Language in Mind and Brain

Multimedial proceedings of the workshop held at
LMU Munich,
December 10–11, 2018

HOW TO ACCESS THE CONTENTS OF THE VOLUME

Please note that this document is merely a guide providing information on how to access the multimedial proceedings volume comprising research articles, posters and audio descriptions. In order to make full use of all its functionalities, download the ZIP folder *Language_in_Mind_and_Brain* from Open Access LMU, unzip it and save the unzipped folder without changing the file names. Then open the unzipped folder and select the PDF file *Publication_Language_in_Mind_and_Brain*, which contains an introduction and short research articles.

By following the links inside that PDF document, you should be able to access all audio files and posters directly. Alternatively (e.g. if you open the ZIP folder without proper unzipping), you can access the audio files (MP3) and posters (PDF) using the file explorer on your PC.
