TABLE OF CONTENTS

SECTION E: HISTORICAL TABLES AND GRAPHS

E1.	Number of Pension Plans <i>by type of plan, 1975-2012</i>	1
E1g.	Number of Pension Plans (Graph) <i>by type of plan, 1975-2012</i>	2
E2.	Number of Pension Plans with Fewer than 100 Participants <i>by type of plan, 1975-2012</i>	3
E3.	Number of Pension Plans with 100 or More Participants <i>by type of plan, 1975-2012</i>	4
E5.	Number of Participants in Pension Plans <i>by type of plan, 1975-2012</i>	5
E5g.	Number of Participants in Pension Plans (Graph) <i>by type of plan, 1975-2012</i>	6
E6.	Number of Participants in Pension Plans with Fewer than 100 Participants <i>by type of plan, 1975-2012</i>	7
E7.	Number of Participants in Pension Plans with 100 or More Participants <i>by type of plan, 1975-2012</i>	8
E8.	Number of Active Participants in Pension Plans <i>by type of plan, 1975-2012</i>	9
E8g.	Number of Active Participants in Pension Plans (Graph) <i>by type of plan, 1975-2012</i>	10
E9.	Number of Active Participants in Pension Plans with Fewer than 100 Active Participants <i>by type of plan, 1975-2012</i>	11
E10.	Number of Active Participants in Pension Plans with 100 or More Active Participants <i>by type of plan, 1975-2012</i>	12
E11.	Pension Plan Assets <i>by type of plan, 1975-2012</i>	13
E11g.	Pension Plan Assets (Graph) <i>by type of plan, 1975-2012</i>	14
E12.	Pension Plan Assets of Plans with Fewer than 100 Participants <i>by type of plan, 1975-2012</i>	15
E13.	Pension Plan Assets of Plans with 100 or More Participants <i>by type of plan, 1975-2012</i>	16

E14.	Pension Plan Contributions <i>by type of plan, 1975-2012</i>	17	E20g1.	Number of 401(k) Type Plans and Active Participants (Graph) <i>1984-2012</i>	26
E14g.	Pension Plan Contributions (Graph) <i>by type of plan, 1975-2012</i>	18	E20g2.	Assets, Contributions, and Benefit Payments of 401(k) Type Plans (Graph) <i>1984-2012</i>	27
E15.	Pension Plan Contributions to Plans with Fewer than 100 Participants <i>by type of plan, 1975-2012</i>	19	E21.	Aggregate Rates of Return Earned <i>by Pension Plans with 100 or More Participants, 1993-2012</i>	28
E16.	Pension Plan Contributions to Plans with 100 or More Participants <i>by type of plan, 1975-2012</i>	20	E22.	Aggregate Investment Performance <i>of Pension Plans with 100 or More Participants, 1993-2012</i>	29
E17.	Pension Plan Benefits Disbursed <i>by type of plan, 1975-2012</i>	21	E23.	Aggregate Rates of Return Earned <i>by Employee Stock Ownership Plans and 401(k) Plans with 100 or More Participants, 1998-2012</i>	30
E17g.	Pension Plan Benefits Disbursed (Graph) <i>by type of plan, 1975-2012</i>	22	E24.	Number of 401(k) Type Plans and Assets <i>by extent of participant direction of investments, 1999-2012</i>	31
E18.	Pension Plan Benefits Disbursed from Plans with Fewer than 100 Participants <i>by type of plan, 1975-2012</i>	23	E25.	Number of Total and Active Participants in 401(k) Type plans <i>by extent of participant direction of investments, 1999-2012</i>	32
E19.	Pension Plan Benefits Disbursed From Plans with 100 or More Participants <i>by type of plan, 1975-2012</i>	24	E26.	Contributions and Benefits of 401(k) Type Plans <i>by extent of participant direction of investments, 1999-2012</i>	33
E20.	Number of 401(k) Type Plans, Active Participants, Assets, Contributions, and Benefit Payments <i>1984-2012</i>	25			

Appendix A: Notes on Changes to the *Private Pension Plan Bulletin Historical Tables*.....34-35

Appendix B: Changes to Entity Type Classification Originating with the *2012 Private Pension Plan Research File*.....36

Appendix C: Sampling Methodology Changes Originating with the *2010 Form 5500 Private Pension Plan Research File*.....37

Appendix D: Weighting Methodology Changes..... 38-40

Appendix E: Changes to Participant Counts Originating with the *2005 Form 5500 Private Pension Plan Research File*.....41-44

Appendix F: Timing Definition Changes Originating with the *2002 Form 5500 Private Pension Plan Research File*.....45

**Table E1. Number of Pension Plans
by type of plan, 1975-2012**

Year	Total Plans			Single Employer Plans 1/			Multiemployer Plans 2/		
	Total	Defined Benefit	Defined Contribution	Total	Defined Benefit	Defined Contribution	Total	Defined Benefit	Defined Contribution
1975	311,094	103,346	207,748	308,651	101,214	207,437	2,443	2,132	311

2012	676,689	43,718	632,970	673,948	42,291	631,657	2,740	1,427	1,313

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Form 5500 Private Pension Plan User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

3/ The row 2004r shows participants for 2004 computed using the revised definition summarized in the note above.

2011	11,799	443	11,356	11,793	441	11,352	6	2	4
2012	11,796	434	11,362	11,790	432	11,358	6	2	4

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

3/ The row 2004r shows participants for 2004 computed using the revised definition summarized in the note above.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Form 5500 Private Pension Plan User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits. Active participants include any workers currently in employment covered by a plan and who are earning or retaining credited service under a plan. This category includes any nonvested former employees who have not yet incurred a break in service. Active participants also include individuals who are eligible to elect to have the employer make payments to a Code section 401(k) plan. For Form 5500 Short Form filers, all reported participants are assumed to be active.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

3/ The row 2004r shows active participants for 2004 computed using the revised definition summarized in the note above.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Data for 1999 are based on actual count. Data for 1975-1998 are imputed.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits. Active participants include any workers currently in employment covered by a plan and who are earning or retaining credited service under a plan. This category includes any nonvested former employees who have not yet incurred a break in service. Active participants also include individuals who are eligible to elect to have the employer make payments to a Code section 401(k) plan. For Form 5500 Short Form filers, all reported participants are assumed to be active.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

3/ The row 2004r shows active participants for 2004 computed using the revised definition summarized in the note above.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Form 5500 Private Pension Plan User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

NOTE: Total asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Form 5500 Private Pension Plan User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Includes both employer and employee contributions.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Form 5500 Private Pension Plan User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Amounts shown include both benefits paid directly from trust funds and premium payments made by plans to insurance carriers. Amounts exclude benefits paid directly by insurance carriers.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Amounts shown include both benefits paid directly from trust funds and premium payments made by plans to insurance carriers. Amounts exclude benefits paid directly by insurance carriers.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

NOTE: Excludes plans covering only one participant.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

2012	456,147	188,529	267,618	406,040	151,553	254,486	50,107	36,975	13,132

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Amounts shown include both benefits paid directly from trust funds and premium payments made by plans to insurance carriers. Amounts exclude benefits paid directly by insurance carriers.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

NOTE: Excludes plans covering only one participant.

1/ Active participants include any workers currently in employment covered by a plan and who are earning or retaining credited service under a plan. This category includes any nonvested former employees who have not yet incurred a break in service. Active participants also include individuals who are eligible to elect to have the employer make payments to a Code section 401(k) plan. For Form 5500 Short Form filers, all reported participants are assumed to be active.

2/ Total asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits.

3/ Includes both employer and employee contributions.

4/ Amounts shown include both benefits paid directly from trust funds and premium payments made by plans to insurance carriers. Amounts exclude benefits paid directly by insurance carriers.

5/ The row 2004r shows active participants for 2004 computed using the revised definition summarized in the note above.

2010-2012	4.4	3.3	5.1	4.6	3.4	5.2	3.1	3.3	2.8	4.2	4.9

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Rates of return have been derived directly from tables C4-C11 and from similar published summary tables for prior years. The rate of return formula is the same as that described in Chapter 12 of the 1989 DOL volume entitled "Trends in Pensions," except that the return formula used here refines the treatment of receivables. The receivable line item called "income receivables," which first appeared on the 1988 form, is not deducted from total assets because such assets may produce investment income. The formula makes no adjustment for reporting periods other than one year, which are reported on approximately 3 percent of Form 5500 filings. Because the Form 5500 does not provide information on the timing of cash flows during the year, a time weighted rate of return cannot be derived. The formula used assumes that all cash flows occur in the middle of the plan's reporting period. The cash flow for which this assumption is most uncertain is contributions. The overall 1994 rate of return reported as 2.9 percent could be as low as 2.80 percent or as high as 2.98 percent depending on the assumption regarding the timing of contributions during the year. The overall 1995 rate of return reported as 20.8 percent could be as low as 20.15 percent or as high as 21.53 percent.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans. All defined benefit plans paying premiums to PBGC's single employer program are included.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans. All defined benefit plans paying premiums to PBGC's multiemployer program are included.

3/ The geometric mean is computed by (1) adding one to the aggregate rate of return for each of the n years, (2) taking the product of the sums, (3) taking the nth root of the product, and (4) subtracting one.

4/ Standard deviation formula uses a denominator definition of n, not n-1.

SOURCE: Form 5500 filings with the U.S. Department of Labor.

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

NOTE: Total asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits.

1/ Average of beginning-of-year and end-of-year levels of all assets except contributions receivable and value of buildings and other property used in plan operations minus one-half of total return.

2/ Sum of interest, dividends, and rents.

3/ The DFE category includes direct filing entities (common/collective trusts, master trusts, 103-12 investment entities, and pooled separate accounts) and funds invested through registered investment companies and insurance company general accounts.

4/ Sum of investment income, total appreciation, and total DFE income.

5/ Total return as a percentage of average investable assets. See the third note on Table E21.

6/ Percentage increase in average investable assets (column 1) from previous year to current year.

7/ The geometric mean is computed by (1) adding one to the rate for each of the n years, (2) taking the product of the sums, (3) taking the nth root of the product, and (4) subtracting one.

2003-2012	6.7	6.9	6.7	7.6
2008-2012	2.7	2.9	2.6	4.1
2010-2012	8.6	8.7	8.6	9.1
Std. deviation 2/ 1998-2012	11.7	10.9	11.8	9.2
2003-2012	11.8	10.9	11.5	9.0
2008-2012	15.3	13.7	14.4	11.0
2010-2012	4.2	4.9	5.1	4.2

NOTE: Beginning with the 2010 Private Pension Plan Bulletin, a sample of small plans is no longer used. Rather, all small plans are now included on the Private Pension Plan Research File. As a result, certain statistics may not be directly comparable between 2009 and 2010. Please see the Private Pension Plan Research File User Guide and the Sampling Methodology Changes Appendix of this document for more information.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the Timing Definition Changes Appendix for more details.

NOTE: Total participant and active participant definitions were changed beginning with the 2005 Private Pension Plan Bulletin. See the Changes to Participant Counts Appendix for more details. As in previous bulletins, the term "Participants" refers to active, retired, and separated vested participants not yet in pay status. The number of participants also includes double counting of workers in more than one plan. For Form 5500 Short Form filers, this number may also include deceased participants whose beneficiaries are receiving or are entitled to receive benefits.

1/ The geometric mean is computed by (1) adding one to the aggregate rate of return for each of the n years, (2) taking the product of the sums, (3) taking the nth root of the product, and (4) subtracting one.

2/ Standard deviation formula uses a denominator definition of n, not n-1.

Appendix A: Notes on Changes to the *Private Pension Plan Bulletin Historical Tables*

December 2011 Update

- On Table E5, page 5, the “Total” column under the “Total Plans” section, which had been missing in the 2008 Data Release Version of these tables, was inserted.
- On Table E21, page 28, the aggregate rate of return earned by ESOPs in 2008 was updated to correct an improperly calculated value.
- On Table E23, page 30, the aggregate rates of return earned by total, nonleveraged, and leveraged ESOPs were updated to correct improperly calculated values.

March 2012 Update

- All data for 2008 was retabulated using the final *2008 Form 5500 Private Pension Plan Research File*. In the 2008 and 2009 Data Release Versions of these tables, all statistics were tabulated using a version of the *2008 Form 5500 Private Pension Plan Research File* that was not final.

August 2012 Update

- The Table of Contents and bookmarks were updated to match the title and date range of each table.

November 2012 Update

- The 2010 Data Release Version includes aggregate statistics on 2010 Form 5500 filings.
- Appendix B: Sampling Methodology Changes was added to outline changes made to the *Private Pension Plan Bulletin* beginning with 2010 data. The other appendices were renamed due to this addition.
- The renamed Appendix C: Weighting Methodology Changes was rewritten to better outline the methodologies used and the years in which each was used.

- Data on Table E9 and Table E10 was corrected for years 2004-2009. Previously, division of plans into those with 100 or more active participants and fewer than 100 active participants was made using total participants instead of active participants.

June 2013 Update

- The 2011 Data Release Version includes aggregate statistics on 2011 Form 5500 filings.

August 2014 Update

- The 2012 Data Release Version includes aggregate statistics on 2012 Form 5500 filings.
- Appendix B: Changes to Entity Type Classification Originating with the 2012 Form 5500 Private Pension Plan Research File was added to outline changes made to the *Private Pension Plan Bulletin* beginning with 2012 data. The other appendices were renamed due to this addition.

Appendix B: Changes to Entity Type Classification Originating with the 2012 Form 5500 Private Pension Plan Research File

The Form 5500 allows for filers to identify themselves as multiemployer plans, single-employer plans, multiple-employer plans, or Direct Filing Entities (DFE) in Part IA. The Form 5500-SF allows for filers to identify themselves as single-employer plans, multiple-employer plans, or a one-participant plan in Part IA. For purposes of the *Private Pension Plan Research File*, DFEs and one-participant plans are not included. For the summary tables presented in this Bulletin, multiple-employer plans are included in the columns for either single-employer or multiemployer plans. As a general rule, multiple-employer plans that also identify as collectively bargained are included with the multiemployer plans, while those that do not identify as collectively bargained are included with the single-employer plans.

Historically, the number of multiemployer plans has been overstated due to filer error and to data processing issues with the completed Form 5500 filings.¹ As a result, certain data cleaning methods have been employed to more accurately reflect the mix of plans. These methods have included automated edits based on plan name, manual edits based on the plan name, and the judgment of individuals preparing the *Private Pension Plan Research File*.² While these methods have produced reasonable estimates, opportunities to improve are always being explored.

Beginning with the 2012 Private Pension Plan Research File, data from the Pension Benefit Guaranty Corporation (PBGC) is being used to improve the accuracy of the estimates. The Multiemployer Pension Plans and Single-Employer Pension Plans datasets were downloaded from <http://www.pbgc.gov/open/index.html> on May 19, 2014. For more information on the PBGC and these datasets, please visit the website referenced above. These datasets were matched with the Form 5500 data to be used in the 2012 Private Pension Plan Research File. In the event that PBGC's plan designation disagreed with the Research File's plan designation (which may be based on either the original filing or edited), then the PBGC's designation was used. The result of using the PBGC's data was a shift of 25 plans from multiemployer to single-employer and 24 plans from single-employer to multiemployer. This led to a net shift of approximately 260,000 participants and \$40 billion in assets from multiemployer to single-employer.

¹ For more information, see Appendix C.

² For the current methodology, see the Pension User Guide under Form 5500 Private Pension Plan Research Files at <http://www.dol.gov/ebsa/publications/form5500dataresearch.html>.

Appendix C: Sampling Methodology Changes **Originating with the 2010 Form 5500 Private Pension Plan Research File**

In preparing the *Private Pension Plan Research File*, the Employee Benefits Security Administration (EBSA) of the Department of Labor's (the Department) Office of Policy and Research (OPR) has historically utilized a sampling methodology to compile aggregate statistics regarding the composition of the employer-sponsored pension plan universe. Specifically, OPR created a dataset consisting of information from all Form 5500 pension filings for plans with 100 or more participants and a five percent sample of Form 5500 pension filings for plans with fewer than 100 participants. For reasons discussed below, this five percent sampling methodology for small pension plans has been revised beginning with the *2010 Private Pension Plan Research File*.

As discussed in detail in the Appendix to the *2009 Form 5500 Private Pension Plan Bulletin*¹, beginning on January 1, 2010, the Department implemented a new electronic filing system whereby filers upload completed Form 5500s electronically using IFILE or [EFAST2-approved vendor software](#). The electronic filing system increased the accuracy of the Form 5500 data which the Department uses to compile aggregate statistics. The improved accuracy occurred in large part due to the fact that the Department no longer has to scan paper filings in order to compile electronic data. Previously, many of the logical errors found in the Form 5500 data were introduced through this scanning process. Editing these errors in data was a time-consuming process even when using only a five percent sample of small plans. With this impediment removed, it became possible to incorporate all Form 5500 filings.

Finally, a consideration for historically using a five percent sample of small plans was computing power. In previous years, the sample taken was quite large, with more than 100,000 observations and 300 variables. If all plans had been included, this dataset would have increased in size by a factor of seven, making manipulation of the data extremely cumbersome, particularly with older technology. With new and faster technology, a dataset of this size is no longer too large, clearing the way for a complete, un-sampled dataset. For more information, please see the *User Guide for 2010 Private Pension Plan Research File*².

¹ Available at <http://www.dol.gov/ebsa/publications/form5500dataresearch.html#planbulletins>

² Will be available on the same hyperlink above.

Appendix D: Weighting Methodology Changes

As discussed in detail in the *2009 Form 5500 Private Pension Plan Research File User Guide*, the *Form 5500 Private Pension Plan Research File* uses weights to adjust the underlying data for missing Form 5500 filings – filings that have either not been received, not been processed, or were never completed. Weights for the *Private Pension Plan Bulletin* are calculated by defining the universe of plans, stratifying plans by size and type, creating a sample of plans, and then dividing the number of plans in the universe by the number of plans in the sample for each stratum.³ The *Private Pension Plan Research File* is comprised of all large plans (defined as plans with 100 or more participants), all mega plans (defined as plans with \$2.5 billion or more in assets), and all small plans (defined as plans with fewer than 100 participants). Thus, weights for all plans are close to one. As discussed in Appendix B, prior to the *2010 Form 5500 Private Pension Plan Research File*, a five percent sample of small plans was used. Therefore, weights for small plans in those years were close to 20. During the years in which the Department has published *Form 5500 Private Pension Plan Bulletins*, two methods for determining weights have been in use.

“Straddling”

For the first method, weights were calculated by tabulating a universe of pension plan filings consisting of all plan filings for the publication year along with all plan filings submitted in either of the prior two years and the year following (a “straddling” weighting methodology). (For example, the *2004 Private Pension Plan Research File* used weights calculated from a universe of all 2004 filings along with all filings submitted in **either** 2002 or 2003 **and** 2005.) This universe was divided into five strata: mega plans, large defined benefit plans, large defined contribution plans, small defined benefit plans, and large defined contribution plans. Next, the Department compiled the plans to be used as the basis of the *Form 5500 Private Pension Plan Research File*. This sample was stratified in the same manner as the universe. The weight for each stratum was calculated as the number of plans in the universe divided by the number of plans in the sample. One limitation of this method is that it can only be used when data from the following plan year is available. This is not always the case.

³ For a more detailed explanation of the methodology for adding weights to the *Private Pension Plan Research File*, please see the current *Form 5500 Private Pension Plan Research File User Guide* available at <http://www.dol.gov/ebsa/publications/form5500dataresearch.html>.

“Adjusted Non-Terminating Plans”

In response to this limitation, the Department considered a weighting methodology based on a universe of the Form 5500 pension plan filings for the prior year which incorporates indications of the plan’s intention to terminate (a “non-terminating plans” weighting methodology). The universe using this method consisted of all plans filed for the publication year along with all plans that filed in the prior year and did not indicate termination. Comparison of the “straddling” weighting methodology with the “non-terminating plans” weighting methodology revealed that the “non-terminating plans” methodology produced weights significantly higher than those produced using the “straddling” methodology. To adjust for the differences in the methodologies, the Department created a historical adjustment factor using a weighted average of the difference between the two methods for the prior two years. To do so, both methods for calculating weights were applied to the two previous *Form 5500 Private Pension Plan Research Files*; for example, for the 2005 *Form 5500 Private Pension Plan Research File*, weights using both methods were calculated for the 2003 and 2004 *Form 5500 Private Pension Plan Research Files*. The Department then calculated adjustment factors to transform the “non-terminating plans” weight to the calculated “straddling” weight for each of the two plan years. An arithmetic average of the adjustment factors for the two years for each stratum was then applied to the “non-terminating plans” weight calculated for the publication year, arriving at an “adjusted non-terminating plans” method weight – a close approximation to the “straddle” method weight.

2004 and Earlier *Form 5500 Private Pension Plan Research Files*

For all *Form 5500 Private Pension Plan Research Files* up to and including the 2004 publication, the “straddling” weighting methodology was in use. For each of these publication years, the data for the year following was considered complete, and the “straddling” weighting methodology was deemed sufficient.

2005-2008 *Form 5500 Private Pension Plan Research Files*

Beginning with the 2005 *Private Pension Plan Research File*, the production date for the *Form 5500 Private Pension Plan Research File* and *Form 5500 Private Pension Plan Bulletin* was advanced. As a result of the new publication schedule, the 2006 Form 5500 data were not sufficiently complete to continue using the “straddling” weighting methodology. The same issue was present in publication years 2006, 2007, and 2008. Therefore, for these publication years, the “adjusted non-terminating plans” weighting methodology was used.

2009 Form 5500 Private Pension Plan Research File

For the *2009 Private Pension Plan Research File*, the Department returned to using the “straddling” weighting methodology. Effective January 1, 2010, the Department required that all Form 5500 and related Schedules and Attachments be filed electronically through the EFAST2 processing system. Prior to January 1, 2010, some employee benefit plans mailed paper Form 5500 filings to the Department. Paper Form 5500 filings were entered into an electronic Form 5500 database using optical character recognition (OCR) scanning software. This OCR process sometimes produced inconsistencies between the paper Form 5500 filings and the electronic Form 5500 database.

One result of the transition to total electronic filings is the immediate availability of Form 5500 data. Therefore, the data for the following plan year is complete at the time of the *Private Pension Plan Bulletin* publishing date. For example, the *2006 Form 5500 Private Pension Plan Research File* was created between August and December of 2008; by the end of September 2008, the 2007 Form 5500 pension data consisted of only 54 percent of the 2006 Form 5500 pension plan filings that did not indicate an intention to terminate. Corresponding percentages for October, November, and December were 65, 71, and 88 percent respectively. The percentage of 2006 Form 5500 pension plan filings that did not indicate an intention to terminate present in the 2007 Form 5500 pension data did not reach its maximum of 93 percent until October of 2009.⁴ In contrast, by October of 2011, 94 percent of 2009 Form 5500 pension plan filings that did not indicate an intention to terminate in their 2009 filing had a corresponding 2010 filing. Therefore, the Department deemed the 2010 data complete as of October 2011 and reverted to using the “straddle” weighting method. The *2009 Form 5500 Private Pension Plan Bulletin* was published in December of 2011.

2010 and Later Form 5500 Private Pension Plan Research File

After publication of the *2009 Form 5500 Private Pension Plan Bulletin*, the Department accelerated the publishing schedule of future *Form 5500 Private Pension Plan Bulletins* (to approximately November 2012 for the *2010 Form 5500 Private Pension Plan Bulletin* and to approximately July 2013 for the *2011 Form 5500 Private Pension Plan Bulletin*). Due to this acceleration, data for the year following the publication year is not complete during creation of the *Form 5500 Private Pension Plan Research Files*. Thus, for 2010 and subsequent years, the “adjusted non-terminating plans” weighting methodology is used.

⁴ The Form 5500 data will never be 100 percent complete as a portion of private pension plans terminate without indicating their intention to terminate on the Form 5500. For purposes of the *Private Pension Plan Research File*, the Department uses an essentially complete definition.

Appendix E: Changes to Participant Counts **Originating with the 2005 Form 5500 Private Pension Plan Research File**

Prior to 2005, the IRS Form 5500 Schedule T provided information on line 4c(5) allowing the Employee Benefits Security Administration (EBSA) to adjust the number of “active participants” actually reported on line 7g of the main Form 5500¹ to exclude two groups of individuals:

1. Individuals eligible to participate in a 401(k) plan who had not elected to have their employers make contributions and
2. Non-vested former employees who had not (at the time the Form 5500s were submitted) incurred the break in service period established by their plan.

In 2005 the IRS discontinued the Form 5500 Schedule T, necessitating changes in the methodology of defining an “active participant” for the *Form 5500 Private Pension Plan Research Files* and the corresponding *Private Pension Plan Bulletins*. Beginning in 2005, the number of “active participants” is no longer adjusted and instead corresponds directly to the definition of “active participant” provided in the Form 5500 Instructions which states,²

Active participants include any individuals who are currently in employment covered by a plan and who are earning or retaining credited service under a plan. This category includes any individuals who are eligible to elect to have the employer make payments to a Code section 401(k) qualified cash or deferred arrangement. Active participants also include any nonvested individuals who are earning or retaining credited service under a plan. This category does not include (a) nonvested former employees who have incurred the break in service period specified in the plan or (b) former employees who have received a “cash-out” distribution or deemed distribution of their entire nonforfeitable accrued benefit.

Additionally, prior to 2005, “total participants” also excluded the two groups of individuals described above.

¹ For a more detailed explanation of the methodology used for creating counts of “active participants” prior to the 2005 *Private Pension Plan Bulletin*, please see the current *Form 5500 Private Pension Plan Research File User Guide* available at <http://www.dol.gov/ebsa/publications/form5500dataresearch.html>.

² Form 5500 Forms and Instructions are available at <http://www.dol.gov/ebsa/5500main.html>.

EBSA adjusted the reported active participant counts to provide a statistic which more accurately reflects the definition used for research purposes. Although ERISA classifies the above groups of individuals as “active” participants, these groups of individuals are not “active” in the more intuitive sense – i.e., these individuals are not contributing to the pension plan and are not entitled to receive benefits from the plan. The individuals in the first group above are merely qualified to participate in the plan; they do not have account balances and are not contributing or receiving contributions from their employers. The individuals in the second group above were not employed with the plan’s sponsor long enough to have qualified to receive benefits under the plan and may only receive benefits if they return to employment with the filing sponsor and remain in service until they vest in their benefits. In a purely economic sense, and for research purposes, individuals in these groups should not be included in the count of active participants.

To illustrate the effect this definitional change has on the counts of active participants, the following tables and graphs detail the number of participants by types of plans using the previous (“Adjusted Actives”) and current (“Reported Actives”) definitions for plan years 2001-2004.

**Table 1. The Adjustment to Active Participants
in Defined Contribution Plans
by year, 2001-2004
(numbers in thousands)**

Year	Total Plans			Single Employer Plans 1/			Multiemployer Plans 2/		
	Current Method	Previous Method	Difference	Current Method	Previous Method	Difference	Current Method	Previous Method	Difference
2001	61,368	51,566	9,802	59,041	49,316	9,725	2,326	2,250	76
2002	61,790	51,845	9,945	58,831	48,976	9,855	2,959	2,868	91
2003	60,554	50,793	9,761	57,610	47,944	9,666	2,944	2,849	95
2004	61,320	51,287	10,033	58,343	48,392	9,951	2,978	2,895	83

1/ Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

2/ Includes multiemployer plans and multiple-employer collectively bargained plans.

Appendix F: Timing Definition Changes

Originating with the 2002 Form 5500 Private Pension Plan Research File

Beginning with the 2002 Form 5500 Private Pension Plan Research File, the data for a given calendar year reflects filings for plan years that end, rather than begin, in the current calendar year. For example, the 2002 Form 5500 Private Pension Plan Research File and the corresponding 2002 Private Pension Plan Bulletin, contain data for plans whose plan years end between 1/1/2002 and 12/31/2002, rather than plan years which end between 12/31/2002 and 12/30/2003. This timing definition change does not affect calendar year filers (i.e., plans beginning January 1 and ending December 31), which make up approximately 80 percent of all filers for a given plan year. The chart below summarizes the number of plans with plan year end dates of 12/31/2001, dates ending in each month of 2002 (except for the single day 12/31/2002), and then separately 12/31/2002. The Form 5500 Private Pension Plan Research Files generated prior to 2002 contain data corresponding to all but the right-most bar of the chart. Beginning in 2002, the Form 5500 Private Pension Plan Research Files and the corresponding Private Pension Plan Bulletins contain data corresponding to all but the left-most bar.
