OVERVIEW

ABOUT INSPIRE@REDLANDS

In support of the mission of the University of Redlands, the main objective of the Institutional Scholarly Publication and Information Repository (InSPIRe) is to:

- Enrich scholarship through the digital preservation of and open access to the University's scholarly output and creative works
- Further teaching and learning opportunities by facilitating the publication of open educational resources (OERs)
- Foster understanding of the opportunities, rights, and responsibilities related to online publishing
- Increase awareness of the University's scholarly and creative activities

InSPIRe is a project of the Armacost Library in support of our institutional mission to foster a community of scholars through the sharing of ideas. InSPIRe is indexed by open access tools including [Unpaywall](#) and [OpenDOAR](#). To learn more about the Armacost library visit [About Us: Our Vision and Mission](#). To learn more about InSPIRe visit [InSPIRe Guidelines and Policies](#)

ABOUT LIBRARY PUBLISHING

The Library Publishing Coalition defines library publishing as "[T]he set of activities led by college and university libraries to support the creation, dissemination, and curation of scholarly, creative, and/or educational works. Generally, library publishing requires a production process, presents original work not previously made available, and applies a level of certification to the content published, whether through peer review or extension of the institutional brand. Based on core library values, and building on the traditional skills of librarians, it is distinguished from other publishing fields by a preference for Open Access dissemination as well as a willingness to embrace informal and experimental forms of scholarly communication and to challenge the status quo."

ABOUT OPEN ACCESS

"Open-access (OA) literature is digital, online, free of charge, and free of most copyright and licensing restrictions." – Peter Suber

- For **students** this means being able to access online, scholarly literature without having to pay fees for a single article or pay a higher tuition that affords access to scholarly literature using your myRedlands username and password.
- For **alumni** this means not losing access to online, scholarly literature once you've graduated.
- For **authors** this means opting to remove barriers that inhibit scholarly communication, and wrestling with costs and uncertainties that come with using newer business models.

ABOUT ARMACOST LIBRARY

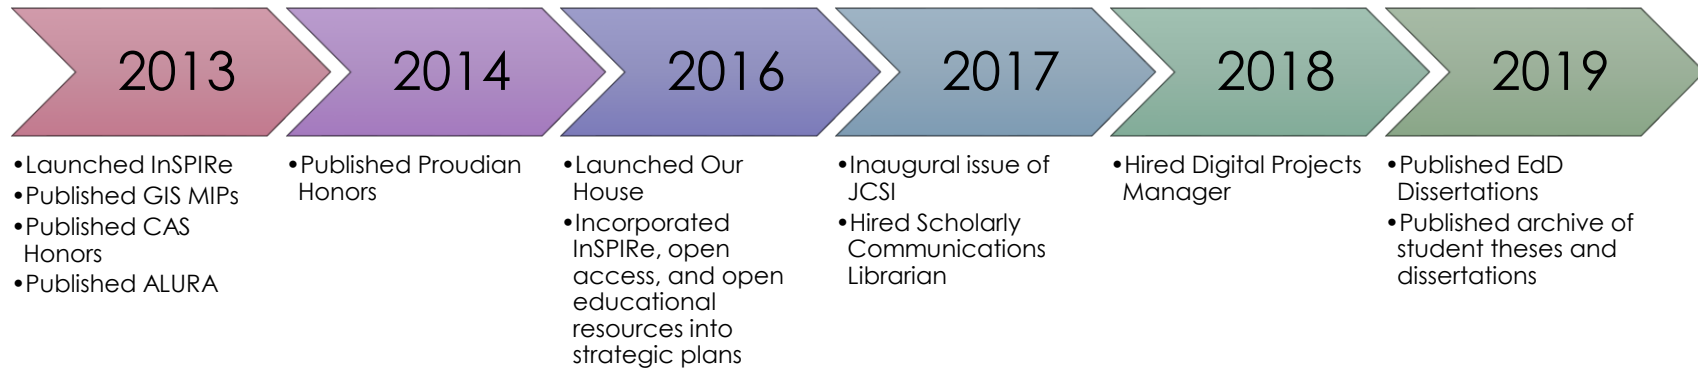

OUR VISION

As the intellectual center of the University of Redlands, the Armacost Library will enrich our community by partnering across campus to nurture the scholarly and cultural life of the University and by inspiring students to engage in self-directed inquiry and the exchange of ideas in order to become effective critical thinkers and responsible doers as they strive to positively impact the world.

OUR MISSION

The mission of the Armacost Library at the University of Redlands is to support the teaching, research and learning goals of the University community by providing access to information resources in various formats and by promoting lifelong learning skills to identify, find, evaluate, use and communicate information that reflects a commitment to academic rigor and a better understanding of our world.

OUR HOUSE

ABOUT

In the spring of 2013, the University of Redlands began a tradition of formally recognizing the research and creative endeavors of faculty and staff through Our House. Our House shares the wide-ranging interests and disciplines of our scholars, authors and artists. Their scholarly and artistic accomplishments infuse our teaching and curriculum, impact our students both in and outside the classroom, and contribute to the collective energy, wisdom, innovation and creativity of our university.

Scholars, authors, and artists are encouraged to [share legal versions of their work](#) through InSPIRe.

MS GIS MIPS

ABOUT

The University of Redlands' Master of Science in Geographic Information Systems Program is a one-year intensive program designed for professionals seeking to enhance their existing academic foundations with a comprehensive understanding of geographic information science fundamentals and the use and application of GI technologies. All students in the program complete a major individual project that addresses the needs of a real-world client. The project is comprehensive and involves requirements analysis, database and systems design, software development, systems implementation, and eventual deployment. The abstracts of those projects are provided here, along with full-text versions and other ancillary material for selected projects.

PROUDIAN HONORS

ABOUT

The Vahe Proudian Interdisciplinary Honors Program brings exceptional students together with some of the University's strongest faculty for a challenging and rewarding educational experience.

The Proudian Program is designed for up to twelve talented students in each graduating class who wish to explore interdisciplinary learning.

The program was founded in 1977 with a contribution by Andrew and Sallee Proudian to honor Mr. Proudian's father, Vahe. Over a number of years we have developed the program specifically for the Redlands campus using the following assumptions:

- An interdisciplinary approach to questions is more fruitful than traditional disciplinary inquiries
- Some of the very best learning takes place in small seminars with talented, highly motivated students and faculty
- International study is an invaluable part of undergraduate education

UNIVERSITY OF REDLANDS

Mission

The University of Redlands is a private, independent liberal arts university committed to providing a personalized education that frees students to make enlightened choices.

Redlands emphasizes academic rigor, curricular diversity and innovative teaching. Redlands fosters a community of scholars and encourages a pluralistic notion of values by challenging assumptions and stereotypes in both classes and activities. A Redlands education goes beyond training to embrace a reflective understanding of our world; it proceeds from information to insight, from knowledge to meaning.

Welcoming intellectually curious students of diverse religious, ethnic, national and socioeconomic backgrounds, the University seeks to develop responsible citizenship as part of a complete education. Redlands encourages a community atmosphere with exceptional opportunity for student leadership and interaction. For working adults, the University offers innovative academic programs at convenient locations and times.

Redlands blends liberal arts and professional programs, applied and theoretical study, traditional majors and self-designed contracts for graduation. Small classes enable each student to participate in class discussion, to work closely with professors, and to receive extensive individual attention. Redlands remains sensitive to contemporary trends in society and challenges students to commit themselves to a lifetime of learning.
