PERANCANGAN FURNITUR TAMAN KANAK – KANAK THE WOODLANDS MONTESSORI SCHOOL DI TANGERANG SELATAN

Stefani **1501150240**
LA35

Abstrak

Anak berumur empat sampai enam tahun memiliki potensi maksimal untuk berkembang, namun pada saat ini fasilitas furnitur sekolah yang memadai belum tersedia, sehingga sekolah belum mampu mendorong perkembangan anak secara optimal. Penelitian menyebutkan bahwa anak perlu dibina dengan kondisi rileks dan tidak tertekan, agar potensi yang dimiliki anak dapat berkembang maksimal. Penerapan metode Montessori dapat mendorong perkembangan potensi anak. Konsep furnitur dirancang untuk mendukung metode tersebut agar berjalan maksimal. Dengan adanya studi observasi dan studi literatur, konsep perancangan diharapkan dapat memaksimalkan fasilitas sekolah demi mengoptimalkan potensi perkembangan dan kebutuhan belajar anak.

Kata Kunci : *Metode Montessori, furnitur, taman kanak – kanak.*

DESIGNING FURNITURE FOR KINDERGARTENS AT THE WOODLANDS MONTESSORI SCHOOL IN SOUTH TANGERANG

Stefani 1501150240

LA35

Abstract

Children with aged four to six years have the maximum potential to grow, but at this point school's furniture facilities are not adequate yet, so the school has not been able to encourage the optimal development of children. Studies suggest that children need to be nurtured with a relaxed and unstressed condition, so the potential of the child can be fully developed. Application of the Montessori method can encourage the development of children's potential. The concept of furniture is designed to support the method to run optimally. With the observational studies and literature studies, concept design is expected to maximize the potential of school facilities to optimize children's development and learning needs.
