

PEDIATRIC MENTAL HEALTH REFERRALS:

GUIDANCE AND DIRECTORY FOR PEDIATRIC PRIMARY CARE PROVIDERS IN NEW HAMPSHIRE

September 2020

This publication is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of an award totaling \$445,000 with 20% financed with non-governmental sources. The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement, by HRSA, HHS, or the U.S. Government. For more information, please visit [HRSA.gov](https://hrsa.gov).

About this resource

This resource includes both a flyer and a limited directory of mental health services in New Hampshire to support pediatric primary care providers in offering successful referral-options for their patients who may need mental health services.

The directory includes information such as practice name, address, phone number, website, towns served, Medicaid acceptance, and programs or types of services. The directory does not list the many individual private mental health providers practicing in New Hampshire due to the changing nature of practices, providers, and insurance. However, additional providers may be included in future versions.

Note about printing

The cover page and next four pages should be printed on standard 8.5x11 size paper, however, the rest of the Directory should be printed on legal size paper for the best results.

Note for providers

The University of New Hampshire and the New Hampshire Department of Health and Human Services do not endorse any listed provider organization and do not guarantee the quality or accuracy of the services listed in the directory.

Note for organizations listed in the directory

All directory information was collected between June–September 2020 from online research on the providers' websites. An email was sent to all listed organizations for additional information. If your organization is listed and you would like to update the information provided in this directory for its next publication, please email NHPIP@UNH.edu

State-wide Directories and Resources

211

211 is New Hampshire's first statewide, comprehensive, information and referral service. New Hampshire residents (or providers) need only to dial 211 to be connected, at no cost, with trained Information and Referral Specialists who can provide them with the health and human service information they need to get help, give help, or discover options.

New Hampshire Coalition Against Domestic and Sexual Violence

24-hour Domestic Violence Helpline: 1-866-644-3574

24-hour Sexual Assault Hotline: 1-800-277-5570

Individuals can call the statewide helpline to talk with an advocate.

In emergency situations, call 911.

New Hampshire Family-Centered Early Supports and Services

Program Directory from NH DHHS

Developmental Services Area Agencies

Agencies that support children over the age of three

<https://www.dhhs.nh.gov/dcbcs/bds/agencies.htm>

Family Resource Centers

Family Resource Centers provide comprehensive services to parents and their children, from pregnancy through age 18. In most cases, services include parenting classes, parent-child groups, early learning centers, play groups, assistance with tax preparation, information and referral, after school assistance, and other programs to meet specific community needs. Family resource centers are open to the public and can be especially supportive of families struggling with challenging issues, limited financial resources, and/or troubled family dynamics.

Student Assistance Program

SAP counselors served more than 10,000 NH kids in 2016, helping youth with various social issues, such as bullying, dating violence, and peer pressure. The program has grown from five schools in 2013 to more than 40 NH middle/high schools today.

HOW DO I...

Make a quality mental health referral?

This referral guide offers recommendations to improve efficiencies in developing a closed loop-referral process

IDENTIFY RESOURCES

- Assess the needs of your patient population, then find local mental health professionals who can meet these needs.
- If resources are scarce, use remote or telehealth options.

DEVELOP RELATIONSHIPS

- Improve communication between physical and mental health providers to increase access for patients.
- Care coordination is enhanced when everyone connects on a regular basis.

SCREENINGS & ASSESSMENTS

- Evidence-based screening tools identify patients who need treatment.
- A deeper assessment identifies what needs the patient/families may have to ensure that you are making appropriate referrals.

SHARED GOALS

- Join your patient in treatment planning; their ability to incorporate the plan into their lives will increase the chance of positive outcomes.
- Your patient's goals may not align with the goals of the medical provider, but creating shared goals will help them experience success and continue with the treatment process.

CLOSING THE LOOP

- To determine whether your referral was a success, develop a process flow with clear steps to establish a referral to a specialist in a timely manner. Include supporting information for the specialist so their response will address the reason for the referral. Ensure that the PCP, specialist, and patient/family are satisfied, and communicate with all parties in a timely manner.
- Maximize the process with EHR support.
- When possible, develop a mutual Release of Information form at both sides of the referral. Lack of consent to share PHI inhibits the ability to provide quality care.
- Active communication among the team of providers maximizes patient outcomes.
