The project provides services to help the students and university for the administration, documentation, tracking, and reporting of instructor-led-training programs. FTMS is focused on administrators as office processes and are considered a tool for corporate training-backsuch; a training management system acts as a central enterprise resource planning software specific to the training industry. They can be complemented by other learning technologies such as a application for the administration, documentation, learning management system. Is a software tracking, and reporting of instructor-led-training programs. FTMS is focus on back-office processes and are considered a tool for corporate training administrators such as a training management system acts as central enterprise resource planning, software specific to the training industry. They can be complemented by other learning technologies such as a learning management .system ,During the period of university education, and in some cases in school students in certain disciplines such as engineering and medicine need field training. Part of the period of education in the field is considered a requirement for graduation and a certificate of study. The government intends to train students before graduation. This training is of paramount importance; otherwise, it would not be a prerequisite for graduation from university.Many students in the Gaza Strip always look to find companies to training whengraduation. They always want the lowest possible time to find the companies to training. On the other side, they use traditional approaches to announce training companies, also use the hardcopy to evaluate the student. Several trainees and companies recently began to use social media to search of training site. Accordingly, it would be better for both students and university to work through an organized and well-known channel to meet each other; this and channel should be easy to reach nsiveinexpe.
