prepared to justify departures from the SASs. When, in rare circumstances, the auditor departs from a presumptively mandatory requirement, the auditor must document in the working papers his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

.13 *Interpretive publications* consist of auditing interpretations of the SASs, appendixes to the SASs,[5] auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position.[6] Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs.

.14 The auditor should be aware of and consider interpretive publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he complied with the SAS provisions addressed by such auditing guidance.

.15 *Other auditing publications* include the following:

- AICPA auditing publications not referred to previously
- Auditing articles in the *Journal of Accountancy* and other professional journals
- Auditing articles in the AICPA *CPA Letter*
- Continuing professional education programs and other instructional materials, textbooks, guide books, audit programs and checklists; and other auditing publications from state CPA societies, other organizations and individuals.[7]

Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

---

[4] See AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*).

[5] Appendixes to the Statements on Auditing Standards (SASs) referred to in paragraph .05 of AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*), do not include previously issued appendixes to original pronouncements that when adopted modified other SASs.

[6] Auditing interpretations of the SASs are included in the codified version of the SASs. AICPA Audit and Accounting Guides and auditing Statements of Position are listed in AU appendix D, "AICPA Audit and Accounting Guides and Statements of Position" (AICPA, *Professional Standards*).

[7] The auditor is not expected to be aware of the full body of other auditing publications.

.16 If an auditor applies the auditing guidance included in an other auditing publication, he should be satisfied that, in his judgment, it is both relevant to the circumstances of the audit, and appropriate. In determining whether an other auditing publication is appropriate, the auditor may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SASs and the degree to which the issuer or author is recognized as an authority in auditing matters. Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.[8]

[*The next page is 3141.*]

[8] Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff as listed in AU appendix F, "Other Auditing Publications" (AICPA, *Professional Standards*).

AAM Section 3110

Assigning Personnel to the Engagement and Supervision

General Comments

.01 Engagement planning includes procedures for assigning personnel to the engagement. Having procedures established provides the firm with reasonable assurance that work will be performed by persons having the degree of technical training and proficiency required in the circumstances. Generally, the more able and experienced the personnel assigned to a particular engagement, the less need for direct supervision.

.02 Some procedures regarding assignment of personnel to the engagement are discussed in this section. The specific procedures adopted by a firm would not necessarily include all the procedures or be limited to those discussed. Overall firm guidance for assigning personnel to engagements is addressed in the practice aid *Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (product no. 006636), and in "A Firm's System of Quality Control" in section 10,200. Sample quality control forms are available at section 10,300, which are helpful in assigning personnel to engagements.

Engagement Planning Procedures

.03 A time budget for the engagement is prepared to determine manpower requirements and to schedule field work. The engagement partner may approve the time budget prior to the beginning of field work. A time budget may have columns for budgeted time (in hours) for preliminary and final field work. Time budget forms differ depending upon firm preference and needs. Some firms use separate forms for the time budget report and the job progress report or analysis (see paragraph .01 of section 3160 for "Audit Time Budget—Sample A"), whereas others combine these reports into one form (see paragraph .02 of section 3160 for "Audit Time Budget—Sample B").

.04 Other alternatives include longer, more detailed sets of forms. These forms combine the features of a time budget, a source document for staff scheduling, and a job progress report that compares each assigned person's actual daily hours against the budget. Some firms use a shorter, less detailed form for jobs of less than a predetermined number of staff hours (for example, 100 hours; see paragraph .03 of section 3160 for "Audit Time Analysis—Short Form") and a longer form for jobs requiring more time (see paragraph .04 of section 3160 for "Audit Time Analysis—Long Form"). Some firms use a weekly (or daily) progress report (see paragraph .05 of section 3160, for example). This report, submitted by the auditor in charge, shows the time actually spent in relation to the estimate, the estimated additional time required, and the estimated variance from the original estimate.

.05 When the combined time budget and progress report form (sample B) is used, it is kept current as the assignment progresses. This form is carried in the working papers file and is filled in daily by the auditor in charge for all persons applying time on the engagement. This procedure is vital to identify and control time because it is applied so that it can be compared to the budgeted time for that phase of the engagement.

.06 The following factors may be considered in achieving a balance of engagement manpower requirements, personnel skills, individual development, and utilization:

a. Engagement size and complexity

b. Personnel availability

c. Special expertise

d. Timing of the work to be performed

e. Continuity and periodic rotation of personnel

f. Opportunities for on-the-job training

.07 The scheduling and staffing of the engagement is approved by the partner with final responsibility for the engagement so that the partner can consider the qualifications, experience, and training of personnel to be assigned. The experience and training of the engagement personnel is considered in relation to the complexity or other requirements of the engagement and the extent of supervision to be provided.

.08 It is recommended that the auditor document all procedures discussed in this section in the auditor's working papers.

Supervision

.09 Supervision involves directing the efforts of assistants who are involved in accomplishing the objectives of the audit and determining whether those objectives were accomplished. Elements of supervision include instructing assistants, keeping informed of significant issues encountered, reviewing the work performed, and dealing with differences of opinion among firm personnel. The extent of supervision appropriate in a given instance depends on many factors, including the complexity of the subject matter and the qualifications of persons performing the work, including knowledge of the client's business and industry.

.10 The auditor with final responsibility for the audit should communicate with members of the audit team regarding the susceptibility of the entity's financial statements to material misstatement due to error or fraud, with special emphasis on fraud. Such discussion helps all audit team members understand the entity and its environment, including its internal control, and how risks that the entity faces may affect the audit. The discussion should emphasize the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating evidence throughout the audit.[1]

.11 In addition, assistants should be informed of their responsibilities and the objectives of the audit procedures they are to perform. They should be informed of matters that may affect the nature, timing, and extent of audit procedures they are to perform, such as the nature of the entity's business as it relates to their assignments and possible accounting and auditing issues. The auditor with final responsibility for the audit should direct assistants to bring to his or her attention accounting and auditing issues raised during the audit that the assistant believes are of significance to the financial statements or auditor's report so the auditor with final responsibility may assess their significance. Assistants also should be directed to bring to the attention of appropriate individuals in the firm difficulties encountered in performing the audit, such as missing documents or resistance from client personnel in providing access to information or in responding to inquiries.

.12 The work performed by each assistant, including the audit documentation, should be reviewed to determine whether it was adequately performed and documented and to evaluate the results, relative to the conclusions to be presented in the auditor's report.

[1] For further guidance on the discussion among the audit team, see paragraphs .14–.18 of AU section 316, *Consideration of Fraud in a Financial Statement Audit*, and paragraphs .14–.20 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*).

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.13 Each assistant has a professional responsibility to bring to the attention of appropriate individuals in the firm disagreements or concerns with respect to accounting and auditing issues that the assistant believes are of significance to the financial statements or auditor's report, however those disagreements or concerns may have arisen. The auditor with final responsibility for the audit and assistants should be aware of the procedures to be followed when differences of opinion concerning accounting and auditing issues exist among firm personnel involved in the audit. Such procedures should enable an assistant to document his or her disagreement with the conclusions reached if, after appropriate consultation, he or she believes it necessary to disassociate himself or herself from the resolution of the matter. In this situation, the basis for the final resolution should also be documented.

AAM Section 3115

Independence

General Comments

.01 In accordance with Rule 101, *Independence* (AICPA, *Professional Standards*, ET sec. 101 par. .01), of the AICPA Code of Professional Conduct, a member in public practice shall be independent in the performance of professional services, as required by standards promulgated by bodies designated by council, which includes but is not limited to attest engagements.[1] Attest engagements are those in which your firm attests—or affirms—that a client's financial or other information is reasonably stated. Examples of attest services are

- financial statement audits,
- financial statement reviews, and
- other attest services as defined in the Statements on Standards for Attestation Engagements.

.02 Third parties—investors, creditors, and others—rely on your firm's attestations about a client's financial information when making various business decisions. Therefore, attest services have value for third parties only if an *independent firm* renders the services. Accordingly, AICPA *Professional Standards* states that the auditor must maintain independence in mental attitude in all matters relating to the audit; therefore, your firm may perform attest services for a client *only* when it is independent of that client. Independence is not required to perform the following services, if these are the *only* services your firm provides to a client:

a. Tax preparation and advice

b. Consulting services (such as tax consulting or personal financial planning)

.03 Engagement planning includes procedures to provide the firm with reasonable assurance that all persons required to maintain independence, to the extent required by the AICPA Code of Professional Conduct and the regulations of other organizations, as applicable (for example, the Securities and Exchange Commission [SEC], and the Department of Labor), do so. The interpretations and rulings under Ethics Rule 101 of the AICPA Code of Professional Conduct contain examples of instances wherein a firm's independence will be considered to be impaired.

.04 As stated in the following text, audit firms that perform audits of or perform other attest services for public companies or other SEC registrants should consult the independence rules of the SEC and the Public Company Accounting Oversight Board (PCAOB).

.05 Other organizations that have established other independence requirements that a member should consult if applicable include the following:

- State boards of accountancy
- State CPA societies
- Federal and state agencies, such as the Governmental Accountability Office (GAO)

.06 Generally, the AICPA independence rules will apply to you in all situations involving an attest client. If an additional set of rules governing an engagement also applies, you should comply with the most restrictive rule or the most restrictive portions of each rule. The AICPA's Practice Aids, *Independence Compliance—Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006661), and

[1] Additional requirements for public companies and companies are subject to other governmental oversight.

Independence Compliance: Checklists and Tools for Complying with AICPA, SEC, and PCAOB Independence Requirements (product no. 006660), are valuable resources for helping practitioners observe applicable independence rules. The practice aids can be obtained by searching for the aforementioned product numbers at www.cpa2biz.com or by calling (888) 777-7077.

Maintaining Your Independence[*, 2]

.07 Maintaining your independence is your responsibility, not your firm's. As part of its quality control system, the firm is often required to address independence matters; however, ultimately it is up to you to follow firm policies and the independence rules. Many firms require you to certify your independence on a regular basis. The following are some suggestions that will help you to complete and sign that certification in good faith.

.08 *Gain an understanding of the independence rules and firm policies.* As a prerequisite to establishing and maintaining the independence, a good, working understanding of the basic independence rules is essential. Accordingly, in addition to this brief discussion about independence, CPAs should also consult and understand the AICPA Code of Professional Conduct. It is also important to be aware of the circumstances in which you and your immediate family meet the definition of a covered member (discussed in the following section in greater detail) and of the types of relationships you and your immediate family may have with the firm's clients that could impair independence. If you have any questions about independence matters, you may consult with someone in your firm who is knowledgeable about such matters, or you may seek the advice of the AICPA (ethics@aicpa.org). If your firm performs audits and other attest services for SEC registrants, you should also familiarize yourself with rules promulgated by the SEC and the PCAOB.

Covered Member

.09 Know when you meet the definition of a covered member. Whenever you are a *covered member* with respect to a particular attest client, you become subject to the highest possible level of independence restrictions (for example, restrictions on financial and business interests, and your family's employment). According to paragraph .06 of ET section 92, *Definitions* (AICPA, *Professional Standards*), you are a *covered member* with respect to a client if you are

a. an individual on the attest engagement team;

b. an individual in a position to influence the attest engagement;

c. a partner or manager who provides more than 10 hours of nonattest services to the attest client;

d. a partner in the office in which the lead attest engagement partner primarily practices in connection with the attest engagement;

e. the firm, including the firm's employee benefit plans; or

f. an entity whose operating, financial, or accounting policies can be controlled (as defined by generally accepted accounting principles [GAAP] for consolidation purposes) by any of the individuals or entities described in (*a*)–(*e*) or by two or more such individuals or entities if they act together.

[*] In July 2010, the AICPA Professional Ethics Executive Committee released Interpretation No. 101-17, "Networks and Network Firms," under Rule 101, *Independence* (AICPA, *Professional Standards*, ET sec. 101 par. .19). Interpretation No. 101-17 established definitions for the terms *network* and *network firm* in paragraphs .21–.22 of ET section 92, *Definitions* (AICPA, *Professional Standards*), respectively, that address practice by accounting firms within certain types of membership associations, that is, networks. Interpretation No. 101-17 specifies that when firms and entities in an association cooperate with each other for the purpose of enhancing their capabilities to provide professional services and when they share certain characteristics, the association is considered to be a network, and the firms and other entities that belong to the network are considered to be network firms and must be independent of certain attest clients of the other network firms. Interpretation No. 101-17 is effective for engagements covering periods beginning on or after July 1, 2011, and may be found at www.aicpa.org/Research/Standards/CodeofConduct/Pages/et_101.aspx#10117.

[2] The staff of the AICPA Professional Ethics Division prepared a plain-English digest of the AICPA independence rules to help you to understand independence requirements under the AICPA Code of Professional Conduct and, if applicable, other rule-making and standard-setting bodies. This digest of the AICPA independence rules is available on the AICPA Professional Ethics Division's website at www.aicpa.org/InterestAreas/ProfessionalEthics/Resources/Tools/DownloadableDocuments/plainenglish.doc.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.10 However, due to their magnitude, two relationships with a client impair independence even when you are *not* a covered member.

The following rules apply to partners and professional employees of a firm who are not covered members:

- No partner or professional employee may be simultaneously associated with an attest client during the period covered by the financial statements or during the period of the professional engagement as a
  - — director, officer, or employee (or in any capacity equivalent to a member of management),
  - — promoter, underwriter, or voting trustee, or
  - — trustee of any of the client's pension or profit-sharing trust.
- No partner or professional employee, his or her immediate family, or any group of such persons acting together may own more than 5 percent of an attest client's outstanding equity securities (or other ownership interests).

Family Members

.11 The investments and employment of certain family members may impair your independence. Know which of your family members meet the definition of *immediate family* and which ones meet the definition of *close relative* as defined in ET section 92.

.12 If you are a covered member with respect to a client, members of your immediate family (your spouse, spousal equivalent, or dependents [whether related or not]) should follow the same rules as you. So, for example, your spouse's investments should be investments that you could own under the rules. This would be the case even if your spouse keeps the investments in his or her own name or with a different broker.

.13 The following are exceptions to this general rule:

a. Your immediate family member's employment with a client would not impair your firm's independence provided he or she is not in a *key position*. A key position is one in which your immediate family member

  i. has primary responsibility for significant accounting functions that support material components of the financial statements;

  ii. has primary responsibility for preparing the financial statements; or

  iii. has the ability to exercise influence over the contents of the financial statements, including when the individual is a member of the board of directors or similar governing body, CEO, president, CFO, chief operating officer, general counsel, chief accounting officer, controller, director of internal audit, director of financial reporting, treasurer, or any equivalent position.

b. Immediate family members in permitted employment positions may participate in certain employee benefit plans that are attest clients or are sponsored by an attest client, provided the plan is offered to all employees in comparable positions and the immediate family member does not serve in a position of governance for the plan or have the ability to supervise or participate in the plan's investment decisions or selection of investment options.

c. Immediate family members of *certain* covered members may have a financial interest in a client through an employee benefit plan (for example, retirement or savings account) provided the immediate family member has no other investment options available for selection, and when such option becomes available, the immediate family member selects the option and disposes of any direct or material indirect financial interest in the attest client.

d. Immediate family members in permitted employment positions of certain covered members may participate in share-based compensation arrangements and nonqualified deferred compensation plans provided certain safeguards are implemented.

e. The covered members whose families may invest or participate in the plans described in preceding items *c* and *d* are the following:

i. Partners and managers who are covered members only because they provide nonattest services to the client

ii. Partners who are covered members only because they practice in the same office where the client's lead attest partner practices in connection with the engagement

.14 Also note that at no time may any direct or material indirect financial interests in an attest client permitted by the preceding exceptions exceed 5 percent of the attest client's outstanding equity securities or other ownership interests.

.15 The close relatives of *most* covered members will be subject to some employment and financial restrictions. These covered members are

- persons on the attest engagement team,
- persons who can influence the attest engagement, and
- any partners in the office where the client's lead partner the attest engagement.

.16 Close relatives are your

- nondependent children,
- siblings, or
- parents.

.17 Therefore, as a covered member, your close relative's employment by a client would impair independence if your relative had a key position with the client. However, if you are a covered member who provides only nonattest services to a client, then your close relative's employment by a client in a key position would not impair independence.

.18 Rules pertaining to your close relatives' financial interests differ depending on why you are considered a covered member:

- If you are a covered member because you participate on the client's attest engagement team, your independence would be considered to be impaired if you are aware that your close relative has a financial interest in the client that either
  - — was material to your relative's net worth and of which you have knowledge or
  - — enables the relative to exercise significant influence over the client.
- If you are a covered member because you are able to influence the client's attest engagement or are a partner in the office in which the lead attest engagement partner practices in connection with the engagement, your independence will be impaired if you are aware that your close relative has a financial interest in the client that
  - — is material to your relative's net worth and of which you or the partner have knowledge and
  - — enables your relative to exercise significant influence over the client.

Financial Relationships

.19 There are various types of financial interests and some of those interests affect independence. Although your firm and its employee benefit plans are also subject to the financial interest provisions of the independence rules (firms are included in the definition of *covered member*), here we focus on their application to individuals.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.20 As a covered member with respect to a particular client, you (and your spouse, or equivalent, and dependents) may not have a

- direct financial interest in that client, regardless of how immaterial it would be to your net worth.
- material indirect financial interest in that client.

> ***Note:*** The AICPA Code of Professional Conduct does not define or otherwise provide guidance on determining materiality. In determining materiality, you should apply professional judgment to all relevant facts and circumstances and refer to applicable guidance in the professional literature. Both qualitative and quantitative factors should be considered.

.21 In addition, if you commit to acquire a financial interest in a client with respect to which you are a covered member, your independence would be impaired. For example, if you sign a stock subscription agreement with the client, your independence would be considered impaired as soon as you sign the agreement.

.22 According to Interpretation No. 101-15, "Financial Relationships," under Rule 101 (AICPA, *Professional Standards*, ET sec. 101 par. .17), a *financial interest* is an ownership interest in an equity or a debt security issued by an entity, including rights and obligations to acquire such an interest and derivatives directly related to such interest.

.23 Examples of financial interests include shares of stock, mutual fund shares, debt security issued by an entity, partnership units, stock rights, options, or warrants to acquire an interest in a client; or rights of participation, such as puts, calls, or straddles.

.24 Direct financial interests are financial interests that are

- owned by you directly;
- under your control; or
- beneficially owned[3] by you through an investment vehicle, estate, trust, or other intermediary if you can either
  - — control the intermediary, or
  - — have the authority to supervise or participate in the intermediary's investment decisions.

For example, if you invest in a participant directed 401(k) plan, whereby you are able to select the investments held in your account or are able to select from investment alternatives offered by the plan, you would be considered to have a direct financial interest in the investments held in your account.

.25 You also have a direct financial interest in a client when you have a financial interest in a client through one of the following:

- A partnership, if you are a general partner.
- A Section 529 savings plan, if you are the account owner.
- An estate, if you serve as an executor and meet certain other criteria.
- A trust, if you serve as the trustee and meet certain other criteria.

.26 Indirect financial interests arise if you have a financial interest that is beneficially owned through an investment vehicle, estate, trust, or other intermediary when you can neither control the intermediary nor have the authority to supervise or participate in the intermediary's investment decisions. For example, if you

[3] A financial interest is beneficially owned whether or not the individual or entity is the record owner of the interest but has a right to some or all of the underlying benefits of ownership. These benefits include the authority to direct the voting or disposition of the interest or to receive the economic benefits of the ownership of the interest.

invest in a defined contribution plan that is not participant directed and you have no authority to supervise or participate in the plan's investment decisions, you would be considered to have an indirect financial interest in the underlying plan investments, in addition to a direct financial interest in the plan.

.27 Extensive examples of various types of financial interests and whether they should be considered as direct or indirect financial interests, including investments in mutual funds, compensation, retirement and savings plans, Section 529 plans, trusts, partnerships, limited liability companies, and insurance products, can be found in Interpretation No. 101-15.

Employment or Association With Client

.28 As a partner or professional employee of your firm, independence would be considered to be impaired if you entered into certain business relationships with an attest client of the firm. Accordingly, you may not serve a client as any of the following:

- Director, officer, employee, or in any management capacity
- Promoter, underwriter, or voting trustee
- Stock transfer or escrow agent
- General counsel (or equivalent)
- Trustee for a client's pension or profit-sharing trust

.29 In essence, any time you are able to make management decisions on behalf of a client or exercise authority over a client's operations or business affairs, independence is considered impaired.

.30 Your independence is considered impaired even if you were a volunteer board member because you would be part of the client's governing body and therefore would be able to participate in the client's management decisions.

.31 If you are an honorary director or trustee for a client that is a nonprofit charitable, civic, or religious organization, you will not be considered employed by or associated with the client. For this to occur,

a. your position is purely honorary.

b. you may not vote or participate in managing the organization.

c. your position is clearly identified as honorary in any internal or external correspondence.

In addition, if you serve on a client's advisory board, you will not be considered employed by or associated with the client provided

a. the advisory board's function is purely advisory.

b. the advisory board does not appear to make decisions for the client.

c. the advisory board and any decision making boards are separate and distinct bodies.

d. common membership between the advisory board and any decision making groups is minimal.

Practice Tip

Before accepting an invitation to serve on a client's advisory board, a covered member may ask to review the advisory board's governing document to verify that the advisory board's function is indeed purely advisory and that the advisory board indeed does not make decisions for the client.

Unpaid Fees

.32 If a client of the member's firm has not paid fees for previously rendered professional services, then independence is considered to be impaired if, when the report on the client's current year is issued, billed or

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

unbilled fees, or a note receivable arising from such fees, remain unpaid for any professional services provided more than one year prior to the date of the report.

Restricted Entities

.33 Be familiar with the firm's restricted entities. Restricted entities are those entities for whom the firm provides attest services. Many firms maintain a formal list or database of these clients. If yours is one of these firms, you should know how to access the list.

.34 Maintain the integrity of the restricted entity list. If you perform attest services, then you need to make sure that those clients are identified as restricted entities of the firm. Certain entities that are related to your clients (for example, subsidiaries) also will be considered restricted entities, even if they are not clients of the firm.

.35 Consult the restricted entities list regularly. Get into the habit of referring to the firm's restricted entity list whenever you are considering changes in circumstances that could affect your independence. For example, you may consult the restricted entity list prior to

- making an investment or acquiring a financial interest in an entity.
- entering into a business relationship.
- obtaining a loan or refinancing an existing loan.
- having an immediate family member change employers or assume new responsibilities at an existing job.

Nonattest Services[4]

.36 Be aware of the rules relating to the performance of nonattest services. If you provide nonattest services to restricted entities, you should be familiar with Interpretation No. 101-3, "Performance of Nonattest Services," under Rule 101 (AICPA, *Professional Standards*, ET sec. 101 par. .05) that establishes standards and provides guidance regarding the performance of nonattest services. Interpretation No. 101-3 discusses the services that are permitted and prohibited under the ruling, as well as the member's responsibilities for establishing an understanding of the engagement with your client and documenting various aspects of the engagement. If your clients are SEC registrants, you should be aware of the more restrictive SEC rules in this area. Certain other regulators (for example, the GAO) may have more restrictive rules concerning nonattest services, which should be reviewed depending upon the circumstances of the engagement.

.37 The term *nonattest services* includes accounting and consulting services that are not part of an attest engagement.[5] Nonattest services specifically addressed in the rules are as follows:

- Bookkeeping services
- Nontax disbursement services
- Internal audit assistance
- Benefit plan administration
- Investment advisory or management services
- Tax compliance services
- Corporate finance consulting or advisory
- Appraisal, valuation, or actuarial services

---

[4] The staff of the AICPA Professional Ethics Division issued nonauthoritative guidance in the form of a frequently asked question (FAQ) regarding performance of nonattaest services. The FAQ document is available on the AICPA Professional Ethics Division's website at www.aicpa.org/InterestAreas/ProfessionalEthics/Resources/Tools/DownloadableDocuments/NonattestServicesFAQs.doc.

[5] As defined in the Code of Professional Conduct, an *attest engagement* is one that requires independence under *Professional Standards*; for example, audits and reviews of financial statements or agreed upon procedures performed under the attestation standards.

- Executive or employee search services
- Business risk consulting
- Information systems design, installation, or integration
- Forensic accounting services

.38 Interpretation No. 101-3 lists three general requirements in order to maintain independence when performing permitted nonattest services.

.39 The first of the three general requirements of Interpretation No. 101-3 states that a member should not perform—or even appear to perform—management functions or make management decisions for an attest client. (However, the member may provide advice, research materials, and recommendations to assist the client's management in performing its functions and making decisions.)

.40 The second general requirement is that the client must agree to perform the following functions in connection with the engagement:

- Make all management decisions and perform all management functions
- Designate an individual who possesses suitable skill, knowledge, or experience, preferably within senior management, to oversee the services
- Evaluate the adequacy and results of the services performed; and
- Accept responsibility for the results of the services

The member should be satisfied that the client will be able to meet all of these criteria and to make an informed judgment on the results of the member's nonattest services. In assessing whether the designated individual possesses suitable skill, knowledge, or experience, the member should be satisfied that the individual understands the services to be performed sufficiently to oversee them. However, the individual is not required to possess the expertise to perform or reperform the services. In cases where the client is unable or unwilling to assume these responsibilities (for example, the client does not have an individual with suitable skill, knowledge, or experience to oversee the nonattest services provided, or is unwilling to perform such functions due to lack of time or desire), the member's provision of these services would impair independence.

.41 The third general requirement is that before performing nonattest services, the member should establish and document in writing his or her understanding with the client (for example, the board of directors, audit committee, or management, as appropriate in the circumstances) regarding the following:

- Objectives of the engagement
- Services to be performed
- Client's acceptance of its responsibilities
- Member's responsibilities
- Any limitations of the engagement

The understanding might be documented in a separate engagement letter, in the working papers, or in an internal memo, or it might be included in an engagement letter obtained in conjunction with an attest engagement.

.42 The second and third general requirements do not apply to certain routine activities performed by the member, such as, assisting clients with technical accounting questions, advising on internal controls, or providing periodic training on new pronouncements that are part of the normal client-member relationship.

.43 In addition, the following are examples of the types of activities that impair independence:

- Authorizing, executing, or consummating a transaction, or otherwise exercising authority on behalf of a client or having the authority to do so

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

- Preparing source documents, in electronic or other form, evidencing the occurrence of a transaction
- Having custody of client assets
- Supervising client employees in the performance of their normal recurring activities
- Determining which recommendations of the member should be implemented
- Reporting to the board of directors on behalf of management
- Serving as a client's stock transfer or escrow agent, registrar, general counsel, or its equivalent
- Establishing and maintaining internal controls, including performing ongoing monitoring activities for a client

.44 Additionally, Interpretation No. 101-3 requires you comply with more restrictive independence provisions, if applicable, of certain regulators such as state boards of accountancy, the SEC, and the GAO.

.45 *Report any apparent violations*. If you become aware of any apparent violations of the independence rules, you should report these immediately to the person in your firm responsible for independence matters.

.46 The procedures employed at the engagement level should be designed to ascertain whether the firm and its partners and employees have complied with all applicable independence rules. Overall firm requirements for independence are addressed in Statement on Quality Control Standards (SQCS) No. 7, *A Firm's System of Quality Control* (AICPA, *Professional Standards*, QC sec. 10A).[6]

On the Horizon

In February 2011, the AICPA Professional Ethics Division released an omnibus proposal that contained important clarifying language regarding CPAs' provision of nonattest services. Among them, it made clear that certain bookkeeping and other nonattest services that help clients produce more reliable financial information are permitted under the interpretation even though they may be viewed as maintaining internal control for the client. For example, it clarified that a practitioner is allowed to prepare and maintain monthly account reconciliations for an attest client provided the client accepts responsibility for the services and the other general requirements of Interpretation No. 101-3 are met, such as ensuring that the client reviews and approves the account reconciliations and sufficiently understands the services performed to oversee them. This clarification was made because some have interpreted the current standard as prohibiting these activities and the change reinforces that they are permissible. The exposure draft also proposed that *management functions* be changed to *management responsibilities* and provided additional examples of the types of activities that would be considered to be responsibilities of management and, therefore, impair independence. Comments on the exposure draft were due by May 31, 2011. An overview of planned changes to Interpretation No. 101-3 can be found at www.aicpa.org/InterestAreas/ProfessionalEthics/Community/ExposureDrafts/DownloadableDocuments/ClarificationsToNonattestServices.pdf.

Independence Quality Controls

.47 Paragraph .21 of SQCS No. 7[7] states that the firm should establish policies and procedures designed to provide it with reasonable assurance that the firm, its personnel, and, where applicable, others subject to independence requirements, maintain independence where required. Independence requirements are set forth in ET section 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Guidance on threats to independence, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time and safeguards to mitigate such threats involving matters that are not explicitly addressed in the AICPA Code of Professional Conduct are set forth in ET section

[6] Refer to section 10,000, "Quality Control," for additional discussion of Statement on Quality Control Standards No. 7, *A Firm's System of Quality Control* (AICPA, *Professional Standards*, QC sec. 10A), and establishing and maintaining a firm's system of quality control.

[7] See footnote 6.

100, *Conceptual Framework for AICPA Independence Standards* (AICPA, *Professional Standards*). Such policies and procedures should enable the firm to

a. communicate its independence requirements to its personnel and, where applicable, others subject to them.

b. identify and evaluate circumstances and relationships that create threats to independence and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safe guards, or, if effective safeguards cannot be applied, withdrawing from the engagement.

.48 Such policies and procedures should require

a. the engagement partner to consider relevant information about client engagements, including the scope of services, to enable him or her to evaluate the overall effect, if any, on independence requirements.

b. personnel to promptly notify the engagement partner and the firm of circumstances and relationships that create a threat to independence so that appropriate action can be taken.

c. the accumulation and communication of relevant information to appropriate personnel so that

i. the firm, the engagement partner, and other firm personnel can readily determine whether they satisfy independence requirements;

ii. the firm can maintain and update information relating to independence; and

iii. the firm and the engagement partner can take appropriate action regarding identified threats to independence.

.49 The firm should establish policies and procedures designed to provide it with reasonable assurance that it is notified of breaches of independence requirements and to enable it to take appropriate actions to resolve such situations. The policies and procedures should include requirements for

a. personnel to promptly notify the firm of independence breaches of which they become aware.

b. the firm to promptly communicate identified breaches of these policies and procedures and the required corrective actions to

i. the engagement partner who, with the firm, has the responsibility to address the breach; and

ii. other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action.

c. confirmation to the firm by the engagement partner and the other individuals referred to previously in subparagraph (b[2]) that the required corrective actions have been taken.

.50 At least annually, the firm should obtain written confirmation of compliance with its policies and procedures on independence from all firm personnel required to be independent by the requirements set forth in ET section 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Written confirmation may be in paper or electronic form.

.51 The purpose of obtaining confirmation and taking appropriate action on information indicating noncompliance is to demonstrate the importance that the firm attaches to independence and keep the issue current for and visible to its personnel.

.52 For all audit or attestation engagements where regulatory or other authorities require the rotation of personnel after a specified period, the firm's policies and procedures should address these requirements.

Additional Guidance

.53 It is recommended that the auditor document all procedures discussed in this section in his or her working papers.

.54 International independence standards are established by the International Federation of Accountants' (IFAC) International Ethics Standards Board for Accountants and can be found in section 290, *Independence—Audit and Review Engagements*, and section 291, *Independence—Other Assurance Engagements*, of the IFAC's Code of Professional Ethics for Professional Accountants. The IFAC's Code of Professional Ethics for Professional Accountants can be found at http://web.ifac.org/publications/international-ethics-standards-board-for-accountants/code-of-ethics.

.55 For additional guidance practitioners may refer to the AICPA Audit Risk Alert *Independence and Ethics Developments* (product no. 0224710 and reproduced in section 8240). This annual alert informs you of recent developments in the area of independence and ethics for members, including developments in international independence standards discussed previously in paragraph .54. Moreover, the alert helps you understand your independence requirements under the AICPA Code and, if applicable, certain other rule making and standard setting bodies. Also, the alert contains the AICPA Plain English Guide to Independence, which discusses the independence rules of the principal standard setting bodies in plain, straight forward English so you can understand and apply them with greater confidence and ease.

AAM Section 3120

Obtaining an Understanding of the Entity and Its Environment

General

.01 In accordance with the second standard of field work, "the auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures." Obtaining an understanding of the entity and its environment is an essential aspect of performing an audit in accordance with generally accepted auditing standards. In particular, that understanding establishes a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing risks of material misstatement of the financial statements and responding to those risks throughout the audit, for example, when

- establishing materiality for planning purposes and evaluating whether that judgment remains appropriate as the audit progresses;
- considering the appropriateness of the selection and application of accounting policies and the adequacy of financial statement disclosures;
- identifying areas where special audit consideration may be necessary, for example, related party transactions, the appropriateness of management's use of the going-concern assumption, complex or unusual transactions, or considering the business purpose of transactions;
- developing expectations for use when performing analytical procedures;
- designing and performing further audit procedures to reduce audit risk to an appropriately low level; and
- evaluating the sufficiency and appropriateness of audit evidence obtained, such as evidence related to the reasonableness of management's assumptions and of management's oral and written representations.

.02 The auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment, including its internal control. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures. The depth of the overall understanding that the auditor obtains in performing the audit is less than that possessed by management in managing the entity.

.03 Obtaining an understanding of the entity and its environment, including its internal control, is a continuous, dynamic process of gathering, updating, and analyzing information throughout the audit. Throughout this process, the auditor should also follow the guidance in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*). See further discussion in section 3145, "Fraud."

Risk Assessment Procedures

.04 Audit procedures performed to obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels are referred to as *risk assessment procedures*. The auditor must perform risk assessment procedures to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels.

.05 The auditor should perform the following risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control:

a. Inquiries of management and others within the entity

b. Analytical procedures

c. Observation and inspection

.06 Risk assessment procedures are designed to gather and evaluate information about the client and are not specifically designed as substantive procedures or as tests of controls. Nevertheless, in performing risk assessment procedures, the auditor may obtain evidence about relevant assertions or the effectiveness of controls.

Inquiry of Management and Others

.07 Although much of the information obtained by inquiry can be obtained from management, accounting personnel, and others involved in the financial reporting process, it is often helpful to direct inquires to others within the entity. For example, people who work in production, sales, or internal audit, as well as individuals employed at different levels within the organization can provide a different perspective that helps identify risks of material misstatement. Inquiries of others can also help corroborate or provide additional details to the statements and representations made by management and accounting personnel. The following table provides examples of other individuals within the entity who might be able to help the auditor identify and assess the risks of material misstatement.

Examples of Inquires of Others Within the Entity

.08

Inquiries of these individuals (outside of management or the financial reporting process, or both)	*May help the auditor understand*
Those charged with governance	• the environment in which the financial statements are prepared. • whether they have knowledge of any fraud or suspected fraud. • how they exercise oversight of the entity's programs and controls that address fraud. • their views on where the company is most vulnerable to fraud. • how financial statements are used.
Internal audit personnel	• the design and operating effectiveness of internal control. • internal audit activities related to internal control over financial reporting. • whether management has responded satisfactorily to internal audit findings. • their views on where the company is most vulnerable to fraud.
Employees involved in the initiation, processing, or recording of complex or unusual transactions	• the controls over the selection and application of accounting policies related to those transactions. • the business rationale for those transactions.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Inquiries of these individuals (outside of management or the financial reporting process, or both)	*May help the auditor understand*
IT systems users	• how IT users identify changes to IT systems and how frequently those changes occur. • how users "work around" IT systems for those circumstances where the IT system does not support them. • how logical access to data and applications is controlled. • how remote access to the system is controlled. • excessive system down time and other indicators that the system is not functioning properly.
In-house legal counsel	• litigation. • compliance with laws and regulations. • fraud or suspected fraud. • warranties. • post sales obligations. • arrangements such as joint ventures. • the meaning of certain contract terms.
Marketing, sales, or production personnel	• marketing strategies. • sales trends. • production strategies. • contractual arrangements with customers. • any pressures to meet budgets or change reported performance measures.

Analytical Procedures

.09 AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*), specifies that the auditor should apply analytical procedures in planning the audit. The objective of these procedures is to help the auditor understand the client and its environment and, ultimately, to assess the risks of material misstatement. As such, the auditor may consider the analytical procedures performed during audit planning to be a risk assessment procedure that provides some broad audit evidence to support the opinion on the financial statements.

.10 Refer to paragraphs .06–.08 of AU section 329 for additional guidance on the performance of analytical procedures in planning the audit.

.11 The results of analytical procedures may help the auditor obtain an understanding of the entity. For example, analytical procedures may be helpful in identifying

- the existence of unusual transactions or events, which may indicate the presence of significant risks, and
- amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. For example, an unexpected amount, ratio, or trend may be the result of a misstatement that was not prevented or detected and corrected by the client's system of internal control.

Observations and Inspection of Documents

.12 The auditor may use observation and the inspection of documents to support the responses received to the inquiries of management and others. Additionally, the observations and inspections will provide the auditor with further information about the entity and its environment, including its internal control, that might not otherwise be obtained.

.13 The procedures performed to observe activities and inspect documents typically include the following:

- Observation of client activities and operations
- Visits to the client's premises and plant facilities
- Inspection of documents, records, and internal control manuals
- Reading reports prepared by management (such as quarterly management reports and interim financial statements)
- Reading minutes of board of directors' meetings and other documents prepared by those charged with governance and internal audit
- Tracing transactions through the financial reporting information system (walkthroughs)

A Mix of Procedures

.14 The auditor is not required to perform all the risk assessment procedures described previously for each aspect of the understanding described in the following section. However, all the risk assessment procedures should be performed by the auditor in the course of obtaining the required understanding.

Discussion Among the Audit Team

.15 The members of the audit team, including the auditor with final responsibility for the audit, should discuss the susceptibility of the entity's financial statements to material misstatements. The objectives of this discussion are for team members to

- gain a better understanding of the potential for material misstatements of the financial statements resulting from fraud or error in the specific areas assigned to them, and
- understand how the results of the audit procedures they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

.16 This discussion could be held concurrently with the discussion among the audit team that is specified by AU section 316 to discuss the susceptibility of the entity's financial statements to material misstatement due to fraud. See section 3145 for further discussion on fraud.

.17 Topics for audit team discussion include the following:

- Areas of significant audit risk
- Unusual accounting procedures used by the client
- Important control systems
- Significant IT applications and how the client's use of IT may affect the audit
- Areas susceptible to management override of controls
- Materiality at the financial level and at the account level and tolerable misstatement
- How materiality will be used to determine the extent of testing
- The application of generally accepted accounting principles to the client's facts and circumstances and in light of the entity's accounting policies

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

- The need to
  - exercise professional skepticism throughout the engagement
  - remain alert for information or other conditions that indicate that a material misstatement due to fraud or error may have occurred
  - follow up rigorously on any indications of a material misstatement

.18 The auditor should exercise professional judgment to determine logistical matters relating to the audit discussion, such as who should participate, how and when the discussion should occur, and its extent. Key members of the audit team, including the auditor with final responsibility, should be involved in the discussion.

.19 When considering who should participate in the discussion, the auditor also may determine that an IT specialist or other individual possessing specialized skills is needed on the audit team and, therefore, include that individual in the discussion.

Understanding Specified Aspects of the Entity and Its Environment

.20 The auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

a. Industry, regulatory, and other external factors

b. Nature of the entity

c. Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements

d. Measurement and review of the entity's financial performance

e. Internal control, which includes the selection and application of accounting policies

.21 The nature, timing, and extent of the risk assessment procedures performed depend on the circumstances of the engagement, such as the size and complexity of the entity and the auditor's experience with it. In addition, identifying significant changes in any of the previously mentioned aspects of the entity from prior periods is particularly important in gaining a sufficient understanding of the entity to identify and assess risks of material misstatement.

Industry, Regulatory, and Other External Factors

.22 The auditor should obtain an understanding of relevant industry, regulatory, and other external factors. These factors include industry conditions, such as the competitive environment, supplier and customer relationships, and technological developments; the regulatory environment encompassing, among other matters, relevant accounting pronouncements, the legal and political environment, and environmental requirements affecting the industry and the entity; and other external factors, such as general economic conditions.

.23 The industry in which the entity operates may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (such as political, economic, social, technical, and competitive). For example, long term contracts may involve significant estimates of revenues and costs that give rise to risks of material misstatement of the financial statements. Similarly, regulations may specify certain financial reporting requirements for the industry in which the entity operates. In such cases, the auditor should consider whether the audit team includes members with sufficient relevant knowledge and experience. If management fails to comply with such regulations, its financial statements may be materially misstated.

Nature of the Entity

.24 The auditor should obtain an understanding of the nature of the entity. The nature of an entity refers to the entity's operations, its ownership, governance, the types of investments that it is making and plans to make, the way that the entity is structured, and how it is financed. An understanding of the nature of an entity enables the auditor to understand the classes of transactions, account balances, and disclosures to be expected in the financial statements.

Objectives and Strategies and Related Business Risks

.25 The auditor should obtain an understanding of the entity's objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. The entity conducts its business in the context of industry, regulatory, and other internal and external factors. To respond to these factors, the entity's management or those charged with governance define objectives, which are the overall plans for the entity. Strategies are the operational approaches by which management intends to achieve its objectives. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic and the entity's strategies and objectives change over time.

.26 Business risk is broader than the risk of material misstatement of the financial statements, although it includes the latter. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Usually management identifies business risks and develops approaches to address them. Such a risk assessment process is part of internal control and is discussed in paragraphs .76–.80 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*).

Measurement and Review of the Entity's Financial Performance

.27 The auditor should obtain an understanding of the measurement and review of the entity's financial performance. Performance measures and their review indicate to the auditor aspects of the entity's performance that management and others consider to be important. Performance measures, whether external or internal, create pressures on the entity that, in turn, may motivate management to take action to improve the business performance or to misstate the financial statements. Obtaining an understanding of the entity's performance measures assists the auditor in considering whether such pressures result in management actions that may have increased the risks of material misstatement.

.28 Internally generated information used by management for this purpose may include key performance indicators (financial and nonfinancial); budgets; variance analysis; subsidiary information and divisional, departmental, or other level performance reports; and comparisons of an entity's performance with that of competitors. External parties may also measure and review the entity's financial performance. For example, external information, such as analysts' reports and credit rating agency reports, may provide information useful to the auditor's understanding of the entity and its environment. Such reports may be obtained from the entity being audited or from websites.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Internal Control

.29 Refer to section 3125, "Obtaining and Understanding of Internal Control," for the discussion of internal control.

Documentation

.30 The auditor should document the key elements of the understanding obtained regarding each of the aspects of the entity and its environment, including each of the components of internal control (discussed in section 3125) to assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures. See section 6000 for additional discussion on audit documentation.

[*The next page is 3201.*]

AAM Section 3125

Obtaining an Understanding of Internal Control

Introduction

.01 *Internal control* is broadly defined by the Committee of Sponsoring Organizations of the Treadway Commission as a process designed to provide reasonable assurance regarding the achievement of the entity's objectives in the following categories: (*a*) reliability of financial reporting, (*b*) effectiveness and efficiency of operations, and (*c*) compliance with applicable laws and regulations. Internal control is effected by those charged with governance, management, and other personnel.

.02 The previous definition reflects certain fundamental concepts that follow:

A process. Internal control is a process. It is not one event or circumstance, but a series of actions that permeate an entity's activities. These actions are pervasive, and are inherent in the way management runs the business.

People. Internal control is effected by people. It is not accomplished by policy manuals and forms, but the people of an organization, what they do and say. People need to know their responsibilities and limits of authority.

Reasonable assurance. Internal control, no matter how well designed and operated, can provide only reasonable assurance to management and the board of directors regarding achievement of an entity's objectives.

Achievement of objectives. Internal control is geared to the achievement of entity objectives. The definition of these objectives provides auditors with a useful framework for understanding and analyzing internal control.

.03 Auditors should obtain an understanding of their client's internal control during the planning phase of every audit. Paragraph .40 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), states the following:

> The auditor should obtain an understanding of the five components of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures.

.04 As a practical matter, the previous requirement raises the following questions:

- What constitutes a *sufficient understanding*? That is, what should an auditor know about the client's internal control?
- How should an auditor obtain this understanding?

.05 This section provides answers to each of the previous questions.

What Auditors Should Understand About Internal Control

.06 A *sufficient* understanding of internal control means the following:

- The auditor should obtain a sufficient understanding by performing risk assessment procedures to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented.
- This understanding is ordinarily limited to controls that pertain to the entity's objective of preparing reliable financial statements for external purposes.
- That one objective can be broken into five components, and an auditor should obtain an understanding of each of the five components.

.07 Obtaining an understanding of controls is different from testing the operating effectiveness of controls. Obtaining an understanding of internal control involves evaluating the design of a control and determining whether it has been implemented. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements. Implementation of a control means that the control exists and that the entity is using it. The auditor should consider the design of a control in determining whether to consider its implementation. In contrast, the objective of testing the operating effectiveness of controls is to determine whether the controls, as designed, prevent or detect a material misstatement. This includes obtaining audit evidence about how controls were applied at relevant times during the period under audit, the consistency with which they were applied, and by whom or by what means they were applied. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

.08 *The Jones family owns and operates several neighborhood grocery stores in Anytown. On a monthly basis, the controller of Jones Grocery performs bank reconciliations for all the bank accounts. For planning purposes, the auditor of Jones Grocery should determine whether this control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements and determine whether the controller actually performs the reconciliations. Not testing, but identifying controls are a key part of audit planning.*

.09 AU section 314 provides a framework to help auditors obtain their understanding of internal control. That framework is built on two basic concepts: objectives and components.

.10 Internal control is a process designed to provide reasonable assurance regarding the achievement of entity *objectives*. Entities generally have the following three objectives:

Financial reporting. This objective relates to the preparation of reliable published financial statements.

Operations. This objective relates to effective and efficient use of the entity's resources.

Compliance. This objective relates to the entity's compliance with applicable laws and regulations.

.11 *The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the **financial reporting** objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they stock-out. This control activity is part of the **operations** objective. Each store also has a small deli that prepares sandwiches and hot entrees. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the entity's **compliance** objective.*

.12 Ordinarily, relevant controls for an audit relate to the financial reporting objective. Controls relating to operations and compliance objectives that are not relevant to an effective audit need not be considered. It is a matter of the auditor's professional judgment, as to the controls or combination of controls that may be assessed. However, as stated in paragraph .115 of AU section 314, for significant risks, to the extent the auditor has not already done so, the auditor should evaluate the design of the entity's related controls, including relevant control activities and determine whether they have been implemented.

.13 *The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company's financial statement. The*

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

auditor of Jones may wish to inquire and document these controls for client service or other purposes, but because these controls are not relevant to the audit, he or she is not required to do so.

.14 However, if controls relating to operations and compliance objectives pertain to information the auditor evaluates or uses in applying auditing procedures, then they may be relevant to the audit.

.15 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she may consider obtaining an understanding of the following:

- Which transactions or classes of transactions are included in the report
- How significant accounting information about those transactions are entered into and flow through the financial reporting system
- The files that are processed
- The nature of processing involved in producing the report

.16 Controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.17 Controls designed to prevent or detect misappropriations of assets may include controls relating to financial reporting and operations objectives. For example, use of a lockbox system for collecting cash or access controls, such as passwords that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, controls to prevent the excess use of materials in production generally are not relevant to a financial statement audit. An auditor's responsibility to understand internal control is generally limited to those controls relevant to the reliability of financial reporting.

.18 An objective is what an entity strives to achieve. But what is needed to achieve that objective?

.19 AU section 314 provides a framework that separates each financial reporting objective into five components. These components represent what is needed to achieve the entity's objectives. The components of internal control are briefly described as follows:

Control environment. The control environment component is the foundation upon which all other components of internal control are based, and it sets the tone of an organization. A small business can have unique advantages in establishing a strong control environment. Employees in many smaller businesses interact more closely with top management and are directly influenced by management actions. Through day-to-day practices and actions, management can effectively reinforce the company's fundamental values and directives. The close working relationship also enables senior management to quickly recognize when employees' actions need modification.

Risk assessment. Risk assessment, as it relates to the objective of reliable financial reporting, involves identification and analysis of the risks of material misstatement. Establishment of financial reporting objectives articulated by a set of financial statement assertions for significant accounts is a precondition to the risk assessment process. Risk assessment in small businesses can be relatively efficient, often because in-depth knowledge of the company's operations enables the owner and management to have firsthand information of where risks exist. In carrying out their normal responsibilities, including obtaining information gained from employees, customers, suppliers, and others, these managers identify risks inherent in business processes. In addition to focusing on operations and compliance risks, they are positioned to consider the following risks to reliable financial reporting:

- Failing to capture and record all transactions
- Recording assets that do not exist or transactions that did not occur
- Recording transactions in the wrong period or wrong amount or misclassifying transactions

- Losing or altering transactions once recorded
- Failing to gather pertinent information to make reliable estimates
- Recording inappropriate journal entries
- Improperly accounting for transactions or estimates
- Inappropriately applying formulas or calculations

Control activities. Control activities are the policies and procedures that help ensure that management directives are carried out. They help ensure that necessary actions are taken to address risks to achievement of the entity's objectives. Control activities occur throughout the organization at all levels and in all functions. They include a range of activities as diverse as approvals, authorizations, verifications, reconciliations, reviews of operating performance, security of assets, and segregation of duties. When resource constraints compromise the ability to segregate duties, many smaller companies use certain compensating controls to achieve the objectives.

Information and communication systems. Information systems identify, capture, process, and distribute information supporting the achievement of financial reporting objectives. Information systems in small businesses are likely to be less formal than in large ones, but their role is just as significant. Many small businesses rely more on manual or standalone IT applications than complex integrated applications. Effective internal communication between top management and employees may be facilitated in smaller companies due to fewer levels and numbers of personnel and greater visibility and availability of the owner. Internal communication can take place through frequent meetings and day-to-day activities in which the owner and other managers participate.

Monitoring. Internal control systems need to be monitored, which is a process that assesses the quality of the system's performance over time. This is accomplished through ongoing monitoring activities, separate evaluations, or a combination of the two. Managers of many smaller businesses have high-level firsthand knowledge of company activities, and their close involvement in operations positions them to identify variances from expectations and potential inaccuracies in reported financial information.

.20 Some control components, for example the control environment, will have a pervasive effect on the entity's activities. Other components, for example control activities, will be directed primarily toward the achievement of one or more of the three objectives described in paragraph .10 in this section. Auditors are generally interested only in those components of internal control that have a pervasive effect on the entity and those that are directly related to the reliability of financial reporting.

.21 This internal control framework, the relationship between an entity's objectives and internal control components, is discussed in more detail in section 4200, "Internal Control Framework."

.22 The internal control framework described here and in section 4200 is only a means to help auditors consider the effect of an entity's internal control in an audit. An auditor's primary concern is *not* the classification of a specific control into any particular component and related objective. Rather, an auditor's primary concern is whether, and how, a specific control prevents or detects and corrects material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

.23 *Andrea Auditor audits Jones Grocery. As on all audits, she should obtain an understanding of internal control sufficient to assess the risks of material misstatement and design the nature, timing, and extent of further audit procedures. To achieve this, she organizes her inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objective. As a result of performing her procedures, she discovers the client's bank reconciliation procedures. Should a bank reconciliation be considered a* control activity? *What about*

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

the fact that someone follows up and investigates old or unusual reconciling items. Is that considered a monitoring *activity?*

.24 *The issue of how to classify a particular control is irrelevant for Andrea's purposes. As an auditor, her primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.*

How an Auditor Obtains an Understanding of Internal Control

.25 The auditor should obtain a sufficient understanding of internal control by performing risk assessment procedures (inquiries of management and others within the entity regarding internal control matters, analytical procedures, observation of entity activities, the performance of control activities, or both, and inspection of the documentation of prescribed control procedures, the control activity, or both) to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented. Procedures to obtain audit evidence about the design and implementation of relevant controls may include inquiring of entity personnel, observing the application of specific controls, inspecting documents and reports, and tracing transactions through the information system relevant to financial reporting. Inquiry alone is not sufficient to evaluate the design of a control relevant to an audit and to determine whether it has been implemented.

.26 Auditors might consider the types of misstatements that occurred in prior audits (for example, whether they were associated with accounting estimates, whether they were routine errors that resulted from a lack of control consciousness, or whether they resulted from lack of sufficient personnel). This knowledge of prior misstatements can help an auditor focus his or her inquiries on those areas and whether changes have been made to internal control to prevent those misstatements in the future.

.27 In a continuing audit, the auditor may already have significant experience with and documentation of internal control. In these situations, this knowledge from previous audits allows the auditor to focus on system changes.

.28 *Jones Grocery purchased a commercially available software package for independent grocers. During 20X1, Jones installed the general ledger system and the cash receipts/disbursements and accounts payable modules. As part of performing her 20X1 audit, Andrea Auditor obtained an understanding of the software package and the modules that were installed. For her 20X2 audit, Andrea should focus on changes made to the system since 20X1. For example, she might inquire about the installation of other modules (such as inventory) or updated versions of the software package.*

.29 Some controls are documented in policy and procedure manuals, flowcharts, source documents, journals, and ledgers. In these cases, inspection of the documentation and inquiries of entity personnel may provide a sufficient understanding to assess the risks of material misstatement and design the nature, timing, and extent of further audit procedures.

.30 *When Jones Grocery receives a bill, it is input directly into the accounts payable module of their software package. The computer generates an accounts payable aging and a cash requirements report that indicates when each bill should be paid. The accounts payable module interfaces with the general ledger system to automatically post and update the appropriate general ledger account whenever bills are received or paid. To obtain her understanding of the accounts payable system, Andrea performed a "walk-through." She made inquiries of Jones personnel and obtained copies of bills and the reports generated by the computer. She "walked through" the example bills to see how they were included in the computer reports and how totals from those reports were posted to the general ledger. She also made inquiries related to the completeness assertion, that is, how does Jones ensure that* all *bills are entered into the system? Andrea observed the Jones employee performing those control procedures.*

.31 Documentation may not be available for some controls. For example, the understanding of certain aspects of the control environment, such as management integrity, may be obtained through previous experience updated by inquiries of management and observation of their actions. Although documentation

may not be available, the auditor is still responsible for documenting his or her understanding of the components of internal control.

Documenting the Understanding

.32 The auditor should document the key elements of the understanding obtained regarding each of the components of internal control, to assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures. The form and extent of this documentation is influenced by the nature and complexity of the entity's controls. For example, documentation of the understanding of internal control of a complex information system in which a large volume of transactions are electronically initiated, authorized, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed (for example, long-term debt), documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity's internal control and the more extensive the procedures performed by the auditor, the more extensive the auditor should document his or her work.

AAM Section 3130

Assessing the Risks of Material Misstatement

General

.01 Knowledge an auditor acquires about a client encompasses a broad range of information, including the following:

- Industry, regulatory, and other external factors affecting the client
- The nature of the client, including its operations and organizational structure
- The client's objectives, strategies, and related business risks, some of which will give rise to risks affecting the financial statements
- How management measures and reviews the company's financial performance
- An understanding of the internal controls that are in use at the entity, including an understanding of the use of IT and the controls designed and used within the IT system

This knowledge of a client forms the basis for identifying risks and evaluating how these risks could result in financial statement misstatements.

.02 The auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures. For this purpose, the auditor should

- identify risks throughout the process of obtaining an understanding of the entity and its environment, including relevant controls that relate to the risks, and considering the classes of transactions, account balances, and disclosures in the financial statements.
- relate the identified risks to what can go wrong at the relevant assertion level.
- consider whether the risks are of a magnitude that could result in a material misstatement of the financial statements.
- consider the likelihood that the risks could result in a material misstatement of the financial statements.

.03 It is not acceptable to simply deem risk to be "at the maximum." The auditor should use information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the design of controls and determining whether they have been implemented, as audit evidence to support the risk assessment. The auditor should use the risk assessment to determine the nature, timing, and extent of further audit procedures to be performed, such as substantive tests. When the risk assessment is based on an expectation that controls are operating effectively to prevent or detect material misstatement, individually or when aggregated, at the relevant assertion level, the auditor should perform tests of the controls that the auditor has determined to be suitably designed to prevent or detect a material misstatement in the relevant assertion to obtain audit evidence that the controls are operating effectively, as described in AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*).

.04 The auditor should determine whether the identified risks of material misstatement relate to specific relevant assertions related to classes of transactions, account balances, and disclosures, or whether they relate more pervasively to the financial statements taken as a whole and potentially affect many relevant assertions.

Financial Statement Assertions

.05 Paragraphs .14–.19 of AU section 326, *Audit Evidence* (AICPA, *Professional Standards*), discuss the use of assertions in obtaining audit evidence. In representing that the financial statements are fairly presented in accordance with generally accepted accounting procedures, management implicitly or explicitly makes assertions regarding the recognition, measurement, and disclosure of information in the financial statements and related disclosures. Assertions used by the auditor fall into the following categories:

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Categories of Assertions

	Description of Assertions		
	Classes of transactions and events during the period	*Account balances at the end of the period*	*Presentation and disclosure*
Occurrence/Existence	Transactions and events that have been recorded have occurred and pertain to the entity.	Assets, liabilities, and equity interests exist.	Disclosed events and transactions have occurred.
Rights and Obligations	—	The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.	Disclosed events and transactions pertain to the entity
Completeness	All transactions and events that should have been recorded have been recorded.	All assets, liabilities, and equity interests that should have been recorded have been recorded.	All disclosures that should have been included in the financial statements have been included.
Accuracy/valuation and allocation	Amounts and other data relating to recorded transactions and events have been recorded appropriately.	Assets, liabilities, and equity interests are included in the financial statements at appropriate amounts, and any resulting valuation or allocation adjustments are recorded appropriately.	Financial and other information is disclosed fairly and at appropriate amounts.
Cut-off	Transactions and events have been recorded in the correct accounting period.	—	—
Classification and understandability	Transactions and events have been recorded in the proper accounts.	—	Financial information is appropriately presented and described, and information in disclosures is expressed clearly.

.06 The auditor should use relevant assertions for classes of transactions, account balances, and presentation and disclosures in sufficient detail to form a basis for the assessment of risks of material misstatement and the design and performance of further audit procedures. The auditor should use relevant assertions in assessing risks by considering the different types of potential misstatements that may occur, and then designing further audit procedures that are responsive to the assessed risks.

Assessing Risks at the Financial Statement Level

.07 Risks of material misstatement at the financial statement level are those risks that relate pervasively to the financial statements and potentially affect many individual assertions. Risks at the financial statement level may derive in particular from a weak control environment. The nature of the risks arising from a weak control environment is such that they are not likely to be confined to specific individual risks of material misstatement in particular classes of transactions, account balances, and disclosures. Rather, weaknesses such as management's lack of competence may have a more pervasive effect on the financial statements and may require an overall response by the auditor.

.08 Characteristics of financial statement level risks that are relevant for audit purposes include the following:

Financial statement level risks can affect many assertions. By definition, financial statement level risks may result in material misstatements of several accounts or assertions. For example, a lack of control over journal entries increases the risk that an inappropriate journal entry could be posted to the general ledger as part of the period-end financial reporting process. The posting of an inappropriate journal entry may not be isolated to one general ledger account but potentially could affect any account. In general, overall audit risk increases when the magnitude or scope of identified risks of material misstatement are not known.

Assessing financial statement level risks requires significant judgment. Ultimately, the auditor should relate identified risks of misstatement to what can go wrong. For example, suppose that while performing risk assessment procedures to gather information about the control environment, the auditor discovered weaknesses relating to the hiring, training, and supervision of entity personnel. These weaknesses result in increased risks of a misstatement of the financial statements, but it will be a matter of the auditor's professional judgment to determine the following:

- The accounts and relevant assertions that could be affected
- The likelihood that a financial statement misstatement will result from the increased risks
- The significance of any misstatement

Risks at the financial statement level may not be identifiable with specific assertions. Control weaknesses at the financial statement level can render well designed activity level controls ineffective. For example, a significant risk of management override can potentially negate existing controls and procedures at the activity level in many accounts and for many assertions. Linking such a risk to specific accounts and assertions may be very difficult, and may not even be possible. As another example, a client may have excellent data input controls at the application level. But if poorly designed, IT general controls may allow many unauthorized personnel the opportunity to access and inappropriately change the data and the well designed input controls will be rendered ineffective. Also, strengths in financial statement level controls such as an overall culture of ethical behavior may increase the reliability of controls that operate at the activity level. Determining the extent to which financial statement level controls affect the reliability of specific activity level controls (and therefore the assessment of the risks of material misstatement) is subjective and may vary from client to client.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Assessing Risks at the Assertion Level

.09 In making risk assessments, the auditor should identify the controls that are likely to prevent or detect and correct material misstatements in specific relevant assertions. Generally, the auditor gains an understanding of controls and relates them to relevant assertions in the context of processes and systems in which they exist. Doing so is useful because individual control activities often do not in themselves address a risk. Often, only multiple control activities, together with other elements of internal control, will be sufficient to address a risk.

.10 Conversely, some control activities may have a specific effect on an individual relevant assertion embodied in a particular class of transaction or account balance. For example, the control activities that an entity established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the existence and completeness assertions for the inventory account balance.

.11 Controls can be either directly or indirectly related to an assertion. The more indirect the relationship, the less effective that control may be in preventing or detecting and correcting misstatements in that assertion. For example, a sales manager's review of a summary of sales activity for specific stores by region ordinarily is only indirectly related to the completeness assertion for sales revenue. Accordingly, it may be less effective in reducing risk for that assertion than controls more directly related to that assertion, such as matching shipping documents with billing documents.

Significant Risks That Require Special Audit Consideration

.12 As part of the assessment of the risks of material misstatement, the auditor should determine which of the risks identified are, in the auditor's judgment, risks that require special audit consideration (such risks are defined as *significant risks*). One or more significant risks normally arise on most audits. In exercising this judgment, the auditor should consider inherent risk to determine whether the nature of the risk, the likely magnitude of the potential misstatement including the possibility that the risk may give rise to multiple misstatements, and the likelihood of the risk occurring are such that they require special audit consideration. AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), establishes standards and provides guidance to the auditor in determining whether any of the assessed risks are significant risks that require special audit consideration or risks for which substantive procedures alone do not provide sufficient appropriate audit evidence. The auditor should evaluate the design of the entity's related controls, including relevant control activities, over such risks and determine whether they are adequate and have been implemented. Paragraphs .45 and .53 of AU section 318 describe the consequences for further audit procedures of identifying risks as significant.

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence

.13 As part of the risk assessment previously described in paragraph .12, the auditor should evaluate the design and determine the implementation of the entity's controls, including relevant control activities, over those risks for which, in the auditor's judgment, it is not possible or practicable to reduce detection risk at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures. The consequences for further audit procedures of identifying such risks are described in paragraph .24 of AU section 318.

Revision of Risk Assessment

.14 The auditor's assessment of the risks of material misstatement at the relevant assertion level is based on available audit evidence and may change during the course of the audit as additional audit evidence is obtained. In particular, the risk assessment may be based on an expectation that controls are operating effectively to prevent or detect and correct a material misstatement at the relevant assertion level. In

performing tests of controls to obtain audit evidence about their operating effectiveness, the auditor may obtain audit evidence that controls are not operating effectively at relevant times during the audit. Similarly, in performing substantive procedures, the auditor may detect misstatements in amounts or frequency that is greater than is consistent with the auditor's risk assessment. When the auditor obtains audit evidence from performing further audit procedures that tends to contradict the audit evidence on which the auditor originally based the assessment, the auditor should revise the assessment and should further modify planned audit procedures accordingly. See paragraphs .70 and .74 of AU section 318 for further guidance.

Documentation

.15 The auditor should document (*a*) the assessment of the risks of material misstatement both at the financial statement level and at the relevant assertion level and the basis for the assessment and (*b*) the risks identified and related controls evaluated as a result of the requirements for significant risks.

AAM Section 3140

Audit Risk and Materiality

General

.01 Audit risk and materiality, among other matters, need to be considered together in determining the nature, timing, and extent of auditing procedures and in evaluating the results of those procedures. The existence of audit risk is recognized in the description of the responsibilities and functions of the independent auditor. Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected. Audit risk is the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. In other words, audit risk is the risk that the auditor will issue an unqualified opinion on financial statements that are materially incorrect.

.02 Financial statements are materially misstated when they contain misstatements whose effect, individually or in the aggregate, are important enough to cause them not to be presented fairly, in all material respects, in conformity with generally accepted accounting principles (GAAP). Materiality is the criterion used by auditors to distinguish between unimportant and important matters. The auditor's consideration of materiality is a matter of professional judgment and is influenced by a perception of the needs of users of the financial statements. The perceived needs of users are recognized in the discussion of materiality in FASB Concepts Statement No. 2, *Qualitative Characteristics of Accounting Information*, which defines materiality as

> The magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement.

Nature and Causes of Misstatements

.03 The representation in the auditor's standard report regarding fair presentation, in all material respects, in conformity with generally accepted accounting principles indicates the auditor's belief that the financial statements, taken as a whole, are not materially misstated. Misstatements can result from errors or fraud.[1] and may consist of any of the following:

a. An inaccuracy in gathering or processing data from which financial statements are prepared

b. A difference between the amount, classification, or presentation of a reported financial statement element, account, or item and the amount, classification, or presentation that would have been reported under GAAP

c. The omission of a financial statement element, account, or item

d. A financial statement disclosure that is not presented in conformity with GAAP

e. The omission of information required to be disclosed in conformity with GAAP

f. An incorrect accounting estimate arising, for example, from an oversight or misinterpretation of facts

g. Management's judgments concerning an accounting estimate or the selection or application of accounting policies that the auditor may consider unreasonable or inappropriate

---

[1] The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*). See section 3150, *Illegal Acts*. For those illegal acts that are defined in that statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts if the same as that for errors or fraud.

.04 Misstatements may be of two types: known and likely, defined as follows:

Known misstatements. These are specific misstatements identified during the audit arising from the incorrect selection or misapplication of accounting principles or misstatements of facts identified, including, for example, those arising from mistakes in gathering or processing data and the overlooking or misinterpretation of facts.

Likely misstatements. These are misstatements that

a. arise from differences between management's and the auditor's judgments concerning accounting estimates that the auditor considers unreasonable or inappropriate (for example, because an estimate included in the financial statements by management is outside of the range of reasonable outcomes the auditor has determined).

b. the auditor considers likely to exist based on an extrapolation from audit evidence obtained (for example, the amount obtained by projecting known misstatements identified in an audit sample to the entire population from which the sample was drawn).

.05 The term *errors* refers to unintentional misstatements of amounts or disclosures in financial statements. The term *fraud* refers to an intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage. Two types of misstatements resulting from fraud are relevant to the auditor's consideration in a financial statement audit: misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets. These two types of misstatements are further described in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*).

.06 See section 3145, "Fraud," for a further discussion on fraud.

.07 Although the auditor has no responsibility to plan and perform the audit to detect immaterial misstatements, there is a distinction in the auditor's response to detected misstatements depending on whether those misstatements are caused by error or fraud. When the auditor encounters evidence of potential fraud, regardless of its materiality, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit.

Considerations at the Financial Statements Level

.08 The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of

a. determining the extent and nature of risk assessment procedures.

b. identifying and assessing the risks of material misstatement.

c. determining the nature, timing, and extent of further audit procedures.

d. evaluating whether the financial statements taken as a whole are presented fairly, in all material respects, in conformity with GAAP.

.09 Audit risk is a function of the risk that the financial statements prepared by management are materially misstated and the risk that the auditor will not detect such material misstatement. The auditor should consider audit risk in relation to the relevant assertions related to individual account balances, classes of transactions, and disclosures and at the overall financial statement level. The auditor should perform risk assessment procedures to assess the risks of material misstatement both at the financial statement and the relevant assertion levels. The auditor may reduce audit risk by determining overall responses and designing the nature, timing, and extent of further audit procedures based on those assessments.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.10 The auditor should perform the audit to reduce audit risk to a low level that is, in the auditor's professional judgment, appropriate for expressing an opinion on the financial statements. Audit risk may be assessed in quantitative or nonquantitative terms.

.11 The considerations of audit risk and materiality are affected by the size and complexity of the entity and the auditor's experience with and knowledge of the entity and its environment, including its internal control. As discussed in the following heading, "Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level," certain entity related factors also affect the nature, timing, and extent of further audit procedures with respect to relevant assertions related to specific account balances, classes of transactions, and disclosures.

.12 In considering audit risk at the overall financial statement level, the auditor should consider risks of material misstatement that relate pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. Risks of this nature often relate to the entity's control environment and are not necessarily identifiable with specific relevant assertions at the class of transactions, account balance, or disclosure level. Such risks may be especially relevant to the auditor's consideration of the risks of material misstatement arising from fraud, for example, through management override of internal control. In developing responses to the risks of material misstatement at the overall financial statement level, the auditor should consider such matters as the knowledge, skill, and ability of personnel assigned significant engagement responsibilities; whether certain aspects of the engagement need the involvement of a specialist; and the appropriate level of supervision of assistants.

Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level

.13 In determining the nature, timing, and extent of audit procedures to be applied to a specific account balance, class of transactions, or disclosure, the auditor should design audit procedures to obtain reasonable assurance of detecting misstatements that the auditor believes, based on the judgment about materiality, could be material, when aggregated with misstatements in other balances, classes, or disclosures, to the financial statements taken as a whole.

.14 The auditor should consider audit risk at the individual account balance, class of transactions, or disclosure level because such consideration directly assists in determining the nature, timing, and extent of further audit procedures for the relevant assertions related to balances, classes, or disclosures. The auditor should seek to reduce audit risk at the individual balance, class, or disclosure level in such a way that will enable the auditor, at the completion of the audit, to express an opinion on the financial statements taken as a whole at an appropriately low level of audit risk.

.15 At the account balance, class of transactions, relevant assertion, or disclosure level, audit risk consists of (*a*) the risk (consisting of inherent risk and control risk) that the relevant assertions related to balances, classes, or disclosures contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other relevant assertions related to balances, classes, or disclosures and (*b*) the risk (detection risk) that the auditor will not detect such misstatements. These components of audit risk may be assessed in quantitative terms, such as percentages, or in nonquantitative terms such as *high*, *medium*, or *low* risk. The way the auditor should consider these component risks and combines them involves professional judgment and depends on the auditor's approach or methodology.

.16 *Inherent risk* is the susceptibility of a relevant assertion to a misstatement that could be material, either individually or when aggregated with other misstatements, assuming that there are no related controls. The risk of such misstatement is greater for some assertions and related account balances, classes of transactions, and disclosures than for others. For example, complex calculations are more likely to be misstated than simple calculations. Cash is more susceptible to theft than an inventory of coal. Accounts consisting of amounts derived from accounting estimates that are subject to significant measurement uncertainty pose greater risks than do accounts consisting of relatively routine, factual data. External circumstances giving rise to business risks also influence inherent risk. For example, technological developments might make a particular product

obsolete, thereby causing inventory to be more susceptible to overstatement. In addition to those circumstances that are peculiar to a specific relevant assertion, factors in the entity and its environment that relate to several or all of the classes of transaction, account balances, or disclosures may influence the inherent risk related to a specific relevant assertion. These latter factors include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.

.17 *Control risk* is the risk that a misstatement that could occur in a relevant assertion and that could be material, either individually or when aggregated with other misstatements, will not be prevented or detected on a timely basis by the entity's internal control. That risk is a function of the effectiveness of the design and operation of internal control in achieving the entity's objectives relevant to preparation of the entity's financial statements. Some control risk will always exist because of the inherent limitations of internal control.

.18 Inherent risk and control risk are the entity's risks, that is, they exist independently of the audit of financial statements. AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*), and other AU sections describe the risks of material misstatement as the auditor's combined assessments of inherent risk and control risk; however, the auditor may make separate assessments of inherent risk and control risk. Furthermore, auditors may implement the concepts surrounding the assessment of inherent and control risks and responding to the risks of material misstatement in different ways as long as they achieve the same result.

.19 The auditor should assess the risks of material misstatement at the relevant assertion level as a basis for further audit procedures. Although that assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment. This basis may be obtained through the risk assessment procedures performed to obtain an understanding of the entity and its environment, including its internal control, and through the performance of suitable tests of controls to obtain audit evidence about the operating effectiveness of controls, where appropriate.

.20 *Detection risk* is the risk that the auditor will not detect a misstatement that exists in a relevant assertion that could be material, either individually or when aggregated with other misstatements. Detection risk is a function of the effectiveness of an audit procedure and of its application by the auditor. Detection risk cannot be reduced to zero because the auditor does not examine 100 percent of an account balance or a class of transactions and because of other factors. Such other factors include the possibility that an auditor might select an inappropriate audit procedure; misapply an appropriate audit procedure; or misinterpret the audit results. These other factors might be addressed through adequate planning; proper assignment of personnel to the engagement team; the application of professional skepticism, supervision, and review of the audit work performed; and supervision and conduct of a firm's audit practice in accordance with appropriate quality control standards. Detection risk can be disaggregated into additional components of tests of details risk and substantive analytical procedures risk.

.21 Detection risk relates to the substantive audit procedures and is managed by the auditor's response to risks of material misstatement. For a given level of audit risk, detection risk should bear an inverse relationship to the risks of material misstatement at the relevant assertion level. The greater the risks of material misstatement, the less the detection risk that can be accepted by the auditor. Conversely, the lower the risks of material misstatement, the greater the detection risk that can be accepted by the auditor. However, the auditor should perform substantive procedures for all relevant assertions related to material classes of transactions, account balances, and disclosures.

Materiality

.22 The auditor's consideration of materiality is a matter of professional judgment and is influenced by the auditor's perception of the needs of users of financial statements. Materiality judgments are made in light of surrounding circumstances and necessarily involve both quantitative and qualitative considerations.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Determining Materiality for the Financial Statements Taken as a Whole When Planning the Audit

.23 The auditor should determine a materiality level for the financial statements taken as a whole when establishing the overall audit strategy for the audit. Determining a materiality level for the financial statements taken as a whole helps guide the auditor's judgments in identifying and assessing the risks of material misstatements and in planning the nature, timing, and extent of further audit procedures. This materiality level does not, however, establish a threshold below which identified misstatements are always considered to be immaterial when evaluating those misstatements and their effect on the financial statements and the auditor's report thereon.

.24 The auditor often may apply a percentage to a chosen benchmark as a step in determining materiality for the financial statements taken as a whole. When identifying an appropriate benchmark, the auditor may consider factors such as the following:

- The elements of the financial statements (for example, assets, liabilities, equity, income, and expenses) and the financial statement measures defined in GAAP (for example, financial position, financial performance, and cash flows), or other specific requirements
- Whether there are financial statement items on which, for the particular entity, users' attention tends to be focused (for example, for the purpose of evaluating financial performance)
- The nature of the entity and the industry in which it operates
- The size of the entity, nature of its ownership, and the way it is financed

Examples of benchmarks that might be appropriate, depending on the nature and circumstances of the entity, include total revenues, gross profit, and other categories of reported income, such as profit before tax from continuing operations. Profit before tax from continuing operations may be a suitable benchmark for profit oriented entities but may not be an appropriate benchmark for the determination of materiality when, for example, the entity's earnings are volatile, when the entity is a not-for-profit entity, or when it is an owner managed business where the owner takes much of the pretax income out of the business in the form of remuneration. For asset based entities (for example, an investment fund) an appropriate benchmark might be net assets. Other entities (for example, banks and insurance companies) might use other benchmarks.

.25 When determining materiality, the auditor should consider prior periods' financial results and financial positions, the period-to-date financial results and financial position, and budgets or forecasts for the current period, taking account of significant changes in the entity's circumstances (for example, a significant business acquisition) and relevant changes of conditions in the economy as a whole or the industry in which the entity operates.

.26 Once materiality is established, the auditor should consider materiality when planning and evaluating the same way regardless of the inherent business characteristics of the entity being audited.

Tolerable Misstatement

.27 The initial determination of materiality is made for the financial statement taken as a whole. However, the auditor should allow for the possibility that some misstatements of lesser amounts than the materiality levels could, in the aggregate, result in a material misstatement of the financial statements.

.28 For example, suppose that for planning purposes the auditor determined materiality to be $100,000, and he or she designed his or her audit to provide reasonable assurance that misstatements of that magnitude were detected. Because of the way the auditor designed his or her audit, he or she may not detect a misstatement of $80,000, which is acceptable because the amount is not considered material. However, what if the auditor failed to detect 2 misstatements of $80,000? Individually, each misstatement would not be material, but when aggregated, the total misstatement is greater than materiality. Thus, materiality for the

financial statements as a whole would not be appropriate for assessing risk and performing further audit procedures at the assertion level.

.29 *Tolerable misstatement* (or *tolerable error*) is the maximum error in a population (for example, the class of transactions or account balance) that the auditor is willing to accept. Such levels of tolerable misstatement are normally lower than the materiality levels. Tolerable misstatement is the adjustment of financial statement materiality to the assertion level. This adjustment is necessary to make an allowance for misstatements that might arise in other accounts as well as make a provision for possible misstatements that might exist in the financial statements, but were not detected by the audit procedures. Tolerable misstatement effectively creates a margin for error in the auditor's audit plan to take into consideration misstatements that are not detected as part of the audit.

.30 For each class of transactions, account balance, and disclosure, the auditor should determine at least one level of tolerable misstatement. For example, if the auditor's overall financial statement materiality for audit planning purposes was $100,000, he or she might determine tolerable misstatement for testing receivables to be $70,000. Some firms use a guideline of, for example, 50 percent to 75 percent of materiality when setting tolerable misstatement at the account or detailed level for the average audit situation. Appendix L, "Matters to Consider in Determining Tolerable Misstatement," of the AICPA Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* provides further guidance on this topic.

Qualitative Aspects of Materiality

.31 As indicated previously, judgments about materiality include both quantitative and qualitative information. As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.

.32 Qualitative considerations also influence the auditor in reaching a conclusion about whether misstatements are material. Paragraph .60 of AU section 312 provides qualitative factors that the auditor may consider relevant in determining whether misstatements are material.

Considerations as the Audit Progresses

.33 Because it is not feasible for the auditor to anticipate all the circumstances that may ultimately influence judgments about materiality in evaluating the audit findings at the completion of the audit, the auditor's judgment about materiality for planning purposes may differ from the judgment about materiality used in evaluating the audit findings.

.34 If the auditor concludes that a lower materiality level than that initially determined is appropriate, the auditor should reconsider the related levels of tolerable misstatement and appropriateness of the nature, timing, and extent of further audit procedures. The auditor should consider whether the overall audit strategy and audit plan need to be revised if the nature of identified misstatements and the circumstances of their occurrence are indicative that other misstatements may exist that, when aggregated with identified misstatements, could be material. The auditor should not assume that a misstatement is an isolated occurrence.

.35 If the aggregate of the misstatements (known and likely) that the auditor has identified approaches the materiality level, the auditor should consider whether there is a greater than acceptably low level of risk that undetected misstatements, when taken with the aggregate identified misstatements, could exceed the materiality level and, if so, the auditor should reconsider the nature and extent of further audit procedures.

Quantifying Materiality

.36 Although no authoritative body has established specific guidelines for materiality, certain rules of thumb can be used in making a preliminary assessment of materiality.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.37 Generally, materiality guidelines are relative rather than absolute. In other words, materiality is usually set as a percentage rather than as an absolute amount. For example, an absolute amount such as $100,000 may be immaterial to a large, multinational corporation but very material to a small, closely held company. To apply percentage guidelines, auditors determine what base to use. Generally, auditors select a base that is relatively stable and predictable. Bases commonly used include income before taxes, revenues, and total assets. Generally, misstatements become material to income before they become material to the balance sheet. As a consequence, net income before taxes is often selected as the base.

.38 In small business audits, auditors sometimes make a number of significant audit adjustments. Thus, income before taxes may vary too much to be useful as a base. When income before taxes is not used as a base, auditors sometimes use either total revenue or an average of net income for several prior periods.

Example

.39 A common rule of thumb for materiality is 5 percent to 10 percent of pretax income (for profit-orientated entities). Some auditors apply this rule of thumb so that items less than 5 percent of normal pretax income are considered immaterial, whereas items that are more than 10 percent are material. For items between 5 percent to 10 percent, judgment is applied. For example, when unusual factors exist (perhaps the company is about to be sold for a multiple of audited earnings) auditors would tend to classify items between 5 percent and 10 percent as material. Others use 1 percent or 1.5 percent of the larger of total assets or revenues. (See exhibit 1 for a sample planning materiality worksheet.) Note that a percentage of pretax income may not be an appropriate benchmark for the determination of materiality when, for example, the entity's earnings are volatile, when the entity is a not-for-profit entity, or when the owner takes much of the pretax income out of the business in the form of remuneration.

Exhibit 1

	Initials	**Date**
Done	_______	_______
Reviewed	_______	_______

Client Name
Planning Materiality Worksheet
Balance Sheet Date

1.	Unaudited total assets at balance sheet date	_______
2.	Unaudited total revenues at balance sheet date	_______
3.	Select the larger of line *1* or line *2*	_______
4.	Select a multiplier if audit risk is normal, or, if better than normal, select .01	_______
5.	Multiply line *3* by line *4*	_______
6.	Unaudited pretax income (or equivalent if not a for-profit entity)	_______
7.	Select a multiplier if audit risk is normal, or, if better than normal, select .1	_______
8.	Multiply line *6* by line *7*	_______
9.	Evaluate line *5* and line *8* along with other relevant factors and determine materiality for audit planning purposes	_______

.40 Consideration of which base to use may include such factors as income variability and the nature of the client's business and industry. For a not-for-profit organization, for example, the auditor would probably use total assets or revenues as a base because pretax income is not meaningful.

SEC Staff Bulletin on Materiality for SEC Registrants

.41 Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 99, *Materiality*, addresses the application of materiality thresholds to the preparation and audit of financial statements filed with the SEC. The SAB does not create new standards or definitions for materiality, but reaffirms the concepts of materiality as expressed in the accounting and auditing literature, as well as in long standing case law.

.42 SAB No. 99 states that registrants and the auditors of their financial statements cannot rely exclusively on quantitative benchmarks to determine whether an item is material to the financial statements. Equally important is a consideration of whether, in light of the surrounding circumstances, a reasonable investor would consider the item to be important. The SAB also states that management should not make intentional immaterial errors in a registrant's financial statements to "manage" earnings. It further reminds registrants of their legal responsibility to make and keep books, records, and accounts that, in reasonable detail, accurately and fairly reflect transactions and the disposition of assets. The SAB reminds auditors of their obligations to inform management and, in some cases, audit committees of illegal acts that come to the auditor's attention. The full text of the SAB can be viewed at the SEC website at www.sec.gov/interps/account/sab99.htm.

Communication of Misstatements to Management

.43 The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial,[2] and communicate them to the appropriate level of management. This communication should occur on a timely basis.

.44 When communicating details of misstatements, the auditor should distinguish between known misstatements and likely misstatements. The auditor should request management to record the adjustment needed to correct all known misstatements, including the effect of prior period misstatement, other than those that the auditor believes are trivial.

.45 If management decides not to correct some or all of the known and likely misstatements communicated to it by the auditor or identified when management examined a class of transactions, account balance, or disclosure, the auditor should obtain an understanding of management's reasons for not making the corrections and should take that into account when considering the qualitative aspects of the entity's accounting practices and the implications for the auditor's report.

Evaluating Audit Findings

.46 In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with GAAP, the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence and determine the effect of such misstatements on the financial statements taken as a whole.

.47 In aggregating misstatements, the auditor should include the effect on the current period's financial statements of those prior period misstatements. When evaluating the aggregate uncorrected misstatements, the auditor should consider the effects of these uncorrected misstatements in determining whether the financial statements are free of material misstatement.

[2] Matters that are "trivial" are amounts designated by the auditor below which misstatements need not be accumulated. This amount is set so that any such misstatements, either individually or when aggregated with other such misstatements, would not be material to the financial statements after the possibility of further undetected misstatements is considered.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.48 In evaluating the effects of misstatements, the auditor should include both qualitative and quantitative materiality considerations (see paragraphs .59–.60 of AU section 312). Qualitative considerations also influence the auditor in reaching a conclusion regarding whether misstatements are material.

Likely Misstatements

.49 The auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined is referred to as *likely misstatements*.

.50 When the auditor tests an account balance or a class of transactions and related assertions by an analytical procedure, he or she might not specifically identify misstatements but would only obtain an indication of whether a misstatement might exist in the balance or class and possibly its approximate magnitude. If the analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor should request management to investigate and, if necessary, should expand his or her audit procedures to enable him or her to determine whether a misstatement exists in the account balance or class or transactions.

.51 When an auditor uses audit sampling to test an assertion for an account balance or a class of transactions, he or she projects the amount of known misstatements identified in the sample to the items in the balance or class from which the sample was selected. For example, if a $1,000 loan receivable misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $10,000. That projected misstatement, along with the results of other substantive procedures, contributes to the auditor's assessment of likely misstatement in the account balance or class of transactions.

.52 When auditing accounting estimates (for example, allowance for inventory obsolescence, allowance for doubtful accounts, or warranty obligations) the audit evidence gathered may support an amount for an estimate different from the amount the client has recorded. That difference may be considered reasonable by the auditor inasmuch as no one accounting estimate can be considered accurate with certainty. In that case, the difference between the estimate that the audit evidence supports and the estimate recorded in the financial statements would not be considered a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

Known Misstatements

.53 *Known misstatements* are those for which the amount of the misstatements are specifically identified. Such misstatements are often supported by highly reliable evidence, such as third party documents. An example of a known misstatement would be a failure to record an invoice for repairs expense.

Misstatements From the Prior Year

.54 Often overlooked is the consideration of misstatements detected in the prior year that affect the current year. For example, assume last year's aggregation of uncorrected misstatements included an item representing an overstatement of prepaid insurance and an understatement of insurance expense. This item would be included in the current year's aggregation of uncorrected misstatements because it affects the current year's insurance expense. Therefore, the prior year's aggregation of uncorrected misstatements should be reviewed for any items that may have an effect on the current year's financial statements.

Summarizing and Evaluating Misstatements

.55 Most firms prepare a summary of the uncorrected misstatements identified during the audit. This summary may be called the *Summary of Misstatements*, or the *Summary of Possible Journal Entries*, or other names. The summary presents known, likely, and prior period misstatements separately. The summary is used in evaluating the effect of uncorrected misstatements on the financial statements at the end of the audit.

.56 Some firms establish a predetermined dollar threshold below which misstatements need not be accumulated. This amount may be set so that any such misstatements, either individually, or when aggregated with other such misstatements, would not be material to the financial statements after the possibility of further undetected misstatements is considered.

.57 When concluding whether the effect of misstatements, individually or in the aggregate, is material, an auditor should consider the nature and amount of the misstatements in relation to the nature and amount of items in the financial statements under audit.

.58 If the auditor believes that the financial statements taken as a whole are materially misstated, the auditor should request management to make the necessary corrections. If management refuses to make the corrections, the auditor must determine the implications for the auditor's report.

.59 If the auditor concludes that the effects of uncorrected misstatements, individually or in the aggregate, do not cause the financial statements to be materially misstated, they could still be materially misstated because of further misstatements remaining undetected. As the aggregate misstatements approach materiality, the risks that the financial statements may be materially misstated also increase; consequently, the auditor should also consider the effect of undetected misstatements in concluding whether the financial statements are fairly stated.

Documentation

.60 In addition to the documentation requirements in AU section 339, *Audit Documentation* (AICPA, *Professional Standards*), AU section 312 states the auditor should document the following:

a. The levels of materiality, as discussed in paragraph .27 of AU section 312, and tolerable misstatement, including any changes thereto, used in the audit and the basis on which those levels were determined

b. A summary of uncorrected misstatements, other than those that are trivial, related to known and likely misstatements

c. The auditor's conclusion whether uncorrected misstatements, individually or in aggregate, do or do not cause the financial statements to be materially misstated, and the basis for that conclusion

d. All known and likely misstatements identified by the auditor during the audit, other than those that are trivial, that have been corrected by management

.61 Uncorrected misstatements should be documented in a manner that allows the auditor to

a. separately consider the effects of known and likely misstatements, including uncorrected misstatements identified in prior periods.

b. consider the aggregate effect of misstatements on the financial statements.

c. consider the qualitative factors that are relevant to the auditor's consideration whether misstatements are material (see paragraph .60 of AU section 312).

AAM Section 3145

Fraud

General

.01 AU section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*), states that "The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud." Management is responsible for the design and implementation of programs and controls to prevent, deter, and detect fraud. That responsibility is described in paragraph .03 of AU section 110.

.02 An auditor's responsibilities relating to fraud are stated within the context of materiality to the financial statements taken as a whole. An auditor is not responsible for detecting fraud per se, but for obtaining reasonable assurances that material misstatements due to fraud are detected. An auditor is not responsible for detecting immaterial misstatements caused by fraud. Paragraph .03 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*), states that the requirements and guidance set forth in AU section 316 are intended to be integrated into the overall audit process in a logical manner that is consistent with the requirements and guidance provided in other AU sections, including AU section 311, *Planning and Supervision*; AU section 312, *Audit Risk and Materiality in Conducting and Audit*; AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*). AU section 316 describes a process in which the auditor

- exercises professional skepticism,
- discusses the risks of material misstatements due to fraud with engagement personnel,
- gathers information needed to identify risks of material misstatement due to fraud,
- identifies risks that may result in a material misstatement due to fraud,
- assesses the identified risks after taking into account an evaluation of the entity's programs and controls that address the risks,
- responds to the results of the assessment,
- evaluates audit evidence,
- communicates about fraud to management, those charged with governance, and others, and
- documents the auditor's consideration of fraud.

.03 Even though some requirements and guidance set forth in AU section 316 are presented in a manner that suggests a sequential audit process, auditing, in fact, involves a continuous process of gathering, updating, and analyzing information throughout the audit. Accordingly, the sequence of the requirements and guidance in AU section 316 may be implemented differently among audit engagements.

Description and Characteristics of Fraud

.04 The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement in financial statements is intentional or unintentional. Paragraph .05 of AU section 316 defines fraud as an intentional act that results in a material misstatement in financial statements that are the subject of an audit.

.05 Three conditions generally are present when fraud occurs. First, management or other employees have an incentive or are under pressure, which provides a reason to commit fraud. Second, circumstances exist that provide an opportunity for a fraud to be perpetrated. Third, those involved are able to rationalize committing a fraudulent act.

Misstatements Arising From Fraudulent Financial Reporting

.06 Misstatements arising from fraudulent financial reporting are intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting may involve acts such as the following:

- Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared
- Misrepresentation in, or intentional omission from, the financial statement of events, transactions, or other significant information
- Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure

Misstatements Arising From Misappropriation of Assets

.07 Misstatements arising from misappropriation of assets involve the theft of an entity's assets where the effect of the theft causes the financial statement not to be presented, in all material respects, in conformity with generally accepted accounting principles. Misappropriation of assets can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services not received. Misappropriation of assets may be accomplished by false or misleading records or documents, possibly created by circumventing controls, and may involve one or more individuals among management, employees, or third parties.

The Importance of Exercising Professional Skepticism

.08 Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence, and requires an ongoing assessment of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity.

Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud

.09 Paragraph .14 of AU section 316 states that members of the audit team should discuss the potential for material misstatement due to fraud prior to or in conjunction with his or her information gathering procedures. The discussion should include the following:

- An exchange of ideas or brainstorming among the audit team members, including the auditor with final responsibility for the audit, about how and where they believe the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated
- An emphasis on the importance of maintaining the proper state of mind throughout the audit regarding the potential for material misstatement due to fraud

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

As previously noted in section 3120, the brainstorming session to discuss the entity's susceptibility to material misstatements due to fraud could be held concurrently with the brainstorming session to discuss the potential of the risks of material misstatement that is required under AU section 314.

.10 Communication among the audit team members about the risks of material misstatement due to fraud should continue throughout the audit. See paragraphs .14–.18 of AU section 316 for further guidance.

Obtaining the Information Needed to Identify the Risks of Material Misstatement Due to Fraud

.11 In obtaining an understanding of the entity and its environment, including its internal control, information may come to the auditor's attention that should be considered in identifying risks of material misstatements due to fraud. The auditor should perform procedures to obtain information that is used to identify the risks of material misstatement due to fraud, including the following:

- Making inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed
- Considering any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit
- Considering whether one or more fraud risk factors exist
- Considering other information that may be helpful in identifying risks of material misstatement due to fraud

See paragraphs .19–.34 of AU section 316 for further guidance.

.12 Although fraud usually is concealed and management's intent is difficult to determine, the presence of certain risk factors or other conditions may suggest to the possibility that fraud may exist. However, these conditions may be the result of circumstances other than fraud.

.13 The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by fraud or error. Because fraud is usually concealed, material misstatements due to fraud are difficult to detect. Nevertheless, the auditor may identify *fraud risk factors* that do not necessarily indicate the existence of fraud, but often are present in circumstances where fraud exists. A fraud risk factor is an event or condition that indicates the following:

- An incentive or pressure to perpetrate fraud
- Opportunities to carry out the fraud
- Attitudes or rationalizations to justify a fraudulent action

Identifying Risks That May Result in a Material Misstatement Due to Fraud[1]

.14 In identifying risks of material misstatement due to fraud, it is helpful for the auditor to consider the information that has been gathered in the context of the three conditions present when a material misstatement due to fraud occurs—that is, incentives and pressures, opportunities, and attitudes and rationalizations. However, the auditor should not assume that all three conditions must be observed or evident before concluding that there are identified risks.

[1] Paragraph .102 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA *Professional Standards*), states that the auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures. This requirement provides a link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks.

.15 The identification of a risk of material misstatement due to fraud involves the application of professional judgment and includes the consideration of the attributes of the risk, including the following:

- The type of risk that may exist, that is, whether it involves fraudulent financial reporting or misappropriation of assets
- The significance of the risk, that is, whether it is of a magnitude that could lead to result in a possible material misstatement of the financial statements
- The likelihood of the risk, that is, the likelihood that it will result in a material misstatement in the financial statements
- The pervasiveness of the risk, that is, whether the potential risk is pervasive to the financial statements as a whole or specifically related to a particular assertion, account, or class of transactions

.16 Material misstatements due to fraudulent financial reporting often result from an overstatement or understatement of revenues. Therefore, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition. In addition, even if specific risks of material misstatement due to fraud are not identified by the auditor, there is a possibility that management override of controls could occur and, accordingly, the auditor should address that risk (see paragraph .57 of AU section 316) apart from any conclusions regarding the existence of more specifically identifiable risks.

Assessing the Identified Risks After Taking Into Account an Evaluation of the Entity's Programs and Controls That Address the Risks

.17 As part of the understanding of internal control sufficient to plan the audit required by AU section 314, the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation and assess those risks taking into account that evaluation.

Responding to the Results of the Assessments[2]

.18 The auditor's response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence and is influenced by the nature and significance of the risks identified as being present and the entity's programs and controls that address these identified risks. The auditor's response can be (1) an overall response on how the audit is conducted, (2) a response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed, or (3) a response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which such override could occur.

.19 The auditor may conclude that it would not be practicable to design auditing procedures that sufficiently address the risks of material misstatement due to fraud. In that case, withdrawal from the engagement with communication to the appropriate parties may be an appropriate course of action.

Overall Responses to the Risk of Material Misstatement

.20 Judgments about the risk of material misstatement due to fraud have an overall effect on how the audit is conducted in the following ways:

Assignment of personnel and supervision. The knowledge, skill, and ability of personnel assigned significant engagement responsibility should be commensurate with the auditor's assessment of the

[2] Paragraph .03 of AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*), states that to reduce audit risk to an acceptably low level, the auditor should determine overall responses to address the assessed risks of material misstatement at the financial statement level and should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. See paragraphs .04 and .07 of AU section 318. This requirement provides a link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

risks of material misstatement due to fraud for the engagement. In addition, the extent of supervision should reflect the risks of material misstatement due to fraud.

Accounting principles. The auditor should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions.

Predictability of auditing procedures. The auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed.

Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed to Address the Identified Risks

.21 The auditing procedures performed in response to identified risks of material misstatement due to fraud will vary depending on the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected. These procedures may involve both substantive tests and tests of the operating effectiveness of the entity's programs and controls. The auditor's responses to address specifically identified risks of material misstatement due to fraud may include changing the nature, timing, and extent of auditing procedures. See paragraphs .52–.56 of AU section 316 for more guidance.

Responses to Further Address the Risk of Management Override of Controls

.22 Management is in a unique position to perpetrate fraud because of its ability to directly or indirectly manipulate accounting records and prepare fraudulent financial statements by overriding established controls that otherwise appear to be operating effectively. Accordingly, in addition to overall responses and responses that address specifically identified risks of material misstatement due to fraud, certain procedures should be performed to further address the risk of management override of controls, as discussed in paragraphs .58–.67 of AU section 316.

Evaluating Audit Evidence

.23 The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit. The auditor should consider whether analytical procedures performed in planning the audit result in identifying any unusual or unexpected relationships that should be considered in assessing the risks of material misstatements due to fraud. The auditor also should evaluate whether analytical procedure that were performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud.

.24 At or near the completion of fieldwork, the auditor should evaluate whether the accumulated results of audit procedures and other observations affect the assessment of the risks of material misstatement due to fraud made earlier in the audit. Such an evaluation may provide further insight into the risks of material misstatement due to fraud and whether there is a need for additional or different audit procedures to be performed.

.25 When audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of fraud. If the auditor has determined that misstatements are or may be the result of fraud, but the effect of the misstatements is not material, the auditor, nevertheless, should evaluate the implications, especially those dealing with the organizational position of the person(s) involved. If the matter involves higher level management, even though the amount itself is not material to the financial statements, it may be indicative of a more pervasive problem, for example, implications about the integrity of management. In such circumstances, the auditor should reevaluate the assessment of the risk of material misstatement due to fraud and its resulting impact on (*a*) the nature, timing, and extent of the tests

of balances or transactions and (*b*) the assessment of the effectiveness of controls if control risk was assessed below the maximum.

.26 If the auditor believes that the misstatement is, or may be, the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should

- attempt to obtain additional audit evidence to determine whether material fraud has occurred or is likely to have occurred and, if so, its effect on the financial statements and the auditor's report thereon;
- discuss the matter and the approach for further investigation with an appropriate level of management that is at least one level above those involved, and with senior management and those charged with governance;
- consider the implications for other aspects of the audit; and
- if appropriate, suggest that the client consult with legal counsel.

.27 The auditor's consideration of the risks of material misstatement and the results of audit tests may indicate such a significant risk of material misstatement due to fraud that the auditor should consider withdrawing from the engagement and communicating the reasons for withdrawal to those charged with governance or others with equivalent authority and responsibility. Whether the auditor concludes that withdrawal from the engagement is appropriate may depend on (*a*) the implications about the integrity of management and (*b*) the diligence and cooperation of management or the board of directors in investigating the circumstances and taking appropriate action. Because of the variety of circumstances that may arise, it is not always possible to definitely describe when withdrawal is appropriate. The auditor may wish to consult with legal counsel when considering withdrawal from an engagement.

Communicating About Possible Fraud to Management, Those Charged With Governance, and Others

.28 Whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to those charged with governance. In addition, the auditor should reach an understanding with those charged with governance regarding the nature and extent of communications with the committee about misappropriations perpetrated by lower level employees.

.29 If the auditor, as a result of the assessment of the risks of material misstatement, has identified risks of material misstatement due to fraud that have continuing control implications (whether or not transactions or adjustments that could be the result of fraud have been detected) the auditor should consider whether these risks represent significant deficiencies or material weaknesses in the entity's internal control that should be communicated to management and those charged with governance. Also the auditor should consider whether the absence of or deficiencies in programs and controls to mitigate specific risks of fraud or to otherwise help prevent, deter, and detect fraud represent significant deficiencies or material weaknesses that should be communicated to management and those charged with governance.

.30 The auditor should recognize that in the following circumstances a duty to disclose outside the entity may exist

- to comply with certain legal and regulatory requirements.
- to a successor auditor when the successor makes inquiries in accordance with AU section 315, *Communications Between Predecessor and Successor Auditors* (AICPA, *Professional Standards*).
- in response to a subpoena.

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

- to a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance.

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing matters of fraud or possible fraud with parties outside the client.

Documenting the Auditor's Consideration of Fraud

.31 The auditor should document the following:

- The discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed
- The procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud
- Specific risks of material misstatement due to fraud that were identified and a description of the auditor's response to those risks
- If the auditor has not identified, in a particular circumstance, improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor's conclusion
- The results of the procedures performed to further address the risk of management override of controls
- Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions

The nature of the communications about fraud made to management, those charged with governance, and others.

Fraud Risk Factor Memory Jogger

.32 An auditor may find this memory jogger helpful during planning and at other stages of the audit, when considering fraud risk factors and assessing the risks of material misstatement due to fraud. The following listing contains example risk factors for small, privately owned businesses. If used, this memory jogger should be tailored for the particular client being audited. Identified or possible risk factors should be added to the list. An auditor may also decide to remove the example factors from the list based on the circumstances. In any event, be sure to consider fraud risk factors that relate to fraudulent financial reporting and misappropriation of assets in every related category presented. An auditor should feel free to use this practice aid as he or she sees fit (for example, adding attachments, redesigning the form of the memory jogger). Finally, note that AU section 316 does not require an auditor to use a memory jogger or checklist of fraud risk factors.

Part 1—Fraudulent Financial Reporting

Fraud risk factors considered	*Present at client?*	*Audit response developed?*[3]	*Audit response documented? (W/P Ref.)*[4]	*Additional information*
A. Incentives and Pressures				
1. Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by) the following:				
a. High degree of competition or market saturation, accompanied by declining margins				
b. New accounting, statutory, or regulatory requirements				
c. Significant declines in customer demand and increasing business failures in either the industry or the economy in which the entity operates				
d. High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates				
e. Operating losses making the threat of bankruptcy or foreclosure, imminent				
f. Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth				
g. Rapid growth or unusual profitability especially compared to that of other companies in the same industry				
2. Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:				
a. Need to obtain additional debt or equity financing to stay competitive, including financing of major research and development or capital expenditures				
b. Marginal ability to meet debt repayment or other debt covenant requirements				
3. Management's personal net wealth is threatened by the entity's financial performance arising from the following:				
a. Heavy concentrations of their personal net worth in the entity.				

[3] Based on the assessment of risk of material misstatement due to fraud, an auditor may respond to identified risk factors individually or in combination.

[4] The auditor's response to identified risk factors should be documented. Documentation should be maintained at a place in the working papers considered most suitable, depending upon the type of risk factor and the type of response. Generally, if a response is specific to a particular account balance or class of transactions, documentation of the audit procedures would be placed in the appropriate audit program (for example, cash investments). If it is determined that audit procedures already planned or normally carried out are a sufficient response to the identified risk factor, that fact should be documented.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Fraud risk factors considered	*Present at client?*	*Audit response developed?*[3]	*Audit response documented? (W/P Ref.)*[4]	*Additional information*
b. Personal guarantees of debt of the entity that are significant to their personal net worth.				
c. Adverse consequences on significant matters if *good* financial results are reported. Specific examples include management's motivation to inappropriately reduce income taxes, to defraud a divorced spouse or a partner of his or her share of the profits or assets of a business, or to convince a judge or arbitrator that the business in dispute is not capable of providing adequate cash flow. Keep in mind that you are not required to plan your audit to discover personal information (for example, marital status) of the owner-manager. However, if you become aware of such information, you may consider it in your assessment of risk of material misstatement due to fraud.				
4. There is excessive pressure on management or operating personnel to meet financial targets set by the owner, including sales or profitability incentive goals.				
B. Opportunities				
1. The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:				
a. Significant related party transactions not in the ordinary course of business or with related entities not audited or audited by another firm				
b. Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate				
c. Significant, unusual, or highly complex transactions, especially those close to year-end that pose difficult "substance over form" questions				
2. There is a complex or unstable organizational structure as evidenced by the following:				
a. Difficulty in determining the organization or individuals that have controlling interest in the entity				
b. Overly complex organizational structure involving unusual legal entities or managerial lines of authority				
c. High turnover of senior management or counsel				
3. Internal control components are deficient as a result of the following:				
a. Inadequate monitoring of controls, including automated controls				

(continued)

Fraud risk factors considered	*Present at client?*	*Audit response developed?*[3]	*Audit response documented? (W/P Ref.)*[4]	*Additional information*
b. High turnover rates or employment of ineffective accounting staff.				
c. Ineffective accounting and information systems including situations involving reportable conditions				
C. Attitudes and Rationalizations				
1. A failure for management to display and communicate an appropriate attitude regarding internal control and the financial reporting process				
2. Ineffective communication and support of the entity's values or ethical standards by management or the communication of inappropriate values or ethical standards				
3. Nonfinancial management's excessive participation in or preoccupation with the selection of accounting principles or the determination of significant estimates				
4. Known history of violations or claims against the entity, its owner or senior management alleging fraud or violations of laws and regulations				
5. A practice by management of committing to creditors and other third parties to achieve aggressive or unrealistic forecasts				
6. Management failing to correct known reportable conditions on a timely basis				
7. An interest by management in employing inappropriate means to minimize reported earnings for tax motivated reasons				
8. Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality				
9. The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:				
a. Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters				
b. Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's report				
c. Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with the board of directors or those charged with governance				
d. Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of audit personnel assigned to the engagement				

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Part 2—Misappropriation of Assets

A. Incentives and Pressures				
1. Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.				
2. Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:				
a. Known or anticipated future layoffs				
b. Promotions, compensation, or other rewards inconsistent with expectations				
B. Opportunities				
1. Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:				
a. Large amounts of cash on hand or processed				
b. Company issued credit cards				
c. Inventory items that are small in size, of high value, or in high demand				
d. Easily convertible assets				
e. Fixed assets, that, are small in size, marketable, or lacking observable identification of ownership				
2. Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:				
a. Inadequate segregation of duties or independent checks. Inadequate segregation of duties is quite often understandable in a small business environment in that it's a function of the entity's size. However, you may consider it in conjunction with other risk factors and with mitigating controls.				
b. Inadequate management oversight of employees responsible for assets.				
c. Inadequate job applicant screening of employees with access to assets.				
d. Inadequate record keeping with respect to assets.				

(continued)

e. Inadequate system of authorization and approval of transactions (for example, in purchasing).				
f. Inadequate physical safeguards over cash, investments, inventory, or fixed assets.				
g. Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns.				
h. Lack of mandatory vacations for employees performing key control functions.				
i. Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation.				
j. Inadequate access controls over automated records.				
C. Attitudes and Rationalizations				
1. Disregard for the need for monitoring or reducing risks related to misappropriations of assets				
2. Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies				
3. Behavior indicating displeasure or dissatisfaction with the company or its treatment of the employee				
4. Changes in behavior or lifestyle that may indicate assets have been misappropriated

AAM Section 3150

Illegal Acts

General Comments

.01 The term *illegal acts* refers to violations of laws or governmental regulations. Illegal acts by clients do not include personal misconduct by the entity's personnel unrelated to their business activities.

.02 Whether an act is illegal is a determination that is normally beyond the auditor's professional competence. The auditor's training and experience may provide a basis for recognition that some client acts coming to his or her attention may be illegal.

Direct and Material Effect Illegal Acts

.03 The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts. For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts.

.04 The auditor considers such laws or regulations from the perspective of their known relation to audit objectives derived from financial statement assertions rather than from the perspective of legality per se.

.05 The auditor's responsibility to detect and report misstatement resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for errors or fraud as described in AU section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*). That is, the auditor should design the audit to provide reasonable assurance that financial statement amounts are free from material misstatement resulting from these direct-effect illegal acts.

Other Illegal Acts

.06 Entities may be affected by many other laws or regulations, including those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity's operating aspects than to its financial and accounting aspects and their financial statement effect is indirect.

.07 An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. Normally, an audit conducted in accordance with generally accepted auditing standards does not include audit procedures specifically designed to detect illegal acts having an indirect effect on financial statements.

Engagement Planning Procedures

.08 The auditor should assess the risks that the entity has not complied with laws and regulations that have a direct and material effect on the determination of financial statement amounts (except disclosure of contingencies) in the planning phase of the audit.

.09 Matters that may influence the auditor's assessment include the following:

a. Management's understanding of the requirements of laws and regulations pertinent to audit objectives

b. The nature and extent of noncompliance noted in prior audits

c. Changes in requirements since the last audit

d. Internal control components designed to give management reasonable assurance that the entity complies with those laws and regulations

e. The client's policy relative to the prevention of illegal acts

.10 Normally, there is no need to include audit procedures specifically designed to detect illegal acts. However, if the auditor becomes aware of information that raises suspicions, he or she is obligated to apply additional procedures to determine whether an illegal act has, in fact, occurred (see paragraphs .07–.11 of AU section 317, *Illegal Acts by Clients* [AICPA, *Professional Standards*]).

AAM Section 3155

Analytical Procedures

General Comments

.01 Analytical procedures are a natural extension of the auditor's understanding of the client's business and add to his or her understanding because the key factors that influence the client's business may be expected to affect the client's financial information. Analytical procedures are used in all three stages of the audit. In the planning stage, the purpose of analytical procedures is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions.[1] In the substantive testing stage of the audit, the purpose of analytical procedures is to obtain evidence, sometimes in combination with other substantive procedures, to identify misstatements in account balances and, thus, to reduce the risk that misstatements will remain undetected. The auditor's reliance on substantive tests to achieve an audit objective related to a particular assertion may be derived from tests of details, from analytical procedures, or from a combination of both. The decision about which procedure or procedures to use to achieve a particular audit objective is based on the auditor's judgment about the expected effectiveness and efficiency of the available procedures. In the overall review stage, the objective of analytical procedures is to assist the auditor in assessing the conclusions reached and in evaluating the overall financial statement presentation. In all cases, the effectiveness of analytical procedures lies in developing expectations that can reasonably be expected to identify unexpected relationships.

.02 Understanding financial relationships is essential in planning and evaluating the results of analytical procedures and generally requires knowledge of the client and the industry or industries in which the client operates. An understanding of the purposes of analytical procedures and the limitations of those procedures is also important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires judgment by the auditor.

Analytical procedures should be applied, to some extent, for the purposes referred to in the planning stage and the overall review stage above for all audits of financial statements made in accordance with generally accepted auditing standards. In addition, in some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives.

Analytical Procedures

.03 *Analytical procedures* are defined in paragraph .02 of AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*), as "evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. ... A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of conditions to the contrary." The definition implies several key concepts:

- The "evaluations of financial information" suggests that analytical procedures will be used to understand or test financial statement relationships or balances.
- The "study of plausible relationships" implies an understanding of what can reasonably be expected and involves a comparison of the recorded book values with an auditor's expectations.
- "Relationships among both financial and nonfinancial data" suggests that both types of data can be useful in understanding the relationships of the financial information and, therefore, in forming an expectation.

[1] In accordance with paragraph .06 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), analytical procedures are also performed as risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control. Refer to AU section 314 for further guidance.

.04 Also, in accordance with paragraph .09 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), the auditor should apply analytical procedures in planning the audit to assist in understanding the entity and its environment and to identify areas that may represent specific risks relevant to the audit. For example, analytical procedures may be helpful in identifying the existence of unusual transactions or events and amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. In performing analytical procedures as risk assessment procedures, the auditor should develop expectations about plausible relationships that are reasonably expected to exist. When comparison of those expectations with recorded amounts or ratios developed from recorded amounts yields unusual or unexpected relationships, the auditor should consider those results in identifying risks of material misstatement. However, when such analytical procedures use data aggregated at a high level (which is often the situation), the results of those analytical procedures provide only a broad initial indication about whether a material misstatement may exist. Accordingly, the auditor should consider the results of such analytical procedures along with other information gathered in identifying the risks of material misstatement.

.05 Analytical procedures performed during the overall review stage are designed to assist the auditor in assessing that (*a*) all significant fluctuations and other unusual items have been adequately explained and (*b*) the overall financial statement presentation makes sense based on the audit results and the auditor's knowledge of the business.

.06 During the substantive testing stage, analytical procedures may be used to obtain assurance that material misstatements are not likely to exist in financial statement account balances. If analytical procedures are used for substantive testing, the auditor should focus his or her analytical procedures on particular assertions about account balances and should give detailed attention to the underlying factors that affect those account balances through the development of an expectation independent of the recorded balance. Therefore, substantive analytical procedures generally are performed with more rigor and precision than those used for planning or overall review.

.07 AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*), establishes requirements and provides guidance on the use of analytical procedures as substantive procedures. In designing substantive analytical procedures, the auditor should consider such matters as the following:

- The suitability of using substantive analytical procedures, given the assertions
- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed
- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance
- The amount of any difference in recorded amounts from expected values that is acceptable

The auditor should consider testing the controls, if any, over the entity's preparation of information to be used by the auditor in applying analytical procedures. When such controls are effective, the auditor has greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. When designing substantive analytical procedures, the auditor should evaluate the risk of management override of controls. As part of this process, the auditor should evaluate whether such an override might have allowed adjustments outside of the normal period-end financial reporting process to have been made to the financial statements. Such adjustments might have resulted in artificial changes to the financial statement relationships being analyzed, causing the auditor to draw erroneous conclusions. For this reason, substantive analytical procedures alone are not well suited to detecting some types of fraud. Alternatively, the auditor may consider whether the information was subjected to audit testing in the current or prior period. In determining the audit procedures to apply to the information upon which the expectation for substantive analytical procedures is based, the auditor should consider the guidance in paragraph .14 of AU section 318.

.08 In planning substantive analytical procedures, the auditor should consider the amount of difference from the expectation that can be accepted without further investigation. This consideration is influenced

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

primarily by tolerable misstatement and should be consistent with the desired level of assurance. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balance, class of transactions, or disclosure could aggregate to an unacceptable amount. In designing substantive analytical procedures, the auditor should increase the desired level of assurance as the risk of material misstatement increases.

Analytical Procedure Process: Four Phases

.09 The use of analytical procedures can be considered a process that consists of four phases. The first phase is the expectation-formation process. In this phase, the auditor forms an expectation of an account balance or financial relationship. In doing so, the auditor determines the precision of the expectation and, thus, in part, the effectiveness of the analytical procedure.

.10 The remaining three phases consist of the identification, investigation, and evaluation of the difference between the auditor's expected value and the recorded book value in light of the auditor's materiality assessment. In the second phase, identification, the auditor identifies whether an unusual fluctuation exists between the expected and recorded amounts. In the third, investigation, the auditor investigates the cause of unexpected differences by considering possible causes and searching for information to identify the most probable causes. Finally, in the evaluation phase, the auditor evaluates the likelihood of material misstatement and determines the nature and extent of any additional auditing procedures that may be required.

Expectation Formation (Phase I)

.11 Forming an expectation is the most important phase of the analytical procedure process. The more precise the expectation (that is, the closer the auditor's expectation is to the correct balance or relationship), the more effective the procedure will be at identifying potential misstatements. Also, AU section 329 states that the expectation should be precise enough to provide the desired level of assurance that differences that may be potential misstatements, individually or when aggregated with other misstatements, would be identified for the auditor to investigate.

.12 The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

a. Financial information for comparable prior period(s) giving consideration to known changes

b. Anticipated results, for example, budgets or forecasts including extrapolations from interim or annual data

c. Relationships among elements of financial information within the period

d. Information regarding the industry in which the client operates, for example, gross margin information

e. Relationships of financial information with relevant nonfinancial information

.13 The effectiveness of an analytical procedure is a function of three factors related to the precision with which the expectation is developed: (*a*) the nature of the account or assertion, (*b*) the reliability and other characteristics of the data, and (*c*) the inherent precision of the expectation method used.

Identification and Investigation (Phases II and III)

.14 The next two phases of the analytical procedure process consist of identification and investigation. Identification begins by comparing the auditor's expected value with the recorded amount. Given that the auditor developed an expectation with a particular amount of difference that could be accepted without further explanation, he or she then compares the unexpected differences with the threshold. In substantive testing, an auditor testing for the possible misstatement of the book value of an account determines whether

the audit difference was less than the auditor's threshold. If the difference is less than the acceptable threshold, taking into consideration the desired level of assurance from the procedure, the auditor accepts the book value without further investigation. If the difference is greater, the next step is to investigate the difference.

.15 In investigation, the auditor should evaluate possible explanations for the difference. The greater the precision of the expectation (that is, the closer the expectation is to the correct amount) the greater the likelihood that the difference between the expected and recorded amounts is due to misstatement rather than nonmisstatement causes. The difference between an auditor's expectation and the recorded book value of an account (value of an account not subject to auditing procedures) can be due to any or all of the following three causes: (*a*) the difference is due to misstatements, (*b*) the difference is due to inherent factors that affect the account being audited (for example, the predictability of the account or account subjectivity), and (*c*) the difference is due to factors related to the reliability of data used to develop the expectation (for example, data that have been subject to auditing procedures versus data that have not been subject to auditing procedures). The greater the precision of the expectation, the more likely the difference between the auditor's expectation and the recorded value will be due to misstatements (cause [*a*]). Conversely, the less precise the expectation, the more likely the difference is due to factors related to the precision of the expectation (causes [*b*] and [*c*]).

Evaluation (Phase IV)

.16 The final phase of the analytical procedure process consists of evaluating the difference between the auditor's expected value and the recorded amount. It is usually not practicable to identify factors that explain the exact amount of a difference identified for investigation. However, the auditor should attempt to quantify that portion of the difference for which plausible explanations can be obtained and, where appropriate, corroborated and determine that the amount that cannot be explained is sufficiently small to enable him or her to conclude on the absence of material misstatement.

.17 If a reasonable explanation can not be obtained, in accordance with paragraph .50 of AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*), the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence and determine the effect of such misstatements on the financial statements taken as a whole. Misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole." In this case, the auditor should aggregate the misstatement, depending on materiality considerations, with other misstatements the entity has not corrected in the manner discussed in AU section 312.

Engagement Planning Procedures

.18 As stated previously, the purpose of applying analytical procedures in planning the audit is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions. To accomplish this, the analytical procedures used in planning the audit should focus on (*a*) enhancing the auditor's understanding of the clients' business and the transactions and events that have occurred since the last audit date, and (*b*) identifying areas that may represent specific risks relevant to the audit. Thus, the objective of the procedures is to identify such things as the existence of unusual transactions and events and amounts, ratios, and trends that might indicate matters that have financial statement and audit planning ramifications.

.19 Analytical procedures used in planning the audit generally use data aggregated at a high level. Furthermore, the sophistication, extent, and timing of the procedures, which are based on the auditor's judgment, may vary widely depending on the size and complexity of the client. For some entities, the procedures may consist of reviewing changes in account balances from the prior to the current year using the general ledger or the auditor's preliminary or unadjusted working trial balance. In contrast, for other entities, the procedures might involve an extensive analysis of quarterly financial statements. In both cases, the

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

analytical procedures, combined with the auditor's knowledge of the business, serve as a basis for additional inquiries and effective planning.

.20 Although analytical procedures used in planning the audit often use only financial data, sometimes relevant, nonfinancial information is considered as well. For example, number of employees, square footage of selling space, volume of goods produced, and similar information may contribute to accomplishing the purpose of the procedures.

Audit Documentation Requirements

.21 Paragraph .22 of AU section 329 states than when an analytical procedure is used as the principal substantive test of a significant financial statement assertion the auditor should document all of the following:

- The expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development
- Results of the comparison of the expectation to the recorded amounts or ratios developed from the recorded amounts
- Any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures

Analytical Procedures Audit Guide

.22 For additional guidance, practitioners may refer to the AICPA Audit Guide *Analytical Procedures*. The guide provides practical guidance for auditors on the effective use of analytical procedures. Specifically, the audit guide includes a discussion of AU section 329; concepts and definitions; a series of questions and answers, grouped in the following five categories: precision of the expectation, relationship of analytical procedures to the audit risk model, evaluation and investigation, purpose of analytical procedures, and fraud; and a case study illustrating the four types of expectation methods discussed in chapter 1 of the guide: trend analysis, ratio analysis, reasonableness testing, and regression analysis.

.23 Audit Guide *Analytical Procedures* also includes illustrations that demonstrate the importance of forming expectations and considering the precision of the expectation, two of the most misunderstood concepts from AU section 329. The concepts discussed are applicable for all three stages of the audit (planning, substantive testing, and review). However, the guide focuses principally on how the concepts are applied to substantive testing because in designing substantive procedures, auditors ordinarily desire a specified level of audit assurance. To obtain the Audit Guide, call the AICPA order department at (888) 777-7077 and ask for product no. 012558 or visit www.cpa2biz.com and search for the aforementioned product number.

Sample Engagement Letters

.01 Following are illustrative engagement letters. These illustrative letters are examples and may not include all representations necessary for a particular engagement. They may be used as a starting point in the design of specific letters and then tailored to satisfy the terms of a particular engagement. These illustrative engagement letters are intended to be used in connection with engagements of nonpublic entities and are not intended to be used in connection with audits of public entities that are required to be audited under standards set by the Public Company Accounting Oversight Board.

.02 Audit Engagement Leading to Opinion

LACKO, LYNCH, BROWN & COMPANY — Certified Public Accountants

[*Date*]
Mr. Matt Decker, President
Civil War Antiques, Inc.
111 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Decker:

This will confirm our understanding of the services we will provide to Civil War Antiques, Inc. (the Company) for the year ending December 31, 20XX.

We will audit the balance sheet of Civil War Antiques, Inc. as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, for the purpose of expressing an opinion on them.

Audit Objective

The objective of our audit is the expression of an opinion as to whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America and will include tests of accounting records and other procedures we consider necessary to enable us to express such an opinion. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

Audit Procedures

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by errors or fraud. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come

to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.[1]

Our procedures will include tests of transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected customers, creditors, legal counsel, and financial institutions. At the conclusion of our audit, we will request certain written representations (a "representation letter") from you about the financial statements and related matters.

Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements or noncompliance may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements, or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you and those charged with governance, defined as the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including oversight of the financial reporting process, of any material errors and any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you and those charged with governance of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to matters that might arise during any later periods for which we are not engaged as auditors.

An audit includes obtaining an understanding of the entity and its environment, including its internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify deficiencies in internal control. However, we are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under Statements on Auditing Standards.

Management Responsibilities

The Company's management is responsible for the basic financial statements and all accompanying information as well as all assertions contained therein. Encompassed in that responsibility are the establishment and maintenance of effective internal control over financial reporting; the establishment and maintenance of proper accounting records; the selection of appropriate accounting principles; the safeguarding of assets; fair presentation of the financial statements with accounting principles generally accepted in the United States of America; and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us and for the accuracy and completeness of that information.

The Company's management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

The Company's management is responsible for the design and implementation of programs and controls to prevent and detect fraud and for informing us about all known or suspected fraud or illegal acts affecting the Company involving management, employees who have significant roles in internal control, and others where the fraud or illegal acts could have a material effect on the financial statements. Management's responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud or illegal acts affecting the Company received in communications from employees, former employees, regulators, or others. In

---

[1] Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94, "Indemnification Clause in Engagement Letters," under Rule 101, *Independence* (AICPA, *Professional Standards*, ET sec. 191 par. .188–.189), states that the following indemnification clause in an engagement letter would not impair a CPA's independence: The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management. Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA Professional Ethics Executive Committee (PEEC) is currently addressing the issue of indemnification clauses.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

addition, the Company's management is responsible for identifying and ensuring that the Corporation complies with applicable laws and regulations and for taking timely and appropriate steps to remedy any fraud, illegal acts, or violations of contracts or grant agreements, or abuse that we may report.

Management is responsible for making all management decisions and performing all management functions, for designating an individual with suitable skill knowledge, or experience to oversee the tax services or any other nonattest services we provide, and for evaluating the adequacy and results of those services and accepting responsibility for them.

Other Engagement Matters and Limitations

As part of our engagement for the year ending December 31, 20XX, we will review the federal and state income tax returns for Civil War Antiques, Inc. Further, we will be available during the year to consult with you on the tax effects of any proposed transactions or contemplated changes in business policies.

Professional standards require us to be independent with respect to the Company in the performance of our services. Any discussions that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual's base compensation at the Company, [xx] days from the first day of employment.

Audit Administration, Fees, and Other

We may from time to time, and depending on the circumstances, use third party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third party service provider. Furthermore, we will remain responsible for the work provided by any such third party service providers.[2]

Auditing standards generally accepted in the United States of America require that we communicate certain additional matters related to the conduct of our audit to those charged with governance. Such matters include (1) our responsibilities under auditing standards generally accepted in the United States of America; (2) an overview of the planned scope and timing of the audit; (3) significant findings from the audit, including, among others: (*a*) the initial selection of and changes in significant accounting policies and their application; (*b*) the process used by management in formulating particularly sensitive accounting estimates and the basis for our conclusions regarding the reasonableness of those estimates; (*c*) significant difficulties that we encountered in dealing with management related to the performance of the audit; (*d*) audit adjustments that could, in our judgment, either individually or in the aggregate, have a significant effect on your financial reporting process and uncorrected misstatements of the financial statements that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole; (*e*) any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the financial statements or our report; (*f*) management representations; (*g*) our views about matters that were the subject of management's consultation with other accountants about auditing and accounting matters; (*h*) major issues that were discussed with management in connection with the retention of our services, including, among other matters, any discussions regarding the application of accounting principles and auditing standards, and if applicable, events or conditions

[2] Ethics Ruling No. 112, "Use of a Third-Party Service Provider to Assist a Member in Providing Professional Services," under Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, ET sec. 191 par. .224–.225), requires that clients be informed if the firm will outsource professional services to third party service providers. If an audit firm intends to use third party service providers (that is, entities not controlled by the audit firm or individuals not employed by the audit firm), to perform portions of the audit (for example, input tax return information, act as a specialist, or audit an element of the financial statements), the client must be informed before confidential client information is shared with the service provider. If a third party service provider is not used to perform professional services, this paragraph can be omitted.

indicating there could be a substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time; and (4) other matters as considered necessary or required to be communicated under professional standards.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers' proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

Our fees will be billed as work progresses and are based on the amount of time required plus out of pocket costs and administrative expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which we estimate to range from $XX,XXX to $XX,XXX. Additional expenses are expected to be $X,XXX.

The audit documentation for this engagement is the property of Lacko, Lynch, Brown & Company and constitutes confidential information. However, we may be requested to make certain audit documentation available to ______________________ [*name of regulator*] pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of Lacko, Lynch, Brown & Company personnel. Furthermore, upon request, we may provide photocopies of selected audit documentation to ______________________________ [*name of regulator*]. The ____________________ [*name of regulator*] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one. If you have any questions, please contact us. If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Sincerely,

LACKO, LYNCH, BROWN & COMPANY

.03 Change in Circumstances From Those Contemplated in Original Engagement Letter

MACARTHUR & KENNEY, CPA'S — Certified Public Accountants

[*Date*]
Mr. James Melakon, Treasurer
Nimbus Country Club
64 Vasily Road
Velikiye Luki, Ohio 10000

Dear Mr. Melakon:

As we agreed in our original engagement letter dated [*date*] we are notifying you that our audit of your December 31, 20XX financial statements requires additional procedures.

We have found that certain guest checks are held for only three months after they are paid. Thus, a substantial number of guest checks are not available for examination. Fortunately, your internal control activities allow us to use alternative procedures to satisfy ourselves on this part of the audit. However, this will require substantially more time than examining guest checks.

The fee for these additional services will be billed at our standard per diem rates and added to the fees quoted in our previous letter.

The situation has been discussed with your controller, who assured us that in the future all guest checks will be kept for two years.

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Very truly yours,

MACARTHUR & KENNEY, CPA'S

.04 Conditions Encountered That Do Not Permit Expression of Opinion as Anticipated in Original Engagement Letter

GEROW, COLLINS & PATCH — Certified Public Accountants

[*Date*]
Mrs. Helene Daestrom, President
Cohrane Manufacturing, Inc.
1234 West Street
Cedar Hill, Tennessee 10000

Dear Mrs. Daestrom:

Our March 15, 20XX letter described our present engagement as an audit for the purpose of expressing an opinion on the financial statements based on our audit. This letter is to inform you that because of the circumstances described below, we will be required to qualify our opinion on these statements.

As you know, the Internal Revenue Service has proposed total income tax assessments of approximately $XXX,XXX for the three fiscal years ended December 31, 20XX. Your tax counsel has advised us that although you have a defensible position and will protest the assessments, counsel cannot offer an opinion as to your ultimate liability. No provision for this assessment or any portion of it is included in your December 31, 20XX financial statements, nor do you feel any is necessary.

Due to an inability to obtain sufficient appropriate audit evidence to support your assertions regarding the tax assessment situation described above, we will be unable to express an unqualified opinion. Our report will state the reasons for the qualification of our opinion.

You and your tax counsel have advised that you will inform us of any new developments in the proposed assessment before our report is issued so that we may consider their effect on your financial statements and on our report.

Sincerely,

GEROW, COLLINS & PATCH

.05 Audit of Not-for-Profit Financial Statements

LACKO, LYNCH, BROWN & COMPANY Certified Public Accountants

[*Date*]
Mr. Matt Smith, President
Not-for-Profit Entity
222 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Smith:

This will confirm our understanding of the services we will provide to Not-for-Profit Entity (the Entity) for the year ending December 31, 20XX.

We will audit the statement of financial position of Not-for-Profit Entity as of December 31, 20XX, and the related statements of activities and cash flows for the year then ended, for the purpose of expressing an opinion on them.[3]

Audit Objective

The objective of our audit is the expression of an opinion as to whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America and will include tests of accounting records and other procedures we consider necessary to enable us to express such an opinion. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

Audit Procedures

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether from errors or fraud. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.[4]

Our procedures will include tests of transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected individuals, funding sources, creditors, legal counsel, and financial institutions. At the conclusion of our audit, we will request certain written representations (a "representation letter") from you about the financial statements and related matters.

---

[3] According to Financial Accounting Standards Board *Accounting Standards Codification* 958-205-45-4, a voluntary health and welfare entity should provide a statement of functional expenses.

[4] Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94 under Rule 101 (AICPA, *Professional Standards*, ET sec. 191 par. .188–.189) states that the following indemnification clause in an engagement letter would not impair a CPA's independence: The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management. Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA PEEC is currently addressing the issue of indemnification clauses.

Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements or noncompliance may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements, or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you and those charged with governance, defined as the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including oversight of the financial reporting process, of any material errors and any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you and those charged with governance of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to matters that might arise during any later periods for which we are not engaged as auditors.

An audit includes obtaining an understanding of the Entity and its environment, including its internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify deficiencies in internal control. However, we are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under Statements on Auditing Standards.

Management Responsibilities

The Entity's management is responsible for the basic financial statements and all accompanying information as well as all assertions contained therein. Encompassed in that responsibility are the establishment and maintenance of effective internal control over financial reporting; the establishment and maintenance of proper accounting records; the selection of appropriate accounting principles; the safeguarding of assets; fair presentation of the financial statements with accounting principles generally accepted in the United States of America; and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us and for the accuracy and completeness of that information.

The Entity's management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

The Entity's management is responsible for the design and implementation of programs and controls to prevent and detect fraud and for informing us about all known or suspected fraud affecting the Entity involving management, employees who have significant roles in internal control, and others where the fraud could have a material effect on the financial statements. Management's responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud affecting the Entity received in communications from employees, former employees, regulators, or others. In addition, the Entity's management is responsible for identifying and ensuring that the Entity complies with applicable laws and regulations and for taking timely and appropriate steps to remedy any fraud, illegal acts, or violations of contracts or grant agreements, or abuse that we may report. Management is responsible for making all management decisions and performing all management functions, for designating an individual with suitable skill knowledge, or experience to oversee the tax services or any other nonattest services we provide, and for evaluating the adequacy and results of those services and accepting responsibility for them.

Other Engagement Matters and Limitations

As part of our engagement, we will prepare the Federal Form 990 and [*identify other returns*] for the year ended [*date*]. This return will be prepared in accordance with professional standards and may be processed by a contract computer service that has agreed to maintain the confidentiality of all information furnished.

Our work in connection with the preparation of the Form 990 does not include any procedures designed to discover defalcations or other fraud, should any exist.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

You have the final responsibility for the Form 990. Therefore, you should review it carefully before you sign and file it.

Professional standards require us to be independent with respect to the Entity in the performance of our services. Any discussions that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual's base compensation at the Entity, [XX] days from the first day of employment.

Audit Administration, Fees, and Other

We may from time to time, and depending on the circumstances, use third party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third party service provider. Furthermore, we will remain responsible for the work provided by any such third party service providers.[5]

Auditing standards generally accepted in the United States of America require that we communicate certain additional matters related to the conduct of our audit to those charged with governance. Such matters include (1) our responsibilities under auditing standards generally accepted in the United States of America; (2) an overview of the planned scope and timing of the audit; (3) significant findings from the audit, including, among others: (*a*) the initial selection of and changes in significant accounting policies and their application; (*b*) the process used by management in formulating particularly sensitive accounting estimates and the basis for our conclusions regarding the reasonableness of those estimates; (*c*) significant difficulties that we encountered in dealing with management related to the performance of the audit; (*d*) audit adjustments that could, in our judgment, either individually or in the aggregate, have a significant effect on your financial reporting process and uncorrected misstatements of the financial statements that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole; (*e*) any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the financial statements or our report; (*f*) management representations; (*g*) our views about matters that were the subject of management's consultation with other accountants about auditing and accounting matters; (*h*) major issues that were discussed with management in connection with the retention of our services, including, among other matters, any discussions regarding the application of accounting principles and auditing standards, and if applicable, events or conditions indicating there could be a substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time; and (4) other matters as considered necessary or required to be communicated under professional standards.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers' proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

---

[5] Ethics Ruling No. 112 under Rule 102 (AICPA, *Professional Standards*, ET sec. 191 par. .224-.225) requires that clients be informed if the firm will outsource professional services to third party service providers. If the an audit firm intends to use third party service providers (that is, entities not controlled by the audit firm or individuals not employed by the audit firm), to perform portions of the audit (for example, input tax return information, act as a specialist, or audit an element of the financial statements), the client must be informed before confidential client information is shared with the service provider. If a third party service provider is not used to perform professional services, this paragraph can be omitted.

Our fees will be billed as work progresses and are based on the amount of time required plus out-of-pocket costs and administrative expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which we estimate to range from $XX,XXX to $XX,XXX. Additional expenses are expected to be $X,XXX.

The audit documentation for this engagement is the property of Lacko, Lynch, Brown & Company and constitutes confidential information. However, we may be requested to make certain audit documentation available to [*name of regulator*] pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of Lacko, Lynch, Brown & Company personnel. Furthermore, upon request, we may provide photocopies of selected audit documentation to [*name of regulator*]. The [*name of regulator*] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one. If you have any questions, please contact us. If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Sincerely,

.06 Audit of Not-for-Profit Financial Statements Subject to the Provisions of OMB Circular A-133

LACKO, LYNCH, BROWN & COMPANY — Certified Public Accountants

[*Date*]
Mr. Matt Cox, President
Not-for-Profit Entity
333 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Cox:

This will confirm our understanding of the services we will provide to Not-for-Profit Entity (the Entity) for the year ending December 31, 20XX.[6]

We will audit the statement of financial position of Not-for-Profit Entity as of December 31, 20XX, and the related statements of activities and cash flows for the year then ended, for the purpose of expressing an opinion on them. We also will report on the following additional information accompanying the basic financial statements: (1) schedule of expenditures of federal awards and (2) [*insert additional information here*].

Audit Objectives

The objective of our audit is the expression of an opinion as to whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America and to report on the additional information referenced in the second paragraph of this letter when considered in relation to the financial statements taken as a whole.

Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America; the standards for financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; the Single Audit Act Amendments of 1996; and the requirements of OMB Circular A-133, and will include tests of accounting records and other procedures we consider necessary to enable us to express such an opinion and to render the required reports. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

We will also provide a report (that does not include an opinion) on internal control related to the financial statements and compliance with the provisions of applicable laws, regulations, contracts, agreements, and grants, noncompliance with which could have a material effect on the financial statements as required by *Government Auditing Standards*. The report on internal control and compliance will include a statement that the report is intended solely for the information and use of management, [*insert audit committee, if applicable*], the board of directors, and specific legislative or regulatory bodies, federal awarding agencies, and if applicable, pass through entities and is not intended to be and should not be used by anyone other than these specified parties. If, during our audit, we become aware that the Company is subject to an audit requirement that is not encompassed in the terms of this engagement, we will communicate to management and those charged with governance that an audit is accordance with auditing standards generally accepted in the United States of America and the standards for financial audits contained in *Government Auditing Standards* may not satisfy the relevant legal, regulatory, or contractual requirements.

Audit Procedures

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An

[6] *Note to users of this sample engagement letter*: You may add to the engagement letter as appropriate, for additional considerations, such as performing procedures relating to a compliance audit of or limited scope audits of subrecipients, the involvement of other auditors (for example, a joint audit with a minority firm), or the auditee's responsibility for obtaining the cooperation of the predecessor auditor.

audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether from errors or fraud. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.[7]

Our procedures will include tests of transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected individuals, funding sources, creditors, legal counsel, and financial institutions. At the conclusion of our audit, we will request certain written representations (a "representation letter") from you about the financial statements and related matters.

Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements or noncompliance may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you and those charged with governance, defined as the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including oversight of the financial reporting process, of any material errors and any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you and those charged with governance of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to matters that might arise during any later periods for which we are not engaged as auditors.

As part of our audit of the basic financial statements, we will obtain an understanding of the Entity and its environment, including its internal control, sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of our auditing procedures for the purpose of expressing our opinion on the financial statements. Our audit is not designed to provide an opinion on the [*abbreviated name*]'s internal control over financial reporting or to identify deficiencies in the design or operation of internal control over financial reporting. However, we are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under Statements on Auditing Standards, *Government Auditing Standards*, and the requirements of OMB Circular A-133.

We also will perform tests of the Entity's compliance with certain provisions of laws, regulations, and the provisions of contracts or grant agreements. However, it is not our objective to provide an opinion on overall compliance with those provisions and, accordingly, we will not express such an opinion.

In planning the audit, we will follow up on known significant findings and recommendations from previous financial audits, attestation engagements, performance audits, or other studies that directly relate to the objectives of the current audit to determine the effect on our risk assessment and audit procedures.

As part of our audit, we will be alert to situations or transactions that could be indicative of abuse, which involves behavior that is deficient or improper when compared with behavior that a prudent person would consider reasonable and necessary business practice given the facts and circumstances. The determination of abuse is subjective; *Government Auditing Standards* does not expect us to provide reasonable assurance of

[7] Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94 under Rule 101 (AICPA, *Professional Standards*, ET sec. 191 par. .188–.189) states that the following indemnification clause in an engagement letter would not impair a CPA's independence: The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management. Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA PEEC is currently addressing the issue of indemnification clauses.

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

detecting abuse, and we will not design the audit to detect abuse. However, if we become aware of indications of material abuse, we will apply procedures to ascertain whether abuse has occurred.

A schedule of expenditures of federal awards will accompany the Entity's basic financial statements. We will subject that schedule to the audit procedures applied in our audit of the basic financial statements and render our opinion on whether that schedule is fairly presented, in all material respects, in relation to the basic financial statements taken as a whole. We also will make specific inquiries of management about that schedule, which management will affirm to us in its representation letter.

Management Responsibilities

The Entity's management is responsible for the basic financial statements and the schedule of expenditures of federal awards as well as all assertions contained therein. Encompassed in that responsibility are the establishment and maintenance of effective internal control over financial reporting; the establishment and maintenance of proper accounting records; the selection of appropriate accounting principles; the safeguarding of assets; and the identification of and compliance with laws, regulations, and the provisions of contracts or grant agreements. Management is responsible for making all financial records and related information available to us and for the accuracy and completeness of that information. Management also is responsible for adjusting the basic financial statements to correct material misstatements and for affirming to us in its representation letter that the effects of any uncorrected misstatements that we accumulate during the current audit and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the basic financial statements.

The Entity's management is responsible for the design and implementation of programs and controls to prevent and detect fraud and for informing us about all known or suspected fraud or illegal acts affecting the Entity involving management, employees who have significant roles in internal control, and others where the fraud or illegal acts could have a material effect on the financial statements. Management's responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud or illegal acts affecting the Entity received in communications from employees, former employees, regulators, or others.

You are responsible for making all management decisions and performing all management functions, for designating an individual with suitable skill knowledge, or experience to oversee the tax services or any other nonattest services we provide, and for evaluating the adequacy and results of those services and accepting responsibility for them.

Compliance Audit of Federal Programs

The Entity's management is responsible for compliance with laws, regulations, and the provisions of contracts or grant agreements related to federal programs. Encompassed in that responsibility is the establishment and maintenance of internal control over compliance that provides reasonable assurance that the Entity is managing federal awards in compliance with laws, regulations, and provisions of contracts or grant agreements.

Our responsibility is to express an opinion on whether the Entity complied with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the Entity's major federal programs. Following the criteria for federal program risk in OMB Circular A-133, we will determine which federal programs should be considered major programs and thus included within the scope of the compliance audit.[8]

We will plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements that are applicable to the Entity's major federal programs could have a direct and material effect on each of its major federal programs. An audit of compliance includes examining, on a test basis, evidence about the Entity's compliance with those requirements and performing such other procedures we consider necessary in the circumstances. Our audit does not provide a legal determination on the Entity's compliance with those requirements.

[8] *Note to users of this sample engagement letter:* This paragraph may be modified if the auditor elects to use a dollar threshold approach to selecting major programs, as allowed by A-133 for first-year single audits.

As part of our audit of compliance applicable to the Entity's major federal programs, we will obtain an understanding of the Entity's internal control over compliance sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of our auditing procedures for the purpose of expressing our opinion on compliance and not to provide assurance on the internal control over compliance. We also will perform testing of internal control as required by OMB Circular A-133. We are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under AICPA professional standards, *Government Auditing Standards*, and the requirements of OMB Circular A-133.

We also will follow up on prior audit findings by performing procedures to assess the reasonableness of the Entity's summary schedule of prior audit findings.

We will include in our reports information about the following, if any: material noncompliance with laws, regulations, and provisions of contracts or grant agreements related to major programs; certain known questioned costs; fraud affecting federal awards; abuse that is material to a federal program; and other federal award audit findings as required by *Government Auditing Standards* and OMB Circular A-133.

Other Communications Arising From the Audit

In connection with planning and performing our audit, we will communicate certain matters to appropriate Entity's personnel and to those charged with governance, including our responsibilities for testing and reporting on internal control over financial reporting and on compliance with laws, regulations, and provisions of contracts or grant agreements, both for our financial statement audit and our compliance audit of major federal programs.[9] We also will communicate certain matters of interest, as applicable, to the audit committee, including changes in significant accounting policies or their application, adjustments arising from the audit that could either individually or in the aggregate have a significant effect on the Entity's financial reporting process, and fraud involving senior management that is not otherwise included in our reports.

Auditing standards generally accepted in the United States of America require that we communicate certain additional matters related to the conduct of our audit to those charged with governance. Such matters include (1) our responsibilities under auditing standards generally accepted in the United States of America; (2) an overview of the planned scope and timing of the audit; (3) significant audit findings, including, among others: (*a*) the initial selection of and changes in significant accounting policies and their application; (*b*) the process used by management in formulating particularly sensitive accounting estimates and the basis for our conclusions regarding the reasonableness of those estimates; (*c*) serious difficulties that we encountered in dealing with management related to the performance of the audit; (*d*) audit adjustments that could, in our judgment, either individually or in the aggregate, have a significant effect on your financial reporting process and uncorrected misstatements of the financial statements that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole; (*e*) any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the financial statements or our report; (*f*) management representations; (*g*) our views about matters that were the subject of management's consultation with other accountants about auditing and accounting matters; (*h*) major issues that were discussed with management in connection with the retention of our services, including, among other matters, any discussions regarding the application of accounting principles and auditing standards, and if applicable, events or conditions indicating there could be a substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time; and (4) other matters as considered necessary or required to be communicated under professional standards.

In planning and performing our audit, we will ask management, those charged with governance, the internal auditor, and others within the entity about fraud or suspected fraud; allegations of fraud or suspected fraud; the risks of fraud; programs and controls established to prevent and detect fraud; whether management has communicated information about those programs and controls to those charged with governance; and how management communicates to employees its views on business practices and ethical behavior.

[9] *Note to users of this sample engagement letter: Government Auditing Standards* paragraphs 4.08–.09 specify the parties to whom this communication should be made.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

We also may communicate in a management letter certain matters identified during the audit or possible ways to improve the Entity's operational efficiency and effectiveness or otherwise improve its internal control or other policies or procedures. Under GAAS and *Government Auditing Standards*, we also may be required to directly report fraud, illegal acts, violations of provisions of contracts or grant agreements, and abuse to outside parties.

Other Engagement Matters and Limitations

As part of our engagement, we will prepare the Federal Form 990 [*and identify other returns*] for the year ended [*date*]. This return will be prepared in accordance with professional standards and may be processed by a contract computer service that has agreed to maintain the confidentiality of all information furnished.

Our work in connection with the preparation of Form 990 does not include any procedures designed to discover defalcations or other fraud, should any exist.

You have the final responsibility for the Form 990. Therefore, you should review it carefully before you sign and file it.

Professional standards require us to be independent with respect to the [*abbreviated name*] in the performance of our services. Any discussion that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual's base compensation at the [*abbreviated name*], [XX] days from the first day of employment.

Audit Administration, Fees, and Other

We may from time to time, and depending on the circumstances, use third party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third party service provider. Furthermore, we will remain responsible for the work provided by any such third party service providers.[10]

The Entity agrees to make available to us all records, documentation, and information we request in connection with our audit, to disclose to us all material information, and to give to us the full cooperation of the Entity's personnel. An enclosure to this letter describes the assistance to be supplied by Entity personnel, including preparation of schedules and analyses of accounts, and the timing for that assistance. Timely completion of that work will facilitate the conclusion of our audit.

The Entity agrees to provide us printer's proofs of its basic financial statements, schedule of expenditures of federal awards, and other information for its Circular A-133 reporting package for our review and approval before printing. The [abbreviated name] also agrees to provide us with a copy of the final reproduced material for our approval before distributing it.

The Entity also is responsible for:

- Taking timely and appropriate steps to remedy fraud, illegal acts, violations of provisions of contracts or grant agreements, or abuse that we report.
- Having a process to track the status of audit findings and recommendations.

---

[10] Ethics Ruling No. 112 under Rule 102 (AICPA, *Professional Standards*, ET sec. 191 par. .224–.225) requires that clients be informed if the firm will outsource professional services to third party service providers. If the an audit firm intends to use third party service providers (that is, entities not controlled by the audit firm or individuals not employed by the audit firm), to perform portions of the audit (for example, input tax return information, act as a specialist, or audit an element of the financial statements), the client must be informed before confidential client information is shared with the service provider. If a third party service provider is not used to perform professional services, this paragraph can be omitted.

- Identifying for us previous financial audits, attestation engagements, performance audits, or other studies related to the objectives of our audit and the corrective actions taken to address significant findings and recommendations.
- Providing its views on our current findings, conclusions, and recommendations, as well as management's planned corrective actions, for our reports. The corrective action plan that the Entity develops for its OMB Circular A-133 reporting package may fully or partially satisfy this responsibility.

Our reports on the Entity's internal control and compliance will state that they are intended solely for the information and use of those charged with governance, management, federal awarding agencies, and pass-through entities and are not intended to be and should not be used by anyone other than these specified parties. However, the Entity should make copies of our reports available for public inspection unless they are restricted by law or regulation, or contain privileged and confidential information.

The documentation for this audit is our firm's property and constitutes confidential information. We will maintain that documentation for the minimum period of time required by applicable auditing standards and requirements. In accordance with *Government Auditing Standards*, OMB Circular A-133, and federal law, we may be required, upon request, to make certain of that documentation (including photocopies) available to other auditors or reviewers, including the cognizant or oversight agency for audit or its designee, a federal agency providing direct or indirect funding, and the U.S. Government Accountability Office. Those parties may intend, or decide, to distribute the photocopies or information contained therein to others, including other governmental agencies and the public. We will notify you of any such requests.

Our firm undergoes a periodic external peer review that examines the quality of our auditing practice. We are enclosing with this letter a copy of the report and letter of comment from our firm's most recent external peer review.

We are always available to meet with you or other executives at various times throughout the year to discuss current business, operational, accounting, and auditing matters affecting the Entity. Whenever you feel such meetings are desirable, please let us know. We also are prepared to provide services to assist you in any of these areas. We also will be pleased, at your request, to attend your directors' meetings.

If the Entity wishes to assert that it complied, in all material respects, with specified laws and regulations, we could perform an engagement in accordance the American Institute of Certified Public Accountants' and *Government Auditing Standards'* attestation standards. The procedures we would perform would be more limited than if we were to express an opinion on management's assertions.

Our fee estimate, which is shown in a separate schedule, is based on a "core" amount for the financial statement audit and tax return preparation services plus an incremental amount for the compliance audit of federal programs, based on the Entity's actual number of major programs.[11] We also will charge the Entity for our out-of-pocket expenses. We will bill our fees as work progresses with payment to be made upon presentation. Our initial fee estimate and our target date for delivering our reports assume that we will receive the aforementioned assistance from Entity personnel and that we will not encounter unexpected circumstances. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of fees or our report delivery date, which is on or about [*date*]. Prior to the release of the audit reports, we will require payment of 100 percent of all fees billed.

[11] *Note to users of this sample engagement letter:* Various factors may change the level of effort required for the compliance audit of federal programs from year-to-year. For example, the auditee may have more or fewer federal programs or major programs because of new or discontinued federal programs, increased or decreased federal funding for existing programs, and OMB changes in program clusters, or the auditee may achieve or lose low risk auditee status. As shown in this sample letter, auditors could consider pricing their services for the compliance audit based on the number of major programs to be audited.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Our charges for other services will be agreed to separately.

.07 Audit of Financial Institution Financial Statements

LACKO, LYNCH, BROWN & COMPANY

Certified Public
Accountants

[*Date*]
Mr. Matt Cox, President
Financial Institution
333 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Smith:

We are pleased to confirm our understanding of the services we are to provide for Financial Institution (the "Bank") for the year ended December 31, 20XX.

We will audit the balance sheet of Financial Institution as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended.

The objective of our audit is the expression of an opinion about whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America and will include tests of your accounting records and other procedures we consider necessary to enable us to express such an opinion. If our opinion is other than unqualified, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or to issue a report as a result of this engagement.

Our procedures will include tests of documentary evidence and other procedures supporting the transactions recorded in the accounts. We will also request written representations from your attorneys as part of the engagement, and they may bill you for responding to this inquiry. At the conclusion of our audit, we will require certain written representations from you about the financial statements and related matters.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; therefore, our audit will involve judgment about the number of transactions to be examined and the areas to be tested. We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether from (*a*) errors, (*b*) fraudulent financial reporting, (*c*) misappropriation of assets, or (*d*) violations of laws or governmental regulations that are attributable to the entity or to acts by management or employees acting on behalf of the entity. Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you of any material errors that come to our attention, and we will inform you of any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to any later periods for which we are not engaged as auditors.

Our audit will include obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify deficiencies in internal control. However, during the audit, we will communicate to you internal control related matters that are required to be communicated under professional standards.

In accordance with auditing standards promulgated by the AICPA, we will communicate certain matters related to the conduct and results of the audit to those charged with governance. Such matters include, when

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

applicable, disagreements with management, whether or not resolved; serious difficulties encountered in performing the audit; our level of responsibility under auditing standards promulgated by the AICPA for the financial statements, for internal control, and for other information in documents containing the audited financial statements; unrecorded audit differences that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements as a whole; changes in the Bank's significant accounting policies and methods for accounting for significant unusual transactions or for controversial or emerging areas; our judgments about the quality of the Bank's accounting principles; our basis for conclusions as to sensitive accounting estimates; management's consultations, if any, with other accountants; and major issues discussed with management prior to our retention.

Management of the Bank is responsible for apprising us of all allegations involving financial improprieties received by management or those charged with governance (regardless of the source or form and including, without limitation, allegations by "whistle-blowers"), and providing us full access to these allegations and any internal investigations of them, on a timely basis. Allegations of financial improprieties include allegations of manipulation of financial results by management or employees, misappropriation of assets by management or employees, intentional circumvention of internal controls, inappropriate influence on related party transactions by related parties, intentionally misleading Lacko, Lynch, Brown & Company ("LLBC"), or other allegations of illegal acts or fraud that could result in a misstatement of the financial statements or otherwise affect the financial reporting of the Bank. If the Bank limits the information otherwise available to us under this paragraph (based on the Bank's claims of attorney/client privilege, work product doctrine, or otherwise), the Bank will immediately inform us of the fact that certain information is being withheld from us. Any such withholding of information could be considered a restriction on the scope of the audit and may prevent us from opining on the Bank's financial statements; alter the form of report we may issue on such financial statements; or otherwise affect our ability to continue as the Bank's independent auditors. The Bank and we will disclose any such withholding of information to those charged with governance.

In accordance with FDIC regulations, we, as your auditors, are required to make the following commitments: The audit documentation for this engagement is the property of LLBC and constitutes confidential information. However, we may be requested to make certain attest documentation available to the FDIC or any other applicable Federal or state banking agency pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of LLBC personnel. Furthermore, upon request, we may provide copies of selected audit documentation to the FDIC or other applicable Federal or state banking agency. The FDIC or other applicable Federal or state banking agency may intend, or decide, to distribute the copies or information contained therein to others, including other governmental agencies.

We may from time to time, and depending on the circumstances, use third-party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third-party service provider. Furthermore, we will remain responsible for the work provided by any such third-party service providers.

You are responsible for establishing and maintaining internal controls, including monitoring ongoing activities; for the selection and application of accounting principles; and for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America. You are also responsible for management decisions and functions; for designating an individual with suitable skill, knowledge, or experience to oversee the tax services and any other nonattest services we provide; and for evaluating the adequacy and results of those services and accepting responsibility for them.

You are responsible for making all financial records and related information available to us and for the accuracy and completeness of that information. Your responsibilities include adjusting the financial statements to correct material misstatements and confirming to us in the management representation letter that

the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

You are responsible for the design and implementation of programs and controls to prevent and detect fraud, and for informing us about all known or suspected fraud affecting the Bank involving (*a*) management, (*b*) employees who have significant roles in internal control, and (*c*) others where the fraud could have a material effect on the financial statements. Your responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud affecting the Bank received in communications from employees, former employees, regulators, or others. In addition, you are responsible for identifying and ensuring that the entity complies with applicable laws and regulations.

With regard to the electronic dissemination of audited financial statements, including financial statements published electronically on your Internet website, you understand that electronic sites are a means to distribute information and, therefore, we are not required to read the information contained in these sites or to consider the consistency of other information in the electronic site with the original document.

You should be aware that certain communications involving tax advice between you and members of our firm who are authorized tax practitioners or their agents may be privileged from disclosure to the IRS. The privilege may be waived, however, by voluntarily disclosing the contents of those communications to a third party. The privileged information might be used by you in preparing your financial statements and, consequently, disclosed to us in auditing those statements. In addition, professional standards require us to discuss matters that may affect the audit with our firm personnel responsible for tax services, who may disclose the privileged information to us. The IRS might take the position that such communication results in a waiver of privilege.

In the unlikely event that differences concerning LLBC's services or fees should arise that are not resolved by mutual agreement, to facilitate judicial resolution and save time and expense of both parties, the Bank and LLBC agree not to demand a trial by jury in any action, proceeding or counterclaim arising out of or relating to LLBC's services and fees for this engagement and agree to submit to voluntary mediation.

Attached hereto is a copy of a letter that we will request your principal officers to sign at the commencement of our audit. It sets forth, in summary fashion, our respective responsibilities with respect to your financial statements and our audit thereof.

We understand that your employees will prepare all confirmations we request and will locate any documents selected by us for testing. All confirmations will be prepared as of September 30, 20XX, with the exception of legal council and investment confirmations. We expect to begin our audit during October 20XX. Please note that we are required under accounting regulations to issue our report as close to the audit opinion date as possible. We expect the majority of the documentation necessary to perform our audit to be available at the date of fieldwork commencement mentioned above. Our audit engagement ends on delivery of our audit report. We expect to provide you with a final draft of the Bank's audited financial statements on January 16, 20XX, given that we have been provided by management the first draft by January 4, 20XX. Any follow-up services that might be required will be a separate, new engagement. The terms and conditions of that new engagement will be governed by a new, specific engagement letter for that service. We will also prepare the Bank's tax returns for the year ended December 31, 20XX.

We estimate that our fees for these services will range from $______ to $______ for the audit and $______ for the tax return. You will also be billed for travel and other out-of-pocket costs such as report production, word processing, postage, etc. The fee estimate is based on anticipated cooperation from your personnel and the assumption that unexpected circumstances will not be encountered during the audit. If significant additional time is necessary, we will discuss it with you and arrive at a new fee estimate before we incur the additional costs. Our invoices for these fees will be rendered each month as work progresses and are payable on presentation. In accordance with our firm policies, work may be suspended if your account becomes 30 days or more overdue and will not be resumed until your account is paid in full. If we elect to terminate our services for nonpayment, our engagement will be deemed to have been completed upon written notification of termination, even if we have not completed our report. You will be obligated to compensate us for all time expended and to reimburse us for all out-of-pocket expenditures through the date of termination.

Copyright © 2009, American Institute of Certified Public Accountants, Inc.

You may request that we perform additional services not addressed in this engagement letter. If this occurs, we will communicate with you regarding the scope of the additional services and the estimated fees. We also may issue a separate engagement letter covering the additional services. In the absence of any other written communication from us documenting such additional services, our services will continue to be governed by the terms of this engagement letter.

In the event we are requested or authorized by the Bank or are required by government regulation, subpoena, or other legal process to produce our documents or our personnel as witnesses with respect to our engagements for the Bank, the Bank will, so long as we are not a party to the proceeding in which the information is sought, reimburse us for our professional time and expenses, as well as the fees and expenses of our counsel, incurred in responding to such requests.

This engagement letter is contractual in nature, and includes all of the relevant terms that will govern the engagement for which it has been prepared. The terms of this letter supersede any prior oral or written representations or commitments by or between the parties. Any material changes or additions to the terms set forth in this letter will only become effective if evidenced by a written amendment to this letter, signed by all the parties.

We appreciate the opportunity to be of service to you and believe this letter accurately summarizes the significant terms of our engagement. If you have any questions, please let us know. If you agree with the terms of our engagement as described in this letter, please sign the enclosed copy and return it to us.

Very truly yours,

LACKO, LYNCH, BROWN & COMPANY

AAM Section 4100

Introduction

Overview

.01 As discussed in section 3125, "Obtaining an Understanding of Internal Control," the auditor should obtain an understanding of the five components of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. A *sufficient* understanding means the auditor should perform risk assessment procedures to evaluate the design of controls relevant to an audit and to determine whether they have been implemented. In obtaining this understanding, the auditor should consider how an entity's use of IT and manual procedures may affect controls relevant to the audit.

.02 AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), provides a framework to help the auditor obtain an understanding of internal control. This framework breaks internal control into five components as identified in paragraph .03 of section 4200, "Internal Control Framework." The division of internal control into the five components provides a useful framework for auditors to consider how different aspects of an entity's internal control may affect the audit.

.03 The auditor's understanding of internal control is used to

- identify types of potential misstatement;
- consider factors that affect the risks of material misstatement;
- design tests of controls, when applicable; and
- design substantive procedures.

.04 The auditor's understanding of a client's internal control should be based on previous experience with the client and the following:

- Inquiries of appropriate management, supervisory, and staff personnel
- Analytical procedures
- Inspection of documents and records
- Observation of the entity's activities and operations

.05 Section 4200 provides more detail on the internal control framework described in AU section 314. Refer to section 5100, "Designing Further Audit Procedures," for guidance pertaining to the design of further audit procedures (tests of controls or substantive procedures, or both) and section 5200, "Performing Tests of Controls," for specific guidance on the performance of tests of controls.

[*The next page is 4201.*]

AAM Section 4200

Internal Control Framework

Introduction

.01 As described in section 3125, "Obtaining an Understanding of Internal Control," AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), provides a framework to help the auditor obtain an understanding of internal control. That framework is built on 2 concepts: objectives and components.

.02 An *objective* is what the entity is trying to achieve. Generally, an entity tries to achieve objectives in the following three categories:

- Reliability of financial reporting
- Effectiveness and efficiency of operations
- Compliance with applicable laws and regulations

.03 For each of these objectives, internal control consists of the following five interrelated components:

- *Control environment*, which sets the tone of an organization and influences the control consciousness of its people. It is the foundation for all other components of internal control and provides discipline and structure.
- *Risk assessment*, which is the entity's identification and analysis of relevant risks to achievement of its objectives. It forms a basis for determining how the risks should be managed.
- *Control activities*, which are the policies and procedures that help ensure management directives are carried out.
- *Information and communication systems*, which support the identification, capture, and exchange of information in a form and time frame that enables people to carry out their responsibilities.
- *Monitoring*, which is a process that assesses the quality of internal control performance over time.

.04 Although an entity's internal control addresses objectives referred to in paragraph .02, not all of these objectives and related controls are relevant to an effective audit of an entity's financial statements. Ordinarily, controls that are relevant to an audit pertain to the entity's objective of preparing financial statements that are fairly presented in conformity with generally accepted accounting principles (GAAP), including the management of risks that may give rise to risks of material misstatement in those financial statements. An entity may have controls that relate to operations and compliance with laws and regulations that are not relevant to an audit and, therefore, need not be considered.

.05 *The Jones family owns and operates several neighborhood grocery stores in Anytown. The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the* financial reporting *objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they run out of stock. This control activity is part of the* operations *objective. Each store has a small deli that prepares sandwiches and some hot foods. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the* compliance *objective of the entity.*

.06 *The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery but ordinarily will not relate to the audit of the company's financial statement. If you*

were the auditor of Jones Grocery, you may wish to ask about and document these controls for client service or other purposes, but because these controls are not relevant to the audit, you are not required to do so.

.07 However, if controls relating to operations and compliance objectives pertain to data the auditor evaluates or uses in applying auditing procedures, then they may be relevant to the audit.

.08 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she might obtain an understanding of the following:

- Which transactions or classes of transactions are included in the report
- How significant accounting data about those transactions are entered into and flow through the financial reporting system
- What files are processed
- What nature of processing is involved in producing the report

.09 Controls relating to operations and compliance objectives may, however, be relevant to an audit if they pertain to information or data the auditor may evaluate or use in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.10 Internal control over the safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. In obtaining an understanding of each of the components of internal control, the auditor's consideration of safeguarding controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.11 The internal control framework described in AU section 314 is only a means to help the auditor consider the impact of an entity's internal control in an audit. The auditor's primary consideration is whether, and how, a specific control prevents or detects and corrects material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

.12 *Suppose you are the auditor of Jones Grocery. As on all audits, you should obtain an understanding of internal control sufficient to assess the risks of material misstatement and to design the nature, timing, and extent of further audit procedures. To achieve this, you organize your inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objectives. As a result of performing your procedures, you discover the client's bank reconciliation procedures. Should a bank reconciliation be considered a "control procedure"? What about the fact that someone follows up and investigates old or unusual reconciling items? Is that considered a "monitoring" activity?*

.13 *These questions are rhetorical because the issue of how to classify a particular control is irrelevant for your purposes. As an auditor, your primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.*

Effect of IT on Internal Control

.14 An entity's use of IT may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, or compliance objectives and its operating units or business functions. For example, an entity may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, an entity may have complex, highly integrated systems that share data and that are used to support all aspects of the entity's financial reporting, operations, and compliance objectives.

.15 The use of IT also affects the fundamental manner in which transactions are initiated, authorized, recorded, processed, and reported. In a manual system, an entity uses manual procedures and records in paper format (for example, individuals may manually record sales orders on paper forms or journals, authorize credit, prepare shipping reports and invoices, and maintain accounts receivable records). Controls in such a system also are manual and may include such procedures as approvals and reviews of activities, reconciliations, and follow-ups of reconciling items. Alternatively, an entity may have information systems that use automated procedures to initiate, authorize, record, process, and report transactions, in which case records in electronic format replace such paper documents as purchase orders, invoices, shipping documents, and related accounting records. Controls in systems that use IT consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent of IT, may use information produced by IT, or may be limited to monitoring the effective functioning of IT and of automated controls, and to handling exceptions. When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for material accounts or may be critical to the effective functioning of manual controls that depend on IT. An entity's mix of manual and automated controls varies with the nature and complexity of the entity's use of IT.

.16 IT provides potential benefits of effectiveness and efficiency for an entity's internal control because it enables an entity to

- consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data;
- enhance the timeliness, availability, and accuracy of information;
- facilitate the additional analysis of information;
- enhance the ability to monitor the performance of the entity's activities and its policies and procedures;
- reduce the risk that controls will be circumvented; and
- enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.

.17 IT also poses specific risks to an entity's internal control, including

- reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both;
- unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions;
- unauthorized changes to data in master files;
- unauthorized changes to systems or programs;
- failure to make necessary changes to systems or programs;
- inappropriate manual intervention; and

- potential loss of data or inability to access data as required.

.18 The extent and nature of these risks to internal control vary depending on the nature and characteristics of the entity's information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data. When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This could result in unauthorized transactions or changes to programs or data that affect the financial statements. Therefore, the nature and characteristics of an entity's use of IT in its information system affect the entity's internal control.

.19 Manual controls of systems may be more suitable where judgment and discretion are required, such as for the following circumstances:

- Large, unusual, or nonrecurring transactions
- Circumstances where misstatements are difficult to define, anticipate, or predict
- In changing circumstances that require a control response outside the scope of an existing automated control
- In monitoring the effectiveness of automated controls

.20 Manual controls are performed by people and, therefore, pose specific risks to the entity's internal control. Manual controls may be less reliable than automated controls because they can be more easily bypassed, ignored, or overridden and they are also more prone to errors and mistakes. Consistency of application of a manual control element cannot, therefore, be assumed. Manual systems may be less suitable for the following:

- High volume or recurring transactions, or in situations in which errors that can be anticipated or predicted can be prevented or detected by control parameters that are automated
- Control activities in which the specific ways to perform the control can be adequately designed and automated

.21 The purpose of this section is to provide guidance on each of the five components that comprise the internal control framework. This guidance may help the auditor perform procedures to obtain an understanding of internal control. These procedures generally include the following steps:

- Understand internal control components that have a pervasive effect on the organization
- Understand how IT is used to process significant accounting information
- Understand control activities for significant account balances or transaction cycles
- Assess the risks of management override and lack of segregation of duties

Focus on the Small Business Entity

.22 This section emphasizes the audit of a small business entity. Small business entities are typically characterized by

- a single owner or a small group of owners who manage the business on a day to day basis;
- a small number of employees involved in the accounting function;
- no outside board of directors or internal audit function; and
- the use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.23 This section provides some guidance for the audits of medium to large businesses.

Controls Relevant to Reliable Financial Reporting and to the Audit

.24 There is a direct relationship between an entity's objectives and the internal control components it implements to provide reasonable assurance about their achievement. In addition, internal control is relevant to the entire entity or to any of its operating units or business functions. Although the entity's objectives and, therefore, controls relate to financial reporting, operations, and compliance, not all of these objectives and controls are relevant to the audit. Further, although internal control applies to the entire entity, or to any of its operating units or business functions, an understanding of internal control relating to each of the entity's operating units and business functions may not be necessary to the performance of the audit.

.25 Ordinarily, controls that are relevant to an audit pertain to the entity's objective of preparing financial statements that are fairly presented in conformity with GAAP, including the management of risks that may give rise to risks of material misstatement in those financial statements. However, it is not necessary to assess all controls in connection with assessing the risks of material misstatement and designing and performing further audit procedures in response to assessed risks. It is a matter of the auditor's professional judgment as to the controls or combination of controls that should be assessed. However, as stated in paragraph .115 of AU section 314, for significant risks—to the extent the auditor has not already done so—the auditor should evaluate the design of the entity's related controls, including relevant control activities, and determine whether they have been implemented. In exercising that judgment, the auditor should consider the circumstances, the applicable component, and factors such as the following:

- Materiality
- The size of the entity
- The nature of the entity's business, including its organization and ownership characteristics
- The diversity and complexity of the entity's operations
- Applicable legal and regulatory requirements
- The nature and complexity of the systems that are part of the entity's internal control, including the use of service organizations

.26 Controls over the completeness and accuracy of information produced by the entity may also be relevant to the audit if the auditor intends to make use of the information in designing and performing further audit procedures. The auditor's previous experience with the entity and information obtained in understanding the entity and its environment and throughout the audit assist the auditor in identifying controls relevant to the audit.

.27 Controls relating to operations and compliance[1] objectives may, however, be relevant to an audit if they pertain to information or data the auditor may evaluate or use in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.28 An entity generally has controls relating to objectives that are not relevant to an audit and, therefore, need not be considered. For example, an entity may rely on a sophisticated system of automated controls to provide efficient and effective operations (such as a manufacturing plant's computerized production scheduling system), but these controls ordinarily would not be relevant to the audit.

.29 Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. In obtaining an understanding of each

[1] An auditor may need to consider controls relevant to compliance objectives when performing an audit in accordance with AU section 801, *Compliance Audits* (AICPA, *Professional Standards*).

of the components of internal control, the auditor's consideration of safeguarding controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.30 Controls relevant to the audit may exist in any of the components of internal control and a further discussion of controls relevant to the audit is included in paragraphs .67–.101 of AU section 314. In addition, paragraphs .115 and .117 of AU section 314 discuss certain risks for which the auditor should evaluate the design of the entity's controls over such risks and determine whether they have been implemented.

Internal Control Components

Understanding the Control Environment

.31 The control environment component is the foundation upon which all other components of internal control are based, and it sets the tone of an organization. A small business can have unique advantages in establishing a strong control environment. Employees in many smaller businesses interact more closely with top management and are directly influenced by management actions. Through day-to-day practices and actions, management can effectively reinforce the company's fundamental values and directives. The close working relationship also enables senior management to quickly recognize when employees' actions need modification. In obtaining an understanding of the client's control environment, the auditor should obtain sufficient knowledge to understand the attitudes, awareness, and actions of those charged with governance concerning the entity's internal control and its importance in achieving reliable financial reporting. In understanding the control environment, the auditor should concentrate on the implementation of controls because controls may be established but not acted upon. The following paragraphs describe some factors the auditor should consider when evaluating a client's control environment.

.32 *Integrity and ethical values*. The effectiveness of internal control cannot rise above the integrity and ethical values of the owner-manager. Integrity and ethical values are essential elements of the control environment because they affect the design, administration, and monitoring of other internal control components.

.33 Management may *tell you* a great deal about their integrity and ethical values. They may even commit their *words* to a *written document*. Responses to inquiries and written policies are good, but compliance with ethical standards is best ensured by focusing on management's *actions* and how these actions affect the entity on a day to day basis.

.34 For management's integrity and ethical values to have a positive effect on the entity, the following ordinarily should exist:

- The business owner and management should personally have high ethical and behavioral standards.
- These standards should be communicated to company personnel. In a small business, this communication is often informal.
- The standards should be reinforced.

.35 When observing and evaluating management's *actions* be alert for the following:

- *Segregation of personal from business funds and activities*. Many small business owners mix their personal and business activities, for example, the company may pay the owner's credit card bills even if they contain nonbusiness expenditures. The auditor might consider the owner's attitude and the care with which he or she separates the personal from the business activities. It's not unusual for a business to pay the owner's credit card bills, but the more important question is "does the owner reimburse the

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

company?" Owners who treat company assets as if they were personal assets set a bad example for employees who may be encouraged to do the same.

- *Dealing with signs of problems*. Consider how management deals with signs that problems exist, particularly when the cost of identifying and solving the problem could be high. For example, suppose a client became aware of a possible environmental contamination on their premises. How would they react? Would they try to hide it, deny its existence, or act evasively if asked about it, or would they actively seek out their auditor's advice or the advice of their attorney?
- *Removal or reduction of incentives and temptations*. Individuals may engage in dishonest, illegal, or unethical acts simply because the owner-manager gives them strong incentives or temptations to do so. Removing or reducing these incentives and temptations can go a long way toward diminishing undesirable behavior.

  The emphasis on results, particularly in the short term, fosters an environment in which the price of failure becomes very high. *Incentives* for engaging in fraudulent or questionable financial reporting practices include the following:

  — Pressure to meet unrealistic performance targets, particularly for short term results

  — High performance-dependent rewards

  — Upper and lower cutoffs on bonus plans

  Temptations for employees to engage in improper practices include the following:

  — Nonexistent or ineffective controls, such as poor segregation of duties in sensitive areas that offer temptations to steal or conceal questionable financial reporting practices

  — Owner-managers who are unaware of actions taken by employees

  — Penalties for improper behavior that are insignificant or unpublicized and thus lose their value as deterrents

- *Management intervention*. There are certain situations where it is appropriate for management to intervene and overrule prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with nonrecurring and nonstandard transactions or events that otherwise might be handled by the financial reporting information system. The auditor might consider whether management has provided guidance on the situations and frequency with which intervention of established controls is appropriate. It is a best practice for management interventions to be documented and explained.

.36 *Commitment to competence*. Competence reflects the knowledge and skills necessary to accomplish tasks that define an individual's job. Commitment to competence includes management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.

.37 *Mrs. Jones has always kept the books for Jones Grocery. She is self-taught, with no formal training in accounting or bookkeeping. There are no plans to replace Mrs. Jones with someone more "qualified." As the auditor of Jones Grocery you recognized the risk of having an untrained bookkeeper and design your audit approach to address such concerns by*

- *training Mr. and Mrs. Jones to call you whenever they have a transaction out of the ordinary*;
- *strongly encouraging Mrs. Jones to take training classes on her accounting software package (she has)*;
- *explaining to Mrs. Jones the importance of key accounting records such as the accounts payable subledger and inventory reports*; *and*
- *teaching Mrs. Jones important basic control functions such as bank reconciliations*.

.38 *Management's philosophy and operating style*. Management's philosophy and operating style encompass a broad range of characteristics. Such characteristics may include

- the owner-manager's approach to taking and managing business risks;

- attitudes and actions toward financial reporting and tax matters; and
- attitudes and actions toward information processing and accounting functions and personnel.

.39 Management's philosophy and operating style have a significant influence on the control environment, particularly in a small business where the owner-manager dominates the organization, regardless of the consideration given to the other control environment factors. For example, the auditor may be concerned about the client's unduly aggressive attitude toward financial reporting. Not only might this cause the auditor to assess control risk as high for some or all assertions, but it may heighten concerns about irregularities affecting certain assertions.

.40 However, a dominant owner-manager does not necessarily cause the auditor to assess control risk as high.

.41 *Mr. Jones dominates the management of Jones Grocery. He demonstrates a positive attitude toward the control environment and a moderate to conservative attitude toward accepting business risk such as expansion. He is more concerned about taxes than financial reporting. Mr. Jones uses information generated by the financial reporting information system to monitor the financial results of the company and compare it to prior periods. His review of the accounting reports encourages Mrs. Jones and others who help with the accounting to work with greater care. Mr. Jones also performs many control activities himself, such as the review and supervision of the physical inventory counts. Although Mr. Jones is concerned about his income tax liability, you might not view the possible bias to misstate income as a significant risk because of the otherwise positive control environment*.

.42 *Organizational structure*. A client's organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and reviewed.

.43 Significant aspects of establishing an organizational structure include considering key areas of authority and responsibility and appropriate lines of reporting. Small business entities usually have fairly simple organizational structures. A highly structured organization with formal reporting lines and responsibilities may be appropriate for large entities, but for a small business, this type of structure may impede the necessary flow of information.

.44 *Assignment of authority and responsibility*. The assignment of authority and responsibility includes, among other things, the following:

- The establishment of reporting relationships and authorization procedures
- The degree to which individuals and groups are encouraged to use initiative in addressing issues and solving problems
- The establishment of limits of authority
- Policies describing appropriate business practices
- Resources provided for carrying out duties

.45 Alignment of authority and accountability often is designed to encourage individual initiatives, within limits. Delegation of authority means surrendering central control of certain business decisions to lower echelons to the people who are closest to everyday business transactions.

.46 A critical challenge is to delegate only to the extent required to achieve objectives. This requires ensuring that risk acceptance is based on sound practices for identifying and minimizing risk, including sizing risks and weighing potential losses versus gains in arriving at good business decisions.

.47 Another challenge is ensuring that all personnel understand the entity's objectives. It is essential that each individual knows how his or her actions interrelate and contribute to achievement of the objectives.

Copyright © 2009, American Institute of Certified Public Accountants, Inc.

.48 *Mr. Jones had to decide how to delegate authority and responsibility when he expanded Jones Grocery from the one original store to its present eight store chain spread out over greater Anytown and the surrounding suburbs. One area that proved problematic was setting prices. Mr. Jones assumed that he would be able to set the prices at all of the stores, just like he did for his original store. He felt this was a good procedure because it allowed him some control over profit margins. Problems arose because the competitive pressures were different in different areas of the city. A competitor in the north suburb ran specials or lowered prices on certain items, and a competitor in the west suburb ran specials on different items. It became too difficult for Mr. Jones to keep up with the constantly changing price battles at eight different stores. He eventually delegated this responsibility to the individual store managers. He set a limit on how much a store manager could discount prices without his prior approval, but other than that, the store managers had the freedom to set prices to respond to the changing competitive environment*.

.49 *The responsibility for accounting information was also affected by Jones Grocery's expansion. Mr. Jones' original thought was that each store would be run as a separate business, with separate financial reporting information systems that would be consolidated together at the main store. Problems soon developed in several areas, most notably accounts payable. The store managers were responsible for entering vendor invoices into the computer system. But it seemed that no matter how much Mr. Jones threatened, cajoled, and begged his store managers to enter the invoices on a timely basis, they just couldn't do it consistently. The procedure had to be changed. Now, the store managers only have the responsibility to check incoming goods for quantity and condition. Vendor invoices are sent directly to Mrs. Jones at the main store, and she is responsible for maintaining the accounts payable for all the stores*.

.50 The control environment is greatly influenced by the extent to which individuals recognize that they will be held accountable. This holds true all the way to the owner-manager, who has the ultimate responsibility for all activities within the organization, including internal control.

.51 *Human resource policies and practices*. Human resource policies and practices affect an entity's ability to employ sufficient competent personnel to accomplish its goals and objectives. Human resource policies and practices include an entity's policies and procedures for hiring, orienting, training, evaluating, counseling, promoting, compensating, and taking remedial action. In many small businesses, the policies may not be formalized but they can nevertheless exist and be communicated. The owner-manager can orally make explicit his or her expectations about the type of person to be hired to fill a particular job and may even be active in the hiring process. Formal documentation is not always necessary for a policy to be in place and operating effectively.

.52 *When Mr. and Mrs. Jones added a second store, the hiring of a store manager was easy—they hired their daughter. Adding a third store proved to be more problematic, because the other Jones children had no interest in the family business. Mr. and Mrs. Jones talked at length about the type of person they would hire as a store manager. They finally decided it was more important to hire someone they could trust, someone they felt comfortable with on a personal level rather than someone with an extensive background in the grocery business. They felt they could teach someone the grocery business but not how to be trustworthy. That hiring policy worked, and they've been following it ever since*.

.53 Standards for hiring the most qualified individuals, with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior, demonstrate an entity's commitment to competent and trustworthy people. Hiring practices that include formal in-depth employment interviews and informative and insightful presentations on the company's history, culture, and operating style send a message that the company is committed to its people.

.54 Personnel policies that communicate prospective roles and responsibilities and that provide training opportunities indicate expected levels of performance and behavior. Rotation of personnel and promotions driven by periodic performance appraisals demonstrate the entity's commitment to advancement of qualified personnel to higher levels of responsibility. Competitive compensation programs that include bonus incentives serve to motivate and reinforce outstanding performance. Disciplinary actions send a message that violations of expected behavior will not be tolerated.

.55 *Participation of those charged with governance*. An entity's control consciousness is significantly influenced by those charged with governance. As defined in paragraph .03 of AU section 380, *The Auditor's Communication*

With Those Charged With Governance (AICPA, *Professional Standards*), *those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. In some cases, those charged with governance are responsible for approving the entity's financial statements (in other cases management has this responsibility). For entities with a board of directors, this term encompasses the terms *board of directors* or *audit committee*. For small business entities, those charged with governance may not include any independent or outside members. Please refer to paragraphs .81–.83 for additional discussion of how the participation of those charged with governance applies to medium and large businesses.

Risk Assessment

.56 Risk assessment, as it relates to the objective of reliable financial reporting, involves identification and analysis of the risks of material misstatement. Establishment of financial reporting objectives articulated by a set of financial statement assertions for significant accounts is a precondition to the risk assessment process. Risk assessment in small businesses can be relatively efficient, often because in-depth knowledge of the company's operations enables the owner and management to have firsthand information of where risks exist. In carrying out their normal responsibilities, including obtaining information gained from employees, customers, suppliers, and others, these managers identify risks inherent in business processes. In addition to focusing on operations and compliance risks, they are positioned to consider the following risks to reliable financial reporting:

- Failing to capture and record all transactions
- Recording assets that do not exist or transactions that did not occur
- Recording transactions in the wrong period or wrong amount or misclassifying transactions
- Losing or altering transactions once recorded
- Failing to gather pertinent information to make reliable estimates
- Recording inappropriate journal entries
- Improperly accounting for transactions or estimates
- Inappropriately applying formulas or calculations

.57 Risks relevant to financial reporting include events and circumstances that may adversely affect the company's ability to initiate, authorize, record, process, and report financial data consistent with the assertions of management in the financial statements. Once risks are identified, management considers their significance, the likelihood of their occurrence, and how they should generally be managed. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations.

.58 Risks can arise or change due to circumstances such as the following:

- *Changes in the operating environment*. Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- *New personnel*. New personnel may have a different focus on or understanding of internal control. When people change jobs or leave the company, management generally should consider the control activities they performed and who will perform them going forward. Steps ordinarily should be taken to ensure new personnel understand their tasks.
- *New or revamped information systems*. Significant and rapid changes in information systems can change the risk relating to internal control. When these systems are changed, management generally should assess how the changes will impact control activities. Are the existing activities appropriate or even possible with the new systems? Personnel should be adequately trained when information systems are changed or replaced.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

- *Rapid growth*. Significant and rapid expansion of operations can strain internal control and increase the risk of a breakdown in internal control. Management generally should consider whether accounting and information systems are adequate to handle increases in volume.
- *New technology*. Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
- *New business models, products, or activities*. Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
- *Corporate restructurings*. Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with internal control.
- *Expanded foreign operations*. The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control (for example, additional or changed risks from foreign currency transactions).
- *New accounting pronouncements*. Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

.59 The auditor's procedures to assess whether a risk assessment process is placed in operation are generally of an inquiry nature. For example, you may ask accounting personnel what accounts they believe are the most difficult to become satisfied with as they prepare the financial statements. You may also consider asking the same questions of personnel outside the accounting department.

Control Activities

.60 Control activities are the policies and procedures that help ensure management directives are carried out. They help ensure that necessary actions are taken to address risks to achievement of the entity's objectives. Control activities occur throughout the organization at all levels and in all functions. They include a range of activities as diverse as approvals, authorizations, verifications, reconciliations, reviews of operating performance, security of assets, and segregation of duties. When resource constraints compromise the ability to segregate duties, many smaller companies use certain compensating controls to achieve the objectives.

.61 At the entity-wide level, control activities may be categorized as policies and procedures that pertain to the following:

- *Performance reviews*. These control activities include reviews of actual performance versus budgets, forecasts, and prior period performance. They may also involve relating different sets of data (for example, operating or financial) to one another, together with analyses of the relationships, investigating unusual relationships and taking corrective action. Performance reviews may also include a review of functional or activity performance.
- *Information processing*. A variety of controls are performed to check accuracy, completeness, and authorization of transactions. The two broad groupings of information systems control activities are application controls and general controls. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples of application controls include checking the arithmetical accuracy of records, maintaining and reviewing accounts and trial balances, automated controls such as edit checks of input data and numerical sequence checks, and manual follow-up of exception reports. General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. These controls apply to mainframe, miniframe, and end user environments. Examples of such general controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to

or monitor the use of system utilities that could change financial data or records without leaving an audit trail. These controls are discussed in more detail in paragraphs .88–.92.

- *Physical controls*. These activities encompass the physical security of assets, including adequate safeguards over access to assets and records such as secured facilities and authorization for access to computer programs and data files and periodic counting and comparison with amounts shown on control records. The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation and, therefore, the audit depends on circumstances such as when assets are highly susceptible to misappropriation. For example, these controls would ordinarily not be relevant when inventory losses would be detected pursuant to periodic physical inspection and recorded in the financial statements. However, if for financial reporting purposes management relies solely on perpetual inventory records, the physical security controls would be relevant to the audit.
- *Segregation of duties*. Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of his or her duties. Segregation of duties is often a problem for small business entities. See paragraphs .129–.137 for further discussion and guidance.

.62 You should consider the knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control in determining whether it is necessary to devote additional attention to obtaining an understanding of control activities. An audit does not require an understanding of all the control activities related to each class of transactions, account balance, and disclosure in the financial statements or to every relevant assertion. Ordinarily, control activities that may be relevant to an audit include those relating to authorization, segregation of duties, safeguarding of assets, and asset accountability, including, for example, reconciliations of the general ledger to the detailed records. The auditor should obtain an understanding of the process of reconciling detail to the general ledger for significant accounts.

.63 In obtaining an understanding of control activities, the auditor's primary consideration is whether, and how, a specific control activity, individually or in combination with others, prevents or detects and corrects material misstatements in classes of transactions, account balances, or disclosures. Control activities relevant to the audit are those for which the auditor considers it necessary to obtain an understanding in order to assess risks of material misstatement at the assertion level and to design and perform further audit procedures responsive to the assessed risks. The auditor's emphasis is on identifying and obtaining an understanding of control activities that address the areas where you consider that material misstatements are more likely to occur. When multiple control activities achieve the same objective, it is unnecessary to obtain an understanding of each of the control activities related to that objective.

.64 The auditor should obtain an understanding of how IT affects control activities that are relevant to planning the audit. Some entities and auditors may view the IT control activities in terms of application controls and general controls. Application controls apply to the processing of individual applications. Accordingly, application controls relate to the use of IT to initiate, authorize, record, process, and report transactions or other financial data. These controls help ensure that transactions have occurred, are authorized, and are completely and accurately recorded and processed. Examples include edit checks of input data, numerical sequence checks, and manual follow-up of exception reports.

.65 Application controls may be performed by IT (for example, automated reconciliation of subsystems) or by individuals. When application controls are performed by people interacting with IT, they may be referred to as user controls. The effectiveness of user controls, such as reviews of computer produced exception reports or other information produced by IT, may depend on the accuracy of the information produced. For example, a user may review an exception report to identify credit sales over a customer's authorized credit limit without performing procedures to verify its accuracy. In such cases, the effectiveness of the user control (that is, the review of the exception report) depends on both the effectiveness of the user review and the accuracy of the information in the report produced by IT.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.66 General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. Though ineffective general controls do not, by themselves, cause misstatements, they may permit application controls to operate improperly and allow misstatements to occur and not be detected. For example, if there are weaknesses in the general controls over access security, and applications are relying on these general controls to prevent unauthorized transactions from being processed, such a general control weakness may have a more severe effect on the effective design and operation of the application control. General controls should be assessed in relation to their effect on applications and data that become part of the financial statements. For example, if no new systems are implemented during the period of the financial statements, weaknesses in the general controls over systems development may not be relevant to the financial statements being audited.

.67 The use of IT affects the way that control activities are implemented. For example, when IT is used in an information system, segregation of duties often is achieved by implementing security controls.

.68 The auditor should consider whether the entity has responded adequately to the risks arising from IT by establishing effective controls, including effective general controls upon which application controls depend. From the auditor's perspective, controls over IT systems are effective when they maintain the integrity of information and the security of the data such systems process.

Information and Communication Systems

.69 Information systems identify, capture, process, and distribute information supporting the achievement of financial reporting objectives. Information systems in small businesses are likely to be less formal than in large ones, but their role is just as significant. Many small businesses rely more on manual or standalone IT applications than complex integrated applications. Effective internal communication between top management and employees may be facilitated in smaller companies due to fewer levels and numbers of personnel and greater visibility and availability of the owner. Internal communication can take place through frequent meetings and day-to-day activities in which the owner and other managers participate.

.70 An information system consists of infrastructure (physical and hardware components), software, people, procedures (manual and automated), and data. Infrastructure and software will be absent, or have less significance, in systems that are exclusively or primarily manual. Many information systems make extensive use of IT. The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. Transactions may be initiated manually or automatically by programmed procedures. Authorization includes the process of approving transactions by the appropriate level management. Recording includes identifying and capturing the relevant information for transactions or events. Processing includes functions such as edit and validation, calculation, measurement, valuation, summarization, and reconciliation, whether performed by automated or manual procedures. Reporting relates to the preparation of financial reports as well as other information, in electronic or printed format, that the entity uses in measuring and reviewing the entity's financial performance and in other functions.

.71 The quality of system generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial statements. Thus, it is important that management receives the information they need to carry out their responsibilities and that the information is provided at the right level of detail. Accordingly, an information system encompasses procedures and records that

- identify and record all valid transactions;
- describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting;

- measure the value of transactions in a manner that permits recording of their proper monetary value in the financial statements;
- determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period; and
- present properly the transactions and related disclosures in the financial statements.

.72 The financial reporting information system is an integral part of an entity's information and communication system. The auditor's consideration of the system is often made at the individual account and classes of transaction level. See paragraphs .113–.128 for additional guidance.

.73 The communication component of an entity's internal control involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on. Communication takes such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

.74 The auditor should obtain sufficient knowledge of the information system, including the related business processes relevant to financial reporting, to understand

- the classes of transactions in the entity's operations that are significant to the financial statements;
- the procedures, both automated and manual, by which transactions are initiated, authorized, recorded, processed, and reported from their occurrence to their inclusion in the financial statements;
- the related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, authorizing, recording, processing, and reporting transactions;
- how the information system captures other events and conditions that are significant to the financial statements; and
- the financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.75 When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for significant accounts or may be critical to the effective functioning of manual controls that depend on IT.

.76 The auditor also should obtain an understanding of how the incorrect processing of transactions is resolved. For example, such understanding might include whether there is an automated suspense file, how it is used by the entity to ensure that suspense items are cleared out on a timely basis, and how system overrides or bypasses to controls are processed and accounted for.

.77 In obtaining an understanding of the financial reporting process (including the closing process), the auditor should understand the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. Such procedures include the following:

- *Entering transaction totals into the general ledger (or equivalent record).* In some information systems, IT may be used to automatically transfer such information from transaction processing systems to general ledger or financial reporting systems. The automated processes and controls in such systems may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts being automatically passed to the general ledger or financial reporting system. Furthermore, in planning

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

the audit, the auditor should be aware that when IT is used to automatically transfer information there may be little or no visible evidence of such intervention in the information systems.

- *Initiating, authorizing, recording, and processing journal entries in the general ledger.* An entity's financial reporting process used to prepare the financial statements typically includes the use of standard journal entries that are required on a recurring basis to record transactions such as sales, purchases, and cash disbursements or to record accounting estimates that are periodically made by management such as changes in the estimate of uncollectible accounts receivable. An entity's financial reporting process also includes the use of nonstandard journal entries to record nonrecurring or unusual transactions or adjustments such as a business combination or disposal, or a nonrecurring estimate such as an asset impairment. In manual, paper-based general ledger systems, such journal entries may be identified through inspection of ledgers, journals, and supporting documentation. However, when IT is used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may be more difficult to identify through the use of computer assisted techniques.
- *Initiating and recording recurring and nonrecurring adjustments to the financial statements.* These are procedures relating to adjustments and reclassifications that are not reflected in formal journal entries.
- *Combining and consolidating general ledger data*. This includes procedures to combine detailed general ledger accounts, prepare the trial balance, and prepare consolidated financial data (for example, transferring general ledger data and adjusting journals into a consolidation system or spreadsheet; performing consolidation routines; and reconciling and reviewing consolidated financial data, including footnote data).
- *Preparing financial statements and disclosures*. These are procedures designed to ensure that information required to be presented and disclosed is accumulated, recorded, processed, summarized, and appropriately reported in the financial statements.

Monitoring

.78 Internal control systems need to be monitored, which is a process that assesses the quality of the system's performance over time. This is accomplished through ongoing monitoring activities, separate evaluations, or a combination of the two. Managers of many smaller businesses have high-level firsthand knowledge of company activities, and their close involvement in operations positions them to identify variances from expectations and potential inaccuracies in reported financial information.

.79 Examples of ongoing monitoring activities include the following:

- Management reviews of data produced by the entity's information system. Managers are in touch with operations and may question reports that differ significantly from their knowledge of operations. However, management generally should have a basis for believing the data is accurate. If errors exist in the information, management may make incorrect conclusions from its monitoring activities.
- Communications from external parties corroborate internally generated information or indicate problems. Customers implicitly corroborate billing data by paying their invoices. Conversely, customer complaints about billings could indicate system deficiencies in the processing of sales transactions. Similarly, bankers, regulators, or other outside parties may communicate with the company on matters of accounting significance.
- External auditors regularly provide recommendations on the way internal control can be strengthened. Auditors may identify potential weaknesses and make recommendations to management for corrective action.
- Employees may be required to sign off to evidence the performance of critical control functions. The sign-off allows management to monitor the performance of these control functions.

Application to Medium and Large Businesses

.80 The control environments of medium to large businesses may differ from those of small business entities in the following ways:

- The presence of a board of directors or audit committee
- The presence of an internal audit function
- More formalized policies and procedures

Board of Directors or Audit Committee

.81 The control consciousness of a medium or large business is influenced significantly by those charged with governance. As defined previously, those charged with governance means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. Those charged with governance encompasses the term *board of directors* and *audit committee* used elsewhere in this section. Because of its importance, an active and involved board of directors—possessing an appropriate degree of management, technical, and other expertise coupled with the necessary stature and mind-set so that it can adequately perform the necessary governance, guidance, and oversight responsibilities—is critical to effective internal control.

.82 Factors that influence the effectiveness of those charged with governance include the following:

- Its independence from management
- The experience and stature of its members
- The extent of its involvement and scrutiny of activities
- The appropriateness of its actions
- The degree to which difficult questions are raised and pursued with management
- Its interaction with internal and external auditors

.83 The board of directors must be prepared to question and scrutinize management's activities, present alternative views and have the courage to act in the face of obvious wrongdoing. Because of this, it is necessary that the board contain at least a critical mass of outside directors. The number should suit the entity's circumstances, but more than one outside director normally would be needed for a board to have the requisite balance.

Internal Audit Function

.84 The internal audit function is established within an entity to monitor and evaluate the adequacy and effectiveness of internal control. For entities with an internal audit function, the auditor ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors'

- organizational status within the entity;
- application of professional standards;
- audit plan, including the nature, timing, and extent of audit work; and
- access to records and any limitations on the scope of their activities.

.85 After obtaining an understanding of the internal audit function, the auditor may either

- conclude that the internal auditors' activities are not relevant to the financial statement audit and give no further consideration to the internal audit function;
- identify relevant internal auditor activities but conclude that it would not be efficient to consider further the work of the internal auditors; or

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- decide that it would be efficient to consider how the internal auditors' work might affect the nature, timing, and extent of the audit. In this case, you should assess the competence and objectivity of the internal audit function as outlined in AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AICPA, *Professional Standards*).

.86 You may also request direct assistance from the internal auditors. Paragraph .27 of AU section 322 establishes requirements and provides guidance for auditors when using internal auditors to provide direct assistance in performing the audit.

Formal Policies

.87 Medium and large businesses may communicate their policies in formal, written documents. For example, they may have a written code of conduct or human resource policies. The existence of formal policy documents is good, but as an auditor, your primary consideration is how the policies are implemented.

Computer Applications

.88 Small business entities are typically characterized by the use of off the shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.89 *Jones Grocery has a stand-alone, state-of-the-art PC at its main store. One other store has a computer—an Apple Macintosh that Mr. and Mrs. Jones' daughter used at college. The PC at the main store is used to run the accounting software, which is an off the shelf product developed specifically for independent grocers. The payroll is processed by an outside payroll service.*

.90 In gaining an understanding of how computers are used in the business, the auditor may consider the following:

- The acquisition of hardware and software
- Physical access
- Logical access
- User controls over outsider service bureau applications

Acquisition of Hardware and Software

.91 Companies ordinarily should take steps to ensure they have compatible hardware and software. The use of compatible software reduces the risk of error, because there will be no need to transfer data from one format into another. Even small businesses generally should have a coherent plan for the purchase of computer hardware and software. If the business is growing, management will typically plan for the upgrade of the processor, random access memory (RAM), or hard disk storage.

.92 *Mr. and Mrs. Jones did not plan for the purchase of their computers. For several years, Mrs. Jones processed the accounting applications on an old PC with limited RAM and hard-disk storage. When the Jones' daughter opened the second store, she brought with her the Apple Macintosh she had in college. At first, she tried to transfer data from her store to the main store, but the software had problems converting from the Apple format, so the procedure was abandoned. At a trade show, Mr. Jones discovered a computer software program specifically designed for independent grocers. He was impressed with the program and decided that it fit his needs perfectly. However, his hardware was out of date, and so in order to run the software, he upgraded his hardware. The new software supposedly is able to handle Apple-formatted data, and the company has plans to transfer data from the second store electronically. There are no plans to install computers at the other stores.*

.93 *As the auditor of Jones Grocery, you should use this understanding of the company computer system to help plan the audit. For example, they plan to transfer data from the Apple to the PC. What other sorts of errors might occur in the transfer? What steps has the client taken to prevent or detect those errors? You also know that stores three through*

eight are on a manual system. What types of errors might occur in a manual system? What is the risk that those errors will occur?

.94 Entities ordinarily should also establish policies and procedures to mitigate the risk of computer viruses being introduced into their systems. Viruses can cause the loss of data and programs. A virus has the ability to attach itself to a program and infect other programs and systems. Although some viruses merely write messages across the screen, others can cause serious damage to disk files or shut down a network by replicating themselves millions of times and filling all available memory or disk storage.

.95 Methods to prevent the introduction of viruses and to recover from a virus attack include the following:

- Obtaining recognized software from reputable sources and only accepting delivery of the software in the manufacturer's sealed package.
- Making multiple generations of backups. A virus that is not detected initially may be copied onto more recent backup copies, and the older versions may not be infected.
- Prohibiting the use of unauthorized programs introduced by employees.
- Prohibiting the downloading of untested software from sources such as dial-up bulletin boards.
- Using virus protection software to screen for virus infections.

Physical Security

.96 Physical security—primarily backup and contingency planning—often is ignored by small businesses in a microcomputer environment. Poor backup procedures can result in the loss of important data that are very difficult, time consuming, and costly to recreate, if they can be recreated at all.

.97 Clients generally should have established procedures for the periodic backup of data files and applications. Critical applications and files ordinarily should be stored off-site with corresponding documentation in the event that on-site files become unavailable.

Logical Access

.98 Logical access to computer applications and data files may not be formally or rigorously controlled in a small business. This leaves the company exposed to the risk that files could be inappropriately manipulated or unauthorized transactions entered into the system. For example, without logical access controls a user may be able to enter any or all sections of a general ledger or other financial module and perform file maintenance such as changing the address of an accounts receivable customer or data used to calculate payroll.

.99 Management ordinarily should identify confidential and sensitive data for which access should be restricted. Mechanisms such as password control or the use of menus can be used to limit the access to that data.

.100 In a microcomputer environment, password control may be installed over the operating system using a shell program to prevent the user from accessing menu options of a program. Even if such a restriction exists, a sophisticated user can often bypass the shell by using a utility. Therefore, the use of utility programs generally should be controlled or monitored carefully.

User Controls Over Computer Service Organization Applications

.101 Entities may use an outside computer service organization to process significant accounting information. AU section 324, *Service Organizations* (AICPA, *Professional Standards*), establishes requirements and provides guidance for auditors auditing entities that use computer service organizations.

.102 When using an outside computer service organization, most small businesses typically retain the responsibility for authorizing transactions and maintaining the related accountability. The computer service

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

organization merely records user transactions and processes the related data. In these circumstances, the user (the small business) typically maintains controls over the input and output to prevent or detect material misstatement. When the service organization initiates, executes, and does the accounting processing of the user organization's transactions, it may not be practicable for the user organization to implement effective controls for those transactions.

.103 *Jones Grocery uses an outside computer service to process payroll. Time cards are gathered for each store and reviewed by the store manager before being sent to the main store. Mrs. Jones reviews the time cards for the store managers and checks to make sure all personnel have submitted time cards for the pay period. All other payroll transactions such as pay rates, withholdings, and benefits, among others, are sent directly to Mrs. Jones. She forwards all information to the payroll service, which prepares the checks and produces a payroll register. Mrs. Jones reviews the register and checks for any obvious misstatements before she distributes the checks*.

Application to Medium or Large Businesses

.104 Medium and large businesses typically have more complicated computer processing systems than small businesses. They also tend to use the computer for a greater amount of processing. For example, a small business may prepare customer invoices manually by looking up prices on a master price list. A medium size business may maintain master price information on a computer file and use the computer to generate packing slips, sales invoices, and reports of unmatched documents.

.105 Medium and large businesses are also typically characterized by a separate management information services department with formally defined job descriptions and responsibilities.

.106 Instead of using off the shelf, unmodified software, the medium or large business will modify standard software or develop its own applications. Its software may be more complicated than that used by the small business; for example, the medium or large business may use a database management system or telecommunications software.

.107 Medium and large businesses often use a mainframe computer in conjunction with microcomputers or a local area microcomputer network. Information is frequently transferred between the mainframe and microcomputers that may be located on-site or at a remote location.

.108 Control activities in a computerized environment generally comprise a combination of the following:

- User control activities
- Programmed control activities and manual follow-up
- Computer general control activities

.109 *User controls*. User control activities are manual checks of the completeness and accuracy of computer output against source documents or other input. For example, an entity may have programmed procedures in a billing system that calculate sales invoice amounts from shipping data and master price files. The entity may also have a procedure to manually check the completeness and accuracy of the invoices. In many systems, user controls relate only to the completeness of records and not to the accuracy of processing.

.110 *Programmed control activities and manual follow-up activities*. Programmed control activities are those that are built into the computer processing program; for example, the generation of an exception report. However, an exception report is useless unless the client follows up on the items listed. Thus, in addition to understanding the nature of the programmed control activities, the auditor may also obtain an understanding of the related manual follow-up procedures.

.111 *Computer general control activities*. If computer general control activities operate effectively, there is greater assurance that programmed control activities are properly designed and function consistently

throughout the period. The auditor may plan to understand computer general control activities to provide evidence that

- programs are properly designed and tested in development;
- changes to programs are properly made;
- computer operations ensure the proper use of application programs and data files; and
- adequate access controls reduce the risk of unauthorized changes to the program and data files.

.112 The following table summarizes computer general control activities.

Area	*Control Objectives*	*Example Controls*
Program development	• Controls ensure that new applications systems are suitably authorized, designed, and tested	• Users are involved in the design and approval of systems • Checkpoints where users review the completion of various phases of the application • Development of test data and testing of the program • User involvement in the review of tests of the program • Adequate procedures to transfer programs from development to production libraries
Program changes	• Controls over changes to existing programs and systems ensure that modifications to application programs are suitably approved, designed, tested, and implemented	• Same as program development • User involvement • Adequate testing • Adequate transfer activities • Segregation of duties between programmers and production libraries
Computer operations	• Controls ensure that application programs are used properly and that proper data files are used during processing	• Review of lists of regular and unscheduled batch jobs by operations management • Use of menu-driven job control instruction sets • Jobs executed only from the operator's terminal • Adequate procedures for managing and backing up data and program files
Access	• Controls should prevent or detect unauthorized changes to programs and to data files supporting the financial statements	• Programmers have limited access to production programs, live data files, and job control language • Operators have limited access to source code and individual elements of data files • Users have access only to defined programs and data files

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Obtaining an Understanding of Significant Account Balances and Transaction Cycles

.113 As discussed in paragraph .83 of AU section 314, the auditor should obtain sufficient knowledge of the information system, including the related business processes relevant to financial reporting to understand

- the classes of transactions in the entity's operations that are significant to the financial statements;
- the procedures, both automated and manual, by which transactions are initiated, authorized, recorded, processed, and reported from their occurrence to their inclusion in the financial statements;
- the related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, recording, processing, and reporting transactions;
- how the information system captures other events and conditions that are significant to the financial statements; and
- the financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.114 *Accounting processing*. In obtaining an understanding of how a client processes accounting information—from the initiation of the transaction to its inclusion in the financial statements—the auditor may focus on how the computer is used to process data and the ways in which transactions are valued, classified, and summarized in data files, journals, or ledgers. For some transactions, there may be several significant processing activities and accounting records, including the use of computer programs. Other transactions may involve only limited processing activities performed manually.

.115 *At Jones Grocery, sales are initiated by customers and recorded in the cash register. At the end of the day the cash register totals are reconciled to the cash on hand, and a deposit is prepared for the day's receipts. On a weekly basis, the daily cash register tapes are batched for each store, forwarded to Mrs. Jones, and entered into the computer. The computer generates a sales register, a sales analysis report, and posts the sales totals to the general ledger. Also, the processing of inventory transactions (for example, receipt of goods, sales, and spoilage) involves several processing activities that are linked in the inventory module of the software package. On the other hand, recording depreciation expense is fairly simple. Fixed assets and the related depreciation are maintained on a computer spreadsheet, and each month, Mrs. Jones prepares a journal entry to record depreciation*.

.116 Understanding the accounting processing also involves understanding the information used for processing and when processing occurs. For example, when considering the completeness assertion, the auditor may obtain an understanding about whether transactions entered into the computer system are processed immediately or in batches and how frequently batches are processed.

.117 The processing of accounting information may involve *end user computing*. End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person.

.118 *Mrs. Jones developed and maintains the fixed asset spreadsheet that serves as the source document for her monthly depreciation expense journal entry*.

.119 In general, the product of end user computing may be used to

- process significant accounting information outside of the off the shelf accounting software package (for example, the fixed-asset spreadsheet is separate from the Jones Grocery general ledger software package);
- make significant accounting decisions (for example, a spreadsheet application may be used to generate information used to write down inventory); and

- accumulate footnote information (for example, a spreadsheet may be used to calculate the five-year debt maturity disclosure).

.120 Generally, end users have no training in the formal computer application development process. Accordingly, applications developed by end users are often inadequately tested, and the development process is often not documented. This situation can cause significant difficulties for an organization if the end user computing application is critical to making business or financial decisions.

.121 The access to end user computing applications may also be an audit concern. Many computer applications used in end user computing come with on-line systems that are capable of restricting users to specific applications, specific departments, or even specific fields. Often, however, these access restrictions facilities are not implemented.

.122 To address these concerns and to ensure the end user applications process data completely and accurately, the auditor may look for control policies and procedures that

- require all significant end user applications to be adequately tested before use;
- prescribe documentation standards for significant end user applications;
- provide for adequate access controls to data;
- provide a mechanism to prevent or detect the use of incorrect versions of data files;
- provide for appropriate applications controls, for example, edit checks, range tests, or reasonableness checks; and
- support meaningful user reconciliations.

.123 *Accounting records, supporting information, and specific accounts*. In general, the auditor may identify the following for a client's significant accounts and transactions:

- Source documents
- Documents converted to computer media
- Computer files that are further processed in the flow of information to the general ledger and the financial statements
- Accounts (subsidiary or general ledger master files) affected by the transaction
- Relevant accounting reports, journals, and ledgers produced in the flow of information to the general ledger and the financial statements

.124 A client's accounting systems may create many documents, files, and reports that are useful for managing the organization; however, not all will be relevant to the financial statements.

.125 *At Jones Grocery, the sales analysis report described in paragraph .115* is used for management information and analysis. The documents and reports relevant to the financial statements are the daily cash register tapes and the computer generated sales register.

.126 *Other significant events and conditions*. The entity's information system may capture other events and conditions that are significant to the financial statements. This might involve, for example, nonrecurring or unusual transactions or adjustments and nonrecurring estimates.

.127 *A broken water line, which is an uninsured risk, spoiled a large amount of produce and dry goods in one of the Jones Grocery stores. Based on a list of the lost inventory provided by the store manager, Mrs. Jones recorded a large spoilage loss.*

.128 *Financial reporting process*. When gaining an understanding of the financial reporting process, the auditor may determine the extent of client procedures to prepare accounting estimates (when significant

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

accounting estimates are called for) and information for significant disclosures. The auditor may also understand the way in which general ledger information is summarized to determine how the amounts and disclosures are reported in the financial statements.

Segregation of Duties and Management Override

.129 Small businesses are typically characterized by the following:

- A dominant owner-manager
- A lack of segregation of duties

.130 These characteristics may pose unique risks to the entity.

.131 Duties generally should be divided among different people to reduce the risks of error or inappropriate actions. For instance, responsibilities for authorizing transactions, recording them, and handling the related assets could be divided.

.132 Even small businesses with only a few employees can usually parcel out responsibilities to achieve the necessary checks and balances. If that is not possible—which may be the case on occasion—direct oversight of the incompatible activities by the owner-manager can provide the necessary control. Thus, a dominant owner-manager may be a positive element in the design of internal control.

.133 A dominant owner-manager may be a negative element in the design of internal control when he or she is able to override established policies and procedures.

.134 Management *override* is different from management *intervention*. *Management intervention* is discussed in paragraph .35 and is described as the overrule of internal control for legitimate purposes. For example, management intervention is usually necessary to deal with nonrecurring and nonstandard transactions or events that otherwise might be handled by the system.

.135 In contrast, *management override* is the overrule of internal control for illegitimate purposes with the intent of personal gain or enhanced presentation of an entity's financial condition or compliance status.

.136 An owner-manager might override internal control for many reasons:

- To increase or decrease reported revenue
- To boost market value of the entity prior to sale
- To meet sales or earnings projections
- To bolster bonus pay-outs tied to performance
- To appear to cover violations of debt covenant agreements
- To hide lack of compliance with legal requirements

Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, as well as intentionally issuing false documents such as sales invoices.

.137 When gaining an understanding of internal control, the auditor assesses the risk of management override.

Assessing Internal Control Strengths and Weaknesses

.138 When obtaining an understanding of internal control, the auditor may consider the *collective* effect of strengths and weaknesses in various control environment factors. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack

of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by top management to overstate earnings.

.139 Internal control strengths may indicate account balances, transaction classes, or assertions where you can assess control risk at low or moderate.[2] Internal control weaknesses usually indicate areas where substantive procedures may be required. However, in situations where electronic evidence (information transmitted, processed, maintained, or accessed by electronic means) is significant, testing of the related internal control generally is necessary to obtain sufficient competent audit evidence.

.140 In rare circumstances, the auditor's understanding of internal control may raise doubts about the auditability of an entity's financial statements. Concerns about the integrity of the entity's management may be so serious as to cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. Concerns about the nature and extent of an entity's records may cause the auditor to conclude it is unlikely that sufficient appropriate audit evidence will be available to support an opinion on the financial statements.

.141 If the auditor concludes that it is unlikely that sufficient appropriate audit evidence will be available to support an unqualified opinion on the financial statements, the auditor should consider a qualification or disclaimer of opinion. In some cases, the auditor's only recourse may be to withdraw from the engagement.

Practical Guidance

Readers may refer to appendix M, "Illustrative Audit Documentation Case Study: Young Fashions, Inc.," of the AICPA Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* for examples of how to document your understanding of internal control. Appendix M contains several subappendixes (appendix M-1–M-6). Those that are particularly relevant to internal control include the following:

- Appendix M-2, "Young Fashions: Evaluation of Entity–Level Controls," provides example documentation of the auditors evaluation of entity-level controls, except for IT general controls. Appendix M-2 illustrates how to document your understanding of the controls relevant to the audit, including (1) an evaluation of whether the design of the control, individually or in combination, is capable of effectively preventing or detecting and correcting material misstatements and (2) a determination of whether the control exists and the entity is using it.
- Appendix M-2-1, "Young Fashions: Procedures Performed to Evaluate Entity-Level Controls," provides illustrative documentation for the risk assessment and other procedures an auditor performs to obtain the required understanding about internal control and the source of that understanding.
- Appendix M-3, "Young Fashions: Understanding of Internal Control—IT General Controls," provides example documentation of the auditors evaluation of IT general controls.
- Appendix M-4, "Young Fashions: Evaluation of Activity-Level Controls—Wholesale Sales," provides example documentation of an evaluation of activity-level controls. This case study presents only one class of transactions, sales. In practice, the auditor would evaluate activity-level controls for each significant class of transactions.

Designing Further Audit Procedures

Audit Procedures for Obtaining Audit Evidence

.01 In order to draw reasonable conclusions on which to base the audit opinion, auditors should obtain audit evidence by performing audit procedures to

- obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels (audit procedures performed for this purpose are referred to as *risk assessment procedures*);
- when necessary or when the auditor has determined to do so, test the operating effectiveness of controls in preventing or detecting material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *tests of controls*); and
- detect material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *substantive procedures* and include tests of details of classes of transactions, account balances, and disclosures, and substantive analytical procedures).

.02 The auditor must perform risk assessment procedures to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels. Risk assessment procedures by themselves do not provide sufficient appropriate audit evidence on which to base the audit opinion and must be supplemented by further audit procedures in the form of tests of controls, when relevant or necessary, and substantive procedures.

.03 Tests of controls are necessary in two circumstances. When the auditor's risk assessment includes an expectation of the operating effectiveness of controls, the auditor should test those controls to support the risk assessment. In addition, when the substantive procedures alone do not provide sufficient appropriate audit evidence, the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness. See section 5200, "Performing Tests of Controls," for additional guidance on performing tests of controls.

.04 As described in AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*), the auditor should plan and should perform substantive procedures to be responsive to the related planned level of detection risk, which includes the results of tests of controls, if any. The auditor's risk assessment is judgmental, however, and may not be sufficiently precise to identify all risks of material misstatement. Further, there are inherent limitations in internal control, including the risk of management override, the possibility of human error, and the effect of systems changes. Therefore, regardless of the assessed risks of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure to obtain sufficient appropriate audit evidence. See section 5300, "Performing Substantive Procedures," for additional guidance on performing substantive procedures.

Linking the Assessed Risks to the Design of Further Audit Procedures

.05 As discussed in section 3130, "Assessing the Risks of Material Misstatement," the auditor's risk assessment process culminates with the articulation of the account balances, classes of transactions, or disclosures where material misstatements are most likely to occur and—even more specifically—how the misstatements may occur and the assertions that are likely to be misstated. This assessment of the risks of

misstatement, which relates identified financial reporting risks to what can go wrong at the assertion level, provides a basis for the design of further audit procedures.

.06 To reduce audit risk to an acceptably low level, the auditor should determine overall responses to address the assessed risks of material misstatement at the financial statement level and should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The overall responses and the nature, timing, and extent of the further audit procedures to be performed are matters for the professional judgment of the auditor.

Overall Responses to Risks at the Financial Statement Level

.07 The auditor's audit response to financial statement level risks should be responsive to the assessed risk. The same is true for responses to risk at the account, assertion level, or both. It is critical that the auditor's audit procedures are linked clearly and responsive to the assessment. This linkage between risk assessment and audit procedures is part of the audit strategy and audit plan, and it should be documented. The following paragraph describes some important characteristics of financial statement level risks. The purpose of these descriptions is to help the auditor bridge between the assessment of financial statement level risks and the subsequent response.

.08 Characteristics of financial statement level risks that are relevant for audit purposes include the following:

- *Financial statement level risks can affect many assertions*. By definition, financial statement level risks may result in material misstatements of several accounts or assertions. For example, a lack of controls over journal entries increases the risk that an inappropriate journal entry could be posted to the general ledger as part of the period-end financial reporting process. The posting of an inappropriate journal entry may not be isolated to one general ledger account but potentially could affect any account. In general, overall audit risk increases when the magnitude or scope of an identified risk of misstatement is not known.
- *Assessing financial statement-level risks requires significant judgment*. Ultimately, the auditor relates identified risks of misstatement to what can go wrong. For example, suppose that while performing risk assessment procedures to gather information about the control environment, the auditor discovered weaknesses relating to the hiring, training, and supervision of entity personnel. These weaknesses result in an increased risk of a misstatement of the financial statements, but it will be a matter of the auditor's professional judgment to determine the following:
  - — The accounts and relevant assertions that could be affected
  - — The likelihood that a financial statement misstatement will result from the increased risks
  - — The significance of any misstatement
- *Risks at the Financial Statement Level May Not be Identifiable With Specific Assertions*. Control weaknesses at the financial statement level can render well-designed activity-level controls ineffective. For example, a significant risk of management override can potentially negate existing controls and procedures at the activity level in many accounts and for many assertions. Linking such a risk to specific accounts and assertions may be very difficult and may not even be possible. As another example, a client may have excellent data input controls at the application level. But if poorly designed IT general controls allow many unauthorized personnel the opportunity to access and inappropriately change the data, the well-designed input controls have been rendered ineffective. Also, strengths in financial statement-level controls such as an overall culture of ethical behavior may increase the reliability of controls that operate at the activity level. Determining the extent to which financial statement level controls affect the reliability of specific activity level controls (and, therefore, the assessment of the risks of material misstatement) is subjective and may vary from client to client.

.09 Due to the unique characteristics of financial statement level risks, it may not be possible to correlate all of these risks to a finite set of assertions. For example, a weakness in control environment may affect all

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

or mostly all of the accounts, classes of transactions, or disclosures and the relevant assertions. To respond appropriately to these types of financial statement level risks, the auditor may need to reconsider the overall approach to the engagement. The following paragraph provides examples of overall responses to risks at the financial statement level that have a pervasive effect on the financial statements and cannot necessarily be mapped to individual assertions.

.10 The auditor's overall responses to address the assessed risks of material misstatement at the financial statement level may include the following:

- Emphasizing to the audit team the need to maintain professional skepticism in gathering and evaluating audit evidence.
- Assigning more experienced staff or those with specialized skills or using specialists.
- Providing more supervision.
- Incorporating additional elements of unpredictability in the selection of further audit procedures to be performed and in selecting individual items for testing.
- Making general changes to the nature, timing, or extent of further audit procedures as an overall response, for example, performing substantive procedures at period end instead of at an interim date. One could also focus more time and attention on audit areas more closely associated with the risks.

.11 The assessment of the risks of material misstatement at the financial statement level is affected by the auditor's understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and thus, for example, allow the auditor to perform some audit procedures at an interim date rather than at period end. If there are weaknesses in the control environment, the auditor should consider an appropriate response. For example, the auditor could perform audit procedures as of the period end rather than at an interim date, seek more extensive audit evidence from substantive procedures, modify the nature of audit procedures to obtain more persuasive audit evidence, or increase the number of locations to be included in the audit scope.

.12 Such considerations, therefore, have a significant bearing on the auditor's general approach, for example, an emphasis on substantive procedures (substantive approach) or an approach that uses tests of controls as well as substantive procedures (combined approach).

.13 Paragraphs .13 and .50 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*), describe the overall responses the auditor may take in response to his or her assessment of the risk of material misstatement due to fraud. When determining an overall audit response, the auditor may consider the assessment of fraud risk concurrently with the assessment of the risks of material misstatement due to error. The auditor can develop one overall response that is appropriate for both kinds of risks.

Audit Procedures Responsive to Risks of Material Misstatement at the Relevant Assertion Level

.14 Further audit procedures provide important audit evidence to support the auditor's audit opinion. These procedures consist of tests of controls and substantive tests.

.15 The auditor should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The purpose is to provide a clear linkage between the nature, timing, and extent of the auditor's further audit procedures and the risk assessments.

.16 In designing further audit procedures, the auditor should consider such matters as the following:

- The significance of the risks and the likelihood that a material misstatement will occur. In general, the more significant (in terms of likelihood and magnitude) the risks the more reliable and relevant audit evidence should be.
- The characteristics of the class of transactions, account balance, or disclosure involved, which will help determine the nature, timing, and extent of procedures available to the auditor. For example, the gross accounts receivable balance comprises transactions with third parties, which means the auditor can contact these external parties to confirm the transactions or individual account balances. On the other hand, the allowance for doubtful accounts is an estimate prepared internally, which does not lend itself to confirmation but to other substantive tests.
- The nature of the specific controls used by the entity, in particular, whether they are manual or automated.
- Whether the auditor expects to obtain audit evidence to determine if the entity's controls are effective in preventing or detecting material misstatements.

The nature of the audit procedures is of most importance in responding to the assessed risks.

.17 The auditor's assessment of the identified risks at the relevant assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. In some cases, the auditor may determine that performing only substantive procedures is appropriate for specific relevant assertions and risks. In those circumstances, the auditor may exclude the effect of controls from the relevant risk assessment. This may be because the auditor's risk assessment procedures have not identified any effective controls relevant to the assertion or because testing the operating effectiveness of controls would be inefficient. However, the auditor needs to be satisfied that performing only substantive procedures for the relevant assertions would be effective in reducing detection risk to an acceptably low level. The auditor often will determine that a combined audit approach using both tests of the operating effectiveness of controls and substantive procedures is an effective audit approach.

.18 Regardless of the audit approach selected, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure. Because effective internal controls generally reduce, but do not eliminate, risks of material misstatement, tests of controls reduce, but do not eliminate, the need for substantive procedures. In addition, analytical procedures alone may not be sufficient in some cases. For example, when auditing certain estimation processes such as examining the allowance for doubtful accounts, the auditor may perform substantive procedures beyond analytical procedures (for example, examining cash collections subsequent to period end) due to the risk of management override of controls or the subjectivity of the account balance.

.19 In the case of very small entities, there may not be many control activities that could be identified by the auditor. For this reason, the auditor's further audit procedures are likely to be primarily substantive procedures. In such cases, in addition to the matters referred to in the preceding paragraph .16, the auditor should consider whether in the absence of controls it is possible to obtain sufficient appropriate audit evidence.

Nature of Further Audit Procedures

.20 The nature of further audit procedures refers to the following:

- Their purpose, that is, tests of controls or substantive procedures (or dual purpose tests) and whether they are designed to test for overstatement, understatement, or both
- Their type, such as the following:
  - Inspection
  - Observation

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

— Inquiry

— Confirmation

— Recalculation

— Reperformance

— Analytical procedures (including scanning)

Table 1 provides additional guidance on each of these procedures.

Table 1
Types of Audit Procedures

Type of Procedure	*Definition*	*Additional Guidance*
Inspection of documents	Inspection of documents involves examining records or documents, whether internal or external, in paper form, electronic form, or other media.	• This procedure provides audit evidence of varying degrees of reliability, depending on their nature and source and, in the case of internal documents, on the effectiveness of the controls over their production. • Some documents represent direct audit evidence of the existence of an asset but not necessarily about ownership or value. • Inspecting an executed contract may provide audit evidence relevant to the entity's application of accounting principles, such as revenue recognition. • Some forms of documents are less persuasive than others. For example, faxes and copies may be less reliable than original documents.
Inspection of tangible assets	Inspection of tangible assets consists of physical examination of the assets.	• This procedure may provide audit evidence relating to existence, but not necessarily about the entity's rights and obligations or the valuation of the assets. • Inspection of individual inventory items ordinarily accompanies the observation of inventory counting.
Observation	Observation consists of looking at a process or procedure being performed by others.	• This procedure provides audit evidence about the performance of a process or procedure but is limited to the point in time at which the observation takes place and by the fact that the act of being observed may affect how the process or procedure is performed.

(continued)

Type of Procedure	*Definition*	*Additional Guidance*
Confirmation	Confirmation is the process of obtaining a representation of information or of an existing condition directly from a knowledgeable third party.	• This procedure — frequently is used in relation to account balances and their components but need not be restricted to these items; — can be designed to ask if any modifications have been made to an agreement, and if so, what the relevant details are; and — also is used to obtain audit evidence about the absence of certain conditions (for example, the absence of an undisclosed agreement that may influence revenue recognition). • See AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*), for further guidance on confirmations.
Recalculation	Recalculation consists of checking the mathematical accuracy of documents or records.	• This procedure can be performed through the use of information technology, for example, by applying a data extraction application or other computer assisted audit techniques (CAATs).
Reperformance	Reperformance is the auditors independent execution of procedures or controls that were originally performed as part of the entity's internal control	• This procedure may be performed either manually or through the use of CAATs, for example, reperforming the aging of accounts receivable.

Inquiry

.21 Inquiry consists of seeking information of knowledgeable individuals. These individuals may be involved in the financial reporting process or outside of that process; they may be internal or external to the company. Inquiry is used extensively throughout the audit and often is complementary to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Asking questions of knowledgeable individuals is only part of the inquiry process. Evaluating the responses to inquiries is an equally integral part of the process.

.22 Inquiry normally involves such actions as the following:

- Considering the knowledge, objectivity, experience, responsibility, and qualifications of the individual to be questioned
- Asking clear, concise, and relevant questions
- Using open or closed questions appropriately
- Listening actively and effectively
- Considering the reactions and responses and asking follow-up questions
- Evaluating the response

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

See appendix K, "Suggestions for Conducting Inquiries," of the AICPA Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* for further guidance on performing inquiries.

.23 Responses to inquiries may provide the auditor with information he or she did not previously possess or with corroborative audit evidence. Alternatively, responses might provide information that differs significantly from other information the auditor has obtained, such as information regarding the possibility of management override of controls. In some cases, responses to inquiries provide a basis for the auditor to modify or perform additional audit procedures. The auditor should resolve any significant inconsistencies in the information obtained.

.24 The auditor should perform audit procedures in addition to the use of inquiry to obtain sufficient appropriate audit evidence. Inquiry alone ordinarily does not provide sufficient appropriate audit evidence to detect a material misstatement. Moreover, inquiry alone is not sufficient to test the operating effectiveness of controls.

.25 In some instances, the auditor may need to obtain evidence about management's intended actions, for example, when obtaining evidence to support management's classification of investments as either trading, available for sale, or hold to maturity. To corroborate management's responses to questions regarding their intended future action, the following may provide relevant information:

- Management's past history of carrying out its stated intentions with respect to assets and liabilities
- Management's stated reasons for choosing a particular course of action
- Management's ability to pursue a specific course of action

.26 In some cases, the auditor should obtain replies to inquiries in the form of written representations from management. For example, when obtaining oral responses to inquiries, the nature of the response may be so significant that it warrants obtaining written representation from the source. See AU section 333, *Management Representations* (AICPA, *Professional Standards*), for further guidance on written representations.

Substantive Analytical Procedures

.27 Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass the investigation of identified fluctuations and relationships that are inconsistent with other relevant information or deviate significantly from predicted amounts. Analytical procedures are used for the following purposes:

a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures

b. As risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control

c. As a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions

d. As an overall review of the financial information in the final review stage of the audit

.28 Analytical procedures can be effective

- for certain types of assertions (for example, the completeness assertion, which cannot be tested directly using a test of balances on recorded amounts).
- when the relationships between amounts are very predictable.
- when the data used to develop expectations based on the relationship are reliable.
- when relatively precise expectations can be developed.

.29 Analytical procedures can provide evidence supporting financial statement assertions and, thus, can be used as substantive tests. Because analytical procedures are often the least expensive tests, they may be used whenever practical.

.30 Paragraph .05 of AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*), describes analytical procedures as follows:

> Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:
>
> *a.* Financial information for comparable prior period(s) giving consideration to known changes
>
> *b.* Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data
>
> *c.* Relationships among elements of financial information within the period
>
> *d.* Information regarding the industry in which the client operates—for example, gross margin information
>
> *e.* Relationships of the financial information with relevant nonfinancial information

.31 Whenever analytical procedures are applied as substantive tests, the auditor may apply the following procedures:

- Consider whether the relationship is plausible and predictable.
- Consider whether the data used for the comparison is reliable.
- Consider whether the account balance tested is consistent with the auditor's expectations. If it is not consistent, obtain the client's explanation for the variance and get evidence to corroborate the client's explanation.

.32 AU section 329 states that analytical procedures should be performed in the planning and overall review stages of all audits. See AU section 329 and section 3155, "Analytical Procedures," for further guidance on analytical procedures.

The Selection of Audit Procedures

.33 The auditor's selection of audit procedures is based on the risks of material misstatement. The higher the auditor's assessment of risk, the more reliable and relevant the audit evidence sought by the auditor from substantive procedures is. This determination of the requisite reliability and relevance of audit evidence may affect both the types of audit procedures to be performed and their combination. For example, the auditor may confirm the completeness of the terms of a contract with a third party, in addition to inspecting the document and obtaining management's representation. This combination of several procedures would result in more reliable and relevant audit evidence than obtained by performing only one procedure.

.34 In determining the audit procedures to be performed, the auditor should consider the underlying reasons for the assessment of the risks of material misstatement at the relevant assertion level for each class of transactions, account balance, and disclosure. These underlying reasons relate to both the inherent and control risks related to the assertion. For example, if the auditor assessed risks of material misstatement to be low that a material misstatement might occur because of low inherent risk, the auditor may determine that substantive analytical procedures alone may provide sufficient appropriate audit evidence. On the other hand, if the auditor expects that there are lower risks of material misstatement because the client has effective controls and the auditor intends to design substantive procedures based on relying on the effective operation

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

of those controls, then the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness.

.35 The auditor should obtain audit evidence about the accuracy and completeness of information produced by the entity's information system when that information is used in performing audit procedures. For example, if the auditor uses nonfinancial information or budget data produced by the entity's information system in performing audit procedures, such as substantive analytical procedures or tests of controls, the auditor should obtain audit evidence about the accuracy and completeness of such information.

Timing of Further Audit Procedures

.36 Timing refers to when audit procedures are performed or the period or date to which the audit evidence applies. The auditor may perform tests of controls or substantive procedures

- at an interim date.
- at period end.
- after period end, in those instances where the procedure cannot be performed prior to or at year end (for example, agreeing the financial statements to the accounting records).

.37 The higher the risks of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to or at the period end rather than at an earlier date, or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters. If the auditor performs tests of the operating effectiveness of controls or substantive procedures before period end, the auditor should consider the additional evidence that is necessary for the remaining period.

.38 In considering when to perform audit procedures, the auditor should also consider such matters as the following:

- The assessed risks of misstatement. In general, the higher the risk, the more likely it is that the auditor will perform procedures nearer to or at the period end.
- The control environment. In general, the more effective the control environment, the more likely it is that the auditor will be able to perform tests as of an interim date.
- When relevant information is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times).
- The nature of the risks (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, the auditor may examine contracts available on the date of the period end).
- The period or date to which the audit evidence relates.

Extent of Further Audit Procedures

.39 Extent refers to the quantity of a specific audit procedure to be performed, for example, a sample size or the number of observations of a control activity. The extent of an audit procedure is determined by the judgment of the auditor after considering the following:

- Tolerable misstatement
- Assessed risk of material misstatement
- Degree of assurance the auditor plans to obtain

.40 In particular, the auditor may increase the extent of audit procedures as the risks of material misstatement increase. However, increasing the extent of audit procedures is effective only if the audit procedures themselves are relevant to the specific risks and reliable; therefore, the nature of the audit procedure is the most important consideration.

.41 The AICPA Audit Guide *Audit Sampling* provides additional guidance on sampling for substantive testing.

Documentation

.42 The auditor should document the overall responses to address the assessed risks of misstatement at the financial statement level and the linkage of those procedures with the assessed risks at the relevant assertion level. The manner in which these matters are documented is based on the auditor's professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[*The next page is 5201.*]

AAM Section 5200

Performing Tests of Controls

.01 The auditor should perform tests of controls when the auditor's risk assessment[1] includes an expectation of the operating effectiveness of controls or when substantive procedures alone do not provide sufficient appropriate audit evidence at the relevant assertion level.

.02 When, in accordance with paragraph .117 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), the auditor has determined that it is not possible or practicable to reduce the detection risks at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures, he or she should perform tests of controls to obtain audit evidence about their operating effectiveness. For example, as discussed in paragraphs .119–.120 of AU section 314, the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence at the relevant assertion level when an entity conducts its business using IT and no documentation of transactions is produced or maintained, other than through the IT system.

.03 Tests of the operating effectiveness of controls are performed only on those controls that the auditor has determined are suitably designed to prevent or detect a material misstatement in a relevant assertion. Paragraphs .106–.108 of AU section 314 discuss the identification of controls at the relevant assertion level likely to prevent or detect a material misstatement in a class of transactions, account balance, or disclosure.

.04 Testing the operating effectiveness of controls is different from obtaining audit evidence that controls have been implemented. When obtaining audit evidence of implementation by performing risk assessment procedures, the auditor should determine that the relevant controls exist and that the entity is using them. When performing tests of controls, the auditor should obtain audit evidence that controls operate effectively. This includes obtaining audit evidence about

- how controls were applied at relevant times during the period under audit,
- the consistency with which they were applied, and
- by whom or by what means they were applied.

If substantially different controls were used at different times during the period under audit, the auditor should consider each separately. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

General Considerations When Testing Controls

Sources of Audit Evidence About Internal Control Effectiveness

.05 The audit evidence used to provide support for the auditor's conclusion about the operating effectiveness of controls during the audit period may come from a variety of sources, including the following:

- Tests of controls performed during the current period.
- Risk assessment procedures performed during the current period.

[1] The auditor's strategy reflects the level of assurance the auditor plans to obtain regarding controls.

- Evidence provided in a type 2 Statement on Auditing Standards (SAS) No. 70 report (see AU section 324, *Service Organizations* [AICPA, *Professional Standards*]).[*]
- Evidence obtained from the performance of procedures in previous audits.
- The information gathered and conclusions reached as part of the auditor's quality control procedures for client acceptance and continuance. For example, client acceptance procedures may include inquiries of attorneys, bankers, or others in the business community about client management that provide insight into their
  - — competence,
  - — integrity,
  - — operating philosophy, and
  - — ethical values.

Risk Assessment Procedures Versus Tests of Controls

.06 Risk assessment procedures allow the auditor to evaluate the design effectiveness of internal control for the purpose of assessing risks of material misstatement. Tests of controls build on the auditor's evaluation of design effectiveness and allow the auditor to assess the operating effectiveness of controls during the operating period. The results of the auditor tests of controls are used to design substantive procedures.

.07 Although some risk assessment procedures that the auditor performs to evaluate the design of controls and to determine that they have been implemented may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, a walkthrough or the observation of the performance of a control may provide evidence about the operating effectiveness of controls. In such circumstances, the auditor should consider whether the audit evidence provided by those audit procedures is sufficient.

Evidence of Operating Effectiveness of Controls at a Service Organization[*]

.08 A Type 2 service auditor's report may provide evidence about the operating effectiveness of controls at a service organization. However, controls over the information provided to the service organization may still need to be assessed. Chapter 6, "Performing Further Audit Procedures," of the AICPA Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* provides additional guidance on evaluating the operating effectiveness of controls at a service organization.

Evaluating the Effectiveness of Complementary Controls

.09 When designing tests of controls, typically the auditor will focus first on testing control activities, because the control activities component of internal control is the one most directly related to the assertion. For example, physically counting goods that have been received and comparing the quantity and description to the vendor's packing slip is directly related to both the existence and valuation of inventory.

---

[*] The Auditing Standards Board (ASB) has issued Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801), which will replace the guidance contained in AU section 324, *Service Organizations* (AICPA, *Professional Standards*), for a service auditor when reporting on controls at an organization that provides service to user entities when those controls are likely to be relevant to user entities' internal controls over financial reporting. It is effective for service auditors' reports for periods ending on or after June 15, 2011. Early implementation is permitted; therefore, if adopting SSAE No. 16 early, refer directly to the standard as certain guidance in this manual may not be applicable.

In addition, the ASB has released Statement on Auditing Standards (SAS) *Audit Considerations Relating to an Entity Using a Service Organization*, which when issued will supersede the current requirements and guidance for user auditors in SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, AU sec. 324). This SAS has been released but not yet issued as authoritative. Upon the finalization of all remaining SASs to be issued as part of the Clarity Project, one SAS will be issued containing all clarified SASs in codified format. The effective date of the SAS containing all clarified SASs is expected to be for audits of financial statements for periods ending on or after December 15, 2012, unless otherwise established. Until the new SAS is effective, user auditors will still use the guidance currently contained in AU section 324. Readers should be alert to the issuance of the final SAS. The SAS can be found at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestStndrds/ASBClarity/DownloadableDocuments/Clarified_SASs/Clarified%20SAS%20Service%20Organizations_Effective%20Date%20Change_Clean.pdf. Additional information on the ASB's Clarity Project can be found at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestStndrds/ASBClarity/Pages/ImprovingClarityASBStandards.aspx.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.10 However, in addition to testing the controls that relate directly to the assertion, the auditor should consider the need to obtain audit evidence supporting the effective operation of the complementary controls upon which the effectiveness of the direct control depends.

.11 When considering the need to test complementary controls, the auditor should consider the following:

- *The significance of the complementary control to the effective functioning of the direct control.* As the effectiveness of the direct control becomes more dependent on the complementary control, the auditor's need to test the complementary control increases.
- *The relative significance of the audit evidence of the complementary control to the auditor's conclusion on the effectiveness of the direct control.* The auditor's conclusion about the operating effectiveness of a control activity is supported by a combination of evidence about (i) the operating effectiveness of the direct control activity itself and (ii) the operating effectiveness of other, complementary controls upon which the effectiveness of the direct control depends. In some instances, the auditor may be able to support a conclusion based primarily on tests of the direct control, with little evidence about the operating effectiveness of the related complementary controls. In other instances (for example, IT application controls), the auditor's conclusion may be based primarily on tests of the complementary controls and little on tests of the direct control. In those situations where you rely significantly on the operating effectiveness of the complementary control, the auditor might obtain more sufficient and adequate audit evidence to support the conclusion on the operating effectiveness of the indirect control, for example, the monitoring of the performance of the reconciliation.
- *The degree of reliability required of the audit evidence obtained about internal control operating effectiveness.* Testing the complementary control increases the reliability of the audit evidence obtained about the operating effectiveness of the direct control. For example, the auditor may test 4 month-end reconciliations and draw a conclusion about the effectiveness of those reconciliations for an entire 12-month period. If the auditor has tested the operating effectiveness of the complementary controls related to the reconciliation, the conclusion about the effectiveness of the reconciliation during the period the auditor did not test will be more reliable than if the auditor did not test the complementary controls.
- *Evidence of operating effectiveness that may have been obtained as part of obtaining an understanding of the design and implementation of the complementary controls.* When performing risk assessment procedures to obtain an understanding of internal control, the auditor may obtain some information about the operating effectiveness of the complementary controls that are indirectly related to an assertion. For example, risk assessment procedures may provide the auditor with some evidence about the operating effectiveness of portions of the control environment. This information about operating effectiveness may be limited, but nevertheless, it may be sufficient for the purpose of drawing a conclusion about the operating effectiveness of the direct control.

.12 When testing complementary controls, the auditor may choose not to test the operating effectiveness of the entire component to which the complementary control pertains, but may limit the tests to those elements of the component that have an immediate bearing on the effectiveness of the direct control. For example, when testing controls over purchasing to place moderate reliance on them, the auditor may consider the need to test the control environment or IT general controls relating to the entire entity beyond the design and implementation assessment procedures the auditor already has performed. If practical, the auditor may limit the tests to those aspects of the control environment or IT general controls that have a direct bearing on the financial statement assertions related to purchasing. To place high reliance on the controls, the auditor may often need to gather additional evidence concerning the IT general controls and overall control environment to support high reliance on the purchasing controls.

The Relationship Between Tests of Controls and Substantive Tests

.13 There is an inverse relationship between the audit evidence to be obtained from substantive tests and that obtained from tests of controls. As the sufficiency and adequacy of the audit evidence obtained from tests of controls increases, the sufficiency and adequacy of the audit evidence required from substantive tests generally decreases. For example, in circumstances when the auditor adopts an approach consisting primarily

of tests of controls, in particular related to those risks where it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures, the auditor should perform tests of controls to obtain a high level of assurance about their operating effectiveness.

.14 On the other hand, the more audit evidence that can be obtained from substantive tests, the less audit evidence would be necessary from tests of controls. In many instances, the nature and extent of substantive tests alone may provide sufficient, adequate evidence at the assertion level, which would make the testing of control effectiveness (beyond assessing the design and implementation of the related controls) unnecessary.

A Financial Statement Audit Versus An Examination of Internal Control

.15 Testing the operating effectiveness of internal control to support an opinion on the financial statements is different from testing controls to support an opinion on the effectiveness of the internal control system.

.16 In an attestation engagement to examine the effectiveness of internal control, the audit evidence obtained from the tests of internal control is the only evidence the auditor has to support an opinion. In contrast, when performing an audit of the financial statements, the auditor ordinarily performs both tests of controls and substantive tests. The objective of the tests of controls in a financial statement audit is to assess the operating effectiveness of controls and incorporate this assessment into the design of the nature, timing, and extent of substantive procedures. Thus, when testing controls in a financial statement audit, the auditor has flexibility in determining not only whether to test controls, and if so which controls to test, but also the level of effectiveness of those controls that is necessary to provide the desired level of support for an opinion on the financial statements.

Determining the Nature of the Tests of Controls

.17 The nature of the procedures the auditor performs to test controls has a direct bearing on the relevance and reliability of audit evidence. When responding to assessed risks of material misstatement, the nature of the audit procedures is of most importance. Performing more tests or conducting the tests closer to the period end will not compensate for a poorly designed test that lacks sufficient relevance or reliability in gathering audit evidence about the effectiveness of a control.

.18 The types of audit procedures available for obtaining audit evidence about the effectiveness of controls includes the following:

- Inquiries of appropriate entity personnel
- Inspection of documents, reports, or electronic files indicating performance of the control
- Observation of the application of the control
- Reperformance of the application of the control by the auditor

.19 The nature of the particular control influences the type of audit procedure necessary to obtain audit evidence about operating effectiveness. Documentation may provide evidence about the performance of some controls; in these situations, the auditor may inspect this documentation to obtain evidence about the operating effectiveness of the control.

.20 For other controls, complete documentation may not be available or relevant. For example, documentation of the operation may be sketchy for some factors in the control environment, such as assignment of authority and responsibility, or for some types of control activities, such as control activities performed automatically by the client's IT system. In these circumstances, audit evidence about operating effectiveness may be obtained through inquiry in combination with other audit procedures such as observation of the performance of the control or the use of computer assisted audit techniques. Entities should be encouraged to improve weak documentation.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.21 Because of the limits of inquiry and observation, inquiry combined with inspection or reperformance ordinarily provide more reliable audit evidence than a combination of only inquiry and observation. For example, the auditor may inquire about and observe the entity's procedures for opening the mail and processing cash receipts to test the operating effectiveness of controls over cash receipts. Because an observation is pertinent only at the point in time at which it is made, the auditor may supplement the observation with other observations or inquiries of entity personnel, and the auditor may also inspect documentation about the operation of such controls at other times during the audit period.

Tests of IT Controls

.22 Because of the inherent consistency of IT processing, audit evidence about the implementation of an automated control, combined with audit evidence about the operating effectiveness of IT general controls (and in particular, security and change controls) may provide substantial audit evidence about the operating effectiveness of the control during the entire audit period. That is, once the auditor has determined that an IT application control has been implemented (placed in operation), the auditor may draw a conclusion about the operating effectiveness of the IT portion of the control activity, so long as the auditor has determined that relevant IT general controls are operating effectively.

Tests of Spreadsheets

.23 The development and use of spreadsheets typically lack the controls that usually are present for formal, purchased software. Absent audit evidence indicating that appropriate general controls over spreadsheets have been implemented, the auditor might continue to test spreadsheet controls even after their implementation.

Dual Purpose Tests

.24 Some audit procedures may simultaneously provide audit evidence that both

- support the relevant assertion or detects material misstatement and
- support a conclusion about the operating effectiveness of related controls.

Tests that achieve both of these objectives concurrently on the same transaction typically are referred to as dual purpose tests. For example, the auditor may examine an invoice to determine whether it has been approved and also to provide substantive audit evidence about the existence and amount of the transaction.

.25 When performing a dual purpose test, the auditor should carefully consider whether the design and evaluation of such tests can accomplish both objectives. For example, the population of controls and the population of substantive procedures should be the same. If tests on components of a balance such as receivables are designed as dual purpose tests, only evidence of the controls operating over period-end balance items will be obtained.

.26 Furthermore, when performing such tests, the auditor should consider how the outcome of the tests of controls may affect the auditor's determination about the extent of substantive procedures to be performed. For example, if controls are found to be ineffective, the auditor should consider whether the sample size for substantive procedures should be increased from that originally planned.

Determining the Timing of Tests of Controls

.27 The timing of tests of controls affects the relevance and reliability of the resulting audit evidence. In general, the relevance and reliability of the audit evidence obtained diminishes as time passes between the testing of the controls and the end of the period under audit. For this reason, when tests of controls are performed during an interim period or carried forward from a previous audit, the auditor should determine what additional audit evidence should be obtained to support a conclusion on the current operating effectiveness of those controls.

.28 The timing of tests of controls depends on the auditor's objective:

a. When controls are tested as of a point in time, the auditor may obtain audit evidence that the controls operated effectively only at that time.

b. When controls are tested throughout a period, the auditor may obtain audit evidence of the effectiveness of the operation of the control during that period.

.29 Audit evidence pertaining only to a point in time may be sufficient for the auditor's purpose, for example, when testing controls over the client's physical inventory counting at the period end. If, on the other hand, the auditor needs audit evidence of the effectiveness of a control over a period, audit evidence pertaining only to a point in time may be insufficient, and the auditor should supplement those tests with others that provide audit evidence that the control operated effectively during the period under audit. For example, for an automated control, the auditor may test the operation of the control at a particular point in time. The auditor then may perform tests of controls to determine whether the control operated consistently during the audit period, or the auditor may test with the intention of relying on general controls pertaining to the modification and use of that computer program during the audit period.

.30 The tests the auditor performs to supplement tests of controls at a point of time may be part of the tests of controls over the client's monitoring of controls.

Updating Tests of Controls Performed During an Interim Period

.31 The auditor may test controls as of or for a period that ends prior to the balance sheet date. This date often is referred to as the *interim date* or *interim period*. The period of time between the interim date or period and the balance sheet date often is referred to as the *remaining period*.

.32 When the auditor tests controls during an interim period or as of an interim date, the auditor should

- obtain audit evidence about the nature and extent of any significant changes in internal control that occurred during the remaining period and
- determine what additional audit evidence should be obtained for the remaining period.

.33 To determine what additional audit evidence the auditor should obtain to update tests of controls performed in advance of the balance sheet date, the auditor should consider the following:

- The significance of the assessed risks of material misstatement at the relevant assertion level
- The specific controls that were tested during the interim period
- The degree to which audit evidence about the operating effectiveness of those controls was obtained
- The length of the remaining period
- The extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls
- The control environment
- The volume or value of transactions processed in the remaining period

.34 The auditor may obtain additional audit evidence about the operating effectiveness of controls during the remaining period by performing procedures such as

- extending the testing of the operating effectiveness of controls over the remaining period or
- testing the client's monitoring of controls.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.35 For example, the auditor might perform

- inquiries and observations related to the performance of the control, the monitoring of the control, or any changes to the control during the remaining period;
- a walkthrough covering the period between the interim date and the period end; and
- the same procedures performed at interim, but directed to the period from interim to period end.

Use of Audit Evidence Obtained in Prior Audits

.36 If certain conditions are met, the auditor may use audit evidence obtained in prior audits to support the conclusion about the operating effectiveness of controls in the current audit. If the auditor plans to use evidence obtained in prior periods, the auditor should consider

- whether the use of this evidence is appropriate and
- the length of the time period that may elapse before retesting the control.

.37 The following table summarizes the factors the auditor should consider when determining whether to use audit evidence about the operating effectiveness obtained in a prior audit.

	Appropriateness of Using Evidence From Prior Audit		*Length of Time Before Retesting Control*	
	May be appropriate	*May not be appropriate*	*Longer*	*Shorter*
Effectiveness of control environment, the client's risk assessment, monitoring, and IT general controls	Effective design and operation	Evidence of poor design or operation	Effective design and operation	Evidence of poor design or operation
Risks arising from characteristics of the control	Largely automated control	Significant manual or judgmental component to control	Largely automated control	Significant manual or judgmental component to control
Changes in circumstances at the client that may require changes in controls, including personnel changes that affect application of the control	Minor changes in client circumstances, including personnel	Significant changes in client circumstances, including personnel	Minor changes in client circumstances, including personnel	Significant changes in client circumstances, including personnel
Operating effectiveness of the control	Control operated effectively in prior audit	Control did not operate effectively in prior audit	Control operated effectively in prior audit	Control did not operate effectively in prior audit

(continued)

	Appropriateness of Using Evidence From Prior Audit		*Length of Time Before Retesting Control*	
	May be appropriate	*May not be appropriate*	*Longer*	*Shorter*
Risks of material misstatement	Low risk of material misstatement for relevant assertion	High risk of material misstatement for relevant assertion	Low risk of material misstatement for relevant assertion	High risk of material misstatement for relevant assertion
Extent of reliance on the control to design substantive procedures	Low reliance on the control	High reliance on the control	Low reliance on the control	High reliance on the control

.38 If the auditor plans to use audit evidence about the operating effectiveness of controls obtained in prior audits, the auditor should

- obtain audit evidence about whether changes in those specific controls have occurred subsequent to the prior audit and
- perform audit procedures to establish the continuing relevance of audit evidence obtained in the prior audit.

.39 Even when the auditor uses audit evidence about the operating effectiveness of controls obtained in prior periods, the auditor still should evaluate the design effectiveness and implementation of controls in the current period. The procedures performed as described in the preceding paragraph may help the auditor fulfill this responsibility; however, the auditor may have to supplement these procedures with others. For example, if the controls have not changed from the previous period but the client's business process has, the auditor will need to determine whether the design of controls remains effective in light of the changed business processes.

.40 The auditor may not rely on audit evidence about the operating effectiveness of controls obtained in prior audits for controls that

- have changed significantly since the prior audit,
- pertain to business processes that have changed significantly since the prior audit, and
- mitigate significant risks.

For any control that meets one of the preceding criteria, the auditor should test operating effectiveness in the current audit.

.41 For example, changes in a system that enable an entity to receive a new report from the system probably is not a significant change and, therefore, is unlikely to affect the relevance of prior period audit evidence. On the other hand, a change that causes data to be accumulated or calculated differently probably is significant and, therefore, does affect the relevance of audit evidence obtained in the prior period, in which case the operating effectiveness of the control should be tested in the current period.

Rotating Emphasis on Tests of Controls

.42 When the auditor plans to rely on controls that have not changed since they were last tested, the auditor should test the operating effectiveness of these controls at least once in every third year in an annual audit. There also may be some controls, such as over revenue recognition or inventories that, due to their importance to the client financial statements, might be subject to testing every two years or every year, depending on the risks, even when there are purported to be no changes in controls.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.43 When there are a number of controls for which the auditor plans to use audit evidence obtained in prior audits, the auditor should test the operating effectiveness of *some* controls each audit. However, when the auditor is testing controls for only one or two key classes of transactions in an entity, rotating the testing of these controls may not be warranted.

Determining the Extent of Tests of Controls

.44 The extent of the auditor's tests of controls affects the sufficiency of the audit evidence obtained to support the auditor's assessment of the operating effectiveness of controls. To reduce the extent of substantive procedures in an audit, the tests of controls performed by the auditor need to be sufficient to determine the operating effectiveness of the controls

- at the relevant assertion level and
- either throughout the period, or as of the point in time when the auditor plans to rely on the control.

.45 Factors the auditor may consider in determining the extent of tests of controls include the following:

- The frequency of the performance of the control by the entity during the period.
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control.
- The relevance and reliability of the audit evidence to be obtained in supporting that the control prevents, or detects and corrects, material misstatements at the relevant assertion level.
- The extent to which audit evidence is obtained from tests of other controls that meet the same audit objective.
- The extent to which the auditor plans to rely on the operating effectiveness of the control in the assessment of risk (and thereby reduce substantive procedures based on the reliance of such control). The more the auditor relies on the operating effectiveness of controls in the assessment of risk, the greater is the extent of the auditor's tests of controls.
- The expected deviation from the control.

Sampling Considerations

.46 The auditor should consider using an audit sampling technique to determine the extent of tests whenever the control is applied on a transaction basis (for example, matching approved purchase orders to supplier invoices) and that it is applied frequently. When a control is applied periodically (for example, monthly reconciliations of accounts receivable subsidiary ledger to the general ledger), the auditor should consider guidance appropriate for testing smaller populations (for example, testing the control application for two months and reviewing evidence the control operated in other months or reviewing other months for unusual items). AU section 350, *Audit Sampling* (AICPA, *Professional Standards*), and the AICPA Audit Guide *Audit Sampling* provide further guidance on the application of sampling techniques to determine the extent of testing of controls. The AICPA Audit Guide *Audit Sampling* also provides guidance for testing in smaller populations.

.47 The auditor should consider the expected deviation from the control when determining the extent of tests. As the rate of expected deviation from a control increases, the auditor should increase the extent of testing of the control. However, if the rate of expected deviation is expected to be too high, the auditor may determine that tests of controls for a particular assertion may not be effective. In this case, the auditor may conclude that a deficiency in internal control exists and the auditor should consider its severity and whether it should be communicated to those charged with governance, management, or both.

Extent of Testing IT Controls

.48 Generally, IT processing is inherently consistent. An automated control should function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Therefore, the auditor may be able to limit the testing of an IT application control to one or a few instances of the control operation, provided that the auditor determines that related IT general controls operated effectively during the period of reliance.

Assessing the Operating Effectiveness of Controls

Evidence About Operating Effectiveness

.49 The concept of effectiveness of the operation of controls recognizes that some deviations in the way a client applies the controls may occur. Deviations from prescribed controls may be caused by factors such as changes in key personnel, significant seasonal fluctuations in volume of transactions, and human error.

.50 When the auditor encounters deviations in the operation of controls, those deviations will have an effect on the auditor's assessment of operating effectiveness. A control with an observed nonnegligible deviation rate is not an effective control. For example, if a test is designed in which the auditor selects a sample of, say, 25 items and expects no deviations, the finding of 1 deviation would be considered a nonnegligible deviation because, based on the results of the test of the sample, the desired level of confidence has not been obtained.

.51 There are sources of audit evidence beyond the auditor's tests of controls that contribute to the auditor's assessment of the operating effectiveness of controls. The extent of misstatements detected by performing substantive procedures also may alter the auditor's judgment about the effectiveness of controls in a negative direction. However, misstatement-free results of substantive tests do not indicate that a lower assessment of control risk may be substituted for the one supported by the procedures the auditor used to assess control risk.

Investigating Additional Implications of Identified Deviations

.52 When the auditor detects control deviations during the performance of tests of controls, the auditor should make specific inquiries to understand these matters and their potential consequences, for example, by inquiring about the timing of personnel changes in key internal control functions.

.53 Deviations in the application of control activities may be caused by the ineffective operation of indirect controls such as IT general controls, the control environment, or other components of internal control. To gain an understanding of the deviations in control, the auditor may wish to make inquires and perform other tests to identify possible weaknesses in the control environment or other indirect controls.

.54 For example, suppose that one of the client's primary controls related to the existence of inventory—periodic test counts—had several instances where the number of items counted by the count teams did not agree to the actual physical count of the items on hand. When gaining a further understanding of the nature of these deviations, the auditor determines that the underlying cause is poor training of the test count teams and a lack of written instructions. Training and written instructions are indirect controls that may affect the operating effectiveness of controls other than those related to existence. For example, the lack of training and instruction could result in the count teams reporting the wrong product number or description, which also could affect the valuation of inventory. This finding could cause the company and auditor to conclude that a recount is necessary once the teams are properly trained.

Assessing Effectiveness

.55 After considering the results of tests of controls and any misstatements detected from the performance of substantive procedures, the auditor should determine whether the audit evidence obtained provides an

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

appropriate basis for reliance on the controls. If the reliance on the controls is not warranted, the auditor should determine whether

- additional tests of controls are necessary or
- if the potential risks of misstatement will be addressed using substantive procedures.

Once the auditor has concluded that reliance on certain controls is not warranted, it is unnecessary to perform further tests of those controls.

Deficiencies in the Operation of Controls

.56 The auditor may consider whether deviations in the operation of controls have been caused by an underlying deficiency in internal control. When evaluating the reason for a control deviation, the auditor may consider the following:

- Whether the control is automated (in the presence of effective information technology general controls, an automated application control is expected to perform as designed)
- The degree of intervention by entity personnel contributing to the deviation (for example, was the deviation evidence of a possible override)
- Management's actions in response to the matter (if management was aware of the deviation)

.57 Regardless of the reason for the deviation, numerous or repeated instances of the deviation may constitute a significant deficiency or material weakness.

.58 The following are examples of circumstances that may be deficiencies in internal control of some magnitude:

- Failure in the operation of properly designed controls within a significant account or process, for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process.
- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy (for example, the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements).
- Failure of controls designed to safeguard assets from loss, damage, or misappropriation. For example, a company uses security devices to safeguard its inventory (preventive controls) and also performs periodic physical inventory counts (detective control) timely in relation to its financial reporting. However, a preventive control failure may be mitigated by an effective detective control that prevents the misstatement of the financial statements. Suppose the inventory security control fails. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement to the financial statements if performed effectively and timely (near or at the reporting date). In the absence of a timely count, a deficient preventive control may be a deficiency in internal control of some magnitude.
- Failure to perform reconciliations of significant accounts, for example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner.
- Undue bias or lack of objectivity by those responsible for accounting decisions, for example, consistent under accruals of expenses or overstatement of allowances at the direction of management.
- Misrepresentation by client personnel to the auditor (an indicator of fraud).
- Management override of controls that would enable the entity to prepare financial statements in accordance with generally accepted accounting principles.
- Failure of an application control caused by a deficiency in the design or operation of an IT general control.

- An observed deviation rate that exceeds the number of deviations that the auditor expected in a test of the operating effectiveness of a control. For example, if the auditor designed a test in which he or she selected a sample and expected no deviations, the finding of one deviation is a nonnegligible deviation rate because, based on the results of the auditor's test of the sample, the desired level of confidence was not obtained.

Documentation

.60 In regards to the performance of further audit procedures, the auditor should document the following:

- The overall responses to address the assessed risks of misstatement at the financial statement level
- The nature, timing, and extent of the further audit procedures
- The linkage of those procedures with the assessed risks at the relevant assertion level
- The results of the audit procedures
- The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor's professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

AAM Section 5300

Performing Substantive Procedures

.01 The objective of substantive procedures is to detect individual misstatements that alone or in the aggregate cause material misstatements at the assertion level. Substantive procedures include the following:

- Tests of details of transactions, account balances, and disclosures.
- Analytical procedures. AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*), establishes standards and provides guidance on the application of analytical procedures as substantive tests.

.02 The auditor should plan and perform substantive procedures to be responsive to the related assessed risks of material misstatement. However, the auditor should perform certain tests regardless of the risk assessment because the risk assessment may not identify all risks.

- *Substantive tests of material items*. The auditor should perform substantive procedures for all relevant assertions for each material class of transactions, account balance, and disclosure. For example, if the auditor determines that long term debt is a material account, the auditor should perform substantive tests for all assertions that are relevant to long term debt, even if the auditor has determined that it is unlikely that the assertion could contain a material misstatement. The auditor may determine that the risk of the entity not having the obligation to repay the debt (the obligation assertion) is low, but nevertheless, the auditor should perform a substantive procedure (for example, confirming the terms of the debt with the lender) to address the risk. Because the account is material, the auditor is precluded from relying solely on risk assessment procedures or tests of controls to support the conclusion.
- *Substantive tests related to the financial statement reporting system*. On all engagements the auditor should
  - — agree the financial statements, including their accompanying notes, to the underlying accounting records and
  - — examine material journal entries and other adjustments made during the course of preparing the financial statements. The nature and extent of the auditor's examination of journal entries and other adjustments depend on the nature and complexity of the client's financial reporting system and the associated risks of material misstatement.

.03 When, in accordance with paragraph .110 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, the auditor should perform substantive procedures that are specifically responsive to that risk. When the audit approach to significant risks consists only of substantive procedures, the audit procedures appropriate to address such significant risks consist of

- tests of details only.
- a combination of tests of details and analytical procedures.

That is, to address significant risks, it is unlikely that audit evidence obtained solely from substantive analytical procedures will be sufficient.

Nature of Substantive Procedures

.04 Substantive procedures include tests of details and substantive analytical procedures. Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. Tests of details are ordinarily more appropriate to obtain audit evidence regarding certain relevant assertions about account balances, including existence and valuation.

.05 The auditor should plan substantive procedures to be responsive to the planned level of detection risk. In some situations, the auditor may determine that performing only substantive analytical procedures may be sufficient to reduce the planned level of detection risk to an acceptably low level. For example, the auditor may determine that performing only substantive analytical procedures is responsive to the planned level of detection risk for an individual class of transactions where the auditor's assessment of risk has been reduced by obtaining audit evidence from performance of tests of the operating effectiveness of controls. In other situations, the auditor may determine that tests of details only are appropriate, or that a combination of substantive analytical procedures and tests of details is most responsive to the assessed risks. The auditor's determination as to the substantive procedures that are most responsive to the planned level of detection risk is affected by whether the auditor has obtained audit evidence about the operating effectiveness of controls.

Tests of Details

.06 The auditor should design tests of details responsive to the assessed risk with the objective of obtaining sufficient appropriate audit evidence to achieve the planned level of assurance at the relevant assertion level. In designing substantive procedures related to the existence or occurrence assertion, the auditor should select from items contained in a financial statement amount and should obtain the relevant audit evidence. On the other hand, in designing audit procedures related to the completeness assertion, the auditor should select from audit evidence indicating that an item should be included in the relevant financial statement amount and should investigate whether that item is so included. The knowledge gained when understanding the business and its environment should be helpful in selecting the nature, timing, and extent of audit procedures related to the completeness assertion. For example, the auditor might inspect subsequent cash disbursements and compare them with the recorded accounts payable to determine whether any purchases had been omitted from accounts payable.

Substantive Analytical Procedures

.07 In designing substantive analytical procedures, the auditor should consider such matters as the following:

- The suitability of using substantive analytical procedures, given the assertions. Analytical procedures may not be suitable for all assertions. For example, transactions subject to management discretion (such as a decision to delay advertising expenses) may lack the predictability between periods or financial statement accounts that is necessary to perform and effective analytical procedure.
- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed. To assess the reliability of the data used in a substantive analytical procedure, the auditor may consider its source and the conditions under which it was gathered.
- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance. The precision of the auditor's expectation depends on (among other things)
    - — the identification and consideration of factors that significantly affect the amount being audited (for example, contributions to an employee 401(k) plan depends on compensation expense and the percentage of the employer contribution committed to by management).
    - — the level of data used to develop the expectation. Typically, expectations developed at a detailed level have a greater chance of detecting a material misstatement than do broad comparisons.

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

- The amount of any difference in recorded amounts from expected values that is acceptable. The smaller the difference between the expected amount and the recorded amount that can be accepted, the more precise the expectation will typically be.
- The risk of management override of controls. Management override of controls might result in adjustments to the financial statements outside of the normal financial reporting process, which may result in artificial changes to the financial statement relationships being analyzed. These artificial relationships may result in the auditor drawing erroneous conclusions about the substantive analytical procedures.

Paragraphs .57–.67 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*), direct the auditor to perform certain procedures to assess the risk of management override of controls.

.08 Paragraphs .09–.21 of AU section 329 establishes standards and provides additional guidance on the design of substantive analytical procedures.

Timing of Substantive Procedures

Substantive Procedures Performed at an Interim Date

.09 In some circumstances, the auditor may choose to perform substantive procedures at an interim date. When the auditor performs procedures as of a date in advance of year end, the risk that the auditor will fail to detect a material misstatement that may exist at year end is increased. This risk increases as the length of the period between interim tests and year end increases. The following table summarizes factors that may be considered when determining whether to perform substantive procedures at an interim date.

Matters to Consider in Determining Whether to Perform Substantive Procedures at an Interim Date

	Likelihood of Performing Substantive Procedures at an Interim Date	
Factor to consider	*More likely*	*Less likely*
Control environment and other relevant controls	Effectively designed or operating controls, including the control environment	Ineffectively designed or operating controls, including the control environment
The availability of information for the remaining period	Information is available that will allow the auditor to perform procedures related to the remaining period	Lack of information necessary to perform procedures related to the remaining period
Assessed risk	Lower risk of material misstatement for the relevant assertion	Higher risk of material misstatement for the relevant assertion
Nature of transactions or account balances and relevant assertions	Year-end balances are reasonably predictable with respect to amount, relative significance, and composition	Year-end balances can fluctuate significantly from interim balances, for example, due to rapidly changing business conditions, seasonality of business, or transactions that are subject to management's discretion
Ability to perform audit procedures to cover remaining period	The auditor will be able to perform all necessary procedures to cover the remaining period	The auditor's ability to perform procedures relating to the remaining period is limited, for example, by a lack of available information

.10 The objective of some of the tests may make the results of the tests irrelevant if performed at an interim date. For example, tests related to the preparation of the financial statements or the client's compliance with debt covenants typically provide relevant audit evidence only if performed at the period end.

.11 In addition to those items described in the preceding table, the circumstances of the engagement may result in the performance of certain tests at an interim date. For example, a client may request that the auditor identify all material misstatements a short period of time after year end (which is common for companies that plan to issue a press release of their earnings for the period). In that situation, the auditor may decide to confirm receivables prior to year end because the time period between the end of the period and the release of earnings is too short to allow the auditor to send and receive confirmations of customers and to complete the test work.

.12 The auditor's ability to perform audit procedures relating to the remaining period depends a great deal on whether the client's accounting system is able to provide the information needed for the auditor to perform his or her procedures. The auditor should consider whether that information is sufficient to permit investigation of the following:

- Significant unusual transactions or entries (including those at or near the period end)
- Other causes of significant fluctuations or fluctuations that did not occur
- Changes in the composition of the classes of transactions or account balances

.13 The timing of audit procedures also involves consideration of whether related audit procedures are coordinated properly. This consideration includes, for example, the following:

- Coordinating the audit procedures applied to related party transactions and balances
- Coordinating the testing of interrelated accounts and accounting cutoffs
- Maintaining temporary audit control over assets that are readily negotiable and simultaneously testing such assets and cash on hand and in banks, bank loans, and other related items

.14 When performing substantive procedures at an interim date, the auditor should perform substantive procedures or substantive procedures combined with tests of controls to cover the remaining period that provide a reasonable basis for extending audit conclusions from the interim date to the period end.

.15 When performing substantive procedures at an interim date, the auditor may reconcile the account balance at the interim date to the balance in the same account at year end. The reconciliation will allow the auditor to

- identify amounts that appear unusual,
- investigate these amounts, and
- define the appropriate population to perform substantive analytical procedures or tests of details to test the remaining period.

.16 If misstatements are detected in classes of transactions or account balances at an interim date, the auditor should consider modifying the related assessment of risk and the planned nature, timing, or extent of the substantive procedures covering the remaining period that relate to such classes of transactions or account balances, or the auditor may extend or may repeat such audit procedures at the period end.

Substantive Procedures Performed in Previous Audits

.17 In most cases, audit evidence from substantive procedures performed in a prior audit provides little or no audit evidence for the current period. To use audit evidence obtained during a prior period in the current period audit, both the audit evidence and the related subject matter must not fundamentally change. For example, a legal opinion would continue to be relevant audit evidence if it were received in a prior period related to the structure of a securitization transaction and no changes have occurred during the current period.

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

If the auditor plans to use audit evidence from a prior period in the current audit, the auditor should perform audit procedures during the current period to establish the continuing relevance of the audit evidence.

Extent of the Performance of Substantive Procedures

.18 The greater the risks of material misstatement, the greater the extent of the auditor's substantive procedures. However, the nature of the audit procedures is of most importance in responding to assessed risks. Increasing the extent of an audit procedure is appropriate only if the procedure itself is relevant to the specified risk.

.19 *Considerations for designing tests of details.* When determining the extent of the tests of details, the auditor ordinarily thinks in terms of sample size. However, the auditor also may consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population, rather than performing sampling or stratifying the population into homogeneous subpopulations for sampling. AU section 350, *Audit Sampling* (AICPA, *Professional Standards*), and the AICPA Audit Guide *Audit Sampling*, provide guidance on the use of sampling and other means of selecting items for testing.

Adequacy of Presentation and Disclosure

.20 The auditor should perform audit procedures to evaluate whether the overall presentation of the financial statements, including the related disclosures, are in accordance with generally accepted accounting principles (GAAP). The auditor should consider whether the individual financial statements are presented in a manner that reflects the appropriate classification and description of financial information. The presentation of financial statements in conformity with GAAP also includes adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their related notes, including, for example, the terminology used, the amount of detail given, the classification of items in the financial statements, and the bases of amounts set forth. The auditor should consider whether management should have disclosed a particular matter in light of the circumstances and facts of which the auditor is aware at the time. In performing the evaluation of the overall presentation of the financial statements, including the related disclosures, the auditor should consider the assessed risk of material misstatement at the relevant assertion level. See paragraph .15 of AU section 326, *Audit Evidence* (AICPA, *Professional Standards*), for a description of the relevant assertions related to presentation and disclosure.

Documentation

.21 In regards to the performance of further audit procedures, the auditor should document the following:

- The overall responses to address the assessed risks of misstatement at the financial statement level
- The nature, timing, and extent of the further audit procedures
- The linkage of those procedures with the assessed risks at the relevant assertion level
- The results of the audit procedures
- The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor's professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[*The next page is 5401.*]

AAM Section 5400

Audit Sampling Considerations

.01 Once an auditor decides what audit procedures to apply (the nature of the tests) and when to apply them (the timing of the tests), the next decision to be made is to determine how many items to apply which procedures to—that is, the extent of testing. The greater the risks of material misstatement, the less detection risk that can be accepted, and, consequently, the greater the extent of substantive procedures. Because the risks of material misstatement include consideration of the effectiveness of internal control, the extent of substantive procedures may be reduced by satisfactory results from tests of the operating effectiveness of controls. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk.

.02 In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size, which is affected by the planned level of detection risk, tolerable misstatement, expected misstatement, and nature of the population. However, the auditor should also consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population as opposed to performing sampling or stratifying the population into homogeneous subpopulations for sampling.

Authoritative Standards

.03 AU section 350, *Audit Sampling* (AICPA, *Professional Standards*), addresses a variety of issues relating to the auditor's use of sampling in an audit engagement. However, AU section 350 does not always apply when the auditor is examining less than 100 percent of a population. The AICPA Audit Guide *Audit Sampling* presents recommendations on the application of generally accepted auditing standards to audits involving the use of audit sampling methods, and provides guidance to help auditors apply audit sampling in accordance with AU section 350.

When AU Section 350 Applies

.04 Audit sampling is only one of many tools used by auditors to obtain sufficient, appropriate audit evidence to support an opinion on financial statements. AU section 350 discusses design, selection, and evaluation considerations to be applied by the auditor when using audit sampling. As a general rule, audit sampling can be used

- in tests of controls in internal control to evaluate operating effectiveness from prescribed controls,
- in substantive tests of details of account balances and classes of transactions, and
- in dual purpose tests that assess control risk and test whether the monetary amount of a transaction is correct.

.05 The portion of AU section 350 pertaining to tests of controls applies when sampling techniques are used to assess control risk. The portion pertaining to substantive tests apply when sampling techniques are used to test details of transactions or balances.

.06 According to AU section 350, sampling occurs when the auditor tests less than 100 percent of a population for the purpose of evaluating some characteristic of an account balance or class of transactions. AU section 350 applies to tests of controls when such tests are performed and to tests of balances when sampling populations are material. The extent to which sampling is used in an audit depends on the size of the client and the nature of the client's internal control. Also, if the sampling populations are small, it could be more efficient to audit individually significant items and obtain audit assurance about the remaining

balance through analytical procedures than to perform audit sampling. As the size and sophistication of the client's internal control increases, the auditor is more likely to use audit sampling to perform tests of controls and tests of balances.

.07 In determining whether AU section 350 is applicable to circumstances in which an auditor examines less than 100 percent of the items making up an account balance or class of transactions, the auditor should consider the purpose of the test. AU section 350 establishes standards and provides guidance when the auditor intends to project the test results to the entire account balance or class of transactions for the purpose of evaluating a characteristic of the balance or class. For example, if the auditor intends to examine selected sales invoices to draw a conclusion about whether sales are overstated, audit sampling as described in AU section 350 is applied because the auditor intends to draw a conclusion about all sales. On the other hand, if the auditor selects several large sales invoices for certain audit tests and then applies analytical procedures to assess the accuracy and valuation of the remaining invoices, the auditor is not sampling according to AU section 350—the examination of the large items is not intended to lead the auditor to a conclusion about the other items. In that case, any conclusion about whether sales are overstated is based on the results of the test of large sales invoices, inquiry and observations, analytical procedures, and other auditing procedures performed on the smaller items related to overstatement of sales. However, in practice, it is difficult to attain high assurance regarding a significant aggregate amount of smaller items in the population from procedures other than sampling, such as analytical tests.

.08 The way in which the population is defined can determine whether the requirements of AU section 350 apply. The auditor might choose to divide a single reporting line on the financial statements into several populations. For example, accounts receivable might be divided into wholesale receivables, retail receivables, and employee receivables. Each of these populations can be tested using a different audit strategy—some using audit sampling and others not. The sampling concepts in AU section 350 apply only to populations for which audit sampling is used. Use of audit sampling on one population does not mandate its use on remaining populations.

Authoritative Guidance About the Application of Audit Sampling to Substantive Tests Provided by AU Section 350

.09 AU section 350 contains the following provisions regarding sampling in connection with substantive testing:

- The concept that some items exist which, in the auditor's judgment, acceptance of some sampling risk is not justified, and therefore should be examined 100 percent (see paragraph .21 of AU section 350). This simply reminds the auditor that some of the items encountered in an examination of financial statements may be so significant individually or may have such a high likelihood of being in error or misstated that *all* such items should be examined.
- The suggestion that the efficiency of a sample may be improved by separating items subject to sampling into relatively homogeneous groups based on some characteristic (see paragraph .22 of AU section 350). This indicates that audit efficiency can sometimes be improved by, for example, stratifying or segregating the items constituting a balance or class of transactions into groups based on individual dollar value or some other characteristic.
- Paragraph .18 of AU section 350 establishes a requirement that the auditor considers tolerable misstatement in planning audit sampling applications in the examination of account balances and classes of transactions. The auditor should consider, in the early stages of an audit, how much misstatement the auditor will be able to tolerate for each balance and class of transactions that is sampled, in combination with misstatements in other accounts, and still render an unqualified opinion on the financial statements. According to AU section 350, the auditor should consider tolerable misstatement and to recognize that it is one of the factors influencing sample size.
- Paragraph .24 of AU section 350 establishes a requirement that the auditor selects a sample that can be expected to be representative of the population. Simply put, this means that each item in the population being sampled should have *a chance* of being selected, not necessarily *an equal chance* of

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

being selected. This does not mean that the auditor should use a random or probability sample, but that he or she should use a method that avoids bias (for example, selecting only simple transactions for testing).

- Paragraph .25 of AU section 350 establishes a requirement that the auditor considers selected sample items to which the auditor is unable to apply planned audit procedures to determine their effect on the evaluation of the sample. For example, sometimes the auditor may not be able to apply planned audit procedures to selected sample items because the entity may not be able to locate supporting documentation. If the auditor's evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it is not necessary to examine the items. However, if considering those unexamined items to be misstated would lead to a conclusion that the balance or class contains material misstatement, the auditor should consider alternative audit procedures that would provide sufficient appropriate audit evidence to form a conclusion.
- Paragraph .26 of AU section 350 establishes a requirement that the auditor projects the misstatement results of the sample to the items from which the sample was selected. Because the sample is expected to be representative of the population from which it was selected, misstatements found are also expected to be representative of the population. The auditor should measure the likely misstatement in the population from which the sample was drawn and to consider it in reaching his or her conclusions.
- Paragraph .30 of AU section 350 establishes a requirement that the auditor considers, in the aggregate, projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications, along with other relevant audit evidence, when evaluating whether the financial statements taken as a whole may be materially misstated.

Documentation Requirements

.10 AU section 350 contains no specific documentation requirements. However, the documentation standards set forth in the Statements on Auditing Standards dealing with documentation apply to audit sampling applications just as they apply to other auditing procedures. AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*), states that the auditor must develop an audit plan in which the auditor documents the audit procedures, and AU section 339, *Audit Documentation* (AICPA, *Professional Standards*), states that audit documentation of tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include an identification of the items tested. The identification of the items tested may be satisfied by indicating the source from which the items were selected and the specific selection criteria, for example:

- when a haphazard or random sample is selected, the documentation should include identifying characteristics (for example, the specific invoice numbers of the items included in the sample);
- when all items over a specified dollar amount are selected from a listing, the documentation need describe only the scope and the identification of the listing (for example, all invoices over $25,000 from the December sales journal); and
- when a systematic sample is selected from a population of documents, the documentation need only provide an identification of the source of the documents and an indication of the starting point and the sampling interval (for example, a systematic sample of shipping reports was selected from the shipping log for the period from X to Y, starting with report number 14564 and selecting every 250th report from that point).

With regard to audit sampling applications, the audit program might document such items as the objectives of the sampling application and the audit procedures related to those objectives. Examples of items that the auditor may document for tests of controls are discussed in paragraph .25 of this section. Examples of items that the auditor typically documents for substantive tests are discussed in paragraph .55 of this section.

Determining Extent of Testing Without Sampling in a Small Business Audit[1]

.11 Small businesses have certain characteristics that may influence the auditor's decision to use audit sampling.

.12 For substantive testing, small businesses frequently have small populations of accounting data in both account balances and classes of transactions. Consequently, sampling may not be necessary when the necessary audit assurance is attained by examining a significant portion or aggregate value of all the transactions.

.13 Paragraph .01 of AU section 350 defines *audit sampling* as the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class. This definition allows some alternative approaches to sampling to determine the extent of testing in a small business engagement. These alternatives, by not using audit sampling and thus eliminating the requirements of AU section 350, may provide a more effective and efficient audit approach for a small business engagement.

.14 These alternative approaches include the following:

- Procedures applied to 100 percent of a certain group (strata) of transactions or balances
- Testing unusual items without applying procedures to the remainder of the population
- Other tests that involve application of procedures to less than 100 percent of the items in the population without drawing a conclusion about the entire account or class of transactions

.15 The auditor should decide what audit procedures to perform to meet the established audit objectives. Once this decision is made, the auditor needs to determine the extent of testing.

.16 An effective and efficient approach to determining the extent of testing in a small business engagement is shown in flowchart 1. This approach involves four important steps.

Identification of Individual Items to Be Examined

.17 The auditor is required to apply professional judgment in determining which individual items in an account balance or class of transactions need to be examined. In evaluating individual items, the auditor should consider factors such as the size of the item, whether the item is unusual, prior experience with the client, and whether the item involves a related party.

.18 For example, consider the following information for accounts receivable of a small business.

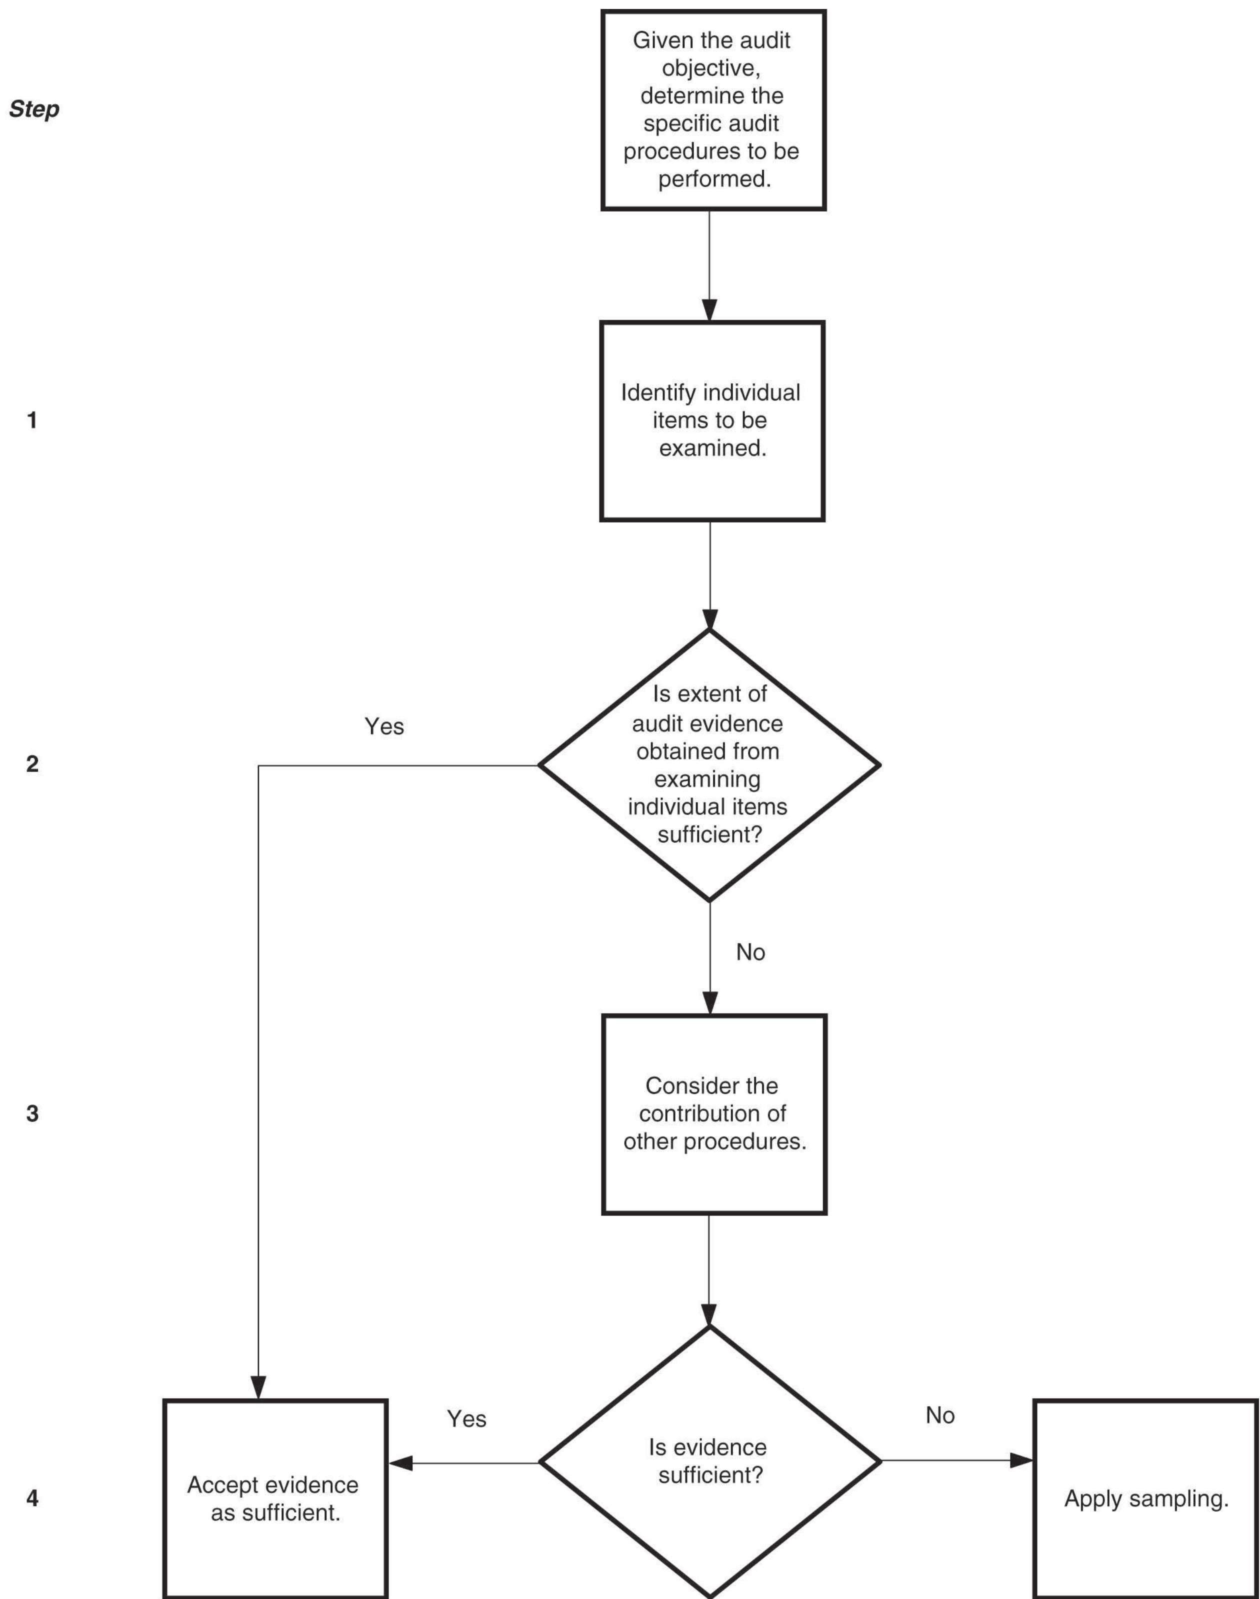
Number of Accounts	*Balances*	*Total Accounts*
4	$100,000 or more	$ 625,000
7	$25,000–99,999	375,000
62	$1–24,999	300,000
73		$1,300,000

In this case, if the 11 largest accounts are confirmed by the auditor, most of the accounts receivable balance is supported ($1,000,000 out of $1,300,000, or 77 percent). Provided the remaining $300,000 is not greater than tolerable misstatement or can be tested through other audit procedures, it may not be necessary to design a sample of the remaining items. Also, the auditor may decide to confirm the receivables that have unusual characteristics (for example, receivables with either large credit balances or those that are very delinquent).

[1] The concepts discussed in this section can also be applied to certain less complex account balances and classes of transactions in more complex entities.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Flowchart 1
A Small Business Audit Sampling Approach



Is Extent of Audit Evidence Obtained Sufficient?

.19 The following are some factors in evaluating the sufficiency of audit evidence obtained in tests of details for a particular account balance or class of transactions:

- The individual importance of the items examined. If the items examined, account for a high percentage of the total population, then the auditor may be reasonably assured that there is an acceptably low risk of an undetected misstatement.
- The nature and cause of misstatements. If during the course of the audit, misstatements are discovered, those misstatements should be evaluated to determine if they are due to differences in principle or in application, are errors or fraud or are due to misunderstanding of instructions or carelessness.
- Possible relationship of the misstatement to other phases of the audit. If it is determined that the misstatement is due to fraud, this would ordinarily require a broader consideration of the possible implications than would the discovery of an error.
- The characteristics of the sample to the population. The auditor may obtain some knowledge of the types of items in the population if the characteristics in the sample are similar in nature and the same controls are followed for processing the transactions.

Consider Contribution of Other Procedures

.20 The auditor may also consider whether other evidence obtained contributes to conclusions regarding the account balance or class of transactions. The auditor often considers the contribution of other procedures at the same time the extent of audit evidence obtained from examining individual items is considered.

.21 The auditor may use a combination of analytical procedures and substantive tests of details to support an opinion on the financial statements. In deciding whether other audit procedures make a contribution, the auditor may consider whether they support the audit objectives in the area, whether they indicate potential problems, and whether the evidence is consistent with the previous evidence obtained.

.22 In considering the contribution of other procedures, the auditor should use professional judgment in determining whether an unqualified opinion can be given without performing additional tests in the form of audit sampling.

Evaluation of Sufficiency of Evidence

.23 There are four factors that the auditor may consider in evaluating the sufficiency of audit evidence obtained from examining individual items and contributed by other procedures, and in determining whether the remaining items in the population should be tested.

.24 First, the auditor should consider whether the dollar amount of the remaining population is equal to or greater than an amount that would individually or in combination with other untested amounts be material to the financial statements. If the remaining population is less than material, the auditor may decide that no additional sampling is necessary, but may consider whether other procedures can provide sufficient assurance that any misstatement of the remaining population is not significant. Second, the auditor should consider the degree of risk involved (that is, how susceptible the account is to misstatement, and whether there have been problems with this area in prior audits). Third, the auditor should consider the sufficiency of all the audit evidence obtained so far (the extent of audit evidence obtained by testing individual items along with the contribution of other procedures). The final factor is the qualitative aspects of the misstatement. These include (*a*) the nature and cause of misstatements, such as whether there are differences in principle or in application, are errors or are caused by fraud, or are due to misunderstanding of instructions or to carelessness, and (*b*) the possible relationship of the misstatements to other phases of the audit. The discovery of fraud ordinarily requires a broader consideration of possible implications than does the discovery of an error.

Audit Sampling for Tests of Controls

.25 AU section 350 indicates that an auditor may use nonstatistical or statistical sampling in performing tests of controls. This section provides guidance for both approaches. Regardless of whether nonstatistical or statistical sampling is being used, audit sampling for tests of controls involves the following steps:

- *Determine the objective of the test*. The objective of tests of controls is to provide evidence about the operating effectiveness of controls. Audit sampling for tests of controls is generally appropriate when application of the control leaves documentary evidence of performance. Normally, audit sampling for tests of controls will involve selecting a sample of documents and examining them for evidence that the relevant controls were applied. Tests of controls involving observation of performance of procedures or inquiries of the client are not normally subject to audit sampling. As with any test, it should be related to a relevant assertion.
- *Define the deviation conditions*. A deviation condition is a situation that indicates that the controls were not performed. For example, if the auditor is examining purchase invoices for evidence of approval of an expenditure (for example, the initials of the approving individual), a deviation condition would be an invoice that is not initialed by the appropriate individual. Performance of a control consists of all the steps the auditor believes are necessary to support the assessed level of control risk. For example, assume that a prescribed control requires that support for every disbursement should include an invoice, a voucher, a receiving report, and a purchase order, all stamped "Paid." The auditor believes that the existence of an invoice and a receiving report, both stamped "Paid," is necessary to indicate adequate performance of the control for purposes of supporting the assessed level of control risk. Therefore, a deviation may be defined as "a disbursement not supported by an invoice and a receiving report that have been stamped 'Paid.'"
- *Define the population*. The population selected should be appropriate for the objective being tested. For example, if the auditor is testing the operating effectiveness of a prescribed control designed to ensure that all shipments were billed, the auditor would not detect deviations by sampling from billed items. An appropriate population for detecting such deviations usually includes the record of all items shipped.
- *Define the period covered by the test*. For samples to be representative of the period under audit, the population generally includes all transactions processed during the period. Often, auditors perform tests of controls during interim work. The auditor should determine what additional evidence needs to be obtained for the remaining period. Often, the auditor obtains the additional evidence by extending the test to the transactions occurring in the remaining period. However, it is not always efficient to include all transactions executed throughout the period under audit in the population to be sampled. In some cases, it might be more efficient to use alternative approaches to test the performance of the control during the remaining period. In these cases the auditor would define the population to include transactions for the period from the beginning of the year to an interim date and consider the following factors in determining what, if any, additional evidence needs to be obtained for the remaining period:
    - The significance of the assertion involved
    - The specific controls that were tested during the interim period
    - Any changes in controls from the interim period
    - The extent to which substantive tests were changed as a result of the controls
    - The results of the tests of controls performed during the interim period
    - The length of the remaining period
    - The audit evidence about design or operation of controls or substantive correctness of the balances or transactions in the interim period that may result from the substantive tests performed in the remaining period
    - The relevance and effectiveness of information technology general controls

The auditor selects sampling units from a physical representation of the population. For example, if the auditor defines the population as all customer receivable balances as of a specific date, the physical representation might be a printout of the customer accounts receivable trial balance as of that date. Making selections from a controlled source minimizes differences between the physical representation and the population. The auditor should consider whether the physical representation includes the entire population. If the auditor reconciles the selected physical representation and the population and determines that the physical representation has omitted items in the population that should be included in the overall evaluation, the auditor should select a new physical representation or perform alternative procedures on the items excluded from the physical representation.

- *Define the sampling unit*. The sampling unit is defined in light of the control being tested. A sampling unit may be, for example, a document, an entry, or a line item, where examination of the sampling unit provides evidence of the operation of the control. An important efficiency consideration in selecting a sampling unit is the manner in which documents are filed and cross-referenced.
- *Determine the method of selecting the sample*. Any sample that is selected should be representative of the population (selected in an unbiased manner) and all items should have an opportunity to be selected. Random number selection is generally used when statistical sampling is being applied. When nonstatistical sampling is applied, random number sampling, systematic sampling, haphazard sampling, and block sampling are methods that might be used to obtain a representative sample. Methods of selecting samples are discussed beginning at paragraph .60 of this section.
- *Determine the sample size*. Sample sizes for tests of controls are affected by (*a*) the risk of assessing control risk too low, (*b*) the tolerable rate, (*c*) the expected population deviation rate, and (*d*) any effects of small population sizes.
- Guidance for determining sample size when performing nonstatistical sampling begins with paragraph .28 of this section. A description of statistical sampling begins with paragraph .31 of this section.
- *Perform the sampling plan*. Once the sample has been selected, the auditor should examine the selected items to determine whether they contain deviations from the prescribed control. If the auditor selects a voided item, and the auditor obtains reasonable assurance that the item has been properly voided and does not represent a deviation from the prescribed control, he or she should replace the voided item. If the auditor selects an unused item, he or she should obtain reasonable assurance that it actually represents an unused item, not a deviation from the control, and then replace the unused item. If the auditor is unable to examine a selected item because it cannot be located or for any other reason, and the auditor is unable to apply the planned audit procedures or appropriate alternative procedures to selected items, he or she should consider the selected items to be deviations from the controls for purposes of evaluating the sample. In addition, the auditor should consider the reasons for this limitation and the effect that such a limitation might have on his or her understanding of internal control and assessment of control risk.
- *Evaluate the sample results*. Guidance for evaluating nonstatistical sampling results begins with paragraph .30 of this section and guidance for evaluating statistical sampling results begins with paragraph .32 of this section.
- *Document the sampling procedure*. Examples of items that the auditor typically documents for tests of controls include the following:
  - A description of the control being tested. The control objectives related to the sampling application, including the relevant assertions.
  - The definition of the population (the source from which the items were selected) and the sampling unit, including how the auditor considered the completeness of the population.
  - The definition of the deviation condition.

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- The acceptable risk of overreliance on controls (or desired confidence or assurance level), the tolerable deviation rate, and the expected population deviation rate used in the application.[2]
- The method of sample-size determination.
- The method of sample selection.
- The selected sample items.
- A description of how the sampling procedure was performed.
- The evaluation of the sample and the overall conclusion.

.26 *Factors Affecting Sample Sizes for Tests of Controls.* Sample sizes for tests of controls are affected by the following factors:

- *Acceptable risk of assessing control risk too low*. The risk of assessing control risk too low is the risk that the assessed level of control risk based on the sample is less than the true operating effectiveness of the control. Decreasing the risk of assessing control risk too low will increase the sample size.
- *Expected population deviation rate.* The expected population deviation rate is an anticipation of the deviation rate in the entire population. As the expected population deviation rate increases, the sample size will increase.
- *Tolerable rate.* Tolerable rate is the maximum rate (percentage) of deviation from a prescribed control that the auditor is willing to accept without altering the planned assessed level of control risk. Higher tolerable rates will permit smaller sample sizes.
- *Population size.* The size of the population has little or no effect on the determination of sample size except for very small populations. For example, it is generally appropriate to treat any population of more than 2,000 sampling units as if it were infinite. If the population size is under 2,000 sampling units, the population size may have a small effect on the calculation of the sample size.

.27 The effects of these factors on the appropriate nonstatistical sample size may be summarized as follows:

Factor	*General Effect on Sample Size*
Risk of assessing control risk too low— increase (decrease)	Smaller (larger)
Tolerable rate—increase (decrease)	Smaller (larger)
Expected population deviation rate— increase (decrease)	Larger (smaller)
Population size	Virtually no effect

.28 *Sample Sizes Using Nonstatistical Sampling.* The auditor using nonstatistical sampling for tests of controls uses his or her professional judgment to consider the factors described in paragraph .26 of this section in determining sample sizes.

.29 Paragraph .23 of AU section 350 states that to determine the number of items to be selected in a sample for a particular test of details, the auditor should consider the tolerable misstatement and the expected misstatement, the audit risk, the characteristics of the population, the assessed risks of material misstatement (inherent risk and control risk), and the assessed risk for other substantive procedures related to the same assertion. An auditor who applies statistical sampling uses tables or formulas to compute sample size based on these judgments. An auditor who applies nonstatistical sampling uses professional judgment to relate these factors in determining the appropriate sample size. Ordinarily, this would result in a sample size comparable

[2] In some instances, sample size inputs such as acceptable risk of overreliance, tolerable deviation rate, and expected deviation rate are built into firm-wide sample size tables. In these instances, reference to firm sample size guidance is sufficient (that is, each team does not need to document inputs that are implicit in the firm's sample size tables).

to the sample size resulting from an efficient and effectively designed statistical sample, considering the same sampling parameters.[3] It is important to note, however, that auditors are not required to specifically compute a statistical sample size. Nevertheless, auditors might find it helpful to be familiar with the tables in paragraphs .33–.36 of this section. Auditors using these tables as an aid in understanding relative sample sizes for tests of controls will need to apply professional judgment in reviewing the risk levels and expected population deviation rates in relation to sample sizes. Also, an auditor may decide to establish guidelines for sample sizes for tests of controls based on attribute sampling tables.

.30 After completing the examination of the sampling units and summarizing deviations from prescribed controls, the auditor evaluates the results.

- *Calculate the deviation rate*. Calculating the deviation rate in the sample involves dividing the number of observed deviations by the sample size.
- *Consider sampling risk*. When evaluating a sample for a test of controls, consideration may be given to sampling risk.
- *Consider the qualitative aspects of deviations*. In addition to evaluating the frequency of deviations from pertinent controls, the auditor should consider the qualitative aspects of the deviations.
- *Reach an overall conclusion*. The auditor uses professional judgment to reach an overall conclusion about the effect that the evaluation of the results will have on the assessed level of control risk and on the nature, timing and extent of planned substantive tests.

.31 *Sample Sizes Using Statistical Sampling*. The appropriate statistical method for tests of controls is *attributes sampling*, which is a technique designed to estimate qualitative characteristics of a population. Attributes sampling is most commonly used in auditing to test the rate of deviation from a prescribed control to support the auditor's assessed level of control risk.

.32 Applying attributes sampling involves performing the following steps:

a. *Decide on the attributes to test*. The tests of controls may include the testing of one or more attributes. Proper evaluation of the results may require testing and evaluating each attribute separately.

b. *Define the population from which the sample items should be selected*. The auditor should make sure that the population is appropriate for the audit objective as described in paragraph .25 of this section.

c. Specify the following factors:

i. *Acceptable risk of assessing control risk too low*. There is an inverse relationship between the risk of assessing control risk too low and sample size. If the auditor is willing to accept only a low risk of assessing control risk too low, the sample size would ordinarily be larger than if a higher risk were acceptable. When auditors seek high assurance from important controls, the risk is often set at 10 percent or less.

ii. *Tolerable rate*. Higher assessments of control risk will permit higher tolerable deviation rates. When auditors seek high assurance from important controls, the tolerable deviation rates are generally set at 10 percent or less.

iii. *Expected population deviation rate*. The auditor's expectations may be based on prior year's tests and the control environment. The prior year's results may be considered in light of changes in the entity's internal control and changes in personnel. Sample sizes will increase significantly as the expected population deviation rate increases from zero. If the deviation rate in the sample turns out to be higher than the rate specified by the auditor in determining the sample size, the sample results will not support the auditor's planned assessed level of control risk.

---

[3] This guidance does not suggest that the auditor using nonstatistical sampling compute a corresponding sample size using statistical theory.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

d. Determine the appropriate sample size. Example sample sizes are found in the tables in paragraphs .33–.34 of this section. The table in paragraph .33 is designed for a risk of assessing control risk too low of 5 percent, and the table in paragraph .34 is designed for a 10 percent risk of assessing control risk too low. With the tolerable rate and the expected population deviation rate, the auditor may find the sample size from the table. The numbers in parentheses are the number of deviations that may be found in the sample and still support the auditor's planned assessed level of control risk.

e. Randomly select the sample from the population. The section beginning at paragraph .60 of this section describes the methods that may be used to select a random sample.

f. Perform the audit procedures to identify deviations in the sample.

g. Calculate the statistical results. Using the tables in paragraphs .35–.36 of this section or the appropriate risk of assessing control risk too low, determine the actual tolerable deviation rate from the sample size and the actual number of deviations found in the sample.

h. Reassess the level of control risk. If the sample results, along with other relevant evidential matter, support the planned assessed level of control risk, the auditor generally does not need to modify planned substantive tests. If the planned assessed level of control risk is not supported, the auditor would ordinarily either perform tests of other controls that could support the planned assessed level of control risk or increase the assessed level of control risk.

i. Document the Sampling Procedures. AU section 350 and the AICPA Audit Guide *Audit Sampling* do not require specific documentation of audit sampling applications. See paragraph .10 of this section for certain documentation requirements of AU section 339. Examples of items that the auditor typically documents for tests of controls are discussed in paragraph .25 of this section. Auditors may also refer to the Audit Guide *Audit Sampling* for more information.

Note: This table presents upper limits (body of table) as percentages. This table assumes a large population.

Audit Sampling for Substantive Tests of Details

.37 The purpose of substantive tests of details of transactions and balances is to detect material misstatements in the account balance, transaction class, and disclosure components of the financial statements. An auditor assesses the risks of material misstatement and relies on a combination of further control tests, analytical procedures, and substantive tests of details for providing a basis for the opinion about whether the financial statements are materially misstated. When testing the details of an account balance or class of transactions, the auditor might use audit sampling to obtain evidence about the reasonableness of monetary amounts.

.38 The auditor uses professional judgment to determine whether audit sampling is appropriate. Sampling may not always be appropriate. For example, the auditor may decide that it is more efficient to test an account balance or class of transactions by applying analytical procedures.

.39 When an auditor plans any audit sampling application, the first consideration is the specific account balance or class of transactions and the circumstances in which the procedure is to be applied. The auditor generally identifies items or groups of items that are of individual significance to an audit objective and relevant assertion. For example, an auditor planning to use audit sampling as part of the tests of an inventory balance as well as observing the physical inventory would generally identify items that have significantly large balances or that might have other special characteristics.

.40 The auditor considers all special knowledge about the items constituting the balance or class before designing audit sampling procedures. For example, the auditor might identify 20 items that make up 25 percent of the account balance, and decide that those items should be examined 100 percent and excluded from inventory subject to audit sampling. Any items that the auditor has decided to test 100 percent are not part of the population subject to sampling.

.41 A population for audit sampling purposes does not necessarily need to be an entire account balance or class of transactions. In some circumstances, an auditor might examine all the items that constitute an account balance or class of transactions that exceed a given amount or that have an unusual characteristic; the auditor might either (*a*) apply other auditing procedures (for example, analytical procedures) to items that do not exceed a given amount or possess an unusual characteristic or (*b*) apply no auditing procedures to them because there are acceptably low risks of material misstatement existing in the remaining items.

.42 Once a decision has been made to use audit sampling, the auditor may choose between statistical and nonstatistical sampling. The choice is primarily a cost-benefit consideration. Statistical sampling uses the laws of probability to measure sampling risk. Any sampling procedure that does not measure the sampling risk is a nonstatistical sampling procedure.

.43 *Determining the test objectives*. A sampling plan for substantive tests of details might be designed to (*a*) test the reasonableness of one or more assertions about a financial statement amount (for example, the existence of accounts receivable) or (*b*) make an independent estimate of some amount (for example, the last in, first out [LIFO] index for a LIFO inventory). The auditor should carefully identify the characteristic of interest (for example, the misstatement) for the sampling application that is consistent with the audit objective.

.44 *Defining the population*. The population consists of the items constituting the account balance or class of transactions of interest. The auditor should determine that the population from which he or she selects the sample is appropriate for the specific audit objective because sample results can be projected only to the population from which the sample was selected.

.45 *Defining the sampling unit*. A sampling unit is any of the individual elements that constitute the population, and depends on the audit objective and the nature of the audit procedures to be applied. A

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

sampling unit might be a customer account balance, an individual transaction or an individual entry in a transaction. The auditor might consider which sampling unit leads to a more effective and efficient sampling application in the circumstances.

.46 *Choosing an audit sampling technique*. Either statistical or nonstatistical sampling is appropriate for substantive tests of details. The most common statistical approaches are classical variables sampling and monetary unit sampling.

.47 *Determining the method of selecting the sample*. The auditor should select the sample in such a way that the sample can be expected to be representative of the population or the stratum from which it is selected.

.48 *Determining the sample size*. Accounting populations tend to include a few very large amounts, a number of moderately large amounts, and a large number of small amounts. Auditors consider the variation in a characteristic when they determine an appropriate sample size for a substantive test, and, generally, the variation of the items' recorded amounts as a means of estimating the variation of the audited amounts of the items in the population. A measure of this variation, or scatter, is called the standard deviation. Sample sizes generally decrease as the variation becomes smaller. Sample sizes from unstratified populations with high variation are generally much larger than stratified samples from the same population.

.49 In performing substantive tests of details, auditors are also concerned with two aspects of sampling risk:

a. *Risk of incorrect acceptance*—the risk that the sample supports the conclusion that the recorded account balance is not materially misstated when it is materially misstated.

b. *Risk of incorrect rejection*—the risk that the sample supports the conclusion that the recorded amount is materially misstated when it is not. This risk is generally controlled by setting an adequate or conservative estimate of expected misstatement and increasing the sample size accordingly.

.50 When planning a sample for a substantive test of details, the auditor should consider how much monetary misstatement in the related account balance or class of transactions is acceptable without causing the financial statements to be materially misstated. The maximum monetary misstatement for the balance or class is called tolerable misstatement for the sample. For a particular account balance or class of transactions, the sample size required to achieve the auditor's objective at a given risk of incorrect acceptance increases as the auditor's assessment of tolerable misstatement for that balance or class decreases.

.51 The auditor also assesses the expected amount of misstatement on the basis of his or her professional judgment after considering such factors as the entity's business, the results of prior year's tests of account balances or class of transactions, the results of any pilot sample, the results of any related substantive tests, and the results of any tests of the related controls.

.52 The effect of population size on the appropriate sample size varies according to the audit sampling method used.

.53 *Performing the sampling plan*. The auditor should apply auditing procedures appropriate for the particular audit objectives to each sample item.

.54 *Evaluating the sample results*. In evaluating sample results, the auditor should do the following:

- Project the misstatements found in the sample to the population from which the sample was selected and add that amount to the misstatements discovered in any items examined 100 percent.
- Propose known misstatements to management for correction, unless the amounts are trivial.
- Compare the tolerable misstatement for the account balance or class of transactions with the total projected misstatement, adjusted for any corrected misstatements. If the total projected misstatement is less than tolerable misstatement for the account balance or class of transactions, the auditor should consider the risk that such a result might be obtained even though the true monetary misstatement

for the population exceeds the tolerable misstatement. In accordance with paragraph .30 of AU section 350, projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications should be considered in the aggregate along with other relevant audit evidence when the auditor evaluates whether the financial statements taken as a whole may be materially misstated.

- Consider the qualitative aspects of misstatements. If the sample results suggest that the auditor's planning assumptions were in error, appropriate action is taken.

.55 *Documenting the sampling procedure*. AU section 350 and the AICPA Audit Guide *Audit Sampling* do not require specific documentation of audit sampling applications. See paragraph .10 of this section for certain documentation requirements of AU section 339. Examples of items that the auditor may document for substantive tests include the following:

- The objectives of the test the accounts and assertions affected
- The definition of the population and the sampling unit, including how the auditor determined the completeness of the population
- The definition of a misstatement
- The risk of incorrect acceptance or level of desired assurance (confidence)
- The risk of incorrect rejection, if used
- Estimated and tolerable misstatement
- The audit sampling technique used
- The method used to determine sample size
- The method of sample selection
- Identification of the items selected
- A description of the performance of the sampling procedures and a list of misstatements identified in the sample
- The evaluation of the sample (for example, projection and consideration of sampling risk)
- A summary of the overall conclusion (if not evident from the results)
- Any qualitative factors considered significant in making the sampling assessments and judgments

.56 *Nonstatistical sampling for substantive tests of details*. Paragraph .23 of AU section 350 states that to determine the number of items to be selected in a sample for a particular test of details, the auditor should consider the tolerable misstatement and the expected misstatement, the audit risk, the characteristics of the population, the assessed risks of material misstatement (inherent risk and control risk), and the assessed risk for other substantive procedures related to the same assertion. An auditor who applies statistical sampling uses tables or formulas to compute sample size based on these judgments. An auditor who applies nonstatistical sampling uses professional judgment to relate these factors in determining the appropriate sample size. Ordinarily, this would result in a sample size comparable to the sample size resulting from an efficient and effectively designed statistical sample, considering the same sampling parameters.[4] It is important to note, however, that auditors are not required to specifically compute a statistical sample size. Nevertheless, auditors might find familiarity with sample sizes based on statistical theory helpful when applying professional judgment and experience in considering the effect of various planning considerations on sample size.

.57 The following table, "Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning," summarizes the effects of various factors on sample sizes for substantive tests of details. (The table

[4] This guidance does not suggest that the auditor using nonstatistical sampling compute a corresponding sample size using statistical theory.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

is provided only to illustrate the relative effect of different planning considerations on sample size and is not intended as a substitute for professional judgment).

Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning

	Conditions Leading to:		
Factors	*Smaller Sample Size*	*Larger Sample Size*	*Related Factor for Substantive Sample Planning*
a. Assessment of inherent risk	Low assessed level of inherent risk	High assessed level of inherent risk	Allowable risk of incorrect acceptance
b. Assessment of control risk	Low assessed level of control risk	High assessed level of control risk	Allowable risk of incorrect acceptance
c. Assessment of risk related to other substantive procedures directed at the same assertion (including substantive analytical procedures and other relevant substantive procedures)	Low assessment of risk associated with other relevant substantive procedures	High assessment of risk associated other relevant substantive procedures	Allowable risk of incorrect acceptance
d. Measure of tolerable misstatement for a specific account	Larger measure of tolerable misstatement	Smaller measure of tolerable misstatement	Tolerable misstatement
e. Expected size and frequency of misstatements, or the estimated variance of the population	Smaller misstatements or lower frequency, or smaller population variance	Larger misstatements, higher frequency, or larger population variance	Assessment of population characteristics
f. Number of items in the population	Virtually no effect on sample size unless population is very small		

.58 For additional details on audit sampling, including detailed tables, auditors may refer to AICPA Audit Guide *Audit Sampling* and the appendix of AU section 350.

.59 Stratification is particularly important to increasing the efficiency of the sample. If the nonstatistical sample design is planned without stratification, the auditor should increase the sample size. Before selecting the sample, the auditor generally identifies individually significant items and may then select the sample from the remaining items using the systematic selection method, which automatically stratifies the sample, or stratify the remaining items into groups and allocate the sample size accordingly.

.60 *Evaluating the sample results*. The misstatement in the sample should be projected to the items from which the sample was selected. One method of projecting the amount of misstatement found in a sample is to divide the amount of misstatement in the sample by the fraction of total dollars in the population included in the sample. For example, if a $100 misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $1,000 ($100 ÷ .10).

.61 A second method for projecting the misstatement uses the average difference between the audited and the recorded amounts of each item included in the sample. For example, if $200 of misstatement is found in a sample of 100 items, the average difference between audited and recorded amounts for items in the sample is $2 ($200 ÷ 100). An estimate of the amount of misstatement in the population may be calculated by multiplying the total number of items in the population (in this case 5,000 items) by the average difference of $2 for each sample item. The estimate of misstatement in the population is $10,000 (5,000 × 2).

Suggested Supplemental Reference Materials

.01 The following publications are useful in helping to determine the nature, timing, and extent of audit procedures. To order AICPA products, call 888.777.7077.

- **Audit and Accounting Guides (AICPA)**

  Each guide describes relevant matters, conditions, and procedures unique to a particular industry, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.

- **Audit Risk Alerts (AICPA)**

  Audit Risk Alerts complement the guidance provided in many of the Audit and Accounting Guides by describing current economic, regulatory, and professional developments that can have a significant impact on engagements.

- **Financial Reporting Alerts (AICPA)**

  Financial Reporting Alerts are useful for members of an entity's financial management, board members, and audit committee to identify and understand current accounting and regulatory developments affecting the entity's financial reporting.

- **Professional Standards (AICPA)**

  The publication features the outstanding pronouncements on professional standards issued by the AICPA, including standards for audits, compilations, and reviews.

- **Financial Statement Preparation Manual (AICPA)**

  This publication provides sample statements and checklists for a variety of business enterprises and governmental units.

- **Disclosure Checklist Series (AICPA)** (individual paperback versions of sections of the Financial Statement Preparation Manual)

  The practice aids are invaluable to anyone who prepares financial statements and reports. The material has been updated to reflect AICPA, Financial Accounting Standards Board, and Governmental Accounting Standards Board pronouncements and interpretations as well as Securities and Exchange Commission regulations.

- **Accounting Trends & Techniques (AICPA)**

  This publication contains reporting methods based on a cumulative survey, as well as significant accounting presentations, discussions, and trends of accounting principles generally accepted in the United States. By following the lead of these industry front-runners, practitioners can apply the latest techniques and improve their own reporting performance. Additional versions of this publication are also available for preparers of financial statements for not-for-profit entities and preparers of financial statements of international companies that are using International Financial Reporting Standards.

- **Fraud Detection in a GAAS Audit (Revised Edition) (AICPA)**

  This practice aid provides CPAs with the most recent information related to complying with AU section 316, Consideration of Fraud in a Financial Statement Audit *(AICPA,* Professional Standards*).*

- **Technical Practice Aids (AICPA)**

  This publication contains all outstanding AICPA Auditing and Attestation Statements of Position and Practice Alerts; Technical Questions and Answers issued by the AICPA on a variety of accounting, auditing, and industry topics; implementation guidance issued by the staff of the Public Company Accounting Oversight Board; and Trust

Services Principles, Criteria, and Illustrations; and offers carefully thought-out responses to selected inquiries received by the AICPA Technical Hotline and AICPA Technical and Industry Committees.

- **Standard Form to Confirm Account Balance Information with Financial Institutions (AICPA)**

This form may be used to request a full report on credit balance, liabilities, and contingent liabilities. It may also be used for a confirmation of bank balance only.

- **Accountants' Handbook by Carmichael, Lilien & Mellman (Wiley)**
- **Montgomery's Auditing by O'Reilly, Hirsch, Defliese, and Jaenicke (Wiley)**
- **Handbook of Modern Accounting by Davidson & Weil (McGraw-Hill)**
- **Kohler's Dictionary for Accountants by Coopers & Ijiri (Prentice-Hall)**

AAM Section 6100

Audit Documentation—General

.01 Audit documentation is the record of audit procedures performed, relevant audit evidence obtained, and conclusions reached by the auditor in the engagement. Audit documentation, also known as *working papers*, may be recorded on paper or on electronic or other media. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*), establishes standards and provides guidance on the form, general content, and ownership and confidentiality of audit documentation.

.02 Other Statements on Auditing Standards (SASs) contain specific documentation requirements and can be found in appendix A of AU section 339. Additionally, specific documentation or document retention requirements may be included in other standards (for example, government auditing standards), laws, and regulations applicable to the engagement.

.03 The auditor must prepare audit documentation in connection with each engagement in sufficient detail to provide a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached. Audit documentation provides the principal support for the representation in the auditor's report that the auditor performed the audit in accordance with generally accepted auditing standards and provides the principal support for the opinion expressed regarding the financial information or the assertion to the effect that an opinion cannot be expressed.

.04 Among other matters, AU section 339 provides the following:

- The auditor should prepare audit documentation in connection with each engagement in sufficient detail to provide an experienced auditor with no previous connection to the audit a clear understanding of the work performed (including the nature, timing, extent and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached.
- Oral explanations on their own do not represent sufficient support for the work the auditor performed or conclusions the auditor reached, but they may be used by the auditor to clarify or explain information contained in the audit documentation.
- The auditor should document significant findings or issues, actions taken to address them (including any additional evidence obtained), the basis for the final conclusions reached, and discussions of the significant findings or issues with management or others, including responses and when and with whom the discussion took place. If the auditor has identified information that contradicts or is inconsistent with the auditor's final conclusions regarding a significant finding or issue, the auditor should document how the auditor addressed the contradiction or inconsistency.
- The auditor should assemble the audit documentation to form the final audit engagement file on a timely basis but within 60 days following the report release date (also known as the *documentation completion date*). After this date, the auditor must not delete or discard audit documentation before the end of the specified retention period and should appropriately document any subsequent additions. (Paragraphs .23–.30 of AU section 339 establish standards and provide guidance regarding revisions to audit documentation after the date of the auditor's report.)

Audit Documentation Retention

.05 AU section 339 states that the auditor should adopt reasonable procedures to retain and access audit documentation for a period of time sufficient to meet the needs of his or her practice and to satisfy any applicable legal or regulatory requirements for records retention. Such retention period, however, should not

be shorter than 5 years from the report release date. Statutes, regulations, or the audit firm's quality control policies may specify a longer retention period.

.06 Determining the proper periods for retaining records is a major decision for practitioners. Records may be preserved for only as long as they serve a useful purpose or until all legal requirements are met. Record retention periods vary among firms; however, retention periods generally correspond with the longest statute of limitations prevailing in each state for breach of contract, breach of fiduciary duty, and professional liability claims.

.07 Audit documentation may be retained permanently or for periods corresponding with the longest state statute of limitations, as noted in the previous paragraph. Generally, certain audited financial statement working paper data, such as accounts receivable confirmations, are destroyed after 10 years. Examples of audit documentation that the auditor may wish to retain permanently include auditor's reports, reports filed with the Securities and Exchange Commission, tax returns for current clients, and audit documentation for current clients. Some firms divide the retention period into 2 parts, records are first filed in the office and later placed in storage (for example, 3 years in the office and then permanently in storage). Other records, such as audit documentation files for former clients, may be retained for 3 years in the office, 7 years in storage, and then destroyed after the retention period has ended. The auditor may obtain specific approval of the engagement partner before destroying any audit documentation. An annual schedule may be established for reviewing and purging firm data. Because there is substantial variation in the retention periods used by firms, each firm may carefully consider its requirements and consult with legal counsel before adopting a retention period.

.08 For further guidance on record retention, see the AICPA *Management of an Accounting Practice Handbook* (online subscription product no. MAP-XX) at www.cpa2biz.com. This product can also be obtained by calling the AICPA order department at 888.777.7077 and asking for product no. MAP-XX (online) or product no. 090407 (looseleaf).

Ownership and Confidentiality of Audit Documentation

.09 Audit documentation is the property of the auditor, and some states recognize this right of ownership in their statutes.

.10 The auditor has an ethical, and in some situations a legal, obligation to maintain the confidentiality of client information. Because audit documentation contains confidential client information, the auditor should adopt reasonable procedures to maintain the confidentiality of that information.

.11 Whether audit documentation is in paper, electronic, or other media, the integrity, accessibility, and retrievability of the underlying data may be compromised if the documentation could be altered, added to, or deleted without the auditor's knowledge or could be permanently lost or damaged. Accordingly, the auditor should apply appropriate and reasonable controls for audit documentation to

a. clearly determine when and by whom audit documentation was created, changed, or reviewed;

b. protect the integrity of the information at all stages of the audit, especially when the information is shared within the audit team or transmitted to other parties via electronic means;

c. prevent unauthorized changes to the documentation; and

d. allow access to the documentation by the audit team and other authorized parties as necessary to properly discharge their responsibilities.

Documentation of Departures From the SASs

.12 In rare circumstances when the auditor departs from a presumptively mandatory requirement in the SASs, he or she must document the justification for the departure and how the alternative procedures in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

General Discussion

.13 These sections present points of view on the organization and preparation of audit documentation.

.14 Proper planning is important in the design of specific audit documentation if the documentation is to serve the objective of aiding the auditor in the conduct of his or her work. For example, a well-planned working paper may be designed to provide information that will be needed later in the preparation of tax returns and other required reports, such as those to regulatory bodies, and may therefore eliminate the need for examining the same documents twice to obtain necessary information. The form, content, and extent of audit documentation are matters of the auditor's professional judgment and depend on the circumstances of the engagement and the audit methodology and tools used. The individual preferences of auditors and firms may be informal common practices or expressed as part of a firm's formal policies and procedures. A firm may consider the nature of its practice and the services commonly provided to its clients, in addition to professional standards, in developing its procedures and policies on audit documentation. Those procedures and policies may permit the flexibility necessary to meet the needs of individual engagements.

[*The next page is 6201.*]

AAM Section 6200

Form, Content, and Extent of Audit Documentation

.01 The form, content, and extent of audit documentation vary with the circumstances and needs of the auditors on individual engagements. Some firms, however, include various general and specific instructions on audit documentation content in their policies concerning the working papers.

.02 Examples of audit documentation are audit programs, analyses, issues, memoranda, summaries of significant findings or issues, letters of confirmation and representation, checklists, abstracts or copies of important documents, correspondence (including e-mail), and schedules or commentaries prepared or obtained by the auditor. Abstracts or copies of the entity's records should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. Audit documentation may be in paper form, electronic form, or other media.

.03 The auditor should prepare audit documentation that enables an experienced auditor, having no previous connection to the audit, to understand

a. the nature, timing, and extent of auditing procedures performed to comply with Statements on Auditing Standards and applicable legal and regulatory requirements, including (i) who performed the audit work and the date such work was completed and (ii) who reviewed specific audit documentation and the date of such review;

b. the results of the audit procedures performed and the audit evidence obtained;

c. the conclusions reached on significant matters; and

d. that the accounting records agree or reconcile with the audited financial statements or other audited information.

.04 In determining the form, content, and extent of audit documentation, the auditor should consider the following factors:

- The nature of the auditing procedures to be performed
- The identified risks of material misstatement associated with the assertion or account or class of transactions, including related disclosures
- The extent of judgment involved in performing the work and evaluating the results
- The significance of the audit evidence obtained to the assertion being tested
- The nature and extent of exceptions identified
- The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or evidence obtained

Basic Elements of Format

.05 Audit documentation formats generally include at least the following for identification purposes:

- A title or heading including (*a*) the name of the client, (*b*) a caption that briefly describes the paper's contents, (*c*) the nature of the engagement, and (*d*) the applicable period or closing date covered by the engagement

- The initials or names of the auditors who performed and reviewed the work presented in the paper and the date the paper was completed

.06 In instances when audit documentation extends beyond 1 page, some auditors present the heading on only the lead page and fasten or staple all the applicable pages together as a unit and number each page (for example, 1 of 5, 2 of 5, and so forth). Many auditors index each working paper in some organized preestablished manner. This provides for ease in cross-referencing to other relevant papers, for more organized indexing and filing, and for a form of control over the audit documentation. (See section 6300, "Organization and Filing (Indexing).")

.07 Some auditors purchase standard analysis paper that includes preprinted blocks for the initials or signature of the preparer and reviewer and the dates on which the paper was prepared and reviewed. Others design their own signature and reference blocks and have them imprinted on all of their analysis paper and lined pads. These signature blocks may include captions such as the following:

- Prepared by client and tested by
- Prepared by
- Date prepared
- Date tested
- Reviewed by
- Date reviewed
- Source
- Audit documentation reference
- Footed by
- Extensions checked by

.08 Some auditors prefer to identify client preparation of schedules and analysis by notations or codes, such as PBC (prepared by client), rather than use a detailed signature and reference block.

General Considerations

.09 The following are some general considerations on audit documentation content that may be helpful:

- The auditor may include identification of the (*a*) source of the information presented (for example, fixed assets ledger or cash disbursements journal), (*b*) the nature and extent of the work done and conclusions reached (by symbols and legend, narrative, or a combination of both), and (*c*) appropriate cross-references to other working papers in the content of an individual working paper or group of related papers.
- The auditor should document significant findings or issues, actions taken to address them, and the basis for the final conclusions reached. If for some reason the auditor leaves the assignment before resolving all items, he or she may provide an open items listing on a separate temporary paper for the in-charge auditor's attention. An unresolved exception or incomplete explanation in the working papers may be construed by some as indication of an inadequate audit.
- Information and comments in the audit documentation generally represent statements of fact and professional conclusions. Accordingly, the auditor may wish to refrain from using vague judgmental adjectives such as *good* or *bad*. Conclusions should be supported by documented facts, especially if they concern the adequacy of the client's records.
- Working papers are an integrated presentation of information. The auditor may find it useful to cross-reference working papers to call attention to inter-account relationships and to reference a paper to other working papers summarizing or detailing related information.

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

- All inferences and conclusions should be supported in the working papers, and no misleading or irrelevant statements should be made.
- It is preferable to have negative figures in audit documentation indicated by parentheses instead of red figures to preserve their identity if the papers are photocopied or scanned.

Specific Considerations

.10 As mentioned in the preceding section, abstracts or copies of the entity's records should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. Additionally, audit documentation of procedures performed, including tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include the identifying characteristics of the specific items tested.

.11 Furthermore, the auditor should document significant findings or issues, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached. Significant audit findings or issues include, but are not limited to, the following:

- Significant matters involving the selection, application, and consistency of accounting principles with regard to the financial statements, including related disclosures. Such matters include, but are not limited to, (*a*) accounting for complex or unusual transactions or (*b*) accounting estimates and uncertainties and, if applicable, the related management assumptions.
- Results of auditing procedures that indicate (*a*) that the financial statements or disclosures could be materially misstated or (*b*) a need to revise the auditor's previous assessment of the risks of material misstatement and the auditor's responses to those risks.
- Circumstances that cause significant difficulty in applying auditing procedures that the auditor considered necessary.
- Findings that could result in modification of the auditor's report.
- Audit adjustments. For purposes of AU section 339, *Audit Documentation* (AICPA, *Professional Standards*), an audit adjustment is a correction of a misstatement of the financial information that is identified by the auditor, whether or not recorded by management, that could, either individually or when aggregated with other misstatements, have a material effect on the company's financial information.

Timesaving Considerations

.12 There are a number of ways to save time and avoid unnecessary detail in audit documentation preparation. For example, the auditor may consider the following examples:

- Whenever possible, have the client's employees prepare schedules and analyses. This, of course, presupposes that the client has the necessary personnel to prepare the materials.
- Use a detailed audit program that may eliminate the need for lengthy comments in the audit documentation on the scope of audit procedures. However, some believe that such comments are still necessary when a detailed program is used; this is a matter of individual firm judgment.
- Analyze asset (or liability) accounts and their related expense or income accounts on the same working paper. Examples include property, plant, and equipment, accumulated depreciation, and related depreciation expense; notes receivable, accrued or prepaid interest receivable, and interest income; notes payable, accrued or prepaid interest, and interest expense; and accrued taxes and related provisions for tax expense.
- Avoid unnecessary computations. For example, if only the totals are meaningful and can be tested by a single independent computation, check the total and avoid the unnecessary checking of details.

- Consider using carryforward analyses for accounts that tend to remain constant each year or vary only in accordance with a constant predetermined formula. Examples may include long term assets and related depreciation or amortization such as plant, equipment, and intangibles; long term debt with predetermined payment schedules; and capital stock.
- Use symbols (tick marks) whenever possible, especially when the same symbol applies to several working papers.

Symbols (Tick Marks)

.13 When using symbols, it may be helpful to consider the following basic concepts:

- Symbols are merely a shorthand means of explaining a work step performed on a particular item of data. Symbols serve as means of conserving time and space and, if properly used, may ease review of the audit documentation.
- For a working paper to be clear to a reviewer or other reader, it is important that each symbol be clearly explained. The explanation may be located on the same page as the items subjected to the work step or on a separate legend that is clearly cross-referenced to and from the page that presents the applicable items.
- Simple, distinctive, and clear symbols can be quickly written by the preparer and easily identified by a reviewer.

.14 Applying these basic concepts is not that simple. Various auditors have conflicting notions about symbols. For example, some believe a set of standardized symbols can expedite preparation and review. Others believe that a set of standardized symbols is impractical because it lacks flexibility. Because it is generally agreed that symbols are an effective timesaver, it is desirable for firms to establish and communicate a policy on their use to maximize their potential effectiveness.

.15 The most commonly used symbols are variations on a simple checkmark—for example, a checkmark with a slash, a checkmark with a circle at the end, a double checkmark, and any one of these within a circle. These combinations alone provide eight distinctive tick marks. Symbols may also include circled letters or numbers.

AAM Section 6300

Organization and Filing (Indexing)

.01 Some auditors organize their audit documentation during the course of an engagement into general categories such as the following:

- Planning and administration
- Internal control understanding and assessment of control risk
- Substantive test audit documentation arranged in order of the balance sheet and income statement classifications
- Trial balances, consolidating working papers, journal entries (adjustments, reclassifications, eliminations for consolidation), and potential entries
- Draft reports, financial statements, and notes
- Programs, checklists, and questionnaires (some keep these as separate units, and others interfile them among working papers by statement classifications)
- General matters such as current minutes, contracts, and articles of incorporation that may apply to future engagements as well as current work

Under this approach, actual indexing and filing may be deferred until the conclusion of the engagement.

Predetermined Indexing

.02 Other practitioners and firms may use a predetermined indexing approach so that working papers can be indexed while the field work is still in progress. This offers the following advantages:

- Better control over audit documentation during the performance of field work
- Constant arrangement of audit documentation in logical order to aid in review
- Less time required in assembling and filing them into indexed files
- Quicker access to specific audit documentation after it is filed

.03 Predetermined indexing involves establishing a standard code for each section of the audit documentation using letters and numbers or numbers only. See the following table for an example.

	Two Possible Alternatives	
Working trial balance—assets	B/S-A	T/B-1
Working trial balance—liabilities	B/S-L	T/B-2
Working trial balance—income and expense	P/L	T/B-3
Cash summary schedule	A	10
Receivables summary schedule	B	20
Inventory summary schedule	C	30

.04 Predetermined indexing requires recognition of the need for flexibility to meet unanticipated audit documentation needs or specialized industry requirements, and it requires care to avoid undue complexity.

Excessively complex references may obstruct rather than ease audit documentation preparation, cross-referencing, and filing. Accordingly, it is helpful to develop an organizational plan adaptable to each section of the audit documentation. For example, some accountants classify working papers as lead schedules, primary detail, and secondary detail that might result in the following classification scheme for the preceding examples for cash.

	Using Letters and Numbers	*Using Only Numbers*
Lead schedule	(A)	(10)
Primary detail schedules	(A-1) (A-2) and so forth	(10-1) (10-2) and so forth
Secondary detail schedules	(A-1-1) (A-1-2) (A-1-3)	(10-1-1) (10-1-2)
	(A-2-1) (A-2-2) (A-2-3)	(10-2-1) (10-2-2)

.05 Predetermined (standardized) indexing systems may be printed on separate pages for reference during the performance of field work and insertion in the front of audit documentation binders or files when the work is completed. Some firms have their uniform indexing systems printed directly on their file or binder covers.

.06 A well-organized indexing system need not be too complex. On a fairly small engagement, the indexing system may be a lead schedule divider tab between each major group of accounts with the name of the account on it (for example, cash or accounts receivable) with the related working papers filed behind the lead schedule without being individually indexed. At the completion of the engagement, the pages can be consecutively numbered within each account group (for example, 1 of 10, 2 of 10, and so forth). Because there typically are not numerous or complex layers of supporting schedules, extensive cross-referencing can be avoided.

.07 On large engagements, particularly those with detailed charts of accounts, firms may consider it necessary to develop more complex indexing systems. In one such system, standard index number series are assigned as follows:

Current audit documentation	1000–7000
Permanent file	7100–9999

.08 In this system, each index number has 4 digits, with the addition of decimals if necessary. Numbers ending with double zero are reserved for lead schedules whose total agrees with a line item on the working trial balance (index 1400). Single zeros are used for specific types of accounts (such as 2010, petty cash funds).

.09 Certain index numbers can be permanently assigned to each major financial statement classification. For instance, index 2000 may be assigned to cash. If various bank accounts exist, the cash schedules are assigned index numbers 2002, 2003, and so forth. Documentation, such as supporting confirmations and lists of outstanding checks, would be assigned index numbers commencing with 2001.1, 2001.2, and so forth. As for the permanent audit documentation file, index 9300, for example, may be assigned to internal control. Accordingly, flowcharts and related questionnaires would be assigned index numbers in that series.

Current and Permanent Files

.10 Audit documentation files are generally classified as current files and permanent (continuing) files. Current files contain information that is pertinent to a single engagement. Permanent files include information relevant to several recurring engagements. Some firms have their binder or file covers preprinted as current or permanent accompanied by pertinent portions of their uniform audit documentation indexes.

Copyright © 2009, American Institute of Certified Public Accountants, Inc.

.11 A common challenge to many auditors is to keep the permanent file complete, current, and free from outdated or irrelevant materials that belong in an inactive file of superseded materials.

.12 Some auditors who have confronted many unwieldy permanent files believe that it is better to classify all audit documentation as current with certain materials designated as matters of continuing interest to be carried forward each year until they become outdated. Under this approach, a firm may preprint its complete index on 1 type of file or binder cover and provide space to indicate whether specific contents are continuing or carry forward in nature. Regardless of the approach used, it is important to recognize that the provisions of AU section 339, *Audit Documentation* (AICPA, *Professional Standards*), apply to current year audit documentation maintained in *any* type of file (this includes permanent files) if such documentation serves as support for the current year's audit report.

.13 The requirements and guidance in AU section 339 also apply to permanent files. Accordingly, permanent files should be reviewed and updated, as needed, in conjunction with the annual audit. Examples of documents that may be found in permanent files are listed in paragraph .07 of section 6100.

Practice Tip

The audit documentation files should contain copies of final executed documents when needed to enable an experienced auditor to understand the work performed and conclusions reached. Any drafts or unsigned versions of documents should be replaced with final versions.

Index Topics

.14 The following is a list of topics to consider in developing a standard index for audit documentation. This list is detailed, but it is by no means all inclusive. For example, specialized industries such as life insurance and banking need other specialized topics. Several of the topics may be eliminated, condensed, or expanded depending on the auditor's needs and preferences:

Planning and administration

- Time and budget data
- General correspondence and memos
- Memos—current
- Notes and copies for use in next engagement
- Engagement letters
- Schedules and analyses to be prepared by client
- Minutes
- Checklist of an administrative nature if required by firm policy

Audit or work program[1]

Matters of continuing concern

- Client's industry—background
- Description and brief history of client
- Data and ratio analysis of client's operations
- Client's facilities

[1] Alternate practices of filing audit programs include

a. putting the program in a binder that is separate and distinct from current and permanent files;

b. putting the signed-off program in the current file; and

c. keeping a master copy of the program in the permanent file with the signed off copies dispersed among the related audit documentation segments in the current file.

- Articles of incorporation
- Bylaws
- Current contracts and agreements
  - Debt agreements
  - Leases
  - Labor contracts
  - Agreements with officers and key people
  - Pension plans
  - Profit-sharing plans
  - Stock warrants
  - Stock options
  - Other agreements
  - Client's accounting policies and procedures
  - Carryforward analyses[2]

Internal control

- Internal control questionnaire, narrative, flowcharts, and so forth[3]
- Initial assessment of control risk memos
- Tests of controls

Reports, financial statements and footnotes, trial balances, and assembly sheets

- Reports and financial statements (including letters, if any, on reportable conditions in internal control)
- Consolidating working papers
- Consolidation eliminating entries
- Trial balance
- Adjusting journal entries
- Reclassification journal entries
- Recap of possible adjusting entries
- Assembly sheets supporting footnote disclosures (if the information is not included elsewhere in the audit documentation)
- Disclosure checklists (if required by firm policy)
- Supporting schedules (if required for reports to regulatory bodies or other reports)
- Tax return information and work sheets[4]

[2] Certain classifications may lend themselves to carry-forward audit documentation. Examples include allowances for doubtful accounts, brief summaries of confirmation response statistics, accumulated depreciation and amortization, deferred income taxes and open tax positions, long term debt, and capital accounts. Carry-forward audit documentation depends on the auditor's professional judgement and the nature of the specific account.

[3] Internal control questionnaires may be filed as separate binders or as part of current of permanent files.

[4] Some firms and practitioners keep tax return preparation working papers in files that are completely separate from other types of engagement working papers.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Assets

- Cash
- Marketable securities (and related income)
- Notes receivable (and related interest)
- Accounts receivable
  - Summary and analyses
  - Confirmation procedures[5, 6]
- Allowance for doubtful accounts and notes[7]
- Inventories
  - Summary and analysis
  - Price tests, cost, and market
  - Obsolescence review
  - Observation, test counts, and cutoff data
  - Last in, first out determinations
- Prepaid expenses
- Other current assets
- Investments
- Property, plant and accumulated depreciation, and depletion and amortization[8]
- Intangible deferred charges and amortization[9]
- Other assets
- Intercompany accounts

Liabilities

- Notes payable (and related interest)
- Accounts payable
- Accrued liabilities other than income taxes
- Accrued income taxes (both current and deferred), related provisions, and credits[10]
  - Federal
  - State and local
- Other current liabilities
- Long-term debt (including current maturities and capitalized leases)[11]
- Other long-term liabilities

---

[5] See footnote 2.

[6] For situations involving voluminous responses or bulk inventory listings, the bulk materials may be filed in separate binders that are cross referenced to the pertinent audit documentation (for example, accounts receivable, accounts payable, and inventory).

[7] See footnote 2.

[8] See footnote 2.

[9] See footnote 2.

[10] See footnote 2.

[11] See footnote 2.

- Deferred income[12]

Commitments and contingencies

- Attorney's letters
- Abstractors of commitments and contingencies noted during review of minutes, contracts and agreements, confirmation responses, and so forth
- Subsequent events review
- Management representation letter

Equity (capital accounts)[13]

- Capital stock
- Additional paid-in capital
- Treasury stock
- Retained earnings
- Partnership capital

Revenue and expenses

- Operating revenues
- Cost of sales
- Selling, general and administrative
- Other operating expenses
- Other income
- Other expense
- Extraordinary and unusual items
- Secondary schedules
  - — Maintenance and repairs
  - — Taxes other than income taxes
  - — Rents
  - — Royalties
  - — Advertising costs
  - — Legal fees
  - — Interest expense recap

AAM Section 7100

Control of Confirmations and Correspondence

.01 Generally, clients prepare correspondence and confirmation requests on their own letterhead and submit to the auditor the signed originals and copies. The auditor may obtain one or more copies to serve as file copies for the current audit documentation, second requests, and manuscript copies for the next engagement.

.02 There are two types of confirmation requests: the positive form and the negative form. Some positive forms request the respondent to indicate whether he or she agrees with the information stated on the request. Other positive forms, referred to as blank forms, do not state the amount (or other information) on the confirmation request, but request the recipient to fill in the balance or furnish other information.

.03 The negative form requests the recipient to respond only if he or she disagrees with the information stated on the request. Negative confirmation requests may be used to reduce audit risk to an acceptable level when (*a*) the combined assessed level of inherent and control risk is low, (*b*) a large number of small balances is involved, and (*c*) the auditor has no reason to believe that the recipients of the requests are unlikely to give them consideration.

.04 The confirmation requests could be reviewed to the extent the auditor considers necessary. For example, the auditor may perform the following for accounts receivable confirmation requests before they are mailed:

- Compare the names and addresses to the client's records
- Compare balances per confirmation requests to the subsidiary ledger

.05 The requests may then be stuffed in envelopes and submitted to the post office under the auditor's control.[1]

.06 The auditor should control the mailings and receipt of responses so that the confirmation process is independent of the client.

.07 The auditor may consider including the firm's office or post office box number as the return address on mailing envelopes so that undeliverable letters are returned to the auditor and not to the client. For mailings, the auditor may provide the envelopes or affix a label on the client's envelope that covers the client's return address and replaces it with the auditor's address.

.08 Reply envelopes addressed to the auditor may be enclosed with the request letter. Reply envelopes generally have prepaid postage to encourage responses. Some auditors also use codes on the reply envelopes so that responses may be sorted by engagement before the mail is opened. This feature may be particularly useful when there are several engagements that involve voluminous mailings.

---

[1] Interpretation No. 1, "Use of Electronic Confirmations," of AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, AU sec. 9330 par. .01–.08), states that properly controlled electronic confirmations may be considered to be reliable audit evidence and discusses auditor considerations when using electronic confirmations.

.09 If the client objects to use of the auditor's name and address, some auditors suggest that a post office box in the client's name be used, with the returns to be opened under the auditor's control for the confirmation process, and that the post office be instructed that after the box is closed subsequent mail be forwarded to the auditor.

[*The next page is 7201.*]

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

AAM Section 7200

Requests for Confirmations and Related Materials

Wording of Confirmation Request Forms

.01 Forms and correspondence used for confirmation requests should state clearly that the client is requesting that a reply be sent to the CPA. Forms and correspondence used for information requests for engagements other than audits should not refer to "an audit." They should also use the term *accountant(s)* rather than *auditors*. Suggested wording follows:

> Please send the following information to our certified public accountants [*name and address of accountants*] who are performing accounting services for the company.

.02 The samples of correspondence in this section include language that refers to auditors and an audit of the client's financial statements on the assumption that an audit is being performed. This language needs to be modified if services other than an audit are being performed.

.03 Request for Bank Cutoff Statement

[*Prepared on Client's Letterhead*]

[*Date*]

Financial Institution Official
First United Bank
Anytown, USA 00000

In connection with an audit of the financial statements of [*name of client*] as of [*balance sheet date*] and for the [*period*] then ended, we request that you send the following information directly to our auditors [*name and address of auditors*] as of close of business [*balance sheet date*]:

1. The information requested on the enclosed standard form(s) to confirm account balance information with your financial institution.
2. For the following account numbers, statement(s) of our account(s) and the related paid checks for the period from [*balance sheet date*] to [*two weeks subsequent to the balance sheet date*] inclusive.

Account Number	*Account Name*
______________________	______________________
______________________	______________________
______________________	______________________

Sincerely,
[*Name of Customer*]

____

By:____________________

Notes:

(A) This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or who is knowledgeable about the transactions or arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

(B) The request could be sent at least ten days prior to the audit date so the bank will be able to provide the information requested and to render the cutoff statements as requested. If the request does not reach the bank before the cutoff date, the cutoff statement will include transactions after that date.

(C) The letter may also include requests for the following:

- Confirmation of all securities or other items held for the clients account as of the closing date for collection or safekeeping, or as agent or trustee (a listing should be provided in cluding titles and account numbers).
- Confirmation of the list of authorized signers for the listed accounts. (This may have been previously requested at a preliminary date in connection with assessment of control risk.)

Copyright © 2008, American Institute of Certified Public Accountants, Inc.

.04 Standard Form to Confirm Account Balance Information With Financial Institutions

STANDARD FORM TO CONFIRM ACCOUNT BALANCE INFORMATION WITH FINANCIAL INSTITUTIONS

____

CUSTOMER NAME

Financial Institution's Name and Address

[ ]

[ ]

We have provided to our accountants the following information as of the close of business on ________________, 20_____, regarding our deposit and loan balances. Please confirm the accuracy of the information, noting any exceptions to the information provided. If the balances have been left blank, please complete this form by furnishing the balance in the appropriate space below.* Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other deposit and loan accounts we may have with you comes to your attention, please include such information below. Please use the enclosed envelope to return the form directly to our accountants.

1. At the close of business on the date listed above, our records indicated the following deposit balance(s):

ACCOUNT NAME	ACCOUNT NO.	INTEREST RATE	BALANCE*

2. We were directly liable to the financial institution for loans at the close of business on the date listed above as follows:

ACCOUNT NO./ DESCRIPTION	BALANCE*	DATE DUE	INTEREST RATE	DATE THROUGH WHICH INTEREST IS PAID	DESCRIPTION OF COLLATERAL

______________________________ (Customer's Authorized Signature)

______________________________ (Date)

The information presented above by the customer is in agreement with our records. Although we have not conducted a comprehensive, detailed search of our records, no other deposit or loan accounts have come to our attention except as noted below.

______________________________ (Financial Institution Authorized Signature)

______________________________ (Date)

______________________________ (Title)

EXCEPTIONS AND/OR COMMENTS

Please return this form directly to our accountants:

[ ]

[ ]

* Ordinarily, balances are intentionally left blank if they are not available at the time the form is prepared.

Approved 1990 by American Bankers Association, American Institute of Certified Public Accountants, and Bank Administration Institute. Additional forms available from: AICPA—Order Department, P.O. Box 1003, NY, NY 10108-1003

D 451 5951

.05 Request for Confirmation of Petty Cash Fund and Advances to Employees

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the balance of the petty cash fund (or amount of advances) in your possession as of December 31, 20XX which was shown by our records as $_______.

Please indicate in the following space provided whether the amount above agrees with your records. If not, please send the auditors any information you have that will help them reconcile the difference.

After signing and dating your reply, please return it directly to the auditors. A stamped, addressed enveloped is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

____

The foregoing information is in agreement with my records as of December 31, 20XX with the following exceptions (if any):

____

____

____

Date:______________________________ Signed:____________________________

Copyright © 2008, American Institute of Certified Public Accountants, Inc.

.06 Securities and Cash in Custodian or Trust Accounts

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Custodian or Trustee*]

[*Address*]

Our auditors, [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the enclosed list of securities owned at [*date*] and the amount of principal and income of cash held by you at that date for each of the following accounts:[1] [2]

[*If a list is not obtained from the client, the auditor may complete the following for each account:*

Name of Account	*Account No.*[3]	*Amount Held*
1.______________	______________	______________
2.______________	______________	______________
3.______________	______________	______________]

Please also indicate to the auditors whether or not to your knowledge any of the securities are pledged or otherwise encumbered.

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

---

[1] This letter may be expanded, if necessary, to request cutoff statements of activity (principal and interest) in the accounts.

[2] Sometimes this request is combined with a request for cutoff bank statements and the standard form to confirm account balance information with financial institutions. However, it may be more practical to send separate letters because a bank's commercial banking and trust departments are usually separate operations.

[3] Use the custodian or trustee's account number.

.07 Securities Held by Brokers

[*Prepared on Client's Letterhead*]

[*Date*]

[*Broker's Name*]

[*Address*]

In connection with the audit of our financial statements, please send directly to our auditors [*name and address of auditors*], a statement of our account(s) with you as of [*date*], indicating the following information:

1. Securities held by you for our account
2. Securities out for transfer to our name
3. Any amounts payable to or due from us

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

____

Notes:

(A) The request may be sent so it reaches the broker sufficiently in advance of the listing date for the broker to respond in a practical manner.

(B) It may be helpful to include the account number(s) used by the broker for the client's account(s).

Copyright © 2008, American Institute of Certified Public Accountants, Inc.

.08 Sample Receipts for Return of Cash or Securities Counted by Auditor's Representative and Cutoff Bank Statements Received Directly by the Auditors

Cash Count

The above detailed items were counted in my presence and returned to me intact by [*individual's name*], representative of [*auditor's firm name*].

[*Date and Time*] Custodian: ________________________________
[*Custodian's Signature*]

Securities Count

Received intact from [*individual's name*], representative of [*auditor's firm name*], the securities listed above contained in [*Box* ______] of the [*name of bank or custodian*] which were counted by him or her in my presence (or presented to him or her for count).

Date and Time: ____________________ Signed: ________________________________

Title: _________________________________

Cutoff Bank Statement(s)

Received intact from [*individual's name*], representative of [*auditor's firm name*], the cutoff bank statements and related paid checks for the [*period date range*] for the accounts listed in the following space provided:

Date and Time: ____________________ Signed: ________________________________

Title: _________________________________

Notes:

(A) The auditor may request that receipt(s) be written and signed in *ink*.

(B) For counts of petty cash funds, the receipt may be written directly on the bottom of the petty cash-count working paper. For security counts and returns of cutoff bank statements, the receipt may be prepared as a separate working paper.

.09 Accounts Receivable—Positive

[*Prepared on Client's Letterhead*]

[*Date*]

[*Customer Name*]

[*Address*]

In connection with the audit of our financial statements, please confirm directly to our auditors [*name and address of auditors*] the amount of your indebtedness to us which according to our records as of [*date*] amounted to $______.

If the amount shown is in agreement with your records, please check "A."

If the amount is not in agreement with your records, please check and complete "B."

After checking the appropriate response, please sign and date your reply and mail it directly to our auditors in the enclosed envelope. DO NOT SEND ANY PAYMENTS to our auditors.

Sincerely,

[*Client's Authorized Signature*]

A__________ The balance above agrees with my records.

B__________ My records show a balance of $______.

The difference may be due to the following:

____

____

____

____

[*Signed by*]

____

[*Date*]

Copyright © 2008, American Institute of Certified Public Accountants, Inc.

.10 Accounts Receivable—Negative

[*May be a sticker or stamp used on client's statements to customers*]

PLEASE CHECK THIS STATEMENT

If this statement is *not correct* please write promptly (using the enclosed envelope), giving details of any differences, directly to our auditors, who are now conducting an audit of our financial statements.

[*Name of auditors*]

____

[*Address of auditors*]

____

____

If you do not write to our auditors, they will consider this statement to be correct.

Remittances should NOT be sent to the auditors.

Notes:

(A) A negative confirmation may also be requested in letter form using similar wording.

(B) The auditor may consider sending confirmation requests at the time of the client's regular monthly billings. Coordination of confirmation procedures with the client's routine preparation and mailing of statements may offer efficiency to both the auditor and client.

(C) Negative confirmation requests may be used as substantive procedure to reduce audit risk *only* when three conditions exist: (1) the combined assessed level of inherent and control risk is low, (2) a large number of small balances is involved, and (3) the auditor has no reason to believe that the recipients of the request are unlikely to give them consideration.

.11 Notes Receivable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

Our auditors [*name and address of auditors*] are performing an audit of our financial statements. Accordingly, please confirm directly to our auditors the amount of your indebtedness due us as of [*date*], which our records show as follows:

Type of indebtedness ______________________________

Initial date of indebtedness ______________________________

Original amount of indebtedness ______________________________

Unpaid principal ______________________________

.12 Inventories Held by Warehouses or Others When Listing Is Not Provided by Client

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Warehouse*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please send directly to our auditors the following information about merchandise held in your custody for our account as of [*date*]:

1. Quantities on hand. For each lot, please indicate the following:
    - *a.* Lot number (list each lot separately)
    - *b.* Date received
    - *c.* Kind of merchandise
    - *d.* Unit of measure or package
        - i. Number of units
        - ii. Kind of units (box, can, crate, quart, pound, dozen, or other unit)
2. A statement about how you determined the above requested quantities; specify whether they were determined by physical count, weight, or measure or if they represent your book record
3. A list of negotiable or nonnegotiable warehouse receipts issued (if any) and whether or not such receipts have, to your knowledge, been assigned or pledged.
4. A statement of any known liens against this merchandise.
5. The amount of unpaid charges, if any, as of [*date*].

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

.13 Inventories Held by Warehouses or Others When Listing Is Provided by Client

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Warehouse*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about the merchandise held by you for our account as of [*date*]:

1. The correctness of the quantities shown on the enclosed listing of such merchandise prepared from our records (a second copy is enclosed for your files). If the enclosed listing differs from the quantities you held for us as of [*date*], please include details of the specific differences in your response to our auditors.

2. Your statement on how you determined the correctness of the quantities you are confirming; please specify whether it was determined by physical count, weight or measure, or whether the quantities are from your records.

3. A list of negotiable or nonnegotiable warehouse receipts issued, if any, and whether or not such receipts have, to your knowledge, been assigned or pledged.

4. A statement of any known liens against these goods.

5. The amount of any unpaid charges as of [*date*].

Please mail your reply directly to [*name and address of auditors*]. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

.15 Pension Plan Actuarial Information

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 715, *Compensation—Retirement Benefits*, provides reduced disclosure requirements for nonissuers. Part C of this letter assumes companies have elected the reduced disclosures allowed by that statement. "Pending Content" in FASB ASC 715-20-50-5 describes the reduced disclosure requirements. For companies not electing the reduced disclosures, information required for disclosure can be obtained from Parts B and D of the letter.

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Actuary*]

[*Address*]

In connection with the audit of our financial statements for the period ending [*balance sheet date*] by our independent auditors [*name and address of auditors*], please furnish them the information described as follows as it pertains to the XYZ Pension Plan, which is a defined benefit plan. For your convenience and in response to those requests, you may supply pertinent sections, properly signed and dated, of your actuarial or pension expense report if they are available and if they contain the requested information.

A. Please provide a brief description of the following:

1. The employee group covered.
2. The benefit provisions of the plan used in the calculation of the net periodic pension cost for the period and of the accumulated benefit obligation and the projected benefit obligation at the end of the period. Please identify any such benefit provisions that had not taken effect in the year. Please also provide the date of the most recent plan amendment included in your calculation. Please identify any participants or benefits excluded from the calculations, such as benefits guaranteed under an insurance or annuity contract.
3. The percentages of the plan's assets that are invested in debt securities, equity securities, real estate, and any additional classifications of investment. Please identify the target compositions, if any, for the aforementioned classifications of investment groups.
4. A narrative description of the plan's investment policies and strategies, and the basis used to determine the expected long term rate of return on plan assets.
5. The method and the amortization period, if any, used for the following:
   - *a.* Calculation of a market related value of plan assets, if different from the fair value
   - *b.* Amortization of any transition asset or obligation
   - *c.* Amortization of unrecognized prior service cost
   - *d.* Amortization of unrecognized net gain or loss
6. Any substantive commitments for benefits that exceed the benefits defined by the written plan that are included in the calculations.
7. Determination of the value of any insurance or annuity contracts included in the assets.
8. Nature and effect of significant plan amendments and other significant matters affecting comparability of net periodic pension cost, funded status, and other information for the current period with that for the prior period.
9. The following information relating to the employee census data used in calculating the benefit obligations and pension cost:

a. The source and nature of the data is ____________________ and the date as of which the census data was collected is __________________.

b. The following information concerning participants:

Participants	Number of Persons	Compensation (if applicable)
Currently receiving payments	________	________
Active with vested benefits	________	________
Terminated with deferred vested benefits	________	________
Active without vested benefits	________	________
Other (describe)	________	________

> ***Note:*** *If information is not available for all the above categories, please indicate the categories that have been grouped and describe any group or groups of participants excluded from the above information.*

c. Information for the following individuals contained in the census:

Participant's Name or Number	Age or Birth Date	Sex	Salary	Date Hired or Years of Service

> ***Note to Auditor:*** *The auditor may select information from employer records to compare with the census data used by the actuary. In addition, the auditor may wish to have the actuary select certain census data from his or her files to compare with the employer's records.*

B. Please provide the following information on the net periodic pension cost for the period ending on __________:

1. Service cost $ ________
2. Interest cost ________
3. Expected return on assets ________
4. Other components ________
   a. Amortization of unrecognized net loss or (gain) from earlier periods ________
   b. Amortization of unrecognized prior service cost ________
   c. Amortization of the remaining unrecognized net obligation or (asset) existing at the date of the initial application of Financial Accounting Standards Board *Accounting Standards Codification* 715, *Compensation—Retirement Benefits*—transition obligation or (asset) ________
   d. Amount of loss (or gain) recognized due to a settlement or curtailment ________
   e. Net total of components (*a*+*b*+*c*+*d*) $ ________
5. Net periodic pension cost: (1+2-3+4*e*) $ ________
6. The above measurement of the net periodic pension cost is based on the following assumptions:
   Weighted average discount rate ________ %

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Weighted average rate of compensation increase ________ %

Weighted average expected long term rate of return on plan assets ________ %

Please describe the basis on which the above rates were selected and whether the basis is consistent with the prior period.

Please briefly describe the other assumptions used in the above measurement.

7. The calculations of the items shown in B1 and B5 are based on the following:

Asset information ________

Census data ________

Measurement date (must not be more than three months before the end of the last fiscal year) ________

Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in B1–B5.

C. Please provide the following information for disclosure in the financial statements for the period ending ______________:

		Estimated
1.	Projected benefit obligation	$ ________
2.	Fair value of plan assets	________
3.	Funded status of the plan (2-1)	________
4.	Employer contributions to the plan	________
5.	Participant contributions to the plan	________
6.	Benefits paid	________
7.	(Accrued) or prepaid pension cost in the company financial statements	________
8.	The amount of any intangible asset or liability that is recognized may result in a temporary difference, as defined by Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 740, *Accounting for Income Taxes*. The deferred tax effects of any temporary differences shall be recognized in income tax expense or benefit for the year and shall be allocated to various financial statement components, including other comprehensive income, pursuant to FASB ASC 740.	________
9.	The amount of any accumulated other comprehensive income or liability that is recognized may result in a temporary difference, as defined by FASB ASC 740. The deferred tax effects of any temporary differences shall be recognized in income tax expense or benefit for the year and shall be allocated to various financial statement components, including other comprehensive income, pursuant to FASB ASC 740.	________
10.	The amount included in other comprehensive income for the period arising from a change in the minimum pension liability recognized in accordance with FASB ASC 715, *Compensation—Retirement Benefits*.	________

11. The above amount of the projected benefit obligation is measured based on the following assumptions:

Weighted average discount rate ________ %

Weighted average rate of compensation increase ________ %

Please provide a brief description of the other assumptions used in the measurement.

12. The calculation of the items shown in C1–C10 is based on the following:

(continued)

	Estimated
Asset information	________
Census data	________
Measurement date (must be not more than three months before the current fiscal year end)	________

Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in C1–C10.

13. Please describe any significant events noted subsequent to the current year's measurement date and as of the date of your reply to this request and the effects of those events, such as a large plant closing, which could materially affect the amounts shown in C1–C10.
14. Please describe any significant transactions between the employer or related parties and the plan during the period, including, if applicable, the amounts and types of securities of the employer and related parties included in plan assets and the amount of future annual benefits covered by insurance contracts issued by the employer or related parties.

D. Please provide an analysis for the period showing beginning amounts, additions, reductions, and ending amounts of the

1. projected benefit obligation,
2. fair value of plan assets,
3. unrecognized prior service cost,
4. unrecognized net loss (gain),
5. net transition obligation (asset), and
6. accumulated benefit obligation (ending amount only).

E. Please provide our independent auditors with descriptions and the amounts of gains or losses from combinations, divestitures, settlements, curtailments, or termination benefits during the year, such as

1. purchases of annuity contracts,
2. lump sum cash payments to plan participants,
3. other irrevocable actions that relieved the company or the plan of primary responsibility for a pension obligation and eliminated significant risks related to the obligation and assets,
4. any events that significantly reduced the expected years of future service of employees,
5. any events that eliminated for a significant number of employees the accrual of defined benefits for some or all of their future service, or
6. any special or contractual termination benefits offered to employees.

F. Please provide the amounts of anticipated cash payments for benefits for each of the next 5 years, as well as the expected aggregate amount of benefit payments for the subsequent 5 year period (years 6–10).

G. Was all of the information above determined in accordance with Financial Accounting Standards Board *Accounting Standards Codification* 715 and the American Academy of Actuaries', *An Actuary's Guide to Compliance with Statement of Financial Accounting Standards No. 87* to the best of your knowledge? If not, please describe any differences.

H. Describe the nature of your relationship, if any, with the plan or the plan sponsor that may impair or appear to impair the objectivity of your work.

Please mail your response directly to [*audit firm's name and address*] in the enclosed return envelope as soon as possible, but no later than [*date*].

Sincerely,
[*Client's Authorized Signature*]

.16 Pension Plan Assets Held by Trustee

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Trustee or Custodian*]

[*Address*]

Our auditors [*name and address of auditor*] are conducting an audit of our financial statements. Accordingly, please provide our auditors directly with a listing of the assets including market values as of [*date*] for our employees' pension trust [*title and trustee's account number*].

Please also provide the auditors with the following information about our employees' pension trust for the period from [*beginning of period*] to [*end of period*]:[4]

1. Contributions by the Company during the above period
2. Contributions by employees during the above period
3. Payments to beneficiaries during the above period
4. Any unpaid fees due for services rendered to [*balance sheet date*]

Please send your reply directly to our auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,
[*Client's Authorized Signature*]

[4] A listing of the assets might not be requested if one had already been received by the client. In that case, the auditor might want the trustee to confirm the total market value per the listing.

.17 Notes Payable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements.

Accordingly, please confirm directly to them the following information relating to our note(s) payable to you, as of [*date*]:

Date of note		________	
Original amount	$	________	
Unpaid principal			
Balance	$	________	
Periodic payments required	$	________	
Payment periods		________	
Maturity date		________	
Interest rate		________	%
Date to which interest has been paid		________	
Amount and description of collateral		________	
Description of terms (for example, demand provisions and prepayment penalties)		________	
Any other direct or contingent liabilities to you (please write "None" or provide description)		________	

If the above information is in agreement with your records at that date, please so indicate by signing in the following space provided and return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please note in the following space provided the particulars shown in your records and any information that may help reconcile the difference from our records.

Sincerely,
[*Client's Authorized Signature*]

____

The above information is correct as of [*date*] with the following exceptions (if any):

____

.18 Mortgage Debt

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Creditor or Trustee*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about our mortgage indebtedness to you as of [*date*]:

1.	Original amount	$	__________	
2.	Date of note		__________	
3.	Unpaid principal balance	$	__________	
4.	Interest rate		__________	%
5.	Terms for payment of principal		__________	
6.	Date to which interest has been paid		__________	
7.	Nature of mortgage and description or address of property mortgaged		__________	
8.	Amounts on deposit with you in escrow for			
	a. insurance	$	__________	
	b. real estate taxes	$	__________	
9.	Amounts paid during the period [*dates from and to*] for			
	a. insurance	$	__________	
	b. taxes	$	__________	
10.	Amounts on deposit with you for the reserve for repairs	$	__________	
11.	The nature of defaults, if any		__________	
12.	Description of terms (for example, prepayment penalties and demand provisions)		__________	

A return envelope is enclosed for your reply.

Sincerely,

[*Client's Authorized Signature*]

> ***Note:*** Many of the items requested will vary with the circumstance of the particular mortgage or other debt involved. The above sample assumes the indenture involves an escrow arrangement for insurance and real estate taxes and a deposit account for repairs.

.19 Accounts Payable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

In connection with the audit of our financial statements, please confirm directly to our auditors [*name and address of auditors*], the amount of our liability to you as of [*date*]. Please attach a statement of our account due. If no balance is due, please attach a statement of our account showing payments made.

Please mail your reply directly to [*name of auditors*]. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

Our records indicate that a balance of $________ was from [*name of client*] at [*date*].

Date: ____ Signature: ___________________________________

.20 Obligation to Lessor

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lessor*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements as of [*balance sheet date*] and for the [*time period*] then ended. In connection with this audit, please provide directly to our auditors the following information as of [*balance sheet date*] regarding the lease dated [*date lease was executed*] of [*brief identification of property under lease*] that we are leasing from you:

1. Inception and expiration dates for the lease period, from _______________ to _______________
2. Amount of monthly rent __________________
3. Renewal options (if any):
   a. Dates of renewal period, from _______________ to _______________
   b. Amount of monthly rent for renewal _______________
4. Purchase options (if any):
   a. Amount of purchase price _______________
   b. Inception and expiration dates of option, from _______________ to _______________
   c. Percent of monthly rent (if any) applicable towards purchase price _______________
5. Dates and descriptions of amendments or supplementary understandings, if any, to the lease mentioned above.
6. The amount of outstanding delinquent payments, if any
7. A statement that there are no defaults or a statement of the nature of defaults, if any

A return envelope is enclosed for your reply.

Sincerely,

[*Client's Authorized Signature*]

Note: The content of this type of letter will vary based on the auditor's professional judgment in the circumstances. To provide additional illustrative language, the above letter is not made parallel with the illustration in section 7200, "Requests for Confirmations and Related Materials," paragraph .23.

.21 Property Out on Lease

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lessee*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements as of [*balance sheet date*] and for the [*time period*] then ended. In connection with this audit, please confirm directly to our auditors the following information regarding the lease dated [*execution date of lease*] of [*brief identification of property under lease*] that you are leasing from us:

1. Inception and expiration dates of lease period from _______________ to _______________
2. Amount of monthly rent __________________
3. Total rent payments made ________________
4. Date of last payment ____________________

A return envelope is enclosed for your reply.

Sincerely,

[*Client's Authorized Signature*]

Notes:

(A) If the leased property is of a mobile or portable nature such as a bulldozer or television camera, the confirmation may also include a request for specific serial numbers of significant equipment.

(B) In certain circumstances, the auditor may wish to consider confirming additional information such as renewal options, purchase options, and amendments or supplementary understandings.

.22 Register—Capital Stock

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Registrar*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of the close of business [*balance sheet date*] about each class of our preferred and common stock:

1. Authorized number of shares ____________________
2. Issued number of shares ______________________
3. Outstanding number of shares ___________________

Please also indicate the amount of any unpaid registrar fees due you as of [*balance sheet date*].

A return envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

The above information agrees with our records at [*balance sheet date*] with the following exceptions:

____

____

____

____

Signed: ______________________________________ Date: ______________________________________
[*Name and Title*]

Notes:

(A) It may be helpful to include the registrar's account number for the client's account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) The above illustration assumes the client has a separate transfer agent (see section 7200 paragraph .25).

.23 Transfer Agent—Capital Stock

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Transfer Agent*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of [*balance sheet date*] about each class of our preferred and common stock:

1. Authorized number of shares ____________________
2. Number of shares issued and outstanding ____________________
3. Number of outstanding shares registered in the name of our Company ____________________

Please also indicate the amount of any unpaid transfer agent fees due you as of [*balance sheet date*].

A return envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

The above information agrees with our records at [*balance sheet date*] with the following exceptions:

____

____

____

____

Signed: ____________________ Date: ____________________
[*Name and Title*]

Notes:

(A) It may be helpful to include the transfer agent's account number for the client's account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) Depending on the auditor's judgment in the circumstances the confirmation request may also include inquiries about such matters as (1) the number of shares issued to each of specifically mentioned officers and directors, (2) specified information about shareholders owning more than a stated percent of the total outstanding shares, and (3) amounts deposited during the year for the payment of dividends.

[6] If applicable, comments similar to the following may be added to the confirmation reply by the financial institution: This confirmation does not relate to arrangements, if any, with other branches or affiliates of this financial institution. Information should be sought separately from such branches or affiliates with which any such arrangements might exist.

.26 Confirmation of Compensating Balances

[*Date*]

Financial Institution Official[7]

First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of [*name of customer*] as of [*balance sheet date*] and for the [*period*] then ended, we have advised our independent auditors that as of the close of business on [*balance sheet date*] there (were) (were not) compensating balance arrangements as described in our agreement dated [*date*]. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other compensating balance arrangements between [*name of customer*] and your financial institution comes to your attention, please include such information below. Withdrawal by [*name of customer*] of the compensating balance (was) (was not) legally restricted at [*date*]. The terms of the compensating arrangements at [*date*] were:

EXAMPLES:

1. The Company has been expected to maintain an average compensating balance of 20 percent of its average loan understanding, as determined from the financial institution's ledger records adjusted for estimated average uncollected funds.
2. The Company has been expected to maintain an average compensating balance of $100,000 during the year, as determined from the financial institution's ledger records without adjustment for uncollected funds.
3. The Company has been expected to maintain a compensating balance, as determined from the financial institution's ledger records without adjustment for uncollected funds, of 15 percent of its outstanding loans plus 10 percent of its unused line of credit.
4. The Company has been expected to maintain as a compensating balance noninterest bearing time deposits of 10 percent of its outstanding loans.

In determining compliance with compensating balance arrangements, the Company uses a factor for uncollected funds of _____ [*business calendar*] days.[8]

There (were the following) (were no) changes in the compensating balance arrangements during the [*period*] and subsequently through the date of this letter.

The Company (was) (was not) in compliance with the compensating balance arrangements during the [*period*] and subsequently through the date of this letter.

There (were the following) (were no) sanctions (applied or imminent) by the financial institution because of noncompliance with compensating balance arrangements.[9]

During the [*period*], and subsequently through the date of this letter, (no) (the following) compensating balances were maintained by the Company at the financial institution on behalf of an affiliate, director, officer, or any other third party, and (no) (the following) third party maintained compensating balances at the bank on behalf of the Company. (Withdrawal of such compensating balances (was) (was not) legally restricted.)

---

[7] This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the compensating balance arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

[8] This is not applicable if compensating balances are based on the financial institution's ledger records without adjustment for uncollected funds. If some other method is used for determining collected funds for compensating balance purposes, the method used should be described.

[9] This is applicable only if the financial institution has applied sanctions during the [*period*] or notified the Company that sanctions may be applied. Indicate details.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Please confirm whether the information about compensating balances presented above is correct by signing in the following space provided and returning this letter directly to our independent auditors [*name and address of CPA Firm*].

Sincerely,

[*Name of Customer*]

.27 Confirmation of Lines of Credit

[*Date*]

Financial Institution Official[11]

First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of [*name of client*] as of [*balance sheet date*] and for the [*period*] then ended, we have advised our independent auditors of the following information that we believe is a complete and accurate description of our line of credit from your financial institution as of the close of business on [*balance sheet date*]. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other lines of credit from your financial institution comes to your attention, please include such information in the following space provided.

The Company has available at the financial institution a line of credit totaling $[*amount*]. The current terms of the line of credit are contained in the letter dated [*date*]. The related debt outstanding at the close of business on [*date*] was $[*amount*].

The amount of unused line of credit, subject to the terms of the related letter, at [*date*] was $[*amount*].

Interest rate at the close of business on [*date*] was _____ percent.

Compensating balance arrangements are:

____

____

____

____

This line of credit supports commercial paper (or other borrowing arrangements) as described in the following space provided:

.28 Related Party Confirmation

In certain situations, the auditor may want to confirm the existence of related parties with directors, principal officers, major shareholders, or others. For example, a company does not have adequate controls and processes in place to identify related party transactions and the auditor has not otherwise been satisfied as to the extent of related party transactions. The following is an illustrative related party confirmation letter that an auditor may use when the auditor is not otherwise satisfied as to the extent of related party transactions.

[*Date*]

[*Name of Director, Principal Officer, or Major Stockholder*]

[*Address*]

Dear [*Name*]:

In connection with an audit of our financial statements, please furnish answers to the attached questionnaire, sign your name, and return the questionnaire in the enclosed stamped, addressed envelope directly to our auditors [*name and address of auditors*]. The questionnaire is designed to provide the auditors with information about the interests of officers, directors, and other related parties in transactions with the Company.

Please answer all questions. If the answer to any question is "yes," please explain why it is so. Certain terms used in the questions are defined at the end of the questionnaire. Please read the definitions carefully before answering the questions. Thank you for your cooperation.

Sincerely,

____

[*Client Name*]

Related Party Questionnaire

Please answer all questions. If the answer to any question is "yes," please explain why it is so. Certain terms used in the questions are defined at the end of the questionnaire. Please read the definitions carefully before answering the questions.

1. Have you or any related party of yours had any interest, direct or indirect, in any sales, purchases, transfers, leasing arrangements, guarantees, or other transactions since [*beginning of period of audit*] to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) was, or is to be, a party?

2. Do you or any related party of yours have any interest, direct or indirect, in any pending or incomplete sales, purchases, transfers, leasing arrangements, guarantees or other transactions to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) is, or is to be, a party?

3. Have you or any related party of yours been indebted to the Company (or specify any pension, retirement, savings, or similar plan provided by the client) at any time since [*beginning of period of audit*]? Please exclude amounts due for purchases on usual trade terms and for ordinary travel and expense advances.

The answers to the foregoing questions are correct to the best of my knowledge and belief.

____

[*Signature*] [*Date*]

Definitions

company. Parent company, any subsidiary or investee for which investments are accounted for by the equity method.

related party. Any (1) party (other than the Company) of which you are an officer, director, or partner or are, directly or indirectly, the beneficial owner of 10 percent or more of the voting interests; (2) any trust or other estate in which you have a substantial beneficial ownership or for which you serve as a trustee or in a similar fiduciary capacity; (3) any member of your immediate family; and (4) other party with which you may deal if you (or the other party) control or can significantly influence the other to an extent that either of you might be prevented from fully pursuing your own separate interests.

control. Possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a party, whether through ownership, by contract, or otherwise.

party. An individual, a corporation, a partnership, an association, a joint stock company, a business trust, or an unincorporated organization.

beneficial owner. Party who enjoys, or has the right to secure, benefits substantially equivalent to those of the ownership of securities, even though the securities are not registered in the party's name. Examples of beneficial ownership include securities held for the party's benefit in the name of others, such as nominees, custodians, brokers, trustees, executors, and other fiduciaries; a partnership of which the person is a partner; and a corporation for which the party owns substantially all of the stock. Shares (1) held (individually or in a fiduciary capacity) by the party's spouse, the party's or his or her spouse's minor children, or a relative of the party or his or her spouse who shares the same home with the party; or (2) that the party can vest or revest title in himself or herself at once or at some future time are also considered as being beneficially owned.

.29 Safe Deposit Box Access Confirmation

[*Date*]

[*Name*]

[*Address*]

Our auditors [*name and address of auditors*], are conducting an audit of our financial statements. Accordingly, please confirm there has been no access to our safe deposit box number _____ between _____ and _____ o'clock.

Please indicate in the following space provided if the previous statement is in agreement with your records. If it is not, please furnish the auditors any details concerning access to our safe deposit box during the period indicated.

After signing and dating your reply, please mail it directly to our auditors in the enclosed envelope.

Sincerely,

____

[*Client's Authorized Signature*]

According to our records, there has been no access to the above described safe deposit box during the period specified, except as follows:

Inquiries to Legal Counsel[1]

.01 Illustrative Audit Inquiry Letter to Legal Counsel[2]

[*Prepared on Client's Letterhead*][3]

[*Date*][4]

[*Name of Lawyer*]

[*Address of Lawyer*]

Dear [*Name*]:

In connection with an audit of our financial statements at (balance sheet date) and for the (period) then ended, management of the Company has prepared, and furnished to our auditors (name and address of auditors), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (balance sheet date) and during the period from that date to the date of your response.

Pending or Threatened Litigation (excluding unasserted claims)

[Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

Unasserted Claims and Assessments (considered by management to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome)

[Ordinarily management's information would include the following: (1) the nature of the matter, (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated.

---

[1] If a client has not needed to retain legal counsel, the auditor may express an unqualified opinion on the financial statements even though he or she has not obtained a letter from legal counsel of the Company. In these circumstances, the auditor may consider obtaining written representation from the Company that legal counsel has not been retained for matters concerning business operations that may involve current or prospective litigation. Auditing Interpretation No. 6, "Client Has Not Consulted a Lawyer," of AU section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*, AU sec. 9337 par. .15–.17), provides guidance for auditors when the client has not retained legal counsel during the period under audit.

[2] Extracted from AU section 337A, *Illustrative Audit Inquiry Letter to Legal Counsel* (AICPA, *Professional Standards*), the appendix to AU section 337. (See footnote 4.)

[3] Paragraph .09 of AU section 337 discusses the matters that should be covered in a letter of audit inquiry.

[4] Sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practical. However, the auditor and client may consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the company, such as guarantees of indebtedness of others.]

Sincerely,

[*Authorized Signature for Client*]

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.02 Illustrative Inquiry Letter to Legal Counsel If Management Has Not Provided Details About Pending or Threatened Litigation

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lawyer*]

[*Address of Lawyer*]

In connection with an audit of our financial statements at [*balance sheet date*] and for the [*period*] then ended, please furnish to our auditors [*name and address of auditors*] the information requested below for which you have been engaged to provide legal consultation or representation.

Pending or Threatened Litigation, Claims and Assessments

(excluding unasserted claims and assessments)

Please furnish a list of all pending or threatened litigation, claims, and assessments your firm is handling on our behalf including the following:

1. The nature of the litigation (including the amount of monetary or other damages sought)
2. The progress of the case to date
3. How management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement)
4. An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss

Unasserted Claims and Assessments

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosing concerning such possible claim or assessment, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*, as a matter of professional responsibility to us. *Please specifically confirm to our auditors that our understanding is correct*.

We have represented to our auditors that there are no unasserted claims which are not specifically identified in this letter that you advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450.

(If unasserted claims exist, management's listed information should include the following: (1) the nature of the matter; (2) how management intends to respond if the claim is asserted; and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.)

Please furnish our auditors with any explanation you consider necessary to supplement the foregoing information, including an explanation of these matters as to which your views may differ from those stated.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the organization, such as guarantees of indebtedness of others.]

Sincerely,
[*Authorized Signature for Client*]

Notes:

(A) Paragraph .09 of AU section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*), discusses the matters that should be covered in a letter of audit inquiry.

(B) The sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practicable. However, the auditor and client may consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

(C) If a client has not needed to retain legal counsel, an unqualified opinion may be expressed on the financial statements even though a letter from legal counsel has not been obtained. In these circumstances, the auditor may consider obtaining a written representation from the Company that legal counsel has not been retained for matters concerning its operations that involve current or prospective litigation. Interpretation No. 6, "Client Has Not Consulted a Lawyer," of AU section 337 (AICPA, *Professional Standards*, AU sec. 9337 par. .15–.17), provides guidance for auditors when the client has not retained legal counsel during the period under audit.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.03 Improving Inquiry Techniques

If inquiries to legal counsel are not sufficiently detailed or specific, deficiencies in attorneys' responses may result. A conference between the auditor and the attorney may be necessary to clarify the attorney's written response, and paragraph .10 of AU section 337 provides for such a conference. However, to improve the auditor's ability to receive all of the information necessary to complete his or her audit, he or she may consider the following matters in an inquiry to legal counsel:

a. A request that the attorney specify the effective date of his or her response if it is other than the date of the reply.

b. A request that the attorney mail the response so that it will be received by a certain date.

c. A request that the nature of any litigation specifically identify (1) the proceedings, (2) the claim(s) asserted, (3) the amount of monetary damages sought, or if no amounts are indicated in preliminary case filings, a statement to that effect, and (4) the objectives sought by the plaintiff, if any, other than monetary or other damages (such as performance or discontinued performance of certain actions).

d. A request that the attorney avoid such vague phrases as *meritorious defenses*, *without substantial merit*, and *reasonable chance* in expressing an opinion on the outcome of litigation.

e. If an opinion cannot be expressed on the outcome of litigation, a request that the attorney so state together with his or her reasons for that position.

f. A request that the attorney specify to what extent potential damages are covered by insurance. (It may be possible to obtain the opinion of the insurer's counsel regarding the applicability of insurance coverage.)

g. A request that the attorney provide a summary of material litigation, claims, and assessments settled during the period.

h. A statement that confirmation of the understanding regarding disclosure of unasserted claims and assessments is an integral part of the audit inquiry and that failure to so confirm will require a follow-up contact.

i. A statement that the attorney's response will not be quoted or referred to in the financial statements without first consulting with him or her.

[*The next page is 7401.*]

AAM Section 7400

Management Representations and Representation Letters

.01 AU section 333, *Management Representations* (AICPA, *Professional Standards*), states that written representations from management should be obtained for all financial statements and periods covered by the auditor's report. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements.[1]

.02 Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations. Such representations from management are part of the audit evidence the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit.

Specific Representations

.03 In connection with an audit of financial statements presented in accordance with generally accepted accounting principles (GAAP), specific representations should relate to the following matters:

Financial Statements

a. Management's acknowledgment of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with GAAP.

b. Management's belief that the financial statements are fairly presented in conformity with GAAP.

Completeness of Information

c. Availability of all financial records and related data.

d. Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors.

e. Communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.

f. Absence of unrecorded transactions.

[1] AICPA Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*), provides nonauthoritative guidance for auditors when conducting audits in accordance with generally accepted auditing standards. TIS section 9100.06 discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. TIS section 9100.06 indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.

Recognition, Measurement, and Disclosure

g. Management's belief that the effects of any uncorrected financial statement misstatements[2] aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.[3] (A summary of such items should be included in or attached to the letter.)[4]

h. Management's acknowledgement of its responsibility for the design and implementation of programs and controls to prevent and detect fraud.

i. Knowledge of fraud or suspected fraud affecting the entity involving (1) management, (2) employees who have significant roles in internal control, or (3) others where the fraud could have a material effect on the financial statements.

j. Knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.

k. Plans or intentions that may affect the carrying value or classification of assets or liabilities.

l. Information concerning related party transactions and amounts receivable from or payable to related parties.

m. Guarantees, whether written or oral, under which the entity is contingently liable.

n. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 275, *Risks and Uncertainties*.

o. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

p. Unasserted claims or assessments that the entity's lawyer has advised are probable of assertion and must be disclosed in accordance with FASB ASC 450, *Contingencies*.[5]

q. Other liabilities and gain or loss contingencies that are required to be accrued or disclosed by FASB ASC 450.

r. Satisfactory title to assets, liens or encumbrances on assets, and assets pledged as collateral.

s. Compliance with aspects of contractual agreements that may affect the financial statements.

Subsequent Events

t. Information concerning subsequent events.

The representation letter ordinarily should be tailored to include additional appropriate representations from management concerning matters specific to the entity's business or industry.

[2] Paragraph .07 of AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*), states that a misstatement can result from errors or fraud and provides guidance for the auditor's evaluation of audit findings. (See AU section 312 par. .50–.61.)

[3] If management believes that certain identified items are not misstatements, management's belief may be acknowledged by adding to the representation (for example, "We do not agree that items XX and XX constitute misstatements because [*description of reasons*]").

[4] AU section 312 states that the auditor may designate an amount below which misstatements need not be accumulated. Similarly, the summary of uncorrected misstatements included in or attached to the representation letter need not include such misstatements. The summary should include sufficient information to provide management with an understanding of the nature, amount, and effect of the uncorrected misstatements. Similar items may be aggregated.

[5] If the entity has not consulted a lawyer regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments; see Interpretation No. 6, "Client Has Not Consulted a Lawyer" of AU section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*, AU sec. 9337 par. .15–.17).

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Materiality Considerations

.04 Management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the representation letter, in either qualitative or quantitative terms. Materiality considerations would not apply to those representations that are not directly related to amounts included in the financial statements.

Addressing and Dating

.05 The written representations should be addressed to the auditor. Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of the date of the auditor's report.

Management's Signatures

.06 The letter should be signed by those members of management with overall responsibility for financial and operating matters whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management normally include the chief executive officer and chief financial officer or others with equivalent positions in the entity.

Scope Limitations

.07 Management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion and is ordinarily sufficient to cause an auditor to disclaim an opinion or withdraw from the engagement. However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate. Further, the auditor should consider the effects of the refusal on his or her ability to rely on other management representations.

Illustrative Representation Letter—Audit of Financial Statements

.08 The following letter, which relates to an audit of financial statements prepared in conformity with GAAP, is presented for illustrative purposes only. The introductory paragraph should specify the financial statements and periods covered by the auditor's report (for example, "balance sheets of XYZ Company as of December 31, 20X1 and 20X0, and the related statements of income and retained earnings and cash flows for the years then ended"). The written representations to be obtained should be based on the circumstances of the engagement and the nature and basis of presentation of the financial statements being audited.

.09 If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred...." In appropriate circumstances, item 9 could be modified as follows: "The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except for its plans to dispose of segment A, as disclosed in Note X to the financial statements, which are discussed in the minutes of the December 7, 20X1, meeting of the board of directors." Similarly, if management has received a communication regarding an allegation of fraud or suspected fraud, item 8 could be modified as follows: "Except for the allocations discussed in the minutes of the December 7, 20X1, meeting of the board of directors (or disclosed to you at our meeting on October 15, 20X1), we have no knowledge of any allegations of fraud or suspected

fraud affecting the company received in communications from employees, former employees, analysts, regulators, short sellers, or others."

.10 The qualitative discussion of materiality used in the illustrative letter is adapted from FASB Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information.*

.11 Certain terms are used in the illustrative letter that are described elsewhere in authoritative literature. Examples are *fraud*, in AU section 316, *Consideration of Fraud in a Financial Statement Audit*, (AICPA, *Professional Standards*), and *related parties* in footnote 1 of AU section 334, *Related Parties* (AICPA, *Professional Standards*). To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to management or request that the definitions be included in the written representations.

.12 The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in paragraph .08 of AU section 333.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.13 Illustrative Representation Letter

[*Prepared on Client's Letterhead*]

[*Date*]

To [*Independent Auditor*]

We are providing this letter in connection with your audit(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods*] for the purpose of expressing an opinion as to whether the [*consolidated*] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [*name of entity*] in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the [*consolidated*] financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [*as of (date of auditor's report),*] the following representations made to you during your audit(s).

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted in the United States of America.

2. We have made available to you all—

   a. Financial records and related data.

   b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.

3. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.

4. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.

5. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.[6]

6. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.

7. We have no knowledge of any fraud or suspected fraud affecting the entity involving—

   a. Management,

   b. Employees who have significant roles in internal control, or

   c. Others where the fraud could have a material effect on the financial statements.

8. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.

---

[6] If management believes that certain of the identified items are not misstatements, management's belief may be acknowledged by adding to the representation, for example, "We do not agree that items XX and XX constitute misstatements because [*description of reasons*]."

9. The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.

10. The following have been properly recorded or disclosed in the financial statements:

 a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.

 b. Guarantees, whether written or oral, under which the company is contingently liable.

 c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 275, *Risks and Uncertainties*. [*Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year*.]

11. There are no—

 a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

 b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450, *Contingencies*.[7]

 c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB ASC 450.

12. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.

13. The company has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

[*Add additional representations that are unique to the entity's business or industry. See paragraph .07* and appendix B, paragraph .17of this section.]

To the best of our knowledge and belief, no events have occurred subsequent to the balance-sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

____

[*Name of Chief Financial Officer and Title*]

Notes: Depending on the nature, materiality, and complexity of fair values, management representations about fair value measurements and disclosures contained in the financial statements also may include representations about

- the appropriateness of the measurement methods, including related assumptions used by management in determining the fair value and the consistency in application of the methods;
- the completeness and adequacy of disclosures related to fair values; and

[7] In the circumstance discussed in footnote 5 of this section, this representation might be worded as follows:

> We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- whether subsequent events require adjustments to the fair value measurements and disclosures are included in the financial statements.

See appendix C of AU section 722, *Interim Financial Information* (AICPA, *Professional Standards*), for "Illustrative Management Representation Letters for a Review of Interim Financial Information."

.14 Illustrative Representation Letter—Audit of Personal Financial Statements

[*Date*]

[*To the Independent Auditor*]

We are providing this letter in connection with your audit of the statement of financial condition of James and Jane Person as of [*date*] and the related statement of changes in net worth for the [*period*] then ended for the purpose of expressing an opinion as to whether the financial statements present fairly, in all material respects, the financial condition and changes in the net worth, of James and Jane Person in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the statement of financial condition and changes in net worth in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [*as of (date of auditor's report)*,] the following representations made to you during your audit.

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted in the United States of America.
2. We have made available to you all financial records and related data.
3. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
4. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.
5. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.
6. We have no knowledge of any fraud or suspected fraud affecting
   a. us.
   b. others where the fraud could have a material effect on the financial statements.
7. We have no knowledge of any allegations of fraud or suspected fraud affecting us received in communications from analysts, regulators, short sellers, or others.
8. We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
9. The following have been properly recorded or disclosed in the financial statements:
   a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.
   b. Guarantees, whether written or oral, under which we are contingently liable.
   c. Significant estimates and material concentrations known to us that are required to be disclosed in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 275, *Risks and Uncertainties*. (*Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.*)

10. There are no

    a. violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

    b. unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450, *Contingencies*.[8]

    c. other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB ASC 450.

11. We have satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.

12. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

To the best of our knowledge and belief, no events have occurred subsequent to the statement of financial condition date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

____
(Jane Person)

---

[8] Footnote 7 of AU section 333 states that if a lawyer has not been consulted regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments. In the circumstances discussed in footnote 7 to AU section 333, this representation might be worded as follows:

> We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

Interpretation No. 6 of AU section 337 also provides guidance for auditors when the client has not retained legal counsel during the period under audit.

.15 Illustrative Representation Letter to Other Accountants

[*Firm's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

In connection with the report you have been requested to reissue on the financial statements of [*client's name*] for the year ended [*date*], which statements are to be included comparatively with similar statements for the year ended [*date*], we make the following representations.

We have audited (or reviewed or compiled) the balance sheet of [*client's name*] as of [*balance sheet date*] and the related statements of earnings, retained earnings, and cash flows for the year then ended. Our procedures in connection with the engagement did not disclose any events or transactions subsequent to [*predecessor's balance sheet date*] which, in our opinion, would have a material effect upon the financial statements, or which would require mention in the notes to the financial statements of [*client's name*] for the year then ended.

Should anything come to our attention prior to the date our report is issued that, in our judgment, would have a material effect upon the financial statements covered by your report, we shall notify you promptly.

Sincerely,

____

[*Engagement Partner's Signature*]

Note:If any matters come to the firm's attention that may require revision of the previous financial statements, they could be included in a separate paragraph after approval by the engagement partner.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.16 Letter to Other Accountants Upon Whose Work We Plan to Rely

[*Firm's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

We are auditing the financial statements of [*client's name*], [*parent company*]. The financial statements of [*other accountants' client's name*] that you are auditing are to be included in the financial statements of [*client's name*]. We will rely on your report on the financial statements in expressing an opinion on the (consolidated) financial statements of [*client's name*] (and subsidiaries). In that connection, we will refer to your report.

Please confirm to us that your firm is independent with respect to [*client's name*] and [*other accountant's client's name*] within the meaning of Rule 101, *Independence* (AICPA, *Professional Standards*, ET sec. 101 par. .01), of the Code of Professional Conduct.

Please provide us promptly, in writing, with the following information in connection with your current examination of the financial statements of [*other accountant's client's name*] with respect to the following:

1. Related party transactions or other matters that have come to your attention. We are aware of the following related parties: [*names of known related parties*].
2. Any limitation on the scope of your examination that is related to the financial statements of [*client's name*], or that limits your ability to respond to this inquiry.

Please update your letter to indicate any additional matters of the type designated above that have come to your attention through the date of your report on the financial statements of [*other accountants' client's name*].

Sincerely,

____

[*Engagement Partner's Signature*]

.17 Illustrative Updating Management Representation Letter

The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph .12 of AU section 333. Management need not repeat all of the representations made in the previous representation letter.

If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. …"

[*Firm's Letterhead*]

[*Date*]

To [*Auditor*],

In connection with your audit(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods*] for the purpose of expressing an opinion as to whether the (consolidated) financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [*name of entity*] in conformity with accounting principles generally accepted in the United States of America, you were previously provided with a representation letter under date of [*date of previous representation letter*]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [*date of latest balance sheet reported on by the auditor*] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

AAM Section 7500

Communication With Those Charged With Governance

.01 AU section 380, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*), establishes standards and provides guidance on the auditor's communication with those charged with governance in relation to an audit of financial statements. The term *those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. For entities with a board of directors, the term encompasses the term *board of directors* or *audit committee* used elsewhere in generally accepted auditing standards (GAAS). Recognizing the importance of effective two-way communication to the audit, AU section 380 provides a framework for the auditor's communication with those charged with governance and identifies some specific matters to be communicated with them.

Matters to Be Communicated

.02 In accordance with paragraph .05 of AU section 380, the auditor must communicate with those charged with governance matters related to the financial statement audit that are, in the auditor's professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process. The auditor should communicate the following with those charged with governance:

a. The auditor's responsibilities under GAAS, including that

   i. the auditor is responsible for forming and expressing an opinion about whether the financial statements that have been prepared by management with the oversight of those charged with governance are presented fairly, in all material respects, in conformity with generally accepted accounting principles (GAAP); and

   ii. the audit of the financial statements does not relieve management or those charged with governance of their responsibilities.

   These responsibilities may be communicated through the engagement letter, or other form of contract that records the terms of the engagement, if that letter or contract is provided to those charged with governance. See paragraphs .26–.28 of AU section 380 for additional guidance.

b. An overview of the planned scope and timing of the audit. See paragraphs .29–.33 of AU section 380 for additional guidance.

c. Significant findings from the audit, including

   i. the auditor's views about qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures (see paragraphs .37–.38 of AU section 380);

   ii. significant difficulties, if any, encountered during the audit (see paragraph .39 of AU section 380);

   iii. uncorrected misstatements, other than those the auditor believes are trivial, if any (see paragraphs .40–.41 of AU section 380);

   iv. disagreements with management, if any (see paragraph .42 of AU section 380); and

v. other findings or issues, if any, arising from the audit that are, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their oversight of the financial reporting process.

.03 Unless all of those charged with governance are involved in managing the entity, the auditor also should communicate the following:

a. Material, corrected misstatements that were brought to the attention of management as a result of audit procedures. The auditor also may communicate other corrected immaterial misstatements, such as frequently recurring immaterial misstatements that may indicate a particular bias in the preparation of the financial statements.

b. Representations the auditor is requesting from management. The auditor may provide those charged with governance with a copy of management's written representations.

c. Management's consultations with other accountants (see paragraph .43 of AU section 380).

d. Significant issues, if any, arising from the audit that were discussed, or were the subject of correspondence, with management (see paragraph .44 of AU section 380).

The Communication Process

.04 The auditor should communicate with those charged with governance the form, timing, and expected general content of communications. Clear communication of the auditor's responsibilities, an overview of the planned scope and timing of the audit, and the expected general content of communications helps establish the basis for effective two-way communication. Matters that may also contribute to effective two-way communication include discussion of the following:

- The purpose of communications. When the purpose is clear, the auditor and those charged with governance are in a better position to have a mutual understanding of relevant issues and the expected actions arising from the communication process.
- The form in which communications will be made.
- The person(s) on the audit team and among those charged with governance who will communicate regarding particular matters.
- The auditor's expectation that communication will be two-way, and that those charged with governance will communicate with the auditor matters they consider relevant to the audit. Such matters might include strategic decisions that may significantly affect the nature, timing, and extent of audit procedures; the suspicion or the detection of fraud; or concerns about the integrity or competence of senior management.
- The process for taking action and reporting back on matters communicated by the auditor.
- The process for taking action and reporting back on matters communicated by those charged with governance.

.05 The auditor should communicate in writing with those charged with governance significant findings from the audit (see paragraphs .34–.35 of AU section 380) when, in the auditor's professional judgment, oral communication would not be adequate. This communication need not include matters that arose during the course of the audit that were communicated with those charged with governance and satisfactorily resolved. Other communications may be oral or in writing. When the auditor communicates matters in accordance with AU section 380 in writing, the auditor should indicate in the communication that it is intended solely for the information and use of those charged with governance and, if appropriate, management; and is not intended to be and should not be used by anyone other than these specified parties. When matters required to be communicated have been communicated orally, the auditor should document them. When matters have been communicated in writing, the auditor should retain a copy of the communication. Documentation of oral

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

communication may include a copy of minutes prepared by the entity if those minutes are an appropriate record of the communication.

.06 The auditor should communicate with those charged with governance on a sufficiently timely basis to enable those charged with governance to take appropriate action. The appropriate timing for communications will vary with the circumstances of the engagement. Considerations include the significance and nature of the matter, and the action expected to be taken by those charged with governance.

.07 The auditor should evaluate whether the two-way communication between the auditor and those charged with governance has been adequate for the purpose of the audit. If it has not, the auditor should take appropriate action to address the effectiveness of the communication process.

Additional Communication Requirements

.08 Requirements for the auditor to communicate with those charged with governance are included in other standards, including the following:

a. Paragraph .17 of AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*), to communicate to those charged with governance illegal acts that come to the auditor's attention.

b. Paragraph .27 of AU section 801, *Compliance Audits* (AICPA, *Professional Standards*), to communicate to management and, if appropriate, those charged with governance the necessity of disclosure if the auditor becomes aware of noncompliance in the period subsequent to the period covered by the auditor's report and the nature of the noncompliance is of such a nature and significance that report users would be misled.

c. Paragraph .36 of AU section 801, to communicate, in the absence of a governmental audit requirement to report on internal control over compliance, in writing to management and those charged with governance, identified significant deficiencies and material weakness in internal control over compliance.

d. Paragraph .37 of AU section 801, to communicate to those charged with governance of the entity the auditor's responsibilities under GAAS, *Government Auditing Standards* and the governmental audit requirement, an overview of the planned scope and timing of the compliance audit, and significant findings from the compliance audit.

e. Paragraph .22 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*), to inquire directly of the audit committee (or at least its chair) regarding the audit committee's views about the risks of fraud and whether the audit committee has knowledge of any fraud or suspected fraud affecting the entity.

f. Paragraph .79 of AU section 316 to communicate with those charged with governance fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements. In addition, the auditor should reach an understanding with those charged with governance regarding the nature and extent of communications with those charged with governance about misappropriations perpetrated by lower level employees.

g. Paragraph .17 of AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*),[1] to communicate in writing to management and those charged with governance deficiencies identified during an audit that upon evaluation are considered significant deficiencies or material weaknesses, including significant deficiencies and material weaknesses that were communicated in previous audits and have not yet been remediated. See examples in the following paragraphs.

[1] See section 8300, "Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115," for further guidance.

.09 Written Communication Regarding Significant Deficiencies and Material Weaknesses Identified During an Audit of Financial Statements

[*Date of Auditor's Report on the Financial Statements*]

In planning and performing our audit of the financial statements of [*client's name*] as of and for the year ended [*financial statement date*], in accordance with auditing standards generally accepted in the United States of America, we considered [*client's name*] internal control over financial reporting *internal control* as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. Accordingly, we do not express an opinion on the effectiveness of the company's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed in the following sections, we identified certain deficiencies in internal control that we consider to be significant deficiencies and a deficiency that we consider to be a material weakness.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *significant deficiency* is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness , yet important enough to merit attention by those charged with governance. We consider the following deficiencies to be significant deficiencies in internal control.

Accrued Vacation

Although accrued vacation has not been recorded on the financial statements, the amount of accrued vacation must be considered in determining the fair presentation of the financial statements. The year end analysis of accrued vacation had a balance significantly lower than the prior year's balance. The details of the analysis were traced to the attendance control cards. We found (1) the number of days earned on the listing did not agree to that recorded in the cards, (2) individuals were reported in the cards with earned vacation but were not on the listing, and (3) some of the cards appeared to not have been maintained.

Detailed records of vacation days earned and used by employees should be recorded in a timely manner and accurately maintained. At least annually, these days should be converted to dollar amounts. Management should review the conversion and consider reporting this liability on the financial statements for complete recognition of liabilities.

Discussions with the office manager revealed that not all employees are required to notify him or her when they use vacation days. All employees should be required to inform the office manager of all vacation days taken. Employees should also be asked to periodically review their vacation records with the office manager and to indicate their agreement by signing the records.

Bad Debts

During 20XX, the board approved the write-off of accounts receivable of about $ [*amount*] The write-off was charged to revenue rather than to bad debt expense.

Procedures for recording bad debt write-offs should be reviewed for adequacy. All adjusting entries should be reviewed by the treasurer or a member of management other than the person preparing the journal entry.

A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We believe that the following deficiency constitutes a material weakness.

Blank Checks

Blank checks are maintained in an unlocked cabinet along with the check signing machine.

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Blank checks and the check signing machine should be locked in separate locations so as to prevent the embezzlement of funds.

This report is intended solely for the information and use of the board of directors, management, and others within the entity and is not intended to be and should not be used by anyone other than these specified parties.

Sincerely,

____

[*Engagement Partner*]

AAM Section 7600

Reliance Letter

.01 Illustrative Reliance Letter

[*Addressee*]:

The following is in response to your letter to our firm dated ________.

We performed an audit of [*company's*] balance sheet dated December 31, 20X0, and the related statements of income, retained earnings, and cash flow for the year then ended. The financial statements were audited as of the financial statement date and the audit procedures performed were completed on March 28, 20X1 [*audit report date*]. No additional audit procedures were performed subsequent to March 28, 20X1.

The audit was conducted in accordance with generally accepted auditing standards (GAAS). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. However, a properly designed and executed audit may not detect a material irregularity. For example, GAAS does not require that an auditor authenticate documents, nor is an auditor trained to do so. Also, audit procedures that are effective for detecting a misstatement that is unintentional may not be effective for a misstatement that is intentional and is concealed through collusion between client personnel and third parties or among management or employees of the client.

We understand that you intend to rely on the report and associated statements in connection with [*describe as precisely as possible the transaction in connection with which the third party intends to rely on the report and statements*]. It should be noted that the audit procedures performed in order to render an opinion on the financial statements of [*company*] may not be adequate or appropriate for this purpose. Because of the limitations inherent in the audit process, we may not have detected all material misstatements. Accordingly, our audit was not intended for your benefit and should not be taken to supplant the inquiries and procedures that you should take to satisfy yourself as to [*company's*] credit-worthiness. We recommend that you perform your own due diligence investing, which should include but not be limited to the following steps [*itemize*]. We emphasize that this list of procedures may not be all inclusive and that we cannot provide any assurance that the procedures we have mentioned will be sufficient for your purposes.

AAM Section 7700

Proposal Letter

.01 Illustrative Proposal Letter

[*Date*]

[*Name*]

[*Address*]

Dear [*Name*]:

We appreciate this opportunity to present a proposal for [*nature of services*] and a brief description of our firm and services.

Our firm was formed in 20XX. We have [*number of*] partners and [*number of*] staff and support personnel working with clients in accounting and auditing, taxation, and various consulting services. Although we serve all size clients, our clientele consists primarily of small and medium size businesses such as yours.

Our professional objectives are to provide the highest quality services on a timely basis. As a member of the AICPA Division for Firm's Private Companies Practice Section, our accounting and auditing practice has been subjected to a review by another firm of CPAs. We received an unqualified opinion as a result of that review. We extend our client relationships to include ongoing contact and services to achieve our services objectives.

We have extensive experience in the [*type of*] industry. This experience and related understanding of your industry's operations permit us to design, perform, and complete engagements for your company effectively and at a reasonable cost.

Our services include the following:

- Accounting, Auditing, and Attestation Services

  Our accounting, auditing, and attestation services include annual or special audits, compilations and reviews of financial statements, and the examination and review of financial and other information under the attestation standards. We accompany our report on audited financial statements with a letter communicating deficiencies in internal control and a management letter communicating recommendations for operational efficiencies. Our purpose in making these suggestions is to help you accomplish your operational objectives. These suggestions often result in cost savings.

- Tax Services

  We offer diversified tax services, including assistance in all phases of federal, state, and local income taxes; estate, inheritance, and gift taxes; and payroll and other taxes. These services include tax return preparation, tax research, and representation of clients at administrative proceedings before the various taxing authorities. The objectives of our tax services are to minimize taxes and potential problems.

- Consulting Services

  Our consulting services are designed to assist clients in improving efficiency and profitability. Our approach offers assistance in such areas as developing plans for problem identification or implementing more effective operating controls, evaluating information systems and installing or upgrading data processing systems.

[*Name*], an audit partner, will be primarily responsible for your engagement.

As you requested, our proposal is for [*state nature of services*].

We estimate that our fees for the proposed services will be approximately $[*amount*], plus out-of-pocket expenses, billable as the work progresses. Our fees are based on time spent on the engagement. Should we encounter any unforeseen circumstances requiring additional time, you will be notified promptly of the situation.

Our fee estimate is based on the assumption that your personnel will prepare certain schedules and analyses for us. We also anticipate their assistance in locating invoices and other documents for our examination.

Our firm is organized and staffed to help you satisfy our business needs. Please call [*number*] with questions about this proposal.

Sincerely,

____

General Accounting and Auditing Developments—2010/11

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert replaces *Current Economic Instability: Accounting and Auditing Considerations—2009*.

This Audit Risk Alert is intended to provide auditors of financial statements with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform. This Audit Risk Alert also can be used by an entity's internal management to address areas of audit concern.

This publication is an *other auditing publication*, as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Recognition

The AICPA gratefully appreciates the invaluable assistance Keira A. Kraft provided in creating this publication.

Feedback

This Audit Risk Alert is published annually. As you encounter audit or accounting issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert also would be appreciated. You may e-mail these comments to A&APublications@aicpa.org.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your audits and also can be used by an entity's internal management. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool to help you identify the significant risks that may result in the material misstatement of financial statements and delivers information about emerging practice issues and current accounting, auditing, and regulatory developments. You should refer to the full text of accounting and auditing pronouncements, as well as the full text of any rules or publications that are discussed in this alert.

.02 It is essential that the auditor understand the meaning of audit risk and the interaction of audit risk with the objective of obtaining sufficient appropriate audit evidence. In AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1), *audit risk* is broadly defined as the risk

that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. Further, paragraph .04 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), explains that the auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures.

Economic, Legislative, and Regulatory Developments

The Current Economy

.03 When planning and performing audit engagements, an auditor should understand both the general current economy and the specific economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on an entity's business and, therefore, its financial statements.

.04 The year 2010 may be the beginning of a wave of economic recovery. Although many key indicators, such as unemployment, are still uncomfortably high, 2010 began with rising commodity prices, a jump in new factory orders that caused the largest expansion in production in 3 years, and an increase in U.S. auto sales that approached prerecessionary levels. Further, after experiencing a considerable decline in the stock market through March 2009, the markets have rebounded substantially. In March 2009, the S&P 500 and the Dow Jones Industrial Average (DJIA) reached their 12-year lows, and NASDAQ closed at its lowest point since October 2002. By March 2010, only a year later, all 3 had increased in value by at least 59 percent from the previous year's lows. However, all 3 remained relatively unmoved 5 months later, in mid-August 2010. This exhibits the continuing uncertainty in the markets due to the varying economic indicators, the financial reform regulatory changes, and Europe's economy, among other reasons. The Chicago Board Options Exchange Volatility Index (VIX) is a key measure of market expectations of near-term volatility conveyed by S&P 500 stock index options prices and is considered by many to be a barometer of investor sentiment, market volatility, and the best gauge of fear in the market. In 2008, the high closing price of VIX was 80.86; during 2009, the high closing price was 56.65—a substantial decrease from the peak of the financial crisis. Through mid-August 2010, the peak closing price for the year has been 45.79, which occurred in late May (not on the day when the DJIA inexplicably dropped nearly 1,000 points). This demonstrates the uncertainties that still plague investors.

Key Economic Indicators

.05 These key economic indicators further illustrate the severity of the recent recessionary period experienced by the United States. The gross domestic product (GDP) measures output of goods and services by labor and property within the United States. It increases as the economy grows or decreases as it slows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.4 percent in the second quarter of 2010, 3.7 percent in the first quarter of 2010, and 5.6 percent in the fourth quarter of 2009. This data indicates a turnaround in the economy because in the fourth quarter of 2008 and the first quarter of 2009, real GDP decreased 6.3 percent and 5.5 percent, respectively. Further, in June 2010, the Treasury reported that banks had repaid about 75 percent of the bailout money they received through the Troubled Asset Relief Program and that taxpayers made $21 billion on the investment. However, other bailouts are not yet repaid, and they may yield losses to taxpayers.

.06 From July 2009 to July 2010, the unemployment rate fluctuated between 9.4 percent and 10.1 percent. An unemployment rate of 10.0 percent represents approximately 15.3 million people. The annual average rate of unemployment increased from 4.6 percent in 2007 to 9.3 percent in 2009. However, through July 2010, the rate has remained below 10.0 percent. One reason for the continued high unemployment rate is that more Americans are resuming their search for work. Further, although many entities are doing better financially this year than last year, they are hesitant to hire additional workers due to uncertainties about the strength of the

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

economic recovery and concerns about slipping back into a recessionary environment. Instead, those who are employed either switched from part time to full time or experienced an increase in overtime. To illustrate this trend, the Bureau of Labor Statistics reported that in May 2010, the average weekly hours and overtime of private employees had risen consistently over the last 3 months. The May 2010 average of 34.2 hours per week was last reached in January 2009. The trend in increasing current employees' hours will only meet increasing demands for a finite amount of time; plus, after working too much overtime, employees will lose efficiency. Once employers believe the recovery is sustainable and permanent, more employees will be hired.

.07 June and July 2010 exhibited some downward trends in the economy, which increased concern about the possibility of a "double-dip" recession. In each of those months, over 131,000 jobs were lost nationwide; the dip in unemployment to 9.5 percent from May was mostly attributable to a shrinking of the nation's labor force; financial activities continued to lose jobs; the median duration of unemployment remained high; and the number of buyers who signed contracts to purchase homes fell 30 percent in May. Some offsetting positive signs in June and July 2010 include the increase of jobs in the private sector, increases in manufacturing jobs, and an increase of jobs in the health care and social assistance industries. In addition, July marked the seventh month of consecutive private-sector job growth. Although, generally speaking, the overall economy is moving in the right direction, how long it will take to fully recover from the economic recession, and how bumpy that will recovery will be, remains to be seen.

.08 The Federal Reserve decreased the target for the federal funds rate more than 5.0 percentage points to less than 0.25 percent, where it remained through early August 2010. The Federal Reserve described the current economic recovery in its August 10, 2010, press release as follows:

- Household spending is increasing gradually but remains constrained by high unemployment, modest income growth, lower housing wealth, and tight credit.
- Business spending on equipment and software is rising; however, investment in nonresidential structures continues to be weak, and employers remain reluctant to add to payrolls.
- Housing starts remain at a depressed level.
- Bank lending has continued to contract.
- The pace of economic recovery is likely to be more modest in the near term than had been anticipated.

.09 The Federal Reserve also noted in the press release that "economic conditions, including low rates of resource utilization, subdued inflation trends, and stable inflation expectations, are likely to warrant exceptionally low levels of the federal funds rate for an extended period." The Federal Reserve will keep constant their holdings of securities by reinvesting principal payments from mortgage-backed securities in longer-term Treasury securities; additionally, as current holdings of Treasury securities mature, the proceeds will be reinvested in Treasury securities. Since the economic crisis, the Federal Reserve's balance sheet has grown to $2.3 trillion. Further, the Federal Reserve will continue to monitor the economy and employ other policy tools as necessary.

Reporting Trends

Securities and Exchange Commission Comment Letters

.10 As discussed in the May 2010 issue of *CFO* magazine, a list of the top 10 concerns of the Securities and Exchange Commission (SEC) related to U.S. entities' annual and quarterly filings dated between January 1, 2009, and January 1, 2010, was compiled. The data was based upon a comment letter database, as of March 24, 2010, compiled by the research firm Audit Analytics. In general, the topics commented on by the SEC remain consistent over the years. The most commented area in filings is the "Management's Discussion & Analysis (MD&A)" section, which provides an overview of the period's operations, how the entity performed, and management's approach to the coming year. It also discusses the fundamentals of the entity, which include members of management and their management style. Typically, the SEC requests more details in entities' descriptions of their operating results, their liquidity and capital resources, and how they develop critical accounting estimates. The next two most commented areas include executive compensation and fair

value measurements, which given the economic climate, is not unexpected. The SEC also continues to remain interested in incentive-pay performance targets, such as earnings per share. The remaining seven top concerns of the SEC are intangible assets and goodwill; disclosure controls; segment reporting; non-generally accepted accounting principles (GAAP) measures, revenue recognition; debt, warrants, and equity issues; and related-party transactions. These general areas of focus in the financial statements should be considered by all preparers and auditors in order to provide investors and regulators with the most useful and transparent financial information.

Loss Contingency Disclosures

.11 The SEC also focuses on the adequacy of loss contingency disclosures in the financial statements of registrants, particularly regarding litigation. The SEC staff has expressed concern about the lack of timely and transparent disclosures. Further, registrants sometimes fail to disclose the amount or range of possible loss when no amount is accrued because the loss is only reasonably possible (rather than probable). Disclosures on contingencies should be specific rather than generic. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450-20-50 discusses disclosures for loss contingencies and explains that in some circumstances, it may be misleading not to disclose the amount accrued in the financial statements for a loss contingency. If an exposure to loss exists in excess of amounts accrued and it is reasonably possible that a loss or additional loss may have been incurred, the estimated possible loss or range of loss or a statement that such estimate cannot be made should be included in the disclosures. The SEC also questioned the following inconsistency: registrants disclose in the footnotes that the outcome of a contingency is not expected to materially affect their financial statements but explain in the "Risk Factors" section that the same contingency's outcome could materially affect their financial results.

.12 Discussion from the SEC about contingencies can be found in the Division of Corporate Finance's *Current Accounting and Disclosures Issues in the Division of Corporate Finance*, which can be accessed at www.sec.gov/divisions/corpfin/cfacctdisclosureissues.pdf. FASB also has a project on its agenda to revise the guidance on disclosure of certain loss contingencies, which is discussed in further detail in the "On the Horizon" section of this alert.

Going Concern

.13 The percentage of audit reports for 2009 containing a going concern qualification is substantially unchanged from the percentage in 2008, according to Audit Analytics and based on fiscal year 2009 SEC filings through the end of April 2010. In 2008, an extremely challenging economic year, approximately 20.3 percent of audit reports had a going concern qualification. Although 2009 was certainly not a year of economic boom, GDP did turn positive by the third quarter and continued on that trend. However, the percentage of going concern qualification reports for 2009 remained high at 19.8 percent. Although this is a slight decrease, the explanation for the decrease appears to be unrelated to the current economic recovery. Instead, it may be attributable to 8.4 percent of the going concern entities from 2008 deregistering with the SEC in 2009; the SEC is estimated to receive 518 fewer audit opinions for 2009 than 2008. In 2009, the most common reason for auditors' concern over their clients' futures and, therefore, a going concern opinion was net operating loss. When examining going concern opinions since 2000, 2003 and 2004 produced the lowest amount and 2007 produced the highest amount; in 2007, there was a 28 percent increase from the number of going concern opinions issued in both 2003 and 2004. It remains to be seen how the uncertain economic conditions of 2010 will affect entities and their futures and whether going concern opinions will remain high or decrease from a continued economic recovery.

SEC Circuit Breaker Rules

.14 On May 6, 2010, a market disruption occurred whereby the DJIA rapidly fell almost 1,000 points. The reasons for the fall have yet to be confirmed and are thought to have occurred due to a system glitch. Approximately 1 month later, the SEC approved rules that will require the exchanges and the Financial Industry Regulatory Authority to pause trading in certain individual stocks if the price moves 10 percent or more in either direction in a 5 minute period. The pause would only apply to stocks in the S&P 500 and would

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

give the markets the opportunity to attract new trading interest in an affected stock, establish a reasonable market price, and resume trading in a fair and orderly fashion. These rules are in effect on a pilot basis through December 10, 2010. The pilot period will be used to make appropriate adjustments to the parameters or operations of the circuit breakers based on the experience, and the scope of the rules will be expanded to securities beyond the S&P 500 as soon as practicable. Additionally, the SEC is considering recalibrating marketwide circuit breaker rules that were already in effect in May 2010 but were not triggered during the May 6 minicrash. By the end of June, these circuit breakers had been set off twice—both times for erroneous trades.

Legislative and Regulatory Developments

The Dodd-Frank Wall Street Reform and Consumer Protection Act

.15 On July 21, 2010, the president signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) into law in response to weaknesses in the financial services industry that are believed to have contributed to the recent economic recession. The Dodd-Frank Act was approved by the House on June 30, before narrowly clearing the Senate on July 15. As the economy is slowly recovering from the worst economic downturn since the Great Depression, this reform represents the greatest change to financial regulation since that time. It ends the era of hands-off regulation and increased deregulation of the financial services industry. The two main goals of the reform are to lower the systemic risks to the financial system and enhance consumer protections.

.16 The Dodd-Frank Act, among many other changes, will create new regulations for companies that extend credit to customers, exempt small public companies from Section 404(b) of the Sarbanes-Oxley Act of 2002 (SOX), make auditors of broker-dealers subject to Public Company Accounting Oversight Board (PCAOB) oversight, and change the registration requirements for investment advisers. It mandates over 60 different studies and reports by various oversight agencies on a range of issues. Because these new regulations will most likely be produced over the next few years, the timing of the impact of these reforms will be staggered. This will provide opportunities for the financial services industry to respond to the proposed regulations and work with regulators in developing reporting requirements, formats, and timetables that are practical to implement. Additionally, this will enable both regulators and the industry to meet their individual goals, which is important to the efforts to avoid market disruptions and inadvertently increase systemic risk. Large, complex institutions, in particular, and newly regulated entities with new reporting requirements will be challenged to update their systems and data infrastructures. Although the Dodd-Frank Act contains many provisions, some highlights that may be of particular interest to auditors are summarized in the following sections.

Financial Stability Oversight Council

.17 The Dodd-Frank Act creates a new systemic risk regulator called the Financial Stability Oversight Council (FSOC), which is to be led by the Treasury secretary. The two main goals of the FSOC are to identify risks to the financial stability of the United States and promote market discipline by eliminating the expectation of "too big to fail." To meet these goals, the FSOC has many powers, and it will identify any company, product, or activity that could threaten the financial system. The FSOC has the power to designate nonbank financial entities as systemically important and, through the Office of Financial Research (OFR), may collect reports from any bank holding entity or nonbank financial entity for the purpose of determining whether it poses a threat to U.S. financial stability. The new OFR is targeted to be established and fully operational no later than one year after enactment. The FSOC will be chaired by the Treasury secretary, and members will be heads of regulatory agencies, including the chairmen of the Federal Reserve, the Federal Deposit Insurance Corporation (FDIC), and the SEC, among others. The first meeting of the FSOC will be in October 2010. For those large entities deemed a threat to the U.S. financial system, the FSOC can, under the authority of a new orderly liquidation authority, authorize the FDIC to close such entities under the supervision of the Federal Reserve. Upon enactment of the Dodd-Frank Act, the FSOC, through the Federal Reserve, will also have the power to preemptively require a large, complex entity to divest some of its holdings if it poses a grave threat to the stability of the United States, although this is intended only as a last resort.

.18 The FSOC will make recommendations to the Federal Reserve to increase capital, leverage, liquidity, risk management, and other requirements as entities grow in size and complexity, with significant requirements for entities that pose a risk to the financial system. Final rules must be made by the Federal Reserve no later than 18 months after enactment. The current level of minimum leverage capital requirements is to be the floor for the future capital requirements to be developed. New and stricter capital requirements will have differing effects on financial entities: some may move toward lower-margin businesses that are less capital intensive but others may continue to strive for higher returns. Further, new forms of capital may be considered a possibility, such as contingent capital. This capital would effectively be subordinated, and other forms of debt that convert to common equity under prescribed conditions may be considered. Low interest rates and government support have helped many entities build up their capital. Some rating agencies have said that without this assistance, many entities would have lower credit ratings, and as the new rules are implemented, some may experience downgrades. Entities will likely be considering new ways to build and maintain capital or shed troubled assets. The FSOC has the ability to veto rules created by another new regulator, the Bureau of Consumer Financial Protection, with a two-thirds vote.

.19 The FSOC also has monitoring and reporting responsibilities. It will review and, as appropriate, submit comments to the SEC and any other standard setting body (for example, FASB) with respect to an existing or proposed accounting rule. Further, the FSOC must annually report to Congress significant financial market and regulatory developments, including accounting and insurance regulations, along with assessing their possible impact on the financial system's stability. Lastly, it will make recommendations on implementation of the Volcker Rule to aid regulators. These recommendations must be issued no later than six months after enactment, with final rulemaking no later than nine months after the FSOC's recommendations.

Bureau of Consumer Financial Protection

.20 The Bureau of Consumer Financial Protection (BCFP) is the new independent watchdog (although it will be housed at the Federal Reserve), and it consolidates most federal regulation of financial services offered to consumers. The BCFP will ensure consumers obtain clear, accurate information to shop for mortgages, credit cards, and other financial products (but not products subject to securities or insurance regulations); provide them with one powerful and dedicated advocate; and protect them from hidden fees and deceptive practices. The BCFP will also oversee the enforcement of federal laws intended to ensure the fair, equitable, and nondiscriminatory access to credit for individuals and communities. The director of the BCFP replaces the director of the Office of Thrift Supervision (OTS) on the FDIC board (the OTS was abolished by the Dodd-Frank Act). The BCFP will be led by an independent director appointed by the president and confirmed by the Senate, with a dedicated budget in the Federal Reserve. Functions currently handled by existing agencies are expected to be transferred to the BCFP, and the BCFP is expected to assume full authority for consumer financial protection no later than one year after enactment.

.21 A significant mortgage reform provision of the Dodd-Frank Act is the creation of a new federal standard applicable to home loans that requires institutions to ensure borrowers can repay the loans they were sold. Lenders and mortgage brokers who do not comply with the new rules prohibiting unfair lending practices will be held accountable through imposed penalties. The mortgage reforms from the Dodd-Frank Act are effective immediately. The Dodd-Frank Act does not address the government-sponsored entities Fannie Mae and Freddie Mac—they will be addressed separately through future legislation.

.22 The BCFP has the authority to examine and enforce regulations for banks and credit unions with assets of over $10 billion and all mortgage-related businesses (lenders, servicers, mortgage brokers, and foreclosure scam operators); providers of payday loans; and student lenders, as well as other nonbank financial entities that are large, such as debt collectors and consumer reporting agencies. Banks and credit unions with assets of $10 billion or less will be examined for consumer complaints by the appropriate regulator. The BCFP also is able to autonomously write rules for consumer protections governing all financial institutions (banks and nonbanks) offering consumer financial services or products. The Dodd-Frank Act recognizes that CPAs providing customary and usual accounting activities (which include accounting, tax, advisory, or other services that are subject to the regulatory authority of a state board of accountancy) and other services

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

incidental to such customary and usual accounting activities are already adequately regulated and, therefore, are not subject to the BCFP's authority.

.23 A national consumer complaint hotline will be created so consumers will have, for the first time, a single toll-free number to report problems with financial products and services.

Financial Planning Study

.24 The Government Accountability Office (GAO) is required to study the effectiveness of regulatory oversight of financial planners and make recommendations on how financial planning should be regulated.

Section 404(b) SOX Exemption

.25 The Dodd-Frank Act amends SOX to make permanent the exemption from its Section 404(b) requirement for nonaccelerated filers (those with less than $75 million in market capitalization) that had temporarily been in effect by order of the SEC. Section 404(b) of SOX requires companies to obtain an auditor's report on management's assessment of the effectiveness of the company's internal control over financial reporting. It is important to note that Section 404(a) of SOX, which requires management's attestation on internal control over financial reporting, is still required for nonaccelerated filers. The Dodd-Frank Act also requires the SEC to complete a study within 9 months of the act's enactment on how to reduce the burden of Section 404(b) SOX compliance for companies with market capitalizations between $75 million and $250 million. The study will consider whether any such methods of reducing the burden, or a complete exemption, would encourage companies to list on U.S. exchanges.

.26 Another study required by the Dodd-Frank Act is for the GAO to evaluate whether issuers that are exempt from Section 404(b) requirements have fewer or more restatements than those that are required to comply, how the cost of capital compares for exempt issuers, whether any difference exists in investor confidence in the integrity of the financial statements of exempt versus complying issuers, and whether exempted entities should be required to disclose to investors the absence of Section 404(b) attestation and the costs and benefits of voluntary compliance. The report of findings from the second study is due to Congress within three years.

The PCAOB

.27 The Dodd-Frank Act also provides for the PCAOB to create a program for registering and inspecting the auditors of broker-dealers, including standard setting and enforcement. Currently, all auditors of broker-dealers must be registered with the PCAOB. Covered auditors will now be required to follow PCAOB guidance, although the Dodd-Frank Act allows the PCAOB, in its inspection rule, to differentiate among broker-dealer classes and to potentially exempt introducing brokers, such as those who do not engage in clearing, carrying, or custody of client assets.

.28 The PCAOB is also now authorized, in certain circumstances, to share information with foreign audit oversight authorities. This will facilitate PCAOB cooperation with its foreign counterparts and PCAOB inspection of non-U.S. firms. When SOX was enacted, few other countries had similar audit oversight bodies, and therefore, no provisions in SOX existed to authorize sharing information with foreign authorities. Since then, many countries have established, or are in the process of establishing, similar audit oversight bodies.

.29 Further, any registered public accounting firm (domestic or foreign) that relies, in whole or in part, on the work of a foreign public accounting firm in issuing an audit report, performing audit work, or conducting an interim review must (*a*) produce the foreign firm's audit work papers and all related documents if the SEC or PCAOB requests them and (*b*) secure the foreign firm's agreement to produce those documents as a condition of relying on the work of that firm. Any foreign firm that performs work for a domestic registered public accounting firm must provide the domestic firm with written consent and power of attorney designating the domestic firm as an agent on whom the SEC or PCAOB may serve a request for documents. Any foreign firm that performs material services on which a registered public accounting firm relies must

designate to the SEC or PCAOB an agent in the United States on whom the SEC or PCAOB may serve a request for documents. The SEC or PCAOB may allow a foreign firm to meet document production obligations through alternate means, such as through the SEC's or PCAOB's foreign counterparts.

Derivatives Trading

.30 The Dodd-Frank Act provides the SEC and the Commodity Futures Trading Commission (CFTC) with the authority to regulate over-the-counter (OTC) derivatives and requires central clearing and exchange trading for derivatives that can be cleared. The SEC will have authority over security-based swaps (including credit default swaps). The CFTC will have authority over all other swaps, including energy-rate swaps, interest-rate swaps, security-based swap agreements, and broad-based security group or index swaps. Standardized swaps will be traded on an exchange or in other centralized trading facilities, which will promote transparency; standardized derivatives will also have to be handled by central clearinghouses. *Cleared* describes when trades are routed through a central clearinghouse that covers losses if a party to the trade is unable to complete the transaction. As a safeguard, many derivative traders will also be required to post margin to ensure all obligations can be paid and to offset the general risks that derivative trading poses to the financial system. Clearing and exchange trading requirements are expected to become effective 360 days following enactment.

.31 The Dodd-Frank Act also provides regulators with the authority to impose capital and margin requirements on swap dealers and major swap participants, not end users. Rules prescribed by the CFTC or the SEC must be promulgated no later than 360 days after enactment. By making the market more transparent, the pricing of common kinds of derivatives from the open marketplace may be reduced and would allow a wider range of entities to hedge their risks; customized derivatives could still have higher prices. The credit exposure from derivative transactions will be added to banks' lending limits. However, the new rules may increase some costs of derivative trading because with the increase in transparency and price competition between securities dealers, the dealers will face decreased profit margins and may charge a higher trading fee. Banks are allowed to continue engaging in principal transactions involving interest-rate, foreign-exchange, gold, silver, and investment-grade credit default swaps, subject to Volcker Rule limitations on proprietary trading. For commodities, most other metals, energy, and equities, banks will have to shift their swap operations to a separately capitalized affiliate within the holding entity. Under an end user exemption, nonfinancial firms can still use derivatives to hedge and manage the commercial risks associated with their business.

Registered Investment Advisers and Hedge Funds

.32 The Dodd-Frank Act will require advisers to hedge funds and private equity funds with over $150 million in assets to register with the SEC and be subject to its oversight. Venture capital funds and family offices will be exempt from registration with the SEC. The new registration requirement will become effective 1 year after enactment; however, any investment adviser may, at the discretion of the investment adviser, register with the SEC during that 1-year period. This new requirement may cause smaller funds to incur greater costs and possibly force some of them to close or raise fees to investors. Currently, the Investment Advisers Act of 1940 requires investment advisers with over $30 million in assets under management to register with the SEC. Under the new reform, this threshold for federal regulation will be raised to $100 million, with certain exceptions. This change will increase the number of small advisers under state supervision and allow the SEC to focus on newly registered hedge funds. Advisers will provide information about their trades and portfolios necessary to assess their systemic risk. The exemption in the Investment Advisers Act of 1940 for advisers with fewer than 15 clients has also been eliminated.

.33 Investment advisers, now including hedge funds, must take steps to safeguard client assets over which such adviser has custody, including, without limitation, verification of such assets by an independent public accountant, as the commission may, by rule, prescribe. The Dodd-Frank Act also raises the standard for individuals to qualify as accredited investors, a basic threshold for purchasing private investments; these investors must now have $1 million, excluding the value of their primary residence. The prior standard was simply $1 million.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

SEC and Investor Protections

.34 Because it lowers the legal standard from "knowing" to "knowing or reckless," the Dodd-Frank Act may make it easier for the SEC to prosecute aiders and abettors of those who commit securities fraud under the Securities Act of 1933, the Securities Exchange Act of 1934, the Investment Company Act of 1940, and the Investment Advisers Act of 1940. This change will increase the difficulty for a defendant to fight a civil enforcement action because the SEC does not have to show that the person intended to aid another person's violation but only that reckless conduct furthered the violation. The SEC and the Department of Justice will also now have the authority to bring civil or criminal law enforcement proceedings involving transnational or extraterritorial securities frauds. Additionally, the Dodd-Frank Act authorizes 2 studies on these matters. One of the studies directs the GAO to investigate the impact of authorizing private rights of action for aiding and abetting claims and to release its findings within 1 year. The second study directs the SEC to examine whether private rights of action should be authorized for transnational or extraterritorial claims, and that study is to be completed within 18 months.

.35 The Dodd-Frank Act gives the SEC the authority to impose a fiduciary duty on brokers who give investment advice (that is, the advice must be in the best interest of their customers—currently, this applies to investment advisers). Currently, brokers are only required to recommend investments that are suitable for customers. The SEC must first study this issue and deliver a report to Congress on the costs and benefits. The Office of the Investor Advocate (OIA) will also be created within the SEC to identify areas where investors have significant problems dealing with the SEC and to provide them with assistance. Another responsibility of this office will be to identify areas in which investors would benefit from changes in the regulations of the SEC. The OIA must submit its first annual report to Congress no later than June 30, 2011.

.36 A whistle-blower program, with rewards to encourage securities violations reports, was created by the Dodd-Frank Act. An exception is provided for any whistle-blower who gains information through the performance of an audit of financial statements. Employers are prohibited from retaliating against whistle-blowers. Subsidiaries and affiliates that are consolidated with public companies for financial accounting purposes will become subject to the whistle-blower protections in SOX.

.37 The SEC is permitted to use fee collections to establish a reserve fund of up to $100 million, which can be used to fund special projects. The SEC may submit its annual budget directly to Congress without requiring the prior approval of the White House. The SEC has publicly stated that it will need to hire approximately 800 new people to carry out the new reforms (given the new required enforcement, the 5 offices created within the SEC, and the studies to be carried out) and to develop the specifics of new regulations.

Executive Compensation

.38 The Dodd-Frank Act requires a nonbinding shareholder vote on executive pay and golden parachutes. This is intended to give them the power to hold executives accountable. Although the vote is nonbinding, a "No" vote by shareholders would likely force management to respond in some way and can still have a beneficial effect. At a public company's first shareholder meeting following the end of the six month period after enactment, management must give shareholders the opportunity to vote on how frequently shareholders will have a "say on pay" (that is, annually, every two years, or every three years). The SEC now has the authority to grant shareholders proxy access to nominate directors, which is intended to help shift management's focus from short-term profits to long-term growth and stability. However, shareholders would need to exercise this right for it to have any possibility of an impact. The SEC is allowed to exempt small businesses from this requirement. The SEC issued a proposed proxy access rule last year but has been waiting for the clear legal authority that this act provides prior to moving ahead with a final rule. The SEC is already in the process of drafting proxy access rules for public comment. The Dodd-Frank Act also requires entities to disclose in their annual proxy statement the median of annual total compensation to all employees, other than their CEO; the annual total compensation of the CEO; and the ratio of these two amounts. Disclosure is also required on why the chairman of the board and CEO positions are separate or combined.

.39 Compensation based on financial statements that are restated must be returned for the 3 years preceding the restatement in an amount equal to the excess of what would have been paid under the restated results. This is required regardless of whether the executive was involved in the misconduct that led to the restatement. Listing exchanges will enforce the compensation policies. The Dodd-Frank Act also requires directors of compensation committees to be independent of the entity (*independent* as defined by its exchange) and its management. The members of that committee are required to select consultants, legal counsel, and other advisers only after taking into account independence factors established by the SEC. The SEC will write these rules, and these final rules are required not later than 360 days after enactment. New disclosures regarding compensation will also be required, such as the incentive-based compensation policies. Further, the SEC is required to clarify disclosures on compensation, including requirements to provide information that shows the relationship between executive compensation actually paid and the financial performance of the issuer.

.40 Overall, the level and complexity of the relationships that entities have with their regulators will increase because of the passage of the Dodd-Frank Act. Already, many firms have chief risk officers who sit above any risk management structures inside business units and try to manage the firm's overall risk profile. This position is important because it creates a single senior point of contact for regulators seeking a high-level understanding of where a firm may have risk concentrations with possible systemic implications. Entities that don't have this position will likely reconsider the creation of one.

Ending "Too Big to Fail" Bailouts

.41 The Dodd-Frank Act is intended to reduce the risk that large firms will take excessive risk because they believe they are, in effect, guaranteed to be bailed out in the event of failure. Bailouts like this occurred during the recent economic recession. Although that is an intent of the specific changes required by this reform, whether that goal will be achieved can only be determined over time. The goal is that taxpayers will not again be responsible to save a failing financial entity or cover the cost of its liquidation.

.42 Under the new Volcker Rule of the Dodd-Frank Act, a banking entity will now be prohibited from proprietary trading; acquiring or retaining any equity, partnership, or other ownership interest in a hedge fund or private equity fund; and sponsoring a hedge fund or private equity fund. Final rulemaking on the Volcker Act must be no later than nine months after the FSOC's recommendations on implementation considerations. *Proprietary trading* consists of transactions made by an entity that affect the entity's own account but not the accounts of its clients; the entity is using its own money to place directional market bets that are unrelated to serving customers. Some of the benefits to bank entities of proprietary trading, which will now be eliminated, include the following:

- Allows the entity to profit on its own instead of collecting commissions and fees from clients
- Allows the entity build an inventory of securities, which can be useful if a client places a trade in an illiquid market
- Allows the bank to make a market when it is assigned to ensure the liquidity for a given security

.43 A major bank estimated that 10 percent of its revenue came from proprietary trading, but that may vary depending on the size and complexity of the institution. Banks are allowed to make de minimis investments in hedge funds and private equity funds, using no more than 3 percent of their tangible common equity in all such funds combined. Also, a bank's investment in a private fund may not exceed 3 percent of the fund's total ownership interest. Nonbank financial institutions supervised by the Federal Reserve will also have restrictions on proprietary trading, hedge fund investments, and private equity investments.

.44 The Dodd-Frank Act also requires large, complex financial entities to periodically submit plans for their rapid and orderly shutdown should the company go under (a "funeral plan" or "living will"). No later than 18 months after enactment, the Federal Reserve Board and the FDIC must issue final rules implementing the resolution plan requirement. Entities that fail to submit acceptable plans will have higher capital requirements and restrictions on growth and activity, as well as divestment. This will create an increased focus on entity-level financial and operational concerns for these large, complex entities.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.45 Additionally, an orderly liquidation mechanism for the FDIC to unwind failing systemically significant financial entities that pose a risk to the financial system has been created. The mechanism provides that shareholders and unsecured creditors bear losses and management and culpable directors will be removed. The FDIC will only be allowed to borrow funds to liquidate an entity when it expects to be repaid from the assets of the entity being liquidated, and the government will be first in line for repayment. Funds that are not repaid from the sales of the entity's assets will be repaid first through the clawback of any payments to creditors that exceeded liquidation value and then through assessments on large financial entities (with the riskiest ones paying more). Taxpayers will bear no cost for liquidations, and the bailout of an individual entity will become prohibited by the Federal Reserve. To prevent bank runs, the FDIC can guarantee debt of solvent insured banks, but only after meeting serious requirements.

Other Bank and Thrift Regulations

.46 The Dodd-Frank Act abolishes the OTS and transfers authority mainly to the Office of the Comptroller of the Currency, which also regulates federally chartered national banks. However, the thrift charter has been preserved. There will be a permanent increase in deposit insurance for banks, thrifts, and credit unions to $250,000, which is retroactive to January 1, 2008. Cash limits on Securities Investor Protection Corporation protection is also increased from $100,000 to $250,000, subject to periodic adjustments for inflation. The prohibition of banks paying interest on demand deposits has been repealed. Additionally, the Dodd-Frank Act removes a regulatory arbitrage opportunity by prohibiting a bank from converting its charter (unless both the old and new regulator do not object) in order to avoid an enforcement action.

Rating Agencies

.47 Rating agencies became subject to increased scrutiny, given their role in the subprime mortgage crisis. The Dodd-Frank Act creates an Office of Credit Ratings at the SEC that must examine credit ratings agencies at least once per year and make key findings public. These agencies will now be subject to expert liability with the nullification of Rule 436(g), which had provided an exemption for credit ratings provided by credit rating agencies from being considered a part of the registration statement. In order to include a credit rating agency's rating in a registration statement, the registrant must file the credit rating agency's consent along with the registration statement. This will make credit rating agencies vulnerable to lawsuits when underwriters include their assessments in documents used to sell debt; they will now face the same legal risks as accountants and other parties who participate in bond sales. Investors can now bring private rights of action against ratings agencies for a knowing or reckless failure to conduct a reasonable investigation of the facts or to obtain analysis from an independent source. The SEC also has the authority to deregister a credit rating agency for providing bad ratings over time. The SEC will be required to investigate any conflicts of interest involved in financial entities picking the agency they believe will give them the highest ratings. Credit rating agencies will be required to disclose their methodology and track record. The SEC will conduct a study on the feasibility of a public or private entity that would be responsible for the assignment of a credit rating to the credit rating agencies.

.48 New rules were also made to help ensure the objectivity and independence of the employees of credit rating agencies. These agencies must conduct a 1-year lookback review when an employee goes to work for an obligor or underwriter of a security or money market instrument subject to rating by that credit rating agency. A report to the SEC is also required when certain employees of a credit rating agency go to work for an entity that the agency has rated in the previous 12 months. Ratings analysts will also be required to pass qualifying exams and take continuing education.

Other Requirements and Additional Information

.49 The Dodd-Frank Act also makes changes to securitization rules. Entities that sell products such as mortgage-backed securities will now be required to retain at least 5 percent of the credit risk, unless the underlying loans meet standards that reduce risk. The federal banking agencies must prescribe final rules for credit risk retention no later than 270 days after enactment. Issuers of these securities will also be required to disclose more information about the underlying assets, including analysis of the quality of the underlying

assets. A study is mandated regarding the impacts of the new credit risk retention requirements and FASB Statement No. 166, *Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140*, and No. 167, *Amendments to FASB Interpretation No. 46(R)*, on asset-backed securities.

.50 The first ever office in the federal government focused on insurance will be created, which will monitor the insurance industry for systemic risk purposes, among its other responsibilities.

.51 The impact of these new reforms on the capital markets and credit availability is difficult to predict. Although strengthening transparency is an appropriate response to the recent economic recession, the more stringent rules may affect economic recovery. Additionally, with the new capital requirements, regulators are likely to disapprove of any perceived efforts by entities to avoid compliance, and those firms that do so may risk political backlash and reputational harm. A copy of the full Dodd-Frank Act, as signed by the president, can be found at www.gpo.gov/fdsys/pkg/BILLS-111hr4173ENR/pdf/ BILLS-111hr4173ENR.pdf. The AICPA is also following any developments related to the Dodd-Frank Act on our website at www.aicpa.org under "Advocacy—Federal Issues."

The Health Care and Education Reconciliation Act of 2010 and the Patient Protection and Affordable Care Act

.52 In March 2010, the president signed into law a sweeping overhaul of the health care system. Almost everyone in the United States will be affected by these changes—individuals, insurance companies, health care providers, and employers. The three primary goals of the reform are to expand coverage to those without health insurance, reform the delivery system of benefits to improve quality, and decrease the costs of providing health care. The various provisions of the reform will become effective over time, through 2020. The new laws contain many changes for employers to consider for financial reporting purposes, in addition to many new tax rules to help offset the overall cost of the reform.

.53 The complete changes are contained in two acts. The Health Care and Education Reconciliation Act of 2010 was signed on March 30 and is a reconciliation bill that amends the Patient Protection and Affordable Care Act signed into law by the president one week earlier. In April, the SEC issued a staff announcement, *Accounting for the Health Care and Education Reconciliation Act of 2010 and the Patient Protection and Affordable Care Act*, to address questions that have arisen about the effect, if any, that the different signing dates might have on accounting for the two acts. This timing difference, related solely to the signing dates, should not have an impact on a majority of registrants because the acts were both signed within a relatively short time period, which for the vast majority of entities, falls into the same reporting period. However, there may be a limited number of registrants with a period-end that falls between the signing dates for which the timing difference could raise questions about whether the different signing dates have an accounting impact.

.54 After consultation with the FASB staff, the Office of the Chief Accountant would not object to a view that the two acts should be considered together for accounting purposes. That is, in this specific fact pattern, the SEC staff would not object to a registrant incorporating the effects of the Health Care and Education Reconciliation Act of 2010 when accounting for the Patient Protection and Affordable Care Act. This view is based in part on the SEC staff's understanding that the two acts, when taken together, represent the current health care reform as passed by Congress and signed by the president. The SEC staff does not believe that it would be appropriate to analogize to this view in any other fact patterns.

Significant Accounting and Tax Considerations

.55 As background, FASB ASC 740-10-30-2 states that the following basic requirements are applied to the measurement of current and deferred income taxes at the date of the financial statements:

- The measurement of current and deferred tax liabilities and assets is based on provisions of the enacted tax law; the effects of future changes in tax laws or rates are not anticipated.
- The measurement of deferred tax assets is reduced, if necessary, by the amount of any tax benefits that, based on available evidence, are not expected to be realized.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.56 FASB ASC 715-60-35-102 further explains that benefit coverage for medical claims by governmental programs or other providers of health care benefits should be assumed to continue as provided by the present law and other providers, pursuant to their present plans. Consistent with FASB ASC guidance, presently enacted changes in the law or amendments of the plans of other health care providers that take effect in future periods and that will affect the future level of their benefit coverage should be considered in current period measurements for benefits expected to be provided in those future periods. Future changes in laws concerning medical costs covered by governmental programs and future changes in the plans of other providers should not be anticipated.

.57 The two primary accounting considerations resulting from this reform are the effects of the tax law changes on deferred income tax balances and other postretirement health benefits. One of the most significant changes relates to the government subsidy for providing qualifying prescription drug coverage to Medicare-eligible retirees becoming an offset for prescription drug income tax deductions. Specifically, because entities will need to reduce their income tax deduction for providing prescription drug coverage by the subsidy received, they currently need to record a charge to earnings to write off a portion of their deferred tax assets related to postretirement health care obligations. Such deferred tax assets were based on the gross liability amount. Because the tax deductible prescription drug costs liability will be reduced by the subsidy, the deferred tax asset will be computed net of the subsidy, resulting in a lower deferred tax asset. The federal subsidy will not reduce the tax deductions until 2013. Even though the changes may not be effective until future periods, the effects are accounted for in the period that includes the enactment date. FASB ASC 715-60 discusses accounting and reporting guidance for other postretirement plans, including the Medicare prescription drug plan. Many public entities have already posted large noncash charges in early 2010 related to the nondeductibility of the subsidy.

.58 Some of the other provisions of the reform that may affect an entity's tax position include the nondeductible pharmaceuticals fee, the medical device excise tax, and the therapeutic discovery project tax credit, which will have an effect on the pharmaceutical and medical device industries. Additionally, employer group health plans may not impose lifetime limits and can only impose "restricted" annual limits beginning with the 2011 plan year (for calendar year plans); no annual limits would be permitted beginning in 2014. Because these health benefits can no longer be limited, entities may need to increase accruals for future medical obligations. Many small businesses and tax-exempt organizations that provide health insurance coverage to their employees will now qualify for a special tax credit that is designed to encourage small employers to offer health care coverage for the first time or maintain the coverage they have.

.59 Lastly, under the new reform, a 40 percent penalty will apply to tax understatements attributable to transactions lacking economic substance (20 percent with adequate disclosure) or failing to meet the requirements of any similar rule of law. A transaction is treated as having economic substance only if the transaction changes in a meaningful way (apart from federal income tax effects) the taxpayer's economic position, and the taxpayer has a substantial purpose (apart from federal income tax effects) for entering into the transaction.

.60 The full text of these acts can be found at http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_laws&docid=f:publ152.111.pdf and http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_laws&docid=f:publ148.111.pdf. Readers are also encouraged to refer to the Audit Risk Alerts *Health Care Entities—2010/11* (product no. 0223410) and *Not-for-Profit Entities—2010* (product no. 0224210).

PCAOB Constitutionality

.61 On June 28, 2010, the Supreme Court ruled in the lawsuit challenging the constitutionality of the PCAOB. When the PCAOB was set up under SOX, its board members were appointed by the SEC and could be removed only for cause. The Supreme Court ruled, in a 5-4 vote, that although the manner in which the PCAOB was constituted was constitutionally invalid, SOX itself was not invalidated. Rather, the Supreme Court severed from the rest of SOX the provisions relating to the removal of PCAOB board members. The consequence of the Supreme Court's decision is that PCAOB board members will now be removable by the SEC at will, instead of only for good cause. Essentially, this decision has no material impact on the workings of the PCAOB, and all PCAOB programs will continue to operate as usual, including registration, enforcement, and standard-setting activities.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.62 The recent economic conditions and regulatory actions described in this alert may cause additional risk factors that had not previously existed or did not have a material effect on audit clients in prior years. Some risks that may affect an entity in the current economic environment are as follows:

- Marginally achieving explicitly stated strategic objectives
- Volatile real estate and business markets
- Significant measurement uncertainty, including accounting estimates and fair value measurements
- Potentially erroneous or fraudulent activity due to decreased staffing and resurgence of business activity
- The continuing evolution of the postrecessionary marketplace

.63 Although many of these risks are not new to businesses, consideration of the ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks. As noted in paragraph .17 of AU section 312, some possible audit responses to significant risks of material misstatement include increasing the extent of audit procedures, performing procedures closer to year-end, or increasing audit procedures to obtain more persuasive evidence. Additionally, given the constant changing status of economic conditions that could affect your client, auditors should consider modifying audit procedures to ensure that risks are still adequately addressed.

Enterprise Risk Management

.64 To meet the challenges and risks in today's business and economic environment, many entities have turned to enterprise risk management (ERM). Further, the recent economic crisis has led to a renewed focus on how senior executives approach risk management and the role of their boards of directors in risk oversight. The purpose of ERM is to address processes, procedures, and risk on an entity-wide basis to enable management to holistically understand the business risks that the entity faces. Some characteristics of the ERM model include strengthening communication; additional training, including cross-training, process, and internal control improvement; and entity-wide participation.

.65 Once implemented, managers of individual business components can make appropriate decisions based on an understanding of the risks that each business component encounters and how those risks affect other components and the entity as a whole. The purpose of this process is not to reduce business risk but rather to provide the knowledge that management needs to effectively assess risks and to then plan appropriate strategies to achieve the entity's business objectives. A good ERM framework allows the entity to foresee potential consequences from future events, make necessary changes to minimize risk, manage the negative fallout if an event materializes, and capitalize on the opportunities that it presents for growth.

.66 ERM can help an entity articulate its major risks and identify the nature of those risks, then develop a process for measuring, monitoring, and controlling these risks. ERM can help shape the commentary in MD&A, but not all ERM-related information will be relevant and important enough to warrant mention in the MD&A. The presence and use of an ERM system is something that many entities include in the MD&A section of their financial statements. This provides investors, analysts, and rating agencies with a better picture and more insight into the goals of the entity.

.67 A strong ERM, or the lack thereof, is an important consideration for an external auditor when understanding and assessing the entity's environment, internal control, and corporate governance, in addition to the overall audit risk. Further, the risk-based approach of current auditing has nurtured the concept of an effective financial statement audit being intertwined with business risks and, therefore, ERM. Business risks of any nature ultimately affect the risk of misstatement in the financial statements. In many entities, an internal

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

auditor conducts an audit on the effectiveness of the framework by examining that the risk management practices defined in the framework are in use and operating as expected. In all entities, management is the owner of the ERM framework and surrounding processes.

.68 Additional information about ERM can be obtained from the Committee of Sponsoring Organizations of the Treadway Commission (COSO's) website at www.coso.org.

.69 Although it is impossible to predict and include all accounting, auditing, and attestation issues that may affect your engagements, we cover in this alert the primary areas of concern. Continue to remain alert to economic, legislative, and regulatory developments, as well as the associated accounting, auditing, and attestation issues as you perform your engagements.

PCAOB Auditing Standards on Risk Assessment

.70 In August 2010, the PCAOB adopted a suite of eight auditing standards related to the auditor's assessment of, and response to, risk in an audit. These standards were initially proposed in late 2008 and reproposed in late 2009. These risk assessment standards will benefit investors by setting forth requirements that enhance the effectiveness of the auditor's assessment of, and response to, the risks of material misstatement in the financial statements. They are applicable to audit procedures spanning from the initial planning stages of the audit to the evaluation of the audit results. Improvements in the risk assessment standards should enhance integration of the audit of financial statements with the audit of internal control over financial reporting by articulating a process for identifying and assessing risks of material misstatements that apply to both portions of the integrated audit.

.71 The new auditing standards, with a brief description of each, are as follows:

- Auditing Standard No. 8, *Audit Risk*, discusses the auditor's consideration of audit risk in both an integrated audit and an audit of financial statements only. It describes the components of audit risk and the auditor's responsibilities for reducing it to an appropriately low level.
- Auditing Standard No. 9, *Audit Planning*, establishes requirements for planning an audit, such as assessing important matters and establishing an appropriate audit strategy.
- Auditing Standard No. 10, *Supervision of the Audit Engagement*, is applicable to the engagement partner and other team members who supervise during the audit. It sets forth requirements for supervision of the audit engagement and the work of other engagement members. Related to this topic, the PCAOB also recently issued a release discussing the provision of SOX that authorizes the PCAOB to impose sanctions on registered public accounting firms and their supervisory personnel for failing to reasonably supervise associated persons.
- Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*, describes the auditor's responsibilities for consideration of materiality in planning and performing an audit.
- Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, establishes requirements for auditors in identifying and assessing risks of material misstatement, including information-gathering procedures.
- Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, establishes requirements for responding to those identified risks of material misstatement through general audit procedures. It also includes audit procedures related to significant accounts and disclosures.
- Auditing Standard No. 14, *Evaluating Audit Results*, establishes requirements for evaluating audit results and the sufficiency of appropriate audit evidence.
- Auditing Standard No. 15, *Audit Evidence*, discusses what constitutes audit evidence and how to design and perform audit procedures to support the opinion expressed in the auditor's report.

.72 These risk assessment standards will supersede the following six PCAOB interim standards and related amendments: AU section 311, *Planning and Supervision*; AU section 312, *Audit Risk and Materiality in Conducting an Audit*; AU section 313, *Substantive Tests Prior to the Balance Sheet Date*; AU section 319, *Consideration of Internal*

Control in a Financial Statement Audit; AU section 326, *Evidential Matter*; and AU section 431, *Adequacy of Disclosure in Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Interim Standards). The standards, if approved by the SEC, will be effective for audits of fiscal periods beginning on or after December 15, 2010.

Engagement Quality Review for Issuers

.73 In January 2010, the PCAOB announced that the SEC had approved Auditing Standard No. 7, *Engagement Quality Review* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards), which was adopted by the PCAOB in July 2009. Auditing Standard No. 7 provides a framework for the engagement quality reviewer to objectively evaluate the significant judgments made and related conclusions reached by the engagement team in forming an overall conclusion about the engagement. Auditing Standard No. 7 is expected to increase the likelihood that a registered public accounting firm will catch any significant deficiencies before it issues its audit report. As a result, more work may be necessary under this standard than performed under the existing requirements for concurring partners. However, Auditing Standard No. 7 explains that the procedures required by the engagement quality reviewer are different in nature than those required to be performed by the engagement team. Further, if the engagement quality reviewer deems more work is required before giving approval of issuance, the engagement team is responsible for completing that work.

.74 This standard applies to all audit engagements, and engagements to review interim financial information, conducted pursuant to the standards of the PCAOB, and it supersedes the PCAOB's interim concurring partner review requirement. Auditing Standard No. 7 is effective for engagement quality reviews of audits and interim reviews for fiscal years that began on or after December 15, 2009. For a public, calendar-year company, this standard is applicable for the quarter ended March 31, 2010. For the full text of the standard, readers are encouraged to visit the PCAOB's website at www.pcaob.org.

Question and Answer on Auditing Standard No. 7

.75 Subsequent to the issuance of Auditing Standard No. 7, the PCAOB issued Staff Question and Answer, *Auditing Standard No. 7*, Engagement Quality Review (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 100.10), to provide further implementation guidance on the documentation requirements of the standard. This guidance focuses on the required documentation of the interactions between the engagement quality reviewer and the engagement team, specifically as it relates to a specific example in Auditing Standard No. 7. The question and answer clarifies that the standard does not require documentation of all of the interactions between the engagement quality reviewer and the engagement team. Further, it explains that the example is intended to illustrate how the documentation requirements of the standard should be applied once a reviewer concludes that a significant engagement deficiency exists. This question and answer can be located at http://pcaobus.org/Standards/QandA/2010-02-19_EQR_QA%20_2.pdf.

PCAOB Practice Alert on Using the Work of Others

.76 In July 2010, the PCAOB issued Staff Audit Practice Alert No. 6, *Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants From Outside the Firm* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.06), because it observed that a number of registered public accounting firms located in the United States have been issuing audit reports on financial statements filed by issuers that have substantially all of their operations outside of the United States. This practice alert contains reminders for registered firms of their obligations when using the work of other firms or using assistants engaged from outside the firm, such as in the aforementioned situation. It also describes the circumstances under which the firm issuing the audit report may use the work and reports of another auditor.

.77 Auditors who engage assistants from outside their firm are governed by the same standards regarding planning the audit and supervising assistants when audit work is performed by assistants employed by the auditor's firm. Observations from the PCAOB's inspection process suggest that some firms may be issuing

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

audit reports based on the work of another firm, or using the work of assistants engaged from outside the firm, without complying with the relevant PCAOB standards. The practice alert is broken down into two sections:

- Using the work of other auditors. This discussion is based upon AU section 543, *Part of Audit Performed by Other Independent Auditors* (AICPA, *Professional Standards*, vol. 1).
- Engaging assistants from outside the firm. This discussion is based upon numerous sections of auditing guidance.

.78 The full text of this practice alert can be found at http://pcaobus.org/Standards/QandA/2010-07-12_APA_6.pdf.

PCAOB Practice Alert on Significant Unusual Transactions

.79 In April 2010, the PCAOB issued Staff Audit Practice Alert No. 5, *Auditor Considerations Regarding Significant Unusual Transactions* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.05), which is intended to remind auditors of public companies about their responsibilities to assess and respond to the risk of material misstatement of the financial statements due to error or fraud posed by significant unusual transactions. Practice Alert No. 5 compiles existing requirements from PCAOB standards and groups them into the following categories: identifying and assessing risks of material misstatement, responding to risks of material misstatement, consulting others, evaluating financial statement presentation and disclosure, communicating with audit committees, and reviewing interim financial information. Practice Alert No. 5 can be accessed at http://pcaobus.org/Standards/QandA/04-07-2010_APA_5.pdf.

Supplementary and Other Information Related to Financial Statements

.80 In February 2010, the AICPA Auditing Standards Board (ASB) issued a trio of auditing standards related to the auditor's responsibility for other information, supplementary information, and required supplementary information. These three standards supersede AU sections 550A, *Other Information in Documents Containing Audited Financial Statements*; 551A, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*; and 558A, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1). All three standards are effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Other Information in Documents Containing Audited Financial Statements

.81 Statement on Auditing Standards (SAS) No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 550), addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon. In this SAS, *other information* is defined as financial and nonfinancial information (other than the financial statements and the auditor's report thereon) that is included in a document containing audited financial statements and the auditor's report thereon, excluding required supplementary information. *Documents containing audited financial statements* refers to annual reports (or similar documents) that are issued to owners (or similar stakeholders) and annual reports of governments and organizations for charitable or philanthropic purposes that are available to the public that contain audited financial statements and the auditor's report thereon. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the financial statements does not cover other information, and the auditor has no responsibility for determining whether such information is properly stated. This SAS establishes the requirement for the auditor to read the other information of which the auditor is aware because the credibility of the audited financial statements may be undermined by material inconsistencies between the audited financial statements and other information. This SAS also may be applied, adapted as necessary in the circumstances, to other documents to which the auditor, at management's request, devotes attention.

Supplementary Information in Relation to the Financial Statements as a Whole

.82 SAS No. 119, *Supplementary Information in Relation to the Financial Statements as a Whole* (AICPA, *Professional Standards*, vol. 1, AU sec. 551), addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. For purposes of generally accepted auditing standards (GAAS), *supplementary information* is defined as information presented outside the basic financial statements, excluding required supplementary information that is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Such information may be presented in a document containing the audited financial statements or separate from the financial statements.

.83 The information covered by this SAS is presented outside the basic financial statements and is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. This SAS also may be applied, with the report wording adapted as necessary, when an auditor has been engaged to report on whether required supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Required Supplementary Information

.84 SAS No. 120, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 558), addresses the auditor's responsibility with respect to *required supplementary information*. The SAS defines *required supplementary information* as information that a designated accounting standard setter requires to accompany an entity's basic financial statements. Required supplementary information is not part of the basic financial statements; however, a designated accounting standard setter considers the information to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. In addition, authoritative guidelines for the methods of measurement and presentation of the information have been established. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the basic financial statements does not cover required supplementary information. SAS No. 120 explains that the objectives of the auditor, when a designated accounting standard setter requires information to accompany an entity's basic financial statements, are to perform specified procedures in order to

- describe, in the auditor's report, whether required supplementary information is presented and
- communicate therein when some or all of the required supplementary information has not been presented in accordance with guidelines established by a designated accounting standard setter or when the auditor has identified material modifications that should be made to the required supplementary information for it to be in accordance with guidelines established by the designated accounting standard setter.

Auditing Fair Value Measurements

.85 In addition to understanding the looming questions relative to fair value accounting, auditors should be aware of audit issues involving fair value measurements. Particular assets, liabilities, and components of equity are measured or disclosed at fair value in the financial statements, and it is management's responsibility to make the fair value measurements and disclosures. When auditing these fair values to ensure they are in conformity with U.S. GAAP, auditors should consult AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1).

.86 In regard to analyzing the sufficiency of the audit evidence, the strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method should incorporate common market assumptions. If common market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

of the entity's process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with U.S. GAAP. During this testing, the auditor also may identify any possible indicators of impairment. According to paragraph .23 of AU section 328, substantive tests of the fair value measurements may involve (*a*) testing management's significant assumptions, the valuation model, and the underlying data; (*b*) developing independent fair value estimates for corroborative purposes; or (*c*) reviewing subsequent events and transactions. Paragraph .26 also notes that when testing the fair value measurements and disclosures, the auditor should evaluate whether management's assumptions are reasonable and reflect, or are not inconsistent with, market information. According to FASB ASC 820, *Fair Value Measurements and Disclosures*, under U.S. GAAP this may include evaluating the following:

- Whether a significant decrease has occurred in the volume and level of activity for the asset or liability when compared with normal market activity, which may include consideration of the number of recent transactions, the date of the most recent price quotes, consistency among price quotes, increases in implied liquidity risk premiums, increases in the bid-ask spread, and the amount of publicly available information.
- Whether the transaction was an orderly transaction, which may include consideration of the seller's financial condition, the counterparty credit position, the exposure to the market during the marketing period, and the actual transaction price.
- The reasonableness of the underlying assumptions, which may include consideration of the use of pricing services, the assumptions used by the pricing service, and the extent of testing required to verify the reasonableness of the prices provided. (For example, the auditor should understand whether the fair value measurement was determined using quoted prices from an active market, observable inputs, or fair value measurements based on a model. If the price is not based on quoted prices from an active market or observable inputs, the auditor should obtain an understanding of the model used by the pricing service and evaluate whether the assumptions are reasonable [see the following section for additional information on pricing services].)
- The reasonableness of the determination within the fair value hierarchy of inputs.

Fair Values of Securities

.87 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, there are some items of note for the auditor. As previously mentioned, quoted market prices in active markets are the best available audit evidence to support a fair value; however, when they are unavailable and the valuations of securities are obtained from a broker or dealer or another pricing service based on valuation models, the auditor should understand the underlying valuation method used (such as a cash flow projection). These prices also may be based on quoted prices from an active market or other observable inputs that will be a consideration on the auditor's procedures. The process used by the pricing service in measuring fair value should be evaluated to determine the consistency with the specified valuation method (as discussed in FASB ASC 820-10-35). The auditor also may determine that it is necessary to obtain quotes from more than one pricing source based on circumstances, such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation assumptions that are highly subjective. In the context of FASB ASC 820, quoted prices in active markets are considered level 1 inputs.

.88 When an entity performs its own valuation, value testing procedures include the following:

- Assessing the reasonableness
- Comparing the assumptions to industry reports or benchmarks
- Assessing the appropriateness of the model
- Calculating the value using his or her own model
- Comparing the fair value with subsequent or recent transactions

.89 Whether the inputs to the entity's valuation model are observable determines their characterization as level 2 or level 3 inputs, respectively, within FASB ASC 820. When extensive judgment is needed, consider using a specialist or refer to AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1). Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability of the security, evidence of the collateral also should be examined for existence, fair value, transferability, and the investor's right to the collateral.

.90 Paragraph .19 of AU section 328 also notes that the auditor should evaluate whether the entity's method for determining fair value measurements is applied consistently and, if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity or changes in accounting principles. The auditor also should evaluate management's conclusions regarding other-than-temporary impairment on its securities. Examples of factors that could cause an other-than-temporary impairment, per paragraph .47 of AU section 332, include the following:

- Fair value is significantly below cost and
  - — the decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - — the decline has existed for an extended period of time.
  - — management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

.91 Auditors should consider all facts and circumstances when determining if an other-than-temporary impairment has occurred. Additionally, the classification of an entity's securities is based on management's intent and ability. The auditor should obtain an understanding of management's classification process among trading, available-for-sale, and held-to maturity, as well as consider the classifications in light of the entity's current financial position.

Auditing Accounting Estimates

.92 As noted in paragraph .04 of AU section 342, the auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements as a whole. Although this alert has discussed fair value measurements at length, it is important to remember many types of accounting estimates exist in client financial statements. Some examples include the allowance for uncollectible accounts receivable, impairment analysis and estimated useful lives of long lived assets, valuation allowance for deferred tax assets, and actuarial assumptions in pension and other postretirement benefit costs.

.93 Given the current economic climate, additional skepticism should be exercised when considering management's underlying assumptions used in accounting estimates. When evaluating accounting estimates, the auditor should consider both the subjective and objective factors with professional skepticism. As discussed in paragraph .09 of AU section 342, key factors and assumptions that the auditor normally concentrates on include the assumptions that are significant to the estimate, sensitive to variations, deviations from historical patterns, or particularly subjective and susceptible to misstatement and bias; however, it is important to consider whether historical patterns are still applicable.

.94 For example, in the current market, new patterns may emerge. In this economic climate, with possible increasing pressure on management to meet earnings, a key aspect of AU section 342 is for an auditor to determine the reasonableness of management's accounting estimates with an extra degree of professional skepticism. As noted by AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA,

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Professional Standards, vol. 1), when assessing audit differences between client estimates and audit estimates, even if they are individually reasonable, an auditor should consider whether these differences are indicative of possible bias by management. If so, the auditor should reconsider the estimates as a whole.

.95 The auditor should obtain an understanding of how management develops estimates and should employ one of the approaches outlined in paragraph .10 of AU section 342 in testing that process. In reviewing and testing management's process, the auditor may consider identifying controls around this process and determining if the underlying data used for the estimate are reliable and used appropriately. An auditor also may develop an estimate and compare it to management's estimate. Lastly, the auditor may review subsequent events or transactions occurring prior to the date of the auditor's report. Further, as noted in AU section 316, hindsight may provide the auditor additional insight into the existence of management bias. For further details on auditing estimates, see AU section 342. The AICPA has released a proposed redrafted SAS, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates and Related Disclosures* (Redrafted), on auditing accounting estimates, including fair value. Readers are encouraged to remain alert for developments on this topic.

Auditor Responsibilities for Subsequent Events

.96 To provide guidance related to the effect of Accounting Standard Update (ASU) No. 2010-09, *Subsequent Events (Topic 855): Amendments to Certain Recognition and Disclosure Requirements*, on the auditor's responsibilities for subsequent events relative to a conduit debt obligor and the date of the auditor's report, the AICPA issued Technical Questions and Answers (TIS) section 8700.03, "Auditor's Responsibilities for Subsequent Events Relative to a Conduit Debt Obligor" (AICPA, *Technical Practice Aids*), in June 2010. TIS section 8700.03, through an example, explains that management of a conduit debt obligor with conduit debt securities that trade in a public market must evaluate subsequent events through the date the financial statements are first widely distributed (that is, issued). Further, the auditor, using professional judgment, needs to evaluate management's assertion about the financial statement issuance date and decide whether the manner in which the entity has made its financial statements available does or does not constitute issuance for purposes of complying with GAAP and completing the auditor's subsequent event procedures. In accordance with AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* (AICPA, *Professional Standards*, vol. 1), the auditor has no obligation to make any further or continuing inquiry or perform any other auditing procedures, with respect to the audited financial statements, after the date of the auditor's report, unless new information that may affect the report comes to his or her attention.

.97 In September 2009, the AICPA issued TIS section 8700.02, "Auditor Responsibilities for Subsequent Events" (AICPA, *Technical Practice Aids*), which discusses the effects of the entity's responsibility to disclose the date through which the subsequent events have been evaluated on the auditor's responsibilities for subsequent events. This question and answer was issued in response to FASB's issuance of FASB Statement No. 165, *Subsequent Events* (codified in FASB ASC 855, *Subsequent Events*). Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to, or disclosure in, the financial statements, the specific management representations relating to information concerning subsequent events should be made as of the date of the auditor's report. This typically will result in the same date being used for both the auditor's report and the date disclosed by management through which they have evaluated subsequent events. The auditor may consider discussing these dating requirements with management in advance of beginning the audit and including any agreed upon understanding in the engagement letter. Recently issued technical questions and answers can be accessed at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

Communicating Internal Control Related Matters Identified in an Audit

.98 SAS No. 115, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), supersedes SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit*, and further clarifies standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 115 is effective for audits of financial statements for periods ending on or after December 15, 2009, with early implementation permitted.

.99 SAS No. 115 is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion), except when the auditor is performing an integrated audit and will be expressing an opinion on the effectiveness of internal control over financial reporting under AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements* (AICPA, *Professional Standards*, vol. 1). In general, SAS No. 115 retains many of the provisions of SAS No. 112. The key differences between the two standards lie in the definitions of *material weaknesses* and *significant deficiencies*.

Definitions of Significant Deficiency *and* Material Weakness

.100 A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that a reasonable possibility exists that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. For the purpose of this definition, a reasonable possibility exists when the likelihood of the event is either *reasonably possible* or *probable*, as those terms are defined in the FASB ASC glossary. The FASB ASC glossary defines *reasonably possible* as when the chance of the future event or events occurring is more than remote but less than likely; *probable* is defined as when the future event or events are likely to occur. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness yet important enough to merit attention by those charged with governance.

The Evaluation Process

.101 Although the auditor is not required to perform procedures specifically to identify deficiencies in internal control, during the course of the audit, the auditor may become aware of deficiencies in the design or operation of the entity's internal control. The auditor should evaluate the severity of each deficiency in internal control identified during the audit and determine whether the deficiency, individually or in combination with other deficiencies in internal control, rise to the level of significant deficiencies or material weaknesses. Further, the severity of a deficiency does not depend on whether a misstatement actually occurred.

.102 The AICPA published the Audit Risk Alert *Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115* (product no. 022539) to assist in understanding the requirements of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Consideration of an Entity's Ability to Continue as a Going Concern

.103 The consideration of an entity's ability to continue as a going concern is required in every audit performed under GAAS and continues to be an especially important consideration in the current state of the economy, as discussed in the "Reporting Trends" section of this alert. An entity's ability to continue as a going concern is affected by many factors, such as the industry and geographic area in which it operates, the financial health of its customers and suppliers, and its accessibility to financing.

.104 As explained by paragraph .02 of AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), the auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at, or have occurred prior to, the date of the auditor's report. Therefore, this is an ongoing evaluation that extends through the date of the auditor's report.

.105 The auditor has a responsibility to evaluate whether there is a substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. AU section 341 notes that is a period not to exceed one year beyond the date of the financial statements being audited. Audit teams may find it useful to have preliminary discussions about going concern considerations during engagement planning meetings; however, as noted in AU section 341, it is not necessary to design audit procedures around specifically identifying the possibility of a going concern issue because results of typical audit procedures

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

should illuminate any indicators. These procedures may consist of analytical procedures, review of subsequent events, review of compliance with financing agreements, review of board minutes, inquiry of legal counsel, and confirmation with related third parties of the details of arrangements to provide or maintain financial support.

.106 If the auditor believes that a substantial doubt about the entity's ability to continue as a going concern exists, the next steps are to obtain management's plans to mitigate the effect of such conditions and then assess the likelihood that these plans can be implemented effectively. If, after considering management's plan, an auditor determines that a substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time remains, the auditor should communicate with those charged with governance of the entity, in accordance with AU section 341. In that instance, the auditor also should consider the effects on the entity's financial statements and the adequacy of the related disclosure, and an explanatory paragraph should be added to the audit report following the opinion paragraph. Alternatively, if management's plan mitigates the risk of the entity's inability to continue as a going concern, the auditor should consider disclosing the primary conditions that gave rise to the initial doubt and management's plans. These disclosures are especially important for financial statement users to fully comprehend the entity's financial strength and ability to continue as a going concern.

.107 The auditor's assessment of whether an entity's ability to continue as a going concern may have a significant impact on an entity's business, either if it is a going concern or if it is not. Because the auditor's professional judgment is frequently the basis for whether a going concern issue exists, it is important that the auditor carefully consider the impact of his or her judgment on the users of the client's financial statements and to what extent management's plans may have alleviated the substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. Further, a premature going concern paragraph may have detrimental effects on an entity and become a self-fulfilling prophecy.

.108 FASB has undertaken a project that will incorporate going concern guidance into accounting literature. One of the expected major changes is regarding the going concern time frame. FASB decided that management should take into account available information about the foreseeable future, which is generally, but not limited to, 12 months from the end of the reporting period. The time frame beyond 12 months is limited to a practical amount of time thereafter in which significant events or conditions that may affect the evaluation can be identified. An exposure draft is expected in the fourth quarter of 2010; readers should be alert for its issuance.

Service Organizations

.109 Since 1992, SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), has been the authoritative standard on requirements and guidance for reporting on controls at service organizations and auditing the financial statements of entities that use service organizations to accomplish tasks that may affect their financial statements. This guidance has now been split into an attest standard and an auditing standard to better reflect the nature of the work being performed. Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, vol. 1, AT sec. 801), contains the requirements for reporting on controls at service organizations that are relevant to user entities' internal control over financial reporting. A finalized clarified SAS on service organizations, *Audit Considerations Relating to an Entity Using a Service Organization*, will supersede SAS No. 70 and addresses the user auditor's responsibility for obtaining sufficient appropriate audit evidence in an audit of the financial statements of a user entity that uses one or more service organizations. This SAS will be effective for audits of financial statements for periods ending on or after December 15, 2012. SSAE No. 16 is effective for service auditor's reports for periods ending on or after June 15, 2011. Until the new SAS is effective, user auditors will still use the guidance currently contained in AU sec. 324. Once the new SAS becomes effective, it will replace the guidance for user auditors currently in AU sec. 324. SSAE No. 16 is based on the International Auditing and Assurance Standards Board's (IAASB's) International Standard on Assurance Engagements No. 3402, *Assurance Reports on Controls at a Service Organization*, and the new SAS is based on the IAASB's International Standard on Auditing (ISA) 402, *Audit Considerations Relating to an Entity Using a Service Organization*.

.110 SSAE No. 16 is applicable when an entity outsources a business task or function to another entity (usually one that specializes in that task or function) and the data resulting from that task or function is incorporated in the outsourcer's financial statements. The SSAE defines a *service organization* as an organization or segment of an organization that provides services to user entities, which are likely to be relevant to those user entities' internal control over financial reporting; a *user entity* is defined as an entity that uses a service organization; and a *service auditor* is defined as a practitioner who reports on controls at a service organization. Some examples of service organizations are an entity that processes medical claims for health insurance companies, an investment adviser that maintains accountability for those assets and provides statements to user entities, and a data center that provides applications and technology that enable user entities to process financial transactions.

.111 SSAE No. 16 discusses the requirements and guidance for a service auditor reporting on a service organization's controls. Among the changes made to the guidance, two major changes would affect a service auditor's engagement: (*a*) management of the service organization will now be required to provide the service auditor with a written assertion about the fairness of the presentation of the description of the system and about the suitability of the design and, in a type 2 engagement, the operating effectiveness of controls, and (*b*) in a type 2 engagement, the description of the service organization's system and the service auditor's opinion on the description will cover a period (the same period as the period covered by the service auditor's tests of the operating effectiveness of controls). SSAE No. 16 enables a service auditor to perform two types of engagements:

- A *type 1 engagement* is when the service auditor reports on the fairness of the presentation of management's description of the service organization's system and the suitability of the design of the controls to achieve the related control objectives included in the description as of a specified date.
- A *type 2 engagement* is when the service auditor reports on the fairness of the presentation of management's description of the service organization's system and the suitability of the design and operating effectiveness of the controls to achieve the related control objectives included in the description throughout a specified period.

.112 A service auditor's report provides useful information only to a user organization that actually uses those services and needs that information to make decisions about its own internal control over financial reporting. Therefore, use of an SSAE No. 16 report is restricted to user entities that are customers of the service organization and user auditors (this restriction was also present for a SAS No. 70 report). An SSAE No. 16 report is not intended to be used as a marketing or sales tool by the client. As with SAS No. 70 reports, there is no such thing as being "SSAE No. 16 certified." It is a popular misconception that a service organization can become "certified" as compliant after undergoing a service auditor's engagement. An SSAE No. 16 report is primarily an auditor-to-auditor communication. Further, SSAE No. 16 (as well as SAS No. 70), does not apply to examinations of controls over subject matter other than financial reporting. These engagements would be performed under AT section 101, *Attest Engagements* (AICPA, *Professional Standards*, vol. 1).

.113 The AICPA is in the process of overhauling and rewriting the Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (commonly known as the SAS 70 guide). Also, to address reporting on a service provider's controls over subject matter other than financial reporting, the AICPA is developing a new Audit Guide, *Reporting on Controls at a Service Provider Relevant to Security, Availability, Processing Integrity, Confidentiality, or Privacy*. Both guides are expected to be available for sale in early 2011. The AICPA is also in the process of drafting communication materials that will help auditors, clients, and users understand the three types of service organization control (SOC) reports (formerly SAS No. 70 reports) to be used for reporting on these engagements.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

	Title	*Description*
SOC 1	*Report on Controls at a Service Organization Relevant to User Entities' Internal Control over Financial Reporting*	To be used only in circumstances when the service organization's services and controls affect the internal control over financial reporting for the entities that use the service.
SOC 2	*Report on Controls at a Service Organization relevant to Security, Availability, Processing Integrity, Confidentiality, and Privacy*	The purpose is to convey trust and assurance to users of the system that the service organization has deployed an effective control system to effectively mitigate operational and compliance risks that the system may represent to its users.
SOC 3	*Trust Services Report*	These reports are designed to meet the needs of users who want assurance on the controls at a service organization related to security, availability, processing integrity, confidentiality, or privacy of a system but do not have the need for the level of detail provided in an SOC 2 report. These reports are general use reports and can be freely distributed or posted on a website as a seal.

Compilation and Review Engagements

.114 The AICPA developed a brand new guide, *Compilation and Review Engagements*, which provides additional information on implementing Statement on Standards for Accounting and Review Services No. 19, *Compilation and Review Engagements* (AICPA, *Professional Standards*, vol. 2). It also includes illustrative engagement and representation letters, sample compilation and review reports, detailed illustrations, and case studies. This guide is now available electronically and in paperback on www.cpa2biz.com.

Accounting Issues and Developments

Accounting for Certain Distributions to Shareholders

.115 In January 2010, FASB issued ASU No. 2010-01, *Equity (Topic 505): Accounting for Distributions to Shareholders with Components of Stock and Cash—a consensus of the FASB Emerging Issues Task Force*. This ASU affects entities that declare dividends to shareholders that may be paid in cash or shares at the election of the shareholders, with a potential limitation on the total amount of cash that all shareholders can elect to receive in the aggregate. The amendments in this ASU clarify that the stock portion of the distribution that allows the shareholders to elect or receive cash or shares, with a potential limitation on the total amount of cash that all shareholders can elect to receive in the aggregate, is considered a share issuance. The intent is to eliminate the current diversity in practice. These amendments are effective for interim and annual periods ending on or after December 15, 2009, and should be applied on a retrospective basis.

Accounting for Uncertainty in Income Taxes

.116 For many calendar year nonpublic entities, 2009 was the first year of application of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*. In September 2009, FASB issued ASU No. 2009-06, *Income Taxes (Topic 740)—Implementation Guidance on Accounting for Uncertainty in Income Taxes and Disclosure Amendments for Nonpublic Entities*. This update affects all nongovernmental entities, and the disclosure amendments only apply to nonpublic entities. The four main provisions of the ASU include the following:

- If income taxes paid by the entity are attributable to the entity, the transaction should be accounted for in accordance with the guidance on uncertainty in income taxes in FASB ASC 740, *Income Taxes*. If the taxes paid by the entity are attributable to the owners, the transaction should be accounted for

as a transaction with the owners. Attribution should be based on the laws and regulations of the jurisdiction and should be made for each jurisdiction where the entity is subject to income taxes.

- Management's determination of the taxable status of the entity, including its status as a pass-through entity or tax-exempt not-for-profit entity, is a tax position subject to the standards required for accounting for uncertainty in income taxes.
- Regardless of the tax status of the reporting entity, the tax positions of all entities within a related group of entities must be considered.
- For nonpublic entities, it eliminates the disclosures of a tabular reconciliation of the total amount of unrecognized tax benefits at the beginning and end of the periods presented and the total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate (see FASB ASC 740-10-50-15[a]–[b]).

.117 For entities that are currently applying the guidance on accounting for uncertainty in income taxes, this ASU is effective for interim and annual periods ending after September 15, 2009.

.118 In June 2010, to clarify some practice issues related to FASB ASC 740-10, the AICPA issued TIS section 5250.14, "Application of Financial Accounting Standards Board (FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (codified in FASB *Accounting Standards Codification* [ASC] 740-10) to Taxes Other Than Income Taxes," and TIS section 5250.15 "Application of Certain FASB Interpretation No. 48 (codified in FASB ASC 740-10) Disclosure Requirements to Nonpublic Entities That Do Not Have Uncertain Tax Positions" (AICPA, *Technical Practice Aids*). TIS section 5250.14 explains that the scope of FASB ASC 740-10 applies to income taxes only (not sales, payroll, and other taxes). Entities should follow the guidance contained in FASB ASC 450, *Contingencies*, to account for uncertainties in taxes other than income taxes. TIS section 5250.15 clarifies that the disclosure requirements in paragraph 15(c)–(e) of FASB ASC 740-10-50 remain in effect (if applicable), regardless of whether an entity has any uncertain tax positions. Those disclosure requirements include the following:

- The total amounts of interest and penalties recognized in both the statement of operations and the statement of financial position
- For positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly increase or decrease within 12 months of the reporting date, the nature of the uncertainty, the nature of the event that could occur in the next 12 months that would cause the change, and an estimate of the range of the reasonably possible change or a statement that an estimate of the range cannot be made
- A description of tax years that remain subject to examination by major tax jurisdictions

.119 Recently issued technical questions and answers of the AICPA can be accessed at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

Decreases in Ownership of a Subsidiary

.120 In January 2010, FASB issued ASU No. 2010-02, *Consolidation (Topic 810): Accounting and Reporting for Decreases in Ownership of a Subsidiary—a Scope Clarification*. This ASU addresses implementation issues related to the changes in ownership provisions in FASB ASC 810-10 (issued as FASB Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*). FASB ASC 810-10 requires an entity to deconsolidate a subsidiary when the entity ceases to have a controlling financial interest in the subsidiary. Upon deconsolidation, an entity recognizes a gain or loss on the transaction and measures any retained investment in the subsidiary at fair value. That gain or loss includes any gain or loss associated with the difference between the fair value of the retained investment in the subsidiary and its carrying amount at the date the subsidiary is deconsolidated. This guidance aligns the accounting for both business combinations and dispositions by recognizing any preexisting interest or retained investment in a subsidiary at its fair value. In contrast, an entity is required to account for a decrease in its ownership interest of a subsidiary that does not result in a change of control as an equity transaction.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.121 These amendments affect any entity that experiences a decrease in ownership in a subsidiary that is a business or nonprofit activity, plus any entity that exchanges a group of assets that constitutes a business or nonprofit activity for an equity interest in another entity. These amendments clarify that the scope of the decrease in ownership provisions of FASB ASC 810-10 and related guidance apply to the following:

- A subsidiary or group of assets that is a business or nonprofit activity
- A subsidiary that is a business or nonprofit activity that is transferred to an equity method investee or joint venture
- An exchange of a group of assets that constitutes a business or nonprofit activity for a noncontrolling interest in an entity (including an equity method investee or joint venture)

.122 Further, the amendments clarify that the decrease in ownership guidance in FASB ASC 810-10 does not apply to the following transactions, even if they involve businesses:

- Sales of in-substance real estate
- Conveyances of oil and gas mineral rights

.123 The amendment also expands the required disclosures about the deconsolidation of a subsidiary or derecognition of a group of assets within the scope of FASB ASC 810-10. This ASU is effective beginning in the period that an entity adopts FASB Statement No. 160. If an entity has already adopted this guidance, then the amendments in this ASU are effective beginning in the first interim or annual reporting period ending on or after December 15, 2009. The amendments in this ASU should be applied retrospectively to the first period that an entity adopted FASB Statement No. 160.

Consolidation of Variable Interest Entities

.124 For calendar year entities, 2010 is the first year of application of FASB Statement No. 167, which changes how to determine when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. FASB Statement No. 167 was incorporated into FASB ASC through FASB ASU No. 2009-17, *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*. This statement is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited. As explained by FASB ASC 810-10-65-2(i), this guidance may be applied retrospectively in previously issued financial statements for one or more years, with a cumulative-effect adjustment to retained earnings as of the beginning of the first year restated. FASB Statement No. 167 retains the scope of previous variable interest entities (VIE) consolidation accounting guidance, with the addition of entities previously considered qualifying special purpose entities because the concept of these entities was eliminated in FASB Statement No. 166, which was incorporated into FASB ASC by ASU No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*. As a result of including qualifying special purpose entities, transferors, sponsors, and investors in those entities must now consider the consolidation and disclosure provisions in FASB Statement No. 167.

.125 FASB Statement No. 167 states that the determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. This statement also amends consolidation of VIE guidance to eliminate the quantitative approach previously required for determining the primary beneficiary of a VIE, which was based on determining which company absorbs the majority of the entity's expected losses, receives a majority of the entity's expected residual returns, or both. In the new guidance, kickout rights and participating rights are ignored both in the determination of whether an entity is a VIE and in the identification of the VIE's primary beneficiary, unless the rights are held by a single reporting entity.

.126 Under the new guidance, a reporting entity must now continually reconsider which variable interest holder is the VIE's primary beneficiary. Additionally, if equity interest holders lose the power from the voting

rights of those investments to direct the entity's most significant activities, the reporting entity must reconsider an entity's VIE status. Also, a reporting entity must meet six conditions to make the determination that fees paid to a decision maker or service provider do not represent a variable interest. Fees paid to an enterprise that acts solely as a fiduciary or agent should typically not represent a variable interest in a VIE because those fees would meet all of the conditions. A primary beneficiary must present separately, on the face of the balance sheet, assets of consolidated VIEs that can only be used to settle obligations of those VIEs and liabilities of consolidated VIEs for which creditors do not have recourse to the general credit of the primary beneficiary. Power is only considered shared (and no party consolidates) if two or more unrelated parties together have the power to direct the VIE's most significant activities and decisions about those activities require the consent of each of the parties sharing power.

.127 Only substantive terms, transactions, and arrangements, whether contractual or noncontractual, should be considered when applying this guidance. Any term, transaction, or arrangement that does not have a substantive effect on an entity's status as a VIE, an enterprise's power over a VIE, or an enterprise's obligation to absorb losses or its right to receive benefits of the entity should be disregarded when applying the provisions of this guidance. Judgment, based on all facts and circumstances, is needed to make this determination.

.128 This statement also discusses the objectives of its required disclosures and notes that an entity may need to supplement the minimum required disclosures to meet these objectives. The objectives are for the financial statement users to have an understanding of the following:

- The significant judgments and assumptions made by an enterprise in determining whether it must consolidate a VIE or disclose information about its involvement in a variable interest entity, or both
- The nature of restrictions on a consolidated VIE's assets and on the settlement of its liabilities reported by an enterprise in its statement of financial position, including the carrying amounts of such assets and liabilities
- The nature of, and changes in, the risks associated with an enterprise's involvement with the VIE
- How an enterprise's involvement with the VIE affects the enterprise's financial position, financial performance, and cash flows

SEC Considerations on FASB Statement No. 167

.129 The SEC staff shared with the Center for Audit Quality (CAQ) SEC Regulations Committee its FASB Statement No. 167 views regarding transition questions for SEC registrants and the internal control over financial reporting requirements for an entity newly consolidated pursuant to this guidance.

.130 The SEC staff indicated that if an entity has elected to adopt FASB Statement No. 167 retrospectively and has filed interim financial statements for a period that includes the date of adoption, that registrant must recast its prior period annual financial statements that are incorporated by reference to reflect a material retrospective application of FASB Statement No. 167. Conversely, if a registrant elects to adopt FASB Statement No. 167 only on a prospective basis, or if the retrospective application of the guidance is not material, its registration statement may incorporate by reference its most recent Form 10-K, which would include its historical annual financial statements of periods prior to the adoption of FASB Statement No. 167 (assuming that the prior financial statements do not require revision for other purposes).

.131 An SEC registrant must present in its Form 10-K three years of comparative income statements and two years of comparative balance sheets (two years of comparative income statements and balance sheets for a smaller reporting company). The Form 10-K of an SEC registrant that is not a smaller reporting company also must include a table of selected financial data for the past five years (or a longer period at the registrant's option). This creates another issue addressed by the SEC staff, which is whether an SEC registrant that retrospectively applies FASB Statement No. 167 to all periods presented in its financial statements would be permitted to retrospectively apply the effects of the guidance to any additional periods presented in the table of selected financial data. The SEC staff indicated that it expects there to be consistency between the

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

application of FASB Statement No. 167 in the financial statements and in the table of selected financial data. In all cases, the SEC staff expects a registrant to disclose to which periods it has retrospectively applied FASB Statement No. 167 and, if necessary, the fact that certain periods are not comparable to the periods for which the audited financial statements are provided. For example, if a calendar year-end entity adopts FASB Statement No. 167 on January 1, 2010, and elects to retrospectively apply it to fiscal years 2009 and 2008, the entity will record a cumulative effect adjustment to retained earnings as of January 1, 2008. The registrant may decide whether it will also apply FASB Statement No. 167 to fiscal years 2006 and 2007 within the selected financial data table.

.132 The SEC staff also commented on the internal control over financial reporting considerations related to FASB Statement No. 167. The SEC staff stated that VIEs consolidated upon adoption of the guidance should be included in management's reports on internal control over financial reporting. Because the criteria for consolidation of a VIE are now based upon control, a registrant will no longer be able to justify excluding consolidated VIEs from the scope of its internal controls assessment because it will likely have the right or authority to assess the internal controls of those VIEs. Further, because the consolidation of VIEs will occur as of the first day of the registrant's fiscal year, the registrant will have sufficient time to perform that assessment and would be unable to rely on the temporary relief provided under the SEC staff's third question in *Management's Report on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports: Frequently Asked Questions* (Section 4310.11 of the Division of Corporation Finance *Financial Reporting Manual*). However, the SEC staff did explain that after adoption of FASB Statement No. 167, an SEC registrant may apply the guidance in the third question when considering whether it would be appropriate to exclude a VIE that is newly consolidated due to events or changes in circumstances from the scope of its internal control assessment in the fiscal year consolidation first occurs, if an internal control assessment is not possible.

.133 Additionally, the guidance contained in the first question continues to apply only in the rare circumstance in which the VIE was in existence prior to December 15, 2003, and the registrant, despite having control, does not possess the right or authority to assess the VIE's internal controls and lacks the ability, in practice, to make that assessment. Registrants may continue to follow the guidance in the first question in this rare circumstance.

.134 In early June 2010, a speech given by a member of the Office of the Chief Accountant at the SEC discussed the issue of structuring transactions to achieve an accounting result, specifically in regard to FASB Statement No. 167. The speech reinforces the guidance in the new standard, specifically that the substance of an arrangement should be considered, not just the form; further, nonsubstantive terms should be disregarded when determining who makes the key decisions that most significantly impact an entity's economic performance. The speech also discusses the SEC's thoughts with regard to certain strategies that entities may use to avoid consolidation. The overarching themes were that significant judgment is required in determining whether a controlling financial interest exists in complex fact patterns and that the Office of the Chief Accountant is available if a registrant would like to consult regarding its accounting for unusual transactions when it believes the application of GAAP is unclear. The full text of the speech can be accessed at www.sec.gov/news/speech/2010/spch060310pab.htm.

Application of Consolidation Requirements for Certain Investment Funds

.135 In February 2010, FASB issued ASU No. 2010-10, *Consolidation (Topic 810): Amendments for Certain Investment Funds*. This ASU defers the amendments to consolidation guidance from FASB Statement No. 167 for a reporting entity's interest in an entity that has all the attributes of an investment company, as specified in FASB ASC 946, *Financial Services—Investment Companies*, or for which it is industry practice to apply measurement principles for financial reporting that are consistent with those in FASB ASC 946. The deferral also applies to a reporting entity's interest in an entity that is required to comply with or operate in accordance with requirements that are similar to those included in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. ASU No. 2010-10 does not defer the disclosure requirements in FASB Statement No. 167. For further details, including to whom the deferral does not apply, readers are encouraged to review the full text of ASU No. 2010-10, which can be found on FASB's website.

Accounting for Transfers of Financial Assets

.136 Calendar year entities must also start applying the provisions of FASB Statement No. 166 in 2010. FASB Statement No. 166, which is a revision to FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, requires more information about transfers of financial assets, including securitization transactions, and those circumstances in which entities have continuing exposure to the risks related to transferred financial assets. FASB Statement No. 166 was incorporated into FASB ASC by FASB ASU No. 2009-16 and is discussed in FASB ASC 860, *Transfers and Servicing*. It eliminates the concept of a qualifying special purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosures. The purpose of this statement is to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets.

.137 Historically, accounting for transfers in which the transferor has no continuing involvement with the transferred financial assets or transferee has not been controversial. However, transfers of financial assets with continuing involvement raise questions about the circumstances under which the transfers should be accounted for as sales or secured borrowings and about how transferors and transferees should account for sales and secured borrowings. This guidance is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited. This statement must be applied to transfers occurring on or after the effective date; however, the disclosure provisions should be applied to transfers that occurred both before and after the effective date.

.138 Additionally, on and after the effective date, the concept of a qualifying special-purpose entity is no longer relevant for accounting purposes. Therefore, formerly qualifying special purpose entities (as defined under previous accounting standards) should be evaluated for consolidation by reporting entities on and after the effective date in accordance with the applicable consolidation guidance. All transferees, including VIEs, must now be evaluated for consolidation, unless another exception is available. This aspect of the new guidance is considered by many to have the most profound effect. Additionally, the special provisions for guaranteed mortgage securitizations have been removed, and those securitizations will be treated the same as any other transfer of financial assets within FASB ASC 860. If such securitizations do not meet the requirements for sale treatment accounting, the securitized mortgage loans will continue to be classified as loans in the transferor's statement of financial position. The transferor also would not separately recognize a servicing asset or servicing liability.

.139 The amendments also modify the financial components approach and limit the circumstances in which a transferor derecognizes a portion or component of a financial asset when the transferor has not transferred the original financial asset or when the transferor has continuing involvement with the financial asset. The unit of account eligible for sale accounting is limited to an entire financial asset, a group of entire financial assets, or a participating interest in an entire financial asset (as defined in "Pending Content" of FASB ASC 860-10-40-6A). Inherent in this requirement is that an entire financial asset cannot be divided into components prior to a transfer, with those components being eligible for derecognition upon transfer, unless all of the components meet the definition of a participating interest. The legal isolation analysis is clarified in the new guidance to ensure that the financial asset has been put beyond the reach of the transferor, its consolidated affiliates (affiliates that are not entities designed to make remote the possibility that they would enter bankruptcy or other receivership) included in the financial statements being presented, and its creditors.

.140 The principle of effective control is also clarified so that the transferor must evaluate whether it, its consolidated affiliates included in the financial statements being presented, or its agents effectively control the transferred financial asset(s) directly or indirectly. Further, when evaluating transfers of financial assets for derecognition, an entity must consider all arrangements or agreements made contemporaneously with, or in contemplation of, a transfer, even if not entered into at the time of the transfer. Also, the practicability

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

exception from measuring the proceeds received by a transferor in a transfer that qualifies for sale accounting at fair value has been removed.

.141 The primary objectives of the disclosure requirements of this guidance are to provide the financial statement users with a clear understanding of the following:

- A transferor's continuing involvement (as defined by the FASB ASC glossary), if any, with transferred financial assets
- The nature of any restrictions on assets reported by an entity in its statement of financial position that relate to a transferred financial asset, including the carrying amounts of those assets
- How servicing assets and servicing liabilities are reported under this pronouncement
- For transfers accounted for as sales when a transferor has continuing involvement with the transferred financial assets and for transfers of financial assets accounted for as secured borrowings, how the transfer of financial assets affects a transferor's financial position, financial performance, and cash flows

.142 These objectives must be met by the disclosures, regardless of the specific requirements of the pronouncement. It may be the case that an entity provides greater detail than what is a required disclosure to meet these objectives, depending on the facts and circumstances.

Subsequent Events

.143 FASB Statement No. 165, which has been codified in FASB ASC 855, became effective for interim and annual periods ending after June 15, 2009, and establishes general standards of accounting for, and disclosure of, events that occur after the balance sheet date but before financial statements are issued or are available to be issued. In September 2009, the AICPA issued TIS section 8700.01, "Effect of FASB ASC 855 on Accounting Guidance in AU Section 560" (AICPA, *Technical Practice Aids*), which notes that preparers of financial statements for nongovernmental entities are required to follow the accounting guidance in FASB ASC 855. Additionally, the accounting guidance contained in AU section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), would no longer be applicable to audits of nongovernmental entities. This question and answer can be accessed at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

.144 In February 2010, FASB issued ASU No. 2010-09 to address questions that arose in practice about potential conflicts between FASB ASC 855 and SEC guidance—specifically, the requirements to disclose the date that the financial statements are issued. This ASU also addresses the intended breadth of the reissuance disclosure provision related to subsequent events.

.145 ASU No. 2010-09 requires an entity that is an SEC filer or a conduit bond obligor for conduit debt securities that are traded in a public market to evaluate subsequent events through the date the financial statements are issued. As stated in the definition of *financial statements are issued* in the FASB ASC glossary, financial statements are considered issued when they are widely distributed to shareholders and other financial statement users for general use and reliance in a form and format that complies with GAAP. All other entities must evaluate subsequent events through the date the *financial statements are available to be issued*; as defined by the FASB ASC glossary, this is when they are complete in a form and format that complies with GAAP and all approvals necessary for issuance have been obtained (for example from management, the board of directors, or significant shareholders). Further, an entity that is an SEC filer is not required to disclose the date through which subsequent events have been evaluated. Lastly, only non-SEC filers should disclose in the revised financial statements the dates through which subsequent events have been evaluated in both the issued or available-to-be-issued financial statements and the revised financial statements. Revised financial statements are considered reissued financial statements. The amendments in ASU No. 2010-09 are effective upon issuance, except for the use of the issued date for conduit bond obligors. That amendment is effective for interim or annual periods ending after June 15, 2010. TIS section 8700.03 was issued by the AICPA in June 2010 to provide guidance on the application of ASU No. 2010-09, relative to a conduit debt obligor, and is discussed in the "Auditor Responsibilities for Subsequent Events" section of this alert.

Fair Value

.146 FASB ASC 820-10-20 defines *fair value* and establishes a framework for measuring fair value; however, it does not dictate when an entity must measure something at fair value, nor does it expand the use of fair value in any way. The need to understand fair value accounting has increased in importance as alternative investments increased in popularity and complexity. *Fair value* is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)

.147 FASB issued ASU No. 2009-12, *Fair Value Measurements and Disclosures (Topic 820): Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*, because of the complexities and practical difficulties in estimating the fair value of alternative investments. It is applicable to all reporting entities that hold an investment that is required or permitted to be measured or disclosed at fair value on a recurring or nonrecurring basis, and as of the reporting entity's measurement date, if the investment both

- does not have a readily determinable fair value. The FASB ASC glossary states that an equity security has a readily determinable fair value if it meets any of the following conditions:
  - The fair value of any equity security is readily determinable if sales prices or bid-and-asked quotations are currently available on a securities exchange registered with the SEC or in the OTC market, provided that those prices or quotations for the OTC market are publicly reported by NASDAQ or by Pink Sheets LLC. Restricted stock meets that definition if the restriction terminates within one year.
  - The fair value of an equity security traded only in a foreign market is readily determinable if that foreign market is of a breadth and scope comparable to one of the U.S. markets referred to previously.
  - The fair value of an investment in a mutual fund is readily determinable if the fair value per share (unit) is determined and published and is the basis for current transactions.
- is in an entity that has all of the attributes specified in FASB ASC 946-10-15-2 or, if one of those attributes are not met, is in an entity for which it is industry practice to issue financial statements using guidance that is consistent with the measurement principles in FASB ASC 946.

.148 As a practical expedient, this ASU permits a reporting entity to measure the fair value of an investment within its scope on the basis of the net asset value (NAV) per share of the investment (or its equivalent) if the NAV is calculated in a manner consistent with the measurement principles of FASB ASC 946 as of the reporting entity's measurement date, including measurement of all or substantially all of the underlying investments of the investee in accordance with FASB ASC 820. If the practical expedient is used, certain attributes of the investment (such as restrictions on redemption) and transaction prices from principal-to-principal or brokered transactions will not be considered in measuring the investment's fair value.

.149 This ASU also requires disclosures by major category of investment about the attributes of investments, such as the nature of any restrictions on the investor's ability to redeem its investments at the measurement date, any unfunded commitments, and the investment strategies of the investees. The major category of investment is required to be determined based on the guidance in FASB ASC 320-10-50-1B. These disclosures are required for all investments within the scope of this ASU. The ASU adds an example of its required disclosures in FASB ASC 820-10-55-64A.

.150 These amendments are effective for interim and annual periods ending after December 15, 2009, and are included in FASB ASC 820-10. An AICPA practice aid, *Alternative Investments—Audit Considerations*, also is available and is a useful tool for auditors. It focuses on the existence and valuation assertions associated with alternative investments.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.151 In December 2009, the AICPA issued sections .18–.27 of TIS section 2220, *Long-Term Investments* (AICPA, *Technical Practice Aids*), to assist reporting entities when implementing the provisions of FASB ASC 820 to estimate the fair value of their investments in certain entities that calculate NAV. TIS sections 2220.18–.27 apply to investments that are required to be measured and reported at fair value and are within the scope of paragraphs 4–5 of FASB ASC 820-10-15. These questions and answers compliment the guidance provided in ASU No. 2009-12.

.152 Topics covered in these questions and answers include the following:

- The circumstances when NAV may be used to estimate the fair value of investments as a practical expedient
- How to identify the unit of account for interests in alternative investments
- Considerations for determining whether the reported NAV has been calculated in a manner consistent with FASB ASC 946
- Examples of circumstances when an adjustment to the reported NAV may be necessary
- How to adjust the reported NAV when it is not as of the reporting entity's measurement date
- How to adjust the reported NAV when it has not been calculated in accordance with FASB ASC 946
- The determination of the appropriate level within the fair value hierarchy for NAV of alternative investments in relation to the ability to redeem the investment versus the actual redemption request for the investment
- The definition of *near term* for the purposes of determining the appropriate level within the fair value hierarchy
- The tailoring of disclosures categories to address the nature and risks of investments
- Some considerations for determining the fair value of alternative investments when not utilizing NAV as a practical expedient

.153 Recently issued questions and answers can be located on the AICPA website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

Fair Value Measurements Disclosures

.154 ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*, was issued to increase the transparency in financial reporting of fair value measurements. FASB noted that due to the different degrees of subjectivity and reliability on level 1, level 2, and level 3 fair value measurements, information about significant transfers between the three levels and the underlying reasons for such transfers would be useful to financial statements users.

.155 This ASU amends FASB ASC 820-10 to require the following new disclosures:

- *Transfers in and out of levels 1 and 2*. A reporting entity should disclose separately the amounts of significant transfers in and out of level 1 and level 2 fair value measurements and describe the reasons for the transfers.
- *Activity in level 3 fair value measurements*. In the reconciliation for fair value measurements using significant unobservable inputs (level 3), a reporting entity should present separately information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number).

.156 Additionally, the ASU amends FASB ASC 820-10 to clarify certain existing disclosures as follows:

- *Level of disaggregation*. A reporting entity should provide fair value measurement disclosures for each class of assets and liabilities. A class is often a subset of assets or liabilities within a line item in the

statement of financial position. A reporting entity needs to use judgment in determining the appropriate classes of assets and liabilities.

- *Disclosures about inputs and valuation techniques*. A reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. Those disclosures are required for fair value measurements that fall in either level 2 or level 3.

.157 The amendments in ASU No. 2010-06 are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the rollforward of activity in level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years.

.158 In June 2010, the AICPA issued TIS section 1800.05, "Applicability of Fair Value Disclosure Requirements and Measurement Principles in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*, to Certain Financial Instruments" (AICPA, *Technical Practice Aids*). TIS section 1800.05 explains that the measurement principles of FASB ASC 820 do apply to financial instruments that are not recognized at fair value in the statement of financial position but for which fair value is required to be disclosed in the financial statement notes in accordance with paragraphs 10–19 of FASB ASC 825-10-50. On the other hand, the fair value disclosure requirements of FASB ASC 820-10-50 do not apply to financial instruments that are not recognized at fair value in the statement of financial position. For the complete discussion of these conclusions, readers are encouraged to refer to the full text of the question and answer. Recently issued technical questions and answers can be located on the AICPA's website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

Subsequent Declines in Market Value

.159 The AICPA issued TIS section 9070.06, "Decline in Market Value of Assets Subsequent to the Balance Sheet Date" (AICPA, *Technical Practice Aids*), in June 2010 to provide guidance to accountants on the appropriate treatment of declines in the market value of an asset subsequent to the balance sheet date. Through references to FASB ASC 855-10, TIS section 9070.06 clarifies that an entity should only recognize the effects of conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Changes in the fair value of assets or liabilities (financial or nonfinancial) after the balance sheet date, but before financial statements are issued or are available to be issued, are specifically identified as an example of a nonrecognized subsequent event.

Disclosures About Credit Quality and Allowance for Credit Losses

.160 In July 2010, FASB issued ASU No. 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, which requires an entity to provide a greater level of disaggregated information about the credit quality of its financing receivables and its allowance for credit losses. The ASU amends the existing disclosures to require an entity to provide the following disclosures about its financing receivables on a disaggregated basis:

- A rollforward schedule of the allowance for credit losses from the beginning of the reporting period to the end of the reporting period on a portfolio segment basis, with the ending balance further disaggregated on the basis of the impairment method. For each disaggregated ending balance, the related recorded investment in financing receivables should also be disclosed.
- The nonaccrual status of financing receivables by class of financing receivables.
- Impaired financing receivables by class of financing receivables.

.161 The amendments in this ASU require an entity to provide the following additional disclosures about its financing receivables:

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- Credit quality indicators of financing receivables at the end of the reporting period by class of financing receivables (see FASB ASC 310-10-55-19 for examples of credit quality indicators)
- The aging of past due financing receivables at the end of the reporting period by class of financing receivables
- The nature and extent of troubled debt restructurings that occurred during the period by class of financing receivables and their effect on the allowance for credit losses
- The nature and extent of financing receivables modified as troubled debt restructurings within the previous 12 months that defaulted during the reporting period by class of financing receivables and their effect on the allowance for credit losses
- Significant purchases and sales of financing receivables during the reporting period disaggregated by portfolio segment

.162 An entity must also describe, by portfolio segment, its accounting policies and methodology used to estimate its allowance for credit losses, including the identification of any changes to the entity's accounting policies or methodology from the prior period and the entity's rationale for the change.

.163 The amendments in this ASU apply to all entities with financing receivables. Examples of financing receivables include loans; trade receivables; notes receivable; and receivables relating to a lessor's leveraged, direct financing, and sales-type leases. See the "Pending Content" in paragraphs 13–15 of FASB ASC 310-10-55 for more information on the definition of *financing receivable*, including a list of items that are excluded from the definition (for example, debt securities). In addition, the "Pending Content" in paragraphs 7–12 of FASB ASC 310-10-55 illustrates certain disclosures required by this ASU.

.164 For public entities, the disclosures as of the end of a reporting period are effective for interim and annual reporting periods ending on or after December 15, 2010. The disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010. For nonpublic entities, the disclosures are effective for annual reporting periods ending on or after December 15, 2011.

Embedded Credit Derivatives

.165 FASB issued ASU No. 2010-11, *Derivatives and Hedging (Topic 815): Scope Exception Related to Embedded Credit Derivatives*, in March 2010 to address questions that have arisen in practice about the intended breadth of the embedded credit scope exception discussed in paragraphs 8–9 of FASB ASC 815-15-15. ASU No. 2010-11 clarifies the aforementioned scope exception for embedded credit derivative features related to the transfer of credit risk in the form of subordination of one financial instrument to another. This ASU addresses how to determine which credit derivative features, including those in collateralized debt obligations and synthetic collateralized debt obligations, are considered to be embedded derivatives that should not be analyzed under FASB ASC 815-15-25 for potential bifurcation and separate accounting. Further, the ASU explains that upon initial adoption of its amendments, an entity may elect the fair value option for any investment in a beneficial interest in a securitized financial asset. The amendments in this ASU are effective for each reporting entity at the beginning of its first fiscal quarter beginning after June 15, 2010. Early adoption is permitted at the beginning of each entity's first fiscal quarter beginning after the issuance of this ASU.

Share-Based Payment Awards Denominated in a Different Currency

.166 In April 2010, FASB issued ASU No. 2010-13, *Compensation—Stock Compensation (Topic 718): Effect of Denominating the Exercise Price of a Share-Based Payment Award in the Currency of the Market in Which the Underlying Equity Security Trades—a consensus of the FASB Emerging Issues Task Force*. This ASU clarifies that an employee share-based payment award with an exercise price denominated in the currency of a market in which a substantial portion of the entity's equity securities trades should not be considered to contain a condition that is not a market, performance, or service condition. Therefore, such an award should not be classified as a liability if it otherwise qualifies as equity. A share-based payment award that contains a condition that is not a market, performance, or service condition is required to be classified as a liability.

.167 This ASU affects entities that issue employee share-based payment awards with an exercise price denominated in the currency of a market in which a substantial portion of the entity's equity securities trades that differs from the functional currency of the employer entity or payroll currency of the employee. This will also affect any entities that have previously considered such awards to be liabilities because of their exercise price. For example, a parent entity whose functional currency is the Canadian dollar grants equity share options with an exercise price denominated in U.S. dollars to employees of a Canadian entity with the functional and payroll currency of the Canadian dollar. If a substantial portion of the parent entity's equity securities trades on a U.S. dollar denominated exchange, the options are not precluded from equity classification.

.168 The amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2010; early adoption is permitted. These amendments should be applied by recording a cumulative-effect adjustment to the opening balance of retained earnings. The cumulative-effect adjustment should be calculated for all awards outstanding as of the beginning of the fiscal year in which the amendments are initially applied as if the amendments had been applied consistently since the inception of the awards; the adjustment should also be presented separately.

Certificates of Deposit

.169 To provide additional guidance to constituents on the accounting and reporting on certificates of deposit, the AICPA staff issued three technical questions and answers in June 2010. TIS section 2130.40, "Certificates of Deposit and FASB ASC 320, *Investments—Debt and Equity Securities*" (AICPA, *Technical Practice Aids*), explains that, in accordance with the definition of *security* as stated by FASB ASC 320-10-20, certificates of deposit are typically not within the scope of FASB ASC 320, *Investments—Debt and Equity Securities*. That definition states that a *security* is a share, participation, or other interest in property or an entity of the issuer or an obligation of the issuer that has all of the following characteristics: (*a*) it is either represented by an instrument issued in bearer or registered form or, if not represented by an instrument, is registered in books maintained to record transfers by or on behalf of the issuer; (*b*) it is of a type commonly dealt in on securities exchanges or markets or, when represented by an instrument, is commonly recognized in any area in which it is issued or dealt in as a medium for investment; and (*c*) it either is one of a class or series or by its terms is divisible into a class or series of shares, participations, interests, or obligations. However, certain negotiable certificates of deposit may meet that definition and, therefore, may be subject to FASB ASC 320.

.170 Further, TIS section 2130.38, "Certificates of Deposit and Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements and Disclosures*" (AICPA, *Technical Practice Aids*), explains that certificates of deposit that do not meet the aforementioned definition of a security are not subject to the disclosure requirements of FASB ASC 820-10-50. Negotiable certificates of deposit that do meet that definition will be required to make those disclosures if they are not classified as held to maturity.

.171 Regarding classification on the balance sheet, TIS section 2130.39, "Balance Sheet Classification of Certificates of Deposit" (AICPA, *Technical Practice Aids*), states that certificates of deposit with original maturities of 90 days or less are commonly considered cash and cash equivalents under FASB ASC 305, *Cash and Cash Equivalents*. Those with greater original maturities and not defined as a security (in accordance with FASB ASC 320-10-20) could be included in the line item "investments—other." An example policy and procedures note disclosure is included in TIS section 2130.39.

FASB Statement No. 168

.172 FASB Statement No. 168, *The* FASB Accounting Standards Codification™ *and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162*, as codified in FASB ASC 105, *Generally Accepted Accounting Principles*, is effective for financial statements issued for interim and annual periods ending after September 15, 2009. On the effective date of FASB Statement No. 168, FASB ASC became the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the SEC. FASB ASC superseded all then-existing, non-SEC accounting and reporting standards for nongovernmental entities. This new standard flattens the U.S. GAAP hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is nonauthoritative (not in FASB ASC). Exceptions include

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

all rules and interpretive releases of the SEC under the authority of federal securities laws, which are sources of authoritative U.S. GAAP for SEC registrants, and certain grandfathered guidance having an effective date before March 15, 1992. If an accounting change results from the application of this guidance, an entity should disclose the nature and reason for the change in accounting principle in their financial statements.

Referencing FASB ASC in Your Documentation

.173 You should consider how your entity will reference FASB ASC in your documentation (policy and procedures, technical memorandums, financial statements and filings, engagement working papers, and so on). It is only prudent to reflect current U.S. GAAP in your documentation. The FASB Notice to Constituents (NTC) includes a section on referencing FASB ASC in footnotes and other documents. In this notice, FASB encourages the use of plain English to describe broad topic references in the future. For example, to refer to the requirements of the *Derivatives and Hedging* topic, they suggest a reference similar to "as required by the *Derivatives and Hedging* topic of the FASB *Accounting Standards Codification*." Conversely, FASB suggests using the detailed numerical referencing system in working papers, articles, textbooks, and related items.

.174 Also, because FASB ASC is not intended to change U.S. GAAP, the consistent use of references to only FASB ASC for all periods presented (including periods before the authoritative release of FASB ASC) is appropriate. It is prudent to expect that audit, attest, or compilation and review working papers associated with financial statements for a period ending after September 15, 2009, also would reflect FASB ASC because the underlying financial statements, which are the subjects of those engagements, reference FASB ASC.

.175 However, if your entity will continue to follow grandfathered guidance not included in FASB ASC, it would still be appropriate to reference those standards (and not FASB ASC). A listing of examples of grandfathered guidance can be found in FASB Statement No. 168.

.176 Examples of disclosures using references to FASB ASC can be found at the AICPA's dedicated FASB ASC website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AcctgFinRptg/AcctgFinRptgGuidance/Pages/FASBAccountingStandardsCodification.aspx.

Postcodification FASB References

.177 In spring 2010, the AICPA judgmentally selected 50 SEC filers and reviewed their 2009 Form 10-Ks to understand what type of references are actually being used in practice. All financial statements reviewed were for those entities having a fiscal year-end between December 1, 2009, and January 31, 2010, when the FASB codification was fully effective for all of these entities. The entities selected comprised the following:

- Fourteen large accelerated filers (28 percent of the sample)
- Twenty accelerated filers (40 percent of the sample)
- Seven nonaccelerated filers (14 percent of the sample)
- Nine smaller reporting companies (18 percent of the sample)

.178 Of all the entities selected, 50 percent had gone to mostly plain English references in their annual financial statements. However, among these entities, in the "Summary of Significant Accounting Policies" section of the financial statements, many entities did still use specific references to either old FASB standards (pre-FASB Statement No. 168 standards or legacy standards) or specific ASUs, when appropriate. There did not seem to be much of a difference in this percentage among large accelerated filers, accelerated filers, and nonaccelerated filers. However, smaller reporting companies were less likely to use plain English (only 33 percent used plain English references).

.179 As for the remaining 50 percent of filers selected, they chose to use either FASB ASC-specific references (36 percent) or to do some sort of dual references (12 percent) between the precodification standards and new FASB ASC guidance. There was one entity that continued to use the old FASB references and did not mention FASB ASC in its financial statements.

.180 For those entities using FASB ASC references, most only referenced to the topic level and did not go down to the subtopic or section level. For those using dual references, in most cases, the new FASB ASC topic was listed first, with the historical FASB reference noted parenthetically. See the following table for a full breakout of the results:

	Plain English References	*FASB ASC References*	*Dual References*	*Old FASB References*
Large Accelerated Filers	7	4	2	1
Accelerated Filers	12	6	2	0
Nonaccelerated Filers	3	3	1	0
Smaller Reporting Companies	3	5	1	0
Total Sample	25	18	6	1

.181 The sampling results make it clear that although both FASB and the SEC have stated that the use of plain English is most appropriate when dealing with financial statements and notes to financial statements, not everyone is there yet. It will be interesting to see if the plain English references trend continues upward once entities have had another full year to get used to FASB ASC. In addition, all new guidance issued in 2010 was issued through ASUs, and there were no legacy standards issued. Therefore, we would expect that in 2010 filings, even the "Summary of Significant Accounting Policies" section of financial statements would no longer refer to any legacy standards.

.182 We found that with the plain English references, some entities chose instead to say something like, "in accordance with the purchase method of accounting and as updated with FASB's April 2009 additional authoritative guidance for business combinations, we...." Here the entity uses plain English but also makes it clear which new guidance they are following. This would be most important for those FASB changes with early adoption provisions to make it clear which method an entity used.

.183 FASB has stated that ASUs do not carry any authority. It is the updates that are made to the codification once the ASU is effective that are authoritative. Therefore, entities would be wise to ensure that when they are referring to authoritative literature, use of either plain English or the FASB ASC references would be appropriate, rather than just naming the ASU that brought about the change in accounting.

.184 In addition, entities would want to be sure that they do not refer to any legacy standards in their 2010 financial statements. Because all changes made to the codification in 2010 were through ASUs, referring to legacy standards is no longer correct. For example, since the codification became effective, there have been several updates to the *Fair Value Measurements and Disclosures* topic. Therefore, referring to FASB Statement No. 157, *Fair Value Measurements*, is no longer accurate because this standard does not incorporate changes made since the codification became effective in 2009. We would expect that entities that used dual references to both the legacy standards and FASB ASC references would not continue to use those dual references in 2010 financial statements.

.185 Many entities also have a section of their notes to financial statements titled "Effect of Accounting Pronouncements Not Yet Adopted." In 2010, we would expect the title of this section to change to something like "Effect of Authoritative Accounting Guidance Not Yet Adopted."

.186 It will be interesting to see if both public and nonpublic entities make any additional refinements or changes to their 2010 financial statements as we move into our first full year with FASB ASC. It is our understanding that the SEC may be issuing comment letters to those entities that are not properly reflecting the current state of U.S. GAAP in their financial statements, whether that be by using plain English or using the new FASB ASC references.

Convergence With International Financial Reporting Standards

.187 Since the signing of the Norwalk Agreement by FASB and the International Accounting Standards Board (IASB), the bodies have had a common goal—one set of accounting standards for international use. *International convergence of accounting standards* refers to both the goal of this project and the path taken to reach it. The path toward reaching this goal will both improve U.S. GAAP and International Financial Reporting Standards (IFRSs) and eliminate the differences between them. In the Norwalk agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRSs. The "On the Horizon" section of this alert discusses these joint projects. For more information, visit www.fasb.org and www.iasb.org.

SEC Work Plan for Consideration of IFRSs

.188 In February 2010, the SEC issued Release No. 33-9109, *Commission Statement in Support of Convergence and Global Accounting Standards*. This release provides an update to the SEC's roadmap on its consideration of global accounting standards, including a confirmation of its continued support for the convergence of U.S. GAAP and IFRSs in order to narrow the differences between the two sets of standards. The SEC believes that a more comprehensive work plan is necessary to transparently lay out the work that must be done to support a decision on the appropriate course to incorporate IFRSs into the U.S. financial reporting system for U.S. issuers, including the scope, time frame, and methodology for any such transition. Therefore, the SEC has indicated that it will carefully consider and deliberate whether these changes are in the best interest of U.S. investors and markets.

.189 The SEC directed its staff to execute a work plan, the results of which will aid the SEC in its evaluation of the impact that the use of IFRSs by U.S. entities would have on the U.S. securities market. The work plan includes consideration of IFRSs, both as they currently exist and after the completion of the various convergence projects underway by FASB and the IASB. Among other things, the work plan addresses some of the comments and concerns received on the roadmap, including the following:

- Sufficient development and application of IFRSs for the U.S. reporting system
- The independence of standard setting for the benefit of investors
- Investor understanding and education regarding IFRSs
- Examination of the U.S. regulatory environment that would be affected by a change in accounting standards
- The impact on issuers, both large and small, including changes to accounting systems, changes to contractual arrangements, corporate governance considerations, and litigation contingencies
- Human capital readiness

.190 Beginning no later than October 2010, and frequently thereafter, the SEC staff will provide public progress reports on the work plan, as well as the status of the FASB and IASB convergence projects, until the work is complete. By 2011, assuming completion of these convergence projects and the staff's work plan, the SEC will decide whether to incorporate IFRSs into the U.S. financial reporting system and, if so, when and how. Commentors provided feedback on the timing discussed in the roadmap, suggesting that a four or five year time frame would be necessary to successfully implement a change in their financial reporting systems to incorporate IFRSs. Under that assumption, if the SEC determines in 2011 to incorporate IFRSs into the U.S. financial reporting system, the first time that U.S. entities would report under such a system would be no earlier than 2015. This timeline will be further evaluated as part of the work plan. The work plan is included as an appendix at the end of Release No. 33-9109 and also can be found on the SEC's website at www.sec.gov.

.191 In August 2010, the SEC issued two releases (Release Nos. 33-9133 and 33-9134, *Notice of Solicitation of Public Comment on Consideration of Incorporating IFRS Into the Financial Reporting System for U.S. Issuers*) to

solicit public comment on its ongoing consideration of incorporating IFRSs into the financial reporting system for U.S. issuers. The first release contains requests for comment on three topics derived from the work plan that are related to the potential impact on investors. The second release contains requests for comment on three topics, also derived from the work plan, that are related to the potential impact on U.S. issuers. All comments will be available on the SEC's website.

International Financial Reporting Standard for Small and Medium-sized Entities

.192 The IASB issued *International Financial Reporting Standard for Small and Medium-sized Entities* (*IFRS for SMEs*) to be a self-contained global accounting and financial reporting standard applicable to the general purpose financial statements of, and other financial reporting by, entities that are known in many countries as SMEs. *IFRS for SMEs* is intended to be used by entities that publish general purpose financial statements for external users and do not have public accountability.

.193 The AICPA Governing Council recognizes the IASB as an accounting body for purposes of establishing international financial accounting and reporting principles. This amendment to appendix A of AICPA Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, vol. 2, ET sec. 202 par. .01), and Rule 203, *Accounting Principles* (AICPA, *Professional Standards*, vol. 2, ET sec. 203 par. .01), gives AICPA members the option to use IFRSs as an alternative to U.S. GAAP. As such, a key professional barrier to using IFRSs and, therefore, *IFRS for SMEs* has been removed. CPAs may need to check with their state boards of accountancy to determine the status of reporting on financial statements prepared in accordance with *IFRS for SMEs* within their individual state. Any remaining barriers may come in the form of unwillingness by a private company's financial statement users to accept financial statements prepared under *IFRS for SMEs*, and a private company's expenditure of money, time and effort to convert to *IFRS for SMEs*. Information about IFRSs and *IFRS for SMEs* can be found at www.ifrs.com.

Private Company Financial Reporting

.194 The AICPA and the Financial Accounting Foundation established the "blue-ribbon panel" to address how U.S. accounting standards can best meet the needs of U.S. users of private company financial statements. This panel also is sponsored by the National Association of State Boards of Accountancy. The "blue-ribbon panel" will provide recommendations through an issued report on the future of standard setting for private companies, including whether separate, stand-alone accounting standards for private companies are needed. The panel has discussed how smaller entities are struggling to understand and implement complex standards, which has resulted in entities taking more GAAP exceptions. Other key items include (*a*) whether U.S. GAAP is meeting private company user needs in a cost-beneficial manner for both users and preparers, (*b*) how private company standard setting in the United States compares to standard setting in other countries, and (*c*) possible lessons to be learned from alternatives seen in other countries. The panel's issued report will be made available to the public, and the resulting action plan is expected to be exposed for public comment prior to that plan being finalized. Although no deadline has been set for the panel's work, the recommendations are likely to come in 2010.

.195 During the July 2010 meeting of the panel, seven alternative models for private company financial reporting were discussed. Models based on IFRSs and a model that would have resulted in no change to private company financial reporting were eliminated. All remaining models would result in differences in GAAP for private and public entities; the main focus of the panel moving forward will be to select a model that is relevant to users of private company financial reports because this has become the overriding issue. The three primary models the panel agreed to focus on going forward are U.S. GAAP with Exclusions for Private Companies—with enhancements; U.S. GAAP—Baseline GAAP with Public Company Add-Ons; and Separate, Stand-Alone GAAP Based on Current U.S. GAAP. Most of the panel members also expressed their discontent with the current make-up of FASB and its heavy, but appropriate, focus on public companies. This led to another key discussion topic: the structure of whatever model is chosen—the current FASB; a restructured FASB (with greater private company representation); or a new, separate Private Company Standards Board under the oversight of the Financial Accounting Foundation.

Recent Pronouncements

.196 AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers. The PCAOB establishes auditing and attestation standards for audits of issuers. For information on pronouncements issued subsequent to the writing of this alert, please refer to the AICPA website at www.aicpa.org, the FASB website at www.fasb.org, and the PCAOB website at www.pcaob.org. You also may look for announcements of newly issued accounting standards in the *CPA Letter Daily* and the *Journal of Accountancy*.

Recent Auditing and Attestation Pronouncements and Related Guidance

.197 The following table presents a list of recently issued audit and attestation pronouncements and related guidance.

Recent Auditing and Attestation Pronouncements and Related Guidance	
Statement on Auditing Standards (SAS) No. 120, *Required Supplementary Information* (AICPA, *Professional Standards*,AU sec. 558) Issue Date: February 2010 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard addresses the auditor's responsibility with respect to information that a designated accounting standard setter requires to accompany an entity's basic financial statements. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the basic financial statements does not cover required supplementary information. It also supersedes AU section 558A, *Required Supplementary Information* (AICPA, *Professional Standards*). This SAS is effective for periods beginning on or after December 15, 2010. Early application is permitted.
SAS No. 119, *Supplementary Information in Relation to the Financial Statements as a Whole* (AICPA, *Professional Standards*, AU sec. 551) Issue Date: February 2010 (Applicable to audits conducted in accordance with GAAS)	This SAS addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. The information covered by this SAS is presented outside the basic financial statements and is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Along with SAS No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, AU sec. 550), this SAS also supersedes AU section 551A, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*). This SAS is effective for periods beginning on or after December 15, 2010. Early application is permitted.
SAS No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, AU sec. 550) Issue Date: February 2010 (Applicable to audits conducted in accordance with GAAS)	This SAS addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the financial statements does not cover other information, and the auditor has no responsibility for determining whether such information is properly stated. This SAS establishes the requirement for the auditor to read the other information of which the auditor is aware because the credibility of the audited financial statements may be undermined by material inconsistencies between the audited financial statements and other information. This SAS supersedes AU section 550A, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*), and along with SAS No. 119 supersedes AU section 551A. This SAS is effective for periods beginning on or after December 15, 2010. Early application is permitted.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 117, *Compliance Audits* (AICPA, *Professional Standards*, AU sec. 801) Issue Date: December 2009 (Applicable to audits conducted in accordance with GAAS)	This standard amends AU section 801 to reflect changes in the compliance audit environment and incorporates the risk assessment standards. It requires the auditor to adapt and apply the AU sections of the AICPA's *Professional Standards* to compliance audits and provides guidance on how to do so. It is effective for compliance audits for fiscal periods ending on or after June 15, 2010. Earlier application is permitted.
Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801) Issue Date: April 2010	SSAE No. 16 supersedes the guidance for service auditors in AU section 324, *Service Organizations* (AICPA, *Professional Standards*), and addresses examination engagements undertaken by a service auditor to report on controls at organizations that provide services to user entities when those controls are likely to be relevant to user entities' internal control over financial reporting. Reports prepared in accordance with SSAE No. 16 may provide appropriate evidence under AU section 324. It is effective for service auditors' reports for periods ending on or after June 15, 2011. Earlier implementation is permitted.
Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 15, *Audit Evidence* (subject to approval by the Securities and Exchange Commission [SEC]) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard explains what constitutes audit evidence and establishes requirements for designing and performing audit procedures to obtain sufficient appropriate audit evidence to support the opinion expressed in the auditor's report.
PCAOB Auditing Standard No. 14, *Evaluating Audit Results* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard establishes requirements regarding the auditor's evaluation of audit results and determination of whether the auditor has obtained sufficient appropriate audit evidence. The evaluation process set forth in this standard includes, among other things, evaluation of misstatements identified during the audit; the overall presentation of the financial statements, including disclosures; and the potential for management bias in the financial statements.
PCAOB Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard establishes requirements for responding to the risks of material misstatement in financial statements through the general conduct of the audit and performing audit procedures regarding significant accounts and disclosures.
PCAOB Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard establishes requirements regarding the process of identifying and assessing risks of material misstatement of the financial statements. The risk assessment process discussed in the standard includes information-gathering procedures to identify risks and an analysis of the identified risks.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Recent Auditing and Attestation Pronouncements and Related Guidance	
PCAOB Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard describes the auditor's responsibilities for consideration of materiality in planning and performing an audit.
PCAOB Auditing Standard No. 10, *Supervision of the Audit Engagement* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard sets forth requirements for supervision of the audit engagement, including, in particular, supervising the work of engagement team members. It applies to the engagement partner and other engagement team members who assist the engagement partner with supervision.
PCAOB Auditing Standard No. 9, *Audit Planning* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard establishes requirements regarding planning an audit, including assessing matters that are important to the audit, and establishing an appropriate audit strategy and audit plan.
PCAOB Auditing Standard No. 8, *Audit Risk* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard discusses the auditor's consideration of audit risk in an audit of financial statements as part of an integrated audit or an audit of financial statements only. It describes the components of audit risk and the auditor's responsibilities for reducing audit risk to an appropriately low level in order to obtain reasonable assurance that the financial statements are free of material misstatement.
PCAOB Auditing Standard No. 7, *Engagement Quality Review* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards) Issue Date: January 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard and its related amendments supersede the interim concurring partner review requirements and update the interim quality control standards. An engagement quality review and concurring approval of issuance are required for each audit engagement and for each engagement to review interim financial information conducted pursuant to the standards of the PCAOB. The standard provides a framework for the engagement quality reviewer to objectively evaluate the significant judgments made and related conclusions reached by the engagement team in forming an overall conclusion about the engagement. It is effective for engagement quality reviews of audits and interim reviews for fiscal years that began on or after December 15, 2009.
PCAOB Staff Question and Answer, *Auditing Standard No. 7,* Engagement Quality Review (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 100.10) Issue Date: February 2010	This staff question and answer provides further implementation guidance on the documentation requirements of Auditing Standard No. 7 in light of comments the SEC received during its comment period.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
(Applicable to audits conducted in accordance with PCAOB standards)	
PCAOB Staff Audit Practice Alert (PA) No. 6, *Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants from Outside the Firm* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.06) Issue Date: July 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This alert is intended to remind registered public accounting firms of their obligations when using the work of other firms or using assistants engaged from outside the firm. The alert was prompted by observations by the PCAOB that a number of registered public accounting firms located within the United States have been issuing reports on financial statements filed by issuers that have substantially all of their operations outside of the United States, and some of these firms may not be conducting those audits in accordance with PCAOB standards.
PCAOB Staff Audit PA No. 5, *Auditor Considerations Regarding Significant Unusual Transactions* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.05) Issue Date: April 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This alert explains that significant unusual transactions, especially those close to period-end that pose difficult substance over form questions, can provide opportunities for entities to engage in fraudulent financial reporting. This staff audit practice alert is designed to remind auditors of public companies about their responsibilities to assess and respond to the risk of material misstatement of the financial statements due to error or fraud posed by significant unusual transactions.

Recent ASUs

.198 The following table presents, by codification area, a list of recently issued ASUs, through the issuance of ASU No. 2010-22, *Accounting for Various Topics—Technical Corrections to SEC Paragraphs (SEC Update)*. However, this table does not include ASUs that are SEC updates (such as ASU No. 2010-19, *Foreign Currency [Topic 830]: Foreign Currency Issues: Multiple Foreign Currency Exchange Rates [SEC Update]*) or ASUs that are technical corrections to various topics. FASB ASC does include SEC content to improve the usefulness of FASB ASC for public companies, but the content labeled as SEC staff guidance does not constitute rules or interpretations of the SEC nor does such guidance bear official SEC approval.

Recent AICPA Independence and Ethics Developments

.200 The Audit Risk Alert *Independence and Ethics Developments—2009* (product no. 0224709) contains a complete update on new independence and ethics pronouncements. This alert will heighten your awareness of independence and ethics matters likely to affect your practice. Obtain this alert by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Establishing and Maintaining Internal Control

.201 One of the Professional Ethics Executive Committee's (PEEC's) current projects deals with a possible inconsistency within Interpretation No. 101-3, "Performance of Nonattest Services." under Rule 101, *Independence* (AICPA, *Professional Standards*, ET sec. 101 par. .05). Interpretation No. 101-3 provides examples of general activities that would impair a member's independence, including establishing or maintaining internal controls, including performing ongoing monitoring activities for a client. The PEEC recognizes that some practitioners perceive an inconsistency in Interpretation No. 101-3 because certain bookkeeping services and other nonattest services that are permitted under Interpretation No. 101-3 could be viewed as "maintaining internal control" for the client. For example, bookkeeping is recognized to be part of COSO's information and communication element of internal control. Additionally, some nonattest activities, such as performing calculations (for example, tax provision, leases, last in first out [LIFO] reserve); maintaining ledgers (for example, fixed asset ledger); performing reconciliations; and identifying adjusting journal entries, have been viewed as maintaining the client's controls regardless of whether management has met the general requirements of Interpretation No. 101-3 (that is, oversees the service, reviews and approves the work, and makes all significant judgments and decisions).

.202 To address the possible inconsistency in Interpretation No. 101-3, the PEEC is considering possible clarifying revisions to Interpretation No. 101-3, and accordingly, readers are encouraged to monitor the progress of this project.

.203 PEEC meeting information, including meeting agendas, discussion materials, and minutes of prior meetings can be found at www.aicpa.org/InterestAreas/ProfessionalEthics/Community/MeetingMinutesandAgendas/Pages/MeetingInfo.aspx.

.204 Exposure drafts issued by the PEEC can be found at www.aicpa.org/InterestAreas/ProfessionalEthics/Community/ExposureDrafts/Pages/ExposureDrafts.aspx.

On the Horizon

.205 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

that are of particular significance or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.206 Information on, and copies of, outstanding exposure drafts may be obtained from the various standard setters' websites. These websites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard setting bodies for further information.

Auditing and Attestation Pipeline—Nonissuers

ASB Clarity Project

.207 In response to growing concerns about the complexity of standards, the ASB has commenced a large-scale clarity project to revise all existing auditing standards so they are easier to read and understand. Over the last few years, the ASB has been redrafting all of the existing auditing sections contained in the *Codification of Statements on Auditing Standards* (AU sections of the AICPA's *Professional Standards*) to apply the clarity drafting conventions and converge with the ISAs issued by the IAASB. The majority of the clarified standards will be issued in a single SAS codified as AU sections, with each section assigned a section number and title. When the new SAS becomes effective, the SASs issued prior to SAS No. 117, *Compliance Audits* (AICPA, *Professional Standards*, vol. 1, AU sec. 801), will be superseded. The ASB proposes that most redrafted standards become effective at the same time and is working toward completing the project in the first half of 2011. Two possible exceptions to that timeframe include the clarity redrafts of AU sections 341 and 532, *Restricting the Use of an Auditor's Report* (AICPA, *Professional Standards*, vol. 1).

.208 In May 2010, the expected effective date of the clarified standards was revised to be applicable for audits of financial statements for periods ending on or after December 15, 2012. The standards recently issued in clarified format (SAS Nos. 117–120) have different effective dates. The ASB believes that having a single effective date for most of the clarified standards will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. This expected date depends on satisfactory progress being made and will be amended, if necessary. Further, early adoption of the new SAS will not be appropriate. The SAS that will encompass all clarified AU sections will be issued with the next consecutive number that is available. See the explanatory memorandum "Clarification and Convergence," the discussion paper *Improving the Clarity of ASB Standards*, and *Clarity Project: Questions and Answers* at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestStndrds/ASBClarity/Pages/ImprovingClarityASBStandards.aspx. All clarified SASs that have been finalized by the ASB but are not yet issued as authoritative can be found at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestStndrds/ASBClarity/Pages/Final%20Clarified%20Statements%20on%20Auditing%20Standards.aspx.

Interim Financial Information

.209 In July 2010, the ASB issued two proposed SASs on interim financial information. The first, *Revised Applicability of Statement on Auditing Standards No. 116*, Interim Financial Information, is intended to revise paragraph 5 of SAS No. 116, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 722), so that the guidance in SAS No. 116 would be applicable when the auditor audited the entity's latest annual financial statements and the appointment of another auditor to audit the current year financial statements is not effective prior to the beginning of the period covered by the review. Currently, the guidance in SAS No. 116 is applicable when the auditor performs the audit of the latest annual financial statements and expects to be engaged to audit the current year financial statements (and, therefore, is not applicable when the auditor expects that a new auditor may be engaged for the current year). This proposed amendment would be effective for interim reviews of interim financial information for periods beginning after December 15, 2011, with early implementation permitted. Comments are due by October 8, 2010.

.210 The second proposal on interim financial information, *Interim Financial Information* (Redrafted), would supersede SAS No. 116 and represents the redrafting of the guidance to apply clarity drafting conventions. The main changes to existing standards are as follows:

- Replacement of the term *accountant* with *auditor*
- The change to paragraph 5 discussed in the prior paragraph
- Requirement of the auditor to issue a written report unless the review of the interim financial information is required by a third party and the third party does not require a written review report
- Allowance of oral reports for entities that are subject to external requirements to report in a manner that is substantially similar to the reporting required of issuers, pursuant to PCAOB standards
- Requirement for the auditor to perform procedures consistent with those required for acceptance of an engagement to audit financial statements
- Requirement for the review report to include a statement that the review of interim financial information was conducted in accordance with auditing standards generally accepted in the United States of America

.211 This proposed SAS would be effective for reviews of interim financial information for interim periods of fiscal years beginning on or after December 15, 2012. Comments for this proposed SAS are also due by October 8, 2010.

Finalized Clarified SAS on Service Organizations

.212 As discussed in the "Service Organizations" section of this alert, the ASB released the finalized clarified SAS on service organizations, *Audit Considerations Relating to an Entity Using a Service Organization*, which will supersede SAS No. 70 upon its effective date. This SAS, along with the majority of other clarified auditing standards, will be effective for periods ending on or after December 15, 2012. This SAS addresses the user auditor's responsibility for obtaining sufficient appropriate audit evidence in an audit of the financial statements of a user entity that uses one or more service organizations. The SAS defines a *service auditor* as a practitioner who reports on controls at a service organization and a *user auditor* as an auditor who audits and reports on the financial statements of a user entity. Services provided by a service organization are relevant to the audit of a user entity's financial statements when those services and the controls over them affect the user entity's information system, including related business processes, relevant to financial reporting. The nature and extent of work to be performed by the user auditor regarding the services provided by a service organization depend on the nature and significance of those services to the user entity and the relevance of those services to the audit. The objectives of the user auditor, when the user entity uses the services of a service organization, are to

- obtain an understanding of the nature and significance of the services provided by the service organization and their effect on the user entity's internal control relevant to the audit, sufficient to identify and assess the risks of material misstatement.
- design and perform audit procedures responsive to those risks.

.213 If the user auditor is unable to obtain a sufficient understanding of the service organization from the user entity, among other options, the auditor may obtain that understanding by obtaining and reading a type 1 or type 2 report, if available. A type 1 report is also referred to as a *report on management's description of a service organization's system and the suitability of the design of controls* and comprises the following: (*a*) management's description of the service organization's system; (*b*) a written assertion by management of the service organization about whether, in all material respects and based on suitable criteria, management's description of the service organization's system fairly presents the service organization's system that was designed and implemented as of a specified date and the controls related to the control objectives stated in management's description of the service organization's system were suitably designed to achieve those control objectives as of the specified date; and (*c*) a service auditor's report that expresses an opinion on the matters in (*b*).

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.214 A type 2 report is referred to as a *report on management's description of a service organization's system and the suitability of the design and operating effectiveness of controls*. A type 2 report contains all the same information as a type 1 report except that in the assertion by management of the service organization, the description of the system and its related controls cover a specified period (as opposed to a specified date). A type 2 report also requires management of the service organization to include in their assertion whether the controls related to the control objectives stated in management's description of the service organization's system operated effectively throughout the specified period to achieve those control objectives. Lastly, in a type 2 report, the service auditor's report includes an opinion on the same matters in a type 1 report, plus whether the controls related to the control objectives operated effectively throughout the specified period and a description of the service auditor's tests of controls and the results thereof.

.215 All final clarified SASs can be accessed through the AICPA's website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestStndrds/ASBClarity/Pages/Final%20Clarified%20Statements%20on%20Auditing%20Standards.aspx. Guidance for service auditors is contained in the recently issued SSAE No. 16.

Exposure Drafts on Auditor's Reports

.216 The ASB issued three proposed SASs related to auditor's reports: *Forming an Opinion and Reporting on Financial Statements*, *Modifications to the Opinion in the Independent Auditor's Report*, and *Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report*. These proposed standards are drafted with the ASB's clarity drafting conventions and are intended to converge with ISAs. The intent of issuing three separate SASs is to assist practitioners in identifying and applying the reporting requirements and guidance. The ASB has made various changes to the related ISAs to tailor them to the United States; however, these changes have not been substantial in nature.

.217 The comment period for the proposed SASs ended in December 2009. The proposed SASs are expected to be effective for audits of financial statements for periods ending on or after December 15, 2012. Auditors are encouraged to review the exposure draft and be alert for developments on this topic.

Exposure Drafts on Special Considerations Audits

.218 Another exposure draft issued by the ASB contains two proposed SASs: *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* and *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*. These proposed standards have been drafted with the clarity drafting conventions and are intended to converge with the equivalent ISAs. No meaningful differences exist between these proposed standards and the ISAs. *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* addresses the application of GAAS to financial statements prepared under the cash, tax, regulatory, or contractual bases of accounting. It also replaces the term *other comprehensive basis of accounting* with *special purpose framework*.

.219 *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement* introduces new planning, performance, and reporting requirements for these engagements. The proposed SAS also clarifies that a single financial statement and a specific element of a financial statement include the related notes.

.220 The comment period for the proposed SASs ended in December 2009. The proposed SASs are expected to be effective for audits of financial statements for periods ending on or after December 15, 2012. Auditors are encouraged to review the exposure draft and be alert for developments on this topic.

Auditing and Attestation Pipeline—Issuers

Confirmations

.221 The PCAOB has proposed a draft of an auditing standard on confirmations. A concept release was originally issued in April 2009 and received 24 comment letters. This proposed auditing standard, issued in July 2010, would strengthen the requirements under the current auditing standard, AU section 330, *The Confirmation Process* (AICPA, *PCAOB Standards and Related Rules*, Interim Standards), and replace it, upon final issuance of a standard and approval from the SEC. The proposed new standard

- requires confirmation procedures for specific accounts, such as receivables that arise from credit sales, loans, or other transactions, and also in response to significant risks that relate to the relevant assertions that can be adequately addressed by confirmation procedures.
- incorporates procedures in response to the risk of material misstatement, such as in the areas of investigating exceptions reflected on confirmation responses and evaluating nonresponses to confirmation requests.
- updates the confirmation guidance to reflect significant advances in technology and explains that confirmation responses received electronically (for example, by fax e-mail, through an intermediary, or direct access) might involve additional risks relating to reliability. Therefore, the auditor must perform additional requirements.
- defines a confirmation response to include electronic or other medium.
- enhances requirements when confirmation responses include disclaimers and restrictive language by requiring the auditor to evaluate the effect on the reliability of a confirmation response. Further, if the disclaimer or restrictive language causes doubts about the reliability of a confirmation response, the auditor should obtain additional appropriate audit evidence.

.222 In drafting this proposed standard, the PCAOB considered the guidance contained in ISA 505, *External Confirmations*, and the AICPA's proposed guidance on confirmations. This standard is anticipated to be effective for auditors for fiscal years ending on or after December 15, 2011.

Communications With Audit Committees

.223 In March 2010, the PCAOB proposed for comment an auditing standard on *Communications with Audit Committees* and a series of related amendments to its interim standards that are intended to (*a*) enhance the relevance and effectiveness of the communications between the auditor and the audit committee and (*b*) emphasize the importance of effective, two-way communications between the auditor and the audit committee to better achieve the objectives of the audit. Two of the new requirements would be for the auditor (*a*) to establish a mutual understanding of the terms of the audit engagement with the audit committee and to document that understanding in the engagement letter and (*b*) to evaluate the adequacy of two-way communication between the auditor and audit committee. Additionally, the proposal also includes requirements for the auditor to communicate with the audit committee regarding the following:

- An overview of the audit strategy and timing of the audit, including a discussion of significant risks; the use of the internal audit function; and the roles, responsibilities, and location of firms participating in the audit
- Critical accounting policies, practices, and estimates
- The auditor's evaluation of the entity's ability to continue as a going concern

.224 The proposed standard would become effective, subject to SEC approval, for audits of fiscal years beginning after December 15, 2010.

Joint FASB and IASB Accounting Pipeline

FASB and IASB Memorandum of Understanding

.225 FASB expects 2010 to be a pivotal year of progress toward the goal of completing the important projects in the "Memorandum of Understanding" (MoU) during 2011. Since its original issuance in 2006, FASB and the IASB have continued to reaffirm their respective commitments to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. FASB and the IASB agreed that the goal of joint projects is to produce common, principles-based standards, subject to the required due process. Most recently, FASB and the IASB have agreed to intensify their efforts to complete the major joint projects described in the MoU and are committed to developing, and making publicly available, quarterly progress reports on these major projects. The MoU identifies 11 convergence topics:

- Financial instruments
- Consolidations
- Derecognition
- Fair value measurement
- Revenue recognition
- Leases
- Financial instruments with characteristics of equity
- Financial statement presentation
- Other MoU projects
- Other joint projects

.226 A progress report for the quarter ended March 31, 2010, highlighted the following topics: (*a*) on the financial instruments and insurance contracts topics, the boards have reached different conclusions on significant technical issues that may affect the project timetables of these topics; and (*b*) the boards agreed to explore an alternative approach to lessor accounting that may affect the project timetable of this topic. FASB and the IASB also have several other joint projects in process, including balance sheet—offsetting, emissions trading schemes, and reporting discontinued operations. In March 2010, the exposure draft *Conceptual Framework for Financial Reporting* was published for public comment. In early June 2010, the boards issued a joint statement that discusses the boards' recognition of the challenges that arise from seeking effective global stakeholder feedback. Specifically, the boards were scheduled to expose for comment numerous major exposure drafts during the second quarter of 2010, and stakeholders voiced concern about their ability under those circumstances to provide high-quality input. The boards have developed a modified strategy to accommodate these concerns by prioritizing the major projects in the MoU, staggering the publication of exposure drafts by limiting the number of significant exposure drafts to four per quarter, and issuing a separate consultation document seeking stakeholder input about effective dates and transition methods.

.227 The priority joint projects are financial instruments, revenue recognition, leases, the presentation of other comprehensive income, and fair value measurements. The boards also decided to issue separate exposure drafts to address differences in the two sets of standards on balance sheet netting of derivative contracts and other financial instruments. The IASB has also made its projects on improved disclosures about derecognized assets and other off balance sheet risks, consolidations, and insurance contracts priorities. June 2011 or earlier will remain the target completion date for these priority convergence projects; the target completion dates for the nonpriority projects, however, have been extended into the second half of 2011. Additionally, the comments received on exposure drafts will affect the timeline of finalized converged standards. The boards' joint statement states that this action is not expected to negatively affect the SEC's work plan to consider in 2011 whether and how to incorporate IFRSs into the U.S. financial system.

.228 Readers are encouraged to remain current for the remainder of the exposure draft releases and other developments on convergence through the AICPA's website, www.ifrs.com, in addition to the FASB, IASB, and SEC websites. The growing acceptance of IFRSs as a basis for U.S. financial reporting could represent a fundamental change for the U.S. accounting profession.

Comprehensive Income Exposure Draft

.229 In May 2010, FASB issued a proposed ASU on comprehensive income that would require an entity to report total comprehensive income in a continuous financial statement in two parts: net income and other comprehensive income. In that financial statement, the components of net income and the components of other comprehensive income should be displayed. The proposed ASU is intended to simplify how comprehensive income is reported by eliminating two options for how items of comprehensive income are displayed. The proposed ASU contains illustrative examples of the revised financial statement. This proposed ASU is the result of a joint project as part of IFRSs and U.S. GAAP convergence, and the IASB has separately issued a similar document. The proposed amendments would be applied on a fully retrospective basis to improve comparability between reporting periods. Further, because compliance with the proposed amendments is already permitted, early adoption would be permitted. FASB plans to align the effective date with the effective date of the amendments in the proposed ASU on financial instruments. The IASB and FASB aim to finalize an improved and converged standard on other comprehensive income in the fourth quarter of 2010.

Financial Instruments Exposure Draft

.230 Also, in May 2010, FASB issued a proposed ASU on accounting for financial instruments, derivative instruments, and hedging activities. The main objective of this proposal is to provide financial statement users with a more timely and representative depiction of an entity's involvement in financial instruments while reducing the complexity in accounting for those instruments. It develops a consistent framework for classifying financial instruments; removes the threshold for recognizing credit impairments, creating a single credit impairment model for both loans and debt securities; and makes changes to the requirements to qualify for hedge accounting. The main provisions of these amendments are as follows:

- Most financial instruments would be measured at fair value in the statement of financial position each reporting period.
- Changes in fair value of equity securities, certain hybrid instruments, and financial instruments that can be prepaid in such a way that the holder would not recover substantially all of its investment would be recognized in net income each reporting period regardless of an entity's business strategy for those financial instruments.
- Hybrid financial instruments containing embedded derivatives that would otherwise have been required to be bifurcated under FASB ASC 815-15 would be classified and measured at fair value in their entirety, with changes accounted for through net income.
- For financial instruments for which an entity's business strategy is to hold for collection or payment(s) of contractual cash flows, a reconciliation from amortized cost to fair value would be required on the statement of position; with the exception of certain liabilities that qualify for the amortized cost option, all other changes in fair value from these instruments would be recognized in other comprehensive income each reporting period. Therefore, net income will remain relatively unchanged because only changes arising from interest accruals, credit impairments, and realized gains and losses would be recognized in net income each reporting period.
- The existing probable threshold for recognizing impairments on loans would be removed. (Currently, FASB ASC 310-10-35-4 states that the concept in U.S. GAAP is that impairment of receivables [including loans] should be recognized when, based on all available information, it is probable that a loss has been incurred based on past events and conditions existing at the date of the financial statements. *Probable* is defined by FASB ASC 310-10-20 as when the future event or events are likely to occur.)

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- For changes in the value of financial instruments measured through other comprehensive income, an entity is required to determine if a credit impairment is appropriate at the end of each reporting period based on information related to past events and existing economic conditions. An entity would recognize in net income the loss related to the amount of credit impairment for all contractual amounts the entity does not expect to collect.
- Core deposit liabilities would be remeasured each period using a current value method that reflects the economic benefit that an entity receives from this lower cost, stable funding source.
- Interest income would be recognized after considering cash flows that are not expected to be collected, which would better reflect a financial instrument's interest yield.
- Quantitative-based hedging requirements would be replaced with more qualitative-based assessments that would make it easier to qualify for hedge accounting. The shortcut method and critical terms match method would be eliminated. An entity would be able to designate particular risks as the risk being hedged in a hedging relationship, and only the effects of the risks hedged would be reflected in net income.
- Hedge accounting would be discontinued only if the criteria for hedge accounting are no longer met or the hedging instrument expires or is sold, terminated, or exercised. An entity would not be permitted to discontinue hedge accounting by simply removing the designation of a hedging relationship.

.231 Some specific types of financial instruments, such as pension obligations and leases, would be exempt from the proposed guidance. Additionally, short term receivables and payables would continue to be measured at amortized cost (plus or minus any fair value hedging adjustments). This proposed ASU was not issued jointly with the IASB and does not contain converged guidance; however, the goal still remains for both boards to issue comprehensive improvements to foster international comparability of financial information about financial instruments. The IASB completed its first phase of classification and measurement with the issuance of IFRS 9, *Financial Instruments*, in November 2009. The IASB also issued two exposure drafts on amortized cost and impairment and fair value option for financial liabilities in late 2009 and mid-2010, respectively; the third topic, hedge accounting, is still being deliberated by the IASB, and an exposure draft is expected in the near term. The boards have stated that they will consider together the comment letters and other feedback received on each boards' exposure drafts in an effort to reconcile their differences in ways that foster improvement and convergence. A comparison of FASB and IASB proposed models for financial instruments as of May 2010 can be found on FASB's website. The effective date of these amendments will be established upon issuance of the final ASU, which is expected in the second quarter of 2011; it is estimated to have an effective date in 2013. However, nonpublic entities with less than $1 billion in total consolidated assets would be granted an additional 4 years to implement certain requirements related to loans and core deposits. Upon its application, an entity would apply the proposed guidance by means of a cumulative-effect adjustment to the statement of financial position for the reporting period that immediately precedes the effective date.

Revenue Recognition Exposure Draft

.232 The revenue recognition project is intended to develop a single, common revenue recognition model that can be applied to a wide range of industries and transaction types. The standards resulting from this project will eliminate weaknesses and inconsistencies between the existing standards. A joint discussion paper issued by the boards proposed a single revenue recognition model. A joint exposure draft, *Revenue from Contracts with Customers*, from the boards was published in June 2010, and the boards aim to issue a final converged standard by the second quarter of 2011. The proposed standard would replace International Accounting Standard (IAS) 18, *Revenue*; IAS 11, *Construction Contracts*; and related interpretations in IFRSs; under U.S. GAAP, it would supersede most of the guidance contained in FASB ASC 605, *Revenue Recognition*. The core principle of the draft standard is that an entity should recognize revenue from contracts when it transfers goods or services to the customer in the amount of consideration the entity receives, or expects to receive, from the customer.

.233 In addition to eliminating weaknesses and inconsistencies between IFRSs and U.S. GAAP, this proposal intends to provide a more robust framework for addressing various revenue recognition issues; improve comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets; and simplify the preparation of financial statements by reducing the number of requirements to which entities must refer. The proposed standard will also amend the existing guidance on recognition of a gain or loss on the sale of some nonfinancial assets that are not an output of the entity's ordinary activities (for example, property, plant, and equipment) to be consistent with the proposed revenue recognition and measurement requirements. To implement the preceding core principle of revenue recognition, an entity would

- identify the contract(s) with the customer.
- identify the separate performance obligations in the contract (*performance obligation* is an enforceable promise [whether explicit or implicit] in a contract with a customer to transfer a good or service to the customer).
- determine the transaction price (*transaction price* is the amount of consideration that an entity receives, or expects to receive, from a customer in exchange for transferring goods or services promised in the contract).
- allocate the transaction price to the separate performance obligations.
- recognize revenue when the entity satisfies each performance obligation by transferring a promised good or service to a customer (a good or service is transferred when the customer obtains control of that good or service).

.234 The proposal also includes guidance on accounting for some costs. An entity would recognize the costs of obtaining a contract as expenses when incurred. For expenses incurred in fulfilling a contract, if they are ineligible for capitalization in accordance with other guidance, an entity would only be able to recognize an asset if those costs relate directly to a contract (or a specific contract under negotiation); generate or enhance resources of the entity that will be used in satisfying performance obligations in the future; and are expected to be recovered. The proposed guidance would differ from current practice in the following ways: (*a*) recognition of revenue only from the transfer of goods or services, (*b*) identification of separate performance obligations, (*c*) licensing and rights to use, (*d*) effect of credit risk, (*e*) use of estimates, (*f*) accounting for costs, and (*g*) disclosure.

.235 As discussed previously, because the revenue recognition project is one of many standards the boards expect to issue as converged and final in 2011, the boards plan to invite additional comment through a separate consultation on how best to transition over to the new standards. Therefore, no expected specific effective date is stated at this point. Comments on the exposure draft are due on October 22, 2010. This topic is considered by many to be the most pervasive of any FASB has ever worked on. The reader is encouraged to review the exposure draft, consider if it is operational to you or your clients' common revenue transactions, and share any resulting concerns with FASB. The boards also anticipate holding public roundtable meetings after the end of the comment period.

Fair Value Exposure Draft

.236 The fourth and final exposure draft of the second quarter of 2010 was *Fair Value Measurements and Disclosures (Topic 820): Amendments for Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The amendments in the exposure draft are intended to result in common fair value measurement and disclosure requirements in financial statements prepared in accordance with U.S. GAAP and IFRSs. Many of the requirements are not intended to result in a change in the application of the requirements in FASB ASC 820; however, some are intended to clarify or change the application of existing fair value guidance. Additionally, some wording changes were made to ensure the guidance is described consistently between U.S. GAAP and IFRSs. The most significant proposed amendments include the following:

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- Highest and best use and valuation premise
- Measuring the fair value of an instrument classified in shareholders' equity
- Measuring the fair value of financial instruments that are managed within a portfolio
- Application of blockage factors and other premiums and discounts in a fair value measurement
- Additional disclosures about fair value measurements

.237 The first two of these significant amendments are intended to clarify the application of existing fair value measurement guidance. The last three of these significant amendments would change a particular principle of fair value guidance.

.238 The amendments would specify that the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets, not when measuring the fair value of financial assets or liabilities. The FASB ASC glossary defines *highest and best use* as, in broad terms, the use of an asset by market participants that would maximize the value of the asset or the group of assets within which the asset would be used. The rationale for this proposed change is that the highest and best use concept is irrelevant when measuring the fair value of financial assets or liabilities because these items do not have alternative uses and their fair values do not depend on their use within a group of other assets or liabilities. These changes are not expected to affect the fair value measurement of nonfinancial assets. However, they might affect current practice for reporting entities that apply the in-use valuation premise more broadly.

.239 The amendments related to measuring the fair value of an instrument classified in shareholders' equity would specify that a reporting entity should measure the fair value of its own equity instrument from the perspective of a market participant who holds the instrument as an asset. An example of an instrument that would be measured at fair value and classified in shareholders' equity is equity interests issued as consideration in a business combination. Currently, U.S. GAAP does not contain explicit guidance on this topic, and the proposed amendments are expected to increase the comparability among reporting entities applying U.S. GAAP and IFRSs.

.240 Regarding measuring the fair value of financial instruments that are managed within a portfolio, the proposed amendments would allow an exception to FASB ASC 820 for measuring fair value when a reporting entity manages its net exposure, rather than its gross exposure, to the underlying risks. A reporting entity that holds a group of financial assets and financial liabilities is exposed to interest rate risk, currency risk, or other price risk (market risks) and to the credit risk of each of the counterparties. The proposed guidance is intended to coincide with financial institutions and other similar reporting entities that hold and manage these instruments in that manner. Specifically, a reporting entity could measure the fair value of the financial assets and financial liabilities that are managed in that way on the basis of the price that would be received to sell a net long position (that is, an asset) for a particular risk or to transfer a net short position (that is, a liability) for a particular risk in an orderly transaction between market participants at the measurement date. The proposed amendments would result in U.S. GAAP and IFRSs having the same requirements for measuring the fair value of financial instruments; additionally, these changes would not change how financial assets and financial liabilities that are managed on the basis of a reporting entity's net risk exposure are measured in practice. However, they might affect the current practice for reporting entities that apply the in-use valuation premise more broadly.

.241 The proposed amendments regarding the application of blockage factors and other premiums and discounts in fair value measurements would make two changes to current guidance. Currently, under U.S. GAAP, use of a blockage factor in fair value measurements is only prohibited when fair value is measured using a quoted price for an asset or a liability (or similar assets or liabilities). This would be level 1 within the fair value hierarchy. The first change from the proposed amendments is that a blockage factor is not relevant and, therefore, also should not be used when fair value is measured using a valuation technique that does not use a quoted price. This would be level 2 or level 3 within the fair value hierarchy. Second, the amendments specify that fair value measurements categorized within level 2 and level 3 take into account other premiums

and discounts when market participants would consider those premiums or discounts when pricing an asset or a liability, consistent with the unit of account for that asset or liability. Examples include a control premium or a noncontrolling interest discount. These proposed amendments may affect current practice for any reporting entities applying a blockage factor in fair value measurements that is measured using quoted prices and categorized within level 2 of the fair value hierarchy.

.242 Lastly, the amendments propose additional disclosures about fair value measurements. More information about the following would be required for disclosure:

- The effect on a fair value measurement of changing one or more unobservable inputs that could have reasonably been used to measure fair value in the circumstances
- Use of an asset in a way that differs from the asset's highest and best use when that asset is recognized at fair value in the statement of financial position on the basis of its highest and best use
- The categorization by level within the fair value hierarchy for items that are not measured at fair value in the statement of financial position but for which the fair value of such items is required to be disclosed

.243 The effective dates of these proposed amendments would be determined after the feedback from the exposure draft is considered. However, when it is effective, it will be effective as of the beginning of the period of adoption, and an entity would recognize a cumulative effect adjustment in beginning retained earnings in the period of adoption if a difference exists in a fair value measurement of an item recorded at fair value as a result of applying these amendments. Additional disclosures would be required on a prospective basis. These amendments are expected to achieve the objective of developing common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs.

Financial Statement Presentation Staff Draft

.244 FASB and the IASB are working together to establish a common standard that would improve how information is organized and presented in financial statements. This common standard is intended to address users' concerns that existing requirements permit too many alternative types of presentation and that information in financial statements is highly aggregated and inconsistently presented, making it difficult to understand fully the relationship between an entity's financial statements and its financial results. In 2008, a discussion paper was issued by the boards that outlined the proposed principles for presenting financial statements in a way that portrays a cohesive financial picture of an entity.

.245 Given the magnitude of this project, the expected implementation costs, and the substantial effects it will have on financial statement presentation for many years to come, the boards decided in May 2010 to modify the strategy for this project. Before finalizing an exposure draft, the boards decided to engage in additional outreach activities that focus on the perceived benefits and costs of the proposals and the implications of the proposals for financial reporting by financial service entities. The boards plan on discussing these two areas of focus with preparers and users of financial statements. This outreach will be based on a rough draft of a proposed standard, known as a *staff draft*, and reflects the cumulative tentative decisions made by the boards, concluding with their joint meeting in April 2010. This staff draft was made publicly available solely for this purpose.

.246 The proposals in this project would be applicable to all entities, except a benefit plan within the scope of FASB ASC 960, *Plan Accounting—Defined Benefit Pension Plans*, 962, *Plan Accounting—Defined Contribution Pension Plans*, and 965, *Plan Accounting—Health and Welfare Benefit Plans* or IAS 26, *Accounting and Reporting by Retirement Benefit Plans*. The two core financial statement principles in this proposal are cohesiveness and disaggregation. A common structure for the statements of financial position, comprehensive income, and cash flows would be established in the form of required sections, categories or subcategory, and related subtotals. Some proposed specific changes in the classification and format of financial statements include the following:

- Related information would be displayed in the same sections, categories, and subcategory in each statement so that information is more easily associated.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- Presentation of business and financing activities would be separated as follows:
  - The business section would include items that are part of an entity's daily operations and other income-generating activities.
  - The financing section would include items that are part of an entity's activities to obtain (or repay) capital.
- Discontinued operations and income taxes would be presented in their own separate sections.
- The statement of changes in equity would not include the sections and categories used in the other statements because that statement presents information solely about changes in items classified in the equity category in the statement of financial position.

.247 Further, FASB plans to propose some changes that are already required by IAS 1, *Presentation of Financial Statements*. The proposal would define, and provide the requirements for, a complete set of financial statements. Currently, a complete set of financial statements for the period is defined only in the FASB Concepts Statements. An entity would also be required to present one period of comparative information. A *complete set of financial statements* would consist of, at a minimum, statements of financial position, comprehensive income, cash flows and changes in equity, and notes to financial statements for two periods (the current period and the previous period). Also, an opening statement of financial position would be part of a complete set of financial statements if an entity applies an accounting principle retrospectively, restates its financial statements, or reclassifies items in the financial statements.

.248 The boards' tentative decisions on financial statement presentations do differ in a few ways in relation to minimum line requirements for the statement of financial position, segment reporting, and net debt presentation. Of these three, the differing stance on segment reporting is the only significant difference. The boards now aim to issue an exposure draft in the first quarter of 2011 and a final improved and converged standard in the fourth quarter of 2011. Both the introduction to the staff draft and the staff draft can be accessed from FASB's website at www.fasb.org.

Leases Exposure Draft

.249 During the third quarter of 2010, the IASB and FASB published for public comment joint proposals to improve the financial reporting of lease contracts. These proposals would result in a consistent approach to lease accounting for both lessees and lessors—a "right of use" approach. This would result in the liability for payments arising under the lease contract and the right to use the underlying asset being included in the lessee's statement of financial position, therefore providing more complete and useful information to investors and other users of financial statements. Currently, the accounting for a lease depends on its classification; an operating lease results in the lessee not recording any assets or liabilities in the statement of financial position under either IFRSs or U.S. GAAP, whereas a capital lease results in the lessee recognizing an asset and an obligation. Under the proposed guidance, lessees would only have one method of accounting for leases, which would produce more complete and comparable financial reporting in addition to reducing the opportunity to structure transactions to achieve a desired accounting outcome.

.250 The scope of the new lease guidance includes all leases (including leases of right-of-use assets in a sublease) other than leases of biological and intangible assets, leases to explore for or use natural resources, and leases of some investment properties. Under this new guidance, all lessees would use a single method of accounting for all leases: an asset would be recognized representing the lessee's right to use the leased (underlying) asset for the lease term (the right-of-use asset), and a liability at the present value of the expected lease payments would also be recognized.

.251 A lessor would recognize an asset representing its right to receive lease payments, and depending on its exposure to risks or benefits associated with the underlying asset, the lessor would either (*a*) recognize a lease liability while continuing to recognize the underlying asset (a performance obligation approach) or (*b*) derecognize the rights in the underlying asset that it transfers to the lessee and continue to recognize a residual

asset representing its rights to the underlying asset at the end of the lease term (a derecognition approach). The assets and liabilities recognized by both lessors and lessees would be measured on the basis that

- assumes the longest possible lease term that is more likely than not to occur, taking into account the effect of any options to extend or terminate the lease.
- uses an expected outcome technique to reflect the lease payments, including contingent rentals and expected payments under term option penalties and residual value guarantees, specified by the lease.
- a remeasurement is triggered when changes in facts or circumstances indicate that there would be a significant change in those assets or liabilities since the previous reporting period.

.252 For leases of 12 months or less, lessors and lessees would be able to apply simplified requirements. The simplified accounting would allow lessees to ignore the effects of interest on the recorded assets and liabilities and allow the lessee to record the liability for lease payments at the undiscounted amount for lease payments. New disclosures would also be required.

.253 In early 2009, the boards issued a discussion paper on leases; this exposure draft is the result of extensive deliberations that included consideration of input received from investors, preparers, auditors, regulators, and other interested parties since that discussion paper. The comment period is open until December 15, 2010. During the comment period, the boards will undertake further outreach activities, including public roundtable meetings to ensure that the views of all interested parties are taken into consideration before the new standard is completed. Also, the boards will share and jointly consider all comment letters received. A final standard is expected in 2011.

Auditing Considerations of Accounting Convergence

.254 Although the future of convergence between IASB and FASB accounting standards remains an unknown, discussions have already begun about the potential impact on auditors. Although auditors are accustomed to new standards, the nature and volume of these changes will likely pose new challenges. Among others, some of these potential challenges include the following:

- Training audit staff on a large amount of new accounting guidance that is based on an accounting approach (that is, principles based versus rules based)
- Developing, as necessary, any new internal audit guidance, such as firm methodology
- Implementing any new resulting auditing rules
- Creating a new framework for documenting audit conclusions on a principles-based accounting approach
- Audit committees learning new accounting guidance to effectively perform their function

.255 In addition to the challenges auditors will face, the effects on preparers will also be great. At the time of this writing, it appears that the transition timeline to convergence will be relatively short; this will divert resources during the preparation of financial statements as entities focus on implementing the new principles, which may result in increased audit risk. Auditors, in addition to preparers, are also encouraged to remain current on developments of international accounting convergence.

FASB Accounting Pipeline

Disclosure of Certain Loss Contingencies

.256 In July 2010, FASB issued an exposure draft on the disclosure of certain loss contingencies in response to concerns from investors and other financial statement users that the current disclosures do not provide adequate and timely information to assess the likelihood, timing, and magnitude of future cash outflows associated with loss contingencies. The objective of these disclosures would be for an entity to disclose qualitative and quantitative information about loss contingencies to enable financial statement users to

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

understand all of the following: the nature of the loss contingencies, their potential magnitude, and their potential timing (if known). Disclosure of certain remote loss contingencies would be required and, therefore, would expand the population of loss contingencies that are required to be disclosed. An entity would not consider the possibility of recoveries from insurance or other indemnification arrangements when assessing the materiality of loss contingencies to determine whether disclosure is required. Further, current qualitative disclosures would be enhanced by requiring additional disclosures. These additional required qualitative and quantitative disclosures include the following:

- For litigation contingencies, the contentions of the parties and how users can obtain more information about the litigation
- Publicly available quantitative information, such as the claim amount for asserted litigation contingencies; other relevant nonprivileged information; and, in some cases, information about possible recoveries from insurance and other sources
- For public entities, tabular reconciliations, by class, of recognized (accrued) loss contingencies that present the activity in the account during the period

.257 The amendments in this proposal would affect all entities. The exposure draft noted that FASB will continue to work with the PCAOB, the AICPA, and the American Bar Association (ABA) to identify and address any potential implications of the proposed amendments for auditing literature and the ABA's Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information. The proposed amendments would be effective for fiscal years ending after December 15, 2010, for public entities and in the first annual period beginning after December 15, 2010, for nonpublic entities. The comment period ended in September 2010.

Going Concern FASB Project

.258 Currently, the only guidance on going concern resides in the auditing literature, and this project's intention is to incorporate going concern guidance into U.S. GAAP. Specifically, this guidance would discuss the following:

- Preparation of financial statements as a going concern
- An entity's responsibility to evaluate its ability to continue as a going concern
- Disclosure requirements when financial statements are not prepared on a going concern basis
- Disclosure requirements when there is a substantial doubt about an entity's ability to continue as a going concern
- The adoption and application of the liquidation basis of accounting

.259 A revised exposure draft is expected to be issued in the fourth quarter of 2010, with a final ASU expected in the first quarter of 2011. FASB has decided that management should take into account available information about the foreseeable future, which is generally, but not limited to, 12 months from the end of the reporting period. Readers should be alert to developments on this topic.

Other Accounting Projects

.260 Additionally, FASB has the following projects underway:

- Troubled debt restructuring
- Disclosure framework
- Investment properties

Resource Central

.261 The following are various resources that practitioners may find beneficial.

Publications

.262 Practitioners may find the following publications useful. Choose the format best for you—online or print.

- Audit Guide *Analytical Procedures* (2008) (product no. 012558 [paperback] or WAN-XX [online])
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2009) (product no. 012459 [paperback] or WRA-XX [online])
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2010) (product no. 0125210 [paperback] or WDI-XX [online])
- Guide *Compilation and Review Engagements* (2010) (product no. 0128110 [paperback] or WRC-XX [online])
- Audit Guide *Auditing Revenue in Certain Industries* (2010) (product no. 0125110 [paperback] or WAR-XX [online])
- Audit Guide *Audit Sampling* (2008) (product no. 012538 [paperback] or WAS-XX [online])
- Audit Risk Alert *Compilation and Review Developments—2010/11* (product no. 0223010 [paperback])
- Audit Risk Alert *Independence and Ethics Developments—2009* (product no. 0224709 [paperback] or WIA-XX [online])
- *Independence Library* featuring the Audit Risk Alert *Independence and Ethics Developments—2009* and two independence practice aids (product no. WIL-XX [online])
- *Checklists and Illustrative Financial Statements for Corporations* (product no. 008939 [paperback] or WCP-CL [online])
- *Accounting Trends & Techniques, 63rd Edition* (product no. 0099009 [paperback] or WAT-XX [online])
- *IFRS Accounting Trends & Techniques* (product no. 0099109 [paperback] or WIF-XX [online])
- *Audit and Accounting Manual* (2010) (product no. 0051310 [paperback], WAM-XX [online], or AAM-XX [loose leaf])
- Audit and Accounting Practice Aid *Independence Compliance: Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006661 [paperback] or WGO-XX [online])
- Audit and Accounting Practice Aid *Independence Compliance: Checklists and Tools for Complying With AICPA, SEC, and PCAOB Independence Requirements* (product no. 006660 [paperback] or WSC-XX [online])
- Financial Reporting Alert *Current Economic Crisis: Accounting Issues and Risks for Financial Management and Reporting—2010* (product no. 0292010 [paperback])

AICPA Online Professional Library: Accounting and Auditing Literature

.263 The AICPA has created your core accounting and auditing library online. AICPA Online Professional Library is now customizable to suit your preferences or your firm's needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to FASB ASC, the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides, Audit Risk Alerts, *Accounting Trends & Techniques*, and more. One option is the *AICPA Audit and Accounting Guides with FASB Accounting Standards Codification™*, which contains all audit and accounting guides, all audit risk alerts, and FASB ASC on Online Professional Library (product no. WFA-XX [online]). To subscribe to this essential online service for accounting professionals, visit www.cpa2biz.com.

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Continuing Professional Education

.264 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop (2010–2011 Edition)* (product no. 730096 [text] or 180096 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Internal Control Essentials for Financial Managers, Accountants and Auditors* (product no. 731856 [text], 181856 [DVD/Manual], or 351856 [Additional Manual for DVD]). This course will provide you with a solid understanding of systems and control documentation at the significant process level.
- *International Versus U.S. Accounting: What in the World is the Difference?* (product no. 731668 [text] or 181661 [DVD]). Understanding the differences between IFRSs and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRSs and U.S. GAAP.
- *IFRS Essentials with GAAP Comparison: Building a Strong Foundation* (product no. 741602 [text], 181601 [DVD/Manual], or 351601 [Additional Manual for DVD]). This course provides you with a greater understanding of what you need to know as the acceptance of international standards continues to grow.

.265 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.266 AICPA CPExpress, offered exclusively through CPA2Biz, is the AICPA's flagship online learning product. AICPA members pay $180 for a new subscription and $145 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest include the following:

- Accounting and Auditing Update
- Small Business Accounting and Auditing Update
- Fair Value Accounting
- Accounting for Goodwill and Other Intangibles
- Uncertainty in Income Taxes
- Revenue Recognition in Today's Business Climate
- International Versus US Accounting
- Fraud and the Financial Statement Audit
- Public Company Update
- SEC Reporting

.267 To register or learn more, visit www.cpa2biz.com.

Webcasts

.268 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM. For additional details on available webcasts, please visit www.cpa2biz.com/AST/AICPA_CPA2BIZ_Browse/Store/Webcasts.jsp.

Member Service Center

.269 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.270 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. The hotline is available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 or online at www.aicpa.org/Research/TechnicalHotline/Pages/TechnicalHotline.aspx. Additionally, members can submit questions by completing a Technical Inquiry form found on the same website.

Ethics Hotline

.271 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

The CAQ

.272 The CAQ, which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.273 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that provides education, communication, representation, and other means to member firms that audit or are interested in auditing public companies. To learn more about the CAQ, visit http://thecaq.aicpa.org.

Compilation and Review Developments—2010/11

STRENGTHENING ENGAGEMENT QUALITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Compilation and Review Alert replaces *Compilation and ReviewDevelopments—2009*.

This Compilation and Review Alert (alert) is intended to provide accountants with an update on recent practice issues and professional standards that affect compilation and review engagements. This alert also can be used by an entity's internal management to address areas of concern.

This publication is an *other compilation and review publication*, as defined in AR section 50, *Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2).[1] Other compilation and review publications have no authoritative status; however, they may help the accountant understand and apply Statements on Standards for Accounting and Review Services.

If an accountant applies the guidance included in an other compilation and review publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the engagement and appropriate. The guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Recognition

The AICPA gratefully appreciates the invaluable assistance Kristy L. Illuzzi, CPA, and Dennis W. Ridge, Jr., CPA, provided in creating this publication. The AICPA would like to thank the members of the Accounting and Review Services Committee for their invaluable review of this year's publication. We would also like to thank Michael P. Glynn, CPA, technical manager, Audit and Attest Standards, for his essential contributions in creating this publication.

Feedback

The *Compilation and Review Developments* alert is published annually. As you encounter issues that you believe warrant discussion in next year's alert, please feel free to share them with us. Any other comments that you have about the alert also would be appreciated. You may e-mail these comments to A&APublications@aicpa.org.

How This Alert Helps You

.01 This Compilation and Review Alert (alert) helps you plan and perform your compilation and review engagements and can be used by an entity's internal management to address areas of concern. This alert discusses recent Statements on Standards for Accounting and Review Services (SSARSs) developments,

[1] In December 2009, the Accounting and Review Services Committee issued Statement on Standards for Accounting and Review Services (SSARS) No. 19, *Compilation and Review Engagements* (AICPA, *Professional Standards*, vol. 2). Upon becoming effective, this new standard will supersede AR section 50, *Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2). However, SSARS No. 19 retains essentially the same guidance on interpretive publications as currently exists in AR section 50. SSARS No. 19 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2010.

addresses emerging practice issues, and provides valuable information regarding current accounting developments. You should refer to the full text of accounting and compilation and review pronouncements, as well as the full text of any rules or publications that are discussed in this alert.

Economic Developments

The Current Economy

.02 When planning and performing compilation and review engagements, the accountant should understand both the general current economy and the specific economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on an entity's business and, therefore, its financial statements.

.03 The year 2010 may be the beginning of a wave of economic recovery. Although many key indicators, such as unemployment, are still uncomfortably high, 2010 began with rising commodity prices, a jump in new factory orders that caused the largest expansion in production in 3 years, and an increase in U.S. auto sales that approached prerecessionary levels. Further, after experiencing a considerable decline in the stock market through March 2009, the markets have rebounded substantially. In March 2009, the S&P 500 and the Dow Jones Industrial Average reached their 12-year lows, and NASDAQ closed at its lowest point since October 2002. By March 2010, only a year later, all 3 had increased in value by at least 59 percent from the previous year's lows. However, all 3 remained unmoved 4 months later, in July 2010. This exhibits the continuing uncertainty in the markets due to the varying economic indicators, the financial reform regulatory changes, and Europe's economy, among other reasons.

Key Economic Indicators

.04 These key economic indicators further illustrate the severity of the recent recessionary period experienced by the United States.

.05 The gross domestic product (GDP) measures output of goods and services by labor and property within the United States. It increases as the economy grows or decreases as it slows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 1.6 percent in the second quarter of 2010 (second estimate), 3.7 percent in the first quarter of 2010, and 5.6 percent in the fourth quarter of 2009. This data indicates a turnaround in the economy because in the fourth quarter of 2008 and the first quarter of 2009, real GDP decreased 6.3 percent and 5.5 percent, respectively. Further, in June 2010, the Treasury reported that banks had repaid about 75 percent of the bailout money they received through the Troubled Asset Relief Program and that taxpayers made $21 billion on the investment. However, other bailouts are not yet repaid, and they may yield losses to taxpayers.

.06 From July 2009 to July 2010, the unemployment rate fluctuated between 9.4 percent and 10.1 percent. An unemployment rate of 10.0 percent represents approximately 15.3 million people. The annual average rate of unemployment increased from 4.6 percent in 2007 to 9.3 percent in 2009. However, through June 2010, the rate has remained below 10.0 percent. Additionally, one reason for the continued high unemployment rate is that more Americans are resuming their search for work.

.07 The Federal Reserve decreased the target for the federal funds rate more than 5.0 percentage points to less than 0.25 percent, where it remained through early August 2010. The Federal Reserve described the current economic recovery in its August 10, 2010, press release as follows:

- Household spending is increasing gradually but remains constrained by high unemployment, modest income growth, lower housing wealth, and tight credit.
- Business spending on equipment and software is rising; however, investment in nonresidential structures continues to be weak and employers remain reluctant to add to payrolls.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- Housing starts remain at a depressed level.
- Bank lending has continued to contract in recent months.
- The pace of economic recovery is expected to be more modest in the near term than had been anticipated.

.08 The Federal Reserve also noted in the press release that "economic conditions, including low rates of resource utilization, subdued inflation trends, and stable inflation expectations, are likely to warrant exceptionally low levels of the federal funds rate for an extended period." The Federal Reserve will keep constant their holdings of securities by reinvesting principal payments from mortgage-backed securities in longer-term Treasury securities; additionally, as current holdings of Treasury securities mature, the proceeds will be reinvested in Treasury securities. Since the economic crisis, the Federal Reserve's balance sheet has grown to $2.3 trillion. Further, the Federal Reserve will continue to monitor the economy and employ other policy tools as necessary.

Small Business Trends and Conditions

.09 Private companies and, more specifically, small businesses are a main driver for the U.S. economy. According to the National Federation of Independent Businesses (NFIB), small businesses have produced roughly half of the private GDP and approximately 2 out of every 3 net new jobs in the United States since the early 1970s. Businesses employing less than 100 people constitute 96 percent of all employers.

.10 According to the July 2010 *NFIB Small Business Economic Trends*, the June Index of Small Business Optimism lost 1 point over the previous month, falling to 87.9, after posting a gain of 6.9 points since March 2010. Four of the 10 index components posted gains, but 6 lost ground. The decline, although small in magnitude, was primarily a result of declines in expected real sales and expected business conditions.

.11 In summary, the economic outlook remains uncertain. Pay close attention to how economic factors, such as interest rates, consumer confidence, the housing market, overall economic expansion or contraction, inflation, and the labor market, will affect your clients and your compilation and review engagements.

Legislative and Regulatory Developments

The Health Care and Education Reconciliation Act of 2010 and the Patient Protection and Affordable Care Act

.12 In March 2010, the president signed into law a sweeping overhaul of the health care system. Almost everyone in the United States will be affected by these changes—individuals, insurance companies, health care providers, and employers. The three primary goals of the reform are to expand coverage to those without health insurance, reform the delivery system of benefits to improve quality, and decrease the costs of providing health care. The various provisions of the reform will become effective over time, through 2020. The new laws contain many changes for employers to consider for financial reporting purposes, in addition to many new tax rules to help offset the overall cost of the reform.

.13 The complete changes are contained in two acts. The Health Care and Education Reconciliation Act of 2010 was signed on March 30 and is a reconciliation bill that amends the Patient Protection and Affordable Care Act signed into law by the president one week earlier. In April, the Securities and Exchange Commission (SEC) issued a staff announcement, *Accounting for the Health Care and Education Reconciliation Act of 2010 and the Patient Protection and Affordable Care Act*, to address questions that have arisen about the effect, if any, that the different signing dates might have on accounting for the two acts. This timing difference, related solely to the signing dates, should not have an impact on a majority of registrants because the acts were both signed within a relatively short time period, which for the vast majority of entities, falls into the same reporting period. However, there may be a limited number of registrants with a period-end that falls between the signing dates for which the timing difference could raise questions about whether the different signing dates have an accounting impact.

.14 After consultation with the Financial Accounting Standards Board (FASB) staff, the Office of the Chief Accountant would not object to a view that the two acts should be considered together for accounting purposes. That is, in this specific fact pattern, the SEC staff would not object to a registrant incorporating the effects of the Health Care and Education Reconciliation Act of 2010 when accounting for the Patient Protection and Affordable Care Act. This view is based in part on the SEC staff's understanding that the two acts, when taken together, represent the current health care reform as passed by Congress and signed by the president. The SEC staff does not believe that it would be appropriate to analogize to this view in any other fact patterns.

Significant Accounting and Tax Considerations

.15 FASB *Accounting Standards Codification* (ASC) 740-10-30-2 states that the following basic requirements are applied to the measurement of current and deferred income taxes at the date of the financial statements:

- The measurement of current and deferred tax liabilities and assets is based on provisions of the enacted tax law; the effects of future changes in tax laws or rates are not anticipated.
- The measurement of deferred tax assets is reduced, if necessary, by the amount of any tax benefits that, based on available evidence, are not expected to be realized.

.16 FASB ASC 715-60-35-102 further explains that benefit coverage for medical claims by governmental programs or other providers of health care benefits should be assumed to continue as provided by the present law and other providers, pursuant to their present plans. Consistent with FASB ASC guidance, presently enacted changes in the law or amendments of the plans of other health care providers that take effect in future periods and that will affect the future level of their benefit coverage should be considered in current period measurements for benefits expected to be provided in those future periods. Future changes in laws concerning medical costs covered by governmental programs and future changes in the plans of other providers should not be anticipated.

.17 The two primary accounting considerations resulting from this reform are the effects of the tax law changes on deferred income tax balances and other postretirement health benefits. One of the most significant changes relates to the government subsidy for providing qualifying prescription drug coverage to Medicare-eligible retirees becoming an offset for prescription drug income tax deductions. Specifically, because entities will need to reduce their income tax deduction for providing prescription drug coverage by the subsidy received, they currently need to record a charge to earnings to write off a portion of their deferred tax assets related to postretirement health care obligations. Such deferred tax assets were based on the gross liability amount. Because the tax deductible prescription drug costs liability will be reduced by the subsidy, the deferred tax asset will be computed net of the subsidy, resulting in a lower deferred tax asset. The federal subsidy will not reduce the tax deductions until 2013. Even though the changes may not be effective until future periods, the effects are accounted for in the period that includes the enactment date. FASB ASC 715-60 discusses accounting and reporting guidance for other postretirement plans, including the Medicare prescription drug plan. Many public entities have already posted large noncash charges in early 2010 related to the nondeductibility of the subsidy.

.18 Some of the other provisions of the reform that may affect an entity's tax position include the nondeductible pharmaceuticals fee, the medical device excise tax, and the therapeutic discovery project tax credit, which will have an effect on the pharmaceutical and medical device industries. Additionally, employer group health plans may not impose lifetime limits and can only impose "restricted" annual limits beginning with the 2011 plan year (for calendar year plans); no annual limits would be permitted beginning in 2014. Because these health benefits can no longer be limited, entities may need to increase accruals for future medical obligations. Many small businesses and tax-exempt organizations that provide health insurance coverage to their employees will now qualify for a special tax credit that is designed to encourage small employers to offer health care coverage for the first time or maintain the coverage they have. Lastly, under the new reform, a 40 percent penalty will apply to tax understatements attributable to transactions lacking economic substance (20 percent with adequate disclosure) or failing to meet the requirements of any similar rule of law. A transaction is treated as having economic substance only if the transaction changes in a

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

meaningful way (apart from federal income tax effects) the taxpayer's economic position, and the taxpayer has a substantial purpose (apart from federal income tax effects) for entering into the transaction.

.19 The full text of these acts can be found at http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_laws&docid=f:publ152.111.pdf and http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_laws&docid=f:publ148.111.pdf. Readers are also encouraged to refer to the Audit Risk Alerts *Health Care Entities—2010/11* (product no. 0223410) and *Not-for-Profit Entities—2010* (product no. 0224210).

Recently Issued SSARS

Issuance of SSARS No. 19

.20 In December 2009, the Accounting and Review Services Committee (ARSC) issued SSARS No. 19, *Compilation and Review Engagements* (AICPA, *Professional Standards*, vol. 2). The standard's effective date is for periods ending on or after December 15, 2010, with the exception of paragraph 2.21 (AR sec. 80 par. .21), which may be implemented early. Paragraph 2.21 (AR sec. 80 par. .21) states in part, "The accountant is not precluded from disclosing a description about the reason(s) that his or her independence is impaired." See appendix B, "Significant Change to Compilation Reporting Requirements When Independence Is Impaired," of this alert for questions and answers regarding this new independence reporting option. It should be noted that SSARS No. 19 does not change the independence literature in any way—it just provides a reporting option for accountants performing compilation engagements.

.21 Another significant change that smaller firms should appreciate is that this new standard separates the compilation guidance from the review guidance. Other significant changes to SSARSs included the following:

- A discussion of how the accountant obtains limited assurance through the performance of review procedures
- The introduction of the term *review evidence* to the review literature
- A discussion of tailoring the review procedures based on the accountant's understanding of the client's industry, knowledge of the client, and awareness of the risk that the accountant may unknowingly fail to modify his or her review report on financial statements that are materially misstated
- A discussion of materiality in the context of a review engagement
- A requirement that an accountant document the establishment of an understanding with management through a written communication (that is, an engagement letter) regarding the services to be performed
- The establishment of enhanced documentation requirements for compilation and review engagements

.22 The final standard differs from the exposure draft in two major ways:

- First, ARSC decided to retain the concept of limited assurance rather than moderate assurance. ARSC proposed to use the term *moderate assurance* to describe the level of assurance that the accountant aims to obtain in a review engagement in order to harmonize with the terminology used in the international review standards. However, after the exposure draft was issued, the International Auditing and Assurance Standards Board (IAASB) began looking to revise the international review standard from moderate to limited.
- The other major difference is that the nonindependent review is not part of the final standard. ARSC received a number of comments on this proposal, both for and against. As a result of the great interest in this topic, ARSC decided it made the most sense to defer this issue so it could hold additional meetings with key stakeholders. These additional meetings will be used to further discuss with stakeholders the issues that many smaller firm members face in trying to serve their small business clients and to better understand why some stakeholders are opposed to the nonindependent review

concept. The focus of the issues deal with the ARSC proposal that would have permitted an accountant to provide a review service while also performing a nonattest service to help smaller businesses maintain aspects of their internal control over financial reporting, the purpose of which is to improve the reliability of the client's financial statements.

.23 Although the nonindependent review is not part of SSARS No. 19, ARSC remains committed to allowing practitioners to review financial statements when they also perform services that are intended to assist the client in preparing high-quality, reliable financial statements.

.24 To assist practitioners with understanding and implementing the new guidance contained in SSARS No. 19, the Private Companies Practice Section (PCPS) has developed a SSARS No. 19 toolkit. For additional information on the SSARS No. 19 toolkit, refer to "PCPS SSARS No. 19 Toolkit" section of this alert.

Proposed SSARS

The Applicability of Statements on Standards for Accounting and Review Services

.25 In July 2010, ARSC exposed for public comment a proposed SSARS, *The Applicability of Statements on Standards for Accounting and Review Services*. In February 2009, ARSC issued SSARS No. 18, *Applicability of Statements on Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2). SSARS No. 18 revised the applicability of SSARSs so that SSARSs do not apply when the provisions of Statement on Auditing Standards (SAS) No. 116, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 722), apply.

.26 The revisions to SSARSs that were made effective by SSARS No. 18 were included in paragraph 3.1 (AR sec. 90 par. .01) of SSARS No. 19. That paragraph states that SSARSs are not applicable when an auditor performs the audit of the latest annual financial statements and expects to be engaged to audit the current year financial statements. SSARSs are effective when the auditor expects that a new auditor may be appointed for the current year but that such appointment is not yet effective prior to the period covered by the review. The proposed SSARS would revise the review literature to exclude such an engagement from SSARSs; instead, the auditor would follow the requirements and guidance in the proposed SAS *Interim Financial Information* (Revised).

Proposed Statement on Standards for Attestation Engagements

Reporting on Compiled Prospective Financial Statements When Independence Has Been Impaired

.27 In June 2010, ARSC released a proposed Statement on Standards for Attestation Engagements, *Reporting on Compiled Prospective Financial Statements When the Practitioner's Independence Is Impaired*. This proposal was done in response to the issuance of SSARS No. 19, which now allows the accountant to disclose the reason(s) for any independence impairments in his or her compilation report. ARSC determined that the attestation standards should also be revised so that the accountant, if he or she chooses, can disclose the reason(s) for an independence impairment in his or her compilation report on prospective financial information.

.28 If issued as a final standard, the standard would result in revisions to AT section 301, *Financial Forecasts and Projections* (AICPA, *Professional Standards*, vol. 1).

Other Current ARSC Projects

The Use of the Accountant's Name in a Document or Communication Containing Unaudited Financial Statements That Have Not Been Compiled or Reviewed

.29 The Auditing Standards Board (ASB), as part of its auditor's reports project, considered the requirements and guidance in AU section 504, *Association With Financial Statements* (AICPA, *Professional Standards*, vol. 1). The ASB's Auditor's Report Task Force determined that because ARSC is the senior technical committee of the AICPA designated to issue enforceable standards in connection with the unaudited financial statements or other unaudited financial information of a nonissuer, the requirements and guidance related to unaudited financial information should be contained in SSARSs.

.30 The ASB voted to ballot to withdraw AU section 504 at its meeting in August 2010. The relevant guidance with respect to reporting on audited and unaudited financial statements in comparative form is addressed in the proposed SAS *Forming and Opinion and Reporting on Financial Statements*. SAS No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon. In addition, amendments to other clarified SASs to address the auditor's association with financial statements, as well as to address the situation when the auditor is not independent but is required by law or regulation to perform the audit, resulting from the withdrawal of AU section 504 will be included in a proposed Omnibus SAS that will address all of the amendments necessary at the end of the clarity project.

.31 ARSC is currently considering the requirements and guidance that would apply when the accountant's name is used in a document or communication containing unaudited financial statements that the accountant has not compiled or reviewed.

Compilation and Review of Financial Statements Prepared in Accordance With a Financial Reporting Framework Generally Accepted in Another Country

.32 At its meeting in April 2009, the ASB reconsidered the applicability of AU section 534, *Reporting on Financial Statements Prepared for Use in Other Countries* (AICPA, *Professional Standards*, vol. 1). Paragraph .08 of AU section 534 states as follows:

> Financial statements prepared in conformity with accounting principles generally accepted in another country ordinarily are not useful to U.S. users. Therefore, if financial statements are needed for use both in another country and within the United States, the auditor may report on two sets of financial statements for the entity—one prepared in conformity with accounting principles generally accepted in another country for use outside the United States, and the other prepared in accordance with accounting principles generally accepted in the United States .... If dual statements are not prepared, or for some other reason the financial statements prepared in conformity with accounting principles generally accepted in another country will have more than limited distribution in the United States, the auditor should report on them using the U.S. standard form of report, modified as appropriate for departures from accounting principles generally accepted in the United States ....

.33 After discussion and input from legal counsel regarding Rule 203, *Accounting Principles* (AICPA, *Professional Standards*, vol. 2, ET sec. 203 par. .01), the ASB concluded to retain the reporting provisions of AU section 534.

.34 As a result of the ASB's decision, the AICPA staff believes that similar reporting provisions should apply to compilations and reviews of financial statements prepared in accordance with a financial reporting framework generally accepted in another country.

Applicability of SSARS No. 19 to Personal Financial Statements

.35 Historically, the authoritative accounting literature on personal financial statements was included in Statement of Position 82-1, *Accounting and Financial Reporting for Personal Financial Statements*. This guidance was subsumed into FASB ASC on July 1, 2009, and now resides in FASB ASC 274, *Personal Financial Statements*.

.36 Accountants are often engaged to compile personal financial statements. The standard report wording contained in SSARS No. 19 includes wording stating the fact that "management is responsible for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework [and] for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements."

.37 Members have questioned whether the language about "designing, implementing, and maintaining internal control" would be applicable to reports on personal financial statements.

.38 Although individuals usually do not have formal systems of internal control over financial reporting, individuals still need to have controls to permit the preparation of financial statements. An accountant's independence would be impaired if he or she establishes or maintains internal control for a client (see Interpretation No. 101-3, "Performance of Nonattest Services," under Rule 101, *Independence* [AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .05]). Therefore, the standard report wording is appropriate in engagements to compile or review personal financial statements. The AICPA staff is working on nonauthoritative illustrative reports in order to clarify the appropriate language for reports on compiled or reviewed personal financial statements.

Current Practice Issues

.39 In May 2010, the article "Changes on Tap for Compilation and Review Standards" was published in the AICPA *Journal of Accountancy*. The article was written by Carolyn McNerney, CPA (chair of ARSC); Charles E. Landes, CPA (AICPA vice president of Professional Standards); and Michael P. Glynn, CPA (AICPA Audit and Attest Standards technical manager and staff liaison to ARSC). This article discusses the major changes to compilation and review standards resulting from the issuance of SSARS No. 19 that affect practitioners performing compilations and reviews on financial statements for periods ending on or after December 15, 2010. This article was intended to serve as plain English implementation guidance for SSARS No. 19 and is included as appendix C, "'Changes on Tap for Compilation and Review Standards,'" of this alert.

New Reports for Compilations and Reviews of Financial Statements Ending on or After December 15, 2010

.40 The May 2010 *Journal of Accountancy* article includes a discussion of the revisions to the reporting requirements for compilation and review engagements that are included in SSARS No. 19 to make the reports clearer regarding management's responsibilities and the accountant's responsibility. The following is a comparison of the pre-SSARS No. 19 compilation report with the new report prescribed by SSARS No. 19.

	Pre-SSARS No. 19 Compilation Report	*SSARS No. 19 (New) Compilation Report*
Title	Not required	Accountant's Compilation Report
Addressee	Not required	[*Appropriate Salutation*]

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

	Pre-SSARS No. 19 Compilation Report	*SSARS No. 19 (New) Compilation Report*
Introductory paragraph	I (we) have compiled the accompanying balance sheet of XYZ Company as of December 31, 20X1, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.	I (we) have compiled the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or provide any assurance about whether the financial statements are in accordance with accounting principles generally accepted in the United States of America.
Paragraph outlining management's responsibilities	None	Management (owners) is (are) responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of financial statements.
Paragraph outlining the accountant's responsibilities	None	My (our) responsibility is to conduct the compilation in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The objective of a compilation is to assist management in presenting financial information in the form of financial statements without undertaking to obtain or provide any assurance that there are no material modifications that should be made to the financial statements.

(continued)

	Pre-SSARS No. 19 Compilation Report	*SSARS No. 19 (New) Compilation Report*
Conclusion paragraph	A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.	The communication is moved to the introductory paragraph.
Paragraph disclosing the independence impairment	I am (we are) not independent with respect to XYZ Company. The accountant is precluded from disclosing the reasons for the independence impairment.	I am (we are) not independent with respect to XYZ Company. The accountant is not precluded from disclosing the reasons for the independence impairment.

.41 The following is a comparison of the pre-SSARS No. 19 review report to the new report prescribed by SSARS No. 19.

	Pre-SSARS No. 19 Review Report	*SSARS No. 19 (New) Review Report*
Title.	Not required	Independent Accountant's Report
Addressee.	Not required	[*Appropriate Salutation*]
Introductory paragraph. In the new report, the scope of the engagement is described (it was included in the second paragraph of the previous review report). Management's responsibilities are moved to a separate paragraph.	I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 20X1, and the related statements of income, retained earnings, and cash flows for the year then ended in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of management (owners) of XYZ Company.	I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. A review includes primarily applying analytical procedures to management's (owners') financial data and making inquiries of company management (owners). A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, I (we) do not express such an opinion.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

	Pre-SSARS No. 19 Review Report	*SSARS No. 19 (New) Review Report*
Second paragraph. The new report describes management's responsibilities. The scope of the engagement is included in the introductory paragraph.	A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.	Management (owners) is (are) responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.
Paragraph describing the accountant's responsibilities.	None	My (our) responsibility is to conduct the review in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. Those standards require me (us) to perform procedures to obtain limited assurance that there are no material modifications that should be made to the financial statements. I (We) believe that the results of my (our) procedures provide a reasonable basis for our report.
Paragraph describing the results of the engagement.	Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.	Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America.

Preparation of Financial Statements for Use by an Entity's Auditors

.42 In December 2008, ARSC issued Interpretation No. 31, "Preparation of Financial Statements for Use by an Entity's Auditors," of AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 9100 par. .136–.137). The interpretation clarifies that in the situation when a client engages an accountant, other than its auditor, to prepare unaudited financial statements on behalf of management and when those financial statements are provided by management to its outside auditor for the purposes of the annual audit, the client's outside auditor is not deemed to be a third party using the financial statements. As such, the accountant can avail himself or herself of the nonreporting exemption provided when compiled financial statements are not expected to be used by a third party. All of the interpretations of AR section 100 are available at www.aicpa.org/Research/Standards/CompilationReview/DownloadableDocuments/AR-00100_9.pdf.

Current Accounting and Financial Reporting Issues

Other Comprehensive Bases of Accounting Disclosures

.43 Accountants are often requested to compile or review financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles (GAAP). These bases of accounting are often referred to as an other comprehensive basis of accounting (OCBOA) and include bases such as the income tax basis of accounting and the cash basis of accounting.

.44 A significant challenge in compiling or reviewing financial statements prepared in accordance with an OCBOA is that, unlike GAAP, authoritative guidance, with respect to the form and content of the financial statements, does not exist. However, that does not alleviate the requirement that the financial statements be appropriate in form.

.45 Financial statements prepared in accordance with an OCBOA are not considered appropriate in form unless the financial statements include the following:

a. A description of the OCBOA, including a summary of significant accounting policies and a description of how the OCBOA differs from GAAP, although the effects of the differences need not be quantified

b. Informative disclosures similar to those required by GAAP if the financial statements contain items that are the same as, or similar to, those in financial statements prepared in accordance with GAAP

.46 If the OCBOA financial statements do not include the preceding information, the accountant should modify his or her compilation or review report accordingly to disclose the departure from the OCBOA.

Common Peer Review Findings

.47 In 2008, the AICPA Peer Review Program reported approximately 9,600 peer reviews, of which approximately 5,200 pertained to compilation and review engagements. The importance of the peer review findings cannot be overemphasized. The following is a brief listing of just some of the most recent deficiencies that were encountered:

- Compilation reports that failed to include the paragraph regarding the omission of required disclosures as applicable in the circumstances.
- Compilation reports that do not comply with minimum reporting requirements.
- Issuance of a review report when the accountant is not independent.
- Failure to disclose the lack of independence in a compilation report.
- In an engagement to compile financial statements that omit substantially all disclosures, failure to disclose, in the accountant's compilation report, management's omission of substantially all disclosures.
- The engagement letter in an engagement to compile financial statements that are not expected to be used by a third party did not refer to supplementary information, which was presented along with the basic financial statements.
- Failure to use a work program or a reporting and disclosure checklist when required by firm policy (this is not required by professional standards).
- For review engagements, failure to perform analytical and inquiry procedures and failure to adequately document the procedures.
- For review engagements, failure to obtain a client management representation letter.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- Failure to include a GAAP departure in the accountant's compilation or review report when management failed to segregate the current portion of long-term debt.
- Engagement letters with respect to engagements to compile financial statements that are not expected to be used by third parties and that omit the required descriptions or statements documenting the understanding with the client.
- Reference to the accountant's compilation report was not present on the financial statements.

.48 Although there are many recurring deficiencies noted in peer review, the accountant can take steps to avoid them by keeping these common mistakes in mind during the planning and performance of future compilation and review engagements. To view the latest full peer review report, please visit "Interest Areas—Peer Review" at www.aicpa.org.

Accounting Issues and Developments

.49 Given the current economic climate, certain accounting and financial reporting issues, such as the following, may be important to consider when compiling or reviewing financial statements:

- Fair value, including fair value measurements in illiquid markets
- Impairment

FASB Statement No. 168

.50 FASB Statement No. 168, *The* FASB Accounting Standards Codification™ *and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162*, as codified in FASB ASC 105, *Generally Accepted Accounting Principles*, is effective for financial statements issued for interim and annual periods ending after September 15, 2009. On the effective date of FASB Statement No. 168, FASB ASC became the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the SEC. FASB ASC superseded all then-existing, non-SEC accounting and reporting standards for nongovernmental entities. This new standard flattens the U.S. GAAP hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is nonauthoritative (not in FASB ASC). Exceptions include all rules and interpretive releases of the SEC under the authority of federal securities laws, which are sources of authoritative U.S. GAAP for SEC registrants, and certain grandfathered guidance having an effective date before March 15, 1992. If an accounting change results from the application of this guidance, an entity should disclose the nature and reason for the change in accounting principle in their financial statements.

Referencing FASB ASC in Your Engagement Documentation

.51 It is only prudent to reflect current U.S. GAAP in your engagement documentation. The FASB notice to constituents includes a section on referencing FASB ASC in footnotes and other documents. In this notice, FASB encourages the use of plain English to describe broad topic references in the future. For example, to refer to the requirements of the *Derivatives and Hedging* topic, they suggest a reference similar to "as required by the *Derivatives and Hedging* topic of the FASB *Accounting Standards Codification*." Conversely, FASB suggests using the detailed numerical referencing system in engagement documentation, articles, textbooks, and related items.

.52 Also, because FASB ASC is not intended to change U.S. GAAP, the consistent use of references to only FASB ASC for all periods presented (including periods before the authoritative release of FASB ASC) is appropriate. It is prudent to expect that engagement documentation associated with financial statements for a period ending after September 15, 2009, also would reflect FASB ASC because the underlying financial statements, which are the subjects of those engagements, reference FASB ASC.

.53 However, if your firm's policies and procedures regarding engagement documentation will continue to follow grandfathered guidance not included in FASB ASC, it would be appropriate to continue to reference

those standards (and not FASB ASC). A listing of examples of grandfathered guidance can be found in FASB Statement No. 168.

.54 Examples of disclosures using references to FASB ASC can be found at the AICPA's dedicated FASB ASC website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AcctgFinRptg/AcctgFinRptgGuidance/Pages/FASBAccountingStandardsCodification.aspx.

Postcodification FASB References

.55 In spring 2010, the AICPA judgmentally selected 50 SEC filers and reviewed their 2009 Form 10-Ks to understand what type of references are actually being used in practice. All financial statements reviewed were for those entities having a fiscal year-end between December 1, 2009, and January 31, 2010, when the FASB codification was fully effective for all of these entities. The entities selected comprised the following:

- Fourteen large accelerated filers (28 percent of the sample)
- Twenty accelerated filers (40 percent of the sample)
- Seven nonaccelerated filers (14 percent of the sample)
- Nine smaller reporting companies (18 percent of the sample)

.56 Of all the entities selected, 50 percent had gone to mostly plain English references in their annual financial statements. However, among these entities, in the "Summary of Significant Accounting Policies" section of the financial statements, many entities did still use specific references to either old FASB standards (pre-FASB Statement No. 168 standards or legacy standards) or specific Accounting Standards Updates (ASUs), when appropriate. There did not seem to be much of a difference in this percentage among large accelerated filers, accelerated filers, and nonaccelerated filers. However, smaller reporting companies were less likely to use plain English (only 33 percent used plain English references).

.57 As for the remaining 50 percent of filers selected, they chose to use either FASB ASC-specific references (36 percent) or to do some sort of dual references (12 percent) between the precodification standards and new FASB ASC guidance. There was one entity that continued to use the old FASB references and did not mention FASB ASC in its financial statements.

.58 For those entities using FASB ASC references, most only referenced to the topic level and did not go down to the subtopic or section level. For those using dual references, in most cases, the new FASB ASC topic was listed first, with the historical FASB reference noted parenthetically. See the following table for a full breakout of the results:

	Plain English References	*FASB ASC References*	*Dual References*	*Old FASB References*
Large Accelerated Filers	7	4	2	1
Accelerated Filers	12	6	2	0
Nonaccelerated Filers	3	3	1	0
Smaller Reporting Companies	3	5	1	0
Total Sample	25	18	6	1

.59 The sampling results make it clear that although both FASB and the SEC have stated that the use of plain English is most appropriate when dealing with financial statements and notes to financial statements, not everyone is there yet. It will be interesting to see if the plain English references trend continues upward once entities have had another full year to get used to FASB ASC. In addition, all new guidance issued in 2010 was issued through ASUs, and there were no legacy standards issued. Therefore, we would expect that in 2010

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

filings, even the "Summary of Significant Accounting Policies" section of financial statements would no longer refer to any legacy standards.

.60 We found that with the plain English references, some entities chose instead to say something like, "in accordance with the purchase method of accounting and as updated with FASB's April 2009 additional authoritative guidance for business combinations, we ...." Here the entity uses plain English but also makes it clear which new guidance they are following. This would be most important for those FASB changes with early adoption provisions to make it clear which method an entity used.

.61 FASB has stated that ASUs do not carry any authority. It is the updates that are made to the codification once the ASU is effective that are authoritative. Therefore, entities would be wise to ensure that when they are referring to authoritative literature, use of either plain English or the FASB ASC references would be appropriate, rather than just naming the ASU that brought about the change in accounting.

.62 In addition, entities would want to be sure that they do not refer to any legacy standards in their 2010 financial statements. Because all changes made to the codification in 2010 were through ASUs, referring to legacy standards is no longer correct. For example, since the codification became effective, there have been several updates to the *Fair Value Measurements and Disclosures* topic. Therefore, referring to FASB Statement No. 157, *Fair Value Measurements*, is no longer accurate because this standard does not incorporate changes made since the codification became effective in 2009. We would expect that entities that used dual references to both the legacy standards and FASB ASC references would not continue to use those dual references in 2010 financial statements.

.63 Many entities also have a section of their notes to financial statements titled "Effect of Accounting Pronouncements Not Yet Adopted." In 2010, we would expect the title of this section to change to something like "Effect of Authoritative Accounting Guidance Not Yet Adopted."

.64 It will be interesting to see if both public and nonpublic entities make any additional refinements or changes to their 2010 financial statements as we move into our first full year with FASB ASC. It is our understanding that the SEC may be issuing comment letters to those entities that are not properly reflecting the current state of U.S. GAAP in their financial statements, whether that be by using plain English or using the new FASB ASC references.

Decreases in Ownership of a Subsidiary

.65 In January 2010, FASB issued FASB ASU No. 2010-02, *Consolidation (Topic 810): Accounting and Reporting for Decreases in Ownership of a Subsidiary—a Scope Clarification*. This ASU addresses implementation issues related to the changes in ownership provisions in FASB ASC 810-10 (issued as FASB Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*). These amendments clarify that the scope of the decrease in ownership provisions of FASB ASC 810-10 and related guidance applies to a subsidiary or group of assets that is a business or nonprofit activity, a subsidiary that is a business or nonprofit activity that is transferred to an equity method investee or joint venture, and an exchange of a group of assets that constitutes a business or nonprofit activity for a noncontrolling interest in an entity (including an equity method investee or joint venture). Further, the amendments clarify that the decrease in ownership guidance in FASB ASC 810-10 does not apply to the following transactions, even if they involve businesses: sales of in-substance real estate and conveyances of oil and gas mineral rights. The amendment also expands the required disclosures about the deconsolidation of a subsidiary or derecognition of a group of assets within the scope of FASB ASC 810-10. This ASU is effective beginning in the period that an entity adopts FASB Statement No. 160. If an entity has already adopted this guidance, then the amendments in this ASU are effective beginning in the first interim or annual reporting period ending on or after December 15, 2009. The amendments in this ASU should be applied retrospectively to the first period that an entity adopted FASB Statement No. 160.

Accounting for Uncertainty in Income Taxes

.66 For many calendar year nonpublic entities, 2009 was the first year of application of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*. In September 2009, FASB issued ASU No. 2009-06, *Income Taxes (Topic 740)—Implementation Guidance on Accounting for Uncertainty in Income Taxes and Disclosure Amendments for Nonpublic Entities*. This update affects all nongovernmental entities, and the disclosure amendments only apply to nonpublic entities. The four main provisions of the ASU include the following:

- If income taxes paid by the entity are attributable to the entity, the transaction should be accounted for in accordance with the guidance on uncertainty in income taxes in FASB ASC 740, *Income Taxes*. If the taxes paid by the entity are attributable to the owners, the transaction should be accounted for as a transaction with the owners. Attribution should be based on the laws and regulations of the jurisdiction and should be made for each jurisdiction where the entity is subject to income taxes.
- Management's determination of the taxable status of the entity, including its status as a pass-through entity or tax-exempt not-for-profit entity, is a tax position subject to the standards required for accounting for uncertainty in income taxes.
- Regardless of the tax status of the reporting entity, the tax positions of all entities within a related group of entities must be considered.
- For nonpublic entities, it eliminates the disclosures of a tabular reconciliation of the total amount of unrecognized tax benefits at the beginning and end of the periods presented and the total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate (see FASB ASC 740-10-50-15[a]–[b]).

.67 For entities that are currently applying the guidance on accounting for uncertainty in income taxes, this ASU is effective for interim and annual periods ending after September 15, 2009.

Consolidation of Variable Interest Entities

.68 For calendar year entities, 2010 is the first year of application of FASB Statement No. 167, *Amendments to FASB Interpretation No. 46(R)*, which changes how to determine when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. FASB Statement No. 167 was incorporated into FASB ASC through ASU No. 2009-17, *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities.* This statement is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited.

.69 The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. This statement also amends consolidation of variable interest entities (VIE) guidance to eliminate the quantitative approach previously required for determining the primary beneficiary of a VIE, which was based on determining which enterprise absorbs the majority of the entity's expected losses, receives a majority of the entity's expected residual returns, or both.

.70 Entities will be required to provide additional disclosures about involvement with VIEs and any significant changes in risk exposure due to that involvement. Entities also will be required to disclose how involvement with a VIE affects the entity's financial statements.

.71 FASB Statement No. 167 retains the scope of previous VIE consolidation accounting guidance, with the addition of entities previously considered qualifying special purpose entities because the concept of these entities was eliminated in FASB Statement No. 166, *Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140,* which was incorporated into FASB ASC by ASU No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.72 This statement also discusses the objectives of its required disclosures and notes that an entity may need to supplement the minimum required disclosures to meet these objectives. The objectives are for the financial statement users to have an understanding of the following:

- The significant judgments and assumptions made by an enterprise in determining whether it must consolidate a VIE or disclose information about its involvement in a variable interest entity, or both
- The nature of restrictions on a consolidated VIE's assets and on the settlement of its liabilities reported by an enterprise in its statement of financial position, including the carrying amounts of such assets and liabilities
- The nature of, and changes in, the risks associated with an enterprise's involvement with the VIE
- How an enterprise's involvement with the VIE affects the enterprise's financial position, financial performance, and cash flows

.73 This statement is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited.

Accounting for Transfers of Financial Assets

.74 Calendar year entities must also start applying the provisions of FASB Statement No. 166 in 2010. FASB Statement No. 166, which is a revision to FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, requires more information about transfers of financial assets, including securitization transactions, and those circumstances in which entities have continuing exposure to the risks related to transferred financial assets. FASB Statement No. 166 was incorporated into FASB ASC by ASU No. 2009-16 and is discussed in FASB ASC 860, *Transfers and Servicing*. It eliminates the concept of a qualifying special purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosures. The purpose of this statement is to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets. It is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited. This statement must be applied to transfers occurring on or after the effective date; however, the disclosure provisions should be applied to transfers that occurred both before and after the effective date.

.75 Additionally, on and after the effective date, the concept of a qualifying special-purpose entity is no longer relevant for accounting purposes. Therefore, formerly qualifying special purpose entities (as defined under previous accounting standards) should be evaluated for consolidation by reporting entities on and after the effective date in accordance with the applicable consolidation guidance.

.76 The primary objectives of the disclosure requirements of this guidance are to provide the financial statement users with a clear understanding of the following:

- A transferor's continuing involvement (as defined by the FASB ASC glossary), if any, with transferred financial assets
- The nature of any restrictions on assets reported by an entity in its statement of financial position that relate to a transferred financial asset, including the carrying amounts of those assets
- How servicing assets and servicing liabilities are reported under this pronouncement
- For transfers accounted for as sales when a transferor has continuing involvement with the transferred financial assets and for transfers of financial assets accounted for as secured borrowings, how the transfer of financial assets affects a transferor's financial position, financial performance, and cash flows

.77 These objectives must be met by the disclosures, regardless of the specific requirements of the pronouncement. It may be the case that an entity provides greater detail than what is a required disclosure to meet these objectives, depending on the facts and circumstances.

Subsequent Events

.78 FASB Statement No. 165, *Subsequent Events*, which has been codified in FASB ASC 855, *Subsequent Events*, is effective for interim and annual periods ending after June 15, 2009. This statement is intended to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date (that is, whether that date represents the date the financial statements were issued or were available to be issued). The purpose of this disclosure is to alert all users of financial statements that an entity has not evaluated subsequent events after that date in the set of financial statements being presented.

.79 In particular, this statement sets forth the following:

- The period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements
- The circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements
- The disclosures that an entity should make about events or transactions that occurred after the balance sheet date

.80 FASB states that this guidance should not result in significant changes in current practice with regard to the subsequent events that an entity reports, either through recognition or disclosure, in its financial statements. In September 2009, the AICPA issued Technical Questions and Answers (TIS) section 8700.01, "Effect of FASB ASC 855 on Accounting Guidance in AU Section 560" (AICPA, *Technical Practice Aids*), which notes that preparers of financial statements for nongovernmental entities are required to follow the accounting guidance in FASB ASC 855. Additionally, the accounting guidance contained in AU section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), would no longer be applicable to audits of nongovernmental entities. This question and answer can be accessed at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

.81 For additional discussion regarding the accountant's responsibilities for subsequent events in compilation or review engagements, refer to the "TIS section 9150.26, 'The Accountant's Responsibilities for Subsequent Events in Compilation and Review Engagements'" section of this alert.

Fair Value

.82 FASB ASC 820-10-20 defines *fair value* and establishes a framework for measuring fair value; however, it does not dictate when an entity must measure something at fair value, nor does it expand the use of fair value in any way. The need to understand fair value accounting has increased in importance as alternative investments increased in popularity and complexity. *Fair value* is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Measuring Liabilities at Fair Value

.83 FASB issued ASU No. 2009-05, *Measuring Liabilities at Fair Value* to increase the consistency in the application of FASB ASC 820 to liabilities because many constituents had expressed concern. This ASU applies to all entities that measure liabilities at fair value under FASB ASC 820 and amends sections of FASB ASC 820-10.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.84 This ASU states that, in circumstances in which a quoted price in an active market for the identical liability is not available, fair value of the liability must be measured by either (*a*) a valuation technique that uses the quoted price of the identical liability when traded as an asset or quoted prices for similar liabilities, or similar liabilities when traded as assets, or (*b*) another valuation technique that is consistent with the principles of FASB ASC 820, such as an income approach or a market approach. Further, if a restriction on the transference of the liability exists, the ASU clarifies that an entity is not required to factor that in to the inputs of the fair value determination. Lastly, the ASU also clarifies that a quoted price in an active market for the identical liability, or an unadjusted quoted price in an active market for the identical liability, when traded as an asset, are level 1 measurements within the fair value hierarchy. The guidance in this ASU is effective for the first reporting period (including interim periods) beginning after its issuance in August 2009. The full text of the ASU can be accessed from FASB's website at www.fasb.org.

Investments in Certain Entities That Calculate Net Asset Value per Share (or its Equivalent)

.85 FASB issued ASU No. 2009-12, *Fair Value Measurements and Disclosures (Topic 820): Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*, because of the complexities and practical difficulties in estimating the fair value of alternative investments. It is applicable to all reporting entities that hold an investment that is required or permitted to be measured or disclosed at fair value on a recurring or nonrecurring basis, and as of the reporting entity's measurement date, if the investment both

- does not have a *readily determinable fair value*. The FASB ASC glossary states that an equity security has a readily determinable fair value if it meets any of the following conditions:
  - The fair value of any equity security is readily determinable if sales prices or bid-and-asked quotations are currently available on a securities exchange registered with the SEC or in the OTC market, provided that those prices or quotations for the OTC market are publicly reported by NASDAQ or by Pink Sheets LLC. Restricted stock meets that definition if the restriction terminates within one year.
  - The fair value of an equity security traded only in a foreign market is readily determinable if that foreign market is of a breadth and scope comparable to one of the U.S. markets referred to previously.
  - The fair value of an investment in a mutual fund is readily determinable if the fair value per share (unit) is determined and published and is the basis for current transactions.
- is in an entity that has all of the attributes specified in FASB ASC 946-10-15-2 or, if one of those attributes are not met, is in an entity for which it is industry practice to issue financial statements using guidance that is consistent with the measurement principles in FASB ASC 946, *Financial Services—Investment Companies.*

.86 As a practical expedient, this ASU permits a reporting entity to measure the fair value of an investment within its scope on the basis of the net asset value (NAV) per share of the investment (or its equivalent) if the NAV is calculated in a manner consistent with the measurement principles of FASB ASC 946 as of the reporting entity's measurement date, including measurement of all or substantially all of the underlying investments of the investee in accordance with FASB ASC 820. If the practical expedient is used, certain attributes of the investment (such as restrictions on redemption) and transaction prices from principal-to-principal or brokered transactions will not be considered in measuring the investment's fair value.

.87 This ASU also requires disclosures by major category of investment about the attributes of investments, such as the nature of any restrictions on the investor's ability to redeem its investments at the measurement date, any unfunded commitments, and the investment strategies of the investees. The major category of investment is required to be determined based on the guidance in FASB ASC 320-10-50-1B. These disclosures are required for all investments within the scope of this ASU. The ASU adds an example of its required disclosures in FASB ASC 820-10-55-64A.

.88 These amendments are effective for interim and annual periods ending after December 15, 2009, and are included in FASB ASC 820-10. The AICPA practice aid *Alternative Investments—Audit Considerations* also

is available. The practice aid focuses on the existence and valuation assertions associated with alternative investments. Although that practice aid was written as a tool for auditors, accountants performing compilation or review engagements may find some useful information contained therein.

.89 In December 2009, the AICPA issued sections .18–.27 of TIS section 2220, *Long-Term Investments* (AICPA, *Technical Practice Aids*), to assist reporting entities when implementing the provisions of FASB ASC 820 to estimate the fair value of their investments in certain entities that calculate NAV. TIS sections 2220.18–.27 apply to investments that are required to be measured and reported at fair value and are within the scope of paragraphs 4–5 of FASB ASC 820-10-15. These questions and answers compliment the guidance provided in ASU No. 2009-12.

.90 Topics covered in these questions and answers include the following:

- The circumstances when NAV may be used to estimate the fair value of investments as a practical expedient
- How to identify the unit of account for interests in alternative investments
- Considerations for determining whether the reported NAV has been calculated in a manner consistent with FASB ASC 946
- Examples of circumstances when an adjustment to the reported NAV may be necessary
- How to adjust the reported NAV when it is not as of the reporting entity's measurement date
- How to adjust the reported NAV when it has not been calculated in accordance with FASB ASC 946
- The determination of the appropriate level within the fair value hierarchy for NAV of alternative investments in relation to the ability to redeem the investment versus the actual redemption request for the investment
- The definition of *near term* for the purposes of determining the appropriate level within the fair value hierarchy
- The tailoring of disclosures categories to address the nature and risks of investments
- Some considerations for determining the fair value of alternative investments when not utilizing NAV as a practical expedient

.91 Recently issued questions and answers can be located on the AICPA website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

Fair Value Measurements Disclosures

.92 ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*, was issued to increase the transparency in financial reporting of fair value measurements. FASB noted that due to the different degrees of subjectivity and reliability on level 1, level 2, and level 3 fair value measurements, information about significant transfers between the three levels and the underlying reasons for such transfers would be useful to financial statements users.

.93 This ASU amends FASB ASC 820-10 to require the following new disclosures:

- *Transfers in and out of levels 1 and 2*. A reporting entity should disclose separately the amounts of significant transfers in and out of level 1 and level 2 fair value measurements and describe the reasons for the transfers.
- *Activity in level 3 fair value measurements*. In the reconciliation for fair value measurements using significant unobservable inputs (level 3), a reporting entity should present separately information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number).

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.94 Additionally, the ASU amends FASB ASC 820-10 to clarify certain existing disclosures as follows:

- *Level of disaggregation*. A reporting entity should provide fair value measurement disclosures for each class of assets and liabilities. A class is often a subset of assets or liabilities within a line item in the statement of financial position. A reporting entity needs to use judgment in determining the appropriate classes of assets and liabilities.
- *Disclosures about inputs and valuation techniques*. A reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. Those disclosures are required for fair value measurements that fall in either level 2 or level 3.

.95 The amendments in ASU No. 2010-06 are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the rollforward of activity in level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years.

Disclosures About Credit Quality and Allowance for Credit Losses

.96 In July 2010, FASB issued ASU No. 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, which requires an entity to provide a greater level of disaggregated information about the credit quality of its financing receivables and its allowance for credit losses. The ASU amends the existing disclosures to require an entity to provide the following disclosures about its financing receivables on a disaggregated basis:

- A rollforward schedule of the allowance for credit losses from the beginning of the reporting period to the end of the reporting period on a portfolio segment basis, with the ending balance further disaggregated on the basis of the impairment method. For each disaggregated ending balance, the related recorded investment in financing receivables should also be disclosed.
- The nonaccrual status of financing receivables by class of financing receivables.
- Impaired financing receivables by class of financing receivables.

.97 The amendments in this ASU require an entity to provide the following additional disclosures about its financing receivables:

- Credit quality indicators of financing receivables at the end of the reporting period by class of financing receivables (see FASB ASC 310-10-55-19 for examples of credit quality indicators)
- The aging of past due financing receivables at the end of the reporting period by class of financing receivables
- The nature and extent of troubled debt restructurings that occurred during the period by class of financing receivables and their effect on the allowance for credit losses
- The nature and extent of financing receivables modified as troubled debt restructurings within the previous 12 months that defaulted during the reporting period by class of financing receivables and their effect on the allowance for credit losses
- Significant purchases and sales of financing receivables during the reporting period disaggregated by portfolio segment

.98 An entity must also describe, by portfolio segment, its accounting policies and methodology used to estimate its allowance for credit losses, including the identification of any changes to the entity's accounting policies or methodology from the prior period and the entity's rationale for the change.

.99 The amendments in this ASU apply to all entities with financing receivables. Examples of financing receivables include loans; trade receivables; notes receivable; and receivables relating to a lessor's leveraged, direct financing, and sales-type leases. See the "Pending Content" in paragraphs 13–15 of FASB ASC 310-10-55 for more information on the definition of *financing receivable*, including a list of items that are excluded from

the definition (for example, debt securities). In addition, the "Pending Content" in paragraphs 7–12 of FASB ASC 310-10-55 illustrates certain disclosures required by this ASU.

.100 For public entities, the disclosures as of the end of a reporting period are effective for interim and annual reporting periods ending on or after December 15, 2010. The disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010. For nonpublic entities, the disclosures are effective for annual reporting periods ending on or after December 15, 2011.

Convergence With International Financial Reporting Standards

.101 Since the signing of the Norwalk Agreement by FASB and the International Accounting Standards Board (IASB), the bodies have had a common goal—one set of accounting standards for international use. *International convergence of accounting standards* refers to both the goal of this project and the path taken to reach it. The path toward reaching this goal will both improve U.S. GAAP and International Financial Reporting Standards (IFRSs) and eliminate the differences between them. In the Norwalk agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRSs. The "On the Horizon" section of this alert discusses these joint projects. For more information, visit www.fasb.org and www.iasb.org.

SEC Work Plan for Consideration of IFRSs

.102 In February 2010, the SEC issued Release No. 33-9109, *Commission Statement in Support of Convergence and Global Accounting Standards*. This release provides an update to the SEC's roadmap on its consideration of global accounting standards, including a confirmation of its continued support for the convergence of U.S. GAAP and IFRSs in order to narrow the differences between the two sets of standards. The SEC believes that a more comprehensive work plan is necessary to transparently lay out the work that must be done to support a decision on the appropriate course to incorporate IFRSs into the U.S. financial reporting system for U.S. issuers, including the scope, time frame, and methodology for any such transition. Therefore, the SEC has indicated that it will carefully consider and deliberate whether these changes are in the best interest of U.S. investors and markets.

.103 The SEC directed its staff to execute a work plan, the results of which will aid the SEC in its evaluation of the impact that the use of IFRSs by U.S. entities would have on the U.S. securities market. The work plan includes consideration of IFRSs, both as they currently exist and after the completion of the various convergence projects underway by FASB and the IASB. Among other things, the work plan addresses some of the comments and concerns received on the roadmap, including the following:

- Sufficient development and application of IFRSs for the U.S. reporting system
- The independence of standard setting for the benefit of investors
- Investor understanding and education regarding IFRSs
- Examination of the U.S. regulatory environment that would be affected by a change in accounting standards
- The impact on issuers, both large and small, including changes to accounting systems, changes to contractual arrangements, corporate governance considerations, and litigation contingencies
- Human capital readiness

.104 Beginning no later than October 2010, and frequently thereafter, the SEC staff will provide public progress reports on the work plan, as well as the status of the FASB and IASB convergence projects, until the work is complete. By 2011, assuming completion of these convergence projects and the staff's work plan, the SEC will decide whether to incorporate IFRSs into the U.S. financial reporting system and, if so, when and

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

how. Commentors provided feedback on the timing discussed in the roadmap, suggesting that a four or five year time frame would be necessary to successfully implement a change in their financial reporting systems to incorporate IFRSs. Under that assumption, if the SEC determines in 2011 to incorporate IFRSs into the U.S. financial reporting system, the first time that U.S. entities would report under such a system would be no earlier than 2015. This timeline will be further evaluated as part of the work plan. The work plan is included as an appendix at the end of Release No. 33-9109 and also can be found on the SEC's website at www.sec.gov.

.105 In August 2010, the SEC issued two releases (Release Nos. 33-9133 and 33-9134, *Notice of Solicitation of Public Comment on Consideration of Incorporating IFRS Into the Financial Reporting System for U.S. Issuers*) to solicit public comment on its ongoing consideration of incorporating IFRSs into the financial reporting system for U.S. issuers. The first release contains requests for comment on three topics derived from the work plan that are related to the potential impact on investors. The second release contains requests for comment on three topics, also derived from the work plan, that are related to the potential impact on U.S. issuers. All comments will be available on the SEC's website at www.sec.gov.

International Financial Reporting Standard for Small and Medium-sized Entities

.106 The IASB issued *International Financial Reporting Standard for Small and Medium-sized Entities* (*IFRS for SMEs*) to be a self-contained global accounting and financial reporting standard applicable to the general purpose financial statements of, and other financial reporting by, entities that are known in many countries as SMEs. *IFRS for SMEs* is intended to be used by entities that publish general purpose financial statements for external users and do not have public accountability.

.107 The AICPA Governing Council recognizes the IASB as an accounting body for purposes of establishing international financial accounting and reporting principles. This amendment to appendix A of AICPA Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, vol. 2, ET sec. 202 par. .01), and Rule 203, gives AICPA members the option to use IFRSs as an alternative to U.S. GAAP. As such, a key professional barrier to using IFRSs and, therefore, *IFRS for SMEs* has been removed. CPAs may need to check with their state boards of accountancy to determine the status of reporting on financial statements prepared in accordance with *IFRS for SMEs* within their individual state. Any remaining barriers may come in the form of unwillingness by a private company's financial statement users to accept financial statements prepared under *IFRS for SMEs*, and a private company's expenditure of money, time and effort to convert to *IFRS for SMEs*. Information about IFRSs and *IFRS for SMEs* can be found at www.ifrs.com.

.108 Additionally, to help its membership, the AICPA has developed an IFRS for SMEs—U.S. GAAP Comparison Wiki. The purpose of the wiki is to provide a detailed and comprehensive comparison of *IFRS for SMEs* with corresponding requirements of U.S. GAAP. But it is more than just a comparison resource—it is a wiki. That means it is a collaborative, ongoing work in progress for anyone to contribute to and use. The wiki is found at http://wiki.ifrs.com/.

.109 At approximately 230 pages, *IFRS for SMEs* is a simplified version of full IFRSs. This guidance is the result of the overall cost-benefit analysis by the IASB in considering the needs of nonpublicly accountable entities and their financial reporting users, with the goal of providing a practical alternative to full IFRSs. With this view, the IASB eased certain recognition and measurement requirements by generally allowing only one accounting treatment. The accounting treatment in the standards is generally simpler than that allowed or required by full IFRSs. Also, disclosure requirements are reduced from full IFRSs, and topics not relevant to SMEs have been omitted from the standards. The IASB has further simplified the standards' usability by limiting revisions to *IFRS for SMEs* to once every three years. These simplifications provide a version of IFRSs that is less costly to implement than full IFRSs and perhaps more relevant to the users of SME financial statements.

.110 Some U.S. private companies may find the simplified *IFRS for SMEs* an attractive alternative to the more complicated and voluminous U.S. GAAP. Those private companies may find *IFRS for SMEs* to be a more relevant and less costly financial accounting and reporting standard than U.S. GAAP. Being based on full

IFRSs and missing many accounting topics, *IFRS for SMEs*, therefore, differs from U.S. GAAP in a variety of areas. Some of the key differences under *IFRS for SMEs* are the following:

- Disclosures are simplified in a number of areas, including pensions, leases, and financial instruments.
- Last in, first out (LIFO) is prohibited.
- Goodwill and indefinite life intangible assets are amortized over a period not exceeding 10 years.
- Depreciation is based on a components approach.
- The temporary difference approach to income tax accounting is simplified.
- Reversal of impairment charges, if certain criteria are met, is allowed.
- Accounting for financial assets and liabilities makes greater use of cost.

.111 Some key challenges that may be present in choosing to use *IFRS for SMEs* include understanding the differences between *IFRS for SMEs* and U.S. GAAP, the willingness of financial statement users to accept financial statements prepared under *IFRS for SMEs*, working with and accepting a more principles-based set of accounting standards compared with the more rules-based U.S. GAAP, the impact on taxes and tax planning strategies, and the impact on financial reporting metrics.

.112 Entities interested in *IFRS for SMEs*, or possibly adopting the standard, may find it helpful to take the following actions:

- *Monitor the efforts of the AICPA/FAF/NASBA "Blue Ribbon" Panel on Standard Setting for Private Companies*. For more information about the panel, go to www.fasb.org/cs/ContentServer?c=Page&pagename=FASB%2FPage%2FSectionPage&cid=1176156684820.
- *Monitor convergence efforts of FASB and the IASB*.
- *Stay informed on SEC developments*. Public companies will be directly affected by the SEC's decision to adopt IASB standards. The future of private company reporting will also likely be impacted by an SEC mandate to adopt IFRS.
- *Develop a high-level analysis of the potential impact on accounting policies, processes and systems, contracts, legal agreements, and financing and tax structures*.

Private Company Financial Reporting

.113 The AICPA and the Financial Accounting Foundation established the "blue-ribbon panel" to address how U.S. accounting standards can best meet the needs of U.S. users of private company financial statements. This panel also is sponsored by the National Association of State Boards of Accountancy. The "blue-ribbon panel" will provide recommendations through an issued report on the future of standard setting for private companies, including whether separate, stand-alone accounting standards for private companies are needed. The panel has discussed how smaller entities are struggling to understand and implement complex standards, which has resulted in entities taking more GAAP exceptions. Other key items include (*a*) whether U.S. GAAP is meeting private company user needs in a cost-beneficial manner for both users and preparers, (*b*) how private company standard setting in the United States compares to standard setting in other countries, and (*c*) possible lessons to be learned from alternatives seen in other countries. The panel's issued report will be made available to the public, and the resulting action plan is expected to be exposed for public comment prior to that plan being finalized. Although no deadline has been set for the panel's work, the recommendations are likely to come in 2010.

.114 During the July 2010 meeting of the panel, seven alternative models for private company financial reporting were discussed. Models based on IFRSs and a model that would have resulted in no change to private company financial reporting were eliminated. All remaining models would result in differences in GAAP for private and public entities; the main focus of the panel moving forward will be to select a model that is relevant to users of private company financial reports because this has become the overriding issue. The three primary models the panel agreed to focus on going forward are U.S. GAAP with Exclusions for

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Private Companies—with enhancements; U.S. GAAP—Baseline GAAP with Public Company Add-Ons; and Separate, Stand-Alone GAAP Based on Current U.S. GAAP. Most of the panel members also expressed their discontent with the current make-up of FASB and its heavy, but appropriate, focus on public companies. This led to another key discussion topic: the structure of whatever model is chosen—the current FASB; a restructured FASB (with greater private company representation); or a new, separate Private Company Standards Board under the oversight of the Financial Accounting Foundation.

Recent Accounting Pronouncements and Related Guidance for Nonpublic Companies

Recent ASUs

.115 The following table presents, by codification area, a list of recently issued ASUs, through the issuance of ASU No. 2010-24, *Health Care Entities (Topic 954): Presentation of Insurance Claims and Related Insurance Recoveries (a consensus of the FASB Emerging Issues Task Force)*. However, this table does not include ASUs that are SEC updates (such as ASU No. 2010-19, *Foreign Currency [Topic 830]: Foreign Currency Issues: Multiple Foreign Currency Exchange Rates [SEC Update]*) or ASUs that are technical corrections to various topics. FASB ASC does include SEC content to improve the usefulness of FASB ASC for public companies, but the content labeled as SEC staff guidance does not constitute rules or interpretations of the SEC nor does such guidance bear official SEC approval.

TIS section 8700.01 (September 2009)	"Effect of FASB ASC 855 on Accounting Guidance in AU Section 560"

.117 The AICPA also recently issued two new questions and answers that specifically apply to compilation and review engagements, as follows.

TIS section 9150.26, "The Accountant's Responsibilities for Subsequent Events in Compilation and Review Engagements"

.118 This question and answer was issued in response to FASB's 2009 addition of subsequent events into accounting literature, which is now codified in FASB ASC 855. This question and answer discusses how the entity's responsibility to disclose the date through which subsequent events have been evaluated (per FASB ASC 855-10-50-1) affects the accountant's responsibilities for subsequent events in a compilation and review engagement. This question and answer points out that FASB ASC 855 does not change the accountant's responsibilities under SSARSs. TIS section 9150.26 is reprinted in its entirety in appendix D, "'The Accountant's Responsibilities for Subsequent Events in Compilation and Review Engagements.'"

TIS section 9150.27, "The Accountant's Reporting Responsibility With Respect to Subsequent Discovery of Facts Existing at the Date of the Report"

.119 This question and answers clarifies that the term *where applicable*, as discussed in paragraph .79(a) of AR section 100, refers to a situation in which the accountant has not reported on compiled financial statements not intended for third party use. In the case of a review or compilation in which the accountant has issued a report, then a revised accountant's report should be issued and the reason for the financial statement's revision usually should be described in the revised report, as well as in a note to the revised financial statements. TIS section 9150.27 is reprinted in its entirety in appendix E, "'The Accountant's Reporting Responsibility With Respect to Subsequent Discovery of Facts Existing at the Date of the Report.'"

Recent AICPA Independence and Ethics Developments

.120 The Audit Risk Alert *Independence and Ethics Developments—2010/11* (product no. 0224710) contains a complete update on new independence and ethics pronouncements. This alert will heighten your awareness of independence and ethics matters likely to affect your practice. Obtain this alert by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Establishing and Maintaining Internal Control

.121 One of the Professional Ethics Executive Committee's (PEEC's) current projects deals with a possible inconsistency within Interpretation No. 101-3. Interpretation No. 101-3 provides examples of general activities that would impair a member's independence, including establishing or maintaining internal controls, including performing ongoing monitoring activities for a client. PEEC recognizes that some practitioners perceive an inconsistency in Interpretation No. 101-3 because certain bookkeeping services and other nonattest services that are permitted under Interpretation No. 101-3 could be viewed as maintaining internal control for the client. For example, bookkeeping is recognized to be part of the Committee of Sponsoring Organizations of the Treadway Commission's information and communication element of internal control. Additionally, some nonattest activities, such as performing calculations (for example, tax provision, leases, LIFO reserve); maintaining ledgers (for example, fixed asset ledger); performing reconciliations; and identifying adjusting journal entries, have been viewed as maintaining the client's controls, regardless of whether management has met the general requirements of Interpretation No. 101-3 (that is, oversees the service, reviews and approves the work. and makes all significant judgments and decisions).

.122 To address the possible inconsistency in Interpretation No. 101-3, PEEC is considering possible clarifying revisions to Interpretation No. 101-3. The revisions would provide more descriptive language about management responsibilities, which should help members better distinguish between permissible and prohibited nonattest services. Readers are encouraged to monitor the progress of this project.

.123 PEEC meeting information, including meeting agendas, discussion materials, and minutes of prior meetings, can be found at www.aicpa.org/InterestAreas/ProfessionalEthics/Community/MeetingMinutesandAgendas/Pages/MeetingInfo.aspx.

.124 Exposure drafts issued by PEEC can be found at www.aicpa.org/InterestAreas/ProfessionalEthics/Community/ExposureDrafts/Pages/ExposureDrafts.aspx.

New AICPA Products and Publications

.125 The AICPA has recently developed a brand new guide, *Compilation and Review Engagements*. This guide provides additional information on implementing SSARS No. 19. It includes illustrative engagement and representation letters, sample compilation and review reports, detailed illustrations, and case studies. See www.cpa2biz.com and enter product no. 0128110 for further information. You can also save more than $10 when you purchase both the guide and SSARS No. 19 as a set online using product no. 0129010HI.

On the Horizon

.126 Accountants should keep abreast of compilation, review, and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to your clients or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.127 Information on, and copies of, outstanding exposure drafts may be obtained from the various standard setters' websites. These websites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting, compilation, and review projects exist, in addition to those discussed here. Readers should refer to information provided by the various standard setting bodies for further information.

SSARS Pipeline

SSARS Clarity Project

.128 In response to growing concerns about the complexity of standards, the ASB commenced a large-scale clarity project to revise all existing auditing standards so they are easier to read and understand. Over the last few years, the ASB has been redrafting all of the existing auditing sections contained in the *Codification of Statements on Auditing Standards* (AU sections of the AICPA's *Professional Standards*) to apply the clarity drafting conventions and converge with the International Standards on Auditing (ISAs) issued by the IAASB. The majority of the clarified standards will be issued in a single SAS codified as AU sections, with each section assigned a section number and title. When the new SAS becomes effective, the SASs issued prior to SAS No. 117, *Compliance Audits* (AICPA, *Professional Standards*, vol. 1, AU sec. 801), will be superseded. The ASB proposes that most redrafted standards become effective at the same time and is working toward completing the project in the first half of 2011.

.129 In its May 2010 meeting, ARSC agreed to begin working to clarify the current SSARSs literature using the same conventions as the ASB project. The ARSC project is expected to begin in late 2010 and continue through 2011.

Codification of Existing SSARSs

.130 The issuance of SSARS No. 19 resulted in the separation of the compilation and review engagement framework, compilation standards, and review standards into three new codified sections. These new sections became AR section 60, *Framework for Performing and Reporting on Compilation and Review Engagements*; AR section 80, *Compilation of Financial Statements*; and AR section 90, *Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2). Once SSARS No. 19 is fully effective, AR section 20, *Defining Professional Requirements in Statements on Standards for Accounting and Review Services*; AR section 50, *Standards for Accounting and Review Services*; and AR section 100 will be removed from *Professional Standards*.

.131 In addition, those AR sections that were not superseded by SSARS No. 19 will be conformed so that the performance and reporting requirements are consistent with SSARS No. 19. It is expected that the 2011 SSARSs codification will be fully conformed to SSARS No. 19.

Consideration of International Compilation and Review Standards

.132 The IAASB is currently working on redrafting International Standard on Related Services 4410, *Engagements to Compile Financial Statements*, and International Standard on Review Engagements 2400, *Engagements to Review Financial Statements*.

.133 The IAASB plans to further deliberate this project at its September 2010 public meeting. ARSC plans to comment on the IAASB proposed standards when such standards are exposed for public comment. Such standards are expected to be exposed by the end of 2010. ARSC will continue to monitor the progress of the IAASB project and consider how any changes to the international compilation and review standards might be converged with the current SSARSs. Further information on the IAASB project is available through the project summary on the IAASB website at www.ifac.org/IAASB.

Joint FASB and IASB Accounting Pipeline

FASB and IASB Memorandum of Understanding

.134 FASB expects 2010 to be a pivotal year of progress toward the goal of completing the important projects in the "Memorandum of Understanding" (MoU) during 2011. Since its original issuance in 2006, FASB and the IASB have continued to reaffirm their respective commitments to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. FASB and the IASB agreed that the goal of joint projects is to produce common, principles-based standards,

subject to the required due process. Most recently, FASB and the IASB have agreed to intensify their efforts to complete the major joint projects described in the MoU and are committed to developing, and making publicly available, quarterly progress reports on these major projects. The MoU identifies 11 convergence topics:

- Financial instruments
- Consolidations
- Derecognition
- Fair value measurement
- Revenue recognition
- Leases
- Financial instruments with characteristics of equity
- Financial statement presentation
- Other MoU projects
- Other joint projects

.135 A progress report for the quarter ended March 31, 2010, highlighted the following topics: (*a*) on the financial instruments and insurance contracts topics, the boards have reached different conclusions on significant technical issues that may affect the project timetables of these topics, and (*b*) the boards agreed to explore an alternative approach to lessor accounting that may affect the project timetable of this topic. FASB and the IASB also have several other joint projects in process, including balance sheet—offsetting, emissions trading schemes, and reporting discontinued operations. In March 2010, the exposure draft *Conceptual Framework for Financial Reporting* was published for public comment. In early June 2010, the boards issued a joint statement that discusses the boards' recognition of the challenges that arise from seeking effective global stakeholder feedback. Specifically, the boards were scheduled to expose for comment numerous major exposure drafts during the second quarter of 2010, and stakeholders voiced concern about their ability under those circumstances to provide high-quality input. The boards have developed a modified strategy to accommodate these concerns by prioritizing the major projects in the MoU, staggering the publication of exposure drafts by limiting the number of significant exposure drafts to four per quarter, and issuing a separate consultation document seeking stakeholder input about effective dates and transition methods.

.136 The priority joint projects are financial instruments, revenue recognition, leases, the presentation of other comprehensive income, and fair value measurements. The boards also decided to issue separate exposure drafts to address differences in the two sets of standards on balance sheet netting of derivative contracts and other financial instruments. The IASB has also made its projects on improved disclosures about derecognized assets and other off balance-sheet risks, consolidations, and insurance contracts priorities. June 2011 or earlier will remain the target completion date for these priority convergence projects; the target completion dates for the nonpriority projects, however, has been extended into the second half of 2011. Additionally, the comments received on exposure drafts will affect the timeline of finalized converged standards. The boards' joint statement states that this action is not expected to negatively impact the SEC's work plan to consider in 2011 whether and how to incorporate IFRSs into the US financial system.

.137 Readers are encouraged to remain current for the remainder of the exposure draft releases and other developments on convergence through the AICPA's website, www.ifrs.com, in addition to the FASB, IASB, and SEC websites. The growing acceptance of IFRSs as a basis for U.S. financial reporting could represent a fundamental change for the U.S. accounting profession.

Comprehensive Income Exposure Draft

.138 In May 2010, FASB issued a proposed ASU on comprehensive income that would require an entity to report total comprehensive income in a continuous financial statement in two parts: net income and other

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

comprehensive income. In that financial statement, the components of net income and the components of other comprehensive income should be displayed. The proposed ASU is intended to simplify how comprehensive income is reported by eliminating two options for how items of comprehensive income are displayed. The proposed ASU contains illustrative examples of the revised financial statement. This proposed ASU is the result of a joint project as part of IFRSs and U.S. GAAP convergence, and the IASB has separately issued a similar document. The proposed amendments would be applied on a fully retrospective basis to improve comparability between reporting periods. Further, because compliance with the proposed amendments is already permitted, early adoption would be permitted. FASB plans to align the effective date with the effective date of the amendments in the proposed ASU on financial instruments. The IASB and FASB aim to finalize an improved and converged standard on other comprehensive income in the fourth quarter of 2010.

Financial Instruments Exposure Draft

.139 Also, in May 2010, FASB issued a proposed ASU on accounting for financial instruments, derivative instruments, and hedging activities. The main objective of this proposal is to provide financial statement users with a more timely and representative depiction of an entity's involvement in financial instruments while reducing the complexity in accounting for those instruments. It develops a consistent framework for classifying financial instruments, removes the threshold for recognizing credit impairments creating a single credit impairment model for both loans and debt securities, and makes changes to the requirements to qualify for hedge accounting. The main provisions of these amendments are as follows:

- Most financial instruments would be measured at fair value in the statement of financial position each reporting period.
- Hybrid financial instruments containing embedded derivatives that would otherwise have been required to be bifurcated under FASB ASC 815-15 would be classified and measured at fair value in their entirety, with changes accounted for through net income.
- For financial instruments for which an entity's business strategy is to hold for collection or payment(s) of contractual cash flows, a reconciliation from amortized cost to fair value would be required on the statement of position; with the exception of certain liabilities that qualify for the amortized cost option, all other changes in fair value from these instruments would be recognized in other comprehensive income each reporting period. Therefore, net income will remain relatively unchanged because only changes arising from interest accruals, credit impairments, and realized gains and losses would be recognized in net income each reporting period.
- The existing probable threshold for recognizing impairments on loans would be removed. (Currently, FASB ASC 310-10-35-4 states that the concept in U.S. GAAP is that impairment of receivables [including loans] should be recognized when, based on all available information, it is probable that a loss has been incurred based on past events and conditions existing at the date of the financial statements. Probable is defined by FASB ASC 310-10-20 as when the future event or events are likely to occur).
- For changes in value of financial instruments measured through other comprehensive income, an entity is required to determine if a credit impairment is appropriate at the end of each reporting period based on information related to past events and existing economic conditions. An entity would recognize in net income the loss related to the amount of credit impairment for all contractual amounts the entity does not expect to collect.
- Core deposit liabilities would be remeasured each period using a current value method that reflects the economic benefit that an entity receives from this lower cost, stable funding source.
- Interest income would be recognized after considering cash flows that are not expected to be collected, which would better reflect a financial instrument's interest yield.
- Quantitative-based hedging requirements would be replaced with more qualitative-based assessments that would make it easier to qualify for hedge accounting. The shortcut method and critical terms match method would be eliminated. An entity would be able to designate particular risks as

the risk being hedged in a hedging relationship, and only the effects of the risks hedged would be reflected in net income.

- Hedge accounting would be discontinued only if the criteria for hedge accounting are no longer met or the hedging instrument expires or is sold, terminated, or exercised. An entity would not be permitted to discontinue hedge accounting by simply removing the designation of a hedging relationship.

.140 Some specific types of financial instruments, such as pension obligations and leases, would be exempt from the proposed guidance. Additionally, short-term receivables and payables would continue to be measured at amortized cost (plus or minus any fair value hedging adjustments). This proposed ASU was not issued jointly with the IASB and does not contain converged guidance; however, the goal still remains for both boards to issue comprehensive improvements to foster international comparability of financial information about financial instruments. The IASB completed its first phase of classification and measurement with the issuance of IFRS 9, *Financial Instruments*, in November 2009. The IASB also issued two exposure drafts on amortized cost and impairment and fair value option for financial liabilities in late 2009 and mid-2010, respectively; the third topic, hedge accounting, is still being deliberated by the IASB, and an exposure draft is expected in the near term. The boards have stated that they will consider together the comment letters and other feedback received on each boards' exposure drafts in an effort to reconcile their differences in ways that foster improvement and convergence. The effective date of these amendments will be established upon issuance of the final ASU which is expected in the second quarter of 2011; it is estimated to have an effective date in 2013. However, nonpublic entities with less than $1 billion in total consolidated assets would be granted an additional 4 years to implement certain requirements related to loans and core deposits. Upon its application, an entity would apply the proposed guidance by means of a cumulative-effect adjustment to the statement of financial position for the reporting period that immediately precedes the effective date.

Revenue Recognition Exposure Draft

.141 The revenue recognition project is intended to develop a single, common revenue recognition model that can be applied to a wide range of industries and transaction types. The standards resulting from this project will eliminate weaknesses and inconsistencies between the existing standards. A joint discussion paper issued by the boards proposed a single revenue recognition model. A joint exposure draft, *Revenue from Contracts with Customers*, from the boards was published in June 2010, and the boards aim to issue a final converged standard by the second quarter of 2011. The proposed standard would replace International Accounting Standard (IAS) 18, *Revenue*; IAS 11, *Construction Contracts*; and related interpretations in IFRSs; under U.S. GAAP, it would supersede most of the guidance contained in FASB ASC 605, *Revenue Recognition*. The core principle of the draft standard is that an entity should recognize revenue from contracts when it transfers goods or services to the customer in the amount of consideration the entity receives, or expects to receive, from the customer.

.142 In addition to eliminating weaknesses and inconsistencies between IFRSs and U.S. GAAP, this proposal intends to provide a more robust framework for addressing various revenue recognition issues; improve comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets; and simplify the preparation of financial statements by reducing the number of requirements to which entities must refer. The proposed standard will also amend the existing guidance on recognition of a gain or loss on the sale of some nonfinancial assets that are not an output of the entity's ordinary activities (for example, property, plant, and equipment) to be consistent with the proposed revenue recognition and measurement requirements. To implement the preceding core principle of revenue recognition, an entity would

- identify the contract(s) with the customer.
- identify the separate performance obligations in the contract (*performance obligation* is an enforceable promise [whether explicit or implicit] in a contract with a customer to transfer a good or service to the customer).

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- determine the transaction price (*transaction price* is the amount of consideration that an entity receives, or expects to receive, from a customer in exchange for transferring goods or services promised in the contract).
- allocate the transaction price to the separate performance obligations.
- recognize revenue when the entity satisfies each performance obligation by transferring a promised good or service to a customer (a good or service is transferred when the customer obtains control of that good or service).

.143 The proposal also includes guidance on accounting for some costs. An entity would recognize the costs of obtaining a contract as expenses when incurred. For expenses incurred in fulfilling a contract, if they are ineligible for capitalization in accordance with other guidance, an entity would only be able to recognize an asset if those costs relate directly to a contract (or a specific contract under negotiation); generate or enhance resources of the entity that will be used in satisfying performance obligations in the future; and are expected to be recovered. The proposed guidance would differ from current practice in the following ways: (*a*) recognition of revenue only from the transfer of goods or services, (*b*) identification of separate performance obligations, (*c*) licensing and rights to use, (*d*) effect of credit risk, (*e*) use of estimates, (*f*) accounting for costs, and (*g*) disclosure.

.144 As discussed previously, because the revenue recognition project is one of many standards the boards expect to issue as converged and final in 2011, the boards plan to invite additional comment through a separate consultation on how best to transition over to the new standards. Therefore, no expected specific effective date is stated at this point. Comments on the exposure draft are due on October 22, 2010. This topic is considered by many to be the most pervasive of any FASB has ever worked on. The reader is encouraged to review the exposure draft, consider if it is operational to you or your clients' common revenue transactions, and share any resulting concerns with FASB. The boards also anticipate holding public roundtable meetings after the end of the comment period.

Fair Value Exposure Draft

.145 The fourth and final exposure draft of the second quarter of 2010 was *Fair Value Measurements and Disclosures (Topic 820): Amendments for Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The amendments in the exposure draft are intended to result in common fair value measurement and disclosure requirements in financial statements prepared in accordance with U.S. GAAP and IFRSs. Many of the requirements are not intended to result in a change in the application of the requirements in FASB ASC 820; however, some are intended to clarify or change the application of existing fair value guidance. Additionally, some wording changes were made to ensure the guidance is described consistently between U.S. GAAP and IFRSs. The most significant proposed amendments include the following:

- Highest and best use and valuation premise
- Measuring the fair value of an instrument classified in shareholders' equity
- Measuring the fair value of financial instruments that are managed within a portfolio
- Application of blockage factors and other premiums and discounts in a fair value measurement
- Additional disclosures about fair value measurements

.146 The first two of these significant amendments are intended to clarify the application of existing fair value measurement guidance. The last three of these significant amendments would change a particular principle of fair value guidance.

.147 The amendments would specify that the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets, not when measuring the fair value of financial assets or liabilities. The FASB ASC glossary defines *highest and best use* as, in broad terms, the use of an asset by market participants that would maximize the value of the asset or

the group of assets within which the asset would be used. The rationale for this proposed change is that the highest and best use concept is irrelevant when measuring the fair value of financial assets or liabilities because these items do not have alternative uses and their fair values do not depend on their use within a group of other assets or liabilities. These changes are not expected to affect the fair value measurement of nonfinancial assets. However, they might affect current practice for reporting entities that apply the in-use valuation premise more broadly.

.148 The amendments related to measuring the fair value of an instrument classified in shareholders' equity would specify that a reporting entity should measure the fair value of its own equity instrument from the perspective of a market participant who holds the instrument as an asset. An example of an instrument that would be measured at fair value and classified in shareholders' equity is equity interests issued as consideration in a business combination. Currently, U.S. GAAP does not contain explicit guidance on this topic, and the proposed amendments are expected to increase the comparability among reporting entities applying U.S. GAAP and IFRSs.

.149 Regarding measuring the fair value of financial instruments that are managed within a portfolio, the proposed amendments would allow an exception to FASB ASC 820 for measuring fair value when a reporting entity manages its net exposure, rather than its gross exposure, to the underlying risks. A reporting entity that holds a group of financial assets and financial liabilities is exposed to interest rate risk, currency risk, or other price risk (market risks) and to the credit risk of each of the counterparties. The proposed guidance is intended to coincide with financial institutions and other similar reporting entities that hold and manage these instruments in that manner. Specifically, a reporting entity could measure the fair value of the financial assets and financial liabilities that are managed in that way on the basis of the price that would be received to sell a net long position (that is, an asset) for a particular risk or to transfer a net short position (that is, a liability) for a particular risk in an orderly transaction between market participants at the measurement date. The proposed amendments would result in U.S. GAAP and IFRSs having the same requirements for measuring the fair value of financial instruments; additionally, these changes would not change how financial assets and financial liabilities that are managed on the basis of a reporting entity's net risk exposure are measured in practice. However, they might affect the current practice for reporting entities that apply the in-use valuation premise more broadly.

.150 The proposed amendments regarding the application of blockage factors and other premiums and discounts in fair value measurements would make two changes to current guidance. Currently, under U.S. GAAP, use of a blockage factor in fair value measurements is only prohibited when fair value is measured using a quoted price for an asset or a liability (or similar assets or liabilities). This would be level 1 within the fair value hierarchy. The first change from the proposed amendments is that a blockage factor is not relevant and, therefore, also should not be used when fair value is measured using a valuation technique that does not use a quoted price. This would be level 2 or level 3 within the fair value hierarchy. Second, the amendments specify that fair value measurements categorized within level 2 and level 3 take into account other premiums and discounts when market participants would consider those premiums or discounts when pricing an asset or a liability, consistent with the unit of account for that asset or liability. Examples include a control premium or a noncontrolling interest discount. These proposed amendments may affect current practice for any reporting entities applying a blockage factor in fair value measurements that is measured using quoted prices and categorized within level 2 of the fair value hierarchy.

.151 Lastly, the amendments propose additional disclosures about fair value measurements. More information about the following would be required for disclosure:

- The effect on a fair value measurement of changing one or more unobservable inputs that could have reasonably been used to measure fair value in the circumstances
- Use of an asset in a way that differs from the asset's highest and best use when that asset is recognized at fair value in the statement of financial position on the basis of its highest and best use
- The categorization by level within the fair value hierarchy for items that are not measured at fair value in the statement of financial position but for which the fair value of such items is required to be disclosed

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.152 The effective dates of these proposed amendments would be determined after the feedback from the exposure draft is considered. However, when it is effective, it will be effective as of the beginning of the period of adoption, and an entity would recognize a cumulative effect adjustment in beginning retained earnings in the period of adoption if a difference exists in a fair value measurement of an item recorded at fair value as a result of applying these amendments. Additional disclosures would be required on a prospective basis. These amendments are expected to achieve the objective of developing common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs.

Financial Statement Presentation Staff Draft

.153 FASB and the IASB are working together to establish a common standard that would improve how information is organized and presented in financial statements. This common standard is intended to address users' concerns that existing requirements permit too many alternative types of presentation and that information in financial statements is highly aggregated and inconsistently presented, making it difficult to fully understand the relationship between an entity's financial statements and its financial results. In 2008, a discussion paper was issued by the boards that outlined the proposed principles for presenting financial statements in a way that portrays a cohesive financial picture of an entity.

.154 Given the magnitude of this project, the expected implementation costs, and the substantial effects it will have on financial statement presentation for many years to come, the boards decided in May 2010 to modify the strategy for this project. Before finalizing an exposure draft, the boards decided to engage in additional outreach activities that focus on the perceived benefits and costs of the proposals and the implications of the proposals for financial reporting by financial service entities. The boards plan on discussing these two areas of focus with preparers and users of financial statements. This outreach will be based on a rough draft of a proposed standard, known as a *staff draft*, and reflects the cumulative tentative decisions made by the boards, concluding with their joint meeting in April 2010. This staff draft was made publicly available solely for this purpose.

.155 The proposals in this project would be applicable to all entities, except a benefit plan within the scope of FASB ASC 960, *Plan Accounting—Defined Benefit Pension Plans*; FASB ASC 962, *Plan Accounting—Defined Contribution Pension Plans*; and FASB ASC 965, *Plan Accounting—Health and Welfare Benefit Plans* or IAS 26, *Accounting and Reporting by Retirement Benefit Plans*. The two core financial statement principles in this proposal are cohesiveness and disaggregation. A common structure for the statements of financial position, comprehensive income, and cash flows would be established in the form of required sections, categories or subcategory, and related subtotals. Some proposed specific changes in the classification and format of financial statements include the following:

- Related information would be displayed in the same sections, categories, and subcategory in each statement so that information is more easily associated.
- Presentation of business and financing activities would be separated as follows:
    - The business section would include items that are part of an entity's daily operations and other income generating activities.
    - The financing section would include items that are part of an entity's activities to obtain (or repay) capital.
- Discontinued operations and income taxes would be presented in their own separate sections.
- The statement of changes in equity would not include the sections and categories used in the other statements because that statement presents information solely about changes in items classified in the equity category in the statement of financial position.

.156 Further, FASB plans to propose some changes that are already required by IAS 1, *Presentation of Financial Statements*. The proposal would define, and provide the requirements for, a complete set of financial statements. Currently, a complete set of financial statements for the period is defined only in the FASB Concepts Statements. An entity would also be required to present one period of comparative information. A

complete set of financial statements would consist of, at a minimum, statements of financial position, comprehensive income, cash flows and changes in equity, and notes to financial statements for two periods (the current period and the previous period). Also, an opening statement of financial position would be part of a complete set of financial statements if an entity applies an accounting principle retrospectively, restates its financial statements, or reclassifies items in the financial statements.

.157 The boards' tentative decisions on financial statement presentations do differ in a few ways in relation to minimum line requirements for the statement of financial position, segment reporting, and net debt presentation. Of these three, the differing stance on segment reporting is the only significant difference. The boards now aim to issue an exposure draft in the first quarter of 2011 and a final improved and converged standard in the fourth quarter of 2011. Both the introduction to the staff draft and the staff draft can be accessed from FASB's website at www.fasb.org.

Leases Exposure Draft

.158 During the third quarter of 2010, the IASB and FASB published for public comment joint proposals to improve the financial reporting of lease contracts. These proposals would result in a consistent approach to lease accounting for both lessees and lessors—a right-of-use approach. This would result in the liability for payments arising under the lease contract and the right to use the underlying asset being included in the lessee's statement of financial position, therefore providing more complete and useful information to investors and other users of financial statements. Currently, the accounting for a lease depends on its classification; an operating lease results in the lessee not recording any assets or liabilities in the statement of financial position under either IFRSs or U.S. GAAP, whereas a capital lease results in the lessee recognizing an asset and obligation. Under the proposed guidance, lessees would only have one method of accounting for leases, which would produce more complete and comparable financial reporting, in addition to reducing the opportunity to structure transactions to achieve a desired accounting outcome.

.159 The scope of the new lease guidance includes all leases (including leases of right-of-use assets in a sublease) other than leases of biological and intangible assets, leases to explore for or use natural resources, and leases of some investment properties. Under this new guidance, all lessees would use a single method of accounting for all leases: an asset would be recognized representing the lessee's right to use the leased (underlying) asset for the lease term (the right-of-use asset), and a liability at the present value of the expected lease payments would also be recognized.

.160 A lessor would recognize an asset representing its right to receive lease payments and, depending on its exposure to risks or benefits associated with the underlying asset, would either (*a*) recognize a lease liability while continuing to recognize the underlying asset (a performance obligation approach); or (*b*) derecognize the rights in the underlying asset that it transfers to the lessee and continue to recognize a residual asset representing its rights to the underlying asset at the end of the lease term (a derecognition approach). The assets and liabilities recognized by both lessors and lessees would be measured on the basis that

- assumes the longest possible lease term that is more likely than not to occur, taking into account the effect of any options to extend or terminate the lease.
- uses an expected outcome technique to reflect the lease payments, including contingent rentals and expected payments under term option penalties and residual value guarantees, specified by the lease.
- a remeasurement is triggered when changes in facts or circumstances indicate that there would be a significant change in those assets or liabilities since the previous reporting period.

.161 For leases of 12 months or less, lessors and lessees would be able to apply simplified requirements. The simplified accounting would allow lessees to ignore the effects of interest on the recorded assets and liabilities and allow the lessee to record the liability for lease payments at the undiscounted amount for lease payments. New disclosures would also be required.

.162 In early 2009, the boards issued a discussion paper on leases; this exposure draft is the result of extensive deliberations that included consideration of input received from investors, preparers, auditors,

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

regulators, and other interested parties since that discussion paper. The comment period is open until December 15, 2010. During the comment period, the boards will undertake further outreach activities, including public round-table meetings to ensure that the views of all interested parties are taken into consideration before the new standard is completed. Also, the boards will share and jointly consider all comment letters received. A final standard is expected in 2011.

FASB Accounting Pipeline

Disclosure of Certain Loss Contingencies

.163 In July 2010, FASB issued an exposure draft on the disclosure of certain loss contingencies in response to concerns from investors and other financial statement users that the current disclosures do not provide adequate and timely information to assess the likelihood, timing, and magnitude of future cash outflows associated with loss contingencies. The objective of these disclosures would be for an entity to disclose qualitative and quantitative information about loss contingencies to enable financial statement users to understand all of the following: the nature of the loss contingencies, their potential magnitude, and their potential timing (if known). Disclosure of certain remote loss contingencies would be required and, therefore, would expand the population of loss contingencies that are required to be disclosed. An entity would not consider the possibility of recoveries from insurance or other indemnification arrangements when assessing the materiality of loss contingencies to determine whether disclosure is required. Further, current qualitative disclosures would be enhanced by requiring additional disclosures. These additional required qualitative and quantitative disclosures include the following:

- For litigation contingencies, the contentions of the parties and how users can obtain more information about the litigation
- Publicly available quantitative information, such as the claim amount for asserted litigation contingencies; other relevant nonprivileged information; and, in some cases, information about possible recoveries from insurance and other sources
- For public entities, tabular reconciliations, by class, of recognized (accrued) loss contingencies that present the activity in the account during the period

.164 The amendments in this proposal would affect all entities. The exposure draft noted that FASB will continue to work with the Public Company Accounting Oversight Board, the AICPA, and the American Bar Association (ABA) to identify and address any potential implications of the proposed amendments for auditing literature and the ABA's Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information. The proposed amendments would be effective for fiscal years ending after December 15, 2010, for public entities and in the first annual period beginning after December 15, 2010, for nonpublic entities. The comment period ended in September 2010.

Going Concern FASB Project

.165 Currently, the accounting guidance with respect to going concern resides in the auditing literature, as well as in SSARSs. This project's intention is to appropriately incorporate going concern guidance into U.S. GAAP. Specifically, this guidance would discuss the following:

- Preparation of financial statements as a going concern
- An entity's responsibility to evaluate its ability to continue as a going concern
- Disclosure requirements when financial statements are not prepared on a going concern basis
- Disclosure requirements when there is a substantial doubt about an entity's ability to continue as a going concern
- The adoption and application of the liquidation basis of accounting

.166 A revised exposure draft is expected to be issued in the fourth quarter of 2010, with a final ASU expected in the first quarter of 2011. FASB has decided that management should take into account available information about the foreseeable future, which is generally, but not limited to, 12 months from the end of the reporting period. Readers should be alert to developments on this topic.

Other Accounting Projects

.167 Additionally, FASB has the following projects underway:

- Troubled debt restructuring
- Disclosure framework
- Investment properties

Resource Central

.168 The following are various resources that practitioners performing compilation and review engagements may find beneficial.

PCPS SSARS No. 19 Toolkit

.169 The PCPS has developed a SSARS No. 19 toolkit to support practitioners with implementing SSARS No. 19 and communicating SSARS No. 19 within the accounting firm and to clients. The SSARS No. 19 toolkit includes the following components:

- *Comparative overview of compilation, review, and audit brochure (available to all AICPA members)*. The level of service provided in an engagement is generally determined by the needs of the client and the requirements of the client's creditors or investors. This customizable brochure is provided to assist practitioners with educating clients in the differences between compilation, review, and audit engagements and has been updated for SSARS No. 19 guidance.
- *SSARS No. 19 frequently asked questions (FAQs) (available only to PCPS member firms)*. The FAQs are intended to address the most common practitioner questions related to applying SSARS No. 19 and include a side-by-side compilation and review comparison grid, as well as illustrative comparison grids of previous and new reporting elements. In addition, they provide links to additional resources needed to further understand and apply SSARS No. 19.
- *SSARS No. 19 overview PowerPoint presentation (available only to PCPS member firms)*. This PowerPoint presentation is designed for practitioners to educate their staff and clients about SSARS No. 19.
- *SSARS No. 19 educate your client communications (available only to PCPS member firms)*. This template can be used by practitioners in newsletters or website communications to educate clients about the differences between the requirements of compilations, reviews, and audits and to communicate the impact of SSARS No. 19 on the client's engagement.
- *SSARS No. 19 management representation checklist for review engagements (available only to PCPS member firms)*. As part of a practitioner's client's review engagements, client management is required to provide the practitioner a written letter that includes documentation about representations made during the review. This checklist is designed to assist the practitioner in requesting representations required for all financial statements and periods covered by the accountant's review report ending on or after December 15, 2010.

.170 For additional information on the SSARS No. 19 toolkit, refer to www.aicpa.org/InterestAreas/PrivateCompaniesPracticeSection/Resources/KeepingUp/Pages/SSARSNo19Toolkit–PCPSMembers.aspx.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Publications

.171 Practitioners may find the following publications useful. Choose the format best for you—online or print.

- SSARS No. 19, *Compilation and Review Engagements* (product no. 060657 [paperback] or 060657PDF [online])
- Guide *Compilation and Review Engagements* (2010) (product no. 0128110 [paperback] or WRC-XX [online])
- Audit Risk Alert *Independence and Ethics Developments—2010/11* (product no. 0224710 [paperback] or WIA-XX [online])
- *Accounting Trends & Techniques, 63rd Edition* (product no. 0099009 [paperback] or WAT-XX [online])
- *IFRS Accounting Trends & Techniques* (product no. 0099109 [paperback] or WIF-XX [online])
- *Audit and Accounting Manual* (2010) (product no. 0051310 [paperback], WAM-XX [online], or AAM-XX [loose leaf])
- Financial Reporting Alert *Current Economic Instability: Accounting Issues and Risks for Financial Management and Reporting—2010* (product no. 0292010 [paperback])

AICPA Online Professional Library: Accounting and Auditing Literature

.172 The AICPA has created your core accounting and auditing library online. The AICPA Online Professional Library is now customizable to suit your preferences or your firm's needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to FASB ASC, the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides, Audit Risk Alerts, *Accounting Trends & Techniques*, and more. One option is the *AICPA Audit and Accounting Guides with* FASB Accounting Standards Codification™, which contains all audit and accounting guides, all audit risk alerts, and FASB ASC in the Online Professional Library (product no. WFA-XX [online]). To subscribe to this essential online service for accounting professionals, visit www.cpa2biz.com.

Continuing Professional Education

.173 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop (2010–2011 Edition)* (product no. 730096 [text] or 180096 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Internal Control Essentials for Financial Managers, Accountants and Auditors* (product no. 731856 [text], 181856 [DVD/Manual], or 351856 [Additional Manual for DVD]). This course will provide you with a solid understanding of systems and control documentation at the significant process level.
- *International Versus U.S. Accounting: What in the World is the Difference?* (product no. 731668 [text] or 181661 [DVD]). Understanding the differences between IFRSs and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRSs and U.S. GAAP.
- *IFRS Essentials with GAAP Comparison: Building a Strong Foundation* (product no. 741602 [text], 181601 [DVD/Manual], or 351601 [Additional Manual for DVD]). This course provides you with a greater understanding of what you need to know as the acceptance of international standards continues to grow.

.174 Among the many courses, the following are specifically related to compilation and review engagements:

- *Small Business Audit, Compilation and Review Update* (product no. 734522 [text])
- *Accounting Services, Compilations and Reviews: Effective Risk Management* (product no. 732825 [text])
- *Advanced Update for Compilation, Review and Accounting Services* (product no. 731556 [text])
- *Managing Compilation, Review and Accounting Services* (product no. 733482 [text])
- *Performing Compilation and Review Engagements* (product no. 739700 [CD-ROM])
- *Advanced Issues in Compilation, Review and Accounting Services* (product no. 733383 [text])
- *Compilation and Review Engagement Essentials* (product no. 733881 [text])
- *Compilation, Review and Accounting Service Update* (product no. 733373 [text])
- *Compiling Personal Financial Statements* (product no. 733503 [text])
- *InSight: SSARS 19—The New Compilation and Review Standard* (product no. 154230 [online])

.175 Visit www.cpa2biz.com for a complete list of CPE courses.

.176 In fall 2010, the AICPA will release on-demand CPE courses, including case studies, that address how to perform a review under SSARS No. 19.

Online CPE

.177 AICPA CPExpress, offered exclusively through CPA2Biz, is the AICPA's flagship online learning product. AICPA members pay $180 for a new subscription and $145 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to those performing compilation and review engagements include the following:

- *2010 Annual A&A Update: Compilation and Review Update*
- *Comp and Review Engagements: Current Practices; Accounting & Reporting Issues; Potential Change*
- *Compilations and Reviews: "Introduction and Background" plus "Engagement Planning and Administration"*
- *Drafting Audit, Review, and Compilation Reports*
- *Comp and Review Engagements: Recent SSARS Developments and Current Practice Issues*
- *Intro to Cash and Tax OCBOAs and Their Effects on Procedures in Audits, Reviews, and Compilations*
- *Compilations and Reviews: Independence Considerations*

Hotlines

Accounting and Auditing Technical Hotline

.181 Do you have a complex technical question about review, compilation, accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. The hotline is available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 by e-mail at aahotline@aicpa.org, or online at www.aicpa.org/Research/TechnicalHotline/Pages/TechnicalHotline.aspx. Additionally, members can submit questions by completing a Technical Inquiry form found on the same website.

Ethics Hotline

.182 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

Appendix B—Significant Change to Compilation Reporting Requirements When Independence Is Impaired

During its November 2009 meeting, the AICPA's Accounting and Review Services Committee (ARSC) removed, at the urging of many local and smaller firm CPAs and certain user groups, a prohibition against stating the reasons why an accountant was not independent when performing a compilation service.

Many accountants are finding that their independence with respect to a compilation client is impaired for a number of reasons. Examples of impairments include the performance of certain nonattest services, ownership in the client's business, or having certain relationships with the client. Prior to the issuance of Statement on Standards for Accounting and Review Services (SSARS) No. 19, *Compilation and Review Engagements* (AICPA, *Professional Standards*, vol. 2), an accountant was prohibited from including in his or her compilation report the reasons for an impairment of independence. An accountant could only state that he or she was not independent. Consequently, users who wanted to understand the reasons for an independence impairment needed to contact the client or the accountant for more information. Because of this interest on the part of users and to improve the overall transparency in the compilation report, ARSC decided to remove the prohibition and allow an accountant, if he or she chooses, to state the reasons for an independence impairment in the compilation report.

Although most provisions of SSARS No. 19 will not be effective until on or after December 15, 2010, ARSC felt that it was important to permit accountants to disclose the reasons for an independence impairment in the compilation report as soon as practicable. Therefore, the standard has an exception that this specific provision (set forth in paragraph 2.21 [AR sec. 80 par. .21] of SSARS No. 19) may be implemented early. This appendix discusses, in a question and answer format, this specific paragraph and the alternatives that will now be available to accountants.

Question—To what compilation engagements does SSARS No. 19 apply?

Answer—SSARS No. 19 applies to compilations of financial statements and other specified elements, accounts, or items of a financial statement and pro forma financial information performed in accordance with SSARSs. SSARS No. 19 does not apply to engagements to compile prospective financial information. Such engagements would be performed in accordance with AT section 301, *Financial Forecasts and Projections* (AICPA, *Professional Standards*, vol. 1). Paragraph .23 of AT section 301 states that the reason for a lack of independence should not be described in the compilation report.[1]

Question—When may I start describing the reasons for lack of independence in my compilation report?

Answer—SSARS No. 19 was issued in December 2009. Therefore, you may begin using the provision in paragraph 2.21 (AR sec. 80 par. .21).

Question—May I disclose the reasons for the lack of independence only for December 2009 compilations and subsequent periods, or may I use it for earlier compilations (for example, November 2009 compilations)?

Answer—You may disclose the reasons for a lack of independence in a November (or earlier) compilation report as long as your report is released (or reissued) after December 30, 2009, which was the official issuance date of SSARS No. 19.

Question—May I start using the new standard compilation report illustrated in SSARS No. 19 now?

Answer—No. The effective date of SSARS No. 19 is for compilations and reviews of financial statements for periods ending on or after December 15, 2010. Early implementation of the new standard is not permitted, except for the one paragraph permitting disclosure of the reasons for a lack of independence in the compilation report. Therefore, you cannot use the new standard compilation report until SSARS No. 19 becomes effective.

[1] In June 2010, the Accounting and Review Services Committee released a proposed Statement on Standards for Attestation Engagements (SSAE), *Reporting on Compiled Prospective Financial Statements When the Practitioner's Independence Is Impaired*. This proposed SSAE would revise the attestation standards to permit the disclosure of the reasons for an independence impairment in such compilation reports. For the current status of this project, visit www.aicpa.org.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Question—Does SSARS No. 19 require me to state the reasons why I'm not independent with respect to a compilation client?

Answer—No. SSARS No. 19 permits, but does not require, the accountant to disclose the reasons. You may simply state that you are not independent with respect to the client without disclosing the reasons.

Question—May I disclose the reasons for the lack of independence in one period and then not disclose the reasons in a subsequent period for the same client?

Answer—Yes. Each period for which a compilation report is issued for a client is treated as a separate compilation. For example, you may decide to disclose the reasons in a compilation report on financial statements for the period ended March 31, 2010, and then decide to not disclose the reasons in a compilation report on financial statements for the period ended June 30, 2010, or vice versa.

Question—Are there factors that I should consider before deciding to disclose the reason(s) for the impairment?

Answer—An accountant should exercise his or her professional judgment in making that decision. That judgment might include consideration of such factors as the number of reasons for independence impairment or the ability of the user of the compiled financial statements to understand the nature of the impairments.

Paragraph 2.21 (AR sec. 80 par. .21) of SSARS No. 19 states in part, "If the accountant elects to disclose a description about the reasons his or her independence is impaired, the accountant should ensure that all reasons are included in the description." Therefore, if the accountant's independence is impaired for three reasons (for example, ownership, nonattest services, and family relationships), the accountant may decide that describing all three would make the report too lengthy or too confusing. Consequently, the accountant might decide to stay with the extant language and merely say that he or she is not independent. On the other hand, an accountant who is providing a nonattest service that impairs independence may feel that this information would be beneficial for users to know. Therefore, that accountant may decide to disclose the reason.

Question—Are there any limitations on what the report may say?

Answer—No. ARSC did not prescribe any requirements except that if an election is made to describe, then all the reasons for the impairment must be described. That means that an accountant could, if he or she chooses, write a paragraph three pages long to describe the reasons for the impairment. Although that length certainly isn't expected, ARSC anticipates and expects that some accountants will go into far greater detail than will others.

Question—Assuming an accountant is not independent for two reasons (for example, a family relationship and ownership) does each reason need to be in a separate paragraph?

Answer—No. An accountant may combine the reasons into a single paragraph. For example, assuming the accountant held an ownership interest in the client and the accountant's spouse was the CFO of the company, a description paragraph may be drafted, such as the following:

> I am not independent with respect to XYZ Company as of and for the year ended December 31, 2010, because I am a minority shareholder in XYZ Company and my spouse is an officer of XYZ Company.

Question—Assuming an accountant's independence is impaired because the accountant maintains a number of controls for the client, does each area of internal control need to be listed by the accountant, or may the accountant merely say that his or her independence is impaired because he or she maintained internal controls?

Answer—The provision is flexible and allows an accountant to provide as much detail as he or she feels appropriate in the circumstances. Therefore, the accountant may either state the areas of internal control maintained by the accountant or provide a general description of the reason or give no reason at all and merely say that he or she is not independent. In making this decision, the accountant should make sure that his or her description is not misleading. For example, if the accountant is maintaining only small aspects of internal control over financial reporting, the accountant would not want to describe the reason by saying that he or she is maintaining all controls for the client. Such a statement would be misleading and inaccurate.

Question—May this provision be used for review reports as described in the exposure draft?

Answer—No. Although the exposure draft did include a situation whereby an accountant could design or operate aspects of internal control over financial reporting for a client and also perform a review, this provision was not included in the final standard. Paragraph 3.2 (AR sec. 90 par. .02) of SSARS No. 19 states that the accountant is precluded from performing a review engagement if the accountant's independence is impaired for any reason.

Question—Where should I go if I have additional questions?

Answer—Members having additional questions regarding any of the provisions of SSARS No. 19 should contact the AICPA's accounting and auditing hotline at 1-877-242-7212, through e-mail at aahotline@aicpa.org, or through the following website: www.aicpa.org/Research/TechnicalHotline/Pages/AccountingAuditingTechnicalHelpQA.aspx.

Appendix C—"Changes on Tap for Compilation and Review Standards"

Significant changes to the standards for compilation and review engagements will soon take effect. The AICPA's Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services [SSARS] No. 19, *Compilation and Review Engagements* [(AICPA, *Professional Standards*, vol. 2)], in December [2009]. The standard's effective date is for compilations and reviews of financial statements for periods ending on or after Dec. 15, 2010, with early implementation permitted for the new reporting option for compilation engagements when the accountant's independence is impaired. This article discusses the major changes made by the standard.

Disclosure of Reasons for Lack of Independence

SSARS No. 19 contains the most significant changes to the professional literature for compilation and review engagements since SSARS No. 1, *Compilation and Review of Financial Statements* [(AICPA, *Professional Standards*, vol. 2, AR sec. 100)], was issued in December 1978. For more than 30 years, accountants have been required to disclose in the compilation report if they are not independent but have been prohibited from disclosing the reasons. It was thought that while it was important for users to know whether the accountant was independent, the reasons were not relevant and, in fact, could cause confusion among financial statement users.

However, with the increasing complexity of new accounting standards, many smaller companies are asking for their accountant's assistance in preparing high-quality, reliable financial statements. This assistance, which often includes preparing and posting payroll and payroll reports, maintaining the general ledger, and preparing and recording journal entries, may cause the accountant to impair his or her independence.

As a result, members advised ARSC that third-party users (primarily bankers) wanted to know and understand the reasons for the impairment. What ARSC found out is that many bankers view a technical impairment caused by the accountant's involvement in a client's system of internal control different from an impairment caused by a financial interest or a relationship with the client.

After studying the issue, ARSC developed the new standard so that the accountant has the option, but is not required, to disclose the reasons for an independence impairment in a compilation report. The only caveat is that, if the accountant does decide to disclose the reasons for an independence impairment, *all* reasons must be disclosed. The result will be reports that are more transparent and useful to users of compiled financial statements.

Separating Compilation Guidance From Review Guidance

Another significant change is the separation of the compilation guidance from the review guidance. SSARS No. 19 supersedes AR sections 20, *Defining Professional Requirements in Statements on Standards for Accounting and Review Services*; 50, *Standards for Accounting and Review Services*; and 100, *Compilation and Review of Financial Statements* [(AICPA, *Professional Standards*, vol. 2)]. In the place of those AR sections, the requirements and guidance will be separated into the following sections:

- Framework for Performing and Reporting on Compilation and Review Engagements
- Compilation of Financial Statements
- Review of Financial Statements

This change was in direct response to member comments that they had difficulty in researching the existing literature since the requirements and guidance for compilation and review engagements were presented together. For example, under the pre-SSARS No. 19 standards, an accountant looking to understand the compilation standards would have to sort through both compilation and review guidance because they were presented together. Now, the framework and compilation sections contain all the necessary requirements and guidance. In fact, an accountant who just performs compilations can rip the framework and compilation

sections out of the [*Codification of Statements on Standards for Accounting and Review Services*] and have all of the professional literature that he or she needs.

Clarification of Review Performance Procedures

Another important change was made in the review standards where ARSC felt more guidance around the planning of review procedures was needed. ARSC noted that, to properly plan the nature and extent of review procedures, an accountant cannot merely use a canned list of analytical and inquiry procedures. Rather, an accountant should tailor those procedures, taking into consideration those areas where the accountant believes there are increased risks of misstatements. In that respect, a review engagement is not simply a compilation engagement with a few additional procedures layered on top. A review is an assurance engagement and needs to be planned and performed to obtain a limited level of assurance that the financial statements are free of material misstatement.

A review engagement requires the accumulation of *review evidence* that will provide the accountant with a reasonable basis for obtaining *limited assurance* that there are no material modifications that should be made to the financial statements for the statements to be in accordance with the applicable financial reporting framework.[1] That compares to an auditor's objective, which is to accumulate greater evidence to obtain a reasonable or high level of assurance. Limited assurance can generally be obtained by performing analytical and inquiry procedures whereas an audit contemplates much greater testing through inspection, observation, confirmation, and the examination of source documents.

While SSARS No. 19 does not require the accountant to ordinarily perform procedures beyond analytical procedures and inquiries, it does require the accountant to use professional judgment in determining the specific procedures and tailor those procedures accordingly. A trend analysis may be an appropriate analytical procedure for client A; however, that same analysis may not be appropriate for client B. Additionally, the inquiries that are made to management should be tailored. The accountant should tailor his or her analytical procedures and inquiries to that specific client based on an understanding of the industry, knowledge of the client, and awareness of the risk that the accountant may unknowingly fail to modify his or her review report on financial statements that are materially misstated.

SSARS No. 19 also attempts to clear up the misconception that a review engagement is always limited to analytical procedures and inquiries. If the accountant performs a trend analysis and the results indicate that accounts receivable increased by an unexpected amount and the client's response to the accountant's inquiry does not satisfy the accountant, other procedures should be performed. Such other procedures may include making additional inquiries of client management or personnel, performing additional analyses, or confirming certain receivables. A mistaken assumption is that once an "audit-type" procedure is performed, the accountant is required to perform an audit. Although certain procedures are ordinarily performed in an audit and not in a review, the accountant should perform additional procedures he or she believes necessary to obtain limited assurance that the financial statements are free of material misstatement when the accountant becomes aware that there may be a material misstatement.

Documenting the Understanding With Management

SSARS No. 19 does not change the accountant's requirement to establish an understanding with the client's management regarding the services to be performed with respect to both compilation and review engagements. However, whereas previous standards stated that it is preferable that the understanding be in writing, SSARS No. 19 *requires* that the understanding be in writing. For accountants who have established the understanding verbally with their clients in the past, this will be a change in practice and may necessitate discussions with the client.

Accountants should be aware that SSARS No. 19 leaves open the "engagement" that the written understanding should cover. For example, if the accountant is to compile monthly financial statements and then review the year-end financial statements, the accountant can obtain one engagement letter. That letter would cover

[1] [The *applicable financial reporting framework* is the financial reporting framework adopted by management and, when appropriate, those charged with governance in the preparation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation. They include, for example, accounting principles generally accepted in the United States, the cash basis of accounting, or the income tax basis of accounting.]

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

the entire year. Therefore, SSARS No. 19 does not require a separate engagement letter for the compilation and another letter for the year-end review.

The accountant can even obtain an engagement letter that covers multiple years; however, such documentation is discouraged since the understanding would be less clear as time goes on. It is recommended that the accountant document the understanding with the client's management regarding the services to be performed at least annually.

Enhanced Requirements for Compilation Documentation

Prior to SSARS No. 19, in a compilation engagement, the accountant was only required to document the understanding with the client's management regarding the services to be performed if the accountant availed himself or herself of the nonreporting option provided for compiled financial statements not intended for third-party use and any communications to the appropriate level of management with respect to suspected fraud or illegal acts. SSARS No. 19 expands the documentation requirements for compilation engagements, requiring documentation of the understanding with the client's management regarding the services to be performed for all engagements and any findings or issues that, in the accountant's judgment, are significant. The accountant is still required to document any communications to the appropriate level of management regarding fraud or illegal acts.

A compilation is limited to assisting management in presenting financial information in the form of financial statements without undertaking to obtain or provide any assurance that there are no material modifications that should be made to the financial statements for the statements to conform to the applicable financial reporting framework. In the cleanest of compilations, the accountant simply takes the client's data and puts it in the form of financial statements. However, if during the process, the accountant questions whether some of the amounts in the financial statements may be misstated, then those questions and how they're resolved are likely to be significant issues that should be documented. The documentation could be the issue that the accountant raised and management's response to the accountant's inquiry ....

Review Documentation Changes

The documentation procedures for a review engagement are likewise enhanced and expanded. The accountant is now required to document the establishment of an understanding with the client's management regarding the services to be performed for all review engagements.

The accountant is now also required to document management's responses to inquiries regarding fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount. The accountant is required to document the significant matters covered in his or her inquiry procedures and the responses received. This may be accomplished by using a memorandum, checklist, or other means. Any findings or issues that, in the accountant's judgment, are significant must be documented, such as the results of review procedures that indicate the financial statements could be materially misstated, including actions taken to address such findings, and the basis for the final conclusions reached ....

New Compilation and Review Reports

SSARS No. 19 revises the reporting requirements for compilation and review engagements to make the reports clearer as to management's responsibilities and the accountant's responsibility. In addition to the new compilation reporting option when the accountant's independence is impaired, the compilation reporting requirements require a title that clearly indicates that it is the accountant's compilation report. The accountant may indicate that he or she is independent in the title, if appropriate. Examples of appropriate titles would be "Accountant's Compilation Report" or "Independent Accountant's Compilation Report." The report is also required to be addressed as appropriate in the circumstances.

The revised illustrative compilation report splits the report into three clear paragraphs. The introductory paragraph identifies the entity whose financial statements have been compiled; states that the financial statements have been compiled; identifies the financial statements that have been compiled; specifies the date or period covered by the financial statements; and includes a statement that the accountant has not audited

or reviewed the financial statements and, accordingly, does not express an opinion or provide any assurance about whether the financial statements are in accordance with the applicable financial reporting framework.

The second paragraph states management's responsibility for the financial statements and for internal control over financial reporting. The third paragraph states the accountant's responsibility to conduct the compilation in accordance with SSARSs issued by the AICPA and the objective of the compilation. [Refer to the "New Reports for Compilations and Reviews of Financial Statements Ending on or After December 15, 2010" section of this alert to see a comparison of the pre-SSARS No. 19 compilation report and the new report.]

With respect to the review report, SSARS No. 19 requires that the accountant's review report have a title that clearly indicates that it is the accountant's review report and includes the word "independent." An appropriate title would be "Independent Accountant's Review Report." In addition, the accountant's report should be addressed as required by the circumstances of the engagement.

The illustrated review report is separated into four paragraphs. The introductory paragraph identifies the entity whose financial statements have been reviewed, states that the financial statements have been reviewed, identifies the financial statements that have been reviewed, specifies the date or period covered by the financial statements, and includes a statement that a review consists of primarily applying analytical procedures to management's financial data and making inquiries of company management. It also includes a statement that a review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole, and that, accordingly, the accountant does not express such an opinion.

The second paragraph states management's responsibility for the financial statements and for internal control over financial reporting. The third paragraph states that the accountant's responsibility is to conduct the review in accordance with SSARSs issued by the AICPA, that those standards require the accountant to perform the procedures to obtain limited assurance that there are no material modifications that should be made to the financial statements, and that the accountant believes that the results of his or her procedures provide a reasonable basis for his or her report.

The fourth paragraph states that, based upon his or her review, the accountant is not aware of any material modifications that should be made to the financial statements for them to be in conformity with the applicable financial reporting framework, other than those modifications, if any, indicated in the report. [Refer to the "New Reports for Compilations and Reviews of Financial Statements Ending on or After December 15, 2010" section of this alert to see a comparison of the pre-SSARS No. 19 review report and the new report.]

Changes From April 2009 Exposure Draft

In April 2009, ARSC exposed for public comment a trio of proposed standards that eventually became SSARS No. 19. During the comment period, the committee received 169 comment letters.

SSARS No. 19 differs from the exposure draft in two major ways. First, ARSC decided to retain the concept of *limited assurance* rather than *moderate assurance* as proposed in the exposure draft. ARSC had proposed using the term *moderate assurance* to describe the level of assurance that the accountant aims to obtain in a review engagement in order to harmonize with the terminology used in the international review standards. However, after the exposure draft was issued, the International Audit and Assurance Standards Board began a project to revise the international review standards. ARSC determined that it would be inappropriate to conform to a document currently under revision and, accordingly, tabled the proposed change.

The other major difference is that the proposed nonindependent review is not part of the final standard. ARSC received a number of comments on this proposal, both for and against. As a result of the great interest in this topic, ARSC decided to defer this issue so it could hold additional meetings with key stakeholders. These additional meetings will be used to further discuss with stakeholders the issues that many smaller firm accountants face in trying to serve their small business clients.

At issue is whether performing a nonattest service to help smaller businesses establish or maintain aspects of their internal control over financial reporting, the purpose of which is to improve the reliability of the client's financial statements, impairs an accountant's independence. ARSC will revisit the topic during its public meetings in 2010 but remains committed to allowing practitioners to review financial statements when

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

they also perform services that are intended to assist the client in preparing reliable, high-quality financial statements.

Carolyn H. McNerney (cmcnerney@ssandg.com) is the codirector of the SS&G Financial Services Inc. assurance services department and is chairperson of the ARSC. Charles E. Landes (clandes@aicpa.org) is vice president—Professional Standards and Services for the AICPA. Michael P. Glynn (mglynn@aicpa.org) is a technical manager for the AICPA Audit and Attest Standards team.

Appendix D—"The Accountant's Responsibilities for Subsequent Events in Compilation and Review Engagements"

Inquiry—FASB *Accounting Standards Codification* (ASC) 855-10-50-1 states, "An entity shall disclose the date through which subsequent events have been evaluated, as well as whether that date is the date the financial statements were issued or the date the financial statements were available to be issued." How does the entity's responsibility to disclose the date through which subsequent events have been evaluated affect the accountant's responsibilities for subsequent events in a compilation or review engagement?

Reply—FASB ASC 855, *Subsequent Events*, does not change the accountant's responsibilities under AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), which states that an accountant performing a review engagement should inquire of members of management who have responsibility for financial and accounting matters concerning events subsequent to the date of the financial statements that could have a material effect on the financial statements. In a compilation engagement, the accountant does not have any responsibility with respect to subsequent events unless evidence or information comes to the accountant's attention that a subsequent event that has a material effect on the financial statements has occurred. When such evidence or information comes to an accountant's attention during a compilation or review engagement, the accountant should request that management consider the possible effects on the financial statements, including the adequacy of any related disclosure. If the accountant determines that a subsequent event is not appropriately accounted for in the financial statements or disclosed in the notes, he or she should follow the guidance in paragraphs .56–.58 of AR section 100 regarding departures from generally accepted accounting principles.

Because the accountant's compilation or review report should be dated as of the completion of the compilation or review procedures, the date of the accountant's compilation or review report can never be earlier than management's subsequent event note date.

In a review engagement, because the accountant is concerned with events occurring through the date of the review report that may require adjustment to, or disclosure in, the financial statements, the specific management representations relating to information concerning subsequent events should be made as of the date of the accountant's review report.

In most cases, the date that management discloses as the date through which they have evaluated subsequent events (in the notes to the financial statements and, in a review engagement, in the management representation letter) will be the same date as the accountant's compilation or review report. In order to coordinate that these dates (the note date, the representation letter date [in a review engagement], and the accountant's compilation or review report date) are the same, the accountant may want to discuss these dating requirements with management in advance of beginning the compilation or review engagement. The accountant also may want to include, in the accountant's understanding with the client regarding the services to be performed (engagement letter), that management will not date the subsequent event note earlier than the date of management's representations (in a review engagement) and the date of the accountant's compilation or review report.

Appendix E—"The Accountant's Reporting Responsibility With Respect to Subsequent Discovery of Facts Existing at the Date of the Report"

Inquiry—Paragraphs .77–.82 of AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), provide requirements and guidance when the accountant becomes aware that facts may have existed at the date of the accountant's compilation or review report (or the date of submission of compiled financial statements not intended for third party use in which the accountant does not report) that might have caused him or her to believe that information supplied by the entity was incorrect, incomplete, or otherwise unsatisfactory had the accountant then been aware of such facts.

Paragraph .79(a) states that when the accountant has concluded that action should be taken to prevent further use of the accountant's report or the financial statements, and the effect on the accountant's report or the financial statements of the subsequently discovered information can promptly be determined,

> disclosure should consist of issuing, as soon as practicable, revised financial statements and, where applicable, the accountant's report. The reasons for the revision usually should be described in a note to the financial statements and, where applicable, referred to in the accountant's report. Generally, only the most recently-issued compiled or reviewed financial statements would need to be revised, even though the revision resulted from events that had occurred in prior years.

What does the term where applicable refer to in paragraph .79(a)?

Reply—The use of the term where applicable refers to a situation in which the accountant has not reported on compiled financial statements not intended for third party use. In the case of a review or a compilation in which the accountant has issued a report, then a revised accountant's report should be issued and the reason for the financial statement's revision usually should be described in the accountant's revised report as well as in a note to the revised financial statements.

Health Care Industry Developments—2010/11

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert replaces *Health Care Industry Developments—2009*.

This Audit Risk Alert is intended to provide auditors of financial statements of health care entities with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform. This Audit Risk Alert also can be used by an entity's internal management to address areas of audit concern.

This publication is an *other auditing publication*, as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Recognition

The AICPA gratefully appreciates the invaluable assistance Anne Mundinger provided in creating this publication.

The AICPA gratefully acknowledges the following individuals for their essential contributions in creating this publication:

Mark Albrecht
Brent Beaulieau
Robert D. Beard
Mark Dietrich
Paul Drogosch
Gordon Edwards
Norman Mosrie
Marci Thomas

Feedback

The Audit Risk Alert *Health Care Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert also would be appreciated. You may e-mail these comments to A&A Publications@aicpa.org.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your health care industry audits and also can be used by an entity's internal management. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool to help you identify the significant risks that may result in the material

misstatement of financial statements and delivers information about emerging practice issues and current accounting, auditing, and regulatory developments. You should refer to the full text of accounting and auditing pronouncements, as well as the full text of any rules or publications that are discussed in this alert. Additionally, the Audit Risk Alert *General Accounting and Auditing Developments—2010/11* (product no. 0223310) explains important issues that affect all entities in all industries in the current economic climate.

.02 It is essential that the auditor understand the meaning of audit risk and the interaction of audit risk with the objective of obtaining sufficient appropriate audit evidence. In AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1), *audit risk* is broadly defined as the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. Further, paragraph .04 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), explains that the auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures.

Economic and Industry Developments

The Current Economy

.03 When planning and performing audit engagements, an auditor should understand both the general current economy and the specific economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on an entity's business and, therefore, its financial statements.

.04 The year 2010 may be the beginning of a wave of economic recovery. Although many key indicators, such as unemployment, are still uncomfortably high, 2010 began with rising commodity prices, a jump in new factory orders that caused the largest expansion in production in 3 years, and an increase in U.S. auto sales that approached prerecessionary levels. Further, after experiencing a considerable decline in the stock market through March 2009, the markets have rebounded substantially. In March 2009, the S&P 500 and the Dow Jones Industrial Average reached their 12-year lows, and NASDAQ closed at its lowest point since October 2002. By March 2010, only a year later, all 3 had increased in value by at least 59 percent from the previous year's lows. However, all 3 remained relatively unmoved 6 months later, in late September 2010. This exhibits the continuing uncertainty in the markets due to the varying economic indicators, the financial reform regulatory changes, and Europe's economy, among other reasons.

Key Economic Indicators

.05 These key economic indicators further illustrate the severity of the recent recessionary period experienced by the United States.

.06 The gross domestic product (GDP) measures output of goods and services by labor and property within the United States. It increases as the economy grows or decreases as it slows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 1.6 percent in the second quarter of 2010 (second estimate), 3.7 percent in the first quarter of 2010, and 5.6 percent in the fourth quarter of 2009. This data indicates a turnaround in the economy because in the fourth quarter of 2008 and the first quarter of 2009, real GDP decreased 6.3 percent and 5.5 percent, respectively. Further, in June 2010, the Treasury reported that banks had repaid about 75 percent of the bailout money they received through the Troubled Asset Relief Program, and that taxpayers made $21 billion on the investment. However, other bailouts are not yet repaid, and they may yield losses to taxpayers.

.07 From August 2009 to August 2010, the unemployment rate fluctuated between 9.5 percent and 10.1 percent. An unemployment rate of 10.0 percent represents approximately 15.3 million people. The annual

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

average rate of unemployment increased from 4.6 percent in 2007 to 9.3 percent in 2009. However, through August 2010, the rate has remained below 10.0 percent.

.08 The Federal Reserve decreased the target for the federal funds rate more than 5.0 percentage points to less than 0.25 percent, where it remained through September 2010. The Federal Reserve described the current economic recovery in its September 21, 2010, press release as follows:

- Household spending is increasing gradually but remains constrained by high unemployment, modest income growth, lower housing wealth, and tight credit.
- Business spending on equipment and software is rising, though less rapidly than earlier in the year, and investment in nonresidential structures continues to be weak.
- Employers remain reluctant to add to payrolls.
- Housing starts are at a depressed level.
- Bank lending has continued to contract, but at a reduced rate in recent months.
- The pace of economic recovery is likely to be modest in the near term.

.09 The Federal Reserve also noted in the press release that "economic conditions, including low rates of resource utilization, subdued inflation trends, and stable inflation expectations, are likely to warrant exceptionally low levels of the federal funds rate for an extended period." The Federal Reserve will keep constant their holdings of securities by reinvesting principal payments from mortgage-backed securities in longer-term Treasury securities; additionally, as current holdings of Treasury securities mature, the proceeds will be reinvested in Treasury securities. Since the beginning of the financial market turmoil in August 2007, the Federal Reserve's balance sheet has grown from $869 billion to $2.3 trillion. Further, the Federal Reserve will continue to monitor the economy and employ other policy tools as necessary.

Industry Trends and Conditions

The State of Health Care Entities

.10 A survey conducted by the American Hospital Association (AHA) in March and April 2010 indicated that hospitals are continuing to feel the lingering effects of the economic recession. The survey of 572 nonfederal, short-term acute care hospitals shows the following:

- Eighty-seven percent reported increased bad debt and charity care as a percentage of total gross revenue, and 65 percent reported an increased percentage of patients covered by Medicaid, Children's Health Insurance Program, or other programs.
- Seventy-two percent reported depressed numbers of elective procedures, and 70 percent reported depressed overall patient volumes.
- Seventy-four percent reported reduced operating margins, and 50 percent reported reduced nonoperating income.
- In 2009, in an effort to weather the economic storm, 76 percent had cut administrative costs, 73 percent delayed capital investments, and 53 percent reduced staff. In 2010, 98 percent have not restored services or programs, 89 percent have not added back staff or increased hours, and 67 percent have not started or continued capital projects.

.11 More information about the AHA and the full survey results are available at www.aha.org.

Medical Liability Reform

.12 Hospitals and physicians continue to deal with increasing costs for professional liability insurance. Unaffordable insurance costs are affecting access to care as physicians leave states with high costs or stop providing services that expose them to higher risks of lawsuits. Obstetrics, neurosurgery, and emergency

services are some of the areas of highest concern. Physicians concerned with increasing risk often practice "defensive medicine," which is the practice of providing extra care to minimize lawsuits. The Patient Protection and Affordable Care Act of 2010 (PPACA) appropriated $50 million for demonstration projects that test models aimed at reducing frivolous lawsuits and liability premiums. Medical liability reform is expected to reduce federal mandatory spending on health programs by $41 billion dollars over the next 10 years. Due to the fact that this is generally an area of significant estimates, entities and their auditors need to understand and test liability claims estimates. Assumptions and judgments employed by management should be carefully reviewed and should reflect current environment issues. Auditors need to consider all available remedies for supporting estimates, including the entity's historical experience, attorney confirmations, and available correspondence.

Physician Practice Acquisitions

.13 Industry analysts expect to see a rise in merger and acquisition activity due to the pressures on health care payers and providers brought about by the PPACA. Faced with increased patient volumes at lower levels of reimbursement, more and more physicians are aligning their practices with a hospital or health system.

.14 A major trend exists in cardiology, medical oncology, and many other areas of physician practice acquisitions by hospitals driven by physicians facing reimbursement cuts, as well as difficulty in recruiting young physicians. In many of these transactions, after identification of all intangible assets, a significant amount of goodwill is often recorded by the acquirer. Recording goodwill from such transactions may have a high probability of impairment when the intangible asset values of the practice are based solely on the cost approach to valuation. Acquiring entities and their auditors should carefully review the methodology used to value the physician practices being acquired. Forecasts used to support the valuation assessments need to be reviewed carefully.

.15 New accounting guidance requires not-for-profit (NFP) organizations to test goodwill for impairment at the beginning of the year and at least once annually. Entities have a six month initial application period to complete the first step of a transitional impairment. Evaluation and impairment resulting from this testing is recorded "below the line" as the effect of a change in accounting principle. The transitional evaluation must be completed by the end of the fiscal year of adoption.

.16 Fee-for-service NFPs with previously recognized goodwill will need to

a. establish reporting units based on the entity's internal reporting structure.

b. assign all previously recognized goodwill in each reporting unit as of the beginning of the fiscal year to a transitional impairment evaluation.

c. subject the previously recognized goodwill in each reporting unit as of the beginning of the fiscal year to a transitional impairment evaluation.

d. if the carrying amount of a reporting unit's net assets, including goodwill, exceeds the fair value of that reporting unit, complete the second step of the transitional goodwill impairment test as soon as possible but no later than the end of the fiscal year.

e. reassess useful lives of any previously recognized intangible assets, other than goodwill, and adjust the remaining amortization periods as necessary. The reassessment should be completed before the end of the first interim period of the fiscal year in which the statement is initially applied. Intangible assets deemed to have indefinite useful lives should be tested, and any resulting impairment should be accounted for in the same manner as the procedures outlined for goodwill

.17 In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-07, *Not-for-Profit Entities (Topic 958): Not-for-Profit Entities: Mergers and Acquisitions*, which codifies FASB Statement No. 164, *Not-for-Profit Entities: Mergers and Acquisitions—Including an amendment of FASB Statement No. 142*, primarily in FASB *Accounting Standards Codification* (ASC) 958-805 and FASB

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

ASC 958-810. Readers are encouraged to review the full text of FASB Statement No. 164 and ASU No. 2010-07, which are available on the FASB website at www.fasb.org.

Provider Taxes

.18 States have attempted to increase the amount of federal matching funds for which they are eligible by increasing the amount of medical assistance they provide. In order to pay for the increased medical assistance, some states have imposed a tax on health care entities, sought donations or other voluntary payments from them, or both. As a result, the states have been able to generate additional federal matching funds without expending additional state funds.

.19 The accounting for these types of programs is dependent on the individual facts and circumstances. For example, if there is a guarantee that specific monies given to the state by the health care entity will be returned to the entity from the state, those amounts should be recorded as receivables. In addition, if the health care entity has met all the requirements to be legally entitled to additional funds from the state, the revenue or gain should be recognized.

.20 However, if the monies go into a pool with other contributions that are then disbursed based on factors over which the health care entity has little or no control, the payments should be recognized as an expense. Any subsequent reimbursements would be recognized as revenue or gain when the provider is entitled to them and payment is assured.

.21 Auditors should be alert to these issues, and management should be careful to avoid delayed recognition of expenses or improperly recognizing contingent gains.

Medical Resident Federal Insurance Contributions Act Refund Claims

.22 In March 2010, the IRS made an administrative determination to accept the position that medical residents are excepted from Federal Insurance Contributions Act (FICA) taxes for tax periods ending before April 1, 2005, when new IRS regulations went into effect. Although the period of limitations for filing a claim for tax periods before April 1, 2005, has expired, employers (typically hospitals and medical schools) and individual taxpayers (medical residents) began filing FICA refund claims in the 1990s, based on their position that medical residents are students eligible for the FICA tax exception under Internal Revenue Code (IRC) Section 3121(b)(10). This is referred to as the student exception and may apply to a student at a school, college, or university who is also an employee of that school, college, or university. The employer's FICA refund claims were for both the employer share and the employee share of the FICA tax. In some cases, individual medical residents filed their own claim for the employee share of the FICA tax. The IRS held the claims in suspense because there was a dispute about whether the student FICA exception applied.

Legislative and Regulatory Developments

The Health Care and Education Reconciliation Act of 2010 and the PPACA

.23 In March 2010, the president signed into law a sweeping overhaul of the health care system. Almost everyone in the United States will be affected by these changes—individuals, insurance companies, health care providers, and employers. The three primary goals of the reform are to expand coverage to those without health insurance, reform the delivery system of benefits to improve quality, and decrease the costs of providing health care. The various provisions of the reform will become effective over time, through 2020. The new laws contain many changes for employers to consider for financial reporting purposes, in addition to many new tax rules to help offset the overall cost of the reform.

.24 The complete changes are contained in two acts. The Health Care and Education Reconciliation Act of 2010 was signed on March 30 and is a reconciliation bill that amends the PPACA signed into law by the president one week earlier. In April, the Securities and Exchange Commission (SEC) issued a staff announcement, *Accounting for the Health Care and Education Reconciliation Act of 2010 and the Patient Protection and*

Affordable Care Act, to address questions that have arisen about the effect, if any, that the different signing dates might have on accounting for the two acts. This timing difference, related solely to the signing dates, should not have an impact on a majority of registrants because the acts were both signed within a relatively short time period, which for the vast majority of entities, falls into the same reporting period. However, there may be a limited number of registrants with a period-end that falls between the signing dates for which the timing difference could raise questions about whether the different signing dates have an accounting impact.

.25 After consultation with FASB staff, the Office of the Chief Accountant would not object to a view that the two acts should be considered together for accounting purposes. That is, in this specific fact pattern, the SEC staff would not object to a registrant incorporating the effects of the Health Care and Education Reconciliation Act of 2010 when accounting for the PPACA. This view is based in part on the SEC staff's understanding that the two acts, when taken together, represent the current health care reform as passed by Congress and signed by the president. The SEC staff does not believe that it would be appropriate to analogize to this view in any other fact patterns.

Significant Accounting and Tax Considerations

.26 FASB ASC 740-10-30-2 states that the following basic requirements are applied to the measurement of current and deferred income taxes at the date of the financial statements:

- The measurement of current and deferred tax liabilities and assets is based on provisions of the enacted tax law; the effects of future changes in tax laws or rates are not anticipated.
- The measurement of deferred tax assets is reduced, if necessary, by the amount of any tax benefits that, based on available evidence, are not expected to be realized.

.27 FASB ASC 715-60-35-102 further explains that benefit coverage for medical claims by governmental programs or other providers of health care benefits should be assumed to continue as provided by the present law and other providers, pursuant to their present plans. Consistent with FASB ASC guidance, presently enacted changes in the law or amendments of the plans of other health care providers that take effect in future periods and that will affect the future level of their benefit coverage should be considered in current period measurements for benefits expected to be provided in those future periods. Future changes in laws concerning medical costs covered by governmental programs and future changes in the plans of other providers should not be anticipated.

.28 The two primary accounting considerations resulting from this reform are the effects of the tax law changes on deferred income tax balances and other postretirement health benefits. One of the most significant changes relates to the government subsidy for providing qualifying prescription drug coverage to Medicare-eligible retirees becoming an offset for prescription drug income tax deductions. Specifically, because entities will need to reduce their income tax deduction for providing prescription drug coverage by the subsidy received, they currently need to record a charge to earnings to write off a portion of their deferred tax assets related to postretirement health care obligations. Such deferred tax assets were based on the gross liability amount. Because the tax deductible prescription drug costs liability will be reduced by the subsidy, the deferred tax asset will be computed net of the subsidy, resulting in a lower deferred tax asset. The federal subsidy will not reduce the tax deductions until 2013. Even though the changes may not be effective until future periods, the effects are accounted for in the period that includes the enactment date. FASB ASC 715-60 discusses accounting and reporting guidance for other postretirement plans, including the Medicare prescription drug plan. Many public entities have already posted large noncash charges in early 2010 related to the nondeductibility of the subsidy.

.29 Some of the other provisions of the reform that may affect an entity's tax position include the nondeductible pharmaceuticals fee, the medical device excise tax, and the therapeutic discovery project tax credit, which will have an effect on the pharmaceutical and medical device industries. Additionally, employer group health plans may not impose lifetime limits and can only impose "restricted" annual limits beginning with the 2011 plan year (for calendar year plans); no annual limits would be permitted beginning in 2014. Because these health benefits can no longer be limited, entities may need to increase accruals for future

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

medical obligations. Many small businesses and tax-exempt organizations that provide health insurance coverage to their employees will now qualify for a special tax credit that is designed to encourage small employers to offer health care coverage for the first time or maintain the coverage they have. Lastly, under the new reform, a 40 percent penalty will apply to tax understatements attributable to transactions lacking economic substance (20 percent with adequate disclosure) or failing to meet the requirements of any similar rule of law. A transaction is treated as having economic substance only if the transaction changes in a meaningful way (apart from federal income tax effects) the taxpayer's economic position, and the taxpayer has a substantial purpose (apart from federal income tax effects) for entering into the transaction.

.30 Additional items in the reform that may have favorable consequences for hospitals would include extending coverage for dependent children up to 26 years old, preventing health insurers from excluding children with preexisting conditions, providing access to health coverage through an interim high-risk pool for uninsured adults with preexisting conditions (which will be eliminated in 2014 when the state exchanges will become operational), and prohibiting the termination of existing coverage. Also, beginning in 2014, health insurers will be prohibited from excluding coverage for adults based on preexisting conditions, will have limits imposed on premium ratings, and must guarantee the issuance of coverage for anyone who seeks it.

.31 Other provisions include the following:

- Five-year demonstration grants provided to states to develop, implement, and evaluate alternatives to current tort litigations
- Ten percent Medicare bonus payments for primary care physicians
- Increased Medicaid payments to primary care physicians
- Increased federal oversight to screen procedures provided by providers to reduce fraud
- Reduced annual market basket updates for inpatient hospital, home health, skilled nursing facility, hospice, and other Medicare providers, adjusted for productivity
- Reduced reimbursement for Medicare advantage plans
- Medical loss ratio reports and rebates provided by health plan providers
- Grants provided to states to review and approve premium increases, which require plans to justify increases

.32 Entities will need to fully review the financial impact of the new law and consider disclosing possible future effects.

.33 The full text of these acts can be found at http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_laws&docid=f:publ152.111.pdf and http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_laws&docid=f:publ148.111.pdf.

The Dodd-Frank Wall Street Reform and Consumer Protection Act

.34 On July 21, 2010, the president signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) into law. The Dodd-Frank Act was approved by the House on June 30, before narrowly clearing the Senate on July 15. The Dodd-Frank Act will create new regulations for companies that extend credit to customers, exempt small public companies from Section 404(b) of the Sarbanes-Oxley Act of 2002 (SOX), make auditors of broker-dealers subject to Public Company Accounting Oversight Board (PCAOB) oversight, and change the registration requirements for investment advisers.

.35 Other requirements and additional information can be found in the full text of this act, which can be found at www.gpo.gov/fdsys/pkg/BILLS-111hr4173ENR/pdf/BILLS-111hr4173ENR.pdf. The AICPA is also following any developments related to the Dodd-Frank Act on our website at www.aicpa.org under "Advocacy—Federal Issues."

PCAOB Constitutionality

.36 On June 28, 2010, the Supreme Court ruled in the lawsuit challenging the constitutionality of the PCAOB. When the PCAOB was set up under SOX, its board members were appointed by the SEC and could be removed only for cause. The Supreme Court ruled in a 5-4 vote that although the manner in which the PCAOB was constituted was constitutionally invalid, SOX itself was not invalidated. Rather, the Supreme Court severed from the rest of SOX the provisions relating to the removal of PCAOB board members. The consequence of the Supreme Court's decision is that PCAOB board members will now be removable by the SEC at will, instead of only for good cause. Essentially, this decision has no material impact on the workings of the PCAOB, and all PCAOB programs will continue to operate as usual, including registration, enforcement, and standard-setting activities.

Municipal Securities Rulemaking Board Activity

.37 The Municipal Securities Rulemaking Board (MSRB) is a self-regulatory organization created by Congress in 1975 to protect investors and the public interest by developing rules for brokers, dealers, and municipal securities dealers (dealers) engaged in municipal securities activities. Under Rule 15c2-12(b)(5) of the Securities Exchange Act of 1934, an underwriter for a primary offering of municipal securities subject to the rule is prohibited from underwriting the offering unless the underwriter has determined that the issuer or an obligated person for whom financial information or operating data is presented in the final official statement has undertaken in writing to provide certain items of information to the MSRB. Rule 15c2-12(b)(5) provides that such items include (*a*) annual financial information concerning obligated persons; (*b*) audited financial statements for obligated persons if available and if not included in the annual financial information; (*c*) notices of certain events, if material; and (*d*) notices of failures to provide annual financial information on or before the date specified in the written undertaking.

.38 In 2009, the MSRB was designated by the SEC as the sole repository of these primary market and continuing disclosure documents. The MSRB's electronic repository and public website for these documents is known as the Electronic Municipal Market Access (EMMA) system.

Pending Proposal Regarding Continuing Disclosures

.39 In December 2009, the MSRB filed with the SEC an amendment to its pending July 2009 filing relating to additional voluntary submissions by issuers and obligated persons to the MSRB's EMMA system.

.40 The proposals would permit issuers to submit preliminary official statements and other primary market documents to EMMA. They would also permit issuers and obligated persons to voluntarily submit information relating to the preparation and submission of audited financial statements and annual financial information and to post links to other disclosure information (see MSRB Notice 2009-63). The MSRB has requested an effective date for the revised proposal to be announced by the MSRB in a notice published on the MSRB website at www.emma.msrb.org. This effective date shall be no later than 9 months after SEC approval of the revised proposal and shall be announced no later than 60 days prior to the effective date.

.41 The proposed December amendment, which revised the July proposal based on comments received by the SEC, would make the following key revisions to the original proposal.

Voluntary Annual Filing Undertaking

.42 The overall purpose of this undertaking is to assist investors and other market participants in understanding when the annual financial information required to be filed by issuers or obligated persons is expected to be available in the future. The original proposal would have consisted of a voluntary undertaking, either at the time of a primary offering or at any time thereafter, that the issuer or obligated person, as appropriate, would submit to EMMA of its annual financial information by no later than 120 calendar days after the end of the fiscal year. In light of the comments received on the July proposal, the MSRB modified the proposal to provide for a transitional option for issuers and obligated persons that would provide them

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

the ability to indicate their undertaking to submit to EMMA the annual financial information by no later than 150 calendar days after the end of their fiscal year. However, on and after January 1, 2014, the transitional 150 day undertaking option would no longer be available for selection. An issuer or obligated person that wishes to could make the 120-day undertaking immediately upon the effectiveness of the revised proposal. The MSRB has stated that it contemplates that the making of a voluntary annual filing undertaking through EMMA by an issuer or obligated person would reflect the bona fide intent of the issuer or obligated person to perform as undertaken but would not, by itself, necessarily create a contractual obligation of such issuer or obligated person.

Voluntary Generally Accepted Accounting Principles Undertaking

.43 The overall purpose of this undertaking is to assist investors and other market participants in understanding how audited financial statements were prepared. The fact that an issuer or obligated person has entered into a voluntary generally accepted accounting principles (GAAP) undertaking and the standard under which audited financial statements are to be prepared would be prominently disclosed on the EMMA Web portal as a distinctive characteristic of the securities to which such undertaking applies. The voluntary GAAP undertaking would consist of a voluntary undertaking by an issuer or obligated person, either at the time of a primary offering or at any time thereafter, that the issuer or obligated person will prepare its audited financial statements in accordance with GAAP. In light of the comments received on the original proposal, the MSRB clarified that state or local governments or any other entities to which Governmental Accounting Standards Board (GASB) standards are applicable would apply GAAP as established by GASB and that any other entities to which FASB standards are applicable would apply GAAP as established by FASB.

Centers for Medicare and Medicaid Services Activity

Medicare and Medicaid Electronic Health Record Incentive Programs

.44 The nation's health care system is undergoing a transformation in an effort to improve quality, safety, and efficiency of care. To help facilitate this vision, the Health Information Technology for Economic and Clinical Health Act (HITECH Act) established programs under Medicare and Medicaid to provide incentive payments for the meaningful use of certified electronic health record (EHR) technology.

.45 The HITECH Act is expected to provide $20 billion to be invested in health IT infrastructure to encourage doctors and hospitals to use health IT to electronically exchange patients' health information, while saving $10 billion and generating additional savings throughout the health sector through improvements in quality of care and coordination and through reductions in medical errors and duplicative care.

.46 The Medicare and Medicaid EHR incentive programs will provide incentive payments to eligible professionals and eligible hospitals as they adopt, implement, upgrade, or demonstrate meaningful use of certified EHR technology. The incentive payments begin in 2011. For further information, visit www.cms.gov/EHRIncentivePrograms/.

ePrescribing Incentive Program

.47 The Centers for Medicare & Medicaid Services (CMS) offers eligible providers incentive payments when they use an electronic prescribing (e-prescribing) system to prescribe for Medicare patients. The CMS Electronic Prescribing Incentive Program was authorized by the Medicare Improvements for Patients and Providers Act of 2008, which became law on July 15, 2008. For 2009 and 2010, e-prescribing incentive amounts will be 2 percent of a provider's total estimated allowed charges for covered professional services during the reporting period. The incentive amount reduces to 1 percent in 2011 and finally to 0.5 percent in 2013.

.48 Changes to the program for 2010 include the following:

- Skilled nursing facility and home care are now eligible services.

- Eligible professionals need only report 25 separate electronic prescribing events during the reporting period.
- Eligible professionals will only report one G-code (G8553) that reflects at least one prescription created during the encounter was generated and transmitted electronically using a qualified electronic prescribing system.
- Data may be reported on the 2010 e-prescribing measure through claims, a qualified registry, or a qualified EHR product.

.49 Group practice changes for 2010 include the following:

- Group practices (200 or more eligible professionals) must be selected to participate in the Physician Quality Reporting Initiative (PQRI) group practice reporting option.
- Group practices must report the 2010 e-prescribing measure at least two and one-half times during the reporting period to be considered successful e-prescribers.
- Group practices may choose to report the e-prescribing measure through claims, a qualified registry, or a qualified EHR product.
- Group practices interested in participating in the 2010 PQRI through the group practice reporting option are required to submit a self-nomination letter to the CMS.

.50 For further information visit www.cms.gov.

IRS Activity

The Department of the Treasury and the IRS Issue a Priority Guidance Plan for 2010

.51 Fiscal year 2010 priorities are addressed through a flexible and interdisciplinary array of new tools that focus on enforcement of the tax law and improving customer service. Priorities include the following:

- Issuing guidance on program-related investments of private foundations
- Developing regulations on new excise taxes for donor-advised funds
- Issuing guidance for deferred compensation plans for NFPs
- A further focus on transparency and governance by tax-exempt entities
- Continued implementation of the online compliance guide, known as a *cyber assistant* (which is used to generate IRS Form 1023, "Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code," at a reduced user fee)
- Developing regulations regarding the extent to which a limited partner will be considered at risk with respect to liabilities of a partnership, including situations in which a limited partner may be obligated to contribute additional capital to the partnership in the future
- Issuing tax guidance regarding third-party payer issues and reporting agents

.52 Additional information on these and other topics is available at www.irs.gov/pub/irs-utl/2009_-_2010_priority_guidance_plan_initial.pdf.

New Health Insurance Tax Credit for Exempt Organizations

.53 Effective for tax year 2010, many small businesses and tax-exempt organizations that provide health insurance coverage to their employees now qualify for a special tax credit. Included in the health care reform legislation, the PPACA is a credit designed to encourage small employers to offer health care coverage for the first time or maintain their current coverage.

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.54 To be eligible for the credit, a qualifying employer must cover at least 50 percent of the cost of health care coverage for some of its workers, based on the rate for single person coverage. A qualifying employer also must have less than the equivalent of 25 full-time workers (for example, an employer with fewer than 50 half-time workers may be eligible) and must pay average annual wages below $50,000 per full-time equivalent position.

.55 The credit is worth up to 35 percent of a small business's premium costs (25 percent for NFPs) in 2010. On January 1, 2014, this rate increases to 50 percent (35 percent for NFPs) but is subject to a phaseout. The credit phases out for entities with average wages between $25,000 and $50,000 and for entities with the equivalent of between 10 and 25 full-time workers.

.56 In September 2010, the IRS released a draft version of Form 8941, "Credit for Small Employer Health Insurance Premiums," which small businesses and tax-exempt organizations will use to calculate the small business health care tax credit when they file income tax returns next year. Small businesses will include the amount of the credit as part of the general business credit on their return, and tax-exempt organizations will claim the credit on a revised Form 990-T, "Exempt Organization Business Income Tax Return (and proxy tax under Section 6033(e))." For further information, visit www.irs.gov.

New Employment Tax Credits for Exempt Organizations

.57 Two new tax benefits are now available to nongovernmental employers hiring workers who were previously unemployed or only working part time. These provisions are part of the Hiring Incentives to Restore Employment Act that was enacted into law in March 2010.

.58 Employers who hire unemployed workers after February 3, 2010, and before January 1, 2011, may qualify for a 6.2 percent payroll tax incentive, in effect exempting them from their share of Social Security taxes on wages paid to these workers after March 18, 2010. This reduced tax withholding will have no effect on the employee's future Social Security benefits, and employers would still need to withhold the employee's 6.2 percent share of Social Security taxes, as well as income taxes. The employer's and employee's share of Medicare taxes also would still apply to these wages.

.59 In addition, for each worker retained for at least 1 year, employers may claim an additional general business tax credit up to $1,000 per worker when they file their 2011 income tax returns.

.60 New hires filling existing positions also qualify but only if the workers they are replacing left voluntarily or for cause. Family members and other relatives do not qualify.

.61 In addition, the new law requires that the employer get a statement from each eligible new hire certifying that he or she was unemployed during the 60 days before beginning work or, alternatively, worked less than a total of 40 hours for someone else during the 60-day period. The IRS currently is developing a form that employees can use to make the required statement.

.62 Employers claim the payroll tax benefit on the federal employment tax return they file, usually quarterly, with the IRS. Eligible employers will be able to claim the new tax incentive on their revised employment tax form for the second quarter of 2010. Revised forms and further details on these two new tax provisions will be posted on www.irs.gov.

Internet-Based Workshop for Exempt Entities

.63 The IRS has an Internet-based version of its popular "Exempt Organizations Workshop" covering tax compliance issues confronted by small and midsized tax-exempt entities.

.64 The free online workshop, "Stay Exempt—Tax Basics for Exempt Organizations," consists of the following five interactive modules on tax compliance topics for exempt entities:

- *Tax-Exempt Status.* How can you keep your 501(c)(3) exempt?

- *Unrelated Business Income.* Does your entity generate taxable income?
- *Employment Issues.* How should you treat your workers for tax purposes?
- *Form 990.* Would you like to file an error-free return?
- *Required Disclosures.* To whom do you have to show your records?

.65 Users can access this new training program at www.stayexempt.org. Users can complete the modules in any order and repeat them as many times as they like. The online training website does not require registration, and its visitors will remain anonymous. The workshop can be found at www.stayexempt.org/Virtual-Workshop.aspx.

Resource Materials—Compliance Initiatives for Tax-Exempt Entities

.66 The Exempt Organizations Division of the IRS has made materials available that were used in, or which discuss, its compliance initiatives, including limited liability company projects, community foundations, bond compliance, hospitals, and executive compensation. You can find this material at www.irs.gov/charities/article/0,,id=162493,00.html.

Listing of Published Guidance—2010

.67 Readers should be aware that the IRS website contains a digest of published guidance for tax-exempt entities issued in 2010 at www.irs.gov/charities/content/0,,id=202419,00.html. The published guidance includes treasury regulations, revenue rulings, revenue procedures and notices, and announcements of recently published issues of interest to tax-exempt entities.

.68 The IRS website also contains an archive that presents digests of IRS-published guidance of interest to tax-exempt entities for the years 1954–2009. The archived guidance can be found at www.irs.gov/charities/article/0,,id=151053,00.html. Additionally, the IRS has a useful tool for NFPs to assist them in maintaining their tax-exempt status through compliance with IRS requirements. The publication *Compliance Guide for 501(c)(3) Public Charities* is available at www.irs.gov/pub/irs-pdf/p4221pc.pdf.

IRS Notice 2010-39, **Request for Comments Regarding Additional Requirements for Tax-Exempt Hospitals**

.69 IRS Notice 2010-39, *Request for Comments Regarding Additional Requirements for Tax-Exempt Hospitals*, solicits comments regarding the application of certain requirements imposed by new Section 501(r) added to the IRC by section 9007(a) of the PPACA. This section affects hospital organizations that are currently described in Section 501(c)(3) of the IRC as exempt from federal income taxation.

.70 New Section 501(r)(1) imposes four additional requirements that hospital organizations must satisfy to be described as tax exempt: (*a*) conducting a community health needs assessment every three years and adopting an implementation strategy to meet the needs identified through the assessment, (*b*) establishing a financial assistance policy and a policy relating to emergency care, (*c*) certain limitations on amounts charged for emergency or other medically necessary care to individuals eligible for assistance, and (*d*) certain restrictive requirements for collection processes on individuals who may be eligible for financial assistance.

.71 The PPACA also added new Section 4959, which imposes an excise tax for failures to meet certain of the new Section 501(r) requirements, and reporting requirements under Section 6033(b) related to Sections 501(r) and 4959.

.72 Readers should be aware of the final ruling available at www.irs.gov.

New Filing and Audit Requirements for Employee Retirement Income Security Act-Covered Section 403(b) Employee Benefit Plans

.73 Beginning in 2009, employee benefit plans sponsored by charitable entities and schools under IRC Section 403(b) and covered under the Employee Retirement Income Security Act of 1974 (ERISA) were subject to the same reporting and audit requirements as Section 401(k) plans. Section 403(b) plans also are commonly known as *tax-shelter annuity plans*. Under Department of Labor (DOL) regulations issued in November 2007 amending the filing requirements for Form 5500, "Annual Return/Report of Employee Benefit Plan," ERISA-covered Section 403(b) plans with 100 or more participants generally are required to file audited financial statements beginning with their 2009 Form 5500 filing. Section 403(b) plans with fewer than 100 participants are eligible to use abbreviated reporting forms without audited financial statements. The DOL estimates that approximately 7,000 Section 403(b) plans are subject to the new audit requirements, and another 9,000 Section 403(b) plans will be eligible for the waiver. The DOL regulations were published in the November 16, 2007, *Federal Register* and are available at www.dol.gov/ebsa/regs/fedreg/final/20071116.pdf. The AICPA Employee Benefit Plan Audit Quality Center (www.aicpa.org/EBPAQC) and Expert Panel have formed a joint task force to develop resources to help members with these audit requirements.

Red Flags Rule

.74 In October 2007, the Federal Trade Commission (FTC) issued the Red Flags Rule for financial institutions and creditors to fight identity theft. The rule sets out how certain businesses and organizations must develop, implement, and administer their identity theft prevention programs. These programs must include the following four basic elements, which, together, create a framework to address the threat of identity theft:

- The program must include reasonable policies and procedures to identify the red flags of identity theft that may arise in the day-to-day operation of your business. *Red flags* are suspicious patterns or practices or specific activities that indicate the possibility of identity theft. For example, if a customer has to provide some form of identification to open an account with an entity, an ID that looks like it might be fictitious would be a red flag.
- The program must be designed to detect the red flags that have been identified. For example, if an entity has identified fake IDs as a red flag, it must have procedures in place to detect possible fake, forged, or altered identification.
- The program must spell out appropriate actions to take when red flags are detected.
- The program must address how the program will be reevaluated periodically to reflect new risks from this crime because identity theft is an ever-changing threat.

.75 The program must state who is responsible for implementing and administering it effectively. Because employees have a role to play in preventing and detecting identity theft, the program also must include appropriate staff training. The program also must address the manner in which contractors will be monitored when outsourcing or subcontracting functions of operations that would be covered by the rule.

.76 The Red Flags Rule applies to financial institutions and creditors. The rule requires a periodic risk assessment to determine if the entity has covered accounts. A written program needs to be in place only if the entity has covered accounts. It is important to look closely at how the rule defines *financial institution* and *creditor* because the terms apply to groups that typically might not use those words to describe themselves. For example, many NFPs and government agencies are creditors under the rule.

.77 The Red Flags Rule does not name specific types of organizations that must comply; however, for NFP organizations, compliance requirements are based on the types of accounts that the institution has with its customers and clients. Examples include (*a*) payment plans for tuition at a college or university or (*b*) club dues of an NFP that are allowed to be paid in installments. Because of their creditor status in these situations, the Red Flags Rule applies.

.78 The FTC suspended enforcement of the new Red Flags Rule until June 10, 2010. After June 10, 2010, any instance of identity theft exposes the NFP organization to an FTC investigation.

.79 More information and a document outlining specific requirements of the Red Flags Rule can be found at http://ftc.gov/redflagsrule.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.80 The recent economic conditions and regulatory actions described in this alert may cause additional risk factors that had not previously existed or did not have a material effect on audit clients in prior years. Some risks that may affect an entity in the current economic environment are as follows:

- Marginally achieving explicitly stated strategic objectives
- Volatile real estate and business markets
- Significant measurement uncertainty, including accounting estimates and fair value measurements
- Potentially erroneous or fraudulent activity due to decreased staffing and resurgence of business activity
- The continuing evolution of the postrecessionary marketplace

.81 Although many of these risks are not new to businesses, consideration of the ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks. As noted in paragraph .17 of AU section 312, some possible audit responses to significant risks of material misstatement include increasing the extent of audit procedures, performing procedures closer to year-end, or increasing audit procedures to obtain more persuasive evidence. Additionally, given the constant changing status of economic conditions that could affect your client, auditors should consider modifying audit procedures to ensure that risks are still adequately addressed.

.82 Although it is impossible to predict and include all accounting, auditing, and attestation issues that may affect your engagements, we cover in this alert the primary areas of concern. Continue to remain alert to economic, legislative, and regulatory developments, as well as the associated accounting, auditing, and attestation issues as you perform your engagements.

PCAOB Auditing Standards on Risk Assessment

.83 In August 2010, the PCAOB adopted a suite of eight auditing standards related to the auditor's assessment of, and response to, risk in an audit. These standards were initially proposed in late 2008 and reproposed in late 2009. These risk assessment standards will benefit investors by setting forth requirements that enhance the effectiveness of the auditor's assessment of, and response to, the risks of material misstatement in the financial statements. They are applicable to audit procedures spanning from the initial planning stages of the audit to the evaluation of the audit results. Improvements in the risk assessment standards should enhance integration of the audit of financial statements with the audit of internal control over financial reporting by articulating a process for identifying and assessing risks of material misstatements that apply to both portions of the integrated audit.

.84 The new auditing standards, with a brief description of each, are as follows:

- Auditing Standard No. 8, *Audit Risk*, discusses the auditor's consideration of audit risk in both an integrated audit and an audit of financial statements only. It describes the components of audit risk and the auditor's responsibilities for reducing it to an appropriately low level.
- Auditing Standard No. 9, *Audit Planning*, establishes requirements for planning an audit, such as assessing important matters and establishing an appropriate audit strategy.

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- Auditing Standard No. 10, *Supervision of the Audit Engagement*, is applicable to the engagement partner and other team members who supervise during the audit. It sets forth requirements for supervision of the audit engagement and the work of other engagement members. Related to this topic, the PCAOB also recently issued a release discussing the provision of SOX that authorizes the PCAOB to impose sanctions on registered public accounting firms and their supervisory personnel for failing to reasonably supervise associated persons.
- Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*, describes the auditor's responsibilities for consideration of materiality in planning and performing an audit.
- Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, establishes requirements for auditors in identifying and assessing risks of material misstatement, including information-gathering procedures.
- Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, establishes requirements for responding to those identified risks of material misstatement through general audit procedures. It also includes audit procedures related to significant accounts and disclosures.
- Auditing Standard No. 14, *Evaluating Audit Results*, establishes requirements for evaluating audit results and the sufficiency of appropriate audit evidence.
- Auditing Standard No. 15, *Audit Evidence*, discusses what constitutes audit evidence and how to design and perform audit procedures to support the opinion expressed in the auditor's report.

.85 These risk assessment standards will supersede the following six PCAOB interim standards and related amendments: AU section 311, *Planning and Supervision*; AU section 312, *Audit Risk and Materiality in Conducting an Audit*; AU section 313, *Substantive Tests Prior to the Balance Sheet Date*; AU section 319, *Consideration of Internal Control in a Financial Statement Audit*; AU section 326, *Evidential Matter*; and AU section 431, *Adequacy of Disclosure in Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Interim Standards). The standards, if approved by the SEC, will be effective for audits of fiscal periods beginning on or after December 15, 2010.

Engagement Quality Review for Issuers

.86 In January 2010, the PCAOB announced that the SEC had approved Auditing Standard No. 7, *Engagement Quality Review* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards), which was adopted by the PCAOB in July 2009. Auditing Standard No. 7 provides a framework for the engagement quality reviewer to objectively evaluate the significant judgments made and related conclusions reached by the engagement team in forming an overall conclusion about the engagement. Auditing Standard No. 7 is expected to increase the likelihood that a registered public accounting firm will catch any significant deficiencies before it issues its audit report. As a result, more work may be necessary under this standard than performed under the existing requirements for concurring partners. However, Auditing Standard No. 7 explains that the procedures required by the engagement quality reviewer are different in nature than those required to be performed by the engagement team. Further, if the engagement quality reviewer deems more work is required before giving approval of issuance, the engagement team is responsible for completing that work.

.87 This standard applies to all audit engagements, and engagements to review interim financial information, conducted pursuant to the standards of the PCAOB, and it supersedes the PCAOB's interim concurring partner review requirement. Auditing Standard No. 7 is effective for engagement quality reviews of audits and interim reviews for fiscal years that began on or after December 15, 2009. For a public, calendar-year company, this standard is applicable for the quarter ended March 31, 2010. Subsequent to the issuance of Auditing Standard No. 7, the PCAOB issued Staff Question and Answer, *Auditing Standard No. 7,* Engagement Quality Review (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 100.10), to provide further implementation guidance on the documentation requirements of the standard. For the full text of the standard and the question and answer, readers are encouraged to visit the PCAOB's website at www.pcaob.org.

Supplementary and Other Information Related to Financial Statements

.88 In February 2010, the AICPA Auditing Standards Board (ASB) issued a trio of auditing standards related to the auditor's responsibility for other information, supplementary information, and required supplementary information. These three standards supersede AU section 550A, *Other Information in Documents Containing Audited Financial Statements*; AU section 551A, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*; and AU section 558A, *Required Supplementary Information* (AICPA, *Professional Standards*). All three standards are effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Other Information in Documents Containing Audited Financial Statements

.89 Statement on Auditing Standards (SAS) No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, AU sec. 550), addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon. In this SAS, *other information* is defined as financial and nonfinancial information (other than the financial statements and the auditor's report thereon) that is included in a document containing audited financial statements and the auditor's report thereon, excluding required supplementary information. *Documents containing audited financial statements* refers to annual reports (or similar documents) that are issued to owners (or similar stakeholders) and annual reports of governments and organizations for charitable or philanthropic purposes that are available to the public that contain audited financial statements and the auditor's report thereon. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the financial statements does not cover other information, and the auditor has no responsibility for determining whether such information is properly stated. This SAS establishes the requirement for the auditor to read the other information of which the auditor is aware because the credibility of the audited financial statements may be undermined by material inconsistencies between the audited financial statements and other information. This SAS also may be applied, adapted as necessary in the circumstances, to other documents to which the auditor, at management's request, devotes attention.

Supplementary Information in Relation to the Financial Statements as a Whole

.90 SAS No. 119, *Supplementary Information in Relation to the Financial Statements as a Whole* (AICPA, *Professional Standards*, AU sec. 551), addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. For purposes of generally accepted auditing standards (GAAS), *supplementary information* is defined as information presented outside the basic financial statements, excluding required supplementary information that is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Such information may be presented in a document containing the audited financial statements or separate from the financial statements.

.91 The information covered by this SAS is presented outside the basic financial statements and is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. This SAS also may be applied, with the report wording adapted as necessary, when an auditor has been engaged to report on whether required supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Required Supplementary Information

.92 SAS No. 120, *Required Supplementary Information* (AICPA, *Professional Standards*, AU sec. 558), addresses the auditor's responsibility with respect to *required supplementary information*. The SAS defines *required supplementary information* as information that a designated accounting standard setter requires to accompany an entity's basic financial statements. Required supplementary information is not part of the basic financial statements; however, a designated accounting standard setter considers the information to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. In addition, authoritative guidelines for the methods of measurement and

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

presentation of the information have been established. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the basic financial statements does not cover required supplementary information. SAS No. 120 explains that the objectives of the auditor, when a designated accounting standard setter requires information to accompany an entity's basic financial statements, are to perform specified procedures in order to

- describe, in the auditor's report, whether required supplementary information is presented and
- communicate therein when some or all of the required supplementary information has not been presented in accordance with guidelines established by a designated accounting standard setter or when the auditor has identified material modifications that should be made to the required supplementary information for it to be in accordance with guidelines established by the designated accounting standard setter.

Auditing Fair Value Measurements

.93 In addition to understanding the looming questions relative to fair value accounting, auditors should be aware of audit issues involving fair value measurements. Particular assets, liabilities, and components of equity are measured or disclosed at fair value in the financial statements, and it is management's responsibility to make the fair value measurements and disclosures. When auditing these fair values to ensure they are in conformity with U.S. GAAP, auditors should consult AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1).

.94 In regard to analyzing the sufficiency of the audit evidence, the strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method should incorporate common market assumptions. If common market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding of the entity's process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with U.S. GAAP. During this testing, the auditor also may identify any possible indicators of impairment. According to paragraph .23 of AU section 328, substantive tests of the fair value measurements may involve (*a*) testing management's significant assumptions, the valuation model, and the underlying data; (*b*) developing independent fair value estimates for corroborative purposes; or (*c*) reviewing subsequent events and transactions. Paragraph .26 also notes that when testing the fair value measurements and disclosures, the auditor should evaluate whether management's assumptions are reasonable and reflect, or are not inconsistent with, market information. According to FASB ASC 820, *Fair Value Measurements and Disclosures*, under U.S. GAAP this may include evaluating the following:

- Whether a significant decrease has occurred in the volume and level of activity for the asset or liability when compared with normal market activity, which may include consideration of the number of recent transactions, the date of the most recent price quotes, consistency among price quotes, increases in implied liquidity risk premiums, increases in the bid-ask spread, and the amount of publicly available information.
- Whether the transaction was an orderly transaction, which may include consideration of the seller's financial condition, the counterparty credit position, the exposure to the market during the marketing period, and the actual transaction price.
- The reasonableness of the underlying assumptions, which may include consideration of the use of pricing services, the assumptions used by the pricing service, and the extent of testing required to verify the reasonableness of the prices provided. (For example, the auditor should understand whether the fair value measurement was determined using quoted prices from an active market, observable inputs, or fair value measurements based on a model. If the price is not based on quoted prices from an active market or observable inputs, the auditor should obtain an understanding of the model used by the pricing service and evaluate whether the assumptions are reasonable [see the following section for additional information on pricing services].)

- The reasonableness of the determination within the fair value hierarchy of inputs.

Fair Values of Securities

.95 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, there are some items of note for the auditor. As previously mentioned, quoted market prices in active markets are the best available audit evidence to support a fair value; however, when they are unavailable and the valuations of securities are obtained from a broker or dealer or another pricing service based on valuation models, the auditor should understand the underlying valuation method used (such as a cash flow projection). These prices also may be based on quoted prices from an active market or other observable inputs that will be a consideration on the auditor's procedures. The process used by the pricing service in measuring fair value should be evaluated to determine the consistency with the specified valuation method (as discussed in FASB ASC 820-10-35). The auditor also may determine that it is necessary to obtain quotes from more than one pricing source based on circumstances, such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation assumptions that are highly subjective. In the context of FASB ASC 820, quoted prices in active markets are considered level 1 inputs.

.96 When an entity performs its own valuation, value testing procedures include the following:

- Assessing the reasonableness
- Comparing the assumptions to industry reports or benchmarks
- Assessing the appropriateness of the model
- Calculating the value using his or her own model
- Comparing the fair value with subsequent or recent transactions

.97 Whether the inputs to the entity's valuation model are observable determines their characterization as level 2 or level 3 inputs, respectively, within FASB ASC 820. When extensive judgment is needed, consider using a specialist or refer to AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1). Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability of the security, evidence of the collateral also should be examined for existence, fair value, transferability, and the investor's right to the collateral.

.98 Paragraph .19 of AU section 328 also notes that the auditor should evaluate whether the entity's method for determining fair value measurements is applied consistently and, if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity or changes in accounting principles. The auditor also should evaluate management's conclusions regarding other-than-temporary impairment on its securities. Examples of factors that could cause an other-than-temporary impairment, per paragraph .47 of AU section 332, include the following:

- Fair value is significantly below cost and
  - — the decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - — the decline has existed for an extended period of time.
  - — management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.99 Auditors should consider all facts and circumstances when determining if an other-than-temporary impairment has occurred. Additionally, the classification of an entity's securities is based on management's intent and ability. The auditor should obtain an understanding of management's classification process among trading, available-for-sale, and held-to maturity, as well as consider the classifications in light of the entity's current financial position.

Auditing Accounting Estimates

.100 As noted in paragraph .04 of AU section 342, the auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements as a whole. Although this alert has discussed fair value measurements at length, it is important to remember many types of accounting estimates exist in client financial statements. Some examples include the allowance for uncollectible accounts receivable, impairment analysis and estimated useful lives of long lived assets, valuation allowance for deferred tax assets, and actuarial assumptions in pension and other postretirement benefit costs.

.101 Given the current economic climate, additional skepticism should be exercised when considering management's underlying assumptions used in accounting estimates. When evaluating accounting estimates, the auditor should consider both the subjective and objective factors with professional skepticism. As discussed in paragraph .09 of AU section 342, key factors and assumptions that the auditor normally concentrates on include the assumptions that are significant to the estimate, sensitive to variations, deviations from historical patterns, or particularly subjective and susceptible to misstatement and bias; however, it is important to consider whether historical patterns are still applicable.

.102 For example, in the current market, new patterns may emerge. In this economic climate, with possible increasing pressure on management to meet earnings, a key aspect of AU section 342 is for an auditor to determine the reasonableness of management's accounting estimates with an extra degree of professional skepticism. As noted by AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), when assessing audit differences between client estimates and audit estimates, even if they are individually reasonable, an auditor should consider whether these differences are indicative of possible bias by management. If so, the auditor should reconsider the estimates as a whole.

.103 The auditor should obtain an understanding of how management develops estimates and should employ one of the approaches outlined in paragraph .10 of AU section 342 in testing that process. In reviewing and testing management's process, the auditor may consider identifying controls around this process and determining if the underlying data used for the estimate are reliable and used appropriately. An auditor also may develop an estimate and compare it to management's estimate. Lastly, the auditor may review subsequent events or transactions occurring prior to the date of the auditor's report. Further, as noted in AU section 316, hindsight may provide the auditor additional insight into the existence of management bias. For further details on auditing estimates, see AU section 342. The AICPA has released a proposed redrafted SAS, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates and Related Disclosures* (Redrafted), on auditing accounting estimates, including fair value. Readers are encouraged to remain alert for developments on this topic.

Using the Work of a Specialist

.104 It may be necessary to use a specialist (such as a securities valuation expert) to assist in auditing complex or subjective matters. Examples of matters in which an auditor may engage a specialist are valuation issues; reasonableness of determination of amounts derived from specialized techniques or models; or implementation of technical requirements, regulations, or legal documents. AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), provides guidance to auditors in using specialists. The guidance in AU section 336 is applicable when the specialist is hired by management or if the auditor engages the specialist. However, if a specialist employed by the auditor's firm participates in the audit, AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1), is applicable rather than AU section 336.

.105 When using the work of a specialist, the auditor should evaluate the specialist's professional qualifications, obtain an understanding of the nature of the work performed or to be performed, and evaluate the relationship of the specialist to the client in terms of objectivity. Although the appropriateness and reasonableness of the methods and assumptions employed by the specialist are his or her responsibility, the auditor should obtain an understanding of these qualities, test the underlying data provided to the specialist, and evaluate the specialist's findings in the context of the audit and related assertions in the financial statements. In July 2010, the PCAOB issued Staff Audit Practice Alert No. 6, *Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants from Outside the Firm* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.06), because it observed that a number of registered public accounting firms located in the United States have been issuing audit reports on financial statements filed by issuers that have substantially all of their operations outside of the United States. Auditors of issuers should consult this practice alert for reminders concerning their obligations when using the work of other firms or using assistants engaged from outside the firm, such as in the aforementioned situation.

Communicating Internal Control Related Matters Identified in an Audit

.106 SAS No. 115, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), supersedes SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit*, and further clarifies standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 115 is effective for audits of financial statements for periods ending on or after December 15, 2009, with early implementation permitted.

.107 The SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion), except when the auditor is performing an integrated audit and will be expressing an opinion on the effectiveness of internal control over financial reporting under AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements* (AICPA, *Professional Standards*, vol. 1). In general, SAS No. 115 retains many of the provisions of SAS No. 112. The key differences between the two standards lie in the definitions of *material weaknesses* and *significant deficiencies*.

Definitions of Significant Deficiency *and* Material Weakness

.108 A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that a reasonable possibility exists that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. For the purpose of this definition, a reasonable possibility exists when the likelihood of the event is either *reasonably possible* or *probable*, as those terms are defined in the FASB ASC glossary. The FASB ASC glossary defines *reasonably possible* as when the chance of the future event or events occurring is more than remote but less than likely; *probable* is defined as when the future event or events are likely to occur. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness yet important enough to merit attention by those charged with governance.

The Evaluation Process

.109 Although the auditor is not required to perform procedures specifically to identify deficiencies in internal control, during the course of the audit, the auditor may become aware of deficiencies in the design or operation of the entity's internal control. The auditor should evaluate the severity of each deficiency in internal control identified during the audit and determine whether the deficiency, individually or in combination with other deficiencies in internal control, rise to the level of significant deficiencies or material weaknesses. Further, the severity of a deficiency does not depend on whether a misstatement actually occurred.

.110 The AICPA published the Audit Risk Alert *Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115* (product no. 022539) to assist in understanding the requirements of this

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Service Organizations

.111 Since 1992, SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324) has been the authoritative standard on requirements and guidance for reporting on controls at service organizations and auditing the financial statements of entities that use service organizations to accomplish tasks that may affect their financial statements. This guidance has now been split into an attest standard and an auditing standard to better reflect the nature of the work being performed. Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, vol. 1, AT sec. 801), contains the requirements for reporting on controls at service organizations that are relevant to user entities' internal control over financial reporting. A finalized clarified SAS on service organizations, *Audit Considerations Relating to an Entity Using a Service Organization*, will supersede SAS No. 70 and addresses the user auditor's responsibility for obtaining sufficient appropriate audit evidence in an audit of the financial statements of a user entity that uses one or more service organizations. This SAS will be effective for audits of financial statements for periods ending on or after December 15, 2012. SSAE No. 16 is effective for service auditor's reports for periods ending on or after June 15, 2011. Until the new SAS is effective, user auditors will still use the guidance currently contained in AU section 324. Once the new SAS becomes effective, it will replace the guidance for user auditors currently in AU section 324. SSAE No. 16 is based on the International Auditing and Assurance Standards Board's (IAASB's) International Standard on Assurance Engagements No. 3402, *Assurance Reports on Controls at a Service Organization*, and the new SAS is based on the IAASB's International Standard on Auditing (ISA) 402, *Audit Considerations Relating to an Entity Using a Service Organization*.

.112 The AICPA is in the process of overhauling and rewriting the Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (commonly known as the SAS 70 guide). Also, to address reporting on a service provider's controls over subject matter other than financial reporting, the AICPA is developing a new Audit Guide, *Reporting on Controls at a Service Provider Relevant to Security, Availability, Processing Integrity, Confidentiality, or Privacy*. Both guides are expected to be available for sale in early 2011. The AICPA is also in the process of drafting communication materials that will help auditors, clients, and users understand the three types of service organization control (SOC) reports (formerly SAS No. 70 reports) to be used for reporting on these engagements.

	Title	***Description***
SOC 1	*Report on Controls at a Service Organization Relevant to User Entities' Internal Control over Financial Reporting*	To be used only in circumstances when the service organization's services and controls affect the internal control over financial reporting for the entities that use the service.
SOC 2	*Report on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality, and Privacy*	The purpose is to convey trust and assurance to users of the system that the service organization has deployed an effective control system to effectively mitigate operational and compliance risks that the system may represent to its users.
SOC 3	*Trust Services Report*	These reports are designed to meet the needs of users who want assurance on the controls at a service organization related to security, availability, processing integrity, confidentiality, or privacy of a system but do not have the need for the level of detail provided in an SOC 2 report. These reports are general use reports and can be freely distributed or posted on a website as a seal.

Compilation and Review Engagements

.113 The AICPA developed a brand new guide, *Compilation and Review Engagements*, which provides additional information on implementing Statement on Standards for Accounting and Review Services No. 19, *Compilation and Review Engagements* (AICPA, *Professional Standards*, vol. 2). It also includes illustrative engagement and representation letters, sample compilation and review reports, detailed illustrations, and case studies. This guide is now available electronically and in paperback on www.cpa2biz.com.

Accounting Issues and Developments

.114 Given the current economic climate, auditors should consider a number of accounting and financial reporting issues, such as the following:

- Fair value, including fair value measurements in illiquid markets
- Impairment

Presentation of Insurance Claims and Related Recoveries

.115 In August 2010, FASB issued ASU No. 2010-24, *Health Care Entities (Topic 954): Presentation of Insurance Claims and Related Insurance Recoveries (a consensus of the Emerging Issues Task Force)*, to address current diversity in practice related to the accounting by health care entities for medical malpractice claims and similar liabilities and their related anticipated insurance recoveries. Most health care entities have netted anticipated insurance recoveries against the related accrued liability, although some have presented the anticipated insurance recovery and related liability on a gross basis.

.116 The amendments in ASU No. 2010-24 are consistent with the guidance on netting receivables and payables in FASB ASC 210-20 that is more broadly applicable for entities in other industries and that does not permit offsetting of conditional or unconditional liabilities with anticipated insurance recoveries from third parties.

.117 ASU No. 2010-24 clarifies that a health care entity should not net insurance recoveries against a related claim liability, and the claim liability should be determined without consideration of insurance recoveries.

.118 The amendments in ASU No. 2010-24 are effective for fiscal years beginning after December 15, 2010, and interim periods within those fiscal years. A cumulative-effect adjustment should be recognized in opening retained earnings in the period of adoption if a difference exists between any liabilities and insurance receivables recorded as a result of application. Retrospective and early application are permitted.

Measuring Charity Care for Disclosure

.119 In August 2010, FASB issued ASU No. 2010-23, *Health Care Entities (Topic 954): Measuring Charity Care for Disclosure—a consensus of the FASB Emerging Issues Task Force*, to reduce the diversity in practice regarding the measurement basis used in the disclosure of charity care. Some entities determine their charity care disclosures on the basis of a cost measurement, and others use a revenue measurement.

.120 ASU No. 2010-23 requires that cost be used as the measurement basis for charity care disclosure purposes and that cost be identified as the direct and indirect costs of providing charity care. Because various techniques will likely be used to determine how the direct and indirect costs are identified, such as obtaining the information directly from a costing system or through reasonable estimation techniques, ASU No. 2010-23 also requires the disclosure of the method used to identify or determine costs.

.121 The amendments of ASU No. 2010-23 are effective for fiscal years beginning after December 15, 2010, and should be applied retrospectively. Early application is permitted.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

FASB Statement No. 168

.122 FASB Statement No. 168, *The* FASB Accounting Standards Codification™ *and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162*, as codified in FASB ASC 105, *Generally Accepted Accounting Principles*, is effective for financial statements issued for interim and annual periods ending after September 15, 2009. On the effective date of FASB Statement No. 168, FASB ASC became the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the SEC. FASB ASC superseded all then-existing, non-SEC accounting and reporting standards for nongovernmental entities. This new standard flattens the U.S. GAAP hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is nonauthoritative (not in FASB ASC). Exceptions include all rules and interpretive releases of the SEC under the authority of federal securities laws, which are sources of authoritative U.S. GAAP for SEC registrants, and certain grandfathered guidance having an effective date before March 15, 1992. If an accounting change results from the application of this guidance, an entity should disclose the nature and reason for the change in accounting principle in their financial statements.

Referencing FASB ASC in Your Documentation

.123 You should consider how your entity will reference FASB ASC in your documentation (policy and procedures, technical memorandums, financial statements and filings, engagement working papers, and so on). It is only prudent to reflect current U.S. GAAP in your documentation. The FASB Notice to Constituents (NTC) includes a section on referencing FASB ASC in footnotes and other documents. In this notice, FASB encourages the use of plain English to describe broad topic references in the future. For example, to refer to the requirements of the *Derivatives and Hedging* topic, they suggest a reference similar to "as required by the *Derivatives and Hedging* topic of the FASB *Accounting Standards Codification*." Conversely, FASB suggests using the detailed numerical referencing system in working papers, articles, textbooks, and related items.

.124 Also, because FASB ASC is not intended to change U.S. GAAP, the consistent use of references to only FASB ASC for all periods presented (including periods before the authoritative release of FASB ASC) is appropriate. It is prudent to expect that audit, attest, or compilation and review working papers associated with financial statements for a period ending after September 15, 2009, also would reflect FASB ASC because the underlying financial statements, which are the subjects of those engagements, reference FASB ASC.

.125 However, if your entity will continue to follow grandfathered guidance not included in FASB ASC, it would still be appropriate to reference those standards (and not FASB ASC). A listing of examples of grandfathered guidance can be found in FASB Statement No. 168.

.126 Examples of disclosures using references to FASB ASC can be found at the AICPA's dedicated FASB ASC website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AcctgFinRptg/AcctgFinRptgGuidance/Pages/FASBAccountingStandardsCodification.aspx.

Decreases in Ownership of a Subsidiary

.127 In January 2010, FASB issued ASU No. 2010-02, *Consolidation (Topic 810): Accounting and Reporting for Decreases in Ownership of a Subsidiary—a Scope Clarification*. This ASU addresses implementation issues related to the changes in ownership provisions in FASB ASC 810-10 (issued as FASB Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*). These amendments clarify that the scope of the decrease in ownership provisions of FASB ASC 810-10 and related guidance applies to a subsidiary or group of assets that is a business or nonprofit activity, a subsidiary that is a business or nonprofit activity that is transferred to an equity method investee or joint venture, and an exchange of a group of assets that constitutes a business or nonprofit activity for a noncontrolling interest in an entity (including an equity method investee or joint venture). Further, the amendments clarify that the decrease in ownership guidance in FASB ASC 810-10 does not apply to the following transactions, even if they involve businesses: sales of in-substance real estate and conveyances of oil and gas mineral rights. The amendment also expands the required disclosures about the deconsolidation of a subsidiary or derecognition of a group of assets within the scope of FASB ASC 810-10. This ASU is effective beginning in the period that an entity adopts FASB

Statement No. 160. If an entity has already adopted this guidance, then the amendments in this ASU are effective beginning in the first interim or annual reporting period ending on or after December 15, 2009. The amendments in this ASU should be applied retrospectively to the first period that an entity adopted FASB Statement No. 160.

Accounting for Uncertainty in Income Taxes

.128 For many calendar year nonpublic entities, 2009 was the first year of application of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*. In September 2009, FASB issued ASU No. 2009-06, *Income Taxes (Topic 740)—Implementation Guidance on Accounting for Uncertainty in Income Taxes and Disclosure Amendments for Nonpublic Entities*. This update affects all nongovernmental entities, and the disclosure amendments only apply to nonpublic entities. The four main provisions of the ASU include the following:

- If income taxes paid by the entity are attributable to the entity, the transaction should be accounted for in accordance with the guidance on uncertainty in income taxes in FASB ASC 740, *Income Taxes*. If the taxes paid by the entity are attributable to the owners, the transaction should be accounted for as a transaction with the owners. Attribution should be based on the laws and regulations of the jurisdiction and should be made for each jurisdiction where the entity is subject to income taxes.
- Management's determination of the taxable status of the entity, including its status as a pass-through entity or tax-exempt NFP, is a tax position subject to the standards required for accounting for uncertainty in income taxes.
- Regardless of the tax status of the reporting entity, the tax positions of all entities within a related group of entities must be considered.
- For nonpublic entities, it eliminates the disclosures of a tabular reconciliation of the total amount of unrecognized tax benefits at the beginning and end of the periods presented and the total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate (see FASB ASC 740-10-50-15[a]–[b]).

.129 For entities that are currently applying the guidance on accounting for uncertainty in income taxes, this ASU is effective for interim and annual periods ending after September 15, 2009.

Consolidation of Variable Interest Entities

.130 For calendar year entities, 2010 is the first year of application of FASB Statement No. 167, *Amendments to FASB Interpretation No. 46(R)*, which changes how to determine when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. FASB Statement No. 167 was incorporated into FASB ASC through ASU No. 2009-17, *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*. This statement is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited.

.131 The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. This statement also amends consolidation of variable interest entities (VIE) guidance to eliminate the quantitative approach previously required for determining the primary beneficiary of a VIE, which was based on determining which enterprise absorbs the majority of the entity's expected losses, receives a majority of the entity's expected residual returns, or both.

.132 Entities will be required to provide additional disclosures about involvement with VIEs and any significant changes in risk exposure due to that involvement. Entities also will be required to disclose how involvement with a VIE affects the entity's financial statements.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.133 FASB Statement No. 167 retains the scope of previous VIE consolidation accounting guidance, with the addition of entities previously considered qualifying special purpose entities because the concept of these entities was eliminated in FASB Statement No. 166, *Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140*, which was incorporated into FASB ASC by ASU No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*.

.134 This statement also discusses the objectives of its required disclosures and notes that an entity may need to supplement the minimum required disclosures to meet these objectives. The objectives are for the financial statement users to have an understanding of the following:

- The significant judgments and assumptions made by an enterprise in determining whether it must consolidate a VIE or disclose information about its involvement in a VIE, or both
- The nature of restrictions on a consolidated VIE's assets and on the settlement of its liabilities reported by an enterprise in its statement of financial position, including the carrying amounts of such assets and liabilities
- The nature of, and changes in, the risks associated with an enterprise's involvement with the VIE
- How an enterprise's involvement with the VIE affects the enterprise's financial position, financial performance, and cash flows

Accounting for Transfers of Financial Assets

.135 Calendar year entities must also start applying the provisions of FASB Statement No. 166 in 2010. FASB Statement No. 166, which is a revision to FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, requires more information about transfers of financial assets, including securitization transactions, and those circumstances in which entities have continuing exposure to the risks related to transferred financial assets. FASB Statement No. 166 was incorporated into FASB ASC by ASU No. 2009-16 and is discussed in FASB ASC 860, *Transfers and Servicing*. It eliminates the concept of a qualifying special purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosures. The purpose of this statement is to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets. It is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited. This statement must be applied to transfers occurring on or after the effective date; however, the disclosure provisions should be applied to transfers that occurred both before and after the effective date.

.136 Additionally, on and after the effective date, the concept of a qualifying special-purpose entity is no longer relevant for accounting purposes. Therefore, formerly qualifying special purpose entities (as defined under previous accounting standards) should be evaluated for consolidation by reporting entities on and after the effective date in accordance with the applicable consolidation guidance.

.137 The primary objectives of the disclosure requirements of this guidance are to provide the financial statement users with a clear understanding of the following:

- A transferor's continuing involvement (as defined by the FASB ASC glossary), if any, with transferred financial assets
- The nature of any restrictions on assets reported by an entity in its statement of financial position that relate to a transferred financial asset, including the carrying amounts of those assets
- How servicing assets and servicing liabilities are reported under this pronouncement
- For transfers accounted for as sales when a transferor has continuing involvement with the transferred financial assets and for transfers of financial assets accounted for as secured borrowings, how

the transfer of financial assets affects a transferor's financial position, financial performance, and cash flows

.138 These objectives must be met by the disclosures, regardless of the specific requirements of the pronouncement. It may be the case that an entity provides greater detail than what is a required disclosure to meet these objectives, depending on the facts and circumstances.

Subsequent Events

.139 FASB Statement No. 165, *Subsequent Events*, which has been codified in FASB ASC 855, *Subsequent Events*, is effective for interim and annual periods ending after June 15, 2009. This statement is intended to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date (that is, whether that date represents the date the financial statements were issued or were available to be issued). The purpose of this disclosure is to alert all users of financial statements that an entity has not evaluated subsequent events after that date in the set of financial statements being presented.

.140 In particular, this statement sets forth the following:

- The period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements
- The circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements
- The disclosures that an entity should make about events or transactions that occurred after the balance sheet date

.141 FASB states that this guidance should not result in significant changes in current practice with regard to the subsequent events that an entity reports, either through recognition or disclosure, in its financial statements. In September 2009, the AICPA issued Technical Questions and Answers (TIS) section 8700.01, "Effect of FASB ASC 855 on Accounting Guidance in AU Section 560" (AICPA, *Technical Practice Aids*), which notes that preparers of financial statements for nongovernmental entities are required to follow the accounting guidance in FASB ASC 855. Additionally, the accounting guidance contained in AU section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), would no longer be applicable to audits of nongovernmental entities. This question and answer can be accessed at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

.142 In February 2010, FASB issued ASU No. 2010-09, *Subsequent Events (Topic 855): Amendments to Certain Recognition and Disclosure Requirements*, to address questions that arose in practice about potential conflicts between FASB ASC 855 and SEC guidance—specifically, the requirements to disclose the date that the financial statements are issued. This ASU also addresses the intended breadth of the reissuance disclosure provision related to subsequent events.

.143 ASU No. 2010-09 requires an entity that is an SEC filer or a conduit bond obligor for conduit debt securities that are traded in a public market to evaluate subsequent events through the date the financial statements are issued. All other entities must evaluate subsequent events through the date the financial statements are available to be issued. Further, an entity that is an SEC filer is not required to disclose the date through which subsequent events have been evaluated. Lastly, only non-SEC filers should disclose in the revised financial statements the dates through which subsequent events have been evaluated in both the issued or available-to-be-issued financial statements and the revised financial statements. Revised financial statements are considered reissued financial statements.

.144 The amendments in ASU No. 2010-09 are effective upon issuance, except for the use of the issued date for conduit bond obligors. That amendment is effective for interim or annual periods ending after June 15,

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

2010. In June 2010, the AICPA issued TIS section 8700.03, "Auditor's Responsibilities for Subsequent Events Relative to a Conduit Debt Obligor" (AICPA, *Technical Practice Aids*), to provide guidance related to the effect of this ASU on the auditor's responsibilities for subsequent events relative to a conduit debt obligor and the date of the auditor's report.

Fair Value

.145 FASB ASC 820-10-20 defines *fair value* and establishes a framework for measuring fair value; however, it does not dictate when an entity must measure something at fair value, nor does it expand the use of fair value in any way. The need to understand fair value accounting has increased in importance as alternative investments increased in popularity and complexity. *Fair value* is defined as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date."

Measuring Liabilities at Fair Value

.146 FASB issued ASU No. 2009-05, *Measuring Liabilities at Fair Value*, to increase the consistency in the application of FASB ASC 820 to liabilities because many constituents had expressed concern. This ASU applies to all entities that measure liabilities at fair value under FASB ASC 820 and amends sections of FASB ASC 820-10.

.147 This ASU states that, in circumstances in which a quoted price in an active market for the identical liability is not available, fair value of the liability must be measured by either (*a*) a valuation technique that uses the quoted price of the identical liability when traded as an asset or quoted prices for similar liabilities, or similar liabilities when traded as assets, or (*b*) another valuation technique that is consistent with the principles of FASB ASC 820, such as an income approach or a market approach. Further, if a restriction on the transference of the liability exists, the ASU clarifies that an entity is not required to factor that in to the inputs of the fair value determination. Lastly, the ASU also clarifies that a quoted price in an active market for the identical liability, or an unadjusted quoted price in an active market for the identical liability, when traded as an asset, are level 1 measurements within the fair value hierarchy. The guidance in this ASU is effective for the first reporting period (including interim periods) beginning after its issuance in August 2009. The full text of the ASU can be accessed from FASB's website at www.fasb.org.

Investments in Certain Entities That Calculate Net Asset Value per Share (or its Equivalent)

.148 FASB issued ASU No. 2009-12, *Fair Value Measurements and Disclosures (Topic 820): Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*, because of the complexities and practical difficulties in estimating the fair value of alternative investments. It is applicable to all reporting entities that hold an investment that is required or permitted to be measured or disclosed at fair value on a recurring or nonrecurring basis, and as of the reporting entity's measurement date, if the investment both

- does not have a *readily determinable fair value*. The FASB ASC glossary states that an equity security has a readily determinable fair value if it meets any of the following conditions:
    - The fair value of any equity security is readily determinable if sales prices or bid-and-asked quotations are currently available on a securities exchange registered with the SEC or in the over-the-counter (OTC) market, provided that those prices or quotations for the OTC market are publicly reported by NASDAQ or by Pink Sheets LLC. Restricted stock meets that definition if the restriction terminates within one year.
    - The fair value of an equity security traded only in a foreign market is readily determinable if that foreign market is of a breadth and scope comparable to one of the U.S. markets referred to previously.
    - The fair value of an investment in a mutual fund is readily determinable if the fair value per share (unit) is determined and published and is the basis for current transactions.

- is in an entity that has all of the attributes specified in FASB ASC 946-10-15-2 or, if one of those attributes are not met, is in an entity for which it is industry practice to issue financial statements using guidance that is consistent with the measurement principles in FASB ASC 946, *Financial Services—Investment Companies*.

.149 As a practical expedient, this ASU permits a reporting entity to measure the fair value of an investment within its scope on the basis of the net asset value (NAV) per share of the investment (or its equivalent) if the NAV is calculated in a manner consistent with the measurement principles of FASB ASC 946 as of the reporting entity's measurement date, including measurement of all or substantially all of the underlying investments of the investee in accordance with FASB ASC 820. If the practical expedient is used, certain attributes of the investment (such as restrictions on redemption) and transaction prices from principal-to-principal or brokered transactions will not be considered in measuring the investment's fair value.

.150 This ASU also requires disclosures by major category of investment about the attributes of investments, such as the nature of any restrictions on the investor's ability to redeem its investments at the measurement date, any unfunded commitments, and the investment strategies of the investees. The major category of investment is required to be determined based on the guidance in FASB ASC 320-10-50-1B. These disclosures are required for all investments within the scope of this ASU regardless of whether the practical expedient has been applied. The ASU adds an example of its required disclosures in FASB ASC 820-10-55-64A.

.151 These amendments are effective for interim and annual periods ending after December 15, 2009 and are included in FASB ASC 820-10. An AICPA practice aid, *Alternative Investments—Audit Considerations*, also is available and is a useful tool for auditors. It focuses on the existence and valuation assertions associated with alternative investments.

.152 In December 2009, the AICPA issued sections .18–.27 of TIS section 2220, *Long-Term Investments* (AICPA, *Technical Practice Aids*), to assist reporting entities when implementing the provisions of FASB ASC 820 to estimate the fair value of their investments in certain entities that calculate NAV. TIS sections 2220.18–.27 apply to investments that are required to be measured and reported at fair value and are within the scope of paragraphs 4–5 of FASB ASC 820-10-15. These questions and answers compliment the guidance provided in ASU No. 2009-12.

.153 Topics covered in these questions and answers include the following:

- The circumstances when NAV may be used to estimate the fair value of investments as a practical expedient
- How to identify the unit of account for interests in alternative investments
- Considerations for determining whether the reported NAV has been calculated in a manner consistent with FASB ASC 946
- Examples of circumstances when an adjustment to the reported NAV may be necessary
- How to adjust the reported NAV when it is not as of the reporting entity's measurement date
- How to adjust the reported NAV when it has not been calculated in accordance with FASB ASC 946
- The determination of the appropriate level within the fair value hierarchy for NAV of alternative investments in relation to the ability to redeem the investment versus the actual redemption request for the investment
- The definition of *near term* for the purposes of determining the appropriate level within the fair value hierarchy
- The tailoring of disclosures categories to address the nature and risks of investments
- Some considerations for determining the fair value of alternative investments when not utilizing NAV as a practical expedient

Fair Value Measurements Disclosures

.155 ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*, was issued to increase the transparency in financial reporting of fair value measurements. FASB noted that due to the different degrees of subjectivity and reliability on level 1, level 2, and level 3 fair value measurements, information about significant transfers between the three levels and the underlying reasons for such transfers would be useful to financial statements users.

.156 This ASU amends FASB ASC 820-10 to require the following new disclosures:

- *Transfers in and out of levels 1 and 2*. A reporting entity should disclose separately the amounts of significant transfers in and out of level 1 and level 2 fair value measurements and describe the reasons for the transfers.
- *Activity in level 3 fair value measurements*. In the reconciliation for fair value measurements using significant unobservable inputs (level 3), a reporting entity should present separately information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number).

.157 Additionally, the ASU amends FASB ASC 820-10 to clarify certain existing disclosures as follows:

- *Level of disaggregation*. A reporting entity should provide fair value measurement disclosures for each class of assets and liabilities. A class is often a subset of assets or liabilities within a line item in the statement of financial position. A reporting entity needs to use judgment in determining the appropriate classes of assets and liabilities.
- *Disclosures about inputs and valuation techniques*. A reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. Those disclosures are required for fair value measurements that fall in either level 2 or level 3.

.158 The amendments in ASU No. 2010-06 are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the rollforward of activity in level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years.

Disclosures About Credit Quality and Allowance for Credit Losses

.159 In July 2010, FASB issued ASU No. 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, which requires an entity to provide a greater level of disaggregated information about the credit quality of its financing receivables and its allowance for credit losses. The ASU amends the existing disclosures to require an entity to provide the following disclosures about its financing receivables on a disaggregated basis:

- A rollforward schedule of the allowance for credit losses from the beginning of the reporting period to the end of the reporting period on a portfolio segment basis, with the ending balance further disaggregated on the basis of the impairment method. For each disaggregated ending balance, the related recorded investment in financing receivables should also be disclosed.
- The nonaccrual status of financing receivables by class of financing receivables.
- Impaired financing receivables by class of financing receivables.

.160 The amendments in this ASU require an entity to provide the following additional disclosures about its financing receivables:

- Credit quality indicators of financing receivables at the end of the reporting period by class of financing receivables (see FASB ASC 310-10-55-19 for examples of credit quality indicators)
- The aging of past due financing receivables at the end of the reporting period by class of financing receivables
- The nature and extent of troubled debt restructurings that occurred during the period by class of financing receivables and their effect on the allowance for credit losses
- The nature and extent of financing receivables modified as troubled debt restructurings within the previous 12 months that defaulted during the reporting period by class of financing receivables and their effect on the allowance for credit losses
- Significant purchases and sales of financing receivables during the reporting period disaggregated by portfolio segment

.161 An entity must also describe, by portfolio segment, its accounting policies and methodology used to estimate its allowance for credit losses, including the identification of any changes to the entity's accounting policies or methodology from the prior period and the entity's rationale for the change.

.162 The amendments in this ASU apply to all entities with financing receivables. Examples of financing receivables include loans; trade receivables; notes receivable; and receivables relating to a lessor's leveraged, direct financing, and sales-type leases. See the "Pending Content" in paragraphs 13–15 of FASB ASC 310-10-55 for more information on the definition of *financing receivable*, including a list of items that are excluded from the definition (for example, debt securities). In addition, the "Pending Content" in paragraphs 7–12 of FASB ASC 310-10-55 illustrates certain disclosures required by this ASU.

.163 For public entities, the disclosures as of the end of a reporting period are effective for interim and annual reporting periods ending on or after December 15, 2010. The disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010. For nonpublic entities, the disclosures are effective for annual reporting periods ending on or after December 15, 2011.

Recently Issued GASB Pronouncements and Related Guidance

.164 The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard.

GASB Statement No. 58, Accounting and Financial Reporting for Chapter 9 Bankruptcies

.165 The objective of GASB Statement No. 58, which was issued in December 2009 and is effective for reporting periods beginning after June 15, 2009, is to provide accounting and financial reporting guidance for governments that have petitioned for protection from creditors by filing for bankruptcy under Chapter 9 of the U.S. Bankruptcy Code. It requires governments to remeasure liabilities that are adjusted in bankruptcy when the bankruptcy court confirms (that is, approves) a new payment plan.

.166 For accounts payable, notes, debentures and bonds, and related interest payable, this statement requires governments to base remeasurement on the new payment plan. Reductions in future interest payments would result in lower interest costs reported in future periods. Reductions to principal or accrued interest payable may result in gains reported at the time of the reduction. If the new payment plan does not indicate whether it reduces principal payments or future interest payments that have not been accrued, the debt should be remeasured at the present value of the future payments using the original discount rate, and a gain should be reported at the time of the reduction.

.167 For leases, pollution remediation liabilities, and liabilities for pension and other postemployment benefit plans, this statement requires remeasurement based on existing authoritative guidance. However, if a benefit plan is rejected in bankruptcy and becomes general unsecured debt, GASB Statement No. 58 requires

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

the existing liability to be removed and a new approved payment plan to be recognized as a judgment, with a gain or loss recognized for the difference. Gains or losses resulting from remeasurement of liabilities and assets should be classified as an extraordinary item.

.168 For governments that are not expected to emerge from bankruptcy as going concerns, this statement requires remeasurement of assets to a value that represents the amount expected to be received.

.169 Governments that have filed for bankruptcy are required to disclose information regarding, among other things, the pertinent conditions and events giving rise to the petition for bankruptcy, the expected gain, and the effects upon services.

GASB Statement No. 57, OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans

.170 Issued in December 2009, GASB Statement No. 57 addresses issues related to the use of the alternative measurement method and the frequency and timing of measurements by employers that participate in agent multiple-employer other postemployment benefit (OPEB) plans (that is, agent employers).

.171 This statement amends GASB Statement No. 45, *Accounting and Financial Reporting by Employers to Postemployment Benefits Other Than Pensions*, to permit an agent employer that has an individual-employer OPEB plan with fewer than 100 total plan members to use the alternative measurement method at its option, regardless of the number of total plan members in the agent multiple-employer OPEB plan in which it participates. Consistent with this change to the employer-reporting requirements, this statement also amends a GASB Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, requirement that a defined benefit OPEB plan obtain an actuarial valuation. The amendment permits the requirement to be satisfied for an agent multiple-employer OPEB plan by reporting an aggregation of results of actuarial valuations of the individual-employer OPEB plans or measurements resulting from the use of the alternative measurement method for individual-employer OPEB plans that are eligible.

.172 In addition, GASB Statement No. 57 clarifies that when actuarially determined OPEB measures are reported by an agent multiple-employer OPEB plan and its participating employers, those measures should be determined as of a common date and at a minimum frequency to satisfy the agent multiple-employer OPEB plan's financial reporting requirements.

.173 The provisions related to the use and reporting of the alternative measurement method are effective upon issuance. The provisions related to the frequency and timing of measurements are effective for actuarial valuations first used to report funded status information in OPEB plan financial statements for periods beginning after June 15, 2011.

Convergence With International Financial Reporting Standards

.174 Since the signing of the Norwalk Agreement by FASB and the International Accounting Standards Board (IASB), the bodies have had a common goal—one set of accounting standards for international use. *International convergence of accounting standards* refers to both the goal of this project and the path taken to reach it. The path toward reaching this goal will both improve U.S. GAAP and International Financial Reporting Standards (IFRSs) and eliminate the differences between them. In the Norwalk agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRSs. The "On the Horizon" section of this alert discusses these joint projects. For more information, visit www.fasb.org and www.iasb.org.

SEC Work Plan for Consideration of IFRSs

.175 In February 2010, the SEC issued Release No. 33-9109, *Commission Statement in Support of Convergence and Global Accounting Standards*. This release provides an update to the SEC's roadmap on its consideration of global accounting standards, including a confirmation of its continued support for the convergence of U.S. GAAP and IFRSs in order to narrow the differences between the two sets of standards. The SEC believes that a more comprehensive work plan is necessary to transparently lay out the work that must be done to support a decision on the appropriate course to incorporate IFRSs into the U.S. financial reporting system for U.S. issuers, including the scope, time frame, and methodology for any such transition. Therefore, the SEC has indicated that it will carefully consider and deliberate whether these changes are in the best interest of U.S. investors and markets.

.176 The SEC directed its staff to execute a work plan, the results of which will aid the SEC in its evaluation of the impact that the use of IFRSs by U.S. entities would have on the U.S. securities market. The work plan includes consideration of IFRSs, both as they currently exist and after the completion of the various convergence projects underway by FASB and the IASB. Among other things, the work plan addresses some of the comments and concerns received on the roadmap, including the following:

- Sufficient development and application of IFRSs for the U.S. reporting system
- The independence of standard setting for the benefit of investors
- Investor understanding and education regarding IFRSs
- Examination of the U.S. regulatory environment that would be affected by a change in accounting standards
- The impact on issuers, both large and small, including changes to accounting systems, changes to contractual arrangements, corporate governance considerations, and litigation contingencies
- Human capital readiness

.177 Beginning no later than October 2010, and frequently thereafter, the SEC staff will provide public progress reports on the work plan, as well as the status of the FASB and IASB convergence projects, until the work is complete. By 2011, assuming completion of these convergence projects and the staff's work plan, the SEC will decide whether to incorporate IFRSs into the U.S. financial reporting system and, if so, when and how. Commentors provided feedback on the timing discussed in the roadmap, suggesting that a four or five year time frame would be necessary to successfully implement a change in their financial reporting systems to incorporate IFRSs. Under that assumption, if the SEC determines in 2011 to incorporate IFRSs into the U.S. financial reporting system, the first time that U.S. entities would report under such a system would be no earlier than 2015. This timeline will be further evaluated as part of the work plan. The work plan is included as an appendix at the end of Release No. 33-9109 and also can be found on the SEC's website at www.sec.gov.

.178 In August 2010, the SEC issued two releases (Release Nos. 33-9133 and 33-9134, Notice of Solicitation of Public Comment on Consideration of Incorporating IFRS Into the Financial Reporting System for U.S. Issuers) to solicit public comment on its ongoing consideration of incorporating IFRSs into the financial reporting system for U.S. issuers. The first release contains requests for comment on three topics derived from the work plan that are related to the potential impact on investors. The second release contains requests for comment on three topics, also derived from the work plan, that are related to the potential impact on U.S. issuers. All comments will be available on the SEC's website.

International Financial Reporting Standard for Small and Medium-sized Entities

.179 The IASB issued *International Financial Reporting Standard for Small and Medium-sized Entities* (*IFRS for SMEs*) to be a self-contained global accounting and financial reporting standard applicable to the general purpose financial statements of, and other financial reporting by, entities that are known in many countries as SMEs. *IFRS for SMEs* is intended to be used by entities that publish general purpose financial statements for external users and do not have public accountability.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.180 The AICPA Governing Council recognizes the IASB as an accounting body for purposes of establishing international financial accounting and reporting principles. This amendment to appendix A of AICPA Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, ET sec. 202 par. .01), and Rule 203, *Accounting Principles* (AICPA, *Professional Standards*, ET sec. 203 par. .01), gives AICPA members the option to use IFRSs as an alternative to U.S. GAAP. As such, a key professional barrier to using IFRSs and, therefore, *IFRS for SMEs* has been removed. CPAs may need to check with their state boards of accountancy to determine the status of reporting on financial statements prepared in accordance with *IFRS for SMEs* within their individual state. Any remaining barriers may come in the form of unwillingness by a private company's financial statement users to accept financial statements prepared under *IFRS for SMEs*, and a private company's expenditure of money, time and effort to convert to *IFRS for SMEs*.

.181 Information about IFRSs and *IFRS for SMEs* can be found at www.ifrs.com. Additionally, to help its membership, the AICPA has developed an IFRS for SMEs—U.S. GAAP Comparison Wiki. The purpose of the Wiki is to provide a detailed and comprehensive comparison of *IFRS for SMEs* with corresponding requirements of U.S. GAAP. But it is more than just a comparison resource—it is a wiki. That means it is a collaborative, ongoing work in progress for anyone to contribute to and use. The Wiki is found at http://wiki.ifrs.com/.

.182 Entities interested in IFRS for SMEs or possibly adopting the standard may find it helpful to take the following actions:

- *Monitor the efforts of the AICPA/FAF/NASBA "Blue-Ribbon" Panel on Standard Setting for Private Companies*. For more information about the panel, go to www.fasb.org/cs/ContentServer?c=Page&pagename=FASB%2FPage%2FSectionPage&cid=1176156684820.
- *Monitor convergence efforts of FASB and the IASB*.
- *Stay informed on SEC developments*. Public companies will be directly affected by the SEC's decision to adopt IASB standards. The future of private company reporting will also likely be affected by an SEC mandate to adopt IFRSs.
- *Develop a high-level analysis of the potential impact on accounting policies, processes and systems, contracts, legal agreements, and financing and tax structures*.

Private Company Financial Reporting

.183 The AICPA and the Financial Accounting Foundation established the "blue-ribbon panel" to address how U.S. accounting standards can best meet the needs of U.S. users of private company financial statements. This panel also is sponsored by the National Association of State Boards of Accountancy. The "blue-ribbon panel" will provide recommendations through an issued report on the future of standard setting for private companies, including whether separate, stand-alone accounting standards for private companies are needed. The panel has discussed how smaller entities are struggling to understand and implement complex standards, which has resulted in entities taking more GAAP exceptions. Other key items include (*a*) whether U.S. GAAP is meeting private company user needs in a cost-beneficial manner for both users and preparers, (*b*) how private company standard setting in the United States compares to standard setting in other countries, and (*c*) possible lessons to be learned from alternatives seen in other countries. The panel's issued report will be made available to the public, and the resulting action plan is expected to be exposed for public comment prior to that plan being finalized. The panel will issue a report containing its recommendations to the Financial Accounting Foundation (FAF) board of trustees in January 2011. The report will be publicly available, and the resulting action plan is expected to be exposed for public comment prior to the plan being finalized.

.184 During the July 2010 meeting of the panel, seven alternative models for private company financial reporting were discussed. Models based on IFRSs and a model that would have resulted in no change to private company financial reporting were eliminated. All remaining models would result in differences in GAAP for private and public entities; the main focus of the panel moving forward will be to select a model that is relevant to users of private company financial reports because this has become the overriding issue. The three primary models the panel agreed to focus on going forward are U.S. GAAP with Exclusions for Private Companies—with enhancements; U.S. GAAP—Baseline GAAP with Public Company Add-Ons; and

Separate, Stand-Alone GAAP Based on Current U.S. GAAP. Most of the panel members also expressed their discontent with the current make-up of FASB and its heavy, but appropriate, focus on public companies. This led to another key discussion topic: the structure of whatever model is chosen—the current FASB; a restructured FASB (with greater private company representation); or a new, separate Private Company Standards Board under the oversight of FAF.

Recent Pronouncements

.185 AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers. The PCAOB establishes auditing and attestation standards for audits of issuers. For information on pronouncements issued subsequent to the writing of this alert, please refer to the AICPA website at www.aicpa.org, the FASB website at www.fasb.org, and the PCAOB website at www.pcaob.org. You also may look for announcements of newly issued accounting standards in the *CPA Letter Daily* and the *Journal of Accountancy*.

Recent Auditing and Attestation Pronouncements and Related Guidance

.186 The following table presents a list of recently issued audit and attestation pronouncements and related guidance.

Recent Auditing and Attestation Pronouncements and Related Guidance	
Statement on Auditing Standards (SAS) No. 120, *Required Supplementary Information* (AICPA, *Professional Standards*, AU sec. 558) Issue Date: February 2010 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard addresses the auditor's responsibility with respect to information that a designated accounting standard setter requires to accompany an entity's basic financial statements. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the basic financial statements does not cover required supplementary information. It also supersedes AU section 558A, *Required Supplementary Information* (AICPA, *Professional Standards*). This SAS is effective for periods beginning on or after December 15, 2010. Early application is permitted.
SAS No. 119, *Supplementary Information in Relation to the Financial Statements as a Whole* (AICPA, *Professional Standards*, AU sec. 551) Issue Date: February 2010 (Applicable to audits conducted in accordance with GAAS)	This SAS addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. The information covered by this SAS is presented outside the basic financial statements and is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Along with SAS No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, AU sec. 550), this SAS also supersedes AU section 551A, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*). This SAS is effective for periods beginning on or after December 15, 2010. Early application is permitted.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, AU sec. 550) Issue Date: February 2010 (Applicable to audits conducted in accordance with GAAS)	This SAS addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the financial statements does not cover other information, and the auditor has no responsibility for determining whether such information is properly stated. This SAS establishes the requirement for the auditor to read the other information of which the auditor is aware because the credibility of the audited financial statements may be undermined by material inconsistencies between the audited financial statements and other information. This SAS supersedes AU section 550A, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*), and along with SAS No. 119, supersedes AU section 551A. This SAS is effective for periods beginning on or after December 15, 2010. Early application is permitted.
SAS No. 117, *Compliance Audits* (AICPA, *Professional Standards*, AU sec. 801) Issue Date: December 2009 (Applicable to audits conducted in accordance with GAAS)	This standard amends AU section 801 to reflect changes in the compliance audit environment and incorporates the risk assessment standards. It requires the auditor to adapt and apply the AU sections of the AICPA's *Professional Standards* to compliance audits and provides guidance on how to do so. It is effective for compliance audits for fiscal periods ending on or after June 15, 2010. Earlier application is permitted.
SAS No. 115, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, AU sec. 325) Issue Date: October 2008 (Applicable to audits conducted in accordance with GAAS)	Replacing SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit*, this standard defines the terms *deficiency in internal control*, *significant deficiency*, and *material weakness*; provides guidance on evaluating the severity of deficiencies in internal control identified in an audit of financial statements; and requires the auditor to communicate in writing to management and those charged with governance significant deficiencies and material weaknesses identified in an audit. It is effective for audits of financial statements for periods ending on or after December 15, 2009. Earlier implementation is permitted.
Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801) Issue Date: April 2010	SSAE No. 16 supersedes the guidance for service auditors in AU section 324, *Service Organizations* (AICPA, *Professional Standards*), and addresses examination engagements undertaken by a service auditor to report on controls at organizations that provide services to user entities when those controls are likely to be relevant to user entities' internal control over financial reporting. Reports prepared in accordance with SSAE No. 16 may provide appropriate evidence under AU section 324. It is effective for service auditors' reports for periods ending on or after June 15, 2011. Earlier implementation is permitted.
Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 15, *Audit Evidence* (subject to approval by the Securities and Exchange Commission [SEC]) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard explains what constitutes audit evidence and establishes requirements for designing and performing audit procedures to obtain sufficient appropriate audit evidence to support the opinion expressed in the auditor's report.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
PCAOB Auditing Standard No. 14, *Evaluating Audit Results* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard establishes requirements regarding the auditor's evaluation of audit results and determination of whether the auditor has obtained sufficient appropriate audit evidence. The evaluation process set forth in this standard includes, among other things, evaluation of misstatements identified during the audit; the overall presentation of the financial statements, including disclosures; and the potential for management bias in the financial statements.
PCAOB Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard establishes requirements for responding to the risks of material misstatement in financial statements through the general conduct of the audit and performing audit procedures regarding significant accounts and disclosures.
PCAOB Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard establishes requirements regarding the process of identifying and assessing risks of material misstatement of the financial statements. The risk assessment process discussed in the standard includes information-gathering procedures to identify risks and an analysis of the identified risks.
PCAOB Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard describes the auditor's responsibilities for consideration of materiality in planning and performing an audit.
PCAOB Auditing Standard No. 10, *Supervision of the Audit Engagement* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard sets forth requirements for supervision of the audit engagement, including, in particular, supervising the work of engagement team members. It applies to the engagement partner and to other engagement team members who assist the engagement partner with supervision.
PCAOB Auditing Standard No. 9, *Audit Planning* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard establishes requirements regarding planning an audit, including assessing matters that are important to the audit, and establishing an appropriate audit strategy and audit plan.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Recent Auditing and Attestation Pronouncements and Related Guidance	
PCAOB Auditing Standard No. 8, *Audit Risk* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard discusses the auditor's consideration of audit risk in an audit of financial statements as part of an integrated audit or an audit of financial statements only. It describes the components of audit risk and the auditor's responsibilities for reducing audit risk to an appropriately low level in order to obtain reasonable assurance that the financial statements are free of material misstatement.
PCAOB Auditing Standard No. 7, *Engagement Quality Review* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards) Issue Date: January 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard and its related amendments supersede the interim concurring partner review requirements and update the interim quality control standards. An engagement quality review and concurring approval of issuance are required for each audit engagement and for each engagement to review interim financial information conducted pursuant to the standards of the PCAOB. The standard provides a framework for the engagement quality reviewer to objectively evaluate the significant judgments made and related conclusions reached by the engagement team in forming an overall conclusion about the engagement. It is effective for engagement quality reviews of audits and interim reviews for fiscal years that began on or after December 15, 2009.
PCAOB Staff Question and Answer, *Auditing Standard No. 7,* Engagement Quality Review (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 100.10) Issue Date: February 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This staff question and answer provides further implementation guidance on the documentation requirements of Auditing Standard No. 7 in light of comments the SEC received during its comment period.
PCAOB Staff Audit Practice Alert No. 6, *Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants from Outside the Firm* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.06) Issue Date: July 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This alert is intended to remind registered public accounting firms of their obligations when using the work of other firms or using assistants engaged from outside the firm. The alert was prompted by observations by the PCAOB that a number of registered public accounting firms located within the United States have been issuing reports on financial statements filed by issuers that have substantially all of their operations outside of the United States, and some of these firms may not be conducting those audits in accordance with PCAOB standards.

Recent Auditing and Attestation Pronouncements and Related Guidance	
PCAOB Staff Audit Practice Alert No. 5, *Auditor Considerations Regarding Significant Unusual Transactions* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.05) Issue Date: April 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This alert explains that significant unusual transactions, especially those close to period-end that pose difficult substance over form questions, can provide opportunities for entities to engage in fraudulent financial reporting. This staff audit practice alert is designed to remind auditors of public companies about their responsibilities to assess and respond to the risk of material misstatement of the financial statements due to error or fraud posed by significant unusual transactions.

Recent ASUs

.187 The following table presents, by codification area, a list of recently issued ASUs, through the issuance of ASU No. 2010-24. However, this table does not include ASUs that are SEC updates (such as ASU No. 2010-19, *Foreign Currency [Topic 830]: Foreign Currency Issues: Multiple Foreign Currency Exchange Rates [SEC Update]*) or ASUs that are technical corrections to various topics. FASB ASC does include SEC content to improve the usefulness of FASB ASC for public companies, but the content labeled as SEC staff guidance does not constitute rules or interpretations of the SEC nor does such guidance bear official SEC approval.

Recent AICPA Independence and Ethics Developments

.189 The Audit Risk Alert *Independence and Ethics Developments—2010/11* (product no. 0224710) contains a complete update on new independence and ethics pronouncements. This alert will heighten your awareness of independence and ethics matters likely to affect your practice. Obtain this alert by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Establishing and Maintaining Internal Control

.190 One of the Professional Ethics Executive Committee's (PEEC's) current projects deals with a possible inconsistency within Interpretation No. 101-3, "Performance of Nonattest Services," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .05). Interpretation No. 101-3 provides examples of general activities that would impair a member's independence, including establishing or maintaining internal controls, including performing ongoing monitoring activities for a client. The PEEC recognizes that some practitioners perceive an inconsistency in Interpretation No. 101-3 because certain bookkeeping services and other nonattest services that are permitted under Interpretation No. 101-3 could be viewed as "maintaining internal control" for the client.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.191 To address the possible inconsistency in Interpretation No. 101-3, the PEEC is considering possible clarifying revisions to Interpretation No. 101-3. The revisions would provide more descriptive language about management responsibilities, which should help members better distinguish between permissible and prohibited nonattest services. Readers are encouraged to monitor the progress of this project.

.192 PEEC meeting information, including meeting agendas, discussion materials, and minutes of prior meetings can be found at www.aicpa.org/InterestAreas/ProfessionalEthics/Community/MeetingMinutesandAgendas/Pages/MeetingInfo.aspx.

.193 Exposure drafts issued by the PEEC can be found at www.aicpa.org/InterestAreas/ProfessionalEthics/Community/ExposureDrafts/Pages/ExposureDrafts.aspx.

On the Horizon

.194 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the health care industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.195 Information on, and copies of, outstanding exposure drafts may be obtained from the various standard setters' websites. These websites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard setting bodies for further information.

Overhaul Project—AICPA Audit and Accounting Guide *Health Care Entities*

.196 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide *Health Care Entities*, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1996. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

Auditing and Attestation Pipeline—Nonissuers

ASB Clarity Project

.197 In response to growing concerns about the complexity of standards, the ASB has commenced a large-scale clarity project to revise all existing auditing standards so they are easier to read and understand. Over the last few years, the ASB has been redrafting all of the existing auditing sections contained in the *Codification of Statements on Auditing Standards* (AU sections of the AICPA's *Professional Standards*) to apply the clarity drafting conventions and converge with the ISAs issued by the IAASB. The majority of the clarified standards will be issued in a single SAS codified as AU sections, with each section assigned a section number and title. When the new SAS becomes effective, the SASs issued prior to SAS No. 117, *Compliance Audits* (AICPA, *Professional Standards*, vol. 1, AU sec. 801), will be superseded. The ASB proposes that most redrafted standards become effective at the same time and is working toward completing the project in the first half of 2011. Two possible exceptions to that timeframe include the clarity redrafts of AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern,* and AU section 532, *Restricting the Use of an Auditor's Report* (AICPA, *Professional Standards*, vol. 1).

.198 In May 2010, the expected effective date of the clarified standards was revised to be applicable for audits of financial statements for periods ending on or after December 15, 2012. The standards recently issued in clarified format (SAS Nos. 117–120) have different effective dates. The ASB believes that having a single effective date for most of the clarified standards will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. This expected date depends on

satisfactory progress being made and will be amended, if necessary. Further, early adoption of the new SAS will not be appropriate. The SAS that will encompass all clarified AU sections will be issued with the next consecutive number that is available. See the explanatory memorandum "Clarification and Convergence," the discussion paper *Improving the Clarity of ASB Standards*, and *Clarity Project: Questions and Answers* at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestStndrds/ASBClarity/Pages/ImprovingClarityASBStandards.aspx. All clarified SASs that have been finalized by the ASB but are not yet issued as authoritative can be found at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestStndrds/ASBClarity/Pages/Final%20Clarified%20Statements%20on%20Auditing%20Standards.aspx.

Interim Financial Information

.199 In July 2010, the ASB issued two proposed SASs on interim financial information. The first, *Revised Applicability of Statement on Auditing Standards No. 116*, Interim Financial Information, is intended to revise paragraph 5 of SAS No. 116 (AICPA, *Professional Standards*, vol. 1, AU sec. 722), so that the guidance in SAS No. 116 would be applicable when the auditor audited the entity's latest annual financial statements and the appointment of another auditor to audit the current year financial statements is not effective prior to the beginning of the period covered by the review. Currently, the guidance in SAS No. 116 is applicable when the auditor performs the audit of the latest annual financial statements and expects to be engaged to audit the current year financial statements (and, therefore, is not applicable when the auditor expects that a new auditor may be engaged for the current year). This proposed amendment would be effective for interim reviews of interim financial information for periods beginning after December 15, 2011, with early implementation permitted. Comments are due by October 8, 2010.

.200 The second proposal on interim financial information, *Interim Financial Information* (Redrafted), would supersede SAS No. 116 and represents the redrafting of the guidance to apply clarity drafting conventions. The main changes to existing standards are as follows:

- Replacement of the term *accountant* with *auditor*
- The change to paragraph 5 discussed in the prior paragraph
- Requirement of the auditor to issue a written report unless the review of the interim financial information is required by a third party and the third party does not require a written review report
- Allowance of oral reports for entities that are subject to external requirements to report in a manner that is substantially similar to the reporting required of issuers, pursuant to PCAOB standards
- Requirement for the auditor to perform procedures consistent with those required for acceptance of an engagement to audit financial statements
- Requirement for the review report to include a statement that the review of interim financial information was conducted in accordance with auditing standards generally accepted in the United States of America

.201 This proposed SAS would be effective for reviews of interim financial information for interim periods of fiscal years beginning on or after December 15, 2012. Comments for this proposed SAS are also due by October 8, 2010.

Exposure Drafts on Auditor's Reports

.202 The ASB issued three proposed SASs related to auditor's reports: *Forming an Opinion and Reporting on Financial Statements*, *Modifications to the Opinion in the Independent Auditor's Report*, and *Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report*. These proposed standards are drafted with the ASB's clarity drafting conventions and are intended to converge with ISAs. The intent of issuing three separate SASs is to assist practitioners in identifying and applying the reporting requirements and guidance. The ASB has made various changes to the related ISAs to tailor them to the United States; however these changes have not been substantial in nature.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.203 The proposed SASs are expected to be effective for audits of financial statements for periods ending on or after December 15, 2012. Auditors are encouraged to review the exposure draft and be alert for developments on this topic.

Exposure Drafts on Special Considerations Audits

.204 Another exposure draft issued by the ASB contains two proposed SASs: *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks and Special Considerations—Audits of Single Financial Statements* and *Specific Elements, Accounts, or Items of a Financial Statement*. These proposed standards have been drafted with the clarity drafting conventions and are intended to converge with the equivalent ISAs. No meaningful differences exist between these proposed standards and the ISAs. *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* addresses the application of GAAS to financial statements prepared under the cash, tax, regulatory, or contractual bases of accounting. It also replaces the term other comprehensive basis of accounting with special purpose framework.

.205 *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement* introduces new planning, performance, and reporting requirements for these engagements. The proposed SAS also clarifies that a single financial statement and a specific element of a financial statement include the related notes.

.206 The comment period for the proposed SASs ended in December 2009. The proposed SASs are expected to be effective for audits of financial statements for periods ending on or after December 15, 2012. Auditors are encouraged to review the exposure draft and be alert for developments on this topic.

Auditing and Attestation Pipeline—Issuers

Confirmations

.207 The PCAOB has proposed a draft of an auditing standard on confirmations. A concept release was originally issued in April 2009 and received 24 comment letters. This proposed auditing standard, issued in July 2010, would strengthen the requirements under the current auditing standard, AU section 330, *The Confirmation Process* (AICPA, *PCAOB Standards and Related Rules*, Interim Standards), and replace it, upon final issuance of a standard and approval from the SEC. The proposed new standard

- requires confirmation procedures for specific accounts, such as receivables that arise from credit sales, loans, or other transactions, and also in response to significant risks that relate to the relevant assertions that can be adequately addressed by confirmation procedures.
- incorporates procedures in response to the risk of material misstatement, such as in the areas of investigating exceptions reflected on confirmation responses and evaluating nonresponses to confirmation requests.
- updates the confirmation guidance to reflect significant advances in technology and explains that confirmation responses received electronically (for example, by fax e-mail, through an intermediary, or direct access) might involve additional risks relating to reliability. Therefore, the auditor must perform additional requirements.
- defines a confirmation response to include electronic or other medium.
- enhances requirements when confirmation responses include disclaimers and restrictive language by requiring the auditor to evaluate the effect on the reliability of a confirmation response. Further, if the disclaimer or restrictive language causes doubts about the reliability of a confirmation response, the auditor should obtain additional appropriate audit evidence.

.208 In drafting this proposed standard, the PCAOB considered the guidance contained in ISA 505, *External Confirmations*, and the AICPA's proposed guidance on confirmations. This standard is anticipated to be effective for auditors for fiscal years ending on or after December 15, 2011.

Communications With Audit Committees

.209 In March 2010, the PCAOB proposed for comment an auditing standard on *Communications with Audit Committees* and a series of related amendments to its interim standards that are intended to (*a*) enhance the relevance and effectiveness of the communications between the auditor and the audit committee and (*b*) emphasize the importance of effective, two-way communications between the auditor and the audit committee to better achieve the objectives of the audit. Two of the new requirements would be for the auditor (*a*) to establish a mutual understanding of the terms of the audit engagement with the audit committee and to document that understanding in the engagement letter and (*b*) to evaluate the adequacy of two-way communication between the auditor and audit committee. Additionally, the proposal also includes requirements for the auditor to communicate with the audit committee regarding the following:

- An overview of the audit strategy and timing of the audit, including a discussion of significant risks; the use of the internal audit function; and the roles, responsibilities, and location of firms participating in the audit
- Critical accounting policies, practices, and estimates
- The auditor's evaluation of the entity's ability to continue as a going concern

.210 The proposed standard would become effective, subject to SEC approval, for audits of fiscal years beginning after December 15, 2010.

Joint FASB and IASB Accounting Pipeline

FASB and IASB Memorandum of Understanding

.211 The year 2010 has been a pivotal year of progress toward the goal of completing the important projects in the "Memorandum of Understanding" (MoU) during 2011. Since its original issuance in 2006, FASB and the IASB have continued to reaffirm their respective commitments to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. FASB and the IASB agreed that the goal of joint projects is to produce common, principles-based standards, subject to the required due process. FASB and the IASB have agreed to intensify their efforts to complete the major joint projects described in the MoU and are committed to developing, and making publicly available, quarterly progress reports on these major projects. The MoU identifies 11 convergence topics:

- Financial instruments
- Consolidations
- Derecognition
- Fair value measurement
- Revenue recognition
- Leases
- Financial instruments with characteristics of equity
- Financial statement presentation
- Balance sheet netting
- Statement of comprehensive income
- Discontinued operations

.212 A progress report for the quarter ended March 31, 2010, highlighted the following topics: (*a*) on the financial instruments and insurance contracts topics, the boards have reached different conclusions on significant technical issues that may affect the project timetables of these topics and (*b*) the boards agreed to explore an alternative approach to lessor accounting that may affect the project timetable of this topic. FASB

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

and the IASB also have several other joint projects in process, including balance sheet—offsetting, emissions trading schemes, and reporting discontinued operations. In March 2010, the exposure draft *Conceptual Framework for Financial Reporting* was published for public comment. In early June 2010, the boards issued a joint statement that discusses the boards' recognition of the challenges that arise from seeking effective global stakeholder feedback. Specifically, the boards were scheduled to expose for comment numerous major exposure drafts during the second quarter of 2010, and stakeholders voiced concern about their ability under those circumstances to provide high-quality input. The boards have developed a modified strategy to accommodate these concerns by prioritizing the major projects in the MoU, staggering the publication of exposure drafts by limiting the number of significant exposure drafts to four per quarter, and issuing a separate consultation document seeking stakeholder input about effective dates and transition methods.

.213 The priority joint projects are financial instruments, revenue recognition, leases, the presentation of other comprehensive income, and fair value measurements. The boards also decided to issue separate exposure drafts to address differences in the two sets of standards on balance sheet netting of derivative contracts and other financial instruments. The IASB has also made its projects on improved disclosures about derecognized assets and other off balance sheet risks, consolidations, and insurance contracts priorities. June 2011 or earlier will remain the target completion date for these priority convergence projects; the target completion dates for the nonpriority projects, however, have been extended into the second half of 2011. Additionally, the comments received on exposure drafts will affect the timeline of finalized converged standards. The boards' joint statement states that this action is not expected to negatively affect the SEC's work plan to consider in 2011 whether and how to incorporate IFRSs into the U.S. financial system.

.214 Readers are encouraged to remain current for the remainder of the exposure draft releases and other developments on convergence through the AICPA's website, www.ifrs.com, in addition to the FASB, IASB, and SEC websites. The growing acceptance of IFRSs as a basis for U.S. financial reporting could represent a fundamental change for the U.S. accounting profession.

Comprehensive Income Exposure Draft

.215 In May 2010, FASB issued a proposed ASU on comprehensive income that would require an entity to report total comprehensive income in a continuous financial statement in two parts: net income and other comprehensive income. In that financial statement, the components of net income and the components of other comprehensive income should be displayed. The proposed ASU is intended to simplify how comprehensive income is reported by eliminating two options for how items of comprehensive income are displayed. The proposed ASU contains illustrative examples of the revised financial statement. This proposed ASU is the result of a joint project as part of IFRSs and U.S. GAAP convergence, and the IASB has separately issued a similar document. The proposed amendments would be applied on a fully retrospective basis to improve comparability between reporting periods. Further, because compliance with the proposed amendments is already permitted, early adoption would be permitted. FASB plans to align the effective date with the effective date of the amendments in the proposed ASU on financial instruments. The IASB and FASB aim to finalize an improved and converged standard on other comprehensive income in the fourth quarter of 2010.

Financial Instruments Exposure Draft

.216 Also, in May 2010, FASB issued a proposed ASU on accounting for financial instruments, derivative instruments, and hedging activities. The main objective of this proposal is to provide financial statement users with a more timely and representative depiction of an entity's involvement in financial instruments while reducing the complexity in accounting for those instruments. It develops a consistent framework for classifying financial instruments, removes the threshold for recognizing credit impairments, creating a single credit impairment model for both loans and debt securities; and makes changes to the requirements to qualify for hedge accounting. The main provisions of these amendments are as follows:

- Most financial instruments would be measured at fair value in the statement of financial position each reporting period.

- Changes in fair value of equity securities, certain hybrid instruments, and financial instruments that can be prepaid in such a way that the holder would not recover substantially all of its investment would be recognized in net income each reporting period regardless of an entity's business strategy for those financial instruments.
- Hybrid financial instruments containing embedded derivatives that would otherwise have been required to be bifurcated under FASB ASC 815-15 would be classified and measured at fair value in their entirety, with changes accounted for through net income.
- For financial instruments for which an entity's business strategy is to hold for collection or payment(s) of contractual cash flows, a reconciliation from amortized cost to fair value would be required on the statement of position; with the exception of certain liabilities that qualify for the amortized cost option, all other changes in fair value from these instruments would be recognized in other comprehensive income each reporting period. Therefore, net income will remain relatively unchanged because only changes arising from interest accruals, credit impairments, and realized gains and losses would be recognized in net income each reporting period.
- The existing probable threshold for recognizing impairments on loans would be removed. (Currently, FASB ASC 310-10-35-4 states that the concept in U.S. GAAP is that impairment of receivables [including loans] should be recognized when, based on all available information, it is probable that a loss has been incurred based on past events and conditions existing at the date of the financial statements. Probable is defined by FASB ASC 310-10-20 as when the future event or events are likely to occur.)
- For changes in the value of financial instruments measured through other comprehensive income, an entity is required to determine if a credit impairment is appropriate at the end of each reporting period based on information related to past events and existing economic conditions. An entity would recognize in net income the loss related to the amount of credit impairment for all contractual amounts the entity does not expect to collect.
- Core deposit liabilities would be remeasured each period using a current value method that reflects the economic benefit that an entity receives from this lower cost, stable funding source.
- Interest income would be recognized after considering cash flows that are not expected to be collected, which would better reflect a financial instrument's interest yield.
- Quantitative-based hedging requirements would be replaced with more qualitative-based assessments that would make it easier to qualify for hedge accounting. The shortcut method and critical terms match method would be eliminated. An entity would be able to designate particular risks as the risk being hedged in a hedging relationship, and only the effects of the risks hedged would be reflected in net income.
- Hedge accounting would be discontinued only if the criteria for hedge accounting are no longer met or the hedging instrument expires or is sold, terminated, or exercised. An entity would not be permitted to discontinue hedge accounting by simply removing the designation of a hedging relationship.

.217 Some specific types of financial instruments, such as pension obligations and leases, would be exempt from the proposed guidance. Additionally, short term receivables and payables would continue to be measured at amortized cost (plus or minus any fair value hedging adjustments). This proposed ASU was not issued jointly with the IASB and does not contain converged guidance; however, the goal still remains for both boards to issue comprehensive improvements to foster international comparability of financial information about financial instruments. The IASB completed its first phase of classification and measurement with the issuance of IFRS 9, *Financial Instruments*, in November 2009. The IASB also issued two exposure drafts on amortized cost and impairment and fair value option for financial liabilities in late 2009 and mid-2010, respectively; the third topic, hedge accounting, is still being deliberated by the IASB, and an exposure draft is expected in the near term. The boards have stated that they will consider together the comment letters and other feedback received on each boards' exposure drafts in an effort to reconcile their differences in ways that foster improvement and convergence.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.218 The effective date of these amendments will be established upon issuance of the final ASU, which is expected in the second quarter of 2011; it is estimated to have an effective date in 2013. However, nonpublic entities with less than $1 billion in total consolidated assets would be granted an additional 4 years to implement certain requirements related to loans and core deposits. Upon its application, an entity would apply the proposed guidance by means of a cumulative-effect adjustment to the statement of financial position for the reporting period that immediately precedes the effective date.

.219 FASB has issued frequently asked questions for the proposed ASU to clarify the proposal by answering common questions received about the proposed guidance. This document can be accessed at www.fasb.org/cs/ContentServer?c=Document_C&pagename=FASB%2FDocument_C%2FDocumentPage&cid=1176157295447.

Revenue Recognition Exposure Draft

.220 The revenue recognition project is intended to develop a single, common revenue recognition model that can be applied to a wide range of industries and transaction types. The standards resulting from this project will eliminate weaknesses and inconsistencies between the existing standards. A joint discussion paper issued by the boards proposed a single revenue recognition model. A joint exposure draft, *Revenue from Contracts with Customers*, from the boards was published in June 2010, and the boards aim to issue a final converged standard by the second quarter of 2011. The proposed standard would replace International Accounting Standard (IAS) 18, *Revenue*; IAS 11, *Construction Contracts*; and related interpretations in IFRSs; under U.S. GAAP, it would supersede most of the guidance contained in FASB ASC 605, *Revenue Recognition*. The core principle of the draft standard is that an entity should recognize revenue from contracts when it transfers goods or services to the customer in the amount of consideration the entity receives, or expects to receive, from the customer.

.221 In addition to eliminating weaknesses and inconsistencies between IFRSs and U.S. GAAP, this proposal intends to provide a more robust framework for addressing various revenue recognition issues; improve comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets; and simplify the preparation of financial statements by reducing the number of requirements to which entities must refer. The proposed standard will also amend the existing guidance on recognition of a gain or loss on the sale of some nonfinancial assets that are not an output of the entity's ordinary activities (for example, property, plant, and equipment) to be consistent with the proposed revenue recognition and measurement requirements. To implement the preceding core principle of revenue recognition, an entity would

- identify the contract(s) with the customer.
- identify the separate performance obligations in the contract (performance obligation is an enforceable promise [whether explicit or implicit] in a contract with a customer to transfer a good or service to the customer).
- determine the transaction price (transaction price is the amount of consideration that an entity receives, or expects to receive, from a customer in exchange for transferring goods or services promised in the contract).
- allocate the transaction price to the separate performance obligations.
- recognize revenue when the entity satisfies each performance obligation by transferring a promised good or service to a customer (a good or service is transferred when the customer obtains control of that good or service).

.222 The proposal also includes guidance on accounting for some costs. An entity would recognize the costs of obtaining a contract as expenses when incurred. For expenses incurred in fulfilling a contract, if they are ineligible for capitalization in accordance with other guidance, an entity would only be able to recognize an asset if those costs relate directly to a contract (or a specific contract under negotiation); generate or enhance resources of the entity that will be used in satisfying performance obligations in the future; and are expected to be recovered. The proposed guidance would differ from current practice in the following ways: (*a*)

recognition of revenue only from the transfer of goods or services, (*b*) identification of separate performance obligations, (*c*) licensing and rights to use, (*d*) effect of credit risk, (*e*) use of estimates, (*f*) accounting for costs, and (*g*) disclosure.

.223 As discussed previously, because the revenue recognition project is one of many standards the boards expect to issue as converged and final in 2011, the boards plan to invite additional comment through a separate consultation on how best to transition over to the new standards. Therefore, no expected specific effective date is stated at this point. Comments on the exposure draft are due on October 22, 2010. This topic is considered by many to be the most pervasive of any FASB has ever worked on. The reader is encouraged to review the exposure draft, consider if it is operational to you or your clients' common revenue transactions, and share any resulting concerns with FASB. The boards also anticipate holding public roundtable meetings after the end of the comment period.

Fair Value Exposure Draft

.224 The fourth and final exposure draft of the second quarter of 2010 was *Fair Value Measurements and Disclosures (Topic 820): Amendments for Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The amendments in the exposure draft are intended to result in common fair value measurement and disclosure requirements in financial statements prepared in accordance with U.S. GAAP and IFRSs. Many of the requirements are not intended to result in a change in the application of the requirements in FASB ASC 820; however, some are intended to clarify or change the application of existing fair value guidance. Additionally, some wording changes were made to ensure the guidance is described consistently between U.S. GAAP and IFRSs. The most significant proposed amendments include the following:

- Highest and best use and valuation premise
- Measuring the fair value of an instrument classified in shareholders' equity
- Measuring the fair value of financial instruments that are managed within a portfolio
- Application of blockage factors and other premiums and discounts in a fair value measurement
- Additional disclosures about fair value measurements

.225 The first two of these significant amendments are intended to clarify the application of existing fair value measurement guidance. The last three of these significant amendments would change a particular principle of fair value guidance.

.226 The amendments would specify that the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets, not when measuring the fair value of financial assets or liabilities. The FASB ASC glossary defines *highest and best use* as, in broad terms, the use of an asset by market participants that would maximize the value of the asset or the group of assets within which the asset would be used. The rationale for this proposed change is that the highest and best use concept is irrelevant when measuring the fair value of financial assets or liabilities because these items do not have alternative uses and their fair values do not depend on their use within a group of other assets or liabilities. These changes are not expected to affect the fair value measurement of nonfinancial assets. However, they might affect current practice for reporting entities that apply the in-use valuation premise more broadly.

.227 The amendments related to measuring the fair value of an instrument classified in shareholders' equity would specify that a reporting entity should measure the fair value of its own equity instrument from the perspective of a market participant who holds the instrument as an asset. An example of an instrument that would be measured at fair value and classified in shareholders' equity is equity interests issued as consideration in a business combination. Currently, U.S. GAAP does not contain explicit guidance on this topic, and the proposed amendments are expected to increase the comparability among reporting entities applying U.S. GAAP and IFRSs.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.228 Regarding measuring the fair value of financial instruments that are managed within a portfolio, the proposed amendments would allow an exception to FASB ASC 820 for measuring fair value when a reporting entity manages its net exposure, rather than its gross exposure, to the underlying risks. A reporting entity that holds a group of financial assets and financial liabilities is exposed to interest rate risk, currency risk, or other price risk (market risks) and to the credit risk of each of the counterparties. The proposed guidance is intended to coincide with financial institutions and other similar reporting entities that hold and manage these instruments in that manner. Specifically, a reporting entity could measure the fair value of the financial assets and financial liabilities that are managed in that way on the basis of the price that would be received to sell a net long position (that is, an asset) for a particular risk or to transfer a net short position (that is, a liability) for a particular risk in an orderly transaction between market participants at the measurement date. The proposed amendments would result in U.S. GAAP and IFRSs having the same requirements for measuring the fair value of financial instruments; additionally, these changes would not change how financial assets and financial liabilities that are managed on the basis of a reporting entity's net risk exposure are measured in practice. However, they might affect the current practice for reporting entities that apply the in-use valuation premise more broadly.

.229 The proposed amendments regarding the application of blockage factors and other premiums and discounts in fair value measurements would make two changes to current guidance. Currently, under U.S. GAAP, use of a blockage factor in fair value measurements is only prohibited when fair value is measured using a quoted price for an asset or a liability (or similar assets or liabilities). This would be level 1 within the fair value hierarchy. The first change from the proposed amendments is that a blockage factor is not relevant and, therefore, also should not be used when fair value is measured using a valuation technique that does not use a quoted price. This would be level 2 or level 3 within the fair value hierarchy. Second, the amendments specify that fair value measurements categorized within level 2 and level 3 take into account other premiums and discounts when market participants would consider those premiums or discounts when pricing an asset or a liability, consistent with the unit of account for that asset or liability. Examples include a control premium or a noncontrolling interest discount. These proposed amendments may affect current practice for any reporting entities applying a blockage factor in fair value measurements that is measured using quoted prices and categorized within level 2 of the fair value hierarchy.

.230 Lastly, the amendments propose additional disclosures about fair value measurements. More information about the following would be required for disclosure:

- The effect on a fair value measurement of changing one or more unobservable inputs that could have reasonably been used to measure fair value in the circumstances
- Use of an asset in a way that differs from the asset's highest and best use when that asset is recognized at fair value in the statement of financial position on the basis of its highest and best use
- The categorization by level within the fair value hierarchy for items that are not measured at fair value in the statement of financial position but for which the fair value of such items is required to be disclosed

.231 The effective dates of these proposed amendments would be determined after the feedback from the exposure draft is considered. However, when it is effective, it will be effective as of the beginning of the period of adoption, and an entity would recognize a cumulative effect adjustment in beginning retained earnings in the period of adoption if a difference exists in a fair value measurement of an item recorded at fair value as a result of applying these amendments. Additional disclosures would be required on a prospective basis. These amendments are expected to achieve the objective of developing common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs. A final ASU is expected to be issued in the first quarter of 2011.

Financial Statement Presentation Staff Draft

.232 FASB and the IASB are working together to establish a common standard that would improve how information is organized and presented in financial statements. This common standard is intended to address users' concerns that existing requirements permit too many alternative types of presentation and that

information in financial statements is highly aggregated and inconsistently presented, making it difficult to fully understand the relationship between an entity's financial statements and its financial results. In 2008, a discussion paper was issued by the boards that outlined the proposed principles for presenting financial statements in a way that portrays a cohesive financial picture of an entity.

.233 Given the magnitude of this project, the expected implementation costs, and the substantial effects it will have on financial statement presentation for many years to come, the boards decided in May 2010 to modify the strategy for this project. Before finalizing an exposure draft, the boards decided to engage in additional outreach activities that focus on the perceived benefits and costs of the proposals and the implications of the proposals for financial reporting by financial service entities. The boards plan on discussing these two areas of focus with preparers and users of financial statements. This outreach will be based on a rough draft of a proposed standard, known as a *staff draft*, and reflects the cumulative tentative decisions made by the boards, concluding with their joint meeting in April 2010. This staff draft was made publicly available solely for this purpose.

.234 The proposals in this project would be applicable to all entities, except a benefit plan within the scope of FASB ASC 960, *Plan Accounting—Defined Benefit Pension Plans*; FASB ASC 962, *Plan Accounting—Defined Contribution Pension Plans*; and FASB ASC 965, *Plan Accounting—Health and Welfare Benefit Plans*, or IAS 26, *Accounting and Reporting by Retirement Benefit Plans*. The two core financial statement principles in this proposal are cohesiveness and disaggregation. A common structure for the statements of financial position, comprehensive income, and cash flows would be established in the form of required sections, categories or subcategory, and related subtotals. Some proposed specific changes in the classification and format of financial statements include the following:

- Related information would be displayed in the same sections, categories, and subcategory in each statement so that information is more easily associated.
- Presentation of business and financing activities would be separated as follows:
    - The business section would include items that are part of an entity's daily operations and other income generating activities.
    - The financing section would include items that are part of an entity's activities to obtain (or repay) capital.
- Discontinued operations and income taxes would be presented in their own separate sections.
- The statement of changes in equity would not include the sections and categories used in the other statements because that statement presents information solely about changes in items classified in the equity category in the statement of financial position.

.235 Further, FASB plans to propose some changes that are already required by IAS 1, *Presentation of Financial Statements*. The proposal would define and provide the requirements for a complete set of financial statements. Currently, a complete set of financial statements for the period is defined only in the FASB Concepts Statements. An entity would also be required to present one period of comparative information. A complete set of financial statements would consist of, at a minimum, statements of financial position, comprehensive income, cash flows and changes in equity, and notes to financial statements for two periods (the current period and the previous period). Also, an opening statement of financial position would be part of a complete set of financial statements if an entity applies an accounting principle retrospectively, restates its financial statements, or reclassifies items in the financial statements.

.236 The boards' tentative decisions on financial statement presentations do differ in a few ways in relation to minimum line requirements for the statement of financial position, segment reporting, and net debt presentation. Of these three, the differing stance on segment reporting is the only significant difference. The boards now aim to issue an exposure draft in the first quarter of 2011 and a final improved and converged standard in the fourth quarter of 2011. Both the introduction to the staff draft and the staff draft can be accessed from FASB's website at www.fasb.org.

Leases Exposure Draft

.237 During the third quarter of 2010, the IASB and FASB published for public comment joint proposals to improve the financial reporting of lease contracts. These proposals would result in a consistent approach to lease accounting for both lessees and lessors—a "right of use" approach. This would result in the liability for payments arising under the lease contract and the right to use the underlying asset being included in the lessee's statement of financial position, therefore providing more complete and useful information to investors and other users of financial statements. Currently, the accounting for a lease depends on its classification; an operating lease results in the lessee not recording any assets or liabilities in the statement of financial position under either IFRSs or U.S. GAAP, whereas a capital lease results in the lessee recognizing an asset and an obligation. Under the proposed guidance, lessees would only have one method of accounting for leases, which would produce more complete and comparable financial reporting in addition to reducing the opportunity to structure transactions to achieve a desired accounting outcome.

.238 The scope of the new lease guidance includes all leases (including leases of right-of-use assets in a sublease) other than leases of biological and intangible assets, leases to explore for or use natural resources, and leases of some investment properties. Under this new guidance, all lessees would use a single method of accounting for all leases: an asset would be recognized representing the lessee's right to use the leased (underlying) asset for the lease term (the right-of-use asset), and a liability at the present value of the expected lease payments would also be recognized.

.239 A lessor would recognize an asset representing its right to receive lease payments and, depending on its exposure to risks or benefits associated with the underlying asset, would either (*a*) recognize a lease liability while continuing to recognize the underlying asset (a *performance obligation approach*); or (*b*) derecognize the rights in the underlying asset that it transfers to the lessee and continue to recognize a residual asset representing its rights to the underlying asset at the end of the lease term (a *derecognition approach*). The assets and liabilities recognized by both lessors and lessees would be measured on the basis that

- assumes the longest possible lease term that is more likely than not to occur, taking into account the effect of any options to extend or terminate the lease.
- uses an expected outcome technique to reflect the lease payments, including contingent rentals and expected payments under term option penalties and residual value guarantees, specified by the lease.
- a remeasurement is triggered when changes in facts or circumstances indicate that there would be a significant change in those assets or liabilities since the previous reporting period.

.240 For leases of 12 months or less, lessors and lessees would be able to apply simplified requirements. The simplified accounting would allow lessees to ignore the effects of interest on the recorded assets and liabilities and allow the lessee to record the liability for lease payments at the undiscounted amount for lease payments. New disclosures would also be required.

.241 In early 2009, the boards issued a discussion paper on leases; this exposure draft is the result of extensive deliberations that included consideration of input received from investors, preparers, auditors, regulators, and other interested parties since that discussion paper. The comment period is open until December 15, 2010. During the comment period, the boards will undertake further outreach activities, including public round-table meetings to ensure that the views of all interested parties are taken into consideration before the new standard is completed. Also, the boards will share and jointly consider all comment letters received. A final standard is expected in the second quarter of 2011. The AICPA has developed questions and answers to highlight the important aspects of the proposals, which can be located at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AcctgFinRptg/AcctgFinRptgGuidance/DownloadableDocuments/EDITED_LEASES_FAQ.pdf.

Insurance Contracts Discussion Paper

.242 In June 2010, the IASB issued an exposure draft of a proposed IFRS that would apply to all insurance contracts written by both insurance entities and noninsurance entities. Three months later, FASB issued a

discussion paper to solicit broad-based input on how to improve, simplify, and converge the financial reporting requirements for insurance contracts. The solicited feedback is focused on (*a*) whether the IASB's proposal would be a sufficient improvement to U.S. GAAP to justify the cost of change; (*b*) whether the project goals of improvement, convergence, and simplification would be more effectively achieved by making targeted improvements to existing U.S. GAAP (rather than issuing comprehensive new guidance); and (*c*) certain critical accounting issues for which the preliminary views of FASB differ from the IASB's exposure draft. It is important to remember that although the project on insurance contracts is a joint project, it is not part of the boards' MoU.

.243 The discussion paper summarizes the key aspects of the IASB's exposure draft and compares the proposed changes with both the alternative preliminary views of FASB and the current guidance in FASB ASC 944, *Financial Services—Insurance*. FASB decided to issue a discussion paper rather than an exposure draft because of the following reasons:

- The extent of FASB's and the IASB's current accounting guidance for insurance contracts varies significantly; U.S. GAAP comprehensively addresses accounting for insurance contracts by insurance entities, whereas IFRSs do not have comprehensive guidance. Further, the boards have not explicitly evaluated whether the model proposed in the IASB's exposure draft would represent an improvement to U.S. GAAP.
- FASB has not determined whether one model or two models would result in more useful information about insurance contracts. FASB would like additional input from stakeholders on whether different types of insurance contracts warrant different recognition, measurement, and presentation and, if so, what criteria should be used for determining which, if any, types of insurance contracts would use each model.
- FASB is considering whether employer-provided health insurance should be included within the scope of the insurance contracts project and how recent U.S. health care reform may affect the application of the different approaches.

.244 The discussion paper also includes a listing of common elements of U.S. GAAP on insurance contracts that some stakeholders note could be improved. The appendix of the discussion paper compares the main areas of current U.S. GAAP for insurance contracts, the IASB's proposed approach, and FASB's preliminary views that differ from the proposed approach included in the IASB's exposure draft. Comments are due by mid-December 2010. Additionally, FASB and the IASB plan to host a series of public roundtable meetings in December 2010 to hear stakeholders' views. Readers should be alert for developments on this topic.

Auditing Considerations of Accounting Convergence

.245 Although the future of convergence between IASB and FASB accounting standards remains an unknown, discussions have already begun about the potential impact on auditors. Although auditors are accustomed to new standards, the nature and volume of these changes will likely pose new challenges. Among others, some of these potential challenges include the following:

- Training audit staff on a large amount of new accounting guidance that is based on an accounting approach (that is, principles based versus rules based)
- Developing, as necessary, any new internal audit guidance, such as firm methodology
- Implementing any new resulting auditing rules
- Creating a new framework for documenting audit conclusions on a principles-based accounting approach
- Audit committees learning new accounting guidance to effectively perform their function

.246 In addition to the challenges auditors will face, the effects on preparers will also be great. At the time of this writing, it appears that the transition timeline to convergence will be relatively short; this will divert resources during the preparation of financial statements as entities focus on implementing the new principles,

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

which may result in increased audit risk. Auditors, in addition to preparers, are also encouraged to remain current on developments of international accounting convergence.

FASB Accounting Pipeline

Health Care Entities: Revenue Recognition Exposure Draft

.247 FASB has a project on revenue recognition for health care entities. The issue is whether collectability must be reasonably assured prior to a health care entity recognizing revenue. Health care entities may perform services for which the ultimate collection of all or a certain portion of the amount billed or billable is not expected in its entirety, is doubtful, or cannot be determined at the time the services are rendered. In some situations (for example, charity care), health care entities record no revenue. For billings to self-pay patients, it has been industry practice for health care entities to adopt a revenue recognition policy to record revenue at the gross charge along with a relatively high bad debt provision, as provided for in FASB ASC 904-605-25-3. Health care entities that apply this policy also record revenue for insured patients when services are provided and adjust that revenue for contractual allowances (discounts) based on third-party payor or other arrangements. A bad debt provision is typically recorded for the amount due for deductibles and copays judged to be uncollectible. The bad debt provision is generally classified as an expense and not as a reduction to revenue.

.248 The effective date for the proposed amendments would be determined after the exposure period. Readers should be alert to the development of this topic.

Fees Paid to the Federal Government by Pharmaceutical Manufacturers *Exposure Draft*

.249 In August 2010, FASB issued a proposed ASU on accounting for certain fees associated with recently enacted health care legislation. The issues are (*a*) how the annual fee imposed by the PPACA and the Health Care and Education Reconciliation Act of 2010 (HCERA) should be classified in a reporting entity's income statement and (*b*) whether the annual fee should be expensed in its entirety when the liability is recognized or whether an asset should be recognized and amortized over the calendar year.

.250 The HCERA contains a number of provisions that will affect the accounting for many entities. This issue addresses one aspect of accounting for the fees payable by pharmaceutical manufacturers to the federal government. The HCERA imposes an annual fee on the pharmaceutical manufacturing sector for each calendar year beginning after 2010. The fee ranges from $2.5 billion to $4.1 billion and is payable by no later than September 30 of the applicable calendar year. This is a nondeductible fee that will be allocated across the industry based on relative market share. The annual fee payable in a given calendar year is determined by reference to sales in the preceding calendar year. This issue applies to all pharmaceutical manufacturers that are subject to this fee, which according to Section 9008 of the HCERA is any manufacturer or importer with gross receipts from branded prescription drug sales to any federal government program. Practice is likely to recognize the fee in earnings on a ratable basis in the calendar year in which the fee is paid. The rationale is that a pharmaceutical company does not have a liability, as defined by FASB Concepts Statement No. 6, *Elements of Financial Statements—a replacement of FASB Concepts Statement No. 3 (incorporating an amendment of FASB Concepts Statement No. 2)*, prior to the year sales are made that trigger the payment.

.251 Although there does not appear to be diversity in the timing of when the fees will be recognized, divergent views do exist about how such fees should be classified in the income statement. Some constituents believe that the fees should be classified as a reduction of revenue, but others believe they should be accounted for as an operating cost.

.252 The amendments in the proposed ASU specify that upon recognition of the liability, the annual fee would be (*a*) recognized over the calendar year that it is payable using a straight-line method of allocation, unless another method better allocates the fee over the calendar year it is payable, and (*b*) presented as operating expenses.

.253 The amendments in the proposed ASU would be effective for calendar years beginning after December 31, 2010, when the fee initially becomes effective. Readers should be alert to the final issuance of this ASU.

Accounting for Legal Costs Associated with Medical Malpractice Claims *Exposure Draft*

.254 In August 2010, FASB issued a proposed ASU on accounting for legal costs associated with medical malpractice claims. The main issue of this proposal is whether the industry-specific requirement that health care entities accrue legal costs related to litigating medical malpractice claims or similar claims before those costs are incurred should be eliminated.

.255 In other industries, entities make an accounting policy election to either expense legal fees as incurred or accrue estimated legal fees when the associated claim is incurred (FASB ASC 450-20-S99-2). Some believe that guidance would benefit from eliminating an industry-specific exception for health care entities and aligning the accounting practices in that industry with FASB ASC 450-20.

.256 The objective of the proposed ASU is to eliminate the industry-specific requirement that health care entities accrue legal costs related to litigating medical malpractice claims or similar claims before these costs are incurred.

.257 The amendment would affect health care entities within the scope of FASB ASC 954, *Health Care Entities*. The amendment would allow health care entities to make a policy election to expense legal fees as incurred or accrue estimated legal fees when the associated claim is incurred. The effective dates of this proposed amendment would be determined after the feedback from the draft is considered. However, the amendments would be applied retrospectively to all prior periods presented. Readers should be alert to the final issuance of this ASU.

Disclosure of Certain Loss Contingencies

.258 In July 2010, FASB issued an exposure draft on the disclosure of certain loss contingencies in response to concerns from investors and other financial statement users that the current disclosures do not provide adequate and timely information to assess the likelihood, timing, and magnitude of future cash outflows associated with loss contingencies. The objective of these disclosures would be for an entity to disclose qualitative and quantitative information about loss contingencies to enable financial statement users to understand all of the following: the nature of the loss contingencies, their potential magnitude, and their potential timing (if known). Disclosure of certain remote loss contingencies would be required and, therefore, would expand the population of loss contingencies that are required to be disclosed. An entity would not consider the possibility of recoveries from insurance or other indemnification arrangements when assessing the materiality of loss contingencies to determine whether disclosure is required. Further, current qualitative disclosures would be enhanced by requiring additional disclosures. These additional required qualitative and quantitative disclosures include the following:

- For litigation contingencies, the contentions of the parties and how users can obtain more information about the litigation
- Publicly available quantitative information, such as the claim amount for asserted litigation contingencies; other relevant nonprivileged information; and, in some cases, information about possible recoveries from insurance and other sources
- For public entities, tabular reconciliations, by class, of recognized (accrued) loss contingencies that present the activity in the account during the period

.259 The amendments in this proposal would affect all entities. The exposure draft noted that FASB will continue to work with the PCAOB, the AICPA, and the American Bar Association (ABA) to identify and address any potential implications of the proposed amendments for auditing literature and the ABA's Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information. The proposed amendments would be effective for fiscal years ending after December 15, 2010, for public entities and in the

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

first annual period beginning after December 15, 2010, for nonpublic entities. The comment period ended in September 2010.

Going Concern FASB Project

.260 Currently, the only guidance on going concern resides in the auditing literature, and this project's intention is to incorporate going concern guidance into U.S. GAAP. Specifically, this guidance would discuss the following:

- Preparation of financial statements as a going concern
- An entity's responsibility to evaluate its ability to continue as a going concern
- Disclosure requirements when financial statements are not prepared on a going concern basis
- Disclosure requirements when there is a substantial doubt about an entity's ability to continue as a going concern
- The adoption and application of the liquidation basis of accounting

.261 A revised exposure draft is expected to be issued in the second quarter of 2010, with a final ASU expected in the third quarter of 2010. FASB has decided that management should take into account available information about the foreseeable future, which is generally, but not limited to, 12 months from the end of the reporting period. Readers should be alert to developments on this topic.

Other Accounting Projects

.262 Additionally, FASB has the following projects underway:

- Troubled debt restructuring
- Disclosure framework
- Investment properties

Resource Central

.263 The following are various resources that practitioners engaged in the health care industry may find beneficial.

Publications

.264 Practitioners may find the following publications useful. Choose the format best for you—online or print.

- Audit and Accounting Guide *Health Care Entities* (2010) (product no. 0126110 [paperback] or WHC-XX [online with the associated Audit Risk Alert])
- Audit and Accounting Guide *Not-for-Profit Entities* (2010) (product no. 0126410 [paperback], WNP-XX [online with the associated Audit Risk Alert])
- Audit Guide Government Auditing Standards *and Circular A-133 Audits* (2010) (product no. 0127410 [paperback], WRF-XX [online with associated Audit Risk Alert])
- Audit and Accounting Guide *State and Local Governments* (2010) (product no. 0126610 [paperback]. WGG-XX [online with the associated Audit Risk Alert])
- Audit Guide *Analytical Procedures* (2008) (product no. 012558 [paperback] or WAN-XX [online])
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2009) (product no. 012459 [paperback] or WRA-XX [online])

- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2010) (product no. 0125210 [paperback] or WDI-XX [online])
- Guide *Compilation and Review Engagements* (2010) (product no. 0128110 [paperback] or WRC-XX [online])
- Audit Guide *Auditing Revenue in Certain Industries* (2010) (product no. 0125110 [paperback] or WAR-XX [online])
- Audit Guide *Audit Sampling* (2008) (product no. 012538 [paperback] or WAS-XX [online])
- Compilation and Review Alert *Compilation and Review Developments—2010/11* (product no. 0223010 [paperback])
- Audit Risk Alert *General Accounting and Auditing Developments—2010/11* (product no. 0223310 [paperback] or WGE-XX [online])
- Audit Risk Alert *Independence and Ethics Developments—2010/11* (product no. 0224710 [paperback] or WIA-XX [online])
- Checklists and Illustrative Financial Statements *Health Care Entities* (product no. 0090210 [paperback] or WHE-CL [online])
- *Accounting Trends & Techniques, 62nd Edition* (product no. 0099009 [paperback] or WAT-XX [online])
- *IFRS Accounting Trends & Techniques* (product no. 0099109 [paperback] or WIF-XX [online])
- *Audit and Accounting Manual* (2010) (product no. 0051310 [paperback], WAM-XX [online], or AAM-XX [loose leaf])

AICPA Online Professional Library: Accounting and Auditing Literature

.265 The AICPA has created your core accounting and auditing library online. The AICPA Online Professional Library is now customizable to suit your preferences or your firm's needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to FASB ASC, the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides, Audit Risk Alerts, *Accounting Trends & Techniques*, and more. One option is the *AICPA Audit and Accounting Guides with FASB* Accounting Standards Codification™, which contains all audit and accounting guides, all audit risk alerts, and FASB ASC in the Online Professional Library (product no. WFA-XX [online]).To subscribe to this essential online service for accounting professionals, visit www.cpa2biz.com.

Continuing Professional Education

.266 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop (2010–2011 Edition)* (product no. 730096 [text] or 180096 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Internal Control Essentials for Financial Managers, Accountants and Auditors* (product no. 731856 [text], 181856 [DVD/Manual], or 351856 [Additional Manual for DVD]). This course will provide you with a solid understanding of systems and control documentation at the significant process level.
- *International Versus U.S. Accounting: What in the World is the Difference?* (product no. 731668 [text] or 181661 [DVD]). Understanding the differences between IFRSs and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRSs and U.S. GAAP.
- *IFRS Essentials with GAAP Comparison: Building a Strong Foundation* (product no. 741602 [text], 181601 [DVD/Manual], or 351601 [Additional Manual for DVD]). This course provides you with a greater understanding of what you need to know as the acceptance of international standards continues to grow.

.267 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.268 AICPA CPExpress, offered exclusively through CPA2Biz, is the AICPA's flagship online learning product. AICPA members pay $180 for a new subscription and $145 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to the health care industry include the following:

- *Nonprofit Auditing: Unique Auditing for a Unique Entity*
- *Fraud in Exempt Organizations: The Governmental and Not-for-Profit Environments*
- *Nonprofit Accounting: Financial Reporting*
- *Auditing Considerations in an Uncertain Economy*

.269 To register or learn more, visit www.cpa2biz.com.

Webcasts

.270 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM. For additional details on available webcasts, please visit www.cpa2biz.com/AST/AICPA_CPA2BIZ_Browse/Store/Webcasts.jsp.

Member Service Center

.271 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.272 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. The hotline is available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 or online at www.aicpa.org/Research/TechnicalHotline/Pages/TechnicalHotline.aspx. Members can also e-mail questions to aahotline@aicpa.org. Additionally, members can submit questions by completing a Technical Inquiry form found on the same website.

Ethics Hotline

.273 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

Industry Conference

.274 The AICPA offers an annual health care industry conference in the fall. The health care industry conference is a two-day conference designed to update attendees on recent developments related to the health

care industry. The AICPA National Health Care Industry Conference will be held on Nov 11–12, 2010, in Las Vegas, NV. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Governmental Audit Quality Center

.275 The Governmental Audit Quality Center (GAQC) is firm-based, voluntary membership center designed to improve the quality and value of governmental audits provided to purchasers of governmental audit services. Governmental audits are performed under *Government Auditing Standards* and are audits and attestation engagements of federal, state, or local governments; NFP organizations; and certain for-profit organizations, such as housing projects and colleges and universities that participate in governmental programs or receive governmental financial assistance. The GAQC keeps member firms informed about the latest developments and provides them with tools and information to help them better manage their audit practice. Firms and that join demonstrate their commitment to audit quality by agreeing to adhere to certain membership requirements.

.276 The GAQC has been in existence since September 2004. Since its launch, center membership has grown to almost 1400 firms from 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. The membership accounts for approximately 84 percent of the total federal expenditures covered in single audits performed by CPA firms in the Federal Audit Clearinghouse database (http://harvester.census.gov/sac/) for the year 2009.

.277 The GAQC's focus is to promote the highest quality audits and to save firms time by providing a centralized place to find information that they need, when they need it, to maximize quality and practice success. Center resources include the following:

- E-mail alerts with the latest audit and regulatory developments, including information on the Recovery Act and its impact on your audits
- Exclusive web seminars, webcasts, and teleconferences on compliance auditing and timely topics relevant to governmental and NFP financial statement audits (optional CPE is available for a small fee, and events are archived online)
- Dedicated GAQC website at www.aicpa.org/InterestAreas/GovernmentalAuditQuality/Pages/GAQC.aspx with resources (including a Recovery Act Resource Center), community events, and products, and a complete listing of GAQC members in each state
- Online member discussion forums for sharing best practices and discussing issues firms are facing
- Savings on professional liability insurance

.278 For more information about the GAQC, visit www.aicpa.org/InterestAreas/GovernmentalAuditQuality/Pages/GAQC.aspx.

The Center for Audit Quality

.279 The Center for Audit Quality (CAQ), which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.280 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that provides education, communication, representation, and other means to member firms that audit or are interested in auditing public companies. To learn more about the CAQ, visit www.aicpa.org/InterestAreas/CenterForAuditQuality/Pages/CAQ.aspx.

AICPA Industry Expert Panel—Health Care

.281 For information about the activities of the AICPA Health Care Expert Panel, visit the panel's website at www.aicpa.org/INTERESTAREAS/ACCOUNTINGANDAUDITING/COMMUNITY/HEALTHCARE/Pages/Healthcare.aspx.

Industry Websites

.282 The Internet covers a vast amount of information that may be valuable to auditors of health care entities, including current industry trends and developments. Some of the more relevant sites for auditors with health care industry clients include those shown in the following table:

Organization	*Website*
Centers for Medicare & Medicaid Services	www.cms.hhs.gov
U.S. Department of Health & Human Services	www.hhs.gov
Global health reporting	http://globalhealth.kff.org/
Kaiser Family Foundation	www.kff.org
Atlantic Information Services	www.aishealth.com

.283 The health care practices of some of the larger CPA firms also may contain industry-specific auditing and accounting information that is helpful to auditors.

.284

Appendix—Additional Internet Resources

Insurance Industry Developments—2010/11

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert replaces *Insurance Industry Developments—2010*.

This Audit Risk Alert is intended to provide auditors of financial statements of the insurance industry with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform. This Audit Risk Alert also can be used by an entity's internal management to address areas of audit concern.

This publication is an *other auditing publication*, as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Recognition

Feedback

The Audit Risk Alert *Insurance Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert also would be appreciated. You may e-mail these comments to A&APublications@aicpa.org.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your insurance audits and also can be used by an entity's internal management. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool to help you identify the significant risks that may result in the material misstatement of financial statements and delivers information about emerging practice issues and current accounting, auditing, and regulatory developments. You should refer to the full text of accounting and auditing pronouncements, as well as the full text of any rules or publications that are discussed in this alert. Additionally, the Audit Risk Alert *General Accounting and Auditing Developments—2010/11* (product no. 0223310) explains important issues that affect all entities in all industries in the current economic climate.

.02 It is essential that the auditor understand the meaning of audit risk and the interaction of audit risk with the objective of obtaining sufficient appropriate audit evidence. In AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1), *audit risk* is broadly defined as the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. Further, paragraph .04 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), explains that the auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures.

Economic and Industry Developments

The Current Economy

.03 When planning and performing audit engagements, an auditor should understand both the general current economy and the specific economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on an entity's business and, therefore, its financial statements.

.04 The year 2010 may be the beginning of a wave of economic recovery. Although many key indicators, such as unemployment, are still uncomfortably high, 2010 began with rising commodity prices, a jump in new factory orders that caused the largest expansion in production in 3 years, and an increase in U.S. auto sales that approached prerecessionary levels. Further, after experiencing a considerable decline in the stock market through March 2009, the markets have rebounded substantially. In March 2009, the S&P 500 and the Dow Jones Industrial Average reached their 12-year lows, and NASDAQ closed at its lowest point since October 2002. By March 2010, only a year later, all 3 had increased in value by at least 59 percent from the previous year's lows. However, all 3 remained relatively unmoved 5 months later, in late September 2010. This exhibits the continuing uncertainty in the markets due to the varying economic indicators, the financial reform regulatory changes, and Europe's economy, among other reasons.

Key Economic Indicators

.05 These key economic indicators further illustrate the severity of the recent recessionary period experienced by the United States.

.06 The gross domestic product (GDP) measures output of goods and services by labor and property within the United States. It increases as the economy grows or decreases as it slows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 1.6 percent in the second quarter of 2010 (second estimate), 3.7 percent in the first quarter of 2010, and 5.6 percent in the fourth quarter of 2009. This data indicates a turnaround in the economy because in the fourth quarter of 2008 and the first quarter of 2009, real GDP decreased 6.3 percent and 5.5 percent, respectively. Further, in June 2010, the Treasury reported that

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

banks had repaid about 75 percent of the bailout money they received through the Troubled Asset Relief Program, and that taxpayers made $21 billion on the investment. However, other significant or large bailouts are not yet repaid, and they may yield losses to taxpayers.

.07 From August 2009 to August 2010, the unemployment rate fluctuated between 9.5 percent and 10.1 percent. An unemployment rate of 10.0 percent represents approximately 15.3 million people. The annual average rate of unemployment increased from 4.6 percent in 2007 to 9.3 percent in 2009. However, through August 2010, the rate has remained below 10.0 percent. Additionally, 1 reason for the continued high unemployment rate is that more Americans are resuming their search for work.

.08 The Federal Reserve decreased the target for the federal funds rate more than 5.0 percentage points to less than 0.25 percent, where it remained through September 2010. The Federal Reserve described the current economic recovery in its September 21, 2010, press release as follows:

- Household spending is increasing gradually but remains constrained by high unemployment, modest income growth, lower housing wealth, and tight credit.
- Business spending on equipment and software is rising, though less rapidly than earlier in the year, and investment in nonresidential structures continues to be weak.
- Employers remain reluctant to add to payrolls.
- Housing starts are at a depressed level.
- Bank lending has continued to contract, but at a reduced rate in recent months.
- The pace of economic recovery is likely to be modest in the near term.

.09 The Federal Reserve also noted in the press release that "economic conditions, including low rates of resource utilization, subdued inflation trends, and stable inflation expectations, are likely to warrant exceptionally low levels of the federal funds rate for an extended period." The Federal Reserve will keep constant its holdings of securities by reinvesting principal payments from mortgage-backed securities in longer-term Treasury securities; additionally, as current holdings of Treasury securities mature, the proceeds will be reinvested in Treasury securities. Since the beginning of the financial market turmoil in August 2007, the Federal Reserve's balance sheet has grown from $869 billion to $2.3 trillion. Further, the Federal Reserve will continue to monitor the economy and employ other policy tools as necessary.

Industry Trends and Conditions

Life and Health Insurance Industry

Impact of the Financial Crisis on the Life Insurance Industry

.10 Throughout 2008 and 2009, the life insurance industry was affected adversely by the global economic downturn and turbulent financial markets. Most life insurance entities experienced net losses in 2008 and 2009. According to A.M. Best's August 10, 2010, special report, *Slow Economic Recovery Promotes Volatility in Capital Markets,* since that time, the industry has seen more favorable trends. Unrealized loss positions in investment portfolios have largely recovered as of first quarter 2010; however, sizable blocks of in-force variable annuities remain exposed to equity market downside, and the outlook for residential and commercial mortgage investments remains uncertain. A.M. Best has upgraded its rating outlook on the U.S. life and annuity sector from negative to stable. Several life insurers have successfully raised capital through debt and equity issuances. Even with the considerable upsurge in the industry's capitalization on both an absolute and risk adjusted basis, A.M. Best believes that the overall quality of capital has diminished given the volume of recent surplus note issuances, reserve financings, and reinsurance transactions to provide capital relief.

.11 According to the National Association of Insurance Commissioners' (NAIC's) report, *Life Insurer Solvency*, despite the recessionary effects experienced by the life insurance industry, insurance regulators maintain that the majority of life insurance entities are capitalized adequately, and the industry is positioned

for success. Also, A.M. Best's August 10, 2010, special report, *Slow Economic Recovery Promotes Volatility in Capital Markets*, predicts favorable long-term trends for the industry as a result of the following factors:

- Life insurance entities generally invest for the long-term.
- Credit spreads have narrowed significantly, indicating possible recovery of the financial markets.
- Portfolio investment yields have remained reasonably steady.
- Access to the capital markets has normalized.
- Equity markets have rallied recently and credit markets have opened.

.12 In addition, companies in the life insurance industry have made progress in de-risking their balance sheets, de-emphasizing sales of products that are more capital intensive, redesigning and repricing products, tightening their focus on core business lines and exiting segments in which competition is intense, required margins cannot be met, or a combination of these.

.13 Life insurance companies were some of the largest purchasers of subprime and prime mortgages issued during the years 2004 through 2007. In August 2010, the NAIC's Valuation of Securities Task Force announced a slight improvement in the performance of certain residential mortgage-backed securities (RMBS). It is important to note that the high unemployment rate plaguing the U.S labor force may still have a dramatic impact on many of the outstanding RMBS.

.14 In September 2010, the NAIC announced that Blackrock Solutions has been engaged to develop expected losses for more than 7,000 commercial mortgage-backed securities (CMBS), allowing insurance companies to map their CMBS holdings to the appropriate risk-based capital (RBC) designation.

Outlook for Health Insurance Entities

.15 Health insurance entities face significant challenges commencing in 2010 as a result of the passage of the Patient Protection and Affordable Care Act (PPACA). The industry remains highly competitive, and the opportunity for growth is limited. According to A.M. Best's February 8, 2010, special report, *Weak Economy, Higher Costs, Enrollment Declines Hurt Results*, rising unemployment led to a 2.3 percent reduction in commercial membership. Despite stronger stock and bond markets, investment income has continued to face pressure from low interest rates.

.16 As discussed in A.M. Best's May 24, 2010, briefing, *Health Care Reform's Near-Term Effects on Insurers*, the recession and health care reform likely will significantly affect health insurance entities. A.M. Best maintains a negative outlook on the U.S. health insurance segment. Large insurers typically have the scale and ability to adapt to health care reform, including new minimum loss ratio requirements, but will be adversely affected by the economic downturn. Smaller and more specialized insurers, with loss ratios below the minimum and higher expense ratios, may lack the scale to lower expense ratios to offset the required increase in loss ratio. Employers and individuals are expected to request lower premiums and negotiate lower rate increases. Layoffs, company closures, and smaller employers dropping insurance coverage likely will lead to enrollment declines. In addition, individuals who are unemployed are not likely to enroll in individual policies as a result of the high cost.

Property and Casualty Insurance Industry

.17 The two top trends for the property and casualty industry in 2010 are the presence of a strong bottom line recovery driven by improved investment conditions and the release of prior year reserves, both of which are sharply contrasted by a shrinking top line due to the continued impact of a sluggish economy.

.18 Fundamentally, the property and casualty industry remains strong and resilient. As per A.M. Best's special report, discussed previously, the U.S. property and casualty industry benefited from the continued recovery in the financial markets to post a net profit after-tax of $11.5 billion for the first quarter of 2010, rebounding from a net loss of $0.9 billion in the corresponding 3 months of 2009. The improvement was driven

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

largely by the $2.9 billion in realized capital gains in the first quarter of 2010 (first quarter of 2009—$7.9 billion realized loss). In addition, the property and casualty industry earned an annualized statutory rate of return on average surplus of 6.7 percent in the first quarter of 2010 (first quarter of 2009—negative 1.2 percent) and an improved combined ratio of 101.0 for the industry for the 3 months ended March 31, 2010 (3 months ended March 31, 2009—combined ratio 102.2).

.19 However, the latest data from the property and casualty industry shows flat to down pricing in most lines of insurance. Even before the current recession, net written premiums in the U.S. property and casualty insurance industry declined in 2007, 2008, and 2009, and with a 1.3 percent decline in net written premiums in the first quarter of 2010, they have now started their fourth consecutive year of decline—a disturbing trend last seen during the Great Depression from 1930 to 1933.

.20 Based on the first two quarters of 2010, the industry's key drivers for the remainder of 2010 appear to be continuing soft market conditions, sluggish economic recovery, and an elevated level of catastrophic activity.

Continuing Soft Market Conditions

.21 "The soft market is still going strong," David K. Bradford, Advisen executive vice president, said in a statement. By mid-2010, the 2 largest market segments—commercial property and general liability—had market decreases of 4 percent.

.22 Insurance capacity remains abundant in almost every line and, as a result of the recession, demand for that capacity has fallen. However, given the ominous 2010 hurricane season forecast, if catastrophe losses soak up enough capacity, prices could increase for all lines.

Weather and Catastrophes

.23 According to A.M. Best's special report, *U.S. Property/Casualty—3-Month Review*, insured catastrophe losses reached $4.3 billion in the first 3 months of 2010, up from $3.0 billion reported during the same period in 2009. Munich Re Group reported in July that natural disasters cost insurance entities $22 billion in the first half of 2010. Economic losses were estimated to be $70 billion worldwide, well above the first half average over the past 10 years. The 2 catastrophes with the largest loss of life were earthquakes in Haiti and China. The largest catastrophe in terms of property damage was an earthquake in Chile, which accounted for nearly 40 percent of the first half totals. The losses related to the Deepwater Horizon oil rig incident are estimated to be about $5 billion. The National Oceanic and Atmospheric Administration has forecasted the 2010 hurricane season to be active, with a 70 percent chance of having between 14 and 20 named storms, including 3 named storms through August 2010.

Legislative and Regulatory Developments

The Dodd-Frank Wall Street Reform and Consumer Protection Act

.24 On July 21, 2010, the president signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) into law. The Dodd-Frank Act was approved by the House on June 30, before narrowly clearing the Senate on July 15. The Dodd-Frank Act will create new regulations for companies that extend credit to customers, exempt small public companies from Section 404(b) of the Sarbanes-Oxley Act of 2002 (SOX), make auditors of broker-dealers subject to Public Company Accounting Oversight Board (PCAOB) oversight, and change the registration requirements for investment advisers. Some of the highlights of the Dodd-Frank Act are summarized in the following paragraphs.

Financial Stability Oversight Council

.25 The Dodd-Frank Act creates a new systemic risk regulator called the Financial Stability Oversight Council (FSOC). The FSOC will identify any company, product, or activity that could threaten the financial

system. It will be chaired by the Treasury secretary, and members will be heads of regulatory agencies, including the chairmen of the Federal Reserve, the Federal Deposit Insurance Corporation (FDIC), and the Securities and Exchange Commission (SEC), among others. For those large entities deemed a threat to the U.S. financial system, the FSOC can, under the authority of a new orderly liquidation authority, authorize the FDIC to close such entities under the supervision of the Federal Reserve. The FSOC, through the Federal Reserve, will also have the power to break up large firms; require increased reserves; or veto rules created by another new regulator, the Bureau of Consumer Financial Protection (BCFP), with a two-thirds vote. The first meeting of the FSOC will be in October 2010.

Bureau of Consumer Financial Protection

.26 The new BCFP consolidates most federal regulation of financial services offered to consumers. The director of the BCFP replaces the director of the Office of Thrift Supervision (OTS) on the FDIC board. Almost all credit providers, including mortgage lenders, providers of payday loans, refund anticipation loan providers, other nonbank financial companies, and banks and credit unions with assets over $10 billion, will be subject to the new regulations. Functions currently handled by existing agencies are expected to be transferred to the BCFP, and the BCFP is expected to assume full authority for consumer financial protection no later than 1 year after enactment.

.27 The Dodd-Frank Act recognizes that CPAs providing customary and usual accounting activities (which include accounting, tax, advisory, or other services that are subject to the regulatory authority of a state board of accountancy) and other services incidental to such customary and usual accounting activities are already adequately regulated and, therefore, are not subject to the BCFP's authority.

Sarbanes-Oxley Section 404(b) Exemption

.28 The Dodd-Frank Act amends SOX to make permanent the exemption from its Section 404(b) requirement for nonaccelerated filers (those with less than $75 million in market capitalization) that had temporarily been in effect by order of the SEC. Section 404(b) of SOX requires companies to obtain an auditor's report on management's assessment of the effectiveness of the company's internal control over financial reporting. In September 2010, the SEC issued Final Rule Release Nos. 33-9142; 34-62914, *Internal Control Over Financial Reporting in Exchange Act Periodic Reports of Non-Accelerated Filers*, to conform its rules to this resulting change from the Dodd-Frank Act.

.29 The Dodd-Frank Act also requires the SEC to complete a study within 9 months of the act's enactment on how to reduce the burden of Section 404(b) SOX compliance for companies with market capitalizations between $75 million and $250 million. The study will consider whether any such methods of reducing the burden, or a complete exemption, would encourage companies to list on U.S. exchanges.

Auditors of Broker-Dealers

.30 The Dodd-Frank Act also provides for the PCAOB to create a program for registering and inspecting the auditors of broker-dealers, including standard setting and enforcement. Currently, all auditors of broker-dealers must be registered with the PCAOB. Covered auditors will now be required to follow PCAOB guidance. The Dodd-Frank Act allows the PCAOB, in its inspection rule, to differentiate among broker-dealer classes and to potentially exempt introducing brokers, such as those who do not engage in clearing, carrying, or custody of client assets.

Derivatives Trading

.31 The Dodd-Frank Act requires standardized swaps to be traded on an exchange, or in other centralized trading facilities, to better promote transparency in this complex market. Standardized derivatives will also have to be handled by central clearinghouses. However, a measure requiring banks to spin off their swaps trading units was scaled back in the final version of the Dodd-Frank Act. Banks will still be able to trade swaps to hedge risk and trade interest rate or foreign exchange swaps, but dealing in riskier swaps transactions must

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

still be moved into affiliates. Clearing and exchange trading requirements are expected to become effective 360 days following enactment.

Accounting Standards

.32 The Dodd-Frank Act gives the FSOC the duty to monitor domestic and international financial regulatory proposals and developments, including insurance and accounting issues, and to advise Congress to make recommendations in such areas that will enhance the integrity, efficiency, competitiveness, and stability of the U.S. financial markets. The FSOC may submit comments to the SEC and any standard-setting body with respect to an existing or proposed accounting principle, standard, or procedure.

Registered Investment Advisers

.33 Currently, the Investment Advisers Act of 1940 requires investment advisers with over $30 million in assets under management to register with the SEC. Under the Dodd-Frank Act, this threshold for federal regulation will be raised to $100 million, with certain exceptions. This change will increase the number of advisers under state supervision.

Aiding and Abetting Securities Fraud

.34 Because it lowers the legal standard from "knowing" to "knowing or reckless," the Dodd-Frank Act may make it easier for the SEC to prosecute aiders and abettors of those who commit securities fraud under the Securities Act of 1933, the Securities Exchange Act of 1934, the Investment Company Act of 1940, and the Investment Advisers Act of 1940. Additionally, the Dodd-Frank Act authorizes 2 studies on these matters. One of the studies directs the Government Accountability Office (GAO) to investigate the impact of authorizing private rights of action for aiding and abetting claims and to release its findings within 1 year. The second study directs the SEC to examine whether private rights of action should be authorized for transnational or extraterritorial claims, and that study is to be completed within 18 months.

Advisers to Private Funds

.35 The Dodd-Frank Act eliminates the private adviser exemption under the Investment Advisers Act of 1940, which will consequently result in more advisers having to register with the SEC. Advisers to venture capital funds remain exempt from registration, as well as advisers to private funds if such an adviser acts solely as an adviser to private funds and has U.S. assets under management below $150 million. The Dodd-Frank Act also amends the Investment Advisers Act of 1940 to specifically exclude family offices from registration as an investment adviser. The new registration requirement will become effective 1 year after enactment; however, any investment adviser may, at the discretion of the investment adviser, register with the SEC during that 1-year period.

Executive Compensation

.36 The Dodd-Frank Act requires a nonbinding shareholder vote on executive pay. At a public company's first shareholder meeting following the end of the six month period after enactment, management must give shareholders the opportunity to vote on how frequently shareholders will have a "say on pay" (that is, annually, every two years, or every three years). Compensation based on financial statements that are restated must be returned for the three years preceding the restatement in an amount equal to the excess of what would have been paid under the restated results. Listing exchanges will enforce the compensation policies. The Dodd-Frank Act also requires directors of compensation committees to be independent of the company and its management and requires new disclosures regarding compensation.

Other Requirements and Additional Information

.37 The Dodd-Frank Act requires the SEC, within 80 days after enactment, to issue rules requiring companies to disclose in their proxy statement why they have separated, or combined, the positions of chairman and CEO. The OTS, which is currently the regulator for savings-and-loan financial institutions, will be abolished under the Dodd-Frank Act. Under the Dodd-Frank Act, such institutions will now be regulated by the Office of the Comptroller of the Currency, which also regulates federally chartered banks. A copy of the full Dodd-Frank Act, as signed by the president, can be found at www.gpo.gov/fdsys/pkg/BILLS-111hr4173ENR/pdf/BILLS-111hr4173ENR.pdf. The AICPA is also following any developments related to the Dodd-Frank Act on our website at www.aicpa.org under "Advocacy—Federal Issues."

The Health Care and Education Reconciliation Act of 2010 and the Patient Protection and Affordable Care Act

.38 In March 2010, the president signed into law a sweeping overhaul of the health care system. Almost everyone in the United States will be affected by these changes—individuals, insurance companies, health care providers, and employers. The three primary goals of the reform are to expand coverage to those without health insurance, reform the delivery system of benefits to improve quality, and decrease the costs of providing health care. The various provisions of the reform will become effective over time, through 2020. The new laws contain many changes for employers to consider for financial reporting purposes, in addition to many new tax rules to help offset the overall cost of the reform.

.39 The complete changes are contained in two acts. The Health Care and Education Reconciliation Act of 2010 was signed on March 30 and is a reconciliation bill that amends the PPACA signed into law by the president one week earlier. In April, the SEC issued a staff announcement, *Accounting for the Health Care and Education Reconciliation Act of 2010 and the Patient Protection and Affordable Care Act*, to address questions that have arisen about the effect, if any, that the different signing dates might have on accounting for the two acts. This timing difference, related solely to the signing dates, should not have an impact on a majority of registrants because the acts were both signed within a relatively short time period, which for the vast majority of entities, falls into the same reporting period. However, there may be a limited number of registrants with a period-end that falls between the signing dates for which the timing difference could raise questions about whether the different signing dates have an accounting impact.

.40 After consultation with the Financial Accounting Standards Board (FASB) staff, the Office of the Chief Accountant would not object to a view that the two acts should be considered together for accounting purposes. That is, in this specific fact pattern, the SEC staff would not object to a registrant incorporating the effects of the Health Care and Education Reconciliation Act of 2010 when accounting for the PPACA. This view is based in part on the SEC staff's understanding that the two acts, when taken together, represent the current health care reform as passed by Congress and signed by the president. The SEC staff does not believe that it would be appropriate to analogize to this view in any other fact patterns.

Significant Accounting and Tax Considerations

.41 FASB *Accounting Standards Codification* (ASC) 740-10-30-2 states that the following basic requirements are applied to the measurement of current and deferred income taxes at the date of the financial statements:

- The measurement of current and deferred tax liabilities and assets is based on provisions of the enacted tax law; the effects of future changes in tax laws or rates are not anticipated.
- The measurement of deferred tax assets (DTAs) is reduced, if necessary, by the amount of any tax benefits that, based on available evidence, are not expected to be realized.

.42 FASB ASC 715-60-35-102 further explains that benefit coverage for medical claims by governmental programs or other providers of health care benefits should be assumed to continue as provided by the present law and other providers, pursuant to their present plans. Consistent with FASB ASC guidance, presently enacted changes in the law or amendments of the plans of other health care providers that take effect in future

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

periods and that will affect the future level of their benefit coverage should be considered in current period measurements for benefits expected to be provided in those future periods. Future changes in laws concerning medical costs covered by governmental programs and future changes in the plans of other providers should not be anticipated.

.43 The two primary accounting considerations resulting from this reform are the effects of the tax law changes on deferred income tax balances and other postretirement health benefits. One of the most significant changes relates to the government subsidy for providing qualifying prescription drug coverage to Medicare-eligible retirees becoming an offset for prescription drug income tax deductions. Specifically, because entities will need to reduce their income tax deduction for providing prescription drug coverage by the subsidy received, they currently need to record a charge to earnings to write off a portion of their DTAs related to postretirement health care obligations. Such DTAs were based on the gross liability amount. Because the tax deductible prescription drug costs liability will be reduced by the subsidy, the DTA will be computed net of the subsidy, resulting in a lower DTA. The federal subsidy will not reduce the tax deductions until 2013. Even though the changes may not be effective until future periods, the effects are accounted for in the period that includes the enactment date. FASB ASC 715-60 discusses accounting and reporting guidance for other postretirement plans, including the Medicare prescription drug plan. Many public entities have already posted large noncash charges in early 2010 related to the nondeductibility of the subsidy.

.44 Some of the other provisions of the reform that may affect an entity's tax position include the nondeductible pharmaceuticals fee, the medical device excise tax, and the therapeutic discovery project tax credit, which will have an effect on the pharmaceutical and medical device industries. Additionally, employer group health plans may not impose lifetime limits and can only impose "restricted" annual limits beginning with the 2011 plan year (for calendar year plans); no annual limits would be permitted beginning in 2014. Because these health benefits can no longer be limited, entities may need to increase accruals for future medical obligations. Many small businesses and tax-exempt organizations that provide health insurance coverage to their employees will now qualify for a special tax credit that is designed to encourage small employers to offer health care coverage for the first time or maintain the coverage they have. Lastly, under the new reform, a 40 percent penalty will apply to tax understatements attributable to transactions lacking economic substance (20 percent with adequate disclosure) or failing to meet the requirements of any similar rule of law. A transaction is treated as having economic substance only if the transaction changes in a meaningful way (apart from federal income tax effects) the taxpayer's economic position, and the taxpayer has a substantial purpose (apart from federal income tax effects) for entering into the transaction.

.45 In July 2010, the NAIC adopted a new annual statement reporting supplement to record the comprehensive major medical health insurance business for large group employers, small group employers, and individual plans. The supplement will assist state and federal regulators in identifying and analyzing the medical loss ratio for comprehensive major medical health insurance as required under the PPACA. As currently designed, the supplement will initially be filed with the NAIC by applicable insurers on April 1, 2011, based on the calendar year results as of December 31, 2010. The results of the April 1 filing will not be used for calculating rebate information but will be used by regulators as a preliminary view of results. A second filing June 1 or thereafter will be submitted based on claims development after the December 31, 2010, reporting date. A materiality threshold was included for filing the supplement that would exempt insurers that write no comprehensive major medical coverage, that only have major medical coverage in run-off with only claims and no premiums, and if their major medical premium on Schedule T is less than 2 percent of total premiums.

.46 The full text of these acts can be found at http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_laws&docid=f:publ152.111.pdf and http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_ laws&docid=f:publ148.111.pdf. Readers are also encouraged to refer to the Audit Risk Alerts *Health Care Entities—2010/11* (product no. 0223410) and *Not-for-Profit Entities—2010* (product no. 0224210).

PCAOB Constitutionality

.47 On June 28, 2010, the Supreme Court ruled in the lawsuit challenging the constitutionality of the PCAOB. When the PCAOB was set up under SOX, its board members were appointed by the SEC and could

be removed only for cause. The Supreme Court ruled, in a 5-4 vote, that although the manner in which the PCAOB was constituted was constitutionally invalid, SOX itself was not invalidated. Rather, the Supreme Court severed from the rest of SOX the provisions relating to the removal of PCAOB board members. The consequence of the Supreme Court's decision is that PCAOB board members will now be removable by the SEC at will, instead of only for good cause. Essentially, this decision has no material impact on the workings of the PCAOB, and all PCAOB programs will continue to operate as usual, including registration, enforcement, and standard-setting activities.

Recent Statutory Accounting Principles

.48 The NAIC continues to develop and clarify statutory accounting guidance for insurance enterprises through its ongoing maintenance process. The most recent *Accounting Practices and Procedures Manual* was published by the NAIC as of March 2010 and contains accounting practices and procedures adopted by the NAIC through March 2010. Updates to the manual can be found under the Statutory Accounting Principles Working Group section of the NAIC website. Insurance laws and regulations of the state insurance departments require insurance entities domiciled in those states to comply with the guidance provided in the manual, except as otherwise prescribed or permitted by state law or regulation.

.49 The 2010 manual contains four new Statements of Statutory Accounting Principles (SSAPs) that were adopted through March 2010:

- SSAP No. 10R, *Income Taxes—Revised, A Temporary Replacement of SSAP No. 10*. SSAP No. 10R was adopted in December 2009 to revise the calculation of DTAs. The new provisions increase the admissibility limits for the carryback and realization period from 1 year to 3 years and surplus limitation from 10 percent to 15 percent. A requirement was added to disclose an adjustment to gross DTAs for a statutory valuation allowance if it is "more likely than not" that some portion of the DTA will not be realized. Further, RBC guardrails were instituted to prohibit taking the incremental DTA under the new provision unless certain RBC thresholds were met—that is, 250 percent for life companies and 300 percent for property and casualty companies. Certain non-RBC filers, such as title, financial guaranty, and mortgage guaranty insurers, were excluded from recording the additional DTA under the new guidance. SSAP No. 10R is effective for annual periods ending December 31, 2009, with a sunset after December 31, 2010. As of September 2010, there is a proposal to extend the sunset date through December 31, 2011, and to require expanded disclosure concerning the use of tax planning strategies in determining the admissibility of DTAs.
- SSAP No. 62R, *Property and Casualty Reinsurance (Revised)*. SSAP No. 62R was adopted in December 2009 to allow prospective reinsurance accounting for the transfer of property and casualty run-off transactions when specific criteria are in place, including approval by the domiciliary regulators of the transferring entity and the assuming entity. The changes are effective for transactions entered into after January 1, 2010.
- SSAP No. 100, *Fair Value Measurements*. SSAP No. 100 was adopted in December 2009 and defines *fair value* for statutory financial reporting, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. With the adoption of this SSAP, several nonsubstantive revisions were made to other SSAPs and interpretations to reflect the new guidance. This SSAP nullifies Interpretation 09-04, *Application of the Fair Value Definition*.
- SSAP No. 43R, *Loan-Backed and Structured Securities (Revised)*. SSAP No. 43R was adopted in September 2009. SSAP No. 43R modifies statutory accounting principles for investments in loan-backed and structured securities. The guidance specifies that if the insurer determines there has been an other-than-temporary impairment and either intends to sell the loan-backed or structured security, or if it does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost, the security is written down to fair value. If the insurer does not expect to recover the entire amortized cost basis of the security when it does not intend to sell the security, and it has the intent and ability to hold the security, the amount of the other-than-temporary impairment recognized as a realized loss shall equal the difference between the investment's amortized cost basis and the present value of cash flows expected to be collected and discounted at the effective interest rate in accordance with paragraph 32 of SSAP No. 43R.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.50 SSAP No. 43R specifies transition guidance for insurers that accounted for loan-backed and structured securities under SSAP No. 43; SSAP No. 98, *Treatment of Cash Flows When Quantifying Changes in Valuation and Impairments, an Amendment of SSAP No. 43*, through early adoption; or had an accounting policy in accordance with the prescriptions of SSAP No. 98.

.51 Several nonsubstantive revisions to various SSAPs and manual appendixes were made during 2009 and 2010 by the NAIC. Interpretations are immediately effective upon adoption by the NAIC, and new SSAPs occasionally are effective for the calendar year in which they are adopted.

.52 Actuarial Guideline XLIII (AG 43), CARVM for Variable Annuities, also known as VA CARVM (Variable Annuity Commissioners Annuity Reserve Valuation Model), is a new statutory reserve standard for variable annuity products with guaranteed death and living benefits and was effective as of December 31, 2009. The scope of AG 43 includes all individual and group, deferred, and immediate variable annuities. The reserve calculation includes a standard scenario floor and likely will result in higher statutory reserves than under the current requirements. It provides more specific reserves in respect of modern products and thus it applies to variable annuities and other contracts that provide a guaranteed life benefit to the policyholder while the policyholder is alive, such as guaranteed income benefits and guaranteed withdrawal or accumulation benefits.

.53 Life and health actuaries in the United States are in the process of moving to a principles-based approach for statutory reserves through changes to the standard valuation law. The approach produces reserves that are the result of stochastic calculations but are subject to a minimum of a standard scenario. The approach moves away from a methodology that is the same for all companies to one that is more company specific and takes account of the specific assets backing the liabilities and the extent to which these assets are hedged to take account of changes in the liabilities owing to market movements. Although the methods are more company specific, the assumptions will have to be based on either credible company experience or industry norms.

.54 The approach will be flexible in that the law will point to a valuation manual that is in the process of being finalized. The valuation manual will be quickly updated to keep pace with changing conditions.

.55 The intent of the change was to enable regulators to focus on those insurers likely to be the subject of actual or potential problems and to use a risk analysis methodology to focus on the environment in which the company operates, the company's financial metrics, and the extent and effectiveness of the company's controls and risk management. Auditors should evaluate the company's methodology and assumptions, including the credibility of the data underlying the company's assumptions.

.56 After six years of work by the American Academy of Actuaries, regulators, and interested parties, the NAIC Life and Health Actuarial Task Force exposed for comment a new draft of Chapter 20 of the Valuation Manual (VM-20), the principle-based reserve requirements for life products, at the NAIC Summer Meeting in August 2010. The next step will be the development of metrics through a field testing and impact study that the NAIC will begin in September 2010.

The NAIC's Sarbanes-Oxley Initiative Update

.57 The NAIC adopted changes to the Annual Financial Reporting Model Regulation (also known as the Model Audit Rule, or MAR) related to SOX during its fall 2006 meeting, with the majority of the changes effective for 2010. Through August 2010, all states have adopted the revised MAR. The District of Columbia plans to have adoption completed by the end of 2010. Readers should be aware that some states have adopted slight variations of the revised MAR. It is recommended that readers become familiar with the terms of adoption by the domiciliary states of their entities or insurance clients.

.58 Highlights of the significant changes to the current MAR related to SOX include the following:

- *Section 7*: The time allowed to serve in the capacity as the lead or coordinating audit partner was decreased from seven years to five consecutive years with a new five year break in service (previously two years), effective beginning with year 2010 statutory audits.
- *Section 7*: A list of nonaudit services that cannot be performed by the auditor (the prohibitions generally agree with those designated by the SEC), effective for the year 2010 statutory audits. Insurance entities with less than $100 million in direct written and assumed premiums may request an exemption from this requirement.
- *Section 9*: To the extent required by AU section 319, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*, Interim Standards), for those insurers required to file a management's report on internal control over financial reporting pursuant to Section 16 (see the following "Section 16" bullet point), the independent CPA should consider the most recently available report in planning and performing the audit of statutory financial statements.
- *Section 11*: Auditors should prepare a written communication of any unremediated material weaknesses that the insurer will furnish the domiciliary commissioner, effective beginning with year 2010 statutory audits. The current MAR requires the auditor to prepare a report of significant deficiencies and material weaknesses in the insurer's internal control structure noted by the auditor during the audit.
- *Section 14*: New specifications for the responsibilities of audit committees and the required qualifications of audit committee members will be effective January 1, 2010. The adopted revisions require that insurance entities have an audit committee that is solely responsible for the appointment, compensation, and oversight of the entity's auditor. The guidance also indicates that some audit committees, based on the insurer's premium volume, would need to comprise a certain percentage of individuals who are independent from management. The premium threshold that triggers the requirement for independent audit committee members is $300 million assumed and direct premiums. The premium range for a majority (50 percent or more) of independent audit committee members is from $300 million to $500 million. The requirement for a supermajority (75 percent or more) of independent audit committee members is $500 million in premiums. Notwithstanding premium volume, all insurers are encouraged to structure their audit committees with at least a supermajority of independent audit committee members.

  Entities meeting certain requirements may request an exemption from their domiciliary commissioner based on hardship. Examples include requests based on the business type of the entity, the availability of qualified board members, or the ownership or organizational structure of the entity.
- *Section 16*: Every insurer required to file an audited financial report that has an annual direct written and assumed premium of $500 million or more shall prepare a report of the insurers' or group of insurers' internal control over financial reporting and file it with their insurance commissioner, effective December 31, 2010. The MAR also includes a list of what should be included in management's report on internal control over financial reporting. This report is prepared by management and is not audited. An insurer that is a SOX-compliant entity or is a direct or indirect wholly owned subsidiary of a SOX-compliant entity will be able to file its or its parent's SOX Section 404 report in satisfaction of this Section 16 requirement. However, an addendum also needs to be filed with the SOX Section 404 report that would include a positive statement that no material processes exist related to the preparation of the audited statutory financial statements that were excluded from the SOX Section 404 report. If internal controls exist that have a material impact on the preparation of the audited statutory financial statements excluded from the SOX Section 404 report, they need to be addressed. The insurer may either file a report under Section 16, or the insurer can file its SOX Section 404 report and a Section 16 report for those internal controls that would have a material impact on the audited statutory financial statements and were not covered by the SOX Section 404 report.

  The independent CPA should consider this report during the planning and performance of the annual audit. In addition, the revisions require the insurer to file with the state insurance department the

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

independent public accountant's communication regarding any unremediated material weaknesses noted during the course of the audit.

- *Section 17*: An insurer may make written application to the commissioner for waiver from any or all provisions of the model based upon financial or organizational hardship. For example, the commissioner could, under this section, grant a waiver of the Section 14B audit committee independence requirements to an entity exceeding the $500 million premium threshold, even though the Section 14H waiver would not apply. This exemption is granted at the discretion of the commissioner and may be granted at any time for a specified period or periods.

.59 Please note the Implementation Guide for the MAR included in Appendix G of the 2010 *Accounting Practices and Procedures Manual* was not the final version that was adopted in December 2009; the final version can be found on the NAIC/AICPA Working Group's website at www.naic.org/committees_e_naic_aicpa_wg.htm.

Risk-Focused Statutory Examinations

.60 Entities are examined for regulatory purposes by the domestic insurance departments for financial solvency. State regulators perform their financial examinations using the risk-focused surveillance approach outlined in the NAIC *Financial Condition Examiners Handbook*. A need existed for a broader entitywide business risk assessment, focusing on strategic and operational issues, which enhances the process for evaluating the solvency risks inherent in an insurer's operations. As a result, effective January 1, 2010, state examiners are required to conduct their examinations using the risk-focused surveillance approach.

.61 This examination approach, a key component of establishing and operating an effective risk-focused surveillance process, involves several differences from the traditional, more substantive-based statutory examination process. In particular, under the risk-focused approach, heavy emphasis is placed on the insurer's corporate governance and established risk management practices and processes. At the beginning of the examination, regulators gain an understanding of the corporate governance structure and assess the "tone at the top." In addition, examiners obtain information on the quality of oversight provided by an entity's board of directors. Examiners also evaluate and assess the effectiveness of senior management as part of this corporate governance assessment process. All of this information contributes to an understanding of how an entity identifies, controls, monitors, mitigates, evaluates, and responds to its business risks. This assessment helps determine the most significant financial reporting and prospective risk areas and assists with determining the amount of substantive examination procedures that state examiners should perform. The examiner's review and consideration of prospective business risk is designed to focus on key risks to future solvency and allows the regulators to tailor their supervision plan to address key risks.

.62 Among others, the purposes of the risk-focused examination process include the following:

- Detecting early those insurers with potential financial trouble.
- Identifying instances of noncompliance with state statutes and regulations.
- Compiling the information needed for timely, appropriate regulatory action.
- Providing a clearer methodology for assessing residual risk in each key activity under review with an explanation of how that assessment translates into establishing examination procedures.
- Allowing for the assessment of an insurer's risk management processes in addition to those that result in financial statement line item verifications (that is, other than financial statement risks). For example, the effectiveness of an entity's board of directors and other corporate governance activities would provide an introspective look at the operations and quality of the risk management processes of the insurer.
- Allowing for the utilization of examination findings to establish, verify, or revise the entity's priority score, determined through the department's analysis and utilization of the NAIC tools (for example, Scoring System, Analyst Team System Review results, and Insurance Regulatory Information System ratios).

.63 In conjunction with the previously explained objectives, the examiners could review the independent auditor's testing, the assessment relative to the insurer's corporate governance environment, or both, recognizing that the extent of documentation pertaining to the insurer's corporate governance structure and risk mitigation strategies will vary based on the size and structure of the entity and its holding company group. If the external auditor has reviewed the enterprise risk management (ERM) practices and the potential relationship to the Committee of Sponsoring Organizations of the Treadway Commission's ERM framework (or other ERM frameworks such as the ISO 31000 or the Australia/New Zealand risk management frameworks), the examiner likely will be interested in reviewing this documentation. In addition, the examiners also will make inquiries of an entity's external auditor regarding various substantive testing procedures associated with the auditor's balance sheet and income statement account testing.

.64 The evaluation of internal control of an entity's information technology is a critical element of the risk-focus examination process because the accuracy of the financial statement information depends on the programs and the data files from which they are produced. Smaller entities, as well as those entities that are subject to the requirements of SOX Section 404 or MAR will be expected to proactively address information technology risks. Determining the complexity of an entity's IT environment and determining the extent of work that must be performed to evaluate the controls of the system is not always straightforward. Knowledge gained about systems during previous examinations may no longer be relevant if systems have been refreshed or replaced. An evaluation of an IT environment should consider the elements of internal control in information systems, including general controls over the development of and changes to computer programs, data file access, and application controls over the results of computer processing. The regulators may be particularly interested in the scope of IT testing performed by both the external auditor and the entity on key controls related to both general computer and application controls. In smaller entities, the external auditor's work in this area also may be considered important because of cost constraints.

.65 Furthermore, the increased understanding in the insurer's corporate governance and established risk management practices and processes will help determine the most significant financial statement and prospective risk areas. Once the examiners determine the most significant financial reporting areas of focus, they may be interested in reviewing the external auditor's testing of certain key internal controls related to the entity's compliance with SOX Section 404 or MAR in order to determine the potential leverage of the external auditor's working papers into the examiner's test plans. The risk and control matrices that outline the significant risks, key controls, financial statement assertions, testing performed, results of testing, and conclusions reached regarding the design and operating effectiveness of such controls will be of particular interest to the examiners. The regulators likely will want to understand the scope of internal control testing performed by the external auditors and may review or reperform certain aspects of the external auditor's internal control testing in order to establish a basis for reliance. Most entities will want their external auditors to cooperate with the state insurance regulators in order to avoid duplication of effort relating to the testing of key financial statement controls.

.66 Timing with regard to when the external auditor's working papers are made available to the examiners is also an important area to consider in terms of effective coordination. As examiners begin planning their examination scope in phase 1 of the risk-focused examination process, one of the first areas considered is access to the CPA's working papers. In order to leverage efficiencies, access to the CPA's work is a critical step for the examiner in the planning or scoping process. Wherever possible, access to draft or interim working papers, or working papers in particular areas only, may be useful to the examiner to (1) expedite the coordination process, (2) avoid potential redundancy of testing with the external auditor, and (3) maximize efficiencies in terms of leverage of the auditor's prior testing. All of these areas help streamline the examination process for the examiners, auditors, and companies examined.

Insurance Industry-Related Federal Initiatives

Treasury Department's Financial Regulatory Reform

.67 The Dodd-Frank Act involves significant restructuring of the regulation system, including the creation of new agencies (while merging and eliminating others). Important new agencies created include the Office

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

of Financial Research,[1] the BCFP,[2] and the FSOC,[3] which is chaired by the Treasury and includes the principal federal financial regulators. The act includes two major insurance components: (1) to advance national coordination in the insurance sector, the act includes creation of a Federal Insurance Office (FIO) within the Treasury Department; and (2) to streamline state-level surplus lines and reinsurance regulation, the act includes provisions to eliminate inefficiencies associated with surplus lines insurance and reinsurance.

.68 For surplus lines, these provisions include the home state of the insured having exclusive authority to regulate the placement of nonadmitted insurance and collect premium taxes as well as the establishment of uniform standards for surplus lines eligibility criteria, among others. For reinsurance, the provisions establish the ceding insurer's state of domicile as the single point of regulation on a number of fronts, including credit for reinsurance, dispute resolution, reinsurance contract terms, and choice of law, among others, providing that the state is NAIC-accredited or has financial solvency requirements substantially similar to those requirements. Also, the provisions establish the reinsurer's state of domicile as the insurer's solvency regulator, providing that it is an NAIC-accredited state, and other states will be precluded from requiring financial information other than what the domiciliary state requires.

.69 Regarding the FIO, it will be led by a director appointed by the secretary and is the first federal agency with responsibility for understanding and advising policy makers on a broad range of insurance issues. Although the authority granted to the FIO falls short of a regulatory role, the FIO is tasked with

- monitoring all aspects of the insurance industry, including identifying issues or gaps in the regulation of insurers that could contribute to a systemic financial crisis in the insurance industry or the U.S. financial system.
- monitoring the extent to which traditionally underserved communities and consumers, minorities, and low- and moderate-income persons have access to affordable insurance products regarding all lines of insurance except health insurance.
- assisting the secretary in administering the $100 billion Terrorism Insurance Program established under the Terrorism Risk Insurance Act of 2002.
- recommending to the FSOC that it designate an insurer, including affiliates, as an entity subject to regulation as a nonbank financial company supervised by the board of governors pursuant to Title I of the Dodd-Frank Wall Street Reform and Consumer Protection Act.
- coordinating federal efforts and establish federal policy on prudential aspects of international insurance matters, including representing the United States in the International Association of Insurance Supervisors and assisting the secretary in negotiating international insurance agreements.
- determining whether state insurance measures are preempted by covered agreements.
- preempting state laws that conflict with international trade agreements, but only to the extent those laws discriminate against foreign-domiciled entities with an agreement or treaty with the United States.
- as a key responsibility, collecting and analyzing data about the insurance markets, using subpoena power, if necessary, and providing Congress and the White House with regular annual reports commencing September 30, 2011. Smaller entities meeting a minimum size threshold would earn an exemption from the data collection process. The act includes specific confidentiality guarantees that the government will not spill any trade secrets. In addition, in advance of requesting and collecting data from the insurance industry, it will coordinate with each relevant state or federal regulator to determine whether the information to be collected is obtainable and timely available from such regulator.

---

[1] For a detailed description of this office, see http://en.wikipedia.org/wiki/Dodd%E2%80%93Frank_Wall_Street_Reform_and_Consumer_Protection_Act#Office_of_Financial_Research.

[2] For a detailed description of this bureau, see http://en.wikipedia.org/wiki/Bureau_of_Consumer_ Financial_Protection#Title_X_-_Bureau_of_Consumer_Financial_Protection.

[3] For a detailed description of this council, see http://en.wikipedia.org/wiki/Dodd%E2%80%93Frank_Wall_Street_Reform_and_Consumer_Protection_Act#Financial_Stability_Oversight_Council.

- consulting with the states regarding insurance matters of national importance and prudential insurance matters of international importance.
- using authority that would extend to all lines of insurance including reinsurance but excluding health insurance, crop insurance, and long-term care insurance (to the extent that long-term care insurance includes an annuity component, the FIO will be empowered to oversee it).

.70 There has been much debate about the merits of moving to a dual regulatory system for insurers. As of this writing, an optional federal charter (OFC) is not a certainty. Legislation was previously introduced in both the House and the Senate supporting the establishment of an OFC. Some insurers that previously supported an OFC measure have publicly indicated a change in position or are reevaluating their support in light of the act. If one were to be approved by Congress, it is not expected to apply to health insurance but would possibly apply to both property and casualty insurance and life insurance lines of business, although it could ultimately apply only to life insurance. The state-based system would continue for those deciding not to operate at the national level. Although the act does not include a federal charter component, it does require that the director of the FIO conduct a study and submit a report to Congress within 18 months of enactment on how to modernize and improve the system of insurance regulation in the United States. The study will consider a number of factors, including

- consumer protection for insurance products and practices, including gaps in state regulation;
- the degree of national uniformity of state insurance regulation;
- the costs and benefits of potential federal regulation of insurance across various lines of insurance (except health insurance); and
- the ability of any potential federal regulator to provide robust consumer protection for policyholders.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.71 The recent economic conditions and regulatory actions described in this alert may cause additional risk factors that had not previously existed or did not have a material effect on audit clients. Some risks that may affect an entity in the current economic environment include the following:

- Marginally achieving explicitly stated strategic objectives
- Volatile real estate and business markets
- Significant measurement uncertainty, including accounting estimates and fair value measurements
- Potentially erroneous or fraudulent activity due to decreased staffing and resurgence of business activity
- The continuing evolution of the postrecessionary marketplace

.72 Although many of these risks are not new to businesses, consideration of the ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks. As noted in paragraph .17 of AU section 312, some possible audit responses to significant risks of material misstatement include increasing the extent of audit procedures, performing procedures closer to year-end, or increasing audit procedures to obtain more persuasive evidence. Additionally, given the constant changing status of economic conditions that could affect your client, auditors should consider modifying audit procedures to ensure that risks are still adequately addressed.

.73 Although it is impossible to predict and include all accounting, auditing, and attestation issues that may affect your engagements, we cover in this alert the primary areas of concern. Continue to remain alert to economic, legislative, and regulatory developments, as well as the associated accounting, auditing, and attestation issues as you perform your engagements.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Reinsurance Contracts

.74 Auditors of entities with significant reinsurance contracts may want to request that management state in its representation letter that the auditor has been informed of any side agreements that are part of reinsurance contracts, for the purpose of determining whether the entity has considered properly these agreements in the accounting analysis for the contract. Auditors also may consider the guidance in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), when evaluating these arrangements to identify the following:

- Contracts backdated to avoid retroactive reinsurance accounting on coverage of losses that had already been incurred
- Side agreements to reimburse the reinsurer for covered losses or to return profits under a contract in a different accounting period, which may compel accounting accruals
- Linked contracts through which losses experienced under one will be reimbursed under another in the future and which should be considered together in the risk transfer analysis
- Contracts whose terms do not make economic sense and indicate a side agreement, or linkage, with another contract that should be considered in the accounting evaluation
- Exclusive reinsurance arrangements with offshore assuming companies that raise consolidation questions
- Commutations in which the settlements are not in accordance with contract terms and suggest a noncontractual agreement on the allocation of profits and losses
- Contracts under which the risk transfer analysis supporting the accounting evaluation differs materially from and cannot be reconciled to cash flow analyses included in the underwriting file

Reinsurance Recoverables

.75 Consideration should be given to the terms of the reinsurance agreements and the creditworthiness of the reinsurer. Significant payment terms may be material to liquidity and required capital levels. Auditors should refer to AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1). Due to a continued downturn in the market, the auditor should give significant consideration to whether the entity complies with regulatory RBC requirements when evaluating an insurance entity's ability to continue as a going concern.

Claims Expense and Loss Reserves

.76 Due to the increased number and complexity of transactions surrounding claims and claim expenses, inherent risk surrounding the recording and payout of claims can increase. Auditors should evaluate their client's response and adherence to criteria and related controls surrounding expenses.

.77 The identification of changes surrounding valuation variables and consideration of their effect on losses are critical audit steps. The evaluation of these factors includes the involvement of specialists and input from various operating departments within the entity, such as marketing, underwriting, actuarial, reinsurance, and legal. Readers should remember that losses are only accrued for events that have occurred; catastrophe reserves are not allowed in anticipation of events.

.78 AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1), states that the auditor should obtain an understanding of how management developed the accounting estimates included in the financial statements (additional discussion in the "Auditing Accounting Estimates" section of this alert). Claims expense and loss reserve estimates are significant variables on an insurance entity's financial statements. Accordingly, regardless of the approach used to audit claims expense and loss reserve estimates, the auditor should gain an understanding of how management develops estimates. Additionally, chapter 4, "The Loss Reserving and Claims Cycle," and appendix A, "Additional Audit Considerations for Loss

Reserves, Premiums, Claims, and Investments," of the AICPA Audit and Accounting Guide *Property and Liability Insurance Entities* are additional sources of guidance.

.79 Auditors also can refer to AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1) (additional discussion in the "Using the Work of a Specialist" section of this alert), as well as noting current practitioner prohibitions and restrictions that exist related to the performance of nonaudit services for audit clients, including certain actuarial services. Practitioners should be aware of and comply with these prohibitions and restrictions, including the AICPA, SEC, and PCAOB independence rules; new NAIC rules describing qualifications of an independent CPA included in the MAR effective for 2010 statutory audits; and rules passed by the U.S. GAO, state licensing boards, and others.

Auditing Accounting Estimates

.80 As noted in paragraph .04 of AU section 342, the auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements as a whole. Although this alert discusses fair value measurements at length, it is important to remember many types of accounting estimates exist in client financial statements. Some examples include the allowance for uncollectible accounts receivable, impairment analysis and estimated useful lives of long lived assets, certain insurance liabilities and assets, valuation allowance for DTAs, and actuarial assumptions in pension and other postretirement benefit costs.

.81 Given the current economic climate, additional skepticism should be exercised when considering management's underlying assumptions used in accounting estimates. When evaluating accounting estimates, the auditor should consider both the subjective and objective factors with professional skepticism. As discussed in paragraph .09 of AU section 342, key factors and assumptions that the auditor normally concentrates on include the assumptions that are significant to the estimate, sensitive to variations, deviations from historical patterns, or particularly subjective and susceptible to misstatement and bias; however, it is important to consider whether historical patterns are still applicable.

.82 For example, in the current market, new patterns may emerge. In this economic climate, with possible increasing pressure on management to meet earnings, a key aspect of AU section 342 is for an auditor to determine the reasonableness of management's accounting estimates with an extra degree of professional skepticism. As noted by AU section 316, when assessing audit differences between client estimates and audit estimates, even if they are individually reasonable, an auditor should consider whether these differences are indicative of possible bias by management. If so, the auditor should reconsider the estimates as a whole.

.83 The auditor should obtain an understanding of how management develops estimates and should employ one of the approaches outlined in paragraph .10 of AU section 342 in testing that process. In reviewing and testing management's process, the auditor may consider identifying controls around this process and determining if the underlying data used for the estimate are reliable and used appropriately. An auditor also may develop an estimate and compare it to management's estimate. Lastly, the auditor may review subsequent events or transactions occurring prior to the date of the auditor's report. Further, as noted in AU section 316, hindsight may provide the auditor additional insight into the existence of management bias. For further details on auditing estimates, see AU section 342. The AICPA has released a proposed redrafted Statement on Auditing Standards (SAS), *Auditing Accounting Estimates, Including Fair Value Accounting Estimates and Related Disclosures (Redrafted)*, on auditing accounting estimates, including fair value. Readers are encouraged to remain alert for developments on this topic.

Using the Work of a Specialist

.84 It may be necessary to use a specialist (such as a securities valuation expert) to assist in auditing complex or subjective matters. Examples of matters in which an auditor may engage a specialist are valuation issues; reasonableness of determination of amounts derived from specialized techniques or models; or implementation of technical requirements, regulations, or legal documents. AU section 336 provides guidance to auditors in using specialists. The guidance in AU section 336 is applicable when the specialist is hired by management or if the auditor engages the specialist. However, if a specialist employed by the auditor's firm

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

participates in the audit, AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*), is applicable rather than AU section 336.

.85 When using the work of a specialist, the auditor should evaluate the specialist's professional qualifications, obtain an understanding of the nature of the work performed or to be performed, and evaluate the relationship of the specialist to the client in terms of objectivity. Although the appropriateness and reasonableness of the methods and assumptions employed by the specialist are his or her responsibility, the auditor should obtain an understanding of these qualities, test the underlying data provided to the specialist, and evaluate the specialist's findings in the context of the audit and related assertions in the financial statements. In July 2010, the PCAOB issued Staff Audit Practice Alert No. 6, *Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants from Outside the Firm* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.06), because it observed that a number of registered public accounting firms located in the United States have been issuing audit reports on financial statements filed by issuers that have substantially all of their operations outside of the United States. Auditors of issuers should consult this practice alert for reminders concerning their obligations when using the work of other firms or using assistants engaged from outside the firm, such as in the aforementioned situation.

PCAOB Auditing Standards on Risk Assessment

.86 In August 2010, the PCAOB adopted a suite of eight auditing standards related to the auditor's assessment of, and response to, risk in an audit. These standards were initially proposed in late 2008 and reproposed in late 2009. These risk assessment standards will benefit investors by setting forth requirements that enhance the effectiveness of the auditor's assessment of, and response to, the risks of material misstatement in the financial statements. They are applicable to audit procedures spanning from the initial planning stages of the audit to the evaluation of the audit results. Improvements in the risk assessment standards should enhance integration of the audit of financial statements with the audit of internal control over financial reporting by articulating a process for identifying and assessing risks of material misstatements that apply to both portions of the integrated audit.

.87 The new auditing standards, with a brief description of each, are as follows:

- Auditing Standard No. 8, *Audit Risk*, discusses the auditor's consideration of audit risk in both an integrated audit and an audit of financial statements only. It describes the components of audit risk and the auditor's responsibilities for reducing it to an appropriately low level.
- Auditing Standard No. 9, *Audit Planning*, establishes requirements for planning an audit, such as assessing important matters and establishing an appropriate audit strategy.
- Auditing Standard No. 10, *Supervision of the Audit Engagement*, is applicable to the engagement partner and other team members who supervise during the audit. It sets forth requirements for supervision of the audit engagement and the work of other engagement members. Related to this topic, the PCAOB also recently issued a release discussing the provision of SOX that authorizes the PCAOB to impose sanctions on registered public accounting firms and their supervisory personnel for failing to reasonably supervise associated persons.
- Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*, describes the auditor's responsibilities for consideration of materiality in planning and performing an audit.
- Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, establishes requirements for auditors in identifying and assessing risks of material misstatement, including information-gathering procedures.
- Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, establishes requirements for responding to those identified risks of material misstatement through general audit procedures. It also includes audit procedures related to significant accounts and disclosures.
- Auditing Standard No. 14, *Evaluating Audit Results*, establishes requirements for evaluating audit results and the sufficiency of appropriate audit evidence.

- Auditing Standard No. 15, *Audit Evidence*, discusses what constitutes audit evidence and how to design and perform audit procedures to support the opinion expressed in the auditor's report.

.88 These risk assessment standards will supersede the following six PCAOB interim standards and related amendments: AU section 311, *Planning and Supervision*; AU section 312, *Audit Risk and Materiality in Conducting an Audit*; AU section 313, *Substantive Tests Prior to the Balance Sheet Date*; AU section 319; AU section 326, *Evidential Matter*; and AU section 431, *Adequacy of Disclosure in Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Interim Standards). The standards, if approved by the SEC, will be effective for audits of fiscal periods beginning on or after December 15, 2010.

.89 In September 2010, the SEC published *Notice of Filing of Proposed Rules on Auditing Standards Related to the Auditor's Assessment of and Response to Risk and Related Amendments to PCAOB Standards* to solicit comments on the proposed rules. This notice was posted in the *Federal Register* on September 27, 2010. Comments were due 21 days from the publication of the notice in the *Federal Register*, and the SEC will take action on the proposed rules 90 days from the publication of the notice in the *Federal Register*.

Engagement Quality Review for Issuers

.90 In January 2010, the PCAOB announced that the SEC had approved Auditing Standard No. 7, *Engagement Quality Review* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards), which was adopted by the PCAOB in July 2009. Auditing Standard No. 7 provides a framework for the engagement quality reviewer to objectively evaluate the significant judgments made and related conclusions reached by the engagement team in forming an overall conclusion about the engagement. Auditing Standard No. 7 is expected to increase the likelihood that a registered public accounting firm will catch any significant deficiencies before it issues its audit report. As a result, more work may be necessary under this standard than performed under the existing requirements for concurring partners. However, Auditing Standard No. 7 explains that the procedures required by the engagement quality reviewer are different in nature than those required to be performed by the engagement team. Further, if the engagement quality reviewer deems more work is required before giving approval of issuance, the engagement team is responsible for completing that work.

.91 This standard applies to all audit engagements, and engagements to review interim financial information, conducted pursuant to the standards of the PCAOB, and it supersedes the PCAOB's interim concurring partner review requirement. Auditing Standard No. 7 is effective for engagement quality reviews of audits and interim reviews for fiscal years that began on or after December 15, 2009. For a public, calendar-year company, this standard is applicable for the quarter ended March 31, 2010. Subsequent to the issuance of Auditing Standard No. 7, the PCAOB issued Staff Question and Answer *Auditing Standard No. 7*, Engagement Quality Review (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 100.10) to provide further implementation guidance on the documentation requirements of the standard. For the full text of the standard and the question and answer, readers are encouraged to visit the PCAOB's website at www.pcaob.org.

Supplementary and Other Information Related to Financial Statements

.92 In February 2010, the AICPA Auditing Standards Board (ASB) issued a trio of auditing standards related to the auditor's responsibility for other information, supplementary information, and required supplementary information. These three standards supersede AU sections 550A, *Other Information in Documents Containing Audited Financial Statements*; 551A, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*; and 558A, *Required Supplementary Information* (AICPA, *Professional Standards*). All three standards are effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Auditing Fair Value Measurements

.93 In addition to understanding the looming questions relative to fair value accounting, auditors should be aware of audit issues involving fair value measurements. Particular assets, liabilities, and components of

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

equity are measured or disclosed at fair value in the financial statements, and it is management's responsibility to make the fair value measurements and disclosures. When auditing these fair values to ensure they are in conformity with U.S. generally accepted accounting principles (GAAP), auditors should consult AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1).

.94 In regard to analyzing the sufficiency of the audit evidence, the strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method should incorporate common market assumptions. If common market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding of the entity's process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with U.S. GAAP. During this testing, the auditor also may identify any possible indicators of impairment. According to paragraph .23 of AU section 328, substantive tests of the fair value measurements may involve (*a*) testing management's significant assumptions, the valuation model, and the underlying data; (*b*) developing independent fair value estimates for corroborative purposes; or (*c*) reviewing subsequent events and transactions. Paragraph .26 also notes that when testing the fair value measurements and disclosures, the auditor should evaluate whether management's assumptions are reasonable and reflect, or are not inconsistent with, market information. According to FASB ASC 820, *Fair Value Measurements and Disclosures*, under U.S. GAAP this may include evaluating the following:

- Whether a significant decrease has occurred in the volume and level of activity for the asset or liability when compared with normal market activity, which may include consideration of the number of recent transactions, the date of the most recent price quotes, consistency among price quotes, increases in implied liquidity risk premiums, increases in the bid-ask spread, and the amount of publicly available information.
- Whether the transaction was an orderly transaction, which may include consideration of the seller's financial condition, the counterparty credit position, the exposure to the market during the marketing period, and the actual transaction price.
- The reasonableness of the underlying assumptions, which may include consideration of the use of pricing services, the assumptions used by the pricing service, and the extent of testing required to verify the reasonableness of the prices provided. (For example, the auditor should understand whether the fair value measurement was determined using quoted prices from an active market, observable inputs, or fair value measurements based on a model. If the price is not based on quoted prices from an active market or observable inputs, the auditor should obtain an understanding of the model used by the pricing service and evaluate whether the assumptions are reasonable [see the following section for additional information on pricing services].)
- The reasonableness of the determination within the fair value hierarchy of inputs.

Fair Values of Securities

.95 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, there are some items of note for the auditor. As previously mentioned, quoted market prices in active markets are the best available audit evidence to support a fair value; however, when they are unavailable and the valuations of securities are obtained from a broker or dealer or another pricing service based on valuation models, the auditor should understand the underlying valuation method used (such as a cash flow projection). These prices also may be based on quoted prices from an active market or other observable inputs that will be a consideration on the auditor's procedures. The process used by the pricing service in measuring fair value should be evaluated to determine the consistency with the specified valuation method (as discussed in FASB ASC 820-10-35). The auditor also may determine that it is necessary to obtain quotes from more than one pricing source based on circumstances, such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation

assumptions that are highly subjective. In the context of FASB ASC 820, quoted prices in active markets are considered level 1 inputs.

.96 When an entity performs its own valuation, value testing procedures include the following:

- Assessing the reasonableness
- Comparing the assumptions to industry reports or benchmarks
- Assessing the appropriateness of the model
- Calculating the value using his or her own model
- Comparing the fair value with subsequent or recent transactions

.97 Whether the inputs to the entity's valuation model are observable determines their characterization as level 2 or level 3 inputs, respectively, within FASB ASC 820. When extensive judgment is needed, consider using a specialist or refer to AU section 342. Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability of the security, evidence of the collateral also should be examined for existence, fair value, transferability, and the investor's right to the collateral.

.98 Paragraph .19 of AU section 328 also notes that the auditor should evaluate whether the entity's method for determining fair value measurements is applied consistently and, if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity or changes in accounting principles. The auditor also should evaluate management's conclusions regarding other-than-temporary impairment on its securities. Examples of factors that could cause an other-than-temporary impairment, per paragraph .47 of AU section 332, include the following:

- Fair value is significantly below cost and
  - — the decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - — the decline has existed for an extended period of time.
  - — management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

.99 Auditors should consider all facts and circumstances when determining if an other-than-temporary impairment has occurred. Additionally, the classification of an entity's securities is based on management's intent and ability. The auditor should obtain an understanding of management's classification process among trading, available-for-sale, and held-to maturity, as well as consider the classifications in light of the entity's current financial position.

Communicating Internal Control Related Matters Identified in an Audit

.100 SAS No. 115, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), supersedes SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit*, and further clarifies standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 115 is effective for audits of financial statements for periods ending on or after December 15, 2009, with early implementation permitted.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.101 The SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion), except when the auditor is performing an integrated audit and will be expressing an opinion on the effectiveness of internal control over financial reporting under AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements* (AICPA, *Professional Standards*, vol. 1). In general, SAS No. 115 retains many of the provisions of SAS No. 112. The key differences between the two standards lie in the definitions of *material weaknesses* and *significant deficiencies*.

Definitions of Significant Deficiency *and* Material Weakness

.102 A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that a reasonable possibility exists that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. For the purpose of this definition, a reasonable possibility exists when the likelihood of the event is either *reasonably possible* or *probable*, as those terms are defined in the FASB ASC glossary. The FASB ASC glossary defines *reasonably possible* as when the chance of the future event or events occurring is more than remote but less than likely; *probable* is defined as when the future event or events are likely to occur. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness yet important enough to merit attention by those charged with governance.

The Evaluation Process

.103 Although the auditor is not required to perform procedures specifically to identify deficiencies in internal control, during the course of the audit, the auditor may become aware of deficiencies in the design or operation of the entity's internal control. The auditor should evaluate the severity of each deficiency in internal control identified during the audit and determine whether the deficiency, individually or in combination with other deficiencies in internal control, rise to the level of significant deficiencies or material weaknesses. Further, the severity of a deficiency does not depend on whether a misstatement actually occurred.

.104 The AICPA published the Audit Risk Alert *Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115* (product no. 022539) to assist in understanding the requirements of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Service Organizations

.105 Since 1992, SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324) has been the authoritative standard on requirements and guidance for reporting on controls at service organizations and auditing the financial statements of entities that use service organizations to accomplish tasks that may affect their financial statements. This guidance has now been split into an attest standard and an auditing standard to better reflect the nature of the work being performed. Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, vol. 1, AT sec. 801), contains the requirements for reporting on controls at service organizations that are relevant to user entities' internal control over financial reporting. A finalized clarified SAS on service organizations, *Audit Considerations Relating to an Entity Using a Service Organization*, will supersede SAS No. 70 and addresses the user auditor's responsibility for obtaining sufficient appropriate audit evidence in an audit of the financial statements of a user entity that uses one or more service organizations. This SAS will be effective for audits of financial statements for periods ending on or after December 15, 2012. SSAE No. 16 is effective for service auditor's reports for periods ending on or after June 15, 2011. Until the new SAS is effective, user auditors will still use the guidance currently contained in AU section 324. Once the new SAS becomes effective, it will replace the guidance for user auditors currently in AU section 324. SSAE No. 16 is based on the International Auditing and Assurance Standards Board's (IAASB's) International Standard on Assurance Engagements No. 3402, *Assurance Reports on Controls at a Service Organization*, and the new SAS is based on the IAASB's

International Standard on Auditing (ISA) 402, *Audit Considerations Relating to an Entity Using a Service Organization*.

.106 The AICPA is in the process of overhauling and rewriting the Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (commonly known as the SAS 70 guide). Also, to address reporting on a service provider's controls over subject matter other than financial reporting, the AICPA is developing a new Audit Guide, *Reporting on Controls at a Service Provider Relevant to Security, Availability, Processing Integrity, Confidentiality, or Privacy*. Both guides are expected to be available for sale in early 2011. The AICPA is also in the process of drafting communication materials that will help auditors, clients, and users understand the three types of service organization control (SOC) reports (formerly SAS No. 70 reports) to be used for reporting on these engagements.

	Title	*Description*
SOC 1	*Report on Controls at a Service Organization Relevant to User Entities' Internal Control over Financial Reporting*	To be used only in circumstances when the service organization's services and controls affect the internal control over financial reporting for the entities that use the service.
SOC 2	*Report on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality, and Privacy*	The purpose is to convey trust and assurance to users of the system that the service organization has deployed an effective control system to effectively mitigate operational and compliance risks that the system may represent to its users.
SOC 3	*Trust Services Report*	These reports are designed to meet the needs of users who want assurance on the controls at a service organization related to security, availability, processing integrity, confidentiality, or privacy of a system but do not have the need for the level of detail provided in an SOC 2 report. These reports are general use reports and can be freely distributed or posted on a website as a seal.

Compilation and Review Engagements

.107 The AICPA developed a brand new guide, *Compilation and Review Engagements*, which provides additional information on implementing Statement on Standards for Accounting and Review Services No. 19, *Compilation and Review Engagements* (AICPA, *Professional Standards*, vol. 2). It also includes illustrative engagement and representation letters, sample compilation and review reports, detailed illustrations, and case studies. This guide is now available electronically and in paperback on www.cpa2biz.com.

Accounting Issues and Developments

.108 Given the current economic climate, auditors should consider a number of accounting and financial reporting issues, such as the following:

- Fair value, including fair value measurements in illiquid markets
- Impairment
- Liquidity restrictions

.109 In addition to economic conditions, external forces, such as natural disasters, significantly affect the insurance industry, especially property and liability insurance entities. Although many of these risks are not new to business, consideration of the many ways a client is affected by external forces is part of obtaining an

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks.

FASB Statement No. 168

.110 FASB Statement No. 168, *The* FASB Accounting Standards Codification™ *and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162*, as codified in FASB ASC 105, *Generally Accepted Accounting Principles*, is effective for financial statements issued for interim and annual periods ending after September 15, 2009. On the effective date of FASB Statement No. 168, FASB ASC became the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the SEC. FASB ASC superseded all then-existing, non-SEC accounting and reporting standards for nongovernmental entities. This new standard flattens the U.S. GAAP hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is nonauthoritative (not in FASB ASC). Exceptions include all rules and interpretive releases of the SEC under the authority of federal securities laws, which are sources of authoritative U.S. GAAP for SEC registrants, and certain grandfathered guidance having an effective date before March 15, 1992. If an accounting change results from the application of this guidance, an entity should disclose the nature and reason for the change in accounting principle in their financial statements.

Referencing FASB ASC in Your Documentation

.111 You should consider how your entity will reference FASB ASC in your documentation (policy and procedures, technical memorandums, financial statements and filings, engagement working papers, and so on). It is only prudent to reflect current U.S. GAAP in your documentation. The FASB Notice to Constituents includes a section on referencing FASB ASC in footnotes and other documents. In this notice, FASB encourages the use of plain English to describe broad topic references in the future. For example, to refer to the requirements of the *Derivatives and Hedging* topic, they suggest a reference similar to "as required by the *Derivatives and Hedging* topic of the FASB *Accounting Standards Codification*." Conversely, FASB suggests using the detailed numerical referencing system in working papers, articles, textbooks, and related items.

.112 Also, because FASB ASC is not intended to change U.S. GAAP, the consistent use of references to only FASB ASC for all periods presented (including periods before the authoritative release of FASB ASC) is appropriate. It is prudent to expect that audit, attest, or compilation and review working papers associated with financial statements for a period ending after September 15, 2009, also would reflect FASB ASC because the underlying financial statements, which are the subjects of those engagements, reference FASB ASC.

.113 However, if your entity will continue to follow grandfathered guidance not included in FASB ASC, it would still be appropriate to reference those standards (and not FASB ASC). A listing of examples of grandfathered guidance can be found in FASB Statement No. 168.

.114 Examples of disclosures using references to FASB ASC can be found at the AICPA's dedicated FASB ASC website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AcctgFinRptg/AcctgFinRptgGuidance/Pages/FASBAccountingStandardsCodification.aspx.

Postcodification FASB References

.115 In spring 2010, the AICPA judgmentally selected 50 SEC filers and reviewed their 2009 Form 10-Ks to understand what type of references are actually being used in practice. All financial statements reviewed were for those entities having a fiscal year-end between December 1, 2009, and January 31, 2010, when the FASB codification was fully effective for all of these entities. The entities selected comprised the following:

- Fourteen large accelerated filers (28 percent of the sample)
- Twenty accelerated filers (40 percent of the sample)
- Seven nonaccelerated filers (14 percent of the sample)
- Nine smaller reporting companies (18 percent of the sample)

.116 Of all the entities selected, 50 percent had gone to mostly plain English references in their annual financial statements. However, among these entities, in the "Summary of Significant Accounting Policies" section of the financial statements, many entities did still use specific references to either old FASB standards (pre-FASB Statement No. 168 standards or legacy standards) or specific Accounting Standards Updates (ASUs), when appropriate. There did not seem to be much of a difference in this percentage among large accelerated filers, accelerated filers, and nonaccelerated filers. However, smaller reporting companies were less likely to use plain English (only 33 percent used plain English references).

.117 As for the remaining 50 percent of filers selected, they chose to use either FASB ASC-specific references (36 percent) or to do some sort of dual references (12 percent) between the precodification standards and new FASB ASC guidance. One entity continued to use the old FASB references and did not mention FASB ASC in its financial statements.

.118 For those entities using FASB ASC references, most only referenced to the topic level and did not go down to the subtopic or section level. For those using dual references, in most cases, the new FASB ASC topic was listed first, with the historical FASB reference noted parenthetically. See the following table for a full breakout of the results:

	Plain English References	*FASB ASC References*	*Dual References*	*Old FASB References*
Large Accelerated Filers	7	4	2	1
Accelerated Filers	12	6	2	0
Nonaccelerated Filers	3	3	1	0
Smaller Reporting Companies	3	5	1	0
Total Sample	25	18	6	1

.119 The sampling results make it clear that although both FASB and the SEC have stated that the use of plain English is most appropriate when dealing with financial statements and notes to financial statements, not everyone is there yet. It will be interesting to see if the plain English references trend continues upward once entities have had another full year to get used to FASB ASC. In addition, all new guidance issued in 2010 was issued through ASUs, and there were no legacy standards issued. Therefore, we would expect that in 2010 filings, even the "Summary of Significant Accounting Policies" section of financial statements would no longer refer to any legacy standards.

.120 We found that with the plain English references, some entities chose instead to say something like, "in accordance with the purchase method of accounting and as updated with FASB's April 2009 additional authoritative guidance for business combinations, we ...." Here the entity uses plain English but also makes it clear which new guidance they are following. This would be most important for those FASB changes with early adoption provisions to make it clear which method an entity used.

.121 FASB has stated that ASUs do not carry any authority. It is the updates that are made to the codification once the ASU is effective that are authoritative. Therefore, entities would be wise to ensure that when they are referring to authoritative literature, use of either plain English or the FASB ASC references would be appropriate, rather than just naming the ASU that brought about the change in accounting.

.122 In addition, entities would want to be sure that they do not refer to any legacy standards in their 2010 financial statements. Because all changes made to the codification in 2010 were through ASUs, referring to legacy standards is no longer correct. For example, since the codification became effective, there have been several updates to the *Fair Value Measurements and Disclosures* topic. Therefore, referring to FASB Statement No. 157, *Fair Value Measurements*, is no longer accurate because this standard does not incorporate changes made since the codification became effective in 2009. We would expect that entities that used dual references

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

to both the legacy standards and FASB ASC references would not continue to use those dual references in 2010 financial statements.

.123 Many entities also have a section of their notes to financial statements titled "Effect of Accounting Pronouncements Not Yet Adopted." In 2010, we would expect the title of this section to change to something like "Effect of Authoritative Accounting Guidance Not Yet Adopted."

.124 It will be interesting to see if both public and nonpublic entities make any additional refinements or changes to their 2010 financial statements as we move into our first full year with FASB ASC. It is our understanding that the SEC may be issuing comment letters to those entities that are not properly reflecting the current state of U.S. GAAP in their financial statements, whether that be by using plain English or using the new FASB ASC references.

Accounting for Costs Associated With Acquiring or Renewing Insurance Contracts

.125 In October 2010, FASB issued ASU No. 2010-26, *Financial Services—Insurance (Topic 944): Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts*. The objective of this update is to address diversity in practice regarding the interpretation of which costs relating to the acquisition of new or renewal insurance contracts qualify for deferral.

.126 This ASU specifies that the following costs incurred in the acquisition of new and renewal contracts should be capitalized in accordance with the amendments in this ASU:

1. Incremental direct costs of contract acquisition. Incremental direct costs are those costs that result directly from and are essential to the contract transaction(s) and would not have been incurred by the insurance entity had the contract transaction(s) not occurred.
2. Certain costs related directly to the following acquisition activities performed by the insurer for the contract:
   a. Underwriting
   b. Policy issuance and processing
   c. Medical and inspection
   d. Sales force contract selling.

.127 The costs related directly to those activities include only the portion of an employee's total compensation (excluding any compensation that is capitalized as incremental direct costs of contract acquisition) and payroll-related fringe benefits related directly to time spent performing those activities for actual acquired contracts and other costs related directly to those activities that would not have been incurred if the contract had not been acquired.

.128 Advertising costs should be included in deferred acquisition costs only if the capitalization criteria in the direct-response advertising guidance in FASB ASC 340-20 are met. If those criteria are met, the direct-response advertising costs should then be included as deferred acquisition costs for classification, subsequent measurement, and premium deficiency purposes in accordance with FASB ASC 944, *Financial Services—Insurance*. If the capitalization criteria in FASB ASC 340-20 are not met, advertising costs are not included as deferred acquisition costs and should be accounted for in accordance with the guidance in FASB ASC 720-35.

.129 All other acquisition-related costs—including costs incurred by the insurer for soliciting potential customers, market research, training, administration, unsuccessful acquisition or renewal efforts, and product development—should be charged to expense as incurred. Administrative costs, rent, depreciation, occupancy, equipment, and all other general overhead costs are considered indirect costs and should be charged to expense as incurred.

.130 If the initial application of the amendments in this ASU results in the capitalization of acquisition costs that had not been capitalized previously by an entity, the entity may elect not to capitalize those types of costs.

.131 The amendments in this ASU do not affect the guidance in paragraphs 4–5 of FASB ASC 944-30-25, which prohibits the capitalization of certain costs incurred in obtaining universal life-type contracts.

.132 The amendments in this ASU modify the definition of the types of costs incurred by insurance entities that can be capitalized in the acquisition of new and renewal contracts. This revised definition may represent a significant change in practice for many insurance entities. For example, many insurance entities capitalize costs relating to unsuccessful contract acquisitions. The amendments in this ASU specify that the costs must be based on successful efforts (that is, acquiring a new or renewal contract). The amendments also specify that advertising costs only should be included as deferred acquisition costs if the direct-response advertising criteria in FASB ASC 340-20 are met.

.133 The amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011. The amendments in this ASU should be applied prospectively upon adoption. Retrospective application to all prior periods presented upon the date of adoption also is permitted, but not required. Early adoption is permitted, but only at the beginning of an entity's annual reporting period.

Investments Held Through Separate Accounts—Consolidation

.134 In April 2010, FASB issued ASU No. 2010-15, *Financial Services—Insurance (Topic 944): How Investments Held through Separate Accounts Affect an Insurer's Consolidation Analysis of Those Investments*. This ASU addresses practice questions on how investments held through the separate accounts of an insurance entity affect the consolidation analysis under FASB ASC 810-10.

.135 This ASU clarifies that, for separate account arrangements meeting the criteria in FASB ASC 944-80-25-2, an insurance entity should not consider any separate account interests held for the benefit of policy holders in an investment to be the insurer's interests and should not combine those interests with its general account interest in the same investment when assessing the investment for consolidation, unless the separate account interests are held for the benefit of a related party policy holder as defined in the variable interest subsections of FASB ASC 810-10 and those subsections require the consideration of related parties.

.136 This ASU provides amendments to FASB ASC 944-80 to clarify that for the purpose of evaluating whether the retention of specialized accounting for investments in consolidation is appropriate, a separate account arrangement meeting the criteria in FASB ASC 944-80-25-2 should be considered a subsidiary. Additionally, this ASU does not require an insurer to consolidate an investment in which a separate account holds a controlling financial interest if the investment is not or would not be consolidated in the standalone financial statements of the separate account. This ASU also provides guidance on how an insurer should consolidate an investment fund in situations in which the insurer concludes that consolidation is required.

.137 The amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2010. Early adoption is permitted. The amendments in this ASU should be applied retrospectively to all prior periods upon the date of adoption.

Decreases in Ownership of a Subsidiary

.138 In January 2010, FASB issued ASU No. 2010-02, *Consolidation (Topic 810): Accounting and Reporting for Decreases in Ownership of a Subsidiary—a Scope Clarification*. This ASU addresses implementation issues related to the changes in ownership provisions in FASB ASC 810-10 (issued as FASB Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*). These amendments clarify that the scope of the decrease in ownership provisions of FASB ASC 810-10 and related guidance applies to a subsidiary or group of assets that is a business or nonprofit activity, a subsidiary that is a business or nonprofit activity that is transferred to an equity method investee or joint venture, and an exchange of a group of assets that constitutes a business or nonprofit activity for a noncontrolling interest in an entity (including an equity method investee or joint venture). Further, the amendments clarify that the decrease in ownership guidance

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

in FASB ASC 810-10 does not apply to the following transactions, even if they involve businesses: sales of in-substance real estate and conveyances of oil and gas mineral rights. The amendment also expands the required disclosures about the deconsolidation of a subsidiary or derecognition of a group of assets within the scope of FASB ASC 810-10. This ASU is effective beginning in the period that an entity adopts FASB Statement No. 160. If an entity has already adopted this guidance, then the amendments in this ASU are effective beginning in the first interim or annual reporting period ending on or after December 15, 2009. The amendments in this ASU should be applied retrospectively to the first period that an entity adopted FASB Statement No. 160.

Accounting for Uncertainty in Income Taxes

.139 For many calendar year nonpublic entities, 2009 was the first year of application of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*. In September 2009, FASB issued ASU No. 2009-06, *Income Taxes (Topic 740)—Implementation Guidance on Accounting for Uncertainty in Income Taxes and Disclosure Amendments for Nonpublic Entities*. This update affects all nongovernmental entities, and the disclosure amendments only apply to nonpublic entities. The four main provisions of the ASU include the following:

- If income taxes paid by the entity are attributable to the entity, the transaction should be accounted for in accordance with the guidance on uncertainty in income taxes in FASB ASC 740, *Income Taxes*. If the taxes paid by the entity are attributable to the owners, the transaction should be accounted for as a transaction with the owners. Attribution should be based on the laws and regulations of the jurisdiction and should be made for each jurisdiction where the entity is subject to income taxes.
- Management's determination of the taxable status of the entity, including its status as a pass-through entity or tax-exempt not-for-profit entity, is a tax position subject to the standards required for accounting for uncertainty in income taxes.
- Regardless of the tax status of the reporting entity, the tax positions of all entities within a related group of entities must be considered.
- For nonpublic entities, it eliminates the disclosures of a tabular reconciliation of the total amount of unrecognized tax benefits at the beginning and end of the periods presented and the total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate (see FASB ASC 740-10-50-15[a]–[b]).

.140 For entities that are currently applying the guidance on accounting for uncertainty in income taxes, this ASU is effective for interim and annual periods ending after September 15, 2009.

Consolidation of Variable Interest Entities

.141 For calendar year entities, 2010 is the first year of application of FASB Statement No. 167, *Amendments to FASB Interpretation No. 46(R)*, which changes how to determine when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. FASB Statement No. 167 was incorporated into FASB ASC through ASU No. 2009-17, *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*. This statement is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited.

.142 The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly affect the entity's economic performance. This statement also amends consolidation of variable interest entities (VIEs) guidance to eliminate the quantitative approach previously required for determining the primary beneficiary of a VIE, which was based on determining which enterprise absorbs the majority of the entity's expected losses, receives a majority of the entity's expected residual returns, or both.

.143 Entities will be required to provide additional disclosures about involvement with VIEs and any significant changes in risk exposure due to that involvement. Entities also will be required to disclose how involvement with a VIE affects the entity's financial statements.

.144 FASB Statement No. 167 retains the scope of previous VIE consolidation accounting guidance, with the addition of entities previously considered qualifying special purpose entities because the concept of these entities was eliminated in FASB Statement No. 166, *Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140*, which was incorporated into FASB ASC by ASU No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*.

.145 This statement also discusses the objectives of its required disclosures and notes that an entity may need to supplement the minimum required disclosures to meet these objectives. The objectives are for the financial statement users to have an understanding of the following:

- The significant judgments and assumptions made by an enterprise in determining whether it must consolidate a VIE or disclose information about its involvement in a VIE, or both
- The nature of restrictions on a consolidated VIE's assets and on the settlement of its liabilities reported by an enterprise in its statement of financial position, including the carrying amounts of such assets and liabilities
- The nature of, and changes in, the risks associated with an enterprise's involvement with the VIE
- How an enterprise's involvement with the VIE affects the enterprise's financial position, financial performance, and cash flows

Accounting for Transfers of Financial Assets

.146 Calendar year entities must also start applying the provisions of FASB Statement No. 166 in 2010. FASB Statement No. 166, which is a revision to FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, requires more information about transfers of financial assets, including securitization transactions, and those circumstances in which entities have continuing exposure to the risks related to transferred financial assets. FASB Statement No. 166 was incorporated into FASB ASC by ASU No. 2009-16 and is discussed in FASB ASC 860, *Transfers and Servicing*. It eliminates the concept of a qualifying special purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosures. The purpose of this statement is to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets. It is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited. This statement must be applied to transfers occurring on or after the effective date; however, the disclosure provisions should be applied to transfers that occurred both before and after the effective date.

.147 Additionally, on and after the effective date, the concept of a qualifying special-purpose entity is no longer relevant for accounting purposes. Therefore, formerly qualifying special purpose entities (as defined under previous accounting standards) should be evaluated for consolidation by reporting entities on and after the effective date in accordance with the applicable consolidation guidance.

.148 The primary objectives of the disclosure requirements of this guidance are to provide the financial statement users with a clear understanding of the following:

- A transferor's continuing involvement (as defined by the FASB ASC glossary), if any, with transferred financial assets
- The nature of any restrictions on assets reported by an entity in its statement of financial position that relate to a transferred financial asset, including the carrying amounts of those assets

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- How servicing assets and servicing liabilities are reported under this pronouncement
- For transfers accounted for as sales when a transferor has continuing involvement with the transferred financial assets and for transfers of financial assets accounted for as secured borrowings, how the transfer of financial assets affects a transferor's financial position, financial performance, and cash flows

.149 These objectives must be met by the disclosures, regardless of the specific requirements of the pronouncement. It may be the case that an entity provides greater detail than what is a required disclosure to meet these objectives, depending on the facts and circumstances.

Subsequent Events

.150 FASB Statement No. 165, *Subsequent Events*, which has been codified in FASB ASC 855, *Subsequent Events*, is effective for interim and annual periods ending after June 15, 2009. This statement is intended to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date (that is, whether that date represents the date the financial statements were issued or were available to be issued). The purpose of this disclosure is to alert all users of financial statements that an entity has not evaluated subsequent events after that date in the set of financial statements being presented.

.151 In particular, this statement sets forth the following:

- The period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements
- The circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements
- The disclosures that an entity should make about events or transactions that occurred after the balance sheet date

.152 FASB states that this guidance should not result in significant changes in current practice with regard to the subsequent events that an entity reports, either through recognition or disclosure, in its financial statements. In September 2009, the AICPA issued Technical Questions and Answers (TIS) section 8700.01, "Effect of FASB ASC 855 on Accounting Guidance in AU Section 560" (AICPA, *Technical Practice Aids*), which notes that preparers of financial statements for nongovernmental entities are required to follow the accounting guidance in FASB ASC 855. Additionally, the accounting guidance contained in AU section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), would no longer be applicable to audits of nongovernmental entities. This question and answer can be accessed at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

.153 In February 2010, FASB issued ASU No. 2010-09, *Subsequent Events (Topic 855): Amendments to Certain Recognition and Disclosure Requirements*, to address questions that arose in practice about potential conflicts between FASB ASC 855 and SEC guidance—specifically, the requirements to disclose the date that the financial statements are issued. This ASU also addresses the intended breadth of the reissuance disclosure provision related to subsequent events.

.154 ASU No. 2010-09 requires an entity that is an SEC filer or a conduit bond obligor for conduit debt securities that are traded in a public market to evaluate subsequent events through the date the financial statements are issued. All other entities must evaluate subsequent events through the date the financial statements are available to be issued. Further, an entity that is an SEC filer is not required to disclose the date through which subsequent events have been evaluated. Lastly, only non-SEC filers should disclose in the revised financial statements the dates through which subsequent events have been evaluated in both the issued or available-to-be-issued financial statements and the revised financial statements. Revised financial statements are considered reissued financial statements.

.155 The amendments in ASU No. 2010-09 are effective upon issuance, except for the use of the issued date for conduit bond obligors. That amendment is effective for interim or annual periods ending after June 15, 2010. In June 2010, the AICPA issued TIS section 8700.03, "Auditor's Responsibilities for Subsequent Events Relative to a Conduit Debt Obligor" (AICPA, *Technical Practice Aids*), to provide guidance related to the effect of this ASU on the auditor's responsibilities for subsequent events relative to a conduit debt obligor and the date of the auditor's report.

Fair Value

.156 FASB ASC 820-10-20 defines *fair value* and establishes a framework for measuring fair value; however, it does not dictate when an entity must measure something at fair value, nor does it expand the use of fair value in any way. The need to understand fair value accounting has increased in importance as alternative investments increased in popularity and complexity. *Fair value* is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Measuring Liabilities at Fair Value

.157 FASB issued ASU No. 2009-05, *Fair Value Measurements and Disclosures (Topic 820)—Measuring Liabilities at Fair Value*, to increase the consistency in the application of FASB ASC 820 to liabilities because many constituents had expressed concern. This ASU applies to all entities that measure liabilities at fair value under FASB ASC 820 and amends sections of FASB ASC 820-10.

.158 This ASU states that, in circumstances in which a quoted price in an active market for the identical liability is not available, fair value of the liability must be measured by either (*a*) a valuation technique that uses the quoted price of the identical liability when traded as an asset or quoted prices for similar liabilities, or similar liabilities when traded as assets, or (*b*) another valuation technique that is consistent with the principles of FASB ASC 820, such as an income approach or a market approach. Further, if a restriction on the transference of the liability exists, the ASU clarifies that an entity is not required to factor that in to the inputs of the fair value determination. Lastly, the ASU also clarifies that a quoted price in an active market for the identical liability, or an unadjusted quoted price in an active market for the identical liability, when traded as an asset, are level 1 measurements within the fair value hierarchy. The guidance in this ASU is effective for the first reporting period (including interim periods) beginning after its issuance in August 2009. The full text of the ASU can be accessed from FASB's website at www.fasb.org.

Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)

.159 FASB issued ASU No. 2009-12, *Fair Value Measurements and Disclosures (Topic 820): Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*, because of the complexities and practical difficulties in estimating the fair value of alternative investments. It is applicable to all reporting entities that hold an investment that is required or permitted to be measured or disclosed at fair value on a recurring or nonrecurring basis, and as of the reporting entity's measurement date, if the investment both

- does not have a readily determinable fair value. The FASB ASC glossary states that an equity security has a readily determinable fair value if it meets any of the following conditions:
    - The fair value of any equity security is readily determinable if sales prices or bid-and-asked quotations are currently available on a securities exchange registered with the SEC or in the OTC market, provided that those prices or quotations for the OTC market are publicly reported by NASDAQ or by Pink Sheets LLC. Restricted stock meets that definition if the restriction terminates within one year.
    - The fair value of an equity security traded only in a foreign market is readily determinable if that foreign market is of a breadth and scope comparable to one of the U.S. markets referred to previously.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

— The fair value of an investment in a mutual fund is readily determinable if the fair value per share (unit) is determined and published and is the basis for current transactions.

- is in an entity that has all of the attributes specified in FASB ASC 946-10-15-2 or, if one of those attributes are not met, is in an entity for which it is industry practice to issue financial statements using guidance that is consistent with the measurement principles in FASB ASC 946, *Financial Services—Investment Companies.*

.160 As a practical expedient, this ASU permits a reporting entity to measure the fair value of an investment within its scope on the basis of the net asset value (NAV) per share of the investment (or its equivalent) if the NAV is calculated in a manner consistent with the measurement principles of FASB ASC 946 as of the reporting entity's measurement date, including measurement of all or substantially all of the underlying investments of the investee in accordance with FASB ASC 820. If the practical expedient is used, certain attributes of the investment (such as restrictions on redemption) and transaction prices from principal-to-principal or brokered transactions will not be considered in measuring the investment's fair value.

.161 This ASU also requires disclosures by major category of investment about the attributes of investments, such as the nature of any restrictions on the investor's ability to redeem its investments at the measurement date, any unfunded commitments, and the investment strategies of the investees. The major category of investment is required to be determined based on the guidance in FASB ASC 320-10-50-1B. These disclosures are required for all investments within the scope of this ASU. The ASU adds an example of its required disclosures in FASB ASC 820-10-55-64A.

.162 These amendments are effective for interim and annual periods ending after December 15, 2009, and are included in FASB ASC 820-10. An AICPA practice aid, *Alternative Investments—Audit Considerations,* also is available and is a useful tool for auditors. It focuses on the existence and valuation assertions associated with alternative investments.

.163 In December 2009, the AICPA issued sections .18–.27 of TIS section 2220, *Long-Term Investments* (AICPA, *Technical Practice Aids*), to assist reporting entities when implementing the provisions of FASB ASC 820 to estimate the fair value of their investments in certain entities that calculate NAV. TIS sections 2220.18–.27 apply to investments that are required to be measured and reported at fair value and are within the scope of paragraphs 4–5 of FASB ASC 820-10-15. These questions and answers compliment the guidance provided in ASU No. 2009-12.

.164 Topics covered in these questions and answers include:

- The circumstances when NAV may be used to estimate the fair value of investments as a practical expedient
- How to identify the unit of account for interests in alternative investments
- Considerations for determining whether the reported NAV has been calculated in a manner consistent with FASB ASC 946
- Examples of circumstances when an adjustment to the reported NAV may be necessary
- How to adjust the reported NAV when it is not as of the reporting entity's measurement date
- How to adjust the reported NAV when it has not been calculated in accordance with FASB ASC 946
- The determination of the appropriate level within the fair value hierarchy for NAV of alternative investments in relation to the ability to redeem the investment versus the actual redemption request for the investment
- The definition of *near term* for the purposes of determining the appropriate level within the fair value hierarchy
- The tailoring of disclosures categories to address the nature and risks of investments

- Some considerations for determining the fair value of alternative investments when not utilizing NAV as a practical expedient

.165 Recently issued questions and answers can be located on the AICPA website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/Pages/RecentlyIssuedTechnicalQuestionsandAnswers.aspx.

Fair Value Measurements Disclosures

.166 ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*, was issued to increase the transparency in financial reporting of fair value measurements. FASB noted that due to the different degrees of subjectivity and reliability on level 1, level 2, and level 3 fair value measurements, information about significant transfers between the three levels and the underlying reasons for such transfers would be useful to financial statements users.

.167 This ASU amends FASB ASC 820-10 to require the following new disclosures:

- *Transfers in and out of levels 1 and 2*. A reporting entity should disclose separately the amounts of significant transfers in and out of level 1 and level 2 fair value measurements and describe the reasons for the transfers.
- *Activity in level 3 fair value measurements*. In the reconciliation for fair value measurements using significant unobservable inputs (level 3), a reporting entity should present separately information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number).

.168 Additionally, the ASU amends FASB ASC 820-10 to clarify certain existing disclosures:

- *Level of disaggregation*. A reporting entity should provide fair value measurement disclosures for each class of assets and liabilities. A class is often a subset of assets or liabilities within a line item in the statement of financial position. A reporting entity needs to use judgment in determining the appropriate classes of assets and liabilities.
- *Disclosures about inputs and valuation techniques*. A reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. Those disclosures are required for fair value measurements that fall in either level 2 or level 3.

.169 The amendments in ASU No. 2010-06 are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the rollforward of activity in level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years.

Disclosures About Credit Quality and Allowance for Credit Losses

.170 In July 2010, FASB issued ASU No. 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, which requires an entity to provide a greater level of disaggregated information about the credit quality of its financing receivables and its allowance for credit losses. The ASU amends the existing disclosures to require an entity to provide the following disclosures about its financing receivables on a disaggregated basis:

- A rollforward schedule of the allowance for credit losses from the beginning of the reporting period to the end of the reporting period on a portfolio segment basis, with the ending balance further disaggregated on the basis of the impairment method. For each disaggregated ending balance, the related recorded investment in financing receivables should also be disclosed.
- The nonaccrual status of financing receivables by class of financing receivables.
- Impaired financing receivables by class of financing receivables.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.171 The amendments in this ASU require an entity to provide the following additional disclosures about its financing receivables:

- Credit quality indicators of financing receivables at the end of the reporting period by class of financing receivables (see FASB ASC 310-10-55-19 for examples of credit quality indicators)
- The aging of past due financing receivables at the end of the reporting period by class of financing receivables
- The nature and extent of troubled debt restructurings that occurred during the period by class of financing receivables and their effect on the allowance for credit losses
- The nature and extent of financing receivables modified as troubled debt restructurings within the previous 12 months that defaulted during the reporting period by class of financing receivables and their effect on the allowance for credit losses
- Significant purchases and sales of financing receivables during the reporting period disaggregated by portfolio segment

.172 An entity must also describe, by portfolio segment, its accounting policies and methodology used to estimate its allowance for credit losses, including the identification of any changes to the entity's accounting policies or methodology from the prior period and the entity's rationale for the change.

.173 The amendments in this ASU apply to all entities with financing receivables. Examples of financing receivables include loans; trade receivables; notes receivable; and receivables relating to a lessor's leveraged, direct financing, and sales-type leases. See the "Pending Content" in paragraphs 13–15 of FASB ASC 310-10-55 for more information on the definition of *financing receivable*, including a list of items that are excluded from the definition (for example, debt securities). In addition, the "Pending Content" in paragraphs 7–12 of FASB ASC 310-10-55 illustrates certain disclosures required by this ASU.

.174 For public entities, the disclosures as of the end of a reporting period are effective for interim and annual reporting periods ending on or after December 15, 2010. The disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010. For nonpublic entities, the disclosures are effective for annual reporting periods ending on or after December 15, 2011.

Convergence With International Financial Reporting Standards

.175 Since the signing of the Norwalk Agreement by FASB and the International Accounting Standards Board (IASB), the bodies have had a common goal—one set of accounting standards for international use. *International convergence of accounting standards* refers to both the goal of this project and the path taken to reach it. The path toward reaching this goal will both improve U.S. GAAP and International Financial Reporting Standards (IFRSs) and eliminate the differences between them. In the Norwalk agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRSs. The "On the Horizon" section of this alert discusses these joint projects. For more information, visit www.fasb.org and www.iasb.org.

SEC Work Plan for Consideration of IFRSs

.176 In February 2010, the SEC issued Release No. 33-9109, *Commission Statement in Support of Convergence and Global Accounting Standards*. This release provides an update to the SEC's roadmap on its consideration of global accounting standards, including a confirmation of its continued support for the convergence of U.S. GAAP and IFRSs in order to narrow the differences between the two sets of standards. The SEC believes that a more comprehensive work plan is necessary to transparently lay out the work that must be done to support a decision on the appropriate course to incorporate IFRSs into the U.S. financial reporting system for U.S. issuers, including the scope, time frame, and methodology for any such transition. Therefore, the SEC has

indicated that it will carefully consider and deliberate whether these changes are in the best interest of U.S. investors and markets.

.177 The SEC directed its staff to execute a work plan, the results of which will aid the SEC in its evaluation of the impact that the use of IFRSs by U.S. entities would have on the U.S. securities market. The work plan includes consideration of IFRSs, both as they currently exist and after the completion of the various convergence projects underway by FASB and the IASB. Among other things, the work plan addresses some of the comments and concerns received on the roadmap, including the following:

- Sufficient development and application of IFRSs for the U.S. reporting system
- The independence of standard setting for the benefit of investors
- Investor understanding and education regarding IFRSs
- Examination of the U.S. regulatory environment that would be affected by a change in accounting standards
- The impact on issuers, both large and small, including changes to accounting systems, changes to contractual arrangements, corporate governance considerations, and litigation contingencies
- Human capital readiness

.178 Beginning no later than October 2010, and frequently thereafter, the SEC staff will provide public progress reports on the work plan, as well as the status of the FASB and IASB convergence projects, until the work is complete. By 2011, assuming completion of these convergence projects and the staff's work plan, the SEC will decide whether to incorporate IFRSs into the U.S. financial reporting system and, if so, when and how. Commentors provided feedback on the timing discussed in the roadmap, suggesting that a four or five year time frame would be necessary to successfully implement a change in their financial reporting systems to incorporate IFRSs. Under that assumption, if the SEC determines in 2011 to incorporate IFRSs into the U.S. financial reporting system, the first time that U.S. entities would report under such a system would be no earlier than 2015. This timeline will be further evaluated as part of the work plan. The work plan is included as an appendix at the end of Release No. 33-9109 and also can be found on the SEC's website at www.sec.gov.

.179 In August 2010, the SEC issued two releases (Release Nos. 33-9133 and 33-9134, *Notice of Solicitation of Public Comment on Consideration of Incorporating IFRS Into the Financial Reporting System for U.S. Issuers*) to solicit public comment on its ongoing consideration of incorporating IFRSs into the financial reporting system for U.S. issuers. The first release contains requests for comment on three topics derived from the work plan that are related to the potential impact on investors. The second release contains requests for comment on three topics, also derived from the work plan, that are related to the potential impact on U.S. issuers. All comments will be available on the SEC's website.

International Financial Reporting Standard for Small and Medium-Sized Entities

.180 The IASB issued *International Financial Reporting Standard for Small and Medium-sized Entities* (*IFRS for SMEs*) to be a self-contained global accounting and financial reporting standard applicable to the general purpose financial statements of, and other financial reporting by, entities that are known in many countries as SMEs. *IFRS for SMEs* is intended to be used by entities that publish general purpose financial statements for external users and do not have public accountability.

.181 The AICPA Governing Council recognizes the IASB as an accounting body for purposes of establishing international financial accounting and reporting principles. This amendment to appendix A of AICPA Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, vol. 2, ET sec. 202 par. .01), and Rule 203, *Accounting Principles* (AICPA, *Professional Standards*, vol. 2, ET sec. 203 par. .01), gives AICPA members the option to use IFRSs as an alternative to U.S. GAAP. As such, a key professional barrier to using IFRSs and, therefore, *IFRS for SMEs* has been removed. CPAs may need to check with their state boards of accountancy to determine the status of reporting on financial statements prepared in accordance with *IFRS for SMEs* within their individual state. Any remaining barriers may come in the form of unwillingness by a private company's

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

financial statement users to accept financial statements prepared under *IFRS for SMEs*, and a private company's expenditure of money, time, and effort to convert to *IFRS for SMEs*.

.182 Information about IFRSs and *IFRS for SMEs* can be found at www.ifrs.com. Additionally, to help its membership, the AICPA has developed an IFRS for SMEs—U.S. GAAP Comparison Wiki. The purpose of the Wiki is to provide a detailed and comprehensive comparison of IFRS for SMEs with corresponding requirements of U.S. GAAP. But it is more than just a comparison resource—it is a wiki. That means it is a collaborative, ongoing work in progress for anyone to contribute to and use. The Wiki is found at http://wiki.ifrs.com/.

.183 Entities interested in *IFRS for SMEs* or possibly adopting the standard may find it helpful to take the following actions:

- *Monitor the efforts of the AICPA/FAF/NASBA "Blue-Ribbon" Panel on Standard Setting for Private Companies*. For more information about the panel, go to www.fasb.org/cs/ContentServer?c=Page&pagename=FASB%2FPage%2FSectionPage&cid=1176156684820.
- *Monitor convergence efforts of FASB and the IASB*.
- *Stay informed on SEC developments*. Public companies will be directly affected by the SEC's decision to adopt IASB standards. The future of private company reporting will also likely be affected by an SEC mandate to adopt IFRSs.
- *Develop a high-level analysis of the potential impact on accounting policies, processes and systems, contracts, legal agreements, and financing and tax structures*.

Private Company Financial Reporting

.184 The AICPA and the Financial Accounting Foundation established the "blue-ribbon panel" to address how U.S. accounting standards can best meet the needs of U.S. users of private company financial statements. This panel also is sponsored by the National Association of State Boards of Accountancy. The "blue-ribbon panel" will provide recommendations through an issued report on the future of standard setting for private companies, including whether separate, stand-alone accounting standards for private companies are needed. The panel has discussed how smaller entities are struggling to understand and implement complex standards, which has resulted in entities taking more GAAP exceptions. Other key items include (*a*) whether U.S. GAAP is meeting private company user needs in a cost-beneficial manner for both users and preparers, (*b*) how private company standard setting in the United States compares to standard setting in other countries, and (*c*) possible lessons to be learned from alternatives seen in other countries. The panel's issued report will be made available to the public, and the resulting action plan is expected to be exposed for public comment prior to that plan being finalized. The panel will issue a report containing its recommendations to the Financial Accounting Foundation (FAF) board of trustees in January 2011. The report will be publicly available, and the resulting action plan is expected to be exposed for public comment prior to the plan being finalized.

.185 During the July 2010 meeting of the panel, seven alternative models for private company financial reporting were discussed. Models based on IFRSs and a model that would have resulted in no change to private company financial reporting were eliminated. All remaining models would result in differences in GAAP for private and public entities; the main focus of the panel moving forward will be to select a model that is relevant to users of private company financial reports because this has become the overriding issue. The three primary models the panel agreed to focus on going forward are U.S. GAAP with Exclusions for Private Companies—with enhancements; U.S. GAAP—Baseline GAAP with Public Company Add-Ons; and Separate, Stand-Alone GAAP Based on Current U.S. GAAP. Most of the panel members also expressed their discontent with the current make-up of FASB and its heavy, but appropriate, focus on public companies. This led to another key discussion topic: the structure of whatever model is chosen—the current FASB; a restructured FASB (with greater private company representation); or a new, separate Private Company Standards Board under the oversight of the FAF.

Recent Pronouncements

.186 AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers. The PCAOB establishes auditing and attestation standards for audits of issuers. For information on pronouncements issued subsequent to the writing of this alert, please refer to the AICPA website at www.aicpa.org, the FASB website at www.fasb.org, and the PCAOB website at www.pcaob.org. You also may look for announcements of newly issued accounting standards in the *CPA Letter Daily* and the *Journal of Accountancy*.

Recent Auditing and Attestation Pronouncements and Related Guidance

.187 The following table presents a list of recently issued audit and attestation pronouncements and related guidance.

Recent Auditing and Attestation Pronouncements and Related Guidance	
Statement on Auditing Standards (SAS) No. 120, *Required Supplementary Information* (AICPA, *Professional Standards*, AU sec. 558) Issue Date: February 2010 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard addresses the auditor's responsibility with respect to information that a designated accounting standard setter requires to accompany an entity's basic financial statements. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the basic financial statements does not cover required supplementary information. It also supersedes AU section 558A, *Required Supplementary Information* (AICPA, *Professional Standards*). This SAS is effective for periods beginning on or after December 15, 2010. Early application is permitted.
SAS No. 119, *Supplementary Information in Relation to the Financial Statements as a Whole* (AICPA, *Professional Standards*, AU sec. 551) Issue Date: February 2010 (Applicable to audits conducted in accordance with GAAS)	This SAS addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. The information covered by this SAS is presented outside the basic financial statements and is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Along with SAS No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, AU sec. 550), this SAS also supersedes AU section 551A, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*). This SAS is effective for periods beginning on or after December 15, 2010. Early application is permitted.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, AU sec. 550) Issue Date: February 2010 (Applicable to audits conducted in accordance with GAAS)	This SAS addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the financial statements does not cover other information, and the auditor has no responsibility for determining whether such information is properly stated. This SAS establishes the requirement for the auditor to read the other information of which the auditor is aware because the credibility of the audited financial statements may be undermined by material inconsistencies between the audited financial statements and other information. This SAS supersedes AU section 550A, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*), and along with SAS No. 119, supersedes AU section 551A. This SAS is effective for periods beginning on or after December 15, 2010. Early application is permitted.
SAS No. 117, *Compliance Audits* (AICPA, *Professional Standards*, AU sec. 801) Issue Date: December 2009 (Applicable to audits conducted in accordance with GAAS)	This standard amends AU section 801 to reflect changes in the compliance audit environment and incorporates the risk assessment standards. It requires the auditor to adapt and apply the AU sections of the AICPA's *Professional Standards* to compliance audits and provides guidance on how to do so. It is effective for compliance audits for fiscal periods ending on or after June 15, 2010. Earlier application is permitted.
SAS No. 116, *Interim Financial Information* (AICPA, *Professional Standards*, AU sec. 722) Issue Date: February 2009 (Applicable to audits conducted in accordance with GAAS)	This standard amends AU section 722 to accommodate reviews of interim financial information of nonissuers, including companies offering securities pursuant to Securities and Exchange Commission (SEC) Rule 144A or participating in private equity exchanges. It is effective for reviews of interim financial information for interim periods beginning after December 15, 2009. Earlier application is permitted.
Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801) Issue Date: April 2010	SSAE No. 16 supersedes the guidance for service auditors in AU section 324, *Service Organizations* (AICPA, *Professional Standards*), and addresses examination engagements undertaken by a service auditor to report on controls at organizations that provide services to user entities when those controls are likely to be relevant to user entities' internal control over financial reporting. Reports prepared in accordance with SSAE No. 16 may provide appropriate evidence under AU section 324. It is effective for service auditors' reports for periods ending on or after June 15, 2011. Earlier implementation is permitted.
Interpretation No. 1, "Reporting Under Section 112 of the Federal Deposit Insurance Corporation Improvement Act," of AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements* (AICPA, *Professional Standards*, AT sec. 9501 par. .01–.07) Issue Date: September 2010 (Interpretive publication)	For insured depository institutions (IDI) that require an examination of internal controls at the IDI level, this interpretation addresses whether the auditor can meet the integrated audit requirement when an IDI does not prepare financial statements for external distribution and, if so, how the auditor can report on the effectiveness of the IDI's internal control over financial reporting.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 15, *Audit Evidence* (subject to approval by the SEC) Issue Date: August 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard explains what constitutes audit evidence and establishes requirements for designing and performing audit procedures to obtain sufficient appropriate audit evidence to support the opinion expressed in the auditor's report.
PCAOB Auditing Standard No. 7, *Engagement Quality Review* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards) Issue Date: January 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This standard and its related amendments supersede the interim concurring partner review requirements and update the interim quality control standards. An engagement quality review and concurring approval of issuance are required for each audit engagement and for each engagement to review interim financial information conducted pursuant to the standards of the PCAOB. The standard provides a framework for the engagement quality reviewer to objectively evaluate the significant judgments made and related conclusions reached by the engagement team in forming an overall conclusion about the engagement. It is effective for engagement quality reviews of audits and interim reviews for fiscal years that began on or after December 15, 2009.
PCAOB Staff Question and Answer, *Auditing Standard No. 7,* Engagement Quality Review (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 100.10) Issue Date: February 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This staff question and answer provides further implementation guidance on the documentation requirements of Auditing Standard No. 7 in light of comments the SEC received during its comment period.

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

Recent Auditing and Attestation Pronouncements and Related Guidance	
PCAOB Staff Audit Practice Alert (PA) No. 6, *Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants from Outside the Firm* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.06) Issue Date: July 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This alert is intended to remind registered public accounting firms of their obligations when using the work of other firms or using assistants engaged from outside the firm. The alert was prompted by observations by the PCAOB that a number of registered public accounting firms located within the United States have been issuing reports on financial statements filed by issuers that have substantially all of their operations outside of the United States, and some of these firms may not be conducting those audits in accordance with PCAOB standards.
PCAOB Staff Audit PA No. 5, *Auditor Considerations Regarding Significant Unusual Transactions* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.05) Issue Date: April 2010 (Applicable to audits conducted in accordance with PCAOB standards)	This alert explains that significant unusual transactions, especially those close to period-end that pose difficult substance over form questions, can provide opportunities for entities to engage in fraudulent financial reporting. This staff audit practice alert is designed to remind auditors of public companies about their responsibilities to assess and respond to the risk of material misstatement of the financial statements due to error or fraud posed by significant unusual transactions.

Recent ASUs

.188 The following table presents, by codification area, a list of recently issued ASUs, through the issuance of ASU No. 2010-24, *Health Care Entities (Topic 954): Presentation of Insurance Claims and Related Insurance Recoveries (a consensus of the FASB Emerging Issues Task Force)*. However, this table does not include ASUs that are SEC updates (such as ASU No. 2010-19 *Foreign Currency [Topic 830]: Foreign Currency Issues: Multiple Foreign Currency Exchange Rates [SEC Update]*) or ASUs that are technical corrections to various topics. FASB ASC does include SEC content to improve the usefulness of FASB ASC for public companies, but the content labeled as SEC staff guidance does not constitute rules or interpretations of the SEC nor does such guidance bear official SEC approval.

Recent AICPA Independence and Ethics Developments

.190 The Audit Risk Alert *Independence and Ethics Developments—2010/11* (product no. 0224710) contains a complete update on new independence and ethics pronouncements. This alert will heighten your awareness of independence and ethics matters likely to affect your practice. Obtain this alert by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Establishing and Maintaining Internal Control

.191 One of the Professional Ethics Executive Committee's (PEEC's) current projects deals with a possible inconsistency within Interpretation No. 101-3, "Performance of Nonattest Services" under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .05). Interpretation No. 101-3 provides examples of general activities that would impair a member's independence, including establishing or maintaining internal controls, including performing ongoing monitoring activities for a client. The PEEC recognizes that some practitioners perceive an inconsistency in Interpretation No. 101-3 because certain bookkeeping services and other nonattest services that are permitted under Interpretation No. 101-3 could be viewed as "maintaining internal control" for the client.

.192 To address the possible inconsistency in Interpretation No. 101-3, the PEEC is considering possible clarifying revisions to Interpretation No. 101-3. The revisions would provide more descriptive language about management responsibilities, which should help members better distinguish between permissible and prohibited nonattest services. Readers are encouraged to monitor the progress of this project.

.193 PEEC meeting information, including meeting agendas, discussion materials, and minutes of prior meetings can be found at www.aicpa.org/InterestAreas/ProfessionalEthics/Community/MeetingMinutesandAgendas/Pages/MeetingInfo.aspx.

.194 Exposure drafts issued by the PEEC can be found at www.aicpa.org/InterestAreas/ProfessionalEthics/Community/ExposureDrafts/Pages/ExposureDrafts.aspx.

On the Horizon

.195 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the insurance industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.196 Information on, and copies of, outstanding exposure drafts may be obtained from the various standard setters' websites. These websites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard setting bodies for further information.

Overhaul Project—AICPA Audit and Accounting Guide *Property and Liability Insurance Entities*

.197 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide *Property and Liability Insurance Entities*, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1990. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

Auditing and Attestation Pipeline—Nonissuers

ASB Clarity Project

.198 In response to growing concerns about the complexity of standards, the ASB has commenced a large-scale clarity project to revise all existing auditing standards so they are easier to read and understand. Over the last few years, the ASB has been redrafting all of the existing auditing sections contained in the *Codification of Statements on Auditing Standards* (AU sections of the AICPA's *Professional Standards*) to apply the clarity drafting conventions and converge with the ISAs issued by the IAASB. The majority of the clarified standards will be issued in a single SAS codified as AU sections, with each section assigned a section number and title. When the new SAS becomes effective, the SASs issued prior to SAS No. 117, *Compliance Audits* (AICPA, *Professional Standards*, vol. 1, AU sec. 801), will be superseded. The ASB proposes that most redrafted standards become effective at the same time and is working toward completing the project in the first half of 2011. Two possible exceptions to that timeframe include the clarity redrafts of AU sections 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, and 532, *Restricting the Use of an Auditor's Report* (AICPA, *Professional Standards*, vol. 1).

.199 In May 2010, the expected effective date of the clarified standards was revised to be applicable to be for audits of financial statements for periods ending on or after December 15, 2012. The standards recently issued in clarified format (SAS Nos. 117–120) have different effective dates. The ASB believes that having a single effective date for most of the clarified standards will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. This expected date depends on satisfactory progress being made and will be amended, if necessary. Further, early adoption of the new SAS will not be appropriate. The SAS that will encompass all clarified AU sections will be issued with the next consecutive number that is available. See the explanatory memorandum "Clarification and Convergence," the discussion paper *Improving the Clarity of ASB Standards*, and *Clarity Project: Questions and Answers* at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestStndrds/ASBClarity/Pages/ImprovingClarityASBStandards.aspx. All clarified SASs that have been finalized by the ASB but are not yet issued as authoritative can be found at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestStndrds/ASBClarity/Pages/Final%20Clarified%20Statements%20on%20Auditing%20Standards.aspx.

Interim Financial Information

.200 In July 2010, the ASB issued two proposed SASs on interim financial information. The first, *Revised Applicability of Statement on Auditing Standards No. 116*, Interim Financial Information, is intended to revise paragraph 5 of SAS No. 116, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 722), so that the guidance in SAS No. 116 would be applicable when the auditor audited the entity's latest annual financial statements and the appointment of another auditor to audit the current year financial statements is not effective prior to the beginning of the period covered by the review. Currently, the guidance in SAS No. 116 is applicable when the auditor performs the audit of the latest annual financial statements and expects to be engaged to audit the current year financial statements (and, therefore, is not applicable when the auditor expects that a new auditor may be engaged for the current year). This proposed amendment would be effective for interim reviews of interim financial information for periods beginning after December 15, 2011, with early implementation permitted. Comments are due by October 8, 2010.

.201 The second proposal on interim financial information, *Interim Financial Information* (Redrafted), would supersede SAS No. 116 and represents the redrafting of the guidance to apply clarity drafting conventions. The main changes to existing standards are as follows:

- Replacement of the term *accountant* with auditor
- The change to paragraph 5 discussed in the prior paragraph
- Requirement of the auditor to issue a written report unless the review of the interim financial information is required by a third party and the third party does not require a written review report
- Allowance of oral reports for entities that are subject to external requirements to report in a manner that is substantially similar to the reporting required of issuers, pursuant to PCAOB standards
- Requirement for the auditor to perform procedures consistent with those required for acceptance of an engagement to audit financial statements
- Requirement for the review report to include a statement that the review of interim financial information was conducted in accordance with auditing standards generally accepted in the United States of America

.202 This proposed SAS would be effective for reviews of interim financial information for interim periods of fiscal years beginning on or after December 15, 2012. Comments for this proposed SAS are also due by October 8, 2010.

Exposure Drafts on Auditor's Reports

.203 The ASB issued three proposed SASs related to auditor's reports: *Forming an Opinion and Reporting on Financial Statements*, *Modifications to the Opinion in the Independent Auditor's Report*, and *Emphasis of Matter Paragraphs and Other Matter Paragraphs in the Independent Auditor's Report*. These proposed standards are drafted with the ASB's clarity drafting conventions and are intended to converge with ISAs. The intent of issuing three separate SASs is to assist practitioners in identifying and applying the reporting requirements and guidance. The ASB has made various changes to the related ISAs to tailor them to the United States; however these changes have not been substantial in nature.

.204 The comment period for the proposed SASs ended in December 2009. The proposed SASs are expected to be effective for audits of financial statements for periods ending on or after December 15, 2012. Auditors are encouraged to review the exposure draft and be alert for developments on this topic.

Exposure Drafts on Special Considerations Audits

.205 Another exposure draft issued by the ASB contains two proposed SASs: *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* and *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*. These proposed standards have been drafted with the clarity drafting conventions and are intended to converge with the equivalent ISAs. No meaningful differences exist between these proposed standards and the ISAs. *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* addresses the application of GAAS to financial statements prepared under the cash, tax, regulatory, or contractual bases of accounting. It also replaces the term *other comprehensive basis of accounting* with *special purpose framework*.

.206 *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement* introduces new planning, performance, and reporting requirements for these engagements. The proposed SAS also clarifies that a single financial statement and a specific element of a financial statement include the related notes.

.207 The comment period for the proposed SASs ended in December 2009. The proposed SASs are expected to be effective for audits of financial statements for periods ending on or after December 15, 2012. Auditors are encouraged to review the exposure draft and be alert for developments on this topic.

Auditing and Attestation Pipeline—Issuers

Confirmations

.208 The PCAOB has proposed a draft of an auditing standard on confirmations. A concept release was originally issued in April 2009 and received 24 comment letters. This proposed auditing standard, issued in July 2010, would strengthen the requirements under the current auditing standard, AU section 330, *The Confirmation Process* (AICPA, *PCAOB Standards and Related Rules*, Interim Standards), and replace it, upon final issuance of a standard and approval from the SEC. The proposed new standard

- requires confirmation procedures for specific accounts, such as receivables that arise from credit sales, loans, or other transactions, and also in response to significant risks that relate to the relevant assertions that can be adequately addressed by confirmation procedures.
- incorporates procedures in response to the risk of material misstatement, such as in the areas of investigating exceptions reflected on confirmation responses and evaluating nonresponses to confirmation requests.
- updates the confirmation guidance to reflect significant advances in technology and explains that confirmation responses received electronically (for example, by fax e-mail, through an intermediary, or direct access) might involve additional risks relating to reliability. Therefore, the auditor must perform additional requirements.
- defines a confirmation response to include electronic or other medium.
- enhances requirements when confirmation responses include disclaimers and restrictive language by requiring the auditor to evaluate the effect on the reliability of a confirmation response. Further, if the disclaimer or restrictive language causes doubts about the reliability of a confirmation response, the auditor should obtain additional appropriate audit evidence.

.209 In drafting this proposed standard, the PCAOB considered the guidance contained in ISA 505, *External Confirmations*, and the AICPA's proposed guidance on confirmations. This standard is anticipated to be effective for auditors for fiscal years ending on or after December 15, 2011.

Communications With Audit Committees

.210 In March 2010, the PCAOB proposed for comment an auditing standard on *Communications with Audit Committees* and a series of related amendments to its interim standards that are intended to (*a*) enhance the relevance and effectiveness of the communications between the auditor and the audit committee and (*b*) emphasize the importance of effective, two-way communications between the auditor and the audit committee to better achieve the objectives of the audit. Two of the new requirements would be for the auditor (*a*) to establish a mutual understanding of the terms of the audit engagement with the audit committee and to document that understanding in the engagement letter and (*b*) to evaluate the adequacy of two-way communication between the auditor and audit committee. Additionally, the proposal also includes requirements for the auditor to communicate with the audit committee regarding the following:

- An overview of the audit strategy and timing of the audit, including a discussion of significant risks; the use of the internal audit function; and the roles, responsibilities, and location of firms participating in the audit
- Critical accounting policies, practices, and estimates
- The auditor's evaluation of the entity's ability to continue as a going concern

.211 The proposed standard would become effective, subject to SEC approval, for audits of fiscal years beginning after December 15, 2010.

Joint FASB and IASB Accounting Pipeline

FASB and IASB Memorandum of Understanding

.212 The year 2010 has been a pivotal year of progress toward the goal of completing the important projects in the "Memorandum of Understanding" (MoU) during 2011. Since its original issuance in 2006, FASB and the IASB have continued to reaffirm their respective commitments to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. FASB and the IASB agreed that the goal of joint projects is to produce common, principles-based standards, subject to the required due process. FASB and the IASB have agreed to intensify their efforts to complete the major joint projects described in the MoU and are committed to developing, and making publicly available, quarterly progress reports on these major projects. The MoU identifies 11 convergence topics:

- Financial instruments
- Consolidations
- Derecognition
- Fair value measurement
- Revenue recognition
- Leases
- Financial instruments with characteristics of equity
- Financial statement presentation
- Balance sheet netting
- Statement of comprehensive income
- Discontinued operations

.213 A progress report for the quarter ended March 31, 2010, highlighted the following topics: (*a*) on the financial instruments and insurance contracts topics, the boards have reached different conclusions on significant technical issues that may affect the project timetables of these topics and (*b*) the boards agreed to explore an alternative approach to lessor accounting that may affect the project timetable of this topic. FASB and the IASB also have several other joint projects in process, including balance sheet—offsetting, emissions trading schemes, and reporting discontinued operations. In March 2010, the exposure draft *Conceptual Framework for Financial Reporting* was published for public comment. In early June 2010, the boards issued a joint statement that discusses the boards' recognition of the challenges that arise from seeking effective global stakeholder feedback. Specifically, the boards were scheduled to expose for comment numerous major exposure drafts during the second quarter of 2010, and stakeholders voiced concern about their ability under those circumstances to provide high-quality input. The boards have developed a modified strategy to accommodate these concerns by prioritizing the major projects in the MoU, staggering the publication of exposure drafts by limiting the number of significant exposure drafts to four per quarter, and issuing a separate consultation document seeking stakeholder input about effective dates and transition methods.

.214 The priority joint projects are financial instruments, revenue recognition, leases, the presentation of other comprehensive income, and fair value measurements. The boards also decided to issue separate exposure drafts to address differences in the two sets of standards on balance sheet netting of derivative contracts and other financial instruments. The IASB has also made its projects on improved disclosures about derecognized assets and other off balance sheet risks, consolidations, and insurance contracts priorities. June 2011 or earlier will remain the target completion date for these priority convergence projects; the target completion dates for the nonpriority projects, however, have been extended into the second half of 2011. Additionally, the comments received on exposure drafts will affect the timeline of finalized converged standards. The boards' joint statement states that this action is not expected to negatively affect the SEC's work plan to consider in 2011 whether and how to incorporate IFRSs into the U.S. financial system.

 Copyright © 2011, American Institute of Certified Public Accountants, Inc.

.215 Readers are encouraged to remain current for the remainder of the exposure draft releases and other developments on convergence through the AICPA's website, www.ifrs.com, in addition to the FASB, IASB, and SEC websites. The growing acceptance of IFRSs as a basis for U.S. financial reporting could represent a fundamental change for the U.S. accounting profession.

Insurance Contracts

.216 In July 2010, IASB issued an exposure draft, *Insurance Contracts*. This is the continuation of phase II of IASB's insurance contracts project, which will provide a basis for consistent accounting for insurance contracts on the longer term.

.217 In September 2010, FASB issued a discussion paper, *Preliminary Views on Insurance Contracts*, to solicit broad-based input on how to improve, simplify, and converge the financial reporting requirements for insurance contracts.

IASB Exposure Draft

Scope

.218 IASB's exposure draft applies to all insurance contracts that an entity issues and reinsurance contracts that it holds. The exposure draft also covers financial instruments that contain a discretionary participation feature.

Recognition

.219 IASB's exposure draft requires an entity to recognize an insurance contract asset or insurance contract liability when it becomes party to the insurance contract. An insurer becomes a party to an insurance contract on the earlier of the following two dates:

- When the insurer is bound by the terms of the insurance contract, and
- When the insurer is first exposed to risk under the contract, which is when the insurer can no longer withdraw from its obligation to provide insurance coverage to the policyholder for insured events and no longer has the right to reassess the risk of the particular policyholder and, as a result, cannot set a price that fully reflects that risk.

Measurement

.220 IASB's exposure draft proposes a comprehensive measurement approach for all types of insurance contracts issued by entities, and reinsurance contracts held by entities, with a modified approach for some short-duration contracts. The approach is based on the principle that insurance contracts create a bundle of rights and obligations that work together to generate a package of cash inflows (premiums) and outflows (benefits and claims).

.221 Under IASB's exposure draft, an insurer would apply to the package of cash flows a measurement approach that uses the following building blocks:

1. A current estimate of the future cash flows (explicit, unbiased, probability-weighted cash flows of the future cash outflows less the future cash inflows)
2. A discount rate that adjusts those cash flows for the time value of money
3. An explicit risk adjustment
4. A residual margin

.222 The risk adjustment represents the maximum amount that an insurer would rationally pay to be relieved of the risk that the ultimate fulfillment cash flows exceed those expected. It is remeasured at the end of each reporting period and declines over time as the insurer is released from risk. IASB's exposure draft includes application guidance that discusses the techniques for estimating the risk adjustment and limits the allowable techniques to three approaches.

.223 The residual margin is calibrated at inception to an amount that means the insurer recognizes no gain on entering into an insurance contract. If the initial measurement of an insurance contract results in a day one loss, then the insurer should recognize that day one loss. The residual margin is released over the coverage period in a systematic manner based on the passage of time, unless the pattern of claims and benefits makes another pattern more appropriate.

.224 Incremental acquisition costs (costs of selling, underwriting, and initiating a contract that would not have been incurred if the insurer had not issued that particular contract) on successful contract sales are to be included in the present value of the fulfillment cash flows. All other acquisition costs should be expensed when incurred.

.225 FASB's tentative conclusions on the measurement model differ from IASB's exposure draft in that instead of having a separate risk adjustment and residual margin, FASB's model would reflect risk and uncertainty implicitly through a single composite margin. The composite margin is measured at inception to eliminate any day one gains. The composite margin is not remeasured, but it is released over the coverage period and the benefit paying period.

Measurement—Short-Duration Contracts

.226 Under IASB's exposure draft, for most short-duration contracts (with coverage period of one year or less), a modified version of the measurement approach would apply for preclaim liabilities.

.227 An insurer would measure its preclaim obligation at initial recognition as

1. the premium, received at initial recognition, plus the expected present value of future premiums, less
2. the incremental acquisition costs.

.228 The insurer would subsequently reduce the preclaims obligation over the coverage period in a way that best reflects the exposure from providing coverage (on the basis of the passage of time but on the basis of expected timing of incurred claims and benefits, if that pattern differs significantly from the passage of time).

.229 The preclaim liability is the preclaim obligation less the expected present value of future premiums. Liabilities for claims incurred (after the preclaim period) are measured at the present value of fulfillment cash flows under the general measurement model.

Unbundling

.230 Some insurance contracts contain one or more components that would be within the scope of another standard if the insurer accounted for those components as separate contracts. IASB's exposure draft requires that if the component is not closely related to the insurance coverage specified in the contract, an insurer should account for that component as if it were a separate contract (referred to as unbundling).

Presentation

.231 IASB's exposure draft proposes that an insurer present each portfolio of insurance contracts as a single item within insurance contract assets or insurance contract liabilities. An insurer should also present the pool of assets underlying unit-linked contracts as a single line item, not commingled with the insurer's other assets.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.232 IASB's exposure draft proposes a new presentation for the statement of comprehensive income. An insurer should not present premiums, claims expenses, claims handling expenses, incremental acquisition costs, and other expenses included in the measurement of the insurance contract in the statement of comprehensive income. These items will instead be treated as deposit receipts and repayment of deposits. The insurer should include insurance contract line items in its statement of comprehensive income for the following amounts:

- Underwriting margin—disaggregated either in the statement of comprehensive income or in the notes into
  - the change in risk adjustment and
  - the release of residual margin.
- Gains and losses at initial recognition—disaggregated either in the statement of comprehensive income or in the notes into
  - losses on insurance contracts acquired in a portfolio transfer.
  - gains on reinsurance contracts bought by a cedant.
  - losses at initial recognition of an insurance contract.
- Acquisition costs that are not incremental at the level of an individual contract.
- Experience adjustments and changes in estimates—disaggregated either in the statement of comprehensive income or in the notes into
  - experience adjustments.
  - changes in estimates of cash flows and discount rates.
  - impairment losses on reinsurance assets.
- Interest on insurance contract liabilities.

.233 For short-duration contracts under the modified measurement model for preclaims liability, an insurer should include in its statement of comprehensive income line items that present the following amounts from insurance contracts for the period:

- The underwriting margin, disaggregated either in the statement of comprehensive income or in the notes into
  - premium revenue, determined as the gross release of the preclaims obligation (that is, grossed-up for the amortization of incremental acquisition costs).
  - claims incurred.
  - expenses incurred.
  - amortization of incremental acquisition costs included in the preclaims obligation.
- Changes in additional liabilities for onerous contracts.

Transition

.234 Under IASB's exposure draft, at the beginning of the earliest period presented, with a corresponding adjustment to retained earnings, an insurer should

- measure each portfolio of insurance contracts at the present value of the fulfillment cash flows. For insurance contracts to which these transitional provisions are applied, the measurement, both at transition and subsequently, does not include a residual margin.
- derecognize any existing balances of deferred acquisition costs.

- derecognize any intangible assets arising from insurance contracts assumed in previously recognized business combinations. That adjustment does not affect intangible assets, such as customer relationships and customer lists, which relate to possible future contracts.

.235 IASB's exposure draft does not include a proposed effective date. Instead, the effective date will be considered when the boards meet to discuss the effective dates for all of the major joint projects currently underway and expected to be completed in 2011.

FASB Discussion Paper

.236 The solicited feedback in the FASB discussion paper is focused on (*a*) whether the IASB's proposal would be a sufficient improvement to U.S. GAAP to justify the cost of change; (*b*) whether the project goals of improvement, convergence, and simplification would be more effectively achieved by making targeted improvements to existing U.S. GAAP (rather than issuing comprehensive new guidance); and (*c*) certain critical accounting issues for which the preliminary views of FASB differ from the IASB's exposure draft. It is important to remember that although the project on insurance contracts is a joint project, it is not part of the boards' MoU.

The discussion paper summarizes the key aspects of the IASB's exposure draft and compares the proposed changes with both the alternative preliminary views of FASB and the current guidance in FASB ASC 944. FASB decided to issue a discussion paper rather than an exposure draft because of the following reasons:

- The extent of FASB's and the IASB's current accounting guidance for insurance contracts varies significantly; U.S. GAAP comprehensively addresses accounting for insurance contracts by insurance entities, whereas IFRSs do not have comprehensive guidance. Further, the boards have not explicitly evaluated whether the model proposed in the IASB's exposure draft would represent an improvement to U.S. GAAP.
- FASB has not determined whether one model or two models would result in more useful information about insurance contracts. FASB would like additional input from stakeholders on whether different types of insurance contracts warrant different recognition, measurement, and presentation and, if so, what criteria should be used for determining which, if any, types of insurance contracts would use each model.
- FASB is considering whether employer-provided health insurance should be included within the scope of the insurance contracts project and how the recent U.S. health care reform may affect the application of the different approaches.

.237 The discussion paper also includes a listing of common elements of U.S. GAAP on insurance contracts that some stakeholders note could be improved. The appendix of the discussion paper compares the main areas of current U.S. GAAP for insurance contracts, the IASB's proposed approach, and FASB's preliminary views that differ from the proposed approach included in the IASB's exposure draft. Additionally, FASB and the IASB plan to host a series of public roundtable meetings in December 2010 to hear stakeholders' views. Readers should be on alert for developments on this topic.

Comment Deadlines

.238 Comments on the exposure draft are due by November 30, 2010. Comments on FASB's discussion paper are due December 15, 2010, but requested by November 30, 2010, for those who wish to be included as a participant in a FASB roundtable discussion.

Comprehensive Income Exposure Draft

.239 In May 2010, FASB issued a proposed ASU on comprehensive income that would require an entity to report total comprehensive income in a continuous financial statement in two parts: net income and other comprehensive income. In that financial statement, the components of net income and the components of

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

other comprehensive income should be displayed. The proposed ASU is intended to simplify how comprehensive income is reported by eliminating two options for how items of comprehensive income are displayed. The proposed ASU contains illustrative examples of the revised financial statement. This proposed ASU is the result of a joint project as part of IFRSs and U.S. GAAP convergence, and the IASB has separately issued a similar document. The proposed amendments would be applied on a fully retrospective basis to improve comparability between reporting periods. Further, because compliance with the proposed amendments is already permitted, early adoption would be permitted. FASB plans to align the effective date with the effective date of the amendments in the proposed ASU on financial instruments. The IASB and FASB aim to finalize an improved and converged standard on other comprehensive income in the fourth quarter of 2010.

Financial Instruments Exposure Draft

.240 Also, in May 2010, FASB issued a proposed ASU on accounting for financial instruments, derivative instruments, and hedging activities. The main objective of this proposal is to provide financial statement users with a more timely and representative depiction of an entity's involvement in financial instruments while reducing the complexity in accounting for those instruments. It develops a consistent framework for classifying financial instruments; removes the threshold for recognizing credit impairments, creating a single credit impairment model for both loans and debt securities; and makes changes to the requirements to qualify for hedge accounting. The main provisions of these amendments are as follows:

- Most financial instruments would be measured at fair value in the statement of financial position each reporting period.
- Changes in fair value of equity securities, certain hybrid instruments, and financial instruments that can be prepaid in such a way that the holder would not recover substantially all of its investment would be recognized in net income each reporting period regardless of an entity's business strategy for those financial instruments.
- Hybrid financial instruments containing embedded derivatives that would otherwise have been required to be bifurcated under FASB ASC 815-15 would be classified and measured at fair value in their entirety, with changes accounted for through net income.
- For financial instruments for which an entity's business strategy is to hold for collection or payment(s) of contractual cash flows, a reconciliation from amortized cost to fair value would be required on the statement of position; with the exception of certain liabilities that qualify for the amortized cost option, all other changes in fair value from these instruments would be recognized in other comprehensive income each reporting period. Therefore, net income will remain relatively unchanged because only changes arising from interest accruals, credit impairments, and realized gains and losses would be recognized in net income each reporting period.
- The existing probable threshold for recognizing impairments on loans would be removed. (Currently, FASB ASC 310-10-35-4 states that the concept in U.S. GAAP is that impairment of receivables [including loans] should be recognized when, based on all available information, it is probable that a loss has been incurred based on past events and conditions existing at the date of the financial statements. Probable is defined by FASB ASC 310-10-20 as when the future event or events are likely to occur.)
- For changes in the value of financial instruments measured through other comprehensive income, an entity is required to determine if a credit impairment is appropriate at the end of each reporting period based on information related to past events and existing economic conditions. An entity would recognize in net income the loss related to the amount of credit impairment for all contractual amounts the entity does not expect to collect.
- Core deposit liabilities would be remeasured each period using a current value method that reflects the economic benefit that an entity receives from this lower cost, stable funding source.
- Interest income would be recognized after considering cash flows that are not expected to be collected, which would better reflect a financial instrument's interest yield.

- Quantitative-based hedging requirements would be replaced with more qualitative-based assessments that would make it easier to qualify for hedge accounting. The shortcut method and critical terms match method would be eliminated. An entity would be able to designate particular risks as the risk being hedged in a hedging relationship, and only the effects of the risks hedged would be reflected in net income.
- Hedge accounting would be discontinued only if the criteria for hedge accounting are no longer met or the hedging instrument expires or is sold, terminated, or exercised. An entity would not be permitted to discontinue hedge accounting by simply removing the designation of a hedging relationship.

.241 Some specific types of financial instruments, such as pension obligations and leases, would be exempt from the proposed guidance. Additionally, short term receivables and payables would continue to be measured at amortized cost (plus or minus any fair value hedging adjustments). This proposed ASU was not issued jointly with the IASB and does not contain converged guidance; however, the goal still remains for both boards to issue comprehensive improvements to foster international comparability of financial information about financial instruments. The IASB completed its first phase of classification and measurement with the issuance of IFRS 9, *Financial Instruments*, in November 2009. The IASB also issued two exposure drafts on amortized cost and impairment and fair value option for financial liabilities in late 2009 and mid-2010, respectively; the third topic, hedge accounting, is still being deliberated by the IASB, and an exposure draft is expected in the near term. The boards have stated that they will consider together the comment letters and other feedback received on each boards' exposure drafts in an effort to reconcile their differences in ways that foster improvement and convergence.

.242 The effective date of these amendments will be established upon issuance of the final ASU, which is expected in the second quarter of 2011; it is estimated to have an effective date in 2013. However, nonpublic entities with less than $1 billion in total consolidated assets would be granted an additional 4 years to implement certain requirements related to loans and core deposits. Upon its application, an entity would apply the proposed guidance by means of a cumulative-effect adjustment to the statement of financial position for the reporting period that immediately precedes the effective date.

.243 FASB has issued frequently asked questions for the proposed ASU to clarify the proposal by answering common questions received about the proposed guidance. This document can be accessed at www.fasb.org/cs/ContentServer?c=Document_C&pagename= FASB%2FDocument_C%2FDocumentPage&cid=1176157295447.

Revenue Recognition Exposure Draft

.244 The revenue recognition project is intended to develop a single, common revenue recognition model that can be applied to a wide range of industries and transaction types. The standards resulting from this project will eliminate weaknesses and inconsistencies between the existing standards. A joint discussion paper issued by the boards proposed a single revenue recognition model. A joint exposure draft, *Revenue from Contracts with Customers*, from the boards was published in June 2010, and the boards aim to issue a final converged standard by the second quarter of 2011. The proposed standard would replace International Accounting Standard (IAS) 18, *Revenue*; IAS 11, *Construction Contracts*; and related interpretations in IFRSs; under U.S. GAAP, it would supersede most of the guidance contained in FASB ASC 605, *Revenue Recognition*. The core principle of the draft standard is that an entity should recognize revenue from contracts when it transfers goods or services to the customer in the amount of consideration the entity receives, or expects to receive, from the customer.

.245 In addition to eliminating weaknesses and inconsistencies between IFRSs and U.S. GAAP, this proposal intends to provide a more robust framework for addressing various revenue recognition issues; improve comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets; and simplify the preparation of financial statements by reducing the number of requirements to which entities must refer. The proposed standard will also amend the existing guidance on recognition of a gain or loss on the sale of some nonfinancial assets that are not an output of the entity's ordinary activities

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

(for example, property, plant, and equipment) to be consistent with the proposed revenue recognition and measurement requirements. To implement the preceding core principle of revenue recognition, an entity would

- identify the contract(s) with the customer.
- identify the separate performance obligations in the contract (*performance obligation* is an enforceable promise [whether explicit or implicit] in a contract with a customer to transfer a good or service to the customer).
- determine the transaction price (*transaction price* is the amount of consideration that an entity receives, or expects to receive, from a customer in exchange for transferring goods or services promised in the contract).
- allocate the transaction price to the separate performance obligations.
- recognize revenue when the entity satisfies each performance obligation by transferring a promised good or service to a customer (a good or service is transferred when the customer obtains control of that good or service).

.246 The proposal also includes guidance on accounting for some costs. An entity would recognize the costs of obtaining a contract as expenses when incurred. For expenses incurred in fulfilling a contract, if they are ineligible for capitalization in accordance with other guidance, an entity would only be able to recognize an asset if those costs relate directly to a contract (or a specific contract under negotiation); generate or enhance resources of the entity that will be used in satisfying performance obligations in the future; and are expected to be recovered. The proposed guidance would differ from current practice in the following ways: (*a*) recognition of revenue only from the transfer of goods or services, (*b*) identification of separate performance obligations, (*c*) licensing and rights to use, (*d*) effect of credit risk, (*e*) use of estimates, (*f*) accounting for costs, and (*g*) disclosure.

.247 As discussed previously, because the revenue recognition project is one of many standards the boards expect to issue as converged and final in 2011, the boards plan to invite additional comment through a separate consultation on how best to transition over to the new standards. Therefore, no expected specific effective date is stated at this point. Comments on the exposure draft are due on October 22, 2010. This topic is considered by many to be the most pervasive of any FASB has ever worked on. The reader is encouraged to review the exposure draft, consider if it is operational to you or your clients' common revenue transactions, and share any resulting concerns with FASB. The boards also anticipate holding public roundtable meetings after the end of the comment period.

Fair Value Exposure Draft

.248 The fourth and final exposure draft of the second quarter of 2010 was *Fair Value Measurements and Disclosures (Topic 820): Amendments for Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The amendments in the exposure draft are intended to result in common fair value measurement and disclosure requirements in financial statements prepared in accordance with U.S. GAAP and IFRSs. Many of the requirements are not intended to result in a change in the application of the requirements in FASB ASC 820; however, some are intended to clarify or change the application of existing fair value guidance. Additionally, some wording changes were made to ensure the guidance is described consistently between U.S. GAAP and IFRSs. The most significant proposed amendments include the following:

- Highest and best use and valuation premise
- Measuring the fair value of an instrument classified in shareholders' equity
- Measuring the fair value of financial instruments that are managed within a portfolio
- Application of blockage factors and other premiums and discounts in a fair value measurement
- Additional disclosures about fair value measurements

.249 The first two of these significant amendments are intended to clarify the application of existing fair value measurement guidance. The past three of these significant amendments would change a particular principle of fair value guidance.

.250 The amendments would specify that the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets, not when measuring the fair value of financial assets or liabilities. The FASB ASC glossary defines highest and best use as, in broad terms, the use of an asset by market participants that would maximize the value of the asset or the group of assets within which the asset would be used. The rationale for this proposed change is that the highest and best use concept is irrelevant when measuring the fair value of financial assets or liabilities because these items do not have alternative uses and their fair values do not depend on their use within a group of other assets or liabilities. These changes are not expected to affect the fair value measurement of nonfinancial assets. However, they might affect current practice for reporting entities that apply the in-use valuation premise more broadly.

.251 The amendments related to measuring the fair value of an instrument classified in shareholders' equity would specify that a reporting entity should measure the fair value of its own equity instrument from the perspective of a market participant who holds the instrument as an asset. An example of an instrument that would be measured at fair value and classified in shareholders' equity is equity interests issued as consideration in a business combination. Currently, U.S. GAAP does not contain explicit guidance on this topic, and the proposed amendments are expected to increase the comparability among reporting entities applying U.S. GAAP and IFRSs.

.252 Regarding measuring the fair value of financial instruments that are managed within a portfolio, the proposed amendments would allow an exception to FASB ASC 820 for measuring fair value when a reporting entity manages its net exposure, rather than its gross exposure, to the underlying risks. A reporting entity that holds a group of financial assets and financial liabilities is exposed to interest rate risk, currency risk, or other price risk (market risks) and to the credit risk of each of the counterparties. The proposed guidance is intended to coincide with financial institutions and other similar reporting entities that hold and manage these instruments in that manner. Specifically, a reporting entity could measure the fair value of the financial assets and financial liabilities that are managed in that way on the basis of the price that would be received to sell a net long position (that is, an asset) for a particular risk or to transfer a net short position (that is, a liability) for a particular risk in an orderly transaction between market participants at the measurement date. The proposed amendments would result in U.S. GAAP and IFRSs having the same requirements for measuring the fair value of financial instruments; additionally, these changes would not change how financial assets and financial liabilities that are managed on the basis of a reporting entity's net risk exposure are measured in practice. However, they might affect the current practice for reporting entities that apply the in-use valuation premise more broadly.

.253 The proposed amendments regarding the application of blockage factors and other premiums and discounts in fair value measurements would make two changes to current guidance. Currently, under U.S. GAAP, use of a blockage factor in fair value measurements is only prohibited when fair value is measured using a quoted price for an asset or a liability (or similar assets or liabilities). This would be level 1 within the fair value hierarchy. The first change from the proposed amendments is that a blockage factor is not relevant and, therefore, also should not be used when fair value is measured using a valuation technique that does not use a quoted price. This would be level 2 or level 3 within the fair value hierarchy. Second, the amendments specify that fair value measurements categorized within level 2 and level 3 take into account other premiums and discounts when market participants would consider those premiums or discounts when pricing an asset or a liability, consistent with the unit of account for that asset or liability. Examples include a control premium or a noncontrolling interest discount. These proposed amendments may affect current practice for any reporting entities applying a blockage factor in fair value measurements that is measured using quoted prices and categorized within level 2 of the fair value hierarchy.

.254 Lastly, the amendments propose additional disclosures about fair value measurements. More information about the following would be required for disclosure:

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- The effect on a fair value measurement of changing one or more unobservable inputs that could have reasonably been used to measure fair value in the circumstances
- Use of an asset in a way that differs from the asset's highest and best use when that asset is recognized at fair value in the statement of financial position on the basis of its highest and best use
- The categorization by level within the fair value hierarchy for items that are not measured at fair value in the statement of financial position but for which the fair value of such items is required to be disclosed

.255 The effective dates of these proposed amendments would be determined after the feedback from the exposure draft is considered. However, when it is effective, it will be effective as of the beginning of the period of adoption, and an entity would recognize a cumulative effect adjustment in beginning retained earnings in the period of adoption if a difference exists in a fair value measurement of an item recorded at fair value as a result of applying these amendments. Additional disclosures would be required on a prospective basis. These amendments are expected to achieve the objective of developing common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs. A final ASU is expected to be issued in the first quarter of 2011.

Financial Statement Presentation Staff Draft

.256 FASB and the IASB are working together to establish a common standard that would improve how information is organized and presented in financial statements. This common standard is intended to address users' concerns that existing requirements permit too many alternative types of presentation and that information in financial statements is highly aggregated and inconsistently presented, making it difficult to fully understand the relationship between an entity's financial statements and its financial results. In 2008, a discussion paper was issued by the boards that outlined the proposed principles for presenting financial statements in a way that portrays a cohesive financial picture of an entity.

.257 Given the magnitude of this project, the expected implementation costs, and the substantial effects it will have on financial statement presentation for many years to come, the boards decided in May 2010 to modify the strategy for this project. Before finalizing an exposure draft, the boards decided to engage in additional outreach activities that focus on the perceived benefits and costs of the proposals and the implications of the proposals for financial reporting by financial service entities. The boards plan on discussing these two areas of focus with preparers and users of financial statements. This outreach will be based on a rough draft of a proposed standard, known as a *staff draft*, and reflects the cumulative tentative decisions made by the boards, concluding with their joint meeting in April 2010. This staff draft was made publicly available solely for this purpose.

.258 The proposals in this project would be applicable to all entities, except a benefit plan within the scope of FASB ASC 960, *Plan Accounting—Defined Benefit Pension Plans*; 962, *Plan Accounting—Defined Contribution Pension Plans*; and 965, *Plan Accounting—Health and Welfare Benefit Plans* or IAS 26, *Accounting and Reporting by Retirement Benefit Plans*. The two core financial statement principles in this proposal are cohesiveness and disaggregation. A common structure for the statements of financial position, comprehensive income, and cash flows would be established in the form of required sections, categories or subcategory, and related subtotals. Some proposed specific changes in the classification and format of financial statements include the following:

- Related information would be displayed in the same sections, categories, and subcategory in each statement so that information is more easily associated.
- Presentation of business and financing activities would be separated as follows:
  - The business section would include items that are part of an entity's daily operations and other income generating activities.
  - The financing section would include items that are part of an entity's activities to obtain (or repay) capital.
- Discontinued operations and income taxes would be presented in their own separate sections.

- The statement of changes in equity would not include the sections and categories used in the other statements because that statement presents information solely about changes in items classified in the equity category in the statement of financial position.

.259 Further, FASB plans to propose some changes that are already required by IAS 1, *Presentation of Financial Statements*. The proposal would define and provide the requirements for a complete set of financial statements. Currently, a complete set of financial statements for the period is defined only in the FASB Concepts Statements. An entity would also be required to present one period of comparative information. A *complete set of financial statements* would consist of, at a minimum, statements of financial position, comprehensive income, cash flows and changes in equity, and notes to financial statements for two periods (the current period and the previous period). Also, an opening statement of financial position would be part of a complete set of financial statements if an entity applies an accounting principle retrospectively, restates its financial statements, or reclassifies items in the financial statements.

.260 The boards' tentative decisions on financial statement presentations differ in a few ways in relation to minimum line requirements for the statement of financial position, segment reporting, and net debt presentation. Of these three, the differing stance on segment reporting is the only significant difference. The boards now aim to issue an exposure draft in the first quarter of 2011 and a final improved and converged standard in the fourth quarter of 2011. Both the introduction to the staff draft and the staff draft can be accessed from FASB's website at www.fasb.org.

Leases Exposure Draft

.261 During the third quarter of 2010, the IASB and FASB published for public comment joint proposals to improve the financial reporting of lease contracts. These proposals would result in a consistent approach to lease accounting for both lessees and lessors—a "right of use" approach. This would result in the liability for payments arising under the lease contract and the right to use the underlying asset being included in the lessee's statement of financial position, therefore providing more complete and useful information to investors and other users of financial statements. Currently, the accounting for a lease depends on its classification; an operating lease results in the lessee not recording any assets or liabilities in the statement of financial position under either IFRSs or U.S. GAAP, whereas a capital lease results in the lessee recognizing an asset and an obligation. Under the proposed guidance, lessees would only have one method of accounting for leases, which would produce more complete and comparable financial reporting in addition to reducing the opportunity to structure transactions to achieve a desired accounting outcome.

.262 The scope of the new lease guidance includes all leases (including leases of right-of-use assets in a sublease) other than leases of biological and intangible assets, leases to explore for or use natural resources, and leases of some investment properties. Under this new guidance, all lessees would use a single method of accounting for all leases: an asset would be recognized representing the lessee's right to use the leased (underlying) asset for the lease term (the right-of-use asset), and a liability at the present value of the expected lease payments would also be recognized.

.263 A lessor would recognize an asset representing its right to receive lease payments and, depending on its exposure to risks or benefits associated with the underlying asset, would either (*a*) recognize a lease liability while continuing to recognize the underlying asset (a performance obligation approach); or (*b*) derecognize the rights in the underlying asset that it transfers to the lessee and continue to recognize a residual asset representing its rights to the underlying asset at the end of the lease term (a derecognition approach). The assets and liabilities recognized by both lessors and lessees would be measured on the basis that

- assumes the longest possible lease term that is more likely than not to occur, taking into account the effect of any options to extend or terminate the lease.
- uses an expected outcome technique to reflect the lease payments, including contingent rentals and expected payments under term option penalties and residual value guarantees, specified by the lease.
- a remeasurement is triggered when changes in facts or circumstances indicate that there would be a significant change in those assets or liabilities since the previous reporting period.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.264 For leases of 12 months or less, lessors and lessees would be able to apply simplified requirements. The simplified accounting would allow lessees to ignore the effects of interest on the recorded assets and liabilities and allow the lessee to record the liability for lease payments at the undiscounted amount for lease payments. New disclosures would also be required.

.265 In early 2009, the boards issued a discussion paper on leases; this exposure draft is the result of extensive deliberations that included consideration of input received from investors, preparers, auditors, regulators, and other interested parties since that discussion paper. The comment period is open until December 15, 2010. During the comment period, the boards will undertake further outreach activities, including public round-table meetings to ensure that the views of all interested parties are taken into consideration before the new standard is completed. Also, the boards will share and jointly consider all comment letters received. A final standard is expected in the second quarter of 2011. The AICPA has developed questions and answers to highlight the important aspects of the proposals, which can be located at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AcctgFinRptg/AcctgFinRptgGuidance/DownloadableDocuments/EDITED_LEASES_FAQ.pdf.

Auditing Considerations of Accounting Convergence

.266 Although the future of convergence between IASB and FASB accounting standards remains an unknown, discussions have already begun about the potential impact on auditors. Although auditors are accustomed to new standards, the nature and volume of these changes will likely pose new challenges. Among others, some of these potential challenges include the following:

- Training audit staff on a large amount of new accounting guidance that is based on an accounting approach (that is, principles based versus rules based)
- Developing, as necessary, any new internal audit guidance, such as firm methodology
- Implementing any new resulting auditing rules
- Creating a new framework for documenting audit conclusions on a principles-based accounting approach
- Audit committees learning new accounting guidance to effectively perform their function

.267 In addition to the challenges auditors will face, the effects on preparers will also be great. At the time of this writing, it appears that the transition timeline to convergence will be relatively short; this will divert resources during the preparation of financial statements as entities focus on implementing the new principles, which may result in increased audit risk. Auditors, in addition to preparers, are also encouraged to remain current on developments of international accounting convergence.

FASB Accounting Pipeline

Disclosure of Certain Loss Contingencies

.268 In July 2010, FASB issued an exposure draft on the disclosure of certain loss contingencies in response to concerns from investors and other financial statement users that the current disclosures do not provide adequate and timely information to assess the likelihood, timing, and magnitude of future cash outflows associated with loss contingencies. The objective of these disclosures would be for an entity to disclose qualitative and quantitative information about loss contingencies to enable financial statement users to understand all of the following: the nature of the loss contingencies, their potential magnitude, and their potential timing (if known). Disclosure of certain remote loss contingencies would be required and, therefore, would expand the population of loss contingencies that are required to be disclosed. An entity would not consider the possibility of recoveries from insurance or other indemnification arrangements when assessing the materiality of loss contingencies to determine whether disclosure is required. Further, current qualitative disclosures would be enhanced by requiring additional disclosures. These additional required qualitative and quantitative disclosures include the following:

- For litigation contingencies, the contentions of the parties and how users can obtain more information about the litigation
- Publicly available quantitative information, such as the claim amount for asserted litigation contingencies; other relevant nonprivileged information; and, in some cases, information about possible recoveries from insurance and other sources
- For public entities, tabular reconciliations, by class, of recognized (accrued) loss contingencies that present the activity in the account during the period

.269 The amendments in this proposal would affect all entities. The exposure draft noted that FASB will continue to work with the PCAOB, the AICPA, and the American Bar Association (ABA) to identify and address any potential implications of the proposed amendments for auditing literature and the ABA's Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information. The proposed amendments would be effective for fiscal years ending after December 15, 2010, for public entities and in the first annual period beginning after December 15, 2010, for nonpublic entities. The comment period ended in September 2010.

Going Concern FASB Project

.270 Currently, the only guidance on going concern resides in the auditing literature, and this project's intention is to incorporate going concern guidance into U.S. GAAP. Specifically, this guidance would discuss the following:

- Preparation of financial statements as a going concern
- An entity's responsibility to evaluate its ability to continue as a going concern
- Disclosure requirements when financial statements are not prepared on a going concern basis
- Disclosure requirements when there is a substantial doubt about an entity's ability to continue as a going concern
- The adoption and application of the liquidation basis of accounting

.271 A revised exposure draft is expected to be issued in the fourth quarter of 2010, with a final ASU expected in the first quarter of 2011. FASB has decided that management should take into account available information about the foreseeable future, which is generally, but not limited to, 12 months from the end of the reporting period. Readers should be alert to developments on this topic.

Other Accounting Projects

.272 Additionally, FASB has the following projects underway:

- Troubled debt restructuring
- Disclosure framework
- Investment properties

Resource Central

.273 The following are various resources that practitioners engaged in the insurance industry may find beneficial.

AICPA Online Professional Library: Accounting and Auditing Literature

.275 The AICPA has created your core accounting and auditing library online. The AICPA Online Professional Library is now customizable to suit your preferences or your firm's needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to FASB ASC, the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides, Audit Risk Alerts, *Accounting Trends & Techniques*, and more. One option is the *AICPA Audit and Accounting Guides with FASB Accounting Standards Codification*™, which contains all audit and accounting guides, all audit risk alerts, and FASB ASC on in the Online Professional Library (product no. WFA-XX [online]).To subscribe to this essential online service for accounting professionals, visit www.cpa2biz.com.

Continuing Professional Education

.276 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop (2010–2011 Edition)* (product no. 730096 [text] or 180096 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.

- *Internal Control Essentials for Financial Managers, Accountants and Auditors* (product no. 731856 [text], 181856 [DVD/Manual], or 351856 [Additional Manual for DVD]). This course will provide you with a solid understanding of systems and control documentation at the significant process level.
- *International Versus U.S. Accounting: What in the World is the Difference?* (product no. 731668 [text] or 181661 [DVD]). Understanding the differences between IFRSs and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRSs and U.S. GAAP.
- *IFRS Essentials with GAAP Comparison: Building a Strong Foundation* (product no. 741602 [text], 181601 [DVD/Manual], or 351601 [Additional Manual for DVD]). This course provides you with a greater understanding of what you need to know as the acceptance of international standards continues to grow.

.277 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.278 AICPA CPExpress, offered exclusively through CPA2Biz, is the AICPA's flagship online learning product. AICPA members pay $180 for a new subscription and $145 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics.

.279 To register or learn more, visit www.cpa2biz.com.

Webcasts

.280 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM. For additional details on available webcasts, please visit www.cpa2biz.com/AST/AICPA_CPA2BIZ_Browse/Store/Webcasts.jsp.

Member Service Center

.281 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.282 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. The hotline is available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 or online at www.aicpa.org/Research/TechnicalHotline/Pages/TechnicalHotline.aspx. Members can also e-mail questions to aahotline@aicpa.org. Additionally, members can submit questions by completing a Technical Inquiry form found on the same website.

Ethics Hotline

.283 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

The Center for Audit Quality

.284 The Center for Audit Quality (CAQ), which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.285 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that provides education, communication, representation, and other means to member firms that audit or are interested in auditing public companies. To learn more about the CAQ, visit www.aicpa.org/InterestAreas/CenterForAuditQuality/Pages/CAQHome.aspx.

AICPA Industry Expert Panel—Insurance

.286 For information about the activities of the AICPA Insurance Industry Expert Panel, visit the panel's Web page at www.aicpa.org/INTERESTAREAS/ACCOUNTINGANDAUDITING/COMMUNITY/INSURANCE/Pages/Insurance.aspx.

Industry Websites

.287 The Internet covers a vast amount of information that may be valuable to auditors of insurance entities, including current industry trends and developments. Some of the more relevant sites for auditors with insurance clients include those shown in the following table:

Organization	*Website*
Alabama Insurance Underwriting Association (AIUA)	www.alabamabeachpool.org
Citizens Property Insurance Corporation of Florida (Florida Citizens)	www.citizensfla.com
Florida Hurricane Catastrophe Fund (FHCF)	www.sbafla.com/fhcf
Insurance Information Institute (III)	www.iii.org
Louisiana Citizens Property Insurance Corporation	www.lacitizens.com
Mississippi Residential Property Insurance Underwriting Association (MRPIUA)	www.msplans.com/MRPIUA
Mississippi Windstorm Underwriting Association (MWUA)	www.msplans.com/mwua
National Association of Insurance Commissioners (NAIC)	www.naic.org
Texas Windstorm Insurance Association (TWIA)	www.twia.org

.288 The insurance practices of some of the larger CPA firms also may contain industry-specific auditing and accounting information that is helpful to auditors.

Financial Institutions Industry Developments: Including Depository and Lending Institutions and Brokers and Dealers in Securities—2010/11

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert replaces *Financial Institutions Industry Developments: Including Depository and Lending and Brokers and Dealers in Securities—2009*.

This Audit Risk Alert is intended to provide auditors of financial statements of financial institutions, including depository and lending institutions and brokers and dealers in securities, with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform. This Audit Risk Alert also can be used by an entity's internal management to address areas of audit concern.

This publication is an *other auditing publication*, as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Recognition

Feedback

The Audit Risk Alert *Financial Institutions Industry Developments: Including Depository and Lending and Brokers and Dealers in Securities* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert also would be appreciated. You may e-mail these comments to A&APublications@aicpa.org.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform audits for your financial institutions, including depository and lending institutions and brokers and dealers (broker-dealers) in securities, and also can be used by an entity's internal management. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool to help you identify the significant risks that may result in the material misstatement of financial statements and delivers information about emerging practice issues and current accounting, auditing, and regulatory developments. You should refer to the full text of accounting and auditing pronouncements, as well as the full text of any rules or publications that are discussed in this alert. Additionally, the Audit Risk Alert *General Accounting and Auditing Developments—2010/2011* (product no. 0223310) explains important issues that affect all entities in all industries in the current economic climate.

.02 It is essential that the auditor understand the meaning of audit risk and the interaction of audit risk with the objective of obtaining sufficient appropriate audit evidence. In AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1), *audit risk* is broadly defined as the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. Further, paragraph .04 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), explains that the auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures.

Economic Developments

The Current Economy

.03 When planning and performing audit engagements, an auditor should understand both the general economic conditions and the specific economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, real estate values, and labor market conditions are likely to have an effect on an entity's business and, therefore, its financial statements.

.04 Although many key indicators, such as unemployment, are still high, 2010 began with rising commodity prices, a jump in new factory orders that caused the largest expansion in production in 3 years, and an increase in U.S. auto sales that approached prerecessionary levels. Further, after experiencing a considerable decline in the stock market through March 2009, the markets rebounded. In March 2009, the S&P 500 and the Dow Jones Industrial Average (DJIA) reached their 12-year lows, and NASDAQ closed at its lowest point since October 2002. By March 2010, only 1 year later, all 3 had increased in value by at least 59 percent

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

from the previous year's lows. However, all 3 remained relatively unmoved 5 months later, in late September 2010. This exhibits the continuing uncertainty in the markets due to the varying economic indicators, the financial reform regulatory changes, political uncertainty in the United States with midterm elections, and foreign economies, among other reasons. The fear of a double-dip recession (a recession followed by a short-lived recovery followed by another recession) continues to loom over the U.S. economy. The research firm StrategyOne reported in early September that 65 percent of Americans believe that a double-dip recession is likely to occur.

Key General Economic Indicators

.05 These key economic indicators further illustrate the severity of the recent recessionary period experienced by the United States.

.06 The gross domestic product (GDP) measures output of goods and services by labor and property within the United States. It increases as the economy grows or decreases as it slows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 1.7 percent in the second quarter of 2010 (third estimate), 3.7 percent in the first quarter of 2010, and 5.6 percent in the fourth quarter of 2009. This data indicates a turnaround in the economy because in the fourth quarter of 2008 and the first quarter of 2009, real GDP decreased 6.3 percent and 5.5 percent, respectively. In early October 2010, when the Troubled Asset Relief Program (TARP) had expired, the Treasury reported that more than $200 billion in TARP funds had been recovered and that taxpayers made $28 billion in profit to date. Ninety percent of the total $700 billion TARP funds will not have been spent or will be returned to taxpayers. However, a portion of the TARP funds, including dividend repayments, and other federal assistance programs have not yet been repaid. The direct budget cost of the total program is estimated to cost well under $50 billion.

.07 From September 2009 to September 2010, the unemployment rate fluctuated between 9.5 percent and 10.1 percent. The annual average rate of unemployment increased from 4.6 percent in 2007 to 9.3 percent in 2009. (An unemployment rate of 10.0 percent represents approximately 15.3 million people.) One reason for the continued high unemployment rate is that more Americans are resuming their search for work.

.08 The Federal Reserve decreased the target for the federal funds rate more than 5.0 percentage points, prior to the financial crisis, to less than 0.25 percent, where it remained through October 2010. The Federal Reserve described the current economic recovery in its September 21, 2010, press release as follows:

- Household spending is increasing gradually but remains constrained by high unemployment, modest income growth, lower housing wealth, and tight credit.
- Business spending on equipment and software is rising, though less rapidly than earlier in the year, and investment in nonresidential structures continues to be weak.
- Employers remain reluctant to add to payrolls.
- Housing starts are at a depressed level.
- Bank lending has continued to contract but at a reduced rate in recent months.
- The pace of economic recovery is likely to be modest in the near term.

.09 The Federal Reserve also noted in the press release that "economic conditions, including low rates of resource utilization, subdued inflation trends, and stable inflation expectations, are likely to warrant exceptionally low levels of the federal funds rate for an extended period." The Federal Reserve will keep constant its holdings of securities by reinvesting principal payments from mortgage-backed securities in longer-term Treasury securities; additionally, as current holdings of Treasury securities mature, the proceeds will be reinvested in Treasury securities. Since the beginning of the financial market turmoil in August 2007, the Federal Reserve's balance sheet has grown from $869 billion to $2.3 trillion.

.10 In addition, the Federal Reserve's *Summary of Commentary on Current Economic Conditions* (commonly known as the Beige Book), from September 2010, provides additional information on bank lending activity.

The Beige Book stated that lending activity was stable to down slightly from the previous month, with little or no change from existing low levels of commercial and industrial lending, as businesses remained cautious about expansion plans. Commercial real estate lending remained subdued, and loan standards were still tight.

.11 See the "Banks and Savings Institutions," "Credit Unions," "Broker-Dealers in Securities," and "Commodities" sections in this alert for additional industry-specific economic information.

Legislative Developments

The Dodd-Frank Wall Street Reform and Consumer Protection Act

.12 On July 21, 2010, the president signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) into law in response to weaknesses in the financial services industry that were believed to have contributed to the recent economic recession. The Dodd-Frank Act was approved by the House of Representatives on June 30, before narrowly clearing the Senate on July 15. As the economy is slowly recovering from the worst economic downturn since the Great Depression, this reform represents the greatest change to financial regulation since that time. The two main goals of the reform are to lower the systemic risks of the financial system and enhance consumer protections.

.13 The Dodd-Frank Act, among many other changes, will create new regulations for companies that extend credit to customers, exempt small public companies from Section 404(b) of the Sarbanes-Oxley Act of 2002 (SOX), make auditors of broker-dealers subject to Public Company Accounting Oversight Board (PCAOB) oversight, and change the registration requirements for investment advisers. It mandates over 60 different studies and reports by various oversight agencies on a range of issues. Because these new regulations will most likely be produced over the next few years, the impact of these reforms will be staggered. This may provide opportunities for the financial institutions industry to respond to the proposed regulations and work with regulators in developing reporting requirements, formats, and timetables that are practical to implement. It will also enable both regulators and the industry to meet their individual goals, which is important to the efforts to avoid market disruptions and inadvertently increase systemic risk. Large, complex financial institutions, in particular, and newly regulated entities with new reporting requirements will be challenged to update their systems, policies, procedures, and data infrastructures. Although the Dodd-Frank Act contains many provisions, some highlights that may be of particular interest to auditors are summarized in the following sections.

Financial Stability Oversight Council

.14 The Dodd-Frank Act creates a new systemic risk regulator called the Financial Stability Oversight Council (FSOC) to be led by the Treasury secretary. The two main goals of the FSOC are to identify risks to the financial stability of the United States and to promote market discipline by eliminating the moral hazard of "too big to fail." To meet these goals, the FSOC has many powers and will identify any company, product, or activity that could threaten U.S. financial stability. The FSOC has the power to designate nonbank financial entities as systemically important and, through the Office of Financial Research, may collect reports from any bank holding entity or nonbank financial entity for the purpose of determining whether it poses a threat to U.S. financial stability. These entities will be under the supervision of the Federal Reserve. The FSOC will be chaired by the Treasury secretary, and members will be heads of banking regulatory agencies, including the chairmen of the Federal Reserve, the Federal Deposit Insurance Corporation (FDIC), and the Securities and Exchange Commission (SEC), among others. For those large entities deemed a threat to U.S. financial stability, the FSOC can, under the new orderly liquidation authority, authorize the FDIC to close such entities. The FSOC, through the Federal Reserve, will have the power to preemptively require a large, complex entity to divest some of its holdings if it poses a grave threat to the stability of the United States, although this is intended only as a last resort.

.15 The FSOC will make recommendations to the Federal Reserve with respect to capital adequacy, leverage, liquidity, risk management, and other requirements as entities grow in size and complexity, with significant requirements for entities that pose a risk to the financial system. Further, the FSOC is required to

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

conduct a study on the feasibility, benefits, costs, and structure of a contingent capital requirement. Contingent capital would effectively be subordinated to other forms of debt and would convert to common equity in times of financial stress.

.16 The FSOC also has monitoring and reporting responsibilities. It will review and, as appropriate, submit comments to the SEC and any other standard-setting body (for example, the Financial Accounting Standards Board [FASB]) with respect to an existing or proposed accounting rule. Further, the FSOC must annually report to Congress significant financial market and regulatory developments, including accounting and insurance regulations, along with assessing their possible impact on the financial system's stability. The FSOC also has the ability to veto rules created by another new regulator, the Bureau of Consumer Financial Protection (BCFP), with a two-thirds vote. Lastly, it will make recommendations on implementation of the Volcker Rule (which is subsequently described in the "Derivatives Trading" section of this alert) to aid regulators. The first meeting of the FSOC was in October 2010.

Leverage and Risk-Based Capital Requirements

.17 Title I, "Financial Stability," of the Dodd-Frank Act requires the appropriate federal banking agencies to establish minimum leverage and risk-based capital requirements, on a consolidated basis, for insured depository institutions (IDIs), depository institution holding companies, and nonbank financial companies supervised by the Federal Reserve. The minimum leverage and risk-based capital requirements for IDIs established by the agencies under this section of the Dodd-Frank Act shall not be less than the generally applicable requirements, which shall serve as a floor for any capital requirements that the agencies may require, nor be quantitatively lower than the generally applicable requirements that were in effect for IDIs as of the date of enactment. Title 1 of the Dodd-Frank Act addresses deductions from regulatory capital and includes the following provisions:

- Trust-preferred securities issued by bank and thrift holding companies after May 19, 2010, will no longer count as tier 1 capital. Trust-preferred securities may otherwise qualify to be treated as tier 2 capital.
- Trust-preferred securities issued before May 19, 2010, by bank and thrift holding companies with $15 billion or more in assets will continue to be treated as tier 1 capital until January 2013. Then, the tier 1 capital treatment will be phased out over a 3-year period.
- Bank and thrift holding companies with assets of less than $15 billion as of December 31, 2009, will be permitted to include trust-preferred securities that were issued before May 19, 2010, as tier 1 capital.
- These provisions of the Dodd-Frank Act do not apply to small bank holding companies (holding companies with less than $500 million in assets).

.18 Title VI, "Improvements to Regulation," of the Dodd-Frank Act mandates stronger capital requirements for all IDIs, depository institution holding companies, and any company that controls an IDI and provides that any company in control be accountable for the financial strength of that entity. In establishing the capital requirements, the federal banking agencies seek to make the requirements countercyclical so that the amount of capital required to be maintained increases in times of economic expansion and decreases in times of economic contraction, consistent with safety and soundness.

Bureau of Consumer Financial Protection and Mortgage Reform

.19 The BCFP is the new independent agency (although it will be housed at the Federal Reserve) that consolidates most federal regulation of financial services offered to consumers. The BCFP is expected to ensure that consumers receive clear, accurate information to shop for mortgages, credit cards, and other financial products (but not products subject to securities or insurance regulations); to provide consumers with one dedicated advocate; and to protect them from hidden fees and deceptive practices. The BCFP will also oversee the enforcement of federal laws intended to ensure the fair, equitable, and nondiscriminatory access to credit for individuals. The director of the BCFP replaces the director of the Office of Thrift Supervision (OTS) on the

FDIC board (the OTS was abolished by the Dodd-Frank Act). The BCFP will be led by an independent director appointed by the president and confirmed by the Senate, with a dedicated budget in the Federal Reserve. Certain functions currently handled by existing agencies are expected to be transferred to the BCFP, and the BCFP is expected to assume full authority for consumer financial protection no later than one year after enactment.

.20 The Dodd-Frank Act recognizes that CPAs providing customary and usual accounting activities (which include accounting, tax, advisory, or other services that are subject to the regulatory authority of a state board of accountancy) and other services incidental to such customary and usual accounting activities are already adequately regulated and, therefore, are not subject to the BCFP's authority. Activities that are outside the customary and usual activities may be subject to BCFP regulation; thus, CPAs may not have full exemption.

.21 The BCFP has the authority to examine and enforce regulations for banks and credit unions with assets of over $10 billion, as well as all mortgage-related businesses (nondepository institution lenders, servicers, mortgage brokers, and foreclosure operators); providers of payday loans; and student lenders, as well as other nonbank financial entities, such as debt collectors and consumer reporting agencies. Banks and credit unions with assets of $10 billion or less will be examined for consumer compliance by the appropriate regulator. The BCFP also is able to autonomously write rules for consumer protections governing all financial institutions (banks and nonbanks) offering consumer financial services or products.

.22 For mortgage reform, a simple federal standard is established for all home loans that requires a nondepository institution to have a reasonable basis to expect that borrowers can repay their loans. Lenders and mortgage brokers who do not comply with the new rules prohibiting unfair lending practices will be held accountable through imposed penalties. The Dodd-Frank Act does not address the government-sponsored entities Fannie Mae and Freddie Mac—they will be addressed separately through future legislation.

Sarbanes-Oxley Section 404(b) Exemption

.23 The Dodd-Frank Act amends SOX to make permanent the exemption from its Section 404(b) requirement for nonaccelerated filers (those with less than $75 million in market capitalization) that had temporarily been in effect by order of the SEC. Section 404(b) of SOX requires companies to obtain an auditor's report on management's assessment of the effectiveness of the company's internal control over financial reporting. It is important to note that Section 404(a) of SOX, which requires management's assertion (report) on internal control over financial reporting, is still required for nonaccelerated filers. The Dodd-Frank Act also requires the SEC to complete a study within 9 months of the act's enactment on how to reduce the burden of Section 404(b) SOX compliance for companies with market capitalizations between $75 million and $250 million. The study will consider whether any such methods of reducing the burden, or a complete exemption, would encourage companies to list on U.S. exchanges. The Government Accountability Office (GAO) is also required to conduct a study to evaluate whether issuers that are exempt from Section 404(b) requirements have fewer or more restatements than those that are required to comply, how the cost of capital compares for exempt issuers, whether any difference exists in investor confidence in the integrity of the financial statements of exempt versus complying issuers, and whether exempted entities should be required to disclose to investors the absence of Section 404(b) attestation and the costs and benefits of voluntary compliance. The report of findings from the second study is due to Congress within 3 years.

.24 In September 2010, the SEC issued Final Rule Release Nos. 33-9142; 34-62914, *Internal Control Over Financial Reporting in Exchange Act Periodic Reports of Non-Accelerated Filers*, to conform its rules to this resulting change from the Dodd-Frank Act.

.25 Section 112 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) added Section 36, "Early Identification of Needed Improvements in Financial Management," to the Federal Deposit Insurance Act (FDI Act) (*Banks and Banking*, *U.S. Code* Title 12, Section 1831m). Part 363 of the FDIC's

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

regulations (Title 12 U.S. *Code of Federal Regulations* [CFR] Part 363) implements Section 36 of the FDI Act.[1] Section 36 of the FDI Act and 12 CFR 363 require each IDI with $1 billion or more in total assets to file an annual report that includes, among other items, an assessment by management on the effectiveness of the IDI's internal control over financial reporting and an independent public accountant's attestation report concerning the effectiveness of the IDI's internal control structure over financial reporting. The permanent exemption from Section 404(b) of SOX does not affect the requirement for an IDI with $1 billion or more to include an independent public accountant's attestation report concerning the effectiveness of the IDI's internal control structure over financial reporting in its Part 363 Annual Report.

Auditors of Nonpublic Broker-Dealers

.26 Prior to the Dodd-Frank Act, in 2008, SEC Release No. 34-54920, *Extension of Order Regarding Broker-Dealer Financial Statement Requirements under Section 17 of the Exchange Act*, expired, and as a result, financial statements of nonpublic broker-dealers for fiscal years ending after December 31, 2008, must be audited by a PCAOB-registered public accounting firm. The expiration of the SEC's order resulted in over 500 accounting firms with broker-dealer audit clients registering with the PCAOB. Any balance sheet, income statement, or other financial statement required to be filed by a nonpublic broker-dealer must be audited by a public accounting firm registered with the PCAOB. Although auditors of nonpublic broker-dealers were required to register with the PCAOB, they were not subject to the PCAOB's standard-setting, inspections, investigatory, or disciplinary authority. The Dodd-Frank Act addresses this limitation.

.27 Section 982 of the Dodd-Frank Act provides for the PCAOB to create a program for inspecting the auditors of nonpublic broker-dealers, including standard setting and enforcement. Section 982 amends Section 102 of SOX to specifically mandate that auditors of nonpublic brokers-dealers follow the same standards and requirements as auditors of issuers. This section of the Dodd-Frank Act also permits the PCAOB to refer investigations, as well as release documents and information gathered in investigations, to a registered broker-dealer's self-regulating organizations.

.28 The Dodd-Frank Act allows the PCAOB, in its inspection rule, to potentially differentiate among auditors of nonpublic broker-dealer classes and to potentially exempt auditors of introducing brokers (IBs) (those who do not engage in clearing, carrying, or custody of client assets) from its inspection program.

.29 The PCAOB is also authorized to identify public accounting firms that lack expertise or fail to exercise care in audits of broker-dealers, identify and address audit deficiencies, and suspend or bar noncompliant registered public accounting firms from conducting broker-dealer audits. SOX, as amended, will also require broker-dealers to pay an annual accounting support fee to the PCAOB. The fee is intended to offset the cost of PCAOB oversight of auditors of broker-dealers and will be allocated among broker-dealers proportionately based on their net capital.

.30 Because of the time and steps involved in the promulgation of any new rules for nonissuers applicable to both nonisser broker-dealers and auditors of nonissuer broker-dealers, the PCAOB has indicated that it is unlikely that the new nonissuer broker-dealer auditing standards would be implemented by 2011. This implementation would likely occur in 2012. However, limited inspections of auditors of nonissuer broker-dealers may be performed in 2011.

.31 See the "SEC Guidance Regarding Auditing, Attestation, and Related Professional Practice Standards Related to Broker-Dealers" section in this alert for additional information regarding an SEC interpretation related to this rule.

---

[1] Section 36, "Early Identification of Needed Improvements in Financial Management," of the Federal Deposit Insurance Act (*Banks and Banking*, *U.S. Code* Title 12, Section 1831m) and its implementing regulation, Part 363 of the Federal Deposit Insurance Corporation's (FDIC's) regulations (Title 12 U.S. *Code of Federal Regulations* [CFR] Part 363) can be found at www.fdic.gov/regulations/laws/rules/1000-3800.html#fdic1000sec.36 and www.fdic.gov/regulations/laws/rules/2000-8500.html, respectively. Also, the FDIC's Financial Institution Letter 33-2009, which includes the final rule regarding the most recent amendments to 12 CFR 363, is located at www.fdic.gov/news/news/financial/2009/fil09033.html.

PCAOB and Foreign Auditor Oversight

.32 The PCAOB is now authorized, in certain circumstances, to share information with foreign audit oversight authorities. This will facilitate PCAOB cooperation with its foreign counterparts and PCAOB inspection of non-U.S. firms. When SOX was enacted, few other countries had similar audit oversight bodies; therefore, no provisions in SOX existed to authorize sharing information with foreign authorities. Since then, many countries have established, or are in the process of establishing, similar audit oversight bodies.

.33 Further, any registered public accounting firm (domestic or foreign) that relies, in whole or in part, on the work of a foreign public accounting firm in issuing an audit report, performing audit work, or conducting an interim review must (*a*) produce the foreign firm's audit working papers and all related documents if the SEC or PCAOB requests them and (*b*) secure the foreign firm's agreement to produce those documents as a condition of relying on the work of that firm. Any foreign firm that performs work for a domestic registered public accounting firm must provide the domestic firm with written consent and power of attorney designating the domestic firm as an agent on whom the SEC or PCAOB may serve a request for documents. Any foreign firm that performs material services on which a registered public accounting firm relies must designate to the SEC or PCAOB an agent in the United States on whom the SEC or PCAOB may serve a request for documents. The SEC or PCAOB may allow a foreign firm to meet document production obligations through alternate means, such as through the SEC's or PCAOB's foreign counterparts.

SEC Study Regarding Obligations of Broker-Dealers and Investment Advisers

.34 Under Section 913 of the Dodd-Frank Act, the SEC is required to conduct a study regarding the obligations of broker-dealers and investment advisers within six months of the date the Dodd-Frank Act was signed into law. The study will evaluate the effectiveness of existing legal or regulatory standards of care for broker-dealers (readers may refer to the discussion regarding obligations of broker-dealers to conduct reasonable investigations in Regulation D offerings in the subsequent "Broker-Dealers in Securities" section in this alert) and investment advisers; recommendations about securities to retail customers imposed by the SEC and a national securities association; and other federal and state legal or regulatory standards. In addition, the study will evaluate whether there are legal or regulatory gaps, shortcomings, or overlaps in legal or regulatory standards in the protection of retail customers relating to the standards of care for broker-dealers and investment advisers that should be addressed by rule or statute.

.35 In addition, following the study, the SEC is authorized to write rules addressing the legal and regulatory standards of care. Under the Dodd-Frank Act, the SEC is specifically given authority to establish a fiduciary duty for broker-dealers. The SEC may write rules to provide that the standard of conduct for a broker-dealer providing personalized investment advice about securities to a retail customer (and possibly other customers) should be the same as the standard of conduct applicable to an investment adviser under the Investment Advisers Act of 1940.

.36 As required by the Dodd-Frank Act, on July 27, 2010, the SEC published a request for public comment to solicit input regarding the obligations and standards of care of broker-dealers and investment advisers providing personalized investment advice about securities to retail investors.

.37 To facilitate public comment on these issues, as well as future requests for comment, the SEC is providing links on its website at www.sec.gov/spotlight/regreformcomments.shtml. The public can provide preliminary comments on topics, including over-the-counter (OTC) derivatives, hedge funds, corporate disclosure, and credit rating agencies, and other areas in which the SEC will be engaged in rulemaking and studies over the next 18 months.

Derivatives Trading

.38 The Dodd-Frank Act provides the SEC and the Commodity Futures Trading Commission (CFTC) with the authority to regulate OTC derivatives and requires central clearing and exchange trading for derivatives. The SEC will have authority over specific security-based swaps (including credit default swaps). The CFTC

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

will have authority over all other swaps, including energy-rate swaps, interest-rate swaps, and broad-based security group or index swaps. Standardized swaps will be traded on an exchange or in other centralized trading facilities, which will promote transparency; standardized derivatives will also have to be handled by central clearinghouses. *Cleared* is defined as when trades are routed through a central clearinghouse that covers losses if a party to the trade is unable to complete the transaction. As a safeguard, many derivative traders will also be required to post margin to ensure all obligations can be paid and to offset the general risks that derivative trading poses to the financial system.

.39 The Dodd-Frank Act requires all cleared swaps to be traded on a registered exchange or board of trade. Many challenges surround this requirement, including that the standardization required of exchange-traded contracts could make it difficult for financial institutions to execute hedge strategies and achieve hedge effectiveness under hedge accounting rules. Clearing and exchange trading requirements are expected to become effective 360 days following enactment.

.40 The Dodd-Frank Act also provides regulators the authority to impose capital and margin requirements on swap dealers and major swap participants, not end users. By making the market more transparent, the pricing of common kinds of derivatives from the open marketplace may be reduced and would allow a wider range of entities to hedge their risks; customized derivatives could still have higher prices. The credit exposure from derivative transactions will be considered in banks' lending limits.

.41 Banks are allowed to continue engaging in principal transactions involving interest-rate, foreign-exchange, gold, silver, and investment-grade credit default swaps, subject to Volcker Rule limitations on proprietary trading. (Under the Volcker Rule of the Dodd-Frank Act, a banking entity will now be prohibited from proprietary trading; acquiring or retaining any equity, partnership, or other ownership interest in a hedge fund or private equity fund; and sponsoring a hedge fund or private equity fund. See the "Ending 'Too Big to Fail'" section of this alert for additional information.) For commodities, most other metals, energy, and equities, banks will have to shift their swap operations to a separately capitalized affiliate within the holding entity. Under an end-user exemption, nonfinancial firms can still use derivatives to hedge and manage the commercial risks associated with their business.

Securitization

.42 The Dodd-Frank Act also makes changes to securitization rules. Entities that sell products such as mortgage-backed securities will now be required to retain at least 5 percent of the credit risk, unless the underlying loans meet standards that reduce the risk. Issuers of these securities will also be required to disclose more information about the underlying assets, including analysis of the quality of the underlying assets. A study is mandated by the Dodd-Frank Act regarding the impacts of the new credit risk retention requirements and FASB Accounting Standards Update (ASU) No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*, and No. 2009-17, *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*, on asset-backed securities (ABS). See the "Regulation AB" section in this alert regarding the SEC's proposed rules to address ABS and proposed risk retention requirements.

Registered Investment Advisers and Hedge Funds

.43 The Dodd-Frank Act will require advisers to hedge funds and private equity funds with over $150 million in assets to register with the SEC and be subject to its oversight. Advisers to venture capital funds remain exempt from registration, as well as advisers to private funds if such advisers act solely as advisers to private funds and have U.S. assets under management below $150 million. Currently, the Investment Advisers Act of 1940 requires investment advisers with over $30 million in assets under management to register with the SEC. Under the new reform, this threshold for federal regulation will be raised to $100 million, with certain exceptions. This change will increase the number of small advisers under state supervision and will allow the SEC to focus on newly registered hedge funds. Advisers will provide information about their trades and portfolios that is necessary to assess their systemic risk. The exemption in the Investment Advisers Act of 1940 for advisers with fewer than 15 clients has also been eliminated.

Investment advisers, now including hedge funds, must take steps to safeguard client assets over which such advisers have custody, including, without limitation, verification of such assets by an independent public accountant, as the SEC may, by rule, prescribe. The new registration requirements will become effective 1 year after enactment; however, any investment adviser may, at the discretion of the investment adviser, register with the SEC during that 1-year period. The Dodd-Frank Act also raises the standard for individuals to qualify as accredited investors, a basic threshold for purchasing private investments; these investors must now have $1 million in net assets, excluding the value of their primary residence. The prior standard was simply $1 million.

SEC and Investor Protections

.44 Because it lowers the legal standard from "knowing" to "knowing or reckless," the Dodd-Frank Act may make it easier for the SEC to prosecute aiders and abettors of those who commit securities fraud under the Securities Act of 1933, the Securities Exchange Act of 1934 (Exchange Act), the Investment Company Act of 1940, and the Investment Advisers Act of 1940. This change will increase the difficulty for a defendant to avoid a civil enforcement action because the SEC does not have to show the person intended to aid another person's violation but only that reckless conduct furthered the violation. The SEC and the Department of Justice will also now have the authority to bring civil and criminal law enforcement proceedings involving transnational securities frauds.

.45 Additionally, the Dodd-Frank Act authorizes 2 studies on these matters. One of the studies directs the GAO to investigate the impact of authorizing private rights of action for aiding and abetting claims and to release its findings within 1 year. The second study directs the SEC to examine whether private rights of action should be authorized for transnational or extraterritorial claims, and that study is to be completed within 18 months.

.46 The Office of the Investor Advocate will also be created within the SEC to identify areas in which investors have significant problems dealing with the SEC and to provide them with assistance. Another responsibility of this office will be to identify areas in which investors would benefit from changes in the regulations of the SEC.

.47 A whistle-blower program with rewards to encourage securities violations reports was created by the Dodd-Frank Act. An exception is provided for any whistle-blower who gains information through the performance of an audit of financial statements. Employers are prohibited from retaliating against whistle-blowers. Subsidiaries and affiliates that are consolidated with public companies for financial accounting purposes will become subject to the whistle-blower protections in SOX.

.48 The SEC is permitted to use fee collections to establish a reserve fund of up to $100 million, which can be used to fund special projects. The SEC may submit its annual budget directly to Congress without requiring the prior approval of the White House. The SEC has publicly stated that it will need to hire approximately 800 new employees to carry out the new reforms, given the new required enforcement, the 5 offices created within the SEC, the studies to be carried out, and the development of the specifics of new regulations.

Executive Compensation

.49 The Dodd-Frank Act requires a nonbinding shareholder vote on executive pay and golden parachutes for public companies. At a public company's first shareholder meeting following the end of the six-month period after enactment, management must give shareholders the opportunity to vote on how frequently shareholders will have a "say on pay" (that is, annually, every two years, or every three years). This is intended to give shareholders the power to hold executives accountable. Although the vote is nonbinding, a "No" vote by shareholders may force management to respond in some way. The SEC will have the authority to grant shareholders proxy access to nominate directors, which is intended to help shift management's focus from short-term profits to long-term growth and stability. The SEC is allowed to exempt small businesses from this requirement. The SEC issued a proposed proxy access rule last year but has been waiting for the clear legal authority that the Dodd-Frank Act provides prior to moving ahead with a final rule. The SEC is already in

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

the process of drafting proxy access rules for public comment. The Dodd-Frank Act also requires entities to disclose in their annual proxy statement the median of annual total compensation to all employees other than their CEO, annual total compensation of the CEO, and the ratio of these two amounts. Disclosure is also required on why the chairman of the board and CEO positions are separate or combined.

.50 Incentive-based compensation that is based on financial statements that are restated to correct errors must be returned for the three years preceding the restatement in an amount equal to the excess of what would have been paid under the restated results. This is required regardless of whether the executive was involved in the noncompliance that led to the restatement. Listing exchanges will enforce the compensation policies. The Dodd-Frank Act also requires directors of compensation committees to be independent of the entity (*independent* as defined by its exchange) and its management. The members of that committee are required to select consultants, legal counsel, and other advisers only after taking into account independence factors established by the SEC. New disclosures regarding compensation will also be required, such as the incentive-based compensation policies. Further, the SEC is required to clarify disclosures on compensation, including requirements to provide information that shows the relationship between executive compensation actually paid and the financial performance of the issuer.

.51 Overall, the level and complexity of the relationships that entities have with their regulators will increase from the passage of the Dodd-Frank Act. Already, many entities have chief risk officers who reside above any risk management structures inside business units and manage the firm's overall risk profile. This position creates a single senior point of contact for regulators seeking a high-level understanding of where a firm may have risk concentrations with possible systemic implications.

Ending "Too Big to Fail"

.52 The Dodd-Frank Act is intended to reduce the risk that large firms will take excessive risk because they believe they will, in effect, be rescued in the event of failure, as evidenced during the recent economic recession. Although that is an intent of the specific changes required by this reform, whether that goal will be achieved can only be determined over time. The goal is that taxpayers will not again be responsible to save a failing financial entity or cover the cost of its liquidation.

.53 The Volcker Rule, as previously stated, prohibits banking entities from proprietary trading; acquiring or retaining any equity, partnership, or other ownership interest in a hedge fund or private equity fund; and sponsoring a hedge fund or private equity fund. *Proprietary trading* consists of transactions made by an entity that affect the entity's own account but not the accounts of its clients. Banks are allowed to make de minimis investments in hedge funds and private equity funds using no more than 3 percent of their tangible common equity in all such funds combined. Also, a bank's investment in a private fund may not exceed 3 percent of the fund's total ownership interest. Nonbank financial institutions supervised by the Federal Reserve will also have restrictions on proprietary trading, hedge fund investments, and private equity investments.

.54 The Dodd-Frank Act also requires certain financial entities to periodically submit plans for their rapid and orderly shutdown should the company go under (a "funeral plan" or "living will"). Each Federal Reserve-supervised nonbank financial company and bank holding company with at least $50 billion in total consolidated assets are required to report periodically to the Federal Reserve, the FSOC, and the FDIC regarding their plans. Entities that fail to submit acceptable plans will have higher capital requirements and restrictions on growth and activity, as well as divestment (in other words, sell or otherwise transfer assets or off-balance sheet items to unaffiliated entities).

.55 Additionally, an orderly liquidation mechanism for the FDIC to unwind failing systemically significant financial entities that pose a risk to the financial system has been created. Shareholders and unsecured creditors bear losses, and management and culpable directors will be removed. The FDIC will only be allowed to borrow funds to liquidate an entity when it expects to be repaid from the assets of the entity being liquidated, and the government will be first in line for repayment. Funds that are not repaid from the sales of the entity's assets will be repaid first through the clawback of any payments to creditors that exceeded liquidation value and then through assessments on large financial entities (with the riskiest ones paying

more). Taxpayers will bear no cost for liquidations. In addition, the Federal Reserve will be prohibited from rescuing an individual entity. To prevent "runs" on banks, the FDIC can guarantee the debt of solvent insured banks but only after meeting stringent requirements. The FDIC has prepared a summary of the Dodd-Frank Act that focuses on some particular areas related to the FDIC, such as those previously mentioned. This summary can be found on the FDIC's website at www.fdic.gov/regulations/reform/summary.pdf.

Thrift Regulations

.56 Title III, "Transfer of Powers to the Comptroller, the FDIC, and the FED," of the Dodd-Frank Act abolishes the OTS, the current federal supervisor for thrifts and thrift holding companies, and transfers authority mainly to the Office of the Comptroller of the Currency (OCC), which also regulates federally chartered national banks. However, the thrift charter has been preserved. The transfer of responsibilities is to take place one year after the promulgation of the Dodd-Frank Act, though provisions allow for extensions of that deadline if necessary.

.57 In addition, the Dodd-Frank Act provides that all orders; resolutions; determinations; agreements; and regulation interpretative rules, other interpretations, guidelines, procedures, and advisory material issued, made, or proscribed by the OTS remain in effect and shall remain enforceable by the OCC, the FDIC, or the Federal Reserve. See Section 316 of the Dodd-Frank Act for additional information.

Other Bank Regulations

.58 The Dodd-Frank Act permanently increases the maximum deposit insurance amount for banks, thrifts, and credit unions to $250,000 and retroactively applies the limit to January 1, 2008. The FDIC is directed to amend its regulations to define the assessment base as average total consolidated assets minus average tangible equity and to increase the minimum reserve ratio for the Deposit Insurance Fund (DIF) from 1.15 percent to 1.35 percent, exempting institutions with assets of less than $10 billion from the assessment.

.59 The prohibition of banks paying interest-on-demand deposits has been repealed. Additionally, the Dodd-Frank Act removes the ability for a bank to convert its charter (unless both the old and new regulator do not object) in order to avoid an enforcement action.

.60 Cash limits on Securities Investor Protection Corporation (SIPC) protection are also increased from $100,000 to $250,000, subject to periodic adjustments for inflation.

Rating Agencies

.61 Rating agencies became subject to increased scrutiny, given their role in the subprime mortgage crisis. The Dodd-Frank Act creates an Office of Credit Ratings at the SEC that must examine credit rating agencies at least once per year and make key findings public. These agencies will now be subject to expert liability with the nullification of Rule 436(g) of the Securities Act of 1933. This rule had provided an exemption for rating agencies from liability for statements about their ratings made in registration statements and prospectuses. Under the Dodd-Frank Act, in order to include a credit rating agency's rating in a registration statement, the registrant must file the credit rating agency's consent along with the registration statement. This will make credit rating agencies vulnerable to lawsuits when underwriters include their assessments in documents used to sell debt; they will now face the same legal risks as accountants and other parties who participate in bond sales. Investors can now bring private rights of action against rating agencies for a knowing or reckless failure to conduct a reasonable investigation of the facts or to obtain analysis from an independent source. The SEC also has the authority to deregister a credit rating agency for providing bad ratings over time. The SEC will be required to investigate any conflicts of interest involved in financial entities from picking the agency they believe will give them the highest ratings. Credit rating agencies will be required to disclose their methodology and track record. The SEC will conduct a study on the feasibility of a public or private entity that would be responsible for the assignment of a credit rating to the credit rating agencies.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Conclusions

.62 The impact of these new reforms on the capital markets and credit availability is difficult to predict. The reforms have a widespread effect, and the full extent may take years to fully understand. Although strengthening transparency is an appropriate response to the recent economic recession, it has yet to be seen how the more stringent rules will affect the financial system and economic recovery.

.63 A copy of the full Dodd-Frank Act, as signed by the president, can be found at www.gpo.gov/fdsys/pkg/BILLS-111hr4173ENR/pdf/BILLS-111hr4173ENR.pdf. The AICPA is also following any developments related to the Dodd-Frank Act on our website at www.aicpa.org under "Advocacy—Federal Issues."

Regulatory Developments

.64 The following provides general regulatory actions finalized or proposed by the Federal Reserve, the FDIC, the OCC, the OTS, and the National Credit Union Administration (NCUA) (collectively, the federal financial institution regulators); the CFTC; the SEC; and other regulatory agencies. See the "Regulatory Accounting Issues and Developments" section for regulatory actions that specifically affect certain accounting issues of financial institutions.

Federal Financial Institutions Regulators

Use of Credit Ratings

.65 In regard to the use of credit ratings, Section 939A of the Dodd-Frank Act requires the federal agencies to review regulations that (*a*) require an assessment of the creditworthiness of a security or money market instrument and (*b*) contain references to, or requirements regarding, credit ratings. In addition, the agencies are required to remove such references and substitute in their place uniform standards of creditworthiness, where feasible. The federal banking agencies, including the OCC, the Federal Reserve, the FDIC, and the OTS, issued an Advanced Notice of Proposed Rulemaking (ANPR), *Regarding Alternatives to the Use of Credit Ratings in the Risk-Based Capital Guidelines of the Federal Banking Agencies*, on August 16, 2010, in response to this requirement.

.66 This advance notice describes the areas in the capital rules where the agencies rely on credit ratings, as well as the Basel Committee on Banking Supervision's (Basel Committee's) amendments to Basel II. The advance notice solicits comment on alternative standards of creditworthiness that could be used in lieu of credit ratings; it also seeks comment on a range of potential approaches, including basing capital requirements on more granular supervisory risk weights or market-based metrics, as well as on how these approaches might apply to different exposure categories. It also requests comment on the feasibility of, and burden associated with, alternative methods of measuring creditworthiness for banking organizations of varying size and complexity. The ANPR and the request for comments can be found at www.gpo.gov/fdsys/pkg/FR-2010-08-25/pdf/2010-21051.pdf. A summary of the ANPR can be found on the FDIC's website at www.fdic.gov/news/news/financial/2010/fil10052.html.

Interagency Advisory on Interest Rate Risk Management

.67 On January 6, 2010, the banking regulatory agencies, including the Federal Financial Institutions Examination Council (FFIEC) and the State Liaison Committee, issued *Advisory on Interest Rate Risk Management* to remind institutions of supervisory expectations regarding sound practices for managing interest rate risk (IRR). In the current environment of historically low short-term interest rates, it is important for institutions to have robust processes for measuring and, when necessary, mitigating their exposure to potential increases in interest rates. Institutions are expected to have sound risk management practices in place to measure, monitor, and control IRR exposures. Accordingly, each of the financial regulators has established guidance on the topic of IRR management, which is included in the appendix of the interagency guidance. The entire text of this advisory can be found at www.fdic.gov/news/news/press/2010/pr1002.pdf.

Correspondent Concentration Risks

.68 On April 30, 2010, the federal banking regulatory agencies issued interagency guidance on correspondent concentration risks to outline the agencies' expectations for identifying, monitoring, and managing correspondent concentration risks between financial institutions. This guidance also addresses the agencies' expectations relative to performing appropriate due diligence on all credit exposures to, and funding transactions with, other financial institutions. Financial institutions that maintain credit exposures in, or provide funding to, other financial institutions should have effective risk management programs for these activities. Credit or funding exposures may include, but are not limited to, "due from" balances; federal funds sold as principal; direct or indirect loans (including participations and syndications); and trust preferred securities, subordinated debt, and stock purchases of the correspondent. The entire text of this guidance can be found at www.fdic.gov/news/news/financial/2010/fil10018a.pdf.

Banks and Savings Institutions

.69 According to industry trends, as reported by the FDIC, results from the beginning of 2010 from insured commercial banks and savings institutions have shown some positive signs for the industry. Lower provisions for loan losses and reduced expenses for goodwill impairment, in general, are helping to improve earnings of many banks and savings institutions. Although positive signs have emerged, many institutions continue to experience repercussions from the economic crisis. The FDIC reported that the number of institutions reporting quarterly financial results continues to decline as the number of failed FDIC-insured institutions and the number of institutions that have merged into other charters continue to increase. In addition, the number of insured commercial banks and savings institutions on the FDIC's "problem list" and the amount of "problem" assets continue to rise. The following table highlights these trends:

Historical Trends for FDIC-insured Institutions as of June 30, 2010[2]

	YTD 2010	*2009*	*2008*	*2007*
Commercial Banks	6,676	6,839	7,085	7,283
Savings Institutions[3]	1,154	1,173	1,219	1,251
Problem Institutions[4]	829	702	252	76
Failed Institutions	86	140	25	3

.70 Comptroller of the Currency John C. Dugan said in a speech in early 2010 that although the vast majority of community banks are sound, nearly 80 percent of community national banks have CAMELS ratings of 1 or 2; a growing minority have ratings that are lower.[5] Since the start of the crisis, most of the banks that have failed have been community banks.

.71 The interagency *Shared National Credits Program 2010 Review*[6] found that credit quality remained weak but improved with respect to large corporate loans and loan commitments held by U.S. bank organizations, foreign bank organizations, and nonbanks. Although the volume of criticized assets declined by more than

[2] Readers are encouraged to obtain the most recent *FDIC Quarterly* and other FDIC-insured institution statistics at www.fdic.gov/bank/statistical/stats/index.html.

[3] The number of savings institutions include both FDIC-supervised and Office of Thrift Supervision (OTS)-supervised institutions.

[4] Federal regulators assign a composite rating to each financial institution based on an evaluation of financial and operational criteria. The rating is based on a scale of one to five in ascending order of supervisory concern. *Problem institutions* are those institutions with financial, operational, or managerial weaknesses that threaten their continued financial viability. Depending upon the degree of risk and supervisory concern, they are rated either a four or five. The number and assets of problem institutions are based on FDIC composite ratings.

[5] See Office of the Comptroller of the Currency (OCC) Release 2010-32, *Comptroller Dugan Urges Action on Commercial Real Estate Concentrations*, dated March 19, 2010, at www.occ.treas.gov/ftp/release/2010-32.htm.

[6] The annual *Shared National Credits Program 2010 Review* results are prepared and released jointly by the Federal Reserve, the FDIC, the OCC, and the OTS. Results of the review are based on analyses prepared in the second quarter of 2010 using credit-related data provided by federally supervised institutions as of December 31, 2009, and March 31, 2010.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

30 percent from 2009's record level and the severity of classifications lessened, the volume and percentage of criticized and classified assets remained at historically high levels. Performance of the shared national credits portfolio remained heavily influenced by its significant exposure to 2006 and 2007 vintage credits with weak underwriting standards. Readers are encouraged to review the report in its entirety at www.federalreserve.gov/newsevents/press/bcreg/bcreg20100928a1.pdf.

.72 The following sections provide information about regulatory developments affecting banking and savings institutions.

FDIC Assessments

.73 On April 13, 2010, the FDIC board approved the Notice of Proposed Rulemaking *Assessments* that would (*a*) revise the risk-based assessment system for all large IDIs and (*b*) alter the initial and total base assessment rates for all IDIs. The proposed changes would be effective January 1, 2011.

Transaction Account Guarantee Extension

.74 On April 13, 2010, the FDIC adopted an interim final rule extending the Transaction Account Guarantee (TAG) Program component of the Temporary Liquidity Guarantee Program for 6 months, through December 31, 2010, with the possibility of extending the program an additional 12 months without further rulemaking. For institutions choosing to remain in the TAG Program, the basis for calculating the current assessments is modified to one that uses average daily balances in TAG-related accounts. Interest rates on negotiable order of withdrawal accounts guaranteed under the TAG Program are also lowered. See the FDIC's Financial Institution Letter (FIL)-15-2010, *Transaction Account Guarantee Extension*, on the FDIC website at www.fdic.gov/news/news/financial/2010/fil10015.html for additional information. The interim rule became effective on April 19, 2010.

.75 Section 343 of the Dodd-Frank Act amended the FDI Act to provide temporary unlimited insurance coverage to noninterest-bearing transaction accounts. This amendment will be in effect from December 31, 2010, to December 31, 2012, and it will replace the FDIC's TAG Program. The Dodd-Frank Act defines the noninterest-bearing transaction accounts eligible for this unlimited insurance protection more narrowly than the FDIC's TAG Program regulations. The Dodd-Frank Act also provides this unlimited insurance coverage to noninterest-bearing transaction accounts at all FDIC-insured institutions. To support the FDIC's administration of DIF in response to Section 343, all banks, including those that had not elected to participate in the FDIC's TAG Program, must begin to report the quarter-end dollar amount and number of noninterest-bearing transaction accounts (as defined in the Dodd-Frank Act) of more than $250,000, beginning December 31, 2010. The instructions for reporting estimated uninsured deposits will also be revised as of that date to reflect the temporary change in insurance coverage resulting from Section 343. Draft-revised instructions are available on the FFIEC's website at www.ffiec.gov/ffiec_report_forms.htm.

Regulation AB

.76 The SEC proposed significant revisions to Regulation AB and other rules regarding the offering process, disclosure, and reporting for ABS on April 7, 2010, which are broadly consistent with the Dodd-Frank Act's requirements for ABS. The proposals would revise filing deadlines for ABS offerings to provide investors with more time to consider transaction-specific information, including information about the pool assets.

.77 The proposals would repeal the current credit ratings references in shelf eligibility criteria for asset-backed issuers and establish new shelf eligibility criteria that would include, among other things, a requirement that the sponsor retain a portion of each tranche of the securities that are sold and a requirement that the issuer undertake to file Exchange Act reports on an ongoing basis, so long as its public securities are outstanding. The proposal would require the sponsor or an affiliate of the sponsor to generally retain a net economic interest in each securitization of 5 percent of the nominal amount.

.78 The SEC also proposed to require that with some exceptions, prospectuses for public offerings of ABS and ongoing Exchange Act reports contain specified asset-level information about each of the assets in the pool. The asset-level information would be provided according to proposed standards and in a tagged data format using Extensible Markup Language.

.79 Along with the provisions previously addressed, the Dodd-Frank Act mandates a number of significant changes to the regulation of ABS offerings. In response, the SEC issued a proposed rule, *Extension of Filing Accommodation for Static Pool Information in Filings With Respect to Asset-Backed Securities*. The proposed rule would extend by 18 months the temporary filing accommodation in Rule 312 of Regulation S-T that allows static pool information required to be disclosed in a prospectus of an asset-backed issuer to be provided on an Internet website under certain conditions. This accommodation was included in the SEC's final rule, *Extension of Filing Accommodation for Static Pool Information in Filings With Respect to Asset-Backed Securities*, issued in December 2009. The proposal would apply to filings with respect to ABS filed on or before June 30, 2012. The proposal was issued on August 30, 2010. See the proposed rule at www.sec.gov/rules/proposed/2010/33-9137.pdf for more information.

Certain Large IDIs

.80 On May 12, 2010, the FDIC issued FDIC FIL-26-2010, *Special Reporting, Analysis and Contingent Resolution Plans at Certain Large Insured Depository Institutions*, a proposed rule that would require certain IDIs that are affiliates of large and complex financial companies to submit to the FDIC analysis, information, and plans that address and demonstrate the insured institution's ability to be separated from its parent structure and to be wound down or resolved in an orderly fashion. Following standards set forth in the proposed rule, and subject to the FDIC's review and validation, covered IDIs would submit information and contingent resolution plans that would allow the FDIC to assess the risks posed to the deposit insurance fund and to develop effective resolution strategies and conduct contingency planning for a period of severe financial distress. The proposal would apply only to IDIs with greater than $10 billion in total assets that are owned or controlled by parent companies with more than $100 billion in total assets.

Basel Committee

.81 The Basel Committee approved for consultation a package of proposed measures to strengthen global capital and liquidity regulations and to strengthen the Basel II Framework. These proposed measures, commonly referred to as Basel III, aim to (*a*) improve the banking sector's ability to absorb shocks arising from financial and economic stress, whatever the source; (*b*) improve risk management and governance; and (*c*) strengthen banks' transparency and disclosures. The reforms target (*a*) bank-level, or microprudential, regulation, which will help raise the resilience of individual banking institutions to periods of stress; (*b*) macroprudential, systemwide risks that can build up across the banking sector; as well as (*c*) the procyclical amplification of these risks over time. The Basel Committee's oversight body—the Group of Central Bank Governors and Heads of Supervision (GHOS)—agreed on the broad framework of Basel III in September 2009, and the Basel Committee set out concrete proposals in December 2009. These consultative documents formed the basis of the Basel Committee's response to the financial crisis and are part of the global initiatives to strengthen the financial regulatory system that have been endorsed by the G-20 leaders. The GHOS subsequently agreed on key design elements of the reform package at its July 2010 meeting and on the calibration and transition to implement the measures at its September 2010 meeting, including the definition of *capital*, the treatment of counterparty credit risk, the leverage ratio, and the global liquidity standard. The draft Basel III regulations include (*a*) a tighter definition of *tier 1 capital*—banks must hold 4.5 percent by January 2015, then a further 2.5 percent capital conservation buffer, totaling 7 percent; (*b*) the introduction of a leverage ratio; (*c*) a framework for counter-cyclical capital buffers; (*d*) measures to limit counterparty credit risk; and (*e*) short- and medium-term quantitative liquidity ratios. Press releases describing the most recent decisions made by the committee can be found at www.bis.org/list/press_releases/said_7/index.htm.

Credit Unions

.82 Credit unions continue to be affected by the economic issues. Although federally insured credit unions reported improved earnings performance and overall slight decline in loan delinquencies through the second quarter of 2010, the industry, in many areas of the country, continues to experience negative trends, including a rising number of costly credit union failures. Credit unions in these areas continue to experience a higher level of loan losses and loan modifications. The NCUA anticipates sizeable losses by credit unions during the remainder of 2010. Readers may find the most recent financial trends in federally insured credit unions, which are issued quarterly results though the *NCUA Letter to Credit Unions*, on the NCUA website at www.ncua.gov.

.83 One of the most significant financial and structural challenges to the credit union industry is related to the corporate credit union crisis. In 2009, the NCUA placed U.S. Central Federal Credit Union and Western Bridge Corporate Federal Credit Union into conservatorship, and on September 24, 2010, the NCUA board placed 3 additional corporate credit unions into conservatorship. These 5 corporate credit unions held more than 90 percent of the total impaired securities (legacy assets)—predominately private-label mortgage-backed securities—in the corporate credit union system.

.84 The following provides information regarding the NCUA's actions to address this crisis and reform the corporate credit union regulatory framework.

NCUA's 2010 Corporate Credit Union Rule

.85 On September 24, 2010, the NCUA finalized major revisions to 12 CFR 704 of the NCUA Rules and Regulations. The revisions

- establish a new capital structure, including risk-based capital requirements, to provide corporate credit unions with a stronger capital base.
- establish prompt corrective action requirements for corporate credit unions that allow the NCUA to take action with regard to undercapitalized corporate credit unions.
- include new limitations on corporate investments and credit risks, as well as asset-liability management controls, so that high concentrations of certain types of investments are not permitted.
- provide for greater NCUA oversight and control of corporate credit union service organization (CUSO) activities to protect against the possibility that systemic risk might migrate from corporate credit unions to their CUSOs.

.86 The new rule will be effective for 90 days after it is published in the *Federal Register*, and none of the new capital requirements will go into effective until October 2011. It is expected that many corporate credit unions will have to solicit and obtain capital from their members prior to October 2011 to meet the new regulatory standard.

.87 The NCUA has posted detailed information on the corporate credit union system resolution in a new "toolbox" on the NCUA website. The website provides historical and updated information on the stabilization actions taken by the NCUA, which include establishing the Temporary Corporate Credit Union Share Guarantee Program, the Temporary Corporate Credit Union Liquidity Guarantee Program, and the Temporary Corporate Credit Union Stabilization Fund. The website includes the NCUA's strategies regarding conservatorship of the five corporate credit unions and the corporate credit unions' legacy assets. It also provides additional background, history, and frequently asked questions (FAQs) related to the revised corporate credit union rule 12 CFR 704. This website may be accessed at www.ncua.gov/Resources/CorporateCU/CSRMain.aspx. The NCUA Letter to Credit Unions 10-CU-20, *NCUA's 2010 Corporate Credit Union Rule*, which announced the revisions to 12 CFR 704 may be found at www.ncua.gov/letters/2010/CU/10-CU-20.pdf. An attachment to this letter includes a matrix that summarizes the provisions of the NCUA's rules affected by this rulemaking, along with the effective dates for each provision.

Broker-Dealers in Securities

.88 Broker-dealers in securities continue to experience repercussions from the economic crisis and will continue to experience unprecedented changes within the industry as a result of the regulatory reform measures discussed throughout this alert.

SEC Circuit Breaker Rules

.89 On May 6, 2010, a market disruption occurred whereby the DJIA rapidly fell almost 1,000 points. Approximately 1 month later, the SEC approved rules that will require the exchanges and the Financial Industry Regulatory Authority (FINRA) to pause trading for 5 minutes in certain individual stocks if the price moves 10 percent or more in either direction in a 5-minute period. The pause would only apply to stocks in the S&P 500 and would give the markets the opportunity to attract new trading interest in an affected stock, establish a reasonable market price, and resume trading in a fair and orderly fashion. These rules are in effect on a pilot basis through December 10, 2010. The pilot period will be used to make appropriate adjustments to the parameters or operations of the circuit breakers based on experience, and the scope of the rules will be expanded to securities beyond the S&P 500 as soon as practicable. Additionally, the SEC is considering recalibrating marketwide circuit breaker rules that were already in effect in May 2010 but were not triggered during the May 6 minicrash. By the end of June, these circuit breakers had been set off twice—both times for erroneous trades. The SEC press release regarding these rules can be found at www.sec.gov/news/press/2010/2010-98.htm.

.90 At the end of June 2010, the SEC published for public comment proposals by the national securities exchanges and FINRA to expand the program to include all stocks in the Russell 1000 Index and certain exchange-traded fundss. The markets will continue to use the pilot period to make appropriate adjustments to the parameters or operations of the circuit breakers as warranted, based on their experience.

SEC Guidance on Liquidity and Capital Resources Disclosure

.91 On September 17, 2010, the SEC published interpretive guidance intended to improve the liquidity and capital resource disclosures in the "Management's Discussion and Analysis" (MD&A) section of SEC filings. The guidance provides insight into the SEC's preexisting disclosure rules and was not intended to create new disclosure requirements. This guidance can be reviewed at www.sec.gov/rules/interp/2010/33-9144.pdf.

New SEC Disclosures Impacting Quarter-End "Window Dressing"

.92 Currently, SEC rules require companies to disclose short-term borrowings at the end of a period. No requirement exists to disclose information about the specific amount of short-term borrowings outstanding throughout the reporting period. Investors have expressed concerns that certain public companies mask their liquidity positions by reducing short-term borrowings shortly before reporting dates. To address this concern, on September 17, 2010, the SEC proposed amendments to its requirements for disclosure relating to short-term borrowings. These proposed rules will require a registrant to provide enhanced disclosure regarding the use and impact of short-term borrowing arrangements throughout the relevant reporting period for the following categories of short-term borrowings: federal funds purchased and securities sold under agreements to repurchase, commercial paper, borrowings from banks, borrowings from factors or other financial institutions, and other short-term borrowings reflected on the registrant's balance sheet. In particular, registrants would be required under an amended Item 303 of Regulation S-K to provide disclosure of the following information for each of these categories of short-term borrowings:

- The amount of short-term borrowings outstanding at the end of the period and the weighted average interest rate on those borrowings
- The average amount outstanding during the period and the weighted average interest rate on those borrowings
- The maximum amount outstanding during the period

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.93 All registrants would be required to present information for each category of short-term borrowings, even when the relevant category represents only a small portion of the company's stockholders' equity at the end of the period. Registrants would be required to disaggregate the amounts shown for each category by currency, interest rate, or other meaningful criteria to the extent that presentation of separate amounts is necessary to promote understanding or prevent aggregate amounts from being misleading.

.94 Registrants would also be required to include a narrative discussion and analysis in the "MD&A" section to provide context for the tabular data. The new MD&A disclosure requirement is intended to provide investors with a discussion of the drivers of variations in the level of short-term borrowings outstanding during the period and at period-end.

.95 For purposes of calculating and reporting maximum and average amounts of short-term borrowings outstanding during the reporting period, financial companies would be required to provide averages calculated on a daily average basis, comparable with the calculations currently required for bank holding companies under Securities Act Industry Guide 3, "Statistical Disclosure by Bank Holding Companies," and to disclose the maximum amount outstanding on any day in the period. Nonfinancial companies would be required to calculate averages using an average period not to exceed one month and to disclose the maximum month-end amount during the period.

.96 The SEC has also proposed that substantially similar requirements be applicable to foreign private issuers in Item 5, "Operating and Financial Review and Prospects," of Form 20-F and that smaller reporting companies be granted certain exclusions from the most rigorous and costly features of the new requirements. Finally, the SEC has proposed conforming amendments to Items 2.03 and 2.04 of Form 8-K relating to short-term debt obligations. These proposed disclosures can be viewed at www.sec.gov/rules/proposed/2010/33-9143.pdf.

Custody Rule

.97 In December 2009, the SEC adopted rules designed to substantially increase the protections for investor funds and securities in the custody of an investment adviser registered with the SEC. Depending on the investment adviser's custody arrangement, the rules would require the adviser to be subject to surprise exams and custody control reviews that were generally not required under the previous rules. As amended, paragraph (a)(4) of Rule 206(4)-2 under the Investment Advisers Act of 1940 requires that all registered investment advisers (or investment advisers required to register) who have custody of client funds or securities, as defined, have an independent public accountant conduct an examination on a surprise basis once every calendar year. The independent public accountant must also file a certificate on Form ADV-E with the SEC within 120 days of the time chosen for the surprise examination by the independent public accountant stating that he or she has examined the funds and securities and describing the nature and extent of the examination. This surprise examination report follows the provisions of AT section 601, *Compliance Attestation* (AICPA, *Professional Standards*, vol. 1).

.98 The rule defines *custody* to mean an investment adviser, or its related person, holding, directly or indirectly, client funds or securities or having any authority to obtain possession of them. Custody includes the following:

- Possession of client funds or securities (but not of checks drawn by clients and made payable to third parties)
- Any arrangement (including a general power of attorney) under which the investment adviser is authorized or permitted to withdraw client funds or securities maintained with a custodian upon the investment adviser's instruction to the custodian
- Any capacity (such as general partner of a limited partnership, managing member of a limited liability company or a comparable position for another type of pooled investment vehicle, or trustee of a trust) that gives the investment adviser or his or her supervised person legal ownership of, or access to, client funds or securities

.99 A *qualified custodian* is defined by the rule as (*a*) a *bank*, as defined in Section 202(a)(2) of the Investment Advisers Act of 1940, or a *savings association*, as defined in Section 3(b)(1) of the FDI Act, that has deposits insured by the FDIC under the FDI Act; (*b*) a broker-dealer registered under Section 15(b)(1) of the Exchange Act that holds the client assets in customer accounts; (*c*) a futures commission merchant (FCM) registered under Section 4f(a) of the Commodity Exchange Act that holds the client assets in customer accounts, but only with respect to clients' funds and security futures, or other securities incidental to transactions in contracts for the purchase or sale of a commodity for future delivery and options thereon; and (*d*) a foreign financial institution that customarily holds financial assets for its customers, provided that the foreign financial institution keeps the advisory clients' assets in customer accounts segregated from its proprietary assets. Additionally, a *related person* is defined in the rule as any person, directly or indirectly, controlling or controlled by the investment adviser and any person that is under common control with the investment adviser.

.100 If the broker-dealer who is a registered investment adviser, or its related person, maintains client funds or securities as a qualified custodian in connection with advisory services provided to clients, Rule 206(4)-2(a)(6) under the Investment Advisers Act of 1940 requires that such investment adviser must at least once each calendar year obtain, or receive from its related person, a written internal control report related to its, or its affiliates', custodial services, including the safeguarding of funds and securities, which includes an opinion from an independent public accountant that is registered with, and subject to regular inspection by, the PCAOB.

.101 This requirement could be satisfied with a type 2 service auditor's report under a Statement on Auditing Standards (SAS) 70 report or an examination report on internal control over compliance conducted in accordance with AT section 601. As explained in question XIII.3 of the SEC's *Staff Responses to Questions About the Custody Rule*, in addition to the two types of reports previously mentioned (and Release IA-2969, *Commission Guidance Regarding Independent Public Accountant Engagements Performed Pursuant to Rule 206(4)-2 Under the Investment Advisers Act of 1940*) that satisfy the requirements for an internal control report, a report under AT section 101, *Attest Engagements* (AICPA, *Professional Standards*, vol. 1), would also be acceptable. As discussed in the "Service Organizations" section of this alert, Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, vol. 1, AT sec. 801), will replace the guidance previously found in SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324). Therefore, this type of report would also satisfy the internal control requirement. This internal control report must include an opinion about whether controls have been placed in operation as of a specific date and are suitably designed and are operating effectively to meet control objectives relating to custodial services, including the safeguarding of funds and securities held by either the investment adviser or its related person on behalf of the advisory clients during the year. The accountant must also verify that the funds and securities are reconciled to the records of a custodian other than the investment adviser or its related person (for example, the Depository Trust & Clearing Corporation). The accountant's tests of the custodian's reconciliation should include either direct confirmation, on a test basis, with unaffiliated custodians or other procedures designed to verify that the data used in the reconciliations performed by the qualified custodian is obtained from unaffiliated custodians and is unaltered.

.102 The AICPA Investment Companies Expert Panel developed an illustrative report of an independent registered public accounting firm on management's assertion regarding controls at a custodian pursuant to Rule 206(4)-2 under the Investment Advisers Act of 1940 and Release No. IA-2969, which can be accessed at www.aicpa.org/InterestAreas/AccountingAndAuditing/Community/InvestmentCompanies/DownloadableDocuments/Custody_report_September_1final.pdf.

.103 Readers are encouraged to review the full text of Release No. IA-2968, *Custody of Funds or Securities of Clients by Investment Advisers*. The SEC released FAQs about the custody rule, which addresses investment advisers who may also act as an IB, among other topics, and that document is located at www.sec.gov/divisions/investment/custody_faq_030510.htm.

.104 Additionally, the AICPA Investment Companies Expert Panel also issued FAQs regarding the SEC's revised custody rule and guidance for accountants. The summary and FAQs were developed based on a review of the custody rule, the SEC's adopting release, the SEC staff's FAQs, and discussions with the SEC

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

staff. The AICPA's FAQs can be found at www.aicpa.org/InterestAreas/AccountingAndAuditing/Community/InvestmentCompanies/DownloadableDocuments/AICPA_IC_EP_FAQ_custody_rule_August_17.pdf.

.105 For additional information, see chapter 11, "Independent Auditor's Reports and Client Representations," of the AICPA Audit and Accounting Guide *Investment Companies* and the Audit Risk Alert *Investment Companies Industry Developments—2010/11*.

Exclusion From SIPC Membership

.106 Broker-dealers registered with the SEC, with some limited exceptions, are required to be members of the SIPC. The SIPC imposes an assessment upon members to maintain its fund and to repay any borrowings by the SIPC. Beginning April 1, 2009, the SIPC reinstituted an assessment rate of 1 quarter of 1 percent of each member's SIPC net operating revenues.

.107 The AICPA Stockbrokerage and Investment Banking Expert Panel developed an example of an illustrative independent accountants' report on applying agreed-upon procedures related to the entity's claim for exclusion from membership in the SIPC (Form SIPC-3), which is currently being reviewed by the specified parties. Once all parties have agreed, an illustrative example of such report will be posted on the AICPA website at www.aicpa.org/interestareas/accountingandauditing/community/investmentbanking/Pages/StockbrokerageInvestmentBanking.aspx.

Cost-Basis Reporting

.108 Beginning in 2011, broker-dealers and other financial institutions will be required to record and report to the IRS not only cost basis information of the institution's customers' securities but also the adjusted cost basis of any security that is sold. On February 1, 2010, the IRS released *Notice of Proposed Rulemaking and Notice of Public Hearing Basis Reporting by Securities Brokers and Basis Determination for Stock*. The proposed changes to the law, among others

- require brokers, when reporting the sale of securities to the IRS, to include the customer's adjusted basis in the sold securities and to classify any gain or loss as long term or short term.
- alter how taxpayers compute basis when averaging the basis of shares acquired at different prices and expand the ability of taxpayers to compute basis by averaging.
- alter how brokers report short sales of securities.

.109 To prepare for the new rules and reporting requirements, broker-dealers, banks, mutual funds, and other financial entities may be required to make substantial changes to internal operations, such as updating front- and back-office client interfaces, securities files, accounting systems, and reporting platforms. Other potential challenging issues may include the treatment of short sales, wash sales when the taxpayer has multiple brokerage accounts, dividend reinvestment plans, and securities purchased in foreign currencies. Comments on this proposal were due on February 8, 2010. Readers are encouraged to monitor the IRS for additional details regarding this proposal, which can be found in its entirety at www.irs.gov/irb/2010-05_IRB/ar09.html.

SEC Guidance Regarding Auditing, Attestation, and Related Professional Practice Standards Related to Broker-Dealers

.110 On October 1, 2010, the SEC published Release No. 34-62991, *Commission Guidance Regarding Auditing, Attestation, and Related Professional Practice Standards Related to Brokers and Dealers*, to clarify the application of certain SEC rules, regulations, releases, and staff bulletins, in light of the authority granted to the PCAOB in the Dodd-Frank Act. The SEC is considering a rulemaking project to update the audit and related attestation requirements under the federal securities laws for broker-dealers, in light of the Dodd-Frank Act. In addition, the PCAOB has not yet revised its rules, which currently refer only to issuers, to require registered public

accounting firms to comply with PCAOB standards for audits of nonissuer broker-dealers. The SEC release can be found at http://sec.gov/rules/interp/2010/34-62991.pdf.

Flash Orders

.111 The SEC reopened the period for public comment on a proposal to eliminate the flash order exception with respect to listed options under the Exchange Act. In September 2009, the SEC originally proposed to amend the rule to eliminate an exception for flash orders from quoting requirements under the Exchange Act. The exception applies to quotations that are executed immediately after communication or cancelled or withdrawn if not executed immediately after communication. The SEC is reopening the comment period to invite additional comment on the issues specifically related to listed options. The reopened proposal can be found on the SEC website at www.sec.gov/rules/proposed/2010/34-62445fr.pdf.

Risk Management Controls for Brokers-Dealers With Market Access

.112 In January 2009, the SEC proposed for comment new rules under the Exchange Act that would require broker-dealers with access to trading directly on an exchange or alternative trading system (ATS), including those providing sponsored or direct market access to customers or other persons, to implement risk management controls and supervisory procedures reasonably designed to manage the financial, regulatory, and other risks of this business activity. Given the increased speed and automation of trading on securities exchanges and ATSs today and the growing popularity of sponsored or direct market access arrangements in which broker-dealers allow customers to trade in those markets electronically using the broker-dealers' market participant identifiers, the SEC is concerned that the various financial and regulatory risks that arise in connection with such access may not be appropriately and effectively controlled by all broker-dealers. Comments on the proposal, which were due on March 29, 2010, can be found on the SEC website at www.sec.gov/rules/proposed/2010/34-61379.pdf.

Obligation of Broker-Dealers to Conduct Reasonable Investigations in Regulation D Offerings

.113 In Regulatory Notice 10-22, *Obligation of Broker-Dealers to Conduct Reasonable Investigations in Regulation D Offerings*, issued in April 2010, FINRA reminds broker-dealers of their obligation to conduct a reasonable investigation of the issuer and the securities they recommend in offerings made under SEC Regulation D under the Securities Act of 1933—also known as private placements.

.114 This notice describes Regulation D and broker-dealers' regulatory responsibilities to engage in a reasonable investigation of a Regulation D offering, enforceable under the antifraud provisions of the federal securities laws and FINRA rules. It also describes specific issues that pertain to a broker-dealer's responsibilities and how the scope of a broker-dealer's responsibility to conduct a reasonable investigation will necessarily depend upon its affiliation with the issuer, its role in the transaction, and other facts and circumstances of the offering. This notice includes practices that some broker-dealers have adopted to help them perform their reasonable investigation obligations. The notice in its entirety can be found at www.finra.org/web/groups/industry/@ip/@reg/@notice/documents/notices/p121304.pdf.

PCAOB Broker-Dealer Audit Considerations

.115 On July 15, 2010, prior to the finalization of the Dodd-Frank Act, the PCAOB held a meeting with its Standing Advisory Group to discuss broker-dealer audit considerations. Given the PCAOB's new oversight authority over broker-dealer audits, as noted in the "Auditors of Nonpublic Broker-Dealers" section of this alert, they expect to increase, among other things, their headcount, provide specialized training to their staff, and develop a system of accounting support fees. Unlike conventional audits, the SEC requires the audits of broker-dealers to include a review of the accounting system; the internal accounting controls and procedures for safeguarding securities; and the auditor to express an opinion on the computation of net capital, computation for determination of reserve requirements, and compliance with possession and control of customer securities requirements, in addition to the audit of the financial statements. However, the current SEC guidance states that the extent and timing of audit procedures are matters for the independent public

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

accountant to determine on the basis of his or her review and the evaluation of existing internal controls. As such, the SEC's initial observation is that the PCAOB will need to issue or amend standards to provide specific procedures regarding the regulatory reports required by the SEC.

Mortgage Banking

New Department of Housing and Urban Development Requirements for Supervised Mortgagees,[7] Including Financial Institutions, for Financial Statement Audits in Accordance With Government Auditing Standards and Audits of Compliance With Requirements for Department of Housing and Urban Development-Assisted Programs

.116 The U.S. Department of Housing and Urban Development (HUD) issued notice of a Federal Housing Administration (FHA) program change as a result of Mortgagee Letter 2009-31, *Strengthening Counterparty Risk Management*, issued September 18, 2009 (and available at www.hud.gov/offices/adm/hudclips/letters/mortgagee/files/09-31ml.doc). This policy change affects all supervised mortgagees. Effective for fiscal years ending on or after January 1, 2010, all supervised mortgagees, including financial institutions, must submit annual audited financial statements to HUD within 90 days of their fiscal year-end. Additionally, a new requirement exists for a separate compliance audit. Previously, these requirements only applied to nonsupervised mortgagees (for example, a separate mortgage company).

.117 Certain questions have arisen regarding the application of existing HUD guidance to supervised mortgagees, an issue the AICPA is still pursuing with HUD. Upon gaining clarification from HUD, the AICPA will provide additional guidance to auditors in this area. In the meantime, some of what is included subsequently is based on assumptions and could change with clarification from HUD.

HUD Audit Requirements

.118 The mortgagee letter states that audited financial statements must be submitted in accordance with the HUD *Mortgagee Approval Handbook* and prepared and audited in accordance with HUD's Office of the Inspector General's most recent *Consolidated Audit Guide for Audits of HUD Programs* (audit guide). The HUD audit guide is available at www.hud.gov/offices/oig/reports/auditguide. At this time, HUD has not formally amended the HUD audit guide to refer to supervised mortgagees. Until HUD issues guidance clarifying this point or modifies the HUD audit guide to directly address supervised mortgagees, some auditors are assuming that chapter 7, "HUD-Approved Title II Nonsupervised Mortgagees and Loan Correspondents Audit Guidance," of the HUD audit guide is the relevant guidance that would apply to supervised mortgagees. HUD has informally confirmed to the AICPA that this is an appropriate course of action. The AICPA has asked HUD to formalize its position in this area through the issuance of clarifying implementation guidance or an update to the HUD audit guide. Additionally, both chapter 1, "General Audit Guidance," and chapter 2, "Reporting Requirements and Sample Reports," of the HUD audit guide apply to these audits.

.119 The HUD audit guide requires the auditor to issue the following reports:

- A report on the financial statements, with the auditor's report on accompanying supplemental information required by HUD
- A combined report on internal control over financial reporting and internal control over compliance for HUD-assisted programs, which is required to identify any significant deficiencies and material weaknesses noted
- A report on compliance with applicable laws and regulations that may have a direct and material effect on each HUD-assisted program, which includes an opinion on compliance

[7] This designation of a supervised mortgagee is limited to financial institutions that are members of the Federal Reserve System and financial institutions whose accounts are insured by the FDIC or the National Credit Union Administration. Examples of supervised mortgagees are banks, savings associations, and credit unions. For additional information, see the *Mortgagee Approval Handbook* on the U.S. Department of Housing and Urban Development website at www.hud.gov/offices/adm/hudclips/handbooks/hsgh/4060.1/index.cfm.

.120 Chapter 2 of the HUD audit guide provides illustrations of the previously described reports and describes additional reports that may be required to be issued in an audit, depending on the facts and circumstances.

.121 The previously described audits must be performed in accordance with generally accepted auditing standards (GAAS) (or PCAOB standards if the entity is an issuer) and the standards for financial audits of the U.S. GAO's *Government Auditing Standards* (GAS) issued by the comptroller general of the United States (and available at www.gao.gov/govaud/ybk01.htm). For financial audits, GAS incorporates the fieldwork and reporting standards of GAAS and the related SASs issued by the AICPA, unless specifically excluded or modified by GAS. Additionally, in conducting audits in accordance with GAS, auditors assume certain responsibilities beyond those of audits performed in accordance with GAAS.

.122 GAS describes ethical principles, establishes general standards, and establishes additional fieldwork and reporting standards beyond those required by GAAS. For example, an auditor must meet the GAS auditor qualifications, including the qualifications relating to independence and continuing professional education (CPE), which in some cases are more restrictive than GAAS. Additionally, the audit organization must meet the quality-control standards of GAS. A number of additional requirements exist. Chapters 1–4 of the AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits* provide additional information on the GAS requirements that might be useful to auditors who are new to this area.

.123 As noted earlier, with regard to the compliance audit component of the new HUD requirements, chapter 7 of the HUD audit guide is the "assumed" primary source of audit guidance until HUD issues clarifying guidance or updates the HUD audit guide to specifically address supervised mortgagees. Auditors are also reminded that the recently issued SAS No. 117, *Compliance Audits* (AICPA, *Professional Standards*, vol. 1, AU sec. 801) (effective for fiscal periods ending on or after June 15, 2010), is applicable to the compliance audit component of these engagements.

New Electronic Submission Requirements and Related Agreed-Upon Procedures Engagement

.124 Financial statements and other financial and compliance data must be submitted electronically through the FHA's Lender Assessment Subsystem (LASS) for FHA review. The responsibility for this electronic submission rests with supervised mortgagees. Auditors are then required to perform a separate agreed-upon procedures engagement related to the electronic filing, which should be performed under AT section 201, *Agreed-Upon Procedures Engagements* (AICPA, *Professional Standards*, vol. 1). The LASS User Manual (available at http://hud.gov/offices/hsg/sfh/lass/lass_usermanual.cfm) contains information that auditors will need to navigate the process. Of particular interest are the sections that provide instructions for auditors to obtain their user ID or registration information and the auditor's procedures.

.125 Section 7-4(B) of the HUD audit guide notes the following:

> The LASS templates only require the financial information of the approved mortgagee and not the consolidated entity. However, HUD will accept the audits of the consolidated financial statements of the parent if it includes consolidating schedules, audited by the auditor, which distinguish the balance sheet, operating statement and computation of adjusted net worth of the mortgagee/loan correspondent subject to the HUD audit requirement. These amounts are the amounts entered into LASS. The consolidating schedules must be subjected to the auditing procedures applied to the consolidated statement of the parent, and the auditor's opinion must cover the financial statement accounts of the subsidiary.

.126 It is unclear from this guidance whether the consolidating schedules are subject to audit at the entity level or subject only to AU section 551A, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1) (see the "Supplementary and Other Information Related to Financial Statements" section in this alert). Additionally, the LASS templates used to make the electronic submissions have not been formatted to reflect the typical financial statement presentation of supervised mortgagees, including an unclassified balance sheet. Again, the AICPA is working with HUD to gain clarity on both of these issues.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.127 IDIs with $500 million or more in total assets that are subject to Section 36 of the FDI Act and its implementing regulation, 12 CFR 363, are required to file a Part 363 Annual Report that includes audited comparative annual financial statements; the independent public accountant's report thereon; a management report; and, if applicable, an independent public accountant's attestation report on management's assessment concerning the institution's internal control structure and procedures for financial reporting. These institutions are also required to file a copy of any management letter or other report issued by their independent public accountant with respect to the institution and the services provided by the independent public accountant. Institution management should review the filing requirements of 12 CFR 363 to determine whether the aforementioned reports filed with HUD should be filed as part of the institution's Part 363 Annual Report or other report in accordance with 12 CFR 363. Additionally, IDIs with less than $500 million in total assets should also consider the need to file the HUD reports with the FDIC; their primary federal regulator if it is not the FDIC; and any state authority, as required by FDIC FIL-96-99, *Interagency Policy Statement on External Auditing Programs of Banks and Savings Associations*, which can be found at www.fdic.gov/news/news/financial/1999/fil9996.html.

Commodities

.128 Global futures and options contract trading volume increased when comparing the first 6 months of 2010 with the same period in 2009. In the first 6 months of 2010, volume traded on U.S. futures exchanges amounted to 3.6 billion contracts, a 16 percent increase from the same period in 2009. Volume traded on foreign exchanges amounted to 7.6 billion contracts in the first six months of 2010. Trading volume in interest rate and equity products continued to account for more than half of worldwide trading volume.

.129 The total amounts required under CFTC regulations to be held in segregated or secured accounts on behalf of FCM customers decreased by $8 billion, from approximately $175 billion as of June 30, 2009, to approximately $167 billion as of June 30, 2010.

Off-Exchange Retail Foreign Currency Transactions

.130 The CFTC issued final regulations concerning off-exchange retail foreign currency transactions, effective October 18, 2010. The rules implement provisions of the Dodd-Frank Act and the Food, Conservation, and Energy Act of 2008, which, together, provide the CFTC with broad authority to register and regulate entities wishing to serve as counterparties to, or to intermediate, retail foreign exchange (forex) transactions.

.131 The final forex rules put in place requirements for, among other things, registration, disclosure, recordkeeping, financial reporting, minimum capital, and other business conduct and operational standards. Specifically, the regulations require

- counterparties offering retail foreign currency contracts as either FCMs or retail foreign exchange dealers (RFEDs), a new category of registrant, to be registered.
- persons who solicit orders, exercise discretionary trading authority, or operate pools with respect to retail forex to register as IBs, commodity trading advisers, commodity pool operators (CPOs) (as appropriate), or associated persons of such entities.
- otherwise regulated entities, such as U.S. financial institutions and SEC-registered broker-dealers, to serve as counterparties in such transactions under the oversight of their primary regulators.
- FCMs and RFEDs to maintain net capital of $20 million plus 5 percent of the amount, if any, by which liabilities to retail forex customers exceed $10 million.
- leverage in retail forex customer accounts to be subject to a security deposit requirement to be set by the National Futures Association (NFA), within limits provided by the CFTC.
- all retail forex counterparties and intermediaries to distribute forex-specific risk disclosure statements to customers and to comply with comprehensive recordkeeping and reporting requirements.

.132 The final rule can be found in the *Federal Register* at www.federalregister.gov/articles/2010/09/10/2010-21729/regulation-of-offexchange-retail-foreign-exchange-transactions-and-intermediaries#p-3.

Minimum Adjusted Net Capital Requirements of FCMs and IBs

.133 Effective as of March 31, 2010, the CFTC revised financial requirements for FCMs and IBs. The revised requirements affect FCM financial requirements as follows:

- Increase the minimum dollar capital requirement to $1 million
- Increase the risk-based capital requirement for noncustomer accounts from 4 percent to 8 percent of the total risk margin requirement for positions carried in noncustomer accounts
- Include cleared OTC derivative positions in an FCM's risk-based capital calculation for customer and noncustomer accounts

.134 The CFTC also revised the financial requirements for IBs by increasing the net capital requirement from $30,000 to $45,000. The CFTC's increase to the IB minimum capital requirement brings it to the same level currently required under section 5, "Introducing Broker Financial Requirements," of the *NFA Manual*. The final rule can be found at www.cftc.gov/LawRegulation/FederalRegister/FinalRules/e9-31058.html.

Exemption From Certain CFTC Regulations

.135 In May 2010, the CFTC published an informational and guidance document regarding the application procedure pursuant to CFTC Regulation 30.10, which generally provides that persons located and doing business outside the United States, and who are subject to a comparable regulatory framework in the country in which they are located, may qualify for an exemption from the application of certain CFTC regulations, including relief from registration as an FCM. For more information, please refer to www.cftc.gov/International/ForeignMarketsandProducts/index.htm. Appendix A, "Interpretive Statement With Respect to the Commission's Exemptive Authority Under 30.10 of Its Rules," of Part 30 of the CFTC's regulations generally outlines the procedure for a foreign regulator or self-regulatory organization seeking to obtain relief on behalf of a foreign broker subject to its oversight. As the operating division responsible for evaluating applications pursuant to Regulation 30.10, the Division of Clearing and Intermediary Oversight (DCIO) prepared and published a more detailed description of the information set forth in appendix A. In particular, the guidance is intended to streamline the application process by informing prospective Regulation 30.10 applicants of the information generally requested by the DCIO when evaluating applications for Regulation 30.10 relief.

CPO Reporting

.136 The CFTC amended its regulations governing the periodic account statements that CPOs are required to provide to commodity pool participants and, effective for 2009, the annual financial reports that CPOs are required to provide to commodity pool participants and file with the NFA. The amendments became effective December 9, 2009, and changes that affect annual reporting requirements were applicable to commodity pool annual reports for fiscal years ending December 31, 2009, and later. The amendments

- specify detailed information that must be included in the periodic account statements and annual reports for certain commodity pools with more than one series or class of ownership interest.
- clarify that the periodic account statements must disclose either the net asset value (NAV) per outstanding participation unit in the pool or the total value of a participant's interest or share in the pool.
- extend the time period for filing and distributing annual reports of commodity pools that invest in other funds.
- codify existing CFTC staff interpretations regarding the proper accounting treatment and financial statement presentation of certain income and expense items in the periodic account statements and annual reports.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- streamline the final reporting requirements for pools ceasing operation.
- establish conditions for the use of International Financial Reporting Standards (IFRSs) in lieu of U.S. generally accepted accounting principles (GAAP) and a notice procedure for CPOs to claim such relief.
- clarify and update several other requirements for periodic and annual reports prepared and distributed by CPOs.

The CFTC Annual "Dear CPO" Letter

.137 On January 21, 2010, the CFTC staff issued its annual letter to CPOs outlining key reporting issues and common reporting deficiencies found in annual financial reports for commodity pools. The CFTC anticipates issuing a similar letter in January 2011. The letter emphasizes the CFTC staff's concerns and, accordingly, may alert the auditor to high-risk issues that could affect assertions contained in the financial statements of commodity pools. The CFTC staff also suggests that CPOs share the letter with their independent auditors. Major concerns addressed in the letter include the following:

- Filing procedures and due dates of commodity pool financial filings
- Master-feeder and fund of funds
- Requests for limited relief from U.S. GAAP compliance for certain offshore commodity pools
- CPOs claiming exemption under CFTC Regulation 4.13
- Reports of liquidating pools
- Reports of series funds structured with a limitation on liability among the different series
- Accounting developments, including the following:
    - — FASB *Accounting Standards Codification*™ (ASC)
    - — Disclosures about derivative instruments
    - — AICPA Practice Aid *Audits of Futures Commissions Merchants, Introducing Brokers, and Commodity Pools*
    - — AICPA audit risk alerts
    - — FASB ASC 820, *Fair Value Measurements and Disclosures*
    - — Alternative investments audit and accounting considerations
    - — AICPA Technical Questions and Answers (TIS) section 6910.23, "Accounting Treatment of Offering Costs Incurred by Investment Partnerships" (AICPA, *Technical Practice Aids*)

.138 The CFTC has issued similar letters in prior years, which are available at the CFTC's website. Those letters should be consulted with respect to commodity pool annual financial statements and reporting. Readers are encouraged to view the full text of this letter at www.cftc.gov/ucm/groups/public/@iointermediaries/documents/file/cpoannualguidanceletter2009.pdf and monitor the CFTC website for the most recent guidance.

.139 Auditors may also consider additional CFTC guidance related to auditing regulatory supplementary schedules, maintaining minimum financial requirements and notification requirements, segregation of customer funds in multiple currencies, and foreign exchange transactions. Readers may refer to the Audit Risk Alert *Financial Institutions Industry Developments: Including Depository and Lending Institutions and Brokers and Dealers in Securities—2009* or the CFTC website at www.cftc.gov for additional details.

Depository Acknowledgement Letters

.140 In August 2010, the CFTC proposed amending Regulations 1.20, 1.26, and 30.7 concerning the acknowledgment letters that an FCM or derivatives clearing organization must obtain from any depository holding its segregated customer funds or funds of foreign futures or foreign options customers. The proposal sets out standard template acknowledgment letters that reaffirm and clarify the obligations that depositories incur when accepting segregated customer funds. For additional information, readers can find the press release at www.cftc.gov/PressRoom/PressReleases/pr5869-10.html.

Investment of Funds Deposited With Clearing Organizations and FCMs

.141 In 2009, the CFTC issued an advance notice of proposed rulemaking seeking public comment on possible changes to its regulations regarding the investment of customer funds segregated pursuant to Section 4d of the Commodity Exchange Act and funds held in an account subject to CFTC Regulation 30.7. Comment letters received have been analyzed, and a formal proposal is being circulated for CFTC approval.

The Dodd-Frank Act

.142 On July 21, 2010, the CFTC released the list of 30 areas of rulemaking to implement the Dodd-Frank Act. Some of these areas will require only 1 rule, but others may require more. The CFTC is required to complete these rules generally in 360 days, though some are required to be completed within 90, 180, or 270 days.

.143 The rule-writing areas have been divided into eight groups: Comprehensive Regulation of Swap Dealers & Major Swap Participants, Clearing, Trading, Data, Particular Products, Enforcement, Position Limits, and Other Titles.

.144 The CFTC is requesting input from the public on each of the rule-writing areas. Instructions for submitting views can be accessed on the individual rule-writing pages on the CFTC's website at www.cftc.gov/LawRegulation/OTCDerivatives/.

Agreed-Upon Procedures Report

.145 The CFTC staff is developing, in conjunction with industry and independent auditors, an agreed-upon procedures report for the segregation and secured amount schedules included in an FCM's annual audited financial report. The report is designed to provide greater assurance that FCMs are complying with the regulatory requirements surrounding the segregation and secured computations that are included in the annual report.

Commodity Pools

.146 The NFA adopted compliance rules applicable to CPOs as follows:

- Rule 2-45, "Prohibition of Loans by Commodity Pools to CPOs and Related Entities," prohibits a CPO from permitting a commodity pool to use any means to make a direct or indirect loan or advance of pool assets to the CPO or any other affiliated person or entity.
- Rule 2-46, "CPO Quarterly Reporting Requirements," effective for the quarter ended March 31, 2010, requires each CPO member to file certain information on a quarterly basis to the NFA, using the NFA's EasyFile System, for each pool it operates that has a reporting requirement under CFTC Regulation 4.22 (which includes exempt pools under CFTC Regulation 4.7). Within 45 days after the end of each quarterly reporting period CPOs must report the following:
    - — The identity of the pool's administrator, carry broker(s), trading manager(s), and custodian(s)
    - — A statement of changes in NAV for the quarterly reporting period

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

— Monthly performance for the three months comprising the quarterly reporting period

— A schedule of investments identifying any investment that exceeds 10 percent of the pool's NAV at the end of the quarterly reporting period

Foreign Currency Exchange Transactions

.147 Effective October 1, 2010, the NFA amended Section 11(b)–(c) of the "Financial Requirements" section of the *NFA Manual* and its related Interpretive Notice 9053, *Forex Transaction* (www.nfa.futures.org/nfamanual/NFAManual.aspx?RuleID=9053&Section=9), to remove regulated foreign equivalents from the kinds of entities considered suitable locations for assets to be considered current for purposes of determining a Forex Dealer Member's (FDM's) adjusted net capital or to cover its currency positions. Therefore, FDMs will no longer be able to treat assets held at regulated foreign equivalents of such exempt entities as current.

.148 Notwithstanding this, the amendments will continue to permit the NFA to approve the use of certain foreign equivalent entities that are appropriately regulated and capitalized. Section (C)(3) of the related Interpretive Notice 9053 lists the factors that the NFA considers when determining whether to approve an otherwise unregulated entity for the purposes of Section 11(b)–(c).

Other Legislative and Regulatory Developments

The Health Care and Education Reconciliation Act of 2010 and the Patient Protection and Affordable Care Act

.149 In March 2010, the president signed into law a sweeping overhaul of the health care system. Almost everyone in the United States will be affected by these changes—individuals, insurance companies, health care providers, and employers. The three primary goals of the reform are to expand coverage to those without health insurance, reform the delivery system of benefits to improve quality, and decrease the costs of providing health care. The various provisions of the reform will become effective over time, through 2020. The new laws contain many changes for employers to consider for financial reporting purposes, in addition to many new tax rules to help offset the overall cost of the reform.

.150 The complete changes are contained in two acts. The Health Care and Education Reconciliation Act of 2010 was signed on March 30 and is a reconciliation bill that amends the Patient Protection and Affordable Care Act signed into law by the president one week earlier. In April, the SEC issued a staff announcement, *Accounting for the Health Care and Education Reconciliation Act of 2010 and the Patient Protection and Affordable Care Act*, to address questions that have arisen about the effect, if any, that the different signing dates might have on accounting for the two acts. This timing difference, related solely to the signing dates, should not have an impact on a majority of registrants because the acts were both signed within a relatively short time period, which for the vast majority of entities, falls into the same reporting period. However, there may be a limited number of registrants with a period-end that falls between the signing dates for which the timing difference could raise questions about whether the different signing dates have an accounting impact.

.151 After consultation with the FASB staff, the SEC's Office of the Chief Accountant would not object to a view that the two acts should be considered together for accounting purposes. That is, in this specific fact pattern, the SEC staff would not object to a registrant incorporating the effects of the Health Care and Education Reconciliation Act of 2010 when accounting for the Patient Protection and Affordable Care Act. This view is based in part on the SEC staff's understanding that the two acts, when taken together, represent the current health care reform as passed by Congress and signed by the president. The SEC staff does not believe that it would be appropriate to analogize to this view in any other fact patterns.

Significant Accounting and Tax Considerations of the Health Care and Education Reconciliation Act of 2010

.152 FASB ASC 740-10-30-2 states that the following basic requirements are applied to the measurement of current and deferred income taxes at the date of the financial statements:

- The measurement of current and deferred tax liabilities and assets is based on provisions of the enacted tax law; the effects of future changes in tax laws or rates are not anticipated.
- The measurement of deferred tax assets is reduced, if necessary, by the amount of any tax benefits that, based on available evidence, are not expected to be realized.

.153 FASB ASC 715-60-35-102 further explains that benefit coverage for medical claims by governmental programs or other providers of health care benefits should be assumed to continue as provided by the present law and other providers, pursuant to their present plans. Consistent with FASB ASC guidance, presently enacted changes in the law or amendments of the plans of other health care providers that take effect in future periods and that will affect the future level of their benefit coverage should be considered in current period measurements for benefits expected to be provided in those future periods. Future changes in laws concerning medical costs covered by governmental programs and future changes in the plans of other providers should not be anticipated.

.154 Accounting considerations resulting from this reform include the effects of the tax law changes on deferred income tax balances and other postretirement health benefits. One of the most significant changes relates to the government subsidy for providing qualifying prescription drug coverage to Medicare-eligible individuals that will no longer be deductible. The subsidy that certain employers are entitled to receive was created by the Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003. Under the MMA, employers that sponsor retiree health benefit plans and provide a benefit at least actuarially equivalent to Medicare Part D were eligible to receive a subsidy known as the retirement drug subsidy. These subsidy payments were not subject to income taxes. Under the new law, an entity's tax deduction is reduced by the subsidy for years beginning after December 31, 2012. Under income tax accounting rules, the impact on deferred tax assets is required to be adjusted in the period the MMA was signed into law, which, in this case, is the period ended March 31, 2010. Specifically, entities will need to reduce their income tax deduction for providing prescription drug coverage by the subsidy received from the government. In turn, they will record a charge to earnings to write off a portion of their deferred tax assets related to postretirement health care obligations. Such deferred tax assets were based on the gross liability amount. Because the tax deductible prescription drug costs liability will be reduced by the subsidy, the deferred tax asset will be computed net of the subsidy, resulting in a lower deferred tax asset. The federal subsidy will not reduce the tax deductions until 2013. Even though the changes may not be effective until future periods, the effects are accounted for in the period that includes the enactment date. FASB ASC 715-60 discusses accounting and reporting guidance for other postretirement plans, including the Medicare prescription drug plan. Many public entities have already posted large noncash charges in early 2010 related to the nondeductibility of the subsidy.

.155 Some of the other provisions of the reform that may affect an entity's tax position include the nondeductible pharmaceuticals fee, the medical device excise tax, and the therapeutic discovery project tax credit, which will have an effect on the pharmaceutical and medical device industries. Additionally, employer group health plans may not impose lifetime limits and can only impose "restricted" annual limits beginning with the 2011 plan year (for calendar year plans); no annual limits would be permitted beginning in 2014. Because these health benefits can no longer be limited, entities may need to increase accruals for future medical obligations. Many small businesses and tax-exempt organizations that provide health insurance coverage to their employees will now qualify for a special tax credit that is designed to encourage small employers to offer health care coverage for the first time or maintain the coverage they have.

.156 Lastly, under the new reform, a 40 percent penalty will apply to tax understatements attributable to transactions lacking economic substance (20 percent with adequate disclosure) or failing to meet the requirements of any similar rule of law. A transaction is treated as having economic substance only if the transaction

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

changes in a meaningful way (apart from federal income tax effects) the taxpayer's economic position, and the taxpayer has a substantial purpose (apart from federal income tax effects) for entering into the transaction.

.157 The full text of these acts can be found at http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_laws&docid=f:publ152.111.pdf and http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_public_laws&docid=f:publ148.111.pdf. Readers are also encouraged to refer to the Audit Risk Alerts *Health Care Entities—2010/11* (product no. 0223410) and *Not-for-Profit Entities—2010* (product no. 0224210).

PCAOB Constitutionality

.158 On June 28, 2010, the Supreme Court ruled in a lawsuit challenging the constitutionality of the PCAOB. When the PCAOB was set up under SOX, its board members were appointed by the SEC and could be removed only for cause. The Supreme Court ruled, in a 5-4 vote, that although the manner in which the PCAOB was constituted was constitutionally invalid, SOX itself was not invalidated. Rather, the Supreme Court severed from the rest of SOX the provisions relating to the removal of PCAOB board members. The consequence of the Supreme Court's decision is that PCAOB board members will now be removable by the SEC at will, instead of only for good cause. Essentially, this decision has no material impact on the workings of the PCAOB, and all PCAOB programs will continue to operate as usual, including registration, enforcement, and standard-setting activities.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.159 The recent economic conditions and regulatory actions described in this alert may cause additional risk factors that had not previously existed or did not have a material effect on audit clients. Some risks that may affect an entity in the current economic environment are as follows:

- Marginally achieving explicitly stated strategic objectives
- Weak real estate and business markets that may result in significant loan losses
- Continued measurement uncertainty, including accounting estimates and fair value measurements
- Potentially erroneous or fraudulent activity due to decreased staffing and resurgence of business activity
- Potentially fraudulent financial reporting due to low capital levels and the threat that the institution may fail
- The continuing evolution of the postrecessionary marketplace
- Violation of debt covenants, including accounting for modifications as well as appropriate disclosures
- Tight interest spreads
- Continued elevated levels of mortgage modifications and loan restructurings
- Substantial doubt about an entity's ability to continue as a going concern

.160 Although many of these risks are not new to businesses, consideration of the ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks that might give rise to material misstatements. As noted in paragraph .17 of AU section 312, some possible audit responses to significant risks of material misstatement include increasing the extent of audit procedures, performing procedures closer to year-end, or increasing audit procedures to obtain more persuasive evidence. Additionally, given the constantly changing status of economic conditions that could affect your client, auditors may consider changes in the environment throughout the audit and potentially modify audit procedures to ensure that risks are adequately addressed.

.161 Although it is impossible to predict and include all accounting, auditing, and attestation issues that may affect your engagements, we cover in this alert the primary areas of concern. Continue to remain alert to economic, legislative, and regulatory developments, as well as the associated accounting, auditing, and attestation issues as you perform your engagements.

PCAOB Observations Related to Audit Risk Areas Affected by the Economic Crisis

.162 In September 2010, the PCAOB released *Report on Observations of PCAOB Inspectors Related to Audit Risk Areas Affected by the Economic Crisis*. This report was issued to discuss the audit risks and challenges that resulted from the economic crisis that the PCAOB identified through its inspection program. This report covers inspections from the 2007–09 inspection cycles, which generally involved reviews of audits of issuers' fiscal years ending in 2006–08. The PCAOB's inspections covered by this report focused on audits of issuers in industries affected by the economic crisis. Thus, the PCAOB paid particular attention to audits of financial institutions industry issuers, including the larger financial institution audit clients.

.163 Heightened risk factors identified by the PCAOB that are of importance to financial institutions include fair value measurements, asset impairments, allowance for loan losses (ALL), and the consideration of an issuer's ability to continue as a going concern.

Fair Value Measurements

.164 The economic crisis increased uncertainty around fair value measurements, which significantly increased audit risk. Failing to properly test issuers' fair value measurements and disclosures may lead to the auditor not detecting a material misstatement in issuers' financial statements, which may cause investors to be misled.

.165 Firms inspected by the PCAOB tested issuers' estimates of fair value of financial instruments by performing procedures that included evaluating the reasonableness of the issuer's significant assumptions and testing the valuation model and the underlying data. Deficiencies observed in audits of these tests included firms' failures to

- evaluate, or evaluate sufficiently, whether fair value measurements were determined using appropriate valuation methods.
- test, or adequately test, controls over issuers' valuation processes.
- evaluate, or evaluate sufficiently, the reasonableness of management's significant assumptions. Examples of this include not performing tests beyond inquiries of management; not appropriately evaluating the reasonableness of assumptions such as discount rates, credit loss expectations, and prepayment assumptions; and not involving a valuation specialist, when appropriate.
- evaluate available evidence that was inconsistent with issuers' fair value estimates.

.166 Alternatively, some firms evaluated issuers' estimates of fair value of financial instruments by developing an independent expectation of fair value. Firms often used external pricing services or external valuation specialists to make this evaluation. Deficiencies of the firms observed in this situation included failing to understand the methods or assumptions used by these external parties and failing to evaluate significant differences between the independent estimates used or developed by firms and the fair values recorded by issuers.

.167 Further, firms sometimes failed to test, or test sufficiently, significant, difficult-to-value securities (for example, limiting their testing to inquiries of issuer personnel). Firms also failed to perform sufficient procedures in light of the volatile market conditions to provide a reasonable basis for extending to year-end the conclusions regarding the valuation of investment securities that were reached at an interim date. There were also instances in which firms failed to perform sufficient tests to determine whether issuers' fair value disclosures were in conformity with the requirements of FASB ASC 820.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

Impairment of Goodwill, Indefinite-Lived Intangible Assets, and Other Long-Lived Assets

.168 Inspectors observed instances in which firms failed to challenge issuers' conclusions that goodwill did not need to be tested for impairment more frequently than annually despite the existence of impairment indicators, such as recent declines in issuers' stock prices or reduced estimates of future income in situations when such declines or reductions appeared to be potentially significant to issuers' most recent impairment analyses. In addition, inspectors observed that firms sometimes failed to test, or test appropriately, issuers' assessments that other indefinite-lived intangible assets or other long-lived assets were not impaired. In some cases, firms failed to evaluate the reasonableness of certain significant assumptions used by issuers in their impairment assessments.

Allowance for Loan Losses

.169 To audit an estimate, auditors should first gain an understanding of how management developed the accounting estimate and then perform one or a combination of the following: (*a*) review and test the process management used to develop the estimate, (*b*) develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate, or (*c*) review subsequent events or transactions occurring prior to the date of the auditor's report.

.170 PCAOB inspectors identified deficiencies related to procedures performed to evaluate the reasonableness of the ALL. These deficiencies included firms' failures to

- sufficiently test issuers' specific reserves on impaired loans. For example, firms sometimes failed to (*a*) sufficiently test issuers' conclusions regarding the identification and measurement of impaired loans, (*b*) perform procedures to establish a basis for relying on the work of certain issuer personnel, and (*c*) understand the methods and assumptions used by external parties engaged by issuers to perform appraisals of collateral underlying impaired loans.
- evaluate, or evaluate sufficiently, the effect on ALL of deficiencies identified in management's process and failure to alter the nature, timing, and extent of the testing of ALL in light of the identified deficiencies.
- evaluate, or evaluate sufficiently, the reasonableness of management's significant assumptions used to develop ALL, including assumptions about the nature or size of qualitative adjustments. For example, firms failed to evaluate the reasonableness of loss factors or other assumptions used to estimate ALL that were not directionally consistent with negative credit quality trends in loan portfolio performance or significant adverse conditions in the economic environment.
- test, or test sufficiently, the data underlying management's calculation of ALL. Specifically, firms sometimes failed to test, or test sufficiently, the completeness and accuracy of the data in system-generated or manually prepared reports used to develop ALL. These reports often formed the basis for significant inputs for the calculation of ALL, such as loan delinquency data, credit score information, value of loan collateral, and internally developed loan ratings.

.171 In other cases, firms evaluated the reasonableness of issuers' ALL by developing an independent expectation of ALL. When this approach was used, inspectors noted instances in which firms failed to obtain evidence to support the assumptions they used or failed to test the completeness and accuracy of the issuer's data used by the firm in developing the independent expectation.

Off-Balance Sheet Structures

.172 Inspectors observed deficiencies in firms' audit procedures related to off-balance sheet structures. Specifically, inspectors noted instances in which firms failed to (*a*) sufficiently test issuers' transactions with external parties or special purpose entities to determine whether such transactions were appropriately accounted for as off-balance sheet arrangements and (*b*) test the ongoing compliance with accounting requirements for certain off-balance sheet arrangements, including performing tests for the occurrence of events that would affect the accounting for these arrangements.

Other-Than-Temporary Impairment of Certain Investments

.173 Inspectors observed instances in which firms failed to adequately evaluate issuers' conclusions that a decline in the fair value of securities was not other than temporary. In these instances, inspection teams observed deficiencies that included firms' failures to

- evaluate, beyond inquiries of management, certain significant assumptions underlying issuers' assessments that investments in debt and equity securities were not other-than-temporarily impaired for significant classes of securities, including securities for which fair value had been below cost for a period greater than 12 months.
- evaluate issuers' assertions regarding their intent and ability to hold securities for a period of time sufficient to allow for any anticipated recovery in fair value.
- consider contradictory evidence, such as sales of securities or contractual agreements, that would call into question whether issuers had the intent and ability to hold the investment until recovery.

Conclusions

.174 The observations from this report will serve to inform future PCAOB actions in connection with certain inspection, enforcement, and standard-setting activities, and consideration will be given to whether additional guidance is needed relating to existing standards. The report can be accessed at http://pcaobus.org/Inspections/Documents/4010_Report_Economic_Crisis.pdf.

An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements: Auditing Interpretations of AT Section 501

.175 For IDIs, Interpretation No. 1, "Reporting Under Section 112 of the Federal Deposit Insurance Corporation Improvement Act," of AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements* (AICPA, *Professional Standards*, vol. 1, AT sec. 9501 par. .01–.07), addresses whether the auditor can meet the integrated audit requirement when an IDI does not prepare financial statements for external distribution and, if so, how the auditor can report on the effectiveness of the IDI's internal control over financial reporting.

.176 According to 12 CFR 363, an IDI that is a subsidiary of a holding company may use the consolidated holding company's financial statements to satisfy the audited financial statements requirement of 12 CFR 363, provided that certain criteria are met. For some IDIs, however, an examination of internal control over financial reporting is required at the IDI level.

.177 For IDIs that require an examination of internal control at the IDI level and the IDI does not prepare financial statements for external distribution, the auditor is, nevertheless, required by paragraph .41 of AT section 501 to evaluate the IDI's period-end financial reporting process. This process includes, among other things, the IDI's procedures for preparing financial information for purposes of the consolidated holding company's financial statements, which are prepared in accordance with U.S. GAAP, and the schedules equivalent to the basic financial statements that are included in the IDI's appropriate regulatory report.

.178 The illustrative reports in exhibit A, "Illustrative Reports," of AT section 501 may be used to report on the effectiveness of the IDI's internal control over financial reporting. This interpretation includes an illustrative definition paragraph that may be used when an IDI that is not subject to SOX elects to report on controls for FDICI Act purposes at the IDI level, and the IDI uses the consolidated holding company's financial statements to satisfy the audited financial statements requirement of 12 CFR 363.

.179 The interpretation in its entirety can be found at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AudAttest/AudAttestGuidance/DownloadableDocuments/FINAL_AT9501_Interpret_No_1.pdf.

PCAOB Auditing Standards on Risk Assessment

.180 In August 2010, the PCAOB adopted a suite of eight auditing standards related to the auditor's assessment of, and response to, risk in an audit. These standards were initially proposed in late 2008 and reproposed in late 2009. These risk assessment standards are intended to benefit investors by setting forth requirements that the PCAOB believes will enhance the effectiveness of the auditor's assessment of, and response to, the risks of material misstatement in the financial statements. They apply to audit procedures spanning from the initial planning stages of the audit to the evaluation of the audit results. Changes in the risk assessment standards are intended to enhance integration of the audit of financial statements with the audit of internal control over financial reporting by articulating a process for identifying and assessing risks of material misstatements that apply to both portions of the integrated audit.

.181 The new auditing standards, with a brief description of each, are as follows:

- Auditing Standard No. 8, *Audit Risk*, discusses the auditor's consideration of audit risk in both an integrated audit and an audit of financial statements only. It describes the components of audit risk and the auditor's responsibilities for reducing it to an appropriately low level.
- Auditing Standard No. 9, *Audit Planning*, establishes requirements for planning an audit, such as assessing important matters and establishing an appropriate audit strategy.
- Auditing Standard No. 10, *Supervision of the Audit Engagement*, applies to the engagement partner and other team members who supervise during the audit. It sets forth requirements for supervision of the audit engagement and the work of other engagement members. Related to this topic, the PCAOB also recently issued a release discussing the SOX provision that authorizes the PCAOB to impose sanctions on registered public accounting firms and their supervisory personnel for failing to reasonably supervise associated persons.
- Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*, establishes requirements regarding the auditor's consideration of materiality in planning and performing an audit.
- Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, establishes requirements regarding the process of identifying and assessing risks of material misstatement of the financial statements.
- Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, establishes requirements for responding to the identified risks of material misstatement through appropriate overall audit responses and audit procedures.
- Auditing Standard No. 14, *Evaluating Audit Results*, establishes requirements for evaluating audit results and determining whether sufficient appropriate audit evidence was obtained.
- Auditing Standard No. 15, *Audit Evidence*, discusses what constitutes audit evidence and establishes requirements for designing and performing audit procedures to obtain sufficient appropriate audit evidence to support the opinion expressed in the auditor's report.

.182 These risk assessment standards will supersede the following six PCAOB interim standards and related amendments: AU section 311, *Planning and Supervision*; AU section 312, *Audit Risk and Materiality in Conducting an Audit*; AU section 313, *Substantive Tests Prior to the Balance Sheet Date*; AU section 319, *Consideration of Internal Control in a Financial Statement Audit*; AU section 326, *Evidential Matter*; and AU section 431, *Adequacy of Disclosure in Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Interim Standards). The standards, if approved by the SEC, will be effective for audits of fiscal periods beginning on or after December 15, 2010.

.183 In September 2010, the SEC published *Notice of Filing of Proposed Rules on Auditing Standards Related to the Auditor's Assessment of and Response to Risk and Related Amendments to PCAOB Standards* to solicit comments on the proposed rules. This notice was posted in the *Federal Register* on September 27, 2010. Comments were due 21 days from the publication of the notice in the *Federal Register*, and the SEC will take action on the proposed rules 90 days from the publication of the notice in the *Federal Register*.

Engagement Quality Review for Issuers

.184 In January 2010, the PCAOB announced that the SEC had approved Auditing Standard No. 7, *Engagement Quality Review* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards), which was adopted by the PCAOB in July 2009. Auditing Standard No. 7 provides a framework for the engagement quality reviewer to objectively evaluate the significant judgments made and related conclusions reached by the engagement team in forming an overall conclusion about the engagement. The PCAOB expects Auditing Standard No. 7 to increase the likelihood that a registered public accounting firm will catch any significant engagement deficiencies before it issues its audit report. As a result, more work may be necessary under this standard than performed under the existing requirements for concurring partners. However, Auditing Standard No. 7 explains that the procedures required by the engagement quality reviewer are different in nature than those required to be performed by the engagement team. Further, if the engagement quality reviewer deems more work is required before giving approval of issuance, the engagement team is responsible for completing that work.

.185 This standard applies to all audit engagements, and engagements to review interim financial information, conducted pursuant to the standards of the PCAOB, and it supersedes the PCAOB's interim concurring partner review requirement. Auditing Standard No. 7 is effective for engagement quality reviews of audits and interim reviews for fiscal years that began on or after December 15, 2009. For a calendar-year company, this standard is applicable for the quarter ended March 31, 2010. Subsequent to the issuance of Auditing Standard No. 7, the PCAOB issued Staff Question and Answer, *Auditing Standard No. 7, Engagement Quality Review* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 100.10), to provide further implementation guidance on the documentation requirements of the standard. For the full text of the standard and the question and answer, readers are encouraged to visit the PCAOB's website at www.pcaob.org.

Auditing Fair Value Measurements

.186 In addition to understanding the looming questions relative to accounting for fair value measurements, auditors should be aware of audit issues involving fair value measurements. Particular assets, liabilities, and components of equity are measured or disclosed at fair value in the financial statements, and it is management's responsibility to make the fair value measurements and disclosures. When auditing these fair value measurements and disclosures to ensure they are in conformity with U.S. GAAP, auditors should consult AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*).

.187 In regard to analyzing the sufficiency of the audit evidence, the strongest audit evidence to support a fair value is an observable price in an active market. If that is not available, a valuation method should incorporate market-based assumptions that market participants would use in their estimates when that information is available without undue cost and effort. If information about market participant assumptions is not available, management may use its own assumptions, as long as there are no contrary data indicating that market participants would use different assumptions.

.188 The auditor should obtain an understanding of the entity's process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with U.S. GAAP. When obtaining an understanding of the entity's process for determining fair value measurements and disclosures, the auditor considers, for example

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

- controls over the process used to determine fair value measurements.
- the expertise and experience of those persons determining the fair value measurements.
- the extent to which management's process relies on a service organization to provide fair value measurements or the data that supports the measurements.
- the process used to develop and apply management assumptions, including whether management used available market information to develop the assumptions.
- the significant management assumptions used in determining fair values.

.189 According to paragraph .23 of AU section 328, substantive tests of the fair value measurements may involve (*a*) testing management's significant assumptions, the valuation model, and the underlying data; (*b*) developing independent fair value estimates for corroborative purposes; or (*c*) reviewing subsequent events and transactions. Paragraph .26 also notes that when testing the fair value measurements and disclosures, the auditor should evaluate whether management's assumptions are reasonable and reflect, or are not inconsistent with, market information. According to FASB ASC 820, this may include evaluating the following:

- Whether a significant decrease has occurred in the volume and level of activity for the asset or liability when compared with normal market activity, which may include consideration of the number of recent transactions, the date of the most recent price quotes, consistency among price quotes, increases in implied liquidity risk premiums, increases in the bid-ask spread, and the amount of publicly available information.
- Whether the transaction was an orderly transaction, which may include consideration of the seller's financial condition, the counterparty credit position, the exposure to the market during the marketing period, and the actual transaction price.
- The reasonableness of the underlying assumptions, which may include consideration of the use of pricing services, the assumptions used by the pricing service, and the extent of testing required to verify the reasonableness of the prices provided. (For example, the auditor should understand whether the fair value measurement was determined using quoted prices from an active market, observable inputs, or fair value measurements based on a model. If the price is not based on quoted prices from an active market or observable inputs, the auditor should obtain an understanding of the model used by the pricing service and evaluate whether the assumptions are reasonable [see the following section for additional information on pricing services].)
- The reasonableness of the determination within the fair value hierarchy of inputs.

Fair Values of Securities

.190 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, there are some items of note for the auditor. As previously mentioned, quoted market prices in active markets are the best available audit evidence to support fair values; however, when quoted market prices are unavailable and the valuations of securities are obtained from a broker-dealer or another pricing service, the auditor should understand the method used by the broker-dealer or pricing service to estimate the fair value measurement (such as a pricing model, a cash flow projection, or other method). These fair value estimates also may be based on quoted prices from an active market for similar securities or other observable inputs or may be based on valuation models that will be a consideration on the auditor's procedures. The auditor should evaluate the methods and assumptions used by the pricing service to estimate fair value to determine whether those methods and assumptions are consistent with the requirements of U.S. GAAP (as discussed in FASB ASC 820-10-35). The auditor also may determine that it is necessary to obtain quotes from more than one pricing source based on circumstances, such as an existing relationship between the entity and the pricing source, which could inhibit objective pricing, and underlying significant valuation assumptions that are highly subjective. In the context of FASB ASC 820, quoted prices in active markets are considered level 1 inputs.

.191 Substantive testing procedures on management's assertions about fair value determined by a model may include the following:

- Assessing the reasonableness and appropriateness of the model
- Assessing the reasonableness and appropriateness of the assumptions used
- Comparing management's assumptions to observable data such as industry reports or benchmarks
- Calculating the value using a model developed by the auditor or a specialist engaged by the auditor to determine an independent expectation to corroborate the reasonableness of the value calculated by the entity
- Comparing the fair value with subsequent or recent transactions

.192 Whether the inputs to the entity's valuation model are observable determines their characterization as level 2 or level 3 inputs, respectively, within FASB ASC 820-10-35. When extensive judgment is needed, consider using a specialist or refer to AU sections 328 and 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1). Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability, evidence of the collateral also should be examined for existence, fair value, transferability, and the investor's right to the collateral.

.193 Paragraph .19 of AU section 328 also notes that the auditor should evaluate whether the entity's method for determining fair value measurements is applied consistently and, if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity or changes in accounting principles.

.194 The auditor also should evaluate management's conclusions regarding other-than-temporary impairment (OTTI) on its equity and debt securities. Examples of factors that could cause OTTI for equity securities, per paragraph .47 of AU section 332, include the following:

- Fair value is significantly below cost and
  - the decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - the decline has existed for an extended period of time.
  - management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

.195 Auditors should consider all facts and circumstances when determining if an OTTI has occurred. Additionally, certain securities are required to be classified into categories according to management's intent and ability, such as held to maturity. The auditor should obtain an understanding of management's classification process among trading, available for sale, and held to maturity, as well as consider the classifications in light of the entity's current financial position.

.196 The subsequent section, "Auditing Investment Security Credit Impairment" addresses OTTI for debt securities.

Auditing Investment Security Credit Impairment

.197 FASB issued new guidance in 2009 for determining the amount of impairment to record on debt securities when the decline in a security's value represents OTTI. Prior to the recent guidance, the amount of

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

OTTI was determined by writing the security down to fair value through earnings. Under the new guidance, securities with OTTI continue to be written down to fair value through earnings if (*a*) management has the intent to sell or (*b*) it is more likely than not that the company will be required to sell prior to anticipated recovery. If neither of these conditions is true, OTTI instead must be separated into a credit component, which is charged to earnings, and a noncredit component, which is charged to other comprehensive income. Determination of the credit component basically involves forecasting cash flows, discounting those cash flows using the accounting yield, and comparing the present value with the security's carrying amount. The credit component of an OTTI is the excess of the carrying amount over the present value.

.198 Computing the credit component of an OTTI on an investment in a single issuer debt instrument is a rather straightforward analysis and will commonly lead to an all-or-none conclusion. Said differently, if the issuer is expected to fail and the investor is expecting to collect nothing, the entire decline in fair value represents the credit component of an OTTI amount. In contrast, if the issuer is not expected to fail and the investor expects to collect everything it is due, the entire decline in value represents the noncredit component of an OTTI. Other circumstances (for example, the use of probability weighted outcomes or investors agreeing to concessions) will result in both credit and noncredit components.

.199 Computing the credit component of an OTTI for an investment in a securitization is considerably more involved. Referred to as beneficial interests, these securities are backed by the collateral held in a securitization trust. Private label collateralized mortgage obligations (CMOs) and trust-preferred collateralized debt obligation (CDO) are two common examples of investments held by financial institutions for which a complex OTTI calculation may be required. This computation includes the following steps:

- *Cash inflows*. Rather than forecasting the cash flows of a single issuer, cash flows need to be forecasted for the collateral in the trust, which may be as few as 20 or more than 1,000 different assets.
- *Cash outflows*. Once the cash flow assumptions of the underlying collateral have been determined, the next step is to allocate those cash flows to each security class or tranche by period, the process for which is referred to as the cash flow "waterfall." The cash flow "waterfall" computation is based on the legal terms of securitization, which can be found in the prospectus and are often highly complex. Software is available for these computations, but only a limited number of vendors supply it, and the software is typically expensive to obtain.
- *Allocation*. After the cash outflows have been computed for each security class, those cash flows need to be allocated to an investor's ownership of that class. It is important to perform this allocation on an "apples to apples" basis; otherwise, the investor-level cash flows may be overstated or understated.
- *Discounting*. Lastly, the cash flows are discounted using the accounting yield (not coupon) and compared with the carrying amount.

.200 Care should be taken when forecasting and discounting the cash flows when either the underlying collateral or investment securities involve variable rate instruments. The same method with respect to the variable rate index should be used to both forecast and discount cash flows. For example, if the forward curve is used to forecast cash flows, then the same forward curve (or as a practical expedient, the fixed rate equivalent of that curve) should be used as the variable rate index component of the accounting yield for discounting.

.201 The key assumptions to consider in evaluating private label CMOs include the following:

- Voluntary prepayment rate (VPR), which refers to the rate of prepayment for which no loss is expected.
- Default rate (also referred to as constant default rate [CDR]). A default typically leads to foreclosure and sale of the collateral, which is a type of prepayment event. Unlike VPR, a default rate typically has a loss expectation.
- Loss severity upon default.

.202 Note that the combination of VPR and CDR represents the total credit prepayment rate (CPR). Further, some systems have an input field labeled CPR, but for the computation to function correctly, it requires inputting VPR into the CPR field.

.203 The key assumptions to consider in a trust-preferred CDO include the following:

- Specific defaults and default rates
- Interest deferrals and timing
- Recovery rate on deferrals
- Prepayments

.204 Given the complexity of developing assumptions, the cash flow "waterfall," variable rates, and the like, companies will commonly use a third-party expert. Although these computations can be completed in spreadsheets, auditing those spreadsheets against the legal terms of the securitization presents its own challenges such that if the company doesn't engage an expert to perform the computations, the auditor may consider hiring his or her own expert to test the computation.

.205 Other matters to consider include the following:

- Companies should not wait for an event to record OTTI. The determination of the credit component of an OTTI is based on an expected loss model.
- Be sure to seek out and evaluate subsequent events within the underlying collateral when auditing key assumptions.
- Evaluate recurring losses on the same security. Quarter-over-quarter losses suggest a shortcoming in the process of developing assumptions or an error in the mathematical computation.
- Developing assumptions requires the use of judgment. Beyond that, the credit component of an OTTI is primarily a complex mathematical computation.

Auditing Accounting Estimates

.206 As noted in paragraph .04 of AU section 342, the auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements as a whole. Although this alert has discussed fair value measurements at length, it is important to remember many types of accounting estimates exist in financial statements. Some examples include the ALL, loan servicing rights, OTTI of securities, impairment analyses and estimated goodwill and other intangibles and useful lives of long-lived assets, valuation allowance for deferred tax assets, uncertain tax positions, and actuarial assumptions in pension and other postretirement benefit costs.

.207 Given the continuing economic climate, additional skepticism should be exercised when considering management's underlying assumptions used in accounting estimates. When evaluating accounting estimates, the auditor should consider both the subjective and objective factors with professional skepticism. As discussed in paragraph .09 of AU section 342, the auditor normally concentrates on key factors and assumptions that are significant to the accounting estimate, sensitive to variations, deviations from historical patterns, or subjective and susceptible to misstatement and bias.

.208 It is important to consider whether historical patterns are still applicable. For example, in the current market, new patterns may emerge. In this economic climate, with possible increasing pressure on management to meet earnings expectations, the determination of the reasonableness of management's accounting estimates would be made with a heightened level of professional skepticism. As noted by AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), when assessing audit differences between client estimates and audit estimates, even if they are individually reasonable, an auditor should consider whether these differences are indicative of possible bias by management. If so, the auditor should reconsider the estimates as a whole.

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

.209 The auditor should obtain an understanding of how management develops estimates and should employ one of the approaches outlined in paragraph .10 of AU section 342 in testing that process. In reviewing and testing management's process, the auditor may consider identifying controls around this process and determining if the underlying data used for the estimate are reliable and used appropriately. Alternatively, the auditor may develop an estimate and compare it to management's estimate. Lastly, the auditor may review subsequent events or transactions occurring prior to the date of the auditor's report. Further, as noted in AU section 316, hindsight may provide the auditor additional insight into the existence of management bias. For further details on auditing estimates, see AU section 342. The AICPA has released a proposed SAS, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates and Related Disclosures* (Redrafted), on auditing accounting estimates, including fair value. Readers are encouraged to remain alert for developments on this topic.

Using the Work of a Specialist

.210 The auditor may find it necessary to engage a specialist (such as a securities valuation expert) to assist in auditing complex or subjective matters. Examples of matters in which an auditor may engage a specialist are valuation issues; reasonableness of determination of amounts derived from specialized techniques or models; or implementation of technical requirements, regulations, or legal documents. AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), provides guidance to auditors in using specialists. The guidance in AU section 336 is applicable when the specialist is hired by management or if the auditor engages the specialist. However, if a specialist employed by the auditor's firm participates in the audit, AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1), is applicable rather than AU section 336.

.211 When using the work of a specialist, the auditor should evaluate the specialist's professional qualifications, obtain an understanding of the nature of the work performed or to be performed, and evaluate the relationship of the specialist to the client in terms of objectivity. Although the appropriateness and reasonableness of the methods and assumptions employed by the specialist are his or her responsibility, the auditor should obtain an understanding of the methods and assumptions used by the specialist, test the underlying data provided to the specialist, and evaluate the specialist's findings in the context of the audit and related assertions in the financial statements.

Using the Work of Other Auditors and Engaging Assistance From Outside the Firm

.212 In July 2010, the PCAOB issued Staff Audit Practice Alert No. 6, *Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants From Outside the Firm* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400.06), because it observed that a number of registered public accounting firms located in the United States have been issuing audit reports on financial statements filed by issuers that have substantially all of their operations outside of the United States. Auditors of issuers should consult this practice alert for reminders concerning their obligations when using the work of other firms or using assistants engaged from outside the firm, such as in the aforementioned situation.

Auditing Troubled Debt Restructurings

.213 Weakness in the housing market and the rise in foreclosures continue to increase the potential for higher levels of loan restructurings resulting from elevated nonperforming loan levels. An audit risk includes not identifying modifications as troubled debt restructurings, thus leading to inaccurate disclosures and potentially understated impairment measures. The *OCC and OTS Mortgage Metrics Report: Disclosure of National Bank and Federal Thrift Mortgage Loan Data* for the second quarter of 2010 contains trends in mortgage modifications for the most recent quarter and provides performance data on first-lien residential mortgages serviced by national banks and federally regulated thrifts. The report can found at www.occ.treas.gov/ftp/release/2010-112.htm.

Auditing Other Real Estate Owned

.214 Another significant risk factor for depository and lending institutions has been the extensive amount of other real estate (ORE) held by depository and lending institutions. Becoming familiar with the current risks related to ORE, along with the applicable accounting guidance, including guidance applicable to transactions by which these assets are sold and potentially derecognized, is important for auditors of depository and lending institutions. Examples of potential audit risks related to these assets include the following:

- Outdated appraisals
- Appraisals in unstable market conditions
- ORE values inflated to hide loan losses
- Ineffective processes for identifying losses

.215 FASB ASC 310-40 applies to initial measurement of a foreclosed property. At the time of foreclosure, foreclosed property should be recorded at fair value less estimated selling costs, establishing a new cost basis (for example, carrying amount). For subsequent measurement, FASB ASC 360-10-35-43 states that a long-lived asset (disposal group) classified as held for sale should be measured at the lower of its carrying amount or fair value less cost to sell.

.216 FASB ASC 360-20 establishes standards for recognition of profit on all real estate sales transactions, other than retail land sales, without regard to the nature of the seller's business. FASB ASC 360-20-40 presents the real estate derecognition guidance primarily from the perspective of the profit recognition upon a sale.

.217 The sale of foreclosed property may be financed by a loan at less than current market interest rates. In addition, depository and lending institutions may facilitate the sale of foreclosed property by requiring little or no down payment or by offering terms extremely favorable to the buyer. The buyer's initial and continuing investments may be inadequate, and recovery of the cost of the property may not be reasonably assured if the buyer defaults. Additionally, the property's cost may have already been recovered, but collections of additional amounts remain uncertain. In these situations, FASB ASC 360-20-40-31 requires the use of the deposit method or the cost recovery method.

.218 Auditors may consider the following when evaluating sales of foreclosed property:

- Whether each disposition and related financing is evaluated by management to determine whether the conditions have been met to record the transaction using a full accrual method
- For each disposition and related financing, the type of property, the composition and amount of the initial investment, whether the initial investment was funded by the buyer or another source of financing, and the percentage of the receivable to the sales price
- Whether the terms of the sale represent an option to buy the property
- Possible factors affecting collectibility of the receivable
- The length of the financing period, the interest rate, and other terms of the financing arrangement

.219 FASB ASC 360-20-55 provides additional guidance regarding the full accrual method, as well as methods of accounting when the criteria for the full accrual method are not met. FASB ASC 360-20-55-21 includes a decision tree that provides an overview of the major provisions in FASB ASC 360-20 and includes the general requirements for recognizing a sale and all of the profit on a sale of real estate at the date of sale.

.220 Auditors may also consider the following related to the recording, measurement, and derecognition of ORE:

- Whether the other assets owned are measured and reported in accordance with the applicable guidance, including FASB ASC 310, *Receivable*; FASB ASC 360-20; and FASB ASC 820

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- Whether the institution has documented written policies and procedures that may include the following:
  - — Frequency of appraisals and selection and qualifications of appraisers
  - — Disbursement of funds and capitalization of costs
  - — Review and monitoring of marketing efforts
  - — Nature and amount of facilitating financing
  - — Costs to sell
  - — Capitalization of interest
  - — Proper authorizations for specific transactions
  - — Estimation of fair value of real estate assets

.221 Estimates of the fair value of real estate assets are necessary to account for such assets. AU section 328 provides guidance on auditing fair value estimates. Many fair values will be based on valuations by independent appraisers. In applying audit procedures to real estate, the auditor often relies on representations of independent experts, particularly appraisers and construction consultants, to assist in the assessment of real estate values. AU section 336, as previously noted, provides guidance regarding using the work of a specialist. When an appraisal is used as audit evidence, the auditor may

- consider the following to evaluate the professional qualifications of the specialist in determining that the specialist possesses the necessary skill or knowledge in the particular field:
  - — The professional certification, license, or other recognition of the competence of the appraiser
  - — The reputation and standing of the appraiser in the views of peers and others familiar with the appraiser's capability or performance
  - — The appraiser's experience with the particular type of real estate collateral being valued
  - — The appraiser's experience with real estate in the specific geographic location of the collateral
- evaluate the objectivity of the appraiser based on any relationships that the appraiser has with the financial institution.
- obtain an understanding of the methods and assumptions used by the appraiser.
- test the data provided to the appraiser.
- evaluate whether the appraiser's findings support the fair value measurement.

Auditing Repurchase Agreements

.222 Certain repurchase agreements (repo), whether viewed from an accounting, legal, or economic perspective, are extremely complex. Also, the risks involved in repo transactions vary widely, depending on the terms of the agreement, the parties involved, and the legal status of the agreement. The risks faced by an institution entering into a repo are generally reduced if the institution maintains effective controls related to the authorization, processing, and recording of these transactions.

.223 When a smaller financial institution sells securities to a larger financial institution under agreements to repurchase, the agreements may have default provisions that would be considered for disclosure in the financial statements. For example, a common default provision applies when the selling financial institution drops below well capitalized under prompt corrective action provisions. The defaulting institution may be required to pay amounts in excess of the outstanding balance plus accrued interest.

.224 Repurchase agreements (including standard Public Securities Association and International Securities Market Association agreements) and other source documents are usually inspected by management and reviewed by auditors to identify events of default provisions. Management would consider whether an event of default has occurred and whether a liability would be required to be recorded as a result. Management may also consider whether the defaulting institution is liable for any additional costs and, if so, whether the additional cost were accrued. Additional costs may include legal expenses and fees, other expenses, and commissions related to entering into replacement transactions or entering into or terminating hedge transactions incurred by the nondefaulting institution. See the "Regulatory Accounting Issues and Developments" section of this alert for additional information related to repos.

Supplementary and Other Information Related to Financial Statements

.225 In February 2010, the AICPA Auditing Standards Board (ASB) issued a trio of auditing standards related to the auditor's responsibility for other information, supplementary information, and required supplementary information. These three standards supersede AU sections 550A, *Other Information in Documents Containing Audited Financial Statements*; 551A, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*; and 558A, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1). All three standards are effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Other Information in Documents Containing Audited Financial Statements

.226 SAS No. 118, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 550), addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon. In this SAS, *other information* is defined as financial and nonfinancial information (other than the financial statements and the auditor's report thereon) that is included in a document containing audited financial statements and the auditor's report thereon, excluding required supplementary information. *Documents containing audited financial statements* refers to annual reports (or similar documents) that are issued to owners (or similar stakeholders) and annual reports of governments and organizations for charitable or philanthropic purposes that are available to the public that contain audited financial statements and the auditor's report thereon. This SAS establishes the requirement for the auditor to read the other information of which the auditor is aware because the credibility of the audited financial statements may be undermined by material inconsistencies between the audited financial statements and other information. This SAS also may be applied, adapted as necessary in the circumstances, to other documents to which the auditor, at management's request, devotes attention.

Supplementary Information in Relation to the Financial Statements as a Whole

.227 SAS No. 119, *Supplementary Information in Relation to the Financial Statements as a Whole* (AICPA, *Professional Standards*, vol. 1, AU sec. 551), addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. For purposes of GAAS, *supplementary information* is defined as information presented outside the basic financial statements, excluding required supplementary information that is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Such information may be presented in a document containing the audited financial statements or separate from the financial statements. The information covered by this SAS is presented outside the basic financial statements and is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework.

Required Supplementary Information

.228 SAS No. 120, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 558), addresses the auditor's responsibility with respect to *required supplementary information*. The SAS defines *required supplementary information* as information that a designated accounting standard setter requires to accompany an entity's basic financial statements. Required supplementary information is not part of the basic

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

financial statements; however, a designated accounting standard setter considers the information to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. In addition, authoritative guidelines for the methods of measurement and presentation of the information have been established. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the basic financial statements does not cover required supplementary information.

Consideration of an Entity's Ability to Continue as a Going Concern

.229 The consideration of an institution's ability to continue as a going concern is required in every audit performed under GAAS and continues to be an especially important consideration in the current state of the economy. An institution's ability to continue as a going concern is affected by many factors, such as the following:

- The geographic area in which the entity operates
- Credit concentrations in areas such as residential or commercial real estate in particular geographic areas
- The effects of scheduled increases in deposit insurance premiums
- The continued existence of conditions that brought about previous regulatory actions or restrictions
- Exposure to the institution posed by transactions with correspondent banks and related limitations on interbank liabilities
- Noncompliance with laws and regulations
- Supervisory actions or regulatory changes that place limitations or restrictions on operating activities
- The failure to meet minimum regulatory capital requirements
- The classification of the institution under prompt corrective action provisions

.230 As explained by paragraph .02 of AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), the auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at, or have occurred prior to, the date of the auditor's report. Therefore, this is an ongoing evaluation that extends through the date of the auditor's report. AU section 341 notes that this period is not to exceed one year beyond the date of the financial statements being audited. If the auditor believes that a substantial doubt about the entity's ability to continue as a going concern exists, the next steps are to obtain management's plans to mitigate the effect of such conditions and then assess the likelihood that these plans can be implemented effectively.

.231 If, after considering identified conditions and events in the aggregate and after considering management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the auditor should consider the adequacy of disclosure about the entity's possible inability to continue as a going concern for a reasonable period of time and include an explanatory paragraph in the audit report to reflect this conclusion. The auditor should also communicate the following with those charged with governance:

a. The nature of the events or conditions identified

b. The possible effect on the financial statements and the adequacy of related disclosures in the financial statements

c. The effects on the auditor's report

.232 Alternatively, if management's plan mitigates the risk of the entity's inability to continue as a going concern, the auditor should consider the need for management to disclose the primary conditions that gave rise to the initial doubt and management's plans. These disclosures are especially important for financial statement users to fully comprehend the entity's financial strength and ability to continue as a going concern.

.233 When, after considering management's plans, the auditor concludes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should consider the possible effects on the financial statements and the adequacy of the related disclosure. Some of the information that might be disclosed includes the following:

- Pertinent conditions and events giving rise to the assessment of substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time
- The possible effects of such conditions and events
- Management's evaluation of the significance of those conditions and events and any mitigating factors
- Possible discontinuance of operations
- Management's plans (including relevant prospective financial information)
- Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities

.234 Paragraph .14 of AU section 341 states that if the auditor concludes that the entity's disclosures with respect to the entity's ability to continue as a going concern for a reasonable period of time are inadequate, a departure from GAAP exists. This may result in either a qualified (except for) or an adverse opinion. Reporting guidance for such situations is provided in AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1).

.235 FASB has undertaken a project that will incorporate going concern guidance into accounting literature. One of the expected major changes is the going concern time frame. See the "Going Concern" section of this alert for more information.

Service Organizations

.236 Since 1992, SAS No. 70 has been the authoritative standard on requirements and guidance for reporting on controls at service organizations and auditing the financial statements of entities that use service organizations to accomplish tasks that may affect their financial statements. This guidance has now been split into an attest standard and an auditing standard to better reflect the nature of the work being performed. SSAE No. 16 contains the requirements for reporting on controls at service organizations that are relevant to user entities' internal control over financial reporting. A finalized clarified SAS on service organizations, *Audit Considerations Relating to an Entity Using a Service Organization*, will supersede SAS No. 70 and addresses the user auditor's responsibility for obtaining sufficient appropriate audit evidence in an audit of the financial statements of a user entity that uses one or more service organizations. This SAS will be effective for audits of financial statements for periods ending on or after December 15, 2012. SSAE No. 16 is effective for service auditor's reports for periods ending on or after June 15, 2011, and earlier implementation is permitted. Until the new SAS is effective, user auditors will still use the guidance currently contained in AU section 324. Once the new SAS becomes effective, it will replace the guidance for user auditors currently in AU section 324. SSAE No. 16 is based on the International Auditing and Assurance Standards Board's (IAASB's) International Standard on Assurance Engagements No. 3402, *Assurance Reports on Controls at a Service Organization*, and the new SAS is based on the IAASB's International Standard on Auditing (ISA) 402, *Audit Considerations Relating to an Entity Using a Service Organization*.

.237 The AICPA is in the process of overhauling and rewriting the Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (commonly known as the SAS 70 guide). Also, to address reporting on a service provider's controls over subject matter other than financial reporting, the AICPA is developing the new Audit Guide *Reporting on Controls at a Service Provider Relevant to Security, Availability, Processing Integrity, Confidentiality, or Privacy*. Both guides are expected to be available for sale in early 2011. The AICPA is also in the process of drafting communication materials that will help auditors, clients, and users understand the three types of service organization control (SOC) reports (formerly SAS No. 70 reports) to be used for reporting on these engagements.

 Copyright © 2010, American Institute of Certified Public Accountants, Inc.

	Title	Description
SOC 1	*Report on Controls at a Service Organization Relevant to User Entities' Internal Control over Financial Reporting*	To be used only in circumstances when the service organization's services and controls affect the internal control over financial reporting for the entities that use the service. These reports are not general use reports and cannot be freely distributed.
SOC 2	*Report on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality, and Privacy*	The purpose is to convey trust and assurance to users of the system that the service organization has deployed an effective control system to effectively mitigate operational and compliance risks that the system may represent to its users. These reports are not general use reports and can be only be distributed at the discretion of the auditor.
SOC 3	*Trust Services Report*	These reports are designed to meet the needs of users who want assurance on the controls at a service organization related to the security, availability, processing integrity, confidentiality, or privacy of a system but do not have the need for the level of detail provided in an SOC 2 report. These reports are general use reports and can be freely distributed or posted on a website as a seal.

Compilation and Review Engagements

.238 The AICPA developed a new guide, *Compilation and Review Engagements*, which provides additional information on implementing Statement on Standards for Accounting and Review Services No. 19, *Compilation and Review Engagements* (AICPA, *Professional Standards*, vol. 2). It also includes illustrative engagement and representation letters, sample compilation and review reports, detailed illustrations, and case studies. This guide is now available electronically and in paperback on www.cpa2biz.com.

FASB Accounting Issues and Developments

.239 Given the current economic climate, auditors should consider a number of accounting and financial reporting issues. This section addresses recent guidance issued by FASB in response the current environment, such as the following:

- Disclosures about the credit quality of financing receivables and the allowance for credit losses
- Fair value, including fair value measurements in illiquid markets
- Impairment

.240 In addition, recently effective FASB guidance, including ASU Nos. 2009-16 and 2009-17, has had a major effect on certain institutions' balance sheets and income statements, beginning with the first quarter of 2010 for calendar year-end companies.

FASB ASC and the Hierarchy of GAAP

.241 FASB Statement No. 168, *The* FASB Accounting Standards Codification™ *and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162*, as codified in FASB ASC 105, Generally Accepted Accounting Principles, is effective for financial statements issued for interim and annual periods ending after September 15, 2009. On the effective date of FASB Statement No. 168, FASB ASC became the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to

guidance issued by the SEC. FASB ASC superseded all then-existing, non-SEC accounting and reporting standards for nongovernmental entities. This new standard flattens the U.S. GAAP hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is nonauthoritative (not in FASB ASC). Exceptions include all rules and interpretive releases of the SEC under the authority of federal securities laws, which are sources of authoritative U.S. GAAP for SEC registrants, and certain grandfathered guidance having an effective date before March 15, 1992. If an accounting change results from the application of this guidance, an entity should disclose the nature and reason for the change in accounting principle in their financial statements.

.242 The FASB Notice to Constituents includes a section on referencing FASB ASC in footnotes and other documents. In this notice, FASB encourages the use of plain English to describe broad topic references in the future. For example, to refer to the requirements of the *Derivatives and Hedging* topic, they suggest a reference similar to "as required by the *Derivatives and Hedging* topic of the FASB *Accounting Standards Codification*." Conversely, FASB suggests using the detailed numerical referencing system in working papers, articles, textbooks, and related items.

.243 Examples of disclosures using references to FASB ASC can be found at the AICPA's dedicated FASB ASC website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AcctgFinRptg/AcctgFinRptgGuidance/Pages/FASBAccountingStandardsCodification.aspx.

Disclosures About the Credit Quality of Financing Receivables and the Allowance for Credit Losses

.244 In July 2010, FASB issued ASU No. 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, which requires an entity to provide a greater level of disaggregated information about the credit quality of its financing receivables and its allowance for credit losses. For many depository and lending institutions, this guidance may require institutions to modify the manner in which the financing receivables are identified and monitored. In addition, these requirements may necessitate the need for changes in systems, policies, and procedures used to collect information on financing receivables.

.245 The ASU amends the existing disclosures to require an entity to provide the following disclosures about its financing receivables on a disaggregated basis:

- A rollforward schedule of the allowance for credit losses from the beginning of the reporting period to the end of the reporting period on a portfolio segment basis, with the ending balance further disaggregated on the basis of the impairment method.
- For each disaggregated ending balance, the related recorded investment in financing receivables should also be disclosed.
- The nonaccrual status of financing receivables by class of financing receivables.
- Impaired financing receivables by class of financing receivables.

.246 The ASU defines two levels of disaggregation: portfolio segment and class of financing receivable. A *portfolio segment* is defined as the level at which an entity develops and documents a systematic method for determining its allowance for credit losses. *Classes of financing receivables* generally are a disaggregation of portfolio segment.

.247 The amendments in this ASU require an entity to provide the following additional disclosures about its financing receivables:

- Credit quality indicators of financing receivables at the end of the reporting period by class of financing receivables (see FASB ASC 310-10-55-19 for examples of credit quality indicators)
- The aging of past due financing receivables at the end of the reporting period by class of financing receivables

Copyright © 2010, American Institute of Certified Public Accountants, Inc.

- The nature and extent of troubled debt restructurings that occurred during the period by class of financing receivables and their effect on the allowance for credit losses
- The nature and extent of financing receivables modified as troubled debt restructurings within the previous 12 months that defaulted during the reporting period by class of financing receivables and their effect on the allowance for credit losses
- Significant purchases and sales of financing receivables during the reporting period disaggregated by portfolio segment.

.248 An entity must also describe, by portfolio segment, its accounting policies and methodology used to estimate its allowance for credit losses, including the identification of any changes to the entity's accounting policies or methodology from the prior period and the entity's rationale for the change.

.249 The amendments in this ASU apply to all entities with financing receivables. Examples of financing receivables include loans, trade receivables greater than one year, notes receivable, and receivables relating to a lessors' leveraged, direct financing, and sales-type leases. The new disclosure requirements do not affect short-term trade accounts receivable, receivables that are measured at fair value or the lower of cost or fair value, and debt securities. See the "Pending Content" in paragraphs 13–15 of FASB ASC 310-10-55 for more information on the definition of *financing receivable*, including a full list of items that are excluded from the definition. In addition, the "Pending Content" in paragraphs 7–12 of FASB ASC 310-10-55 illustrates certain disclosures required by this ASU.

.250 For public entities, the disclosures as of the end of a reporting period are effective for interim and annual reporting periods ending on or after December 15, 2010. The disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010.

.251 For nonpublic entities, the disclosures are effective for annual reporting periods ending on or after December 15, 2011.

Consolidation of Variable Interest Entities

.252 For calendar year entities, 2010 is the first year of application of FASB Statement No. 167, *Amendments to FASB Interpretation No. 46(R)*, which changes how to determine when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. FASB Statement No. 167 was incorporated into FASB ASC through ASU No. 2009-17. This statement is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited.

.253 ASU No. 2009-17 retains the scope of previous variable interest entity (VIE) consolidation accounting guidance (with some modifications), with the addition of entities previously considered qualifying special purpose entities because the concept of these entities was eliminated in FASB Statement No. 166, *Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140*, which was incorporated into FASB ASC by ASU No. 2009-16.

.254 ASU No. 2009-17 amended the consolidation of VIE guidance in FASB ASC 810-10 to eliminate the quantitative approach previously required for determining the primary beneficiary of a VIE and replaced it with an analysis of both of the following characteristics:

- The power to direct the activities of a VIE that most significantly impacts the entity's economic performance
- The obligation to absorb losses of the entity that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE

.255 ASU No. 2009-17 also makes the following amendments to FASB ASC 810-10:

- Amends certain guidance for determining whether an entity is a VIE.
- Adds an additional reconsideration event for determining whether an entity is a VIE when any changes in facts and circumstances occur such that the holders of the equity investment at risk, as a group, lose the power from voting or similar rights of those investments to direct the activities of the entity that most significantly impact the entity's economic performance.
- Eliminates the exception of a troubled debt restructuring not being an event that would require reconsideration of whether an entity is a VIE or whether an enterprise is the primary beneficiary of a VIE.
- Requires an ongoing reassessment of whether an enterprise is the primary beneficiary of a VIE.
- Requires additional disclosures about involvement with VIEs and any significant changes in risk exposure due to that involvement. Entities also will be required to disclose how involvement with a VIE affects the entity's financial statements.

.256 ASU No. 2009-17 also discusses the objectives of its required disclosures and notes that an entity may need to supplement the minimum required disclosures to meet these objectives. The objectives are for the financial statement users to have an understanding of the following:

- The significant judgments and assumptions made by an enterprise in determining whether it must consolidate a VIE or disclose information about its involvement in a VIE, or both
- The nature of restrictions on a consolidated VIE's assets and on the settlement of its liabilities reported by an enterprise in its statement of financial position, including the carrying amounts of such assets and liabilities
- The nature of, and changes in, the risks associated with an enterprise's involvement with the VIE
- How an enterprise's involvement with the VIE affects the enterprise's financial position, financial performance, and cash flows

.257 ASU No. 2010-10, *Consolidation (Topic 810): Amendments for Certain Investment Funds*, was issued in February 2010 to defer the consolidation requirements contained in ASU No. 2009-17 for a reporting entity's interest in certain investment funds, so that FASB and the International Accounting Standards Board (IASB) could develop consistent guidance on principal and agent relationships as part of their joint consolidation project. The deferral applies to a reporting entity's interest in an entity that has all the attributes of an investment company or for which it is industry practice to apply measurement principles, for financial reporting purposes, that are consistent with those followed by investment companies. An entity that qualifies for the deferral will continue to be assessed under the overall guidance on the consolidation of VIEs in FASB ASC 810-10, ASU No. 2009-17 amendments, or other applicable consolidation guidance.

.258 ASU No. 2010-10 does not defer the disclosure requirements from ASU No. 2009-17. The effective date of this guidance coincides with the effective date of ASU No. 2009-17 (the beginning of a reporting entity's first annual period that begins after November 15, 2009, and for interim periods).

Accounting for Transfers of Financial Assets

.259 Effective on January 1, 2010, calendar-year entities were required to apply the provisions of FASB Statement No. 166, which is a revision to FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*. FASB Statement No. 166 was incorporated into FASB ASC by ASU No. 2009-16 and is discussed in FASB ASC 860, *Transfers and Servicing*. The amendments made by ASU No. 2009-16 were effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009; for interim periods within that first annual reporting period; and for interim and annual reporting periods thereafter. Earlier application is prohibited. The recognition and measurement amendments must be applied to transfers (advances) occurring on or after the effective date, regardless if they were made pursuant to a loan participation agreement in place

Copyright © 2011, American Institute of Certified Public Accountants, Inc.

prior to the effective date. Additionally, on and after the effective date, all existing qualifying special purpose entities must be evaluated for consolidation in accordance with the applicable consolidation literature. The disclosure provisions should be applied to transfers that occurred both before and after the effective date.[8]

.260 The following highlights the amendments made by ASU No. 2009-16 to FASB ASC 860 and includes auditor considerations in evaluating management's application of the amendments:

- Eliminates the concept of a qualifying special purpose entity and the exception to the consolidation of a qualifying special purpose entity. An auditor should evaluate management's conclusions about whether a formerly qualifying special purpose entity should be consolidated or whether adequate disclosures have been made in accordance with the amended disclosure requirements in FASB ASC 810, *Consolidation*, and FASB ASC 860.
- Modifies the financial components approach to specify when a portion of a financial asset would be eligible to be evaluated for derecognition under FASB ASC 860-10-40-5. Such transferred portions must meet the definition of a *participating interest*, as described in FASB ASC 860-10-40-6A, and under that definition, some common transfers would be affected. For example, last-in, first-out loan participations[9] would no longer be eligible for sale accounting, and sale accounting for the transferred portion of Small Business Administration loans would be delayed.[10] An auditor should carefully evaluate transfers made pursuant to a loan participation agreement and other transfers of portions.
- Clarifies and amends the conditions for sale accounting in FASB ASC 860-10-40-5. In evaluating management's application of those amended conditions, an auditor should evaluate whether management's evaluation considered the following:
  - All arrangements or agreements made contemporaneously with, or in contemplation of, a transfer, even if not entered into at the time of the transfer.
  - The transferor's continuing involvement with the transferred financial assets.
  - The transferor, its consolidated affiliates included in the financial statements being presented, and its creditors in applying the isolation condition in FASB ASC 860-10-40-5(a).
  - Other forms of effective control, in addition to the examples provided in FASB ASC 860-10-40-5(c). That paragraph has been amended to be a principle, with the previous criterion being clarified to indicate that they are only examples of effective control.
- Eliminates the special considerations for guaranteed mortgage securitizations. As a result, an auditor should evaluate whether such transfers meet the same requirements for derecognition as other transfers of financial assets.
- Requires that a transferor recognize and initially measure at fair value all assets obtained (including a transferor's beneficial interest) and liabilities incurred as a result of a transfer of an entire financial asset or group of entire financial assets accounted for as a sale. An auditor should evaluate management's determination of fair value in accordance with FASB ASC 820, including the required disclosures in FASB ASC 860-20-50-3 about such initial fair value measurement.

---

[8] The OCC, the Federal Reserve, the FDIC, and the OTS amended their general risk-based and advanced risk-based capital adequacy frameworks, providing an optional two-quarter implementation delay followed by an optional two-quarter partial implementation of the effect on risk-weighted assets resulting from amendments from Financial Accounting Standards Board (FASB) Accounting Standards Update No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*, and No. 2009-17, *Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*. See the final rule at www.occ.treas.gov/fr/fedregister/75fr4636.pdf for additional information.

[9] Under amended FASB *Accounting Standards Codification* 860, *Transfers and Servicing*, so-called last-in, first-out (LIFO) participations in which all principal cash flows collected on the loan are paid first to the party acquiring the participation do not meet the definition of a *participating interest*. Similarly, so-called first-in, first-out (FIFO) participations in which all principal cash flows collected on the loan are paid first to the lead lender do not meet the definition of a *participating interest*. As a result, neither LIFO nor FIFO participations transferred on or after the beginning of a bank's first annual reporting period that begins after November 15, 2009 (for example, January 1, 2010, for a bank with a calendar-year fiscal year), will qualify for sale accounting and, instead, must be reported as secured borrowings. See the Federal Financial Institutions Examination Council (FFIEC) *Instructions for Preparation of Consolidated Reports of Condition and Income* at www.ffiec.gov/PDF/FFIEC_forms/FFIEC031_FFIEC041_201009_i.pdf for additional information.

[10] FFIEC Call Report instructions also address the application of the *participating interest* definition to Small Business Administration loans.

- Provides four disclosure objectives and requires additional specific disclosures about transfers of financial assets in which an entity has continuing involvement with the transferred financial assets. An auditor should evaluate whether the four disclosure objectives have been met for all transfers of financial assets, including loan participations and securitizations. Those objectives must be met regardless of the specific disclosure requirements for certain transfers of financial assets, and an entity may need to supplement the required disclosures in order to meet the disclosure objective. For example, a transferor in a loan participation may need to supplement the required disclosures in order to meet the disclosure objectives because there are no specific disclosures required for loan participations.

.261 Interpretation No. 1, "The Use of Legal Interpretations As Audit Evidence to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraphs 7–14 of Financial Accounting Standards Board *Accounting Standards Codification* 860-10-40," of AU section 336 (AICPA, *Professional Standards*, AU sec. 9336 par. .01–.21), provides guidance to the auditor in obtaining sufficient appropriate audit evidence when an entity has derecognized financial assets in connection with a transfer to another entity. In light of the issuance of ASU No. 2009-16, the ASB is currently in the process of revising this guidance. Auditors should be alert for such revisions; however, the guidance in Interpretation No. 1 continues to be relevant.

.262 The Center for Audit Quality (CAQ) has created a resource related to FASB Statement Nos. 166 and 167 on its website to provide readers with relevant information from a variety of sources, including guidance from standard setters, publications by the CAQ and member firms, and webcasts. This information can be found at www.thecaq.org/resources/aftabackground.htm.

Decreases in Ownership of a Subsidiary
