This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Physics Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

Instructor: Dr. Gareth Perry Office: 104C Tiernan Hall Email: gperry@njit.edu

Office Hours: Mondays 09:00 am – 10:00 am, Thursdays 02:00 pm – 03:00 pm, or by appointment.
All office hours will be help virtually, via Dr. Perry's Webex room: <https://njit.webex.com/meet/gperry>

CLASS SCHEDULE:

Section 001

Mondays, 12:30 pm – 01:50 pm, GITC 3700 (also via Webex; link information on Canvas page calendar)
Wednesdays, 12:30 pm – 01:50 pm, GITC 1400 (also via Webex; link information on Canvas page calendar)

Section 025

Tuesdays, 09:00 am – 10:20 am, KUPF 118 (also via Webex; link information on Canvas page calendar)
Thursdays, 09:00 am – 10:20 am, CTR ATTRIUM (also via Webex; link information on Canvas page calendar)

PREREQUISITE: Math 131 (if not originally placed in Math 111)

COREQUISITE: Math 111 or Math 132, Phys 111A (unless accommodations are given).

FAILURE TO MEET EITHER CO-Requisites or PRE-Requisites will result in student being dropped from class.

NOTE: UNLESS ACCOMODATIONS ARE GIVEN, LABORATORY COURSE, PHYS 111A, MUST BE TAKEN CONCURRENTLY WITH PHYS 111. THE STUDENT MUST REGISTER FOR BOTH THE LEC/REC AND THE LAB COURSE. WITHDRAWAL FROM EITHER COURSE WILL CAUSE A SIMULTANEOUS WITHDRAWAL FROM BOTH COURSES.

COURSE MATERIAL:

Access to electronic version of the textbook and online homework can be obtained through purchasing of: **Mastering Physics with Pearson eText – Standalone Access Card – for University Physics with Modern Physics (by Young & Freedman), 15th edition, ISBN 9780135159552.** Note: only the card for the 15th edition will allow you to access the eText and homework assignments.

You must login through the course's Canvas page, using the **MyLab and Mastering** link. If you would also like a hardcopy version of the textbook, you can use any recent edition of the Young & Freedman's text. We use Chapters 1 to 13 which sometimes you can get separately from the rest.

Homework assignments will be posted on-line. Students login, download and solve the assigned problems, and submit answers to the automated grading system. Specific Information for the **Pearson Mastering (PM)** homework system are as follows:

The Pearson Mastering course IDs are:

perry56624 for students in Section 001

perry47099 for students in Section 025

For your own reference, record the unique course identifier announced by your instructor, and your login ID and password. Instructors cannot access forgotten logins or passwords.

ATTENDANCE:

It is expected that students will attend all lectures (in person or online). Attendance will be taken at all exams. If you have excusable absences contact the Dean of First Year Students. If you must withdraw from the course, do it officially through the Registrar.

Do not simply stop attending and taking exams: that forces the instructor to assign a course grade of "F".

HELP:

Visit or email your instructors if you are having trouble with the course; do not simply hope for a miracle and fall further behind. The Physics Dept. office on the 4th floor of Tiernan has specific information on tutoring. Physics tutoring is available through the CAPE organization, and possibly elsewhere.

GRADING:

Your final letter grade in Phys 111 will be based on a composite score for term's work that includes the midterm exam, the final exam, lecture quizzes, and assignments.

1) **Common Midterm Exam** The exam schedule is:

- **Common Midterm Exam:** Monday, Nov 09, 2020 4:15 – 5:45 PM

All exams will be done online. The general policy is that students who miss an exam will receive a score of zero for that exam. That score will be included in the calculation of your final grade. Students who anticipate an absence from an exam should discuss their situation with their instructor prior to their absence. In order to be qualified to receive a "make-up" common exam score (a very rare occurrence), the student should present documentation for not being able to take the test as scheduled. As is the standard policy of NJIT, this documentation should be presented to the student's to the **Dean of Students - (973) 596-3466, Room 255 Campus Center**. Both the Physics 111 instructor and Dean of Students must concur in permitting a "make-up" exam. Students who miss exams that do not present documentation within 7 days of the exam will receive a score of zero for the exam.

In the event that the above qualification is met, a separate make-up test for the missed exam will not be offered. Instead, the portion of the final exam relevant to the contents of the missed test will be considered for giving a grade for the missed test. The instructor will evaluate the final exam questions from those chapters and normalize this portion of the student's grade for the missed exam.

2) **Lecture Quizzes** In-class quizzes covering the preceding or current work will be given during lectures at the rate of approximately 1 per week. Those scores count toward your final course grade. **There are no make-ups for in class activities.** Students missing a quiz will receive a grade of zero for that item.

3) **Homework** Homework assignments will be posted on-line using the Pearson Mastering Homework System, as described previously.

4) **Final Exam** **Comprehensive Final Exam will be given** during Final Exam Period (December 15-21, 2020).

Final Letter Grades: Here are the approximate weights to be used for calculating the composite score:

- **20%** for the common midterm exam
- **30%** for the final exam
- **25%** for the total of homework work
- **25%** for the all in-class quizzes

The cutoff percentages for various letter grades will be:

Percentage	Letter Grade
> 85%	A
85 - 80	B+
80 – 70	B
70 - 65	C+
65 - 55	C
55 - 50	D
< 50	F

Final grades are not negotiable: A score of 84.99% is a B+, not an A.

HONOR CODE STATEMENT:

NJIT has a zero-tolerance policy for cheating of any kind and for student behavior that disrupts learning by others. Violations will be reported to the Dean of Students. The penalties range from a minimum of failure in the course plus disciplinary probation up to expulsion from NJIT. Avoid situations where your own behavior could be misinterpreted as dishonorable. **Students are required to agree to the NJIT Honor Code on each exam, assignment, quiz, etc. for the course.**

Please do not eat, drink, or create noise in class that interferes with the work of other students or instructors. Creating noise or otherwise interfering with the work of the class will not be tolerated.

Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at: <http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>.

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu.

LEARNING OUTCOMES:

For this course, which is the first of the introductory Physics series, you can expect to be assessed on the following learning outcomes:

1. Manipulate vectors in components form and as magnitude/direction. Perform vector operations such as addition, subtraction, scalar, and cross products.
2. Recall the definitions and relationships involving position, velocity, speed, acceleration.
3. Apply the equations governing 1-D constant acceleration to mechanical systems for various initial conditions.
4. Apply the equations governing 2-D constant acceleration to mechanical systems for various initial conditions.
5. Comprehend the meaning of the equations governing net force and acceleration (Newton's Laws) for linear motion, and be able to manipulate them in conjunction with a free-body diagram to obtain any desired quantitative relationship.
6. Understand the extension of free-body diagrams and Newton's laws to rotational motion.
7. Understand the extension of free-body diagrams and Newton's laws to frictional forces.
8. Comprehend the definitions and application of work, energy, and conservation of energy principles to solving mechanical and non-conservative systems.
9. Comprehend the meaning of equations governing momentum, impulse, and collisions. Apply the equations governing momentum, impulse, and collisions mechanical systems for various initial conditions. Understand under what conditions momentum is conserved and how to use this relation to calculate unknown quantities based on physical relationships, initial conditions, and known quantities.
10. Define and calculate the center of mass of a system as well as the moment of inertia.
11. Extend the concepts and equations of 1-D constant acceleration to rotational motion for various initial conditions.
12. Understand the extension of linear motion equations to rotational motion. Comprehend the meaning of the equations governing rotational motion and acceleration, and be able to manipulate them in conjunction with a free-body diagram to obtain any desired quantitative relationship.
13. Understand the extension of work, energy, and conservation of energy principles to rotational motion.
14. Recall the definitions of angular momentum. Apply this concept to conservation of angular momentum.
15. Apply concepts of Newton's Laws to equilibrium of linear and rotational motion.
16. Understand the extension of conservation of energy and mass equations to fluid dynamics.
17. Understand the extension of Newton's Laws and energy concepts to gravitation.

TOPIC	TEXT STUDIES	NOTES
Week 1 Units, Physical Quantities, and Vectors	8/31 Chapt.1	
Week 2 Motion in One Dimension	9/7 Chapt. 2	
Week 3 Motion in Two Dimensions	9/14 Chapt. 3	Optional: Sect. 3.5
Week 4 Newton's Laws of Motion	9/21 Chapt. 4	
Week 5 Applying Newton's Laws	9/28 Chapt. 5	Optional: Sect. 5.5
Week 6 Work, Kinetic Energy	10/05 Chapt. 6	Refresh: scalar (dot) product
Common Midterm Exam	11/9	Chapters 1-6
Week 7 Potential Energy, Conservation of Energy	10/12 Chapt. 7	Optional: Sect. 7.5
Week 8 Linear Momentum and Collision	10/19 Chapt. 8	Optional: Sect. 8.6
Week 9 Rotation, Moment of Inertia	10/26 Chapt. 9	
Week 10 Dynamics of Rotational Motion	11/2 Chapt. 10 – Sections 1-6	Refresh: vector (cross) product
Week 11 Static Equilibrium	11/09 Chapt. 11 – Sections 1-3	
Week 12 Fluid Mechanics	11/16 Chap.12 – Sections 1-5	
Week 13 Universal Gravitation	11/23 Chap. 13	Optional: Sect. 13.6, 13.7
Week 14	11/30 REVIEW	
Final Exam		Comprehensive Exam Chapters 1 to 13 with emphasis on 7 to 13

Fall 2020 Academic Calendar

September 1	Tuesday	First Day of Classes
September 5	Saturday	Saturday Classes Begin
September 7	Monday	Labor Day
September 8	Tuesday	Monday classes meet
September 8	Tuesday	Last Day to Add/Drop a Class
September 8	Tuesday	Last Day for 100% Refund, Full or Partial Withdrawal
September 9	Wednesday	W Grades Posted for Course Withdrawal
September 14	Monday	Last Day for 90% Refund, Full or Partial Withdrawal - No Refund for Partial Withdrawal after this date
September 28	Monday	Last Day for 50% Refund, Full Withdrawal
October 19	Monday	Last Day for 25% Refund, Full Withdrawal
November 9	Monday	Last Day to Withdraw
November 25	Wednesday	Friday Classes Meet
November 26	Thursday	Thanksgiving Recess Begins
November 29	Sunday	Thanksgiving Recess Ends
December 10	Thursday	Last Day of Classes
December 11	Friday	Reading Day 1
December 14	Monday	Reading Day 2
December 15	Tuesday	Final Exams Begin
December 21	Monday	Final Exams End
December 23	Wednesday	Final Grades Due
