## Impaired Cerebrovascular Reactivity in Patients With Atrial Fibrillation

J Am Coll Cardiol 2019;73:1230-2.
In the following sentence, the $\mathrm{MCAv}_{\text {mean }}$ values for AF patients who were fibrillating was incorrect.
AF patients who were fibrillating when studied ( $55 \%$ of total) had a lower $\mathrm{MCAv}_{\text {mean }}\left(31.1 \pm 8.7 \mathrm{~cm} \cdot \mathrm{~s}^{-1}\right.$ ) than those not fibrillating ( $59.2 \pm 10.5 \mathrm{~cm} \cdot \mathrm{~s}^{-1}$ ) ( $\mathrm{p}<0.001$ ).
The MCAv $\mathrm{m}_{\text {mean }}$ values for AF patients who were fibrillating should have been $44.4 \pm 10.9 \mathrm{~cm} \cdot \mathrm{~s}^{-1}$. The correct sentence is as follows.

AF patients who were fibrillating when studied ( $55 \%$ of total) had a lower MCAv mean $\left(44.4 \pm 10.9 \mathrm{~cm} \cdot \mathrm{~s}^{-1}\right.$ ) than those not fibrillating ( $59.2 \pm 10.5 \mathrm{~cm} \cdot \mathrm{~s}^{-1}$ ) $(\mathrm{p}<0.001$ ).
