RURAL YOUTH FUTURES: GREENVILLE CONSOLIDATED SCHOOL

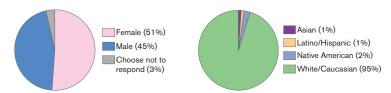

SURVEY RESULTS • SUMMER 2020

s rural communities face changes in local economies, populations, and workforce needs, what does the next generation of residents and workers value and want? That question was the motivation for the Rural Youth Futures project. Researchers and extension agents from several universities joined forces with local non-profits to find out what middle and high schoolers think in two forest-dependent regions: Piscataquis/Northern Somerset County in Maine and Coos County in Oregon. This is one in a series of fact sheets designed to present summary information to each participating school and county about the perceptions and aspirations of local youth.

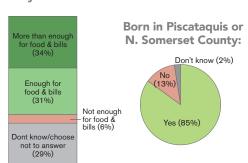

APPROACH

With permission from the school principal, students in grades 6–12 at Greenville Consolidated School were given a link to an anonymous, electronic survey in February 2019. Participation was voluntary. Greenville Consolidated School had 106 students in these grades during 2018-2019, 94 of which took the survey for a participation rate of 88%. Every question was optional, so the number of responses varies by question. Fact sheets for all schools and each county are available online at: http://ewp.uoregon.edu/RuralYouth.

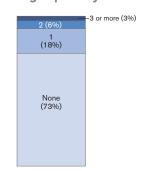

Gender that you identify as: Category that best describes you:

Perception of family finances:

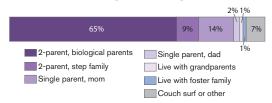

School changes from moving in past 5 years:

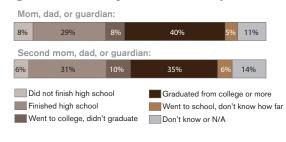

DEMOGRAPHICS

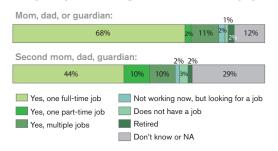

Describe the family structure you live with:

What level of education did your parents or guardians, whom you live with, complete?

Do your parents or guardians work for pay?

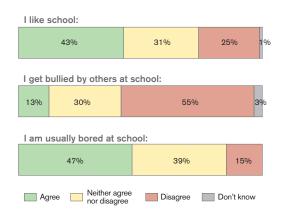

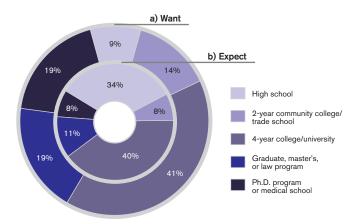

SCHOOL RESULTS

Schools in rural communities are critical. They bring families together, support civic interaction, and foster workforce development. Schools also influence youth aspirations for future education. To learn more about these things in Piscataquis and Northern Somerset County schools, we asked students to tell us about their school experience and future goals, what they felt were barriers to those goals, and the extracurricular activities they participated in.

How much do you agree or disagree with the following statements about your school?

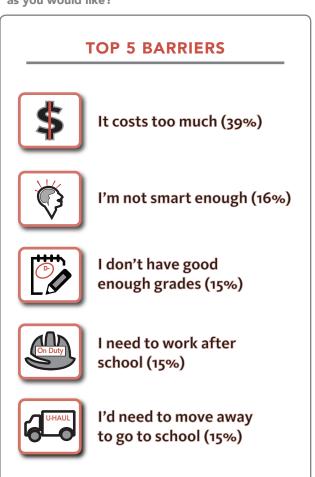

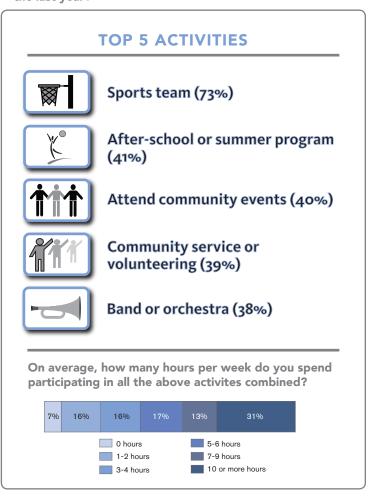

What is the highest level of education that you a) want, and b) expect to complete?

What could prevent you from going as far in school as you would like?

Which of the following activities have you participated in the last year?

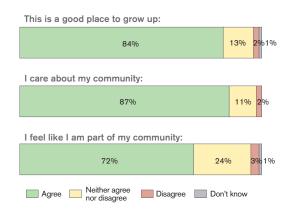

COMMUNITY RESULTS

Increasing the number of young people and working families is a critical issue in many rural towns. Natural amenities and attachment to community can retain young people or attract in-migration. We asked students to tell us about their community to better understand what the community has to offer. We also asked them where they want to live in the future to see if there's an interest in living in these places among young people.

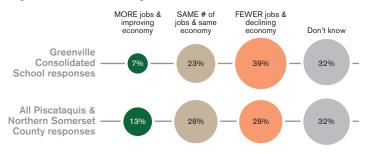

How much do you agree or disagree with the following statements about your community:

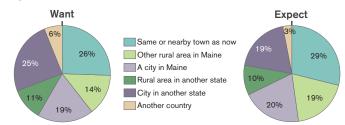

What would you like to see more of in your community?

More indoor recreation (hockey rinks, gyms) (66%) More shops and retail stores (56%) More restaurants (46%) More medical care and hospitals (39%) More outdoor recreation (37%)

Where do you see your community in the future in terms of jobs and the economy?

Where do you want to live and expect to live when you are 30 years old?

Do you think the following are important problems facing your community?

your community?		
	Greenville Consolidated School "yes" responses	All Piscataquis & N. Somerset County "yes" responses
Not enough things to do in town	61%	55%
People moving away	60%	42%
Not enough jobs	55%	50%
People not having enough money	51%	55%
Lack of public transportation	44%	47%
Drug or alcohol abuse	43%	45%
Not enough affordable or good housing	30%	30%
Not enough healthcare or doctors	24%	33%
Not enough outdoor activities	13%	28%
Poor school quality	10%	32%
Crime	6%	17%
Homelessness	3% 16%	

YOUTH PROGRAMMING

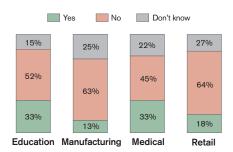

Youth today are the community's future labor force. How prepared they feel, and how willing they are to work in local industries, influences their success in the workforce. We asked students to tell us about their career plans, including what barriers they may face and what training support they need. Because the outdoors is so important to our community, we also asked them about outdoor recreation activities that they participated in.

What would be your dream job when you are 30?

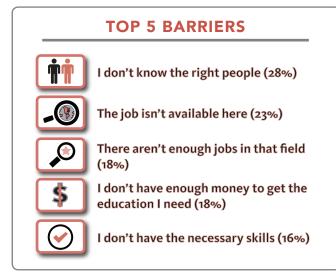

For this question, students could type in any answer to the question of what their dream job would be. We wanted to get a sense of their ideal career aspirations. All responses were entered into a program that generated this word cloud, where the larger and darker an entry is, the more times it was mentioned by students. Some students didn't name a particular job, but described in general what they hoped they'd be doing.

dance biologist
pilotscientist di
officerCOMPANY guide
wardenWOrkworking
