GLOBAL TRENDS

GLOBAL CITY TEAMS CHALLENGE

- 100s of local/global organizations
- Technology meets Urbanization
- Cities as a Global Model: cities are improving lives and making a disproportionate impact
- Cities have become models for governments across the world on how to address global challenges

World Bank Headquarters, Washington, D.C.

In Jan. 2010, US Mayors upon returning from the COP climate change meetings in Europe, demanded that the US Department of State afford them the opportunity to join US diplomats in negotiations in future climate meetings.

Secretary Clinton created the Special Representative's Office for Global Intergovernmental Affairs, thus including for the first time local officials in international multilateral negotiations.

Over the past few years, cities—and especially "smart cities" are leapfrogging progress on several international metrics by leveraging technology to modernize their services and infrastructure—have emerged as leaders on key issues of international concern.

In 2017, Hidalgo and Horacio Rodríguez Larreta, Mayor of Buenos Aires, spearheaded the Urban 20 (U20), a platform for major cities in G20 countries to bring their "urban perspective" to the G20 member states in tackling common problems, showcasing their innovative approaches leveraging emerging technologies at the local level to tackle global issues.

In April 2018, mayors from 20 cities signed the U20's first Joint Declaration; six months later, representatives from more than 30 cities convened for the U20's inaugural summit in Buenos Aires.

This summer, Los Angeles, CA Mayor Eric Garcetti had a private audience the Pope Francis at the Vatican, where the two discussed climate change, poverty, youth, and immigration.

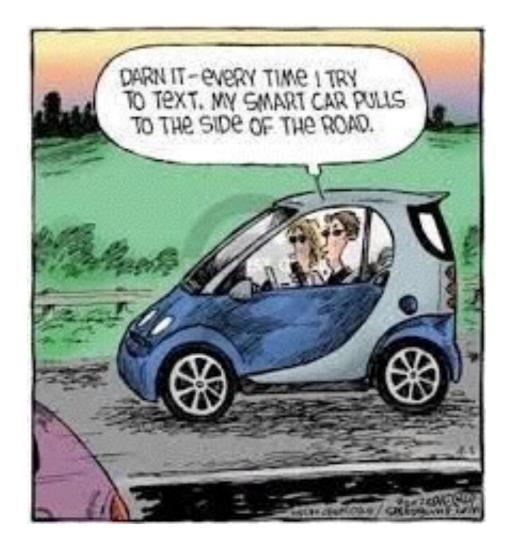

TECHNOLOGY MEETS URBANIZATION

There are over 200 localglobal organizations impacting international relations and policy, largely because of the pace at which cities are using and embracing technology and innovation.

SMART CITIES OF THE FUTURE

THREE PILLARS FOR A SMART AND CONNECTED CITY OR COMMUNITY

100% CONNECTED 100% MOBILE 100% RESILIENT

100% CONNECTED

 Infrastructure • People • Things •Data •Energy

100% MOBILE

- Transportation
 Transit + Access
 Logistics Hubs
- Airports / Ports

100% RESILIENT

- Secure
- •Safe

• Sustainable Environmental, Economic & Social

US EXAMPLE: JAMAICA, QUEENS, NYC

- **3T Strategy**
- Technology
- Tourism
- Transportation

US EXAMPLE: JAMAICA, QUEENS, NYC

Technology: Universal Broadband and Digital Literacy Movement

Tourism: Jameco Exchange Art Gallery inclusive of Digital Art

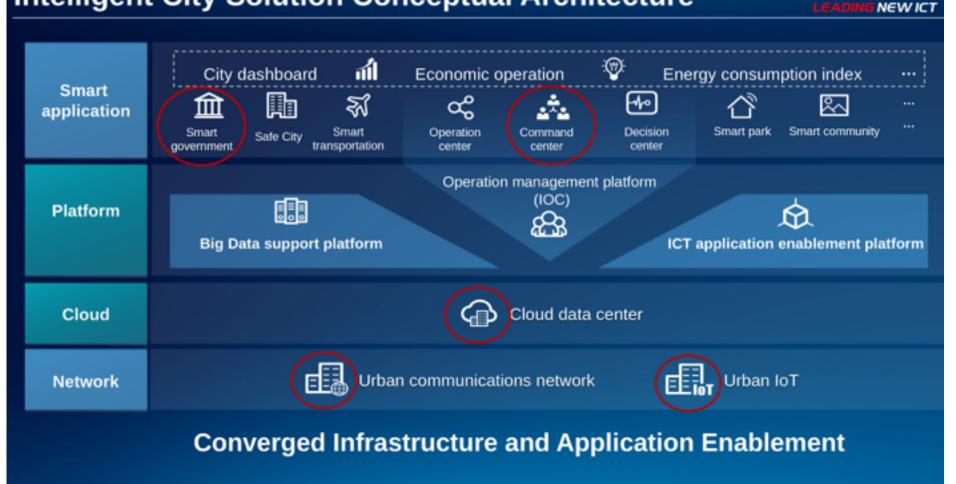

ASIAN EX: SHENZHEN, CHINA

Safety, central nerve
Transportation
Tourism adding green spaces throughout

ASIAN EX: SHENZHEN, CHINA

Intelligent City Solution Conceptual Architecture

EUROPEAN EX: E-ESTONIA

- 99% Gov Services on-line
- 98% Electronic identity cards
- 46.7% i-Voting
- In 2017 became legal to test self-driving vehicles on all roads

SMART VILLAGES AND TOWNS

- 3.4 billion rural people in the world that do not have access to global markets
- Enabling entrepreneurship, job training and onboarding to open innovation platforms

• Low cost and low energy

"The internet is becoming the town hall of the global village of tomorrow" Bill Gates, Business Magnate & Philanthropist

www.smartvillagemovement.org/

FROM CITIES TO SMART REGIONS

- Smart Regions 2018 Infrastructure Challenge
- Economies of Scale
- Wider impact
- Leveraging resources
- Leveraging collective data

Slovakia Smart Regions

IEEE STANDARDS ASSOCIATION

GLOBAL TREND: DATA IS THE NEW OIL

- Will it be a curse or blessing?
- How is privacy protected and how do we create individual, government and global standards?
- Can we create new government or public policy organizations?

GLOBAL TREND: INNOVATION 2.0

Universities as Innovation Hubs

- Decentralized model as opposed to giant manufacturing hubs
- Workforce of the future responsibility to teach, educate and train for the jobs of the future remains local

GLOBAL TREND: USE OF AI/ML

• In 2019 US Dept. of Commerce's Global Cities Teams Connect, launched two new superclusters on AI/ML and Smart Buildings with hundreds of cities and mayors around the world to create global standards

THE BEST WAY TO PREDICT THE FUTURE IS TO DESIGN IT YOURSELF!

THANK YOU!
