**PENERAPAN SISTEM ABC UNTUK PERHITUNGAN BIAYA
OPERASIONAL JASA TRANSPORTASI PADA CV. JAKARTA BANGKA
EXPRESS**

Gracia Stefanie

1501188580

Abstrak

Tujuan penelitian ini adalah untuk mengetahui aplikasi banyaknya pemakaian biaya jasa transportasi yang dikeluarkan oleh perusahaan serta membuat model mekanisme kerja jasa transportasi dalam pengiriman barang. Teknik pengumpulan data yang dilakukan berupa observasi, wawancara, dan dokumen-dokumen yang diperoleh dari CV. Jakarta Bangka Express. Perusahaan CV. Jakarta Bangka Express bergerak di bidang jasa pengiriman barang dengan rute Jakarta-Bangka. CV.Jakarta Bangka Express sebelumnya belum menerapkan sistem ABC, dengan adanya penerapan sistem ABC maka biaya operasional dapat dikelompokkan pada masing-masing aktivitas.. Pada metode ABC, biaya overhead pada masing-masing produk/jasa dibebankan pada *cost driver* sehingga dalam metode ABC, biaya operasional perusahaan jasa transportasi dapat dialokasikan ke biaya aktivitas pada masing-masing paket pengiriman barang secara tepat berdasarkan konsumsi sumber daya dari masing-masing aktivitas (GS)

Abstract

This research is made with the purpose of determining the number of applications which is used by the transportation services costs that incurred in the company and analyzing the mechanism work process of transportation services by delivering goods. Data collection techniques such as observation, interview, and documentation that obtained from CV. Jakarta Bangka Express. CV. Jakarta Bangka Express is one of a service company that provided services by delivering goods from Jakarta to Bangka. Previously, CV. Jakarta Bangka Express has not applied ABC costing system. By implementing ABC costing system, the operational cost could be grouped in each activity. In ABC costing system method, the overhead of each product or goods is charged on cost driver and also the operational costs could be allocated to the cost of each activity appropriately based on resource consumption in each activity.
