Collaborative Papers report work which has not been performed solely at the International Institute for Applied Systems Analysis and which has received only limited review. Views or opinions expressed herein do not necessarily represent those of the Institute, its National Member Organizations, or other organizations supporting the work.

INTERNATIONAL INSTITUTE FOR APPLIED SYSTEMS ANALYSIS
2361 Laxenburg, Austria

FOREWORD

This bibliography originates from the Workshop on Large-Scale Linear Programming held at IIASA over the period June 2-6 1980. The Proceedings of this Workshop (edited by G.B. Dantzig, M.A.H. Dempster and M. Kallio, IIASA CP-81-S1) contains a bibliography covering North American and Western European publications. This bibliography is a supplement which covers Eastern European work on large-scale linear programming.

As some important work may still be missing, further contributions (with English translations of titles published in other languages) are most welcome. Such contributions should be sent to H. Gasking at IIASA, where a computerized bibliography is maintained. Revised versions will be issued from time to time.

This bibliography could not have been produced without the assistance of K. Beer, V.A. Bulavski, N.K. Burova, M.A.H. Dempster, M. Grauer, M. Kallio, V.E. Krivonozhko, A. Propoi, M. Soismaa, B. Strazicky and R.A. Zvjagina.
