List of Plant and Animal Species Living in Lake Biwa¹⁾ (Corrected Third Edition)

SYUITI MORI²⁾ and TAIZO MIURA

Otsu Hydrobiological Station, Kyoto University, Otsu

(Received March 28, 1990)

Abstract This is a corrected third edition of the list of plant and animal species living in Lake Biwa. In the present edition 230 species of plants and 93 species of animals are newly added with correcting a number of already published specific names. Classification systems, especially concerning lower plants and animals, are fairly modified.

INTRODUCTION

This is a corrected third edition of the list which was published first in 1970 and secondly revised in 1980. A fair number of specific names were corrected and many newly found species were added. The classification system was renewed on some groups.

The first list was compiled mainly basing on the intensive study of Lake Biwa performed from 1962 through 1965 with a financial aid of the Ministry of Construction. Up to that time no all-inclusive list of plants and animals of Lake Biwa had ever been presented.

The second, revised list was then made by referring the results of investigations of the International Biological Programme (IBP) which was executed from 1964 through 1972 and also the results obtained through the extensive study on flora and fauna performed by the Director Council of the National Marine and Inland Water Biological Stations of Japan from 1974 through 1977. Financial aids of these two studies were offered by the Ministry of Education, Science and Culture. In this revised list 54 species of plants and 52 species of animals (total 106 species) were newly added with correcting a number of scientific names and some classification systems.

Ten years have passed since the publication of the revised list and thinking of the accumulation of vast knowledge realized during this period, the authors reached the idea that the time is now really appropriate to publish the renewed third edition.

In the present edition 230 species of plants and 93 species of animals (total 323 species) are newly added with correcting a number of already published specific names. Classification systems, especially concerning lower plants and animals, were fairly modified.

The symbol ● ahead of the specific names indicates those species are endemic to Lake Biwa and its connected water areas.

Lake Biwa is the most important lake in Japan viewing from various aspects and accordingly considerable numbers of works have hitherto been published and now are

²⁾ Present Address: Higashikubotacho 76, Kitashirakawa, Sakyo-ku, Kyoto, Japan

being done actively. The authors have referred these many literature and wish here to express sincere thanks to all these researchers, especially to Dr. Arinobu Kusakabe for attached algae, Dr. Kenichiro Negoro for planktonic plants and animals, Dr. Tetsuya Narita for Oligochaeta, Dr. Matsunae Tsuda for insects, Dr. Manabu Sasa for Diptera, Dr. Kazumi Tanida for Trichoptera, Dr. Naoshi Watanabe for Gastropod, Drs. Nobuhiko Mizuno and Hiroya Kawanabe for fishes and Mr. Tomio Okada and Dr. Kokichi Yamamoto for birds.

As for renewing the classification systems the following three books were most helpful: Yatsu and Uchida's "Dictionary on Classification Names of Animals" edited by Dr. Toru Uchida (1972), Kawamura's "Freshwater Biology of Japan" newly edited by Dr. Masuzo Uéno (1973) and "Freshwater Invertebrates of the United States, 2nd ed." by Dr. Robert W. Pennak (1978).

Fam. Siluridae

Parasilurus asotus Lin.

● *P. biwaensis* Tomoda

● *P. lithophilus* Tomoda

Fam. Bagridae

Pelteobagrus undiceps (Sauvage)

Liobagrus reini Hilgendorf

Ord. Anguillida

Fam. Anguillidae

Anguilla japonica Tem. et Schl.

Ord. Cyprinodontida

Fam. Cyprinodontidae

Orizias latipes (Tem. et Schl.)

Ord. Gasterosteida

Fam. Gasterosteidae

Gasterosteus aculeatus microcephala
(Girard)

Ord. Percida

Fam. Channidae

Channa maculata (Lacapada)

Fam. Centrarchidae

Micropterus salmoides (Lacépède)

Lepomis macrochirus Rafinesque

Fam. Eleotridae

Mogurnda obscura (Tem. et Schl.)

Fam. Gobiidae

Rhinogobius similis (Gill)

Chaenogobius urotaenia (Hilgendorf)

● *C. isaza* Tanaka

Ord. Cottida

Fam. Cottidae

Cottus pollux (Günther)

Class Aves

Ord. Passeres

Fam. Troglodytidae

Cinclus pallasii Tem.

Ord. Halcyones

- Fam. Alcedinidae
Ceryle lugubris (Tem.)
Alceso atthis Lin.
- Ord. Accipitres
Fam. Falcomidae
Milvus migrans (Boddaest)
- Fam. Pandionidae
Pandion haliaëtus (Lin.)
- Ord. Gressores
Fam. Ardeidae
Ardea cinerea Lin.
Egretta alba modesta (Gray)
E. intermedia (Wagler)
E. garzetta (Lin.)
Bubulcus ibis (Lin.)
Butorides striatus (Lin.)
Nycticorax nycticorax (Lin.)
Isobrychus sinensis (Gmelin)
I. eurhythmus (Swinhoe)
- Ord. Anseres
Fam. Anatidae
Cygnus cygnus (Lin.)
Anser albifrons (Scopoli)
A. fabalis (Latham)
A. platyrhynchos Lin.
A. poecilorhyncha J.R.Forster
A. strepera Lin.
A. crecca Lin.
A. formosa Georgi
A. falcata Georgi
A. penelope Lin.
A. acuta Lin.
A. clypeata Lin.
A. querquedula Lin.
Aix galericulata (Lin.)
Aythya ferina (Lin.)
A. fuligula (Lin.)
- A. marila* (Lin.)
Bucephala clangula (Lin.)
Melanitta fusca (Lin.)
M. nigra (Lin.)
Mergellus albellus Lin.
Mergus serrator Lin.
M. merganser Lin.
- Ord. Stegonopodes
Fam. Phalacrocoracidae
Phalacrocorax carbo Lin.
P. capillatus (Tem. et Schl.)
- Ord. Tubinares
Fam. Puffinidae
Calanectris leucomelas (Tem.)
- Ord. Pygopodea
Fam. Podicipidae
Podiceps ruficollis (Pallas)
P. caspicus Hablizi
P. griseigena Boddaert
P. cristata (Lin.)
P. auritus (Lin.)
- Ord. Gaviiformes
Fam. Gaviidae
Gavia stellatus (Pontoppidan)
- Ord. Lari
Fam. Laridae
Sterna albifrons Pallas
S. hirundo Lin.
Rissa tridactyla (Lin.)
Larus argentatus Pontoppidan
L. canus Lin.
L. crassirostris Vieillot
L. ridibundus Lin.
- Ord. Alectoridae
Fam. Rallidae
Gallinula chloropus (Lin.)
Fulica atra Lin.
