App vs. COVID-19

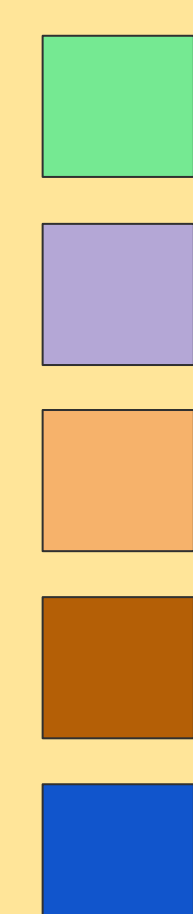

Logan Wellersdick, Samantha Daniels, Aaron Carpenter, Ava Young, Connor Linden, & Dr. Timothy Ludwig

Through data collection and analysis, we will aim to correlate infection control behaviors with the spread of COVID-19 and examine how certain behaviors contribute to the spread of COVID-19.

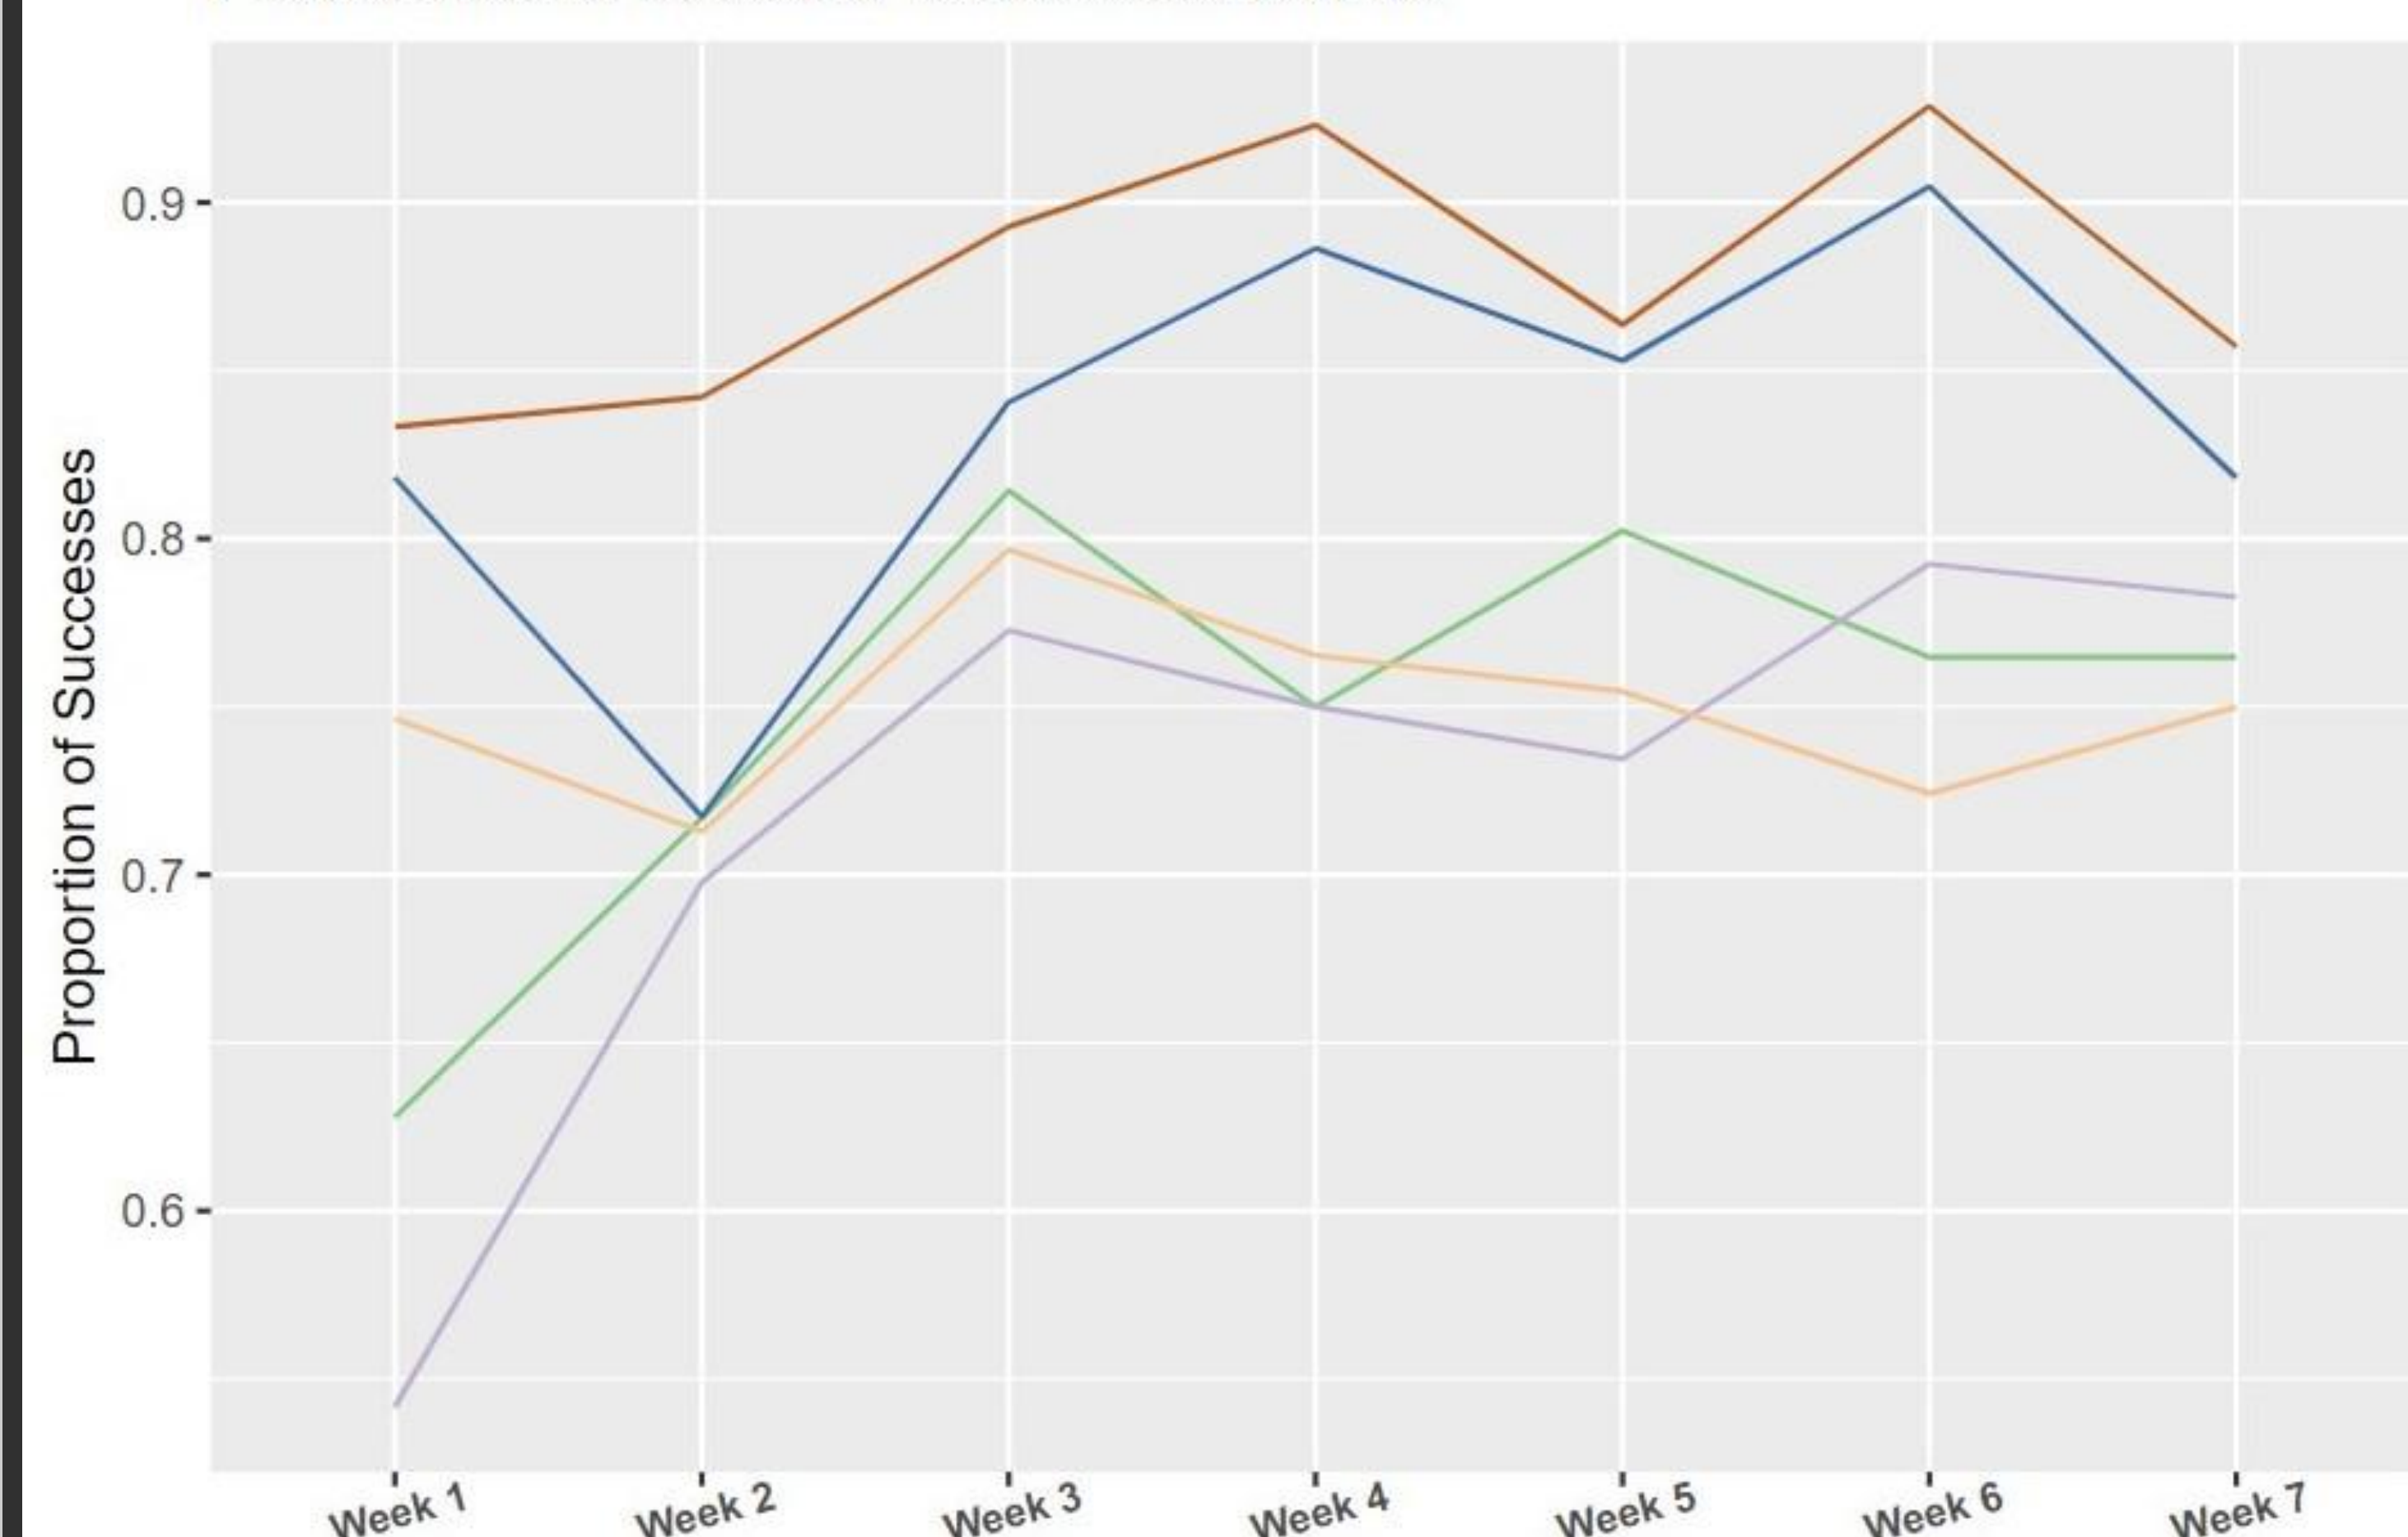

Background

Infection Control Behaviors

- removing masks by ear loops
- social distancing
- using stairs
- washing or sanitizing hands
- wearing a mask

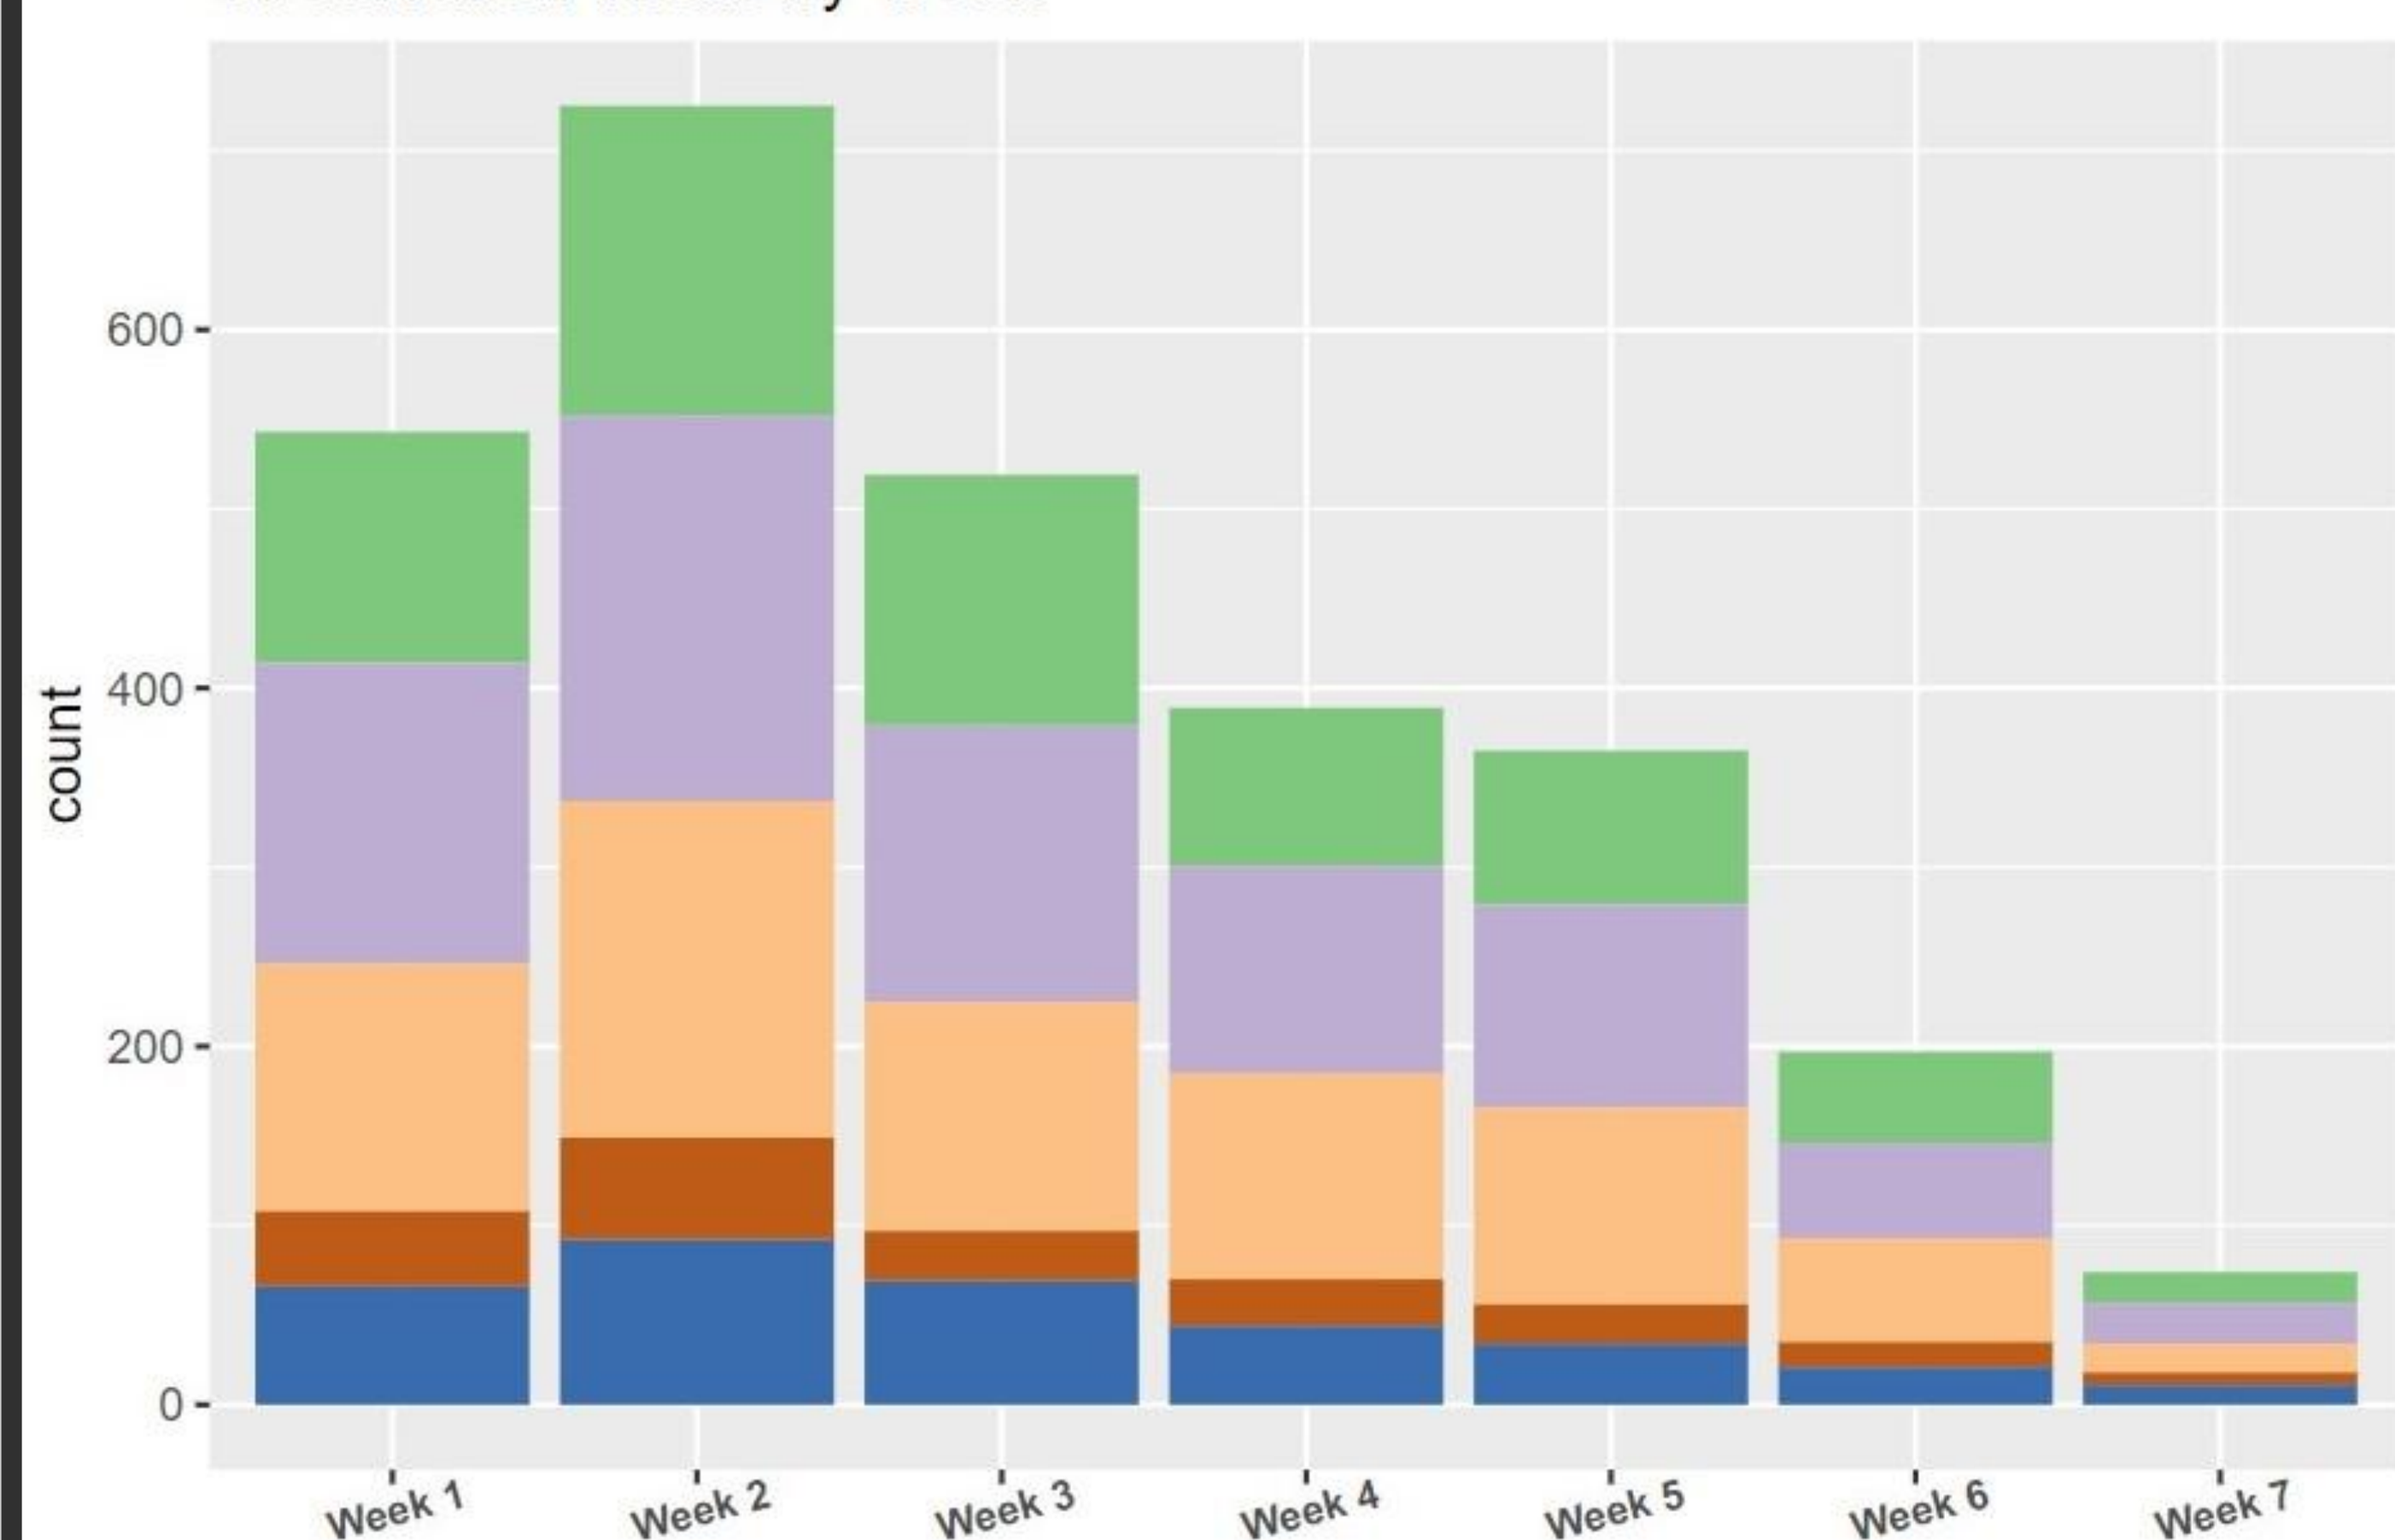

Prevalence of Infection Control Behaviors

Methods

- Data from iOS and Android application Habitood
- Inspect data for signs of poor infection control behaviors.

Observation Totals by Week

Implications

Our analysis will:

- Improve understanding of infection control behaviors.
- Show alternative methods of evaluating COVID-19.

Observation Totals by Location
