PERBEDAAN MOTIVASI BERPRESTASI SISWA KELAS V DI SDSN BENDUNGAN HILIR 09 PAGI JAKARTA DENGAN SISWA KELAS V DI SDN 30/IX TEMPINO

Dwi Anggun Herdyan Partiw - 1200995105

ABSTRAK

Penelitian ini membahas tentang perbedaan motivasi berprestasi siswa Kelas 5 di SDSN Bendungan Hilir 09 Pagi dengan siswa Kelas 5 di SDN 30/IX Tempino. Menurut McClelland (Sanrock, 2007) motivasi berprestasi adalah keinginan untuk menyelesaikan sesuatu, mencapai sesuatu standar kesuksesan, dan melakukan suatu usaha dengan tujuan untuk mencapai kesuksesan. Alat ukur yang digunakan berupa kuesioner. Berdasarkan klasifikasi, reliabilitas alat ukur sangat reliable (cronbach's alpha = 0,946). Metode penelitian yang dipakai dalam penelitian ini adalah metode penelitian deskriptif. Analisis dilakukan dengan menyebarkan kuesioner dan kemudian data yang didapat diolah menggunakan software SPSS 15.0 for windows evaluation version. Kesimpulannya, motivasi berprestasi siswa di kedua sekolah tergolong dalam kategori sedang. Ada perbedaan motivasi berprestasi yang signifikan antara siswa di kedua sekolah, yaitu siswa di SDN 30/IX Tempino memiliki mean = 88,60. Sedangkan di SDSN Bendungan Hilir 09 Pagi memiliki mean = 85,97.(TW)
