### **Biochemical Society Focused Meetings**

#### Third Intracellular Proteolysis Meeting

Auditorio de Tenerife, Santa Cruz de Tenerife, Canary Islands, Spain, 5–7 March 2008

Edited by Rosa Farràs (Centro de Investigación Príncipe Felipe, Valencia, Spain), Gemma Marfany (Barcelona, Spain), Manuel Rodríguez (CICbioGUNE, Derio, Spain), Eduardo Salido (La Laguna, Tenerife, Spain) and Dimitris Xirodimas (Dundee, U.K.).

Much to know about proteolysis: intricate proteolytic machineries compromise essential cellular functions	
Gemma Marfany, Rosa Farràs, Eduardo Salido, Dimitris Xirodimas and Manuel S. Rodríguez	781-785
Life, death and burial: multifaceted impact of autophagy Lorenzo Galluzzi, Eugenia Morselli, José Miguel Vicencio, Oliver Kepp, Nicholas Joza, Nicolas Tajeddine and Guido Kroemer	786-790
Versatile role of the yeast ubiquitin ligase Rsp5p in intracellular trafficking Naima Belgareh-Touzé, Sébastien Léon, Zoi Erpapazoglou, Marta Stawiecka-Mirota, Danièle Urban-Grimal and Rosine Haguenauer-Tsapis	791-796
Ubiquitin ligase E6-AP and its role in human disease Konstantin Matentzoglu and Martin Scheffner	797-801
Novel substrates and functions for the ubiquitin-like molecule NEDD8 Dimitris P. Xirodimas	802-806
Chaperone-driven proteasome assembly Rina Rosenzweig and Michael H. Glickman	807-812
Selected oral communications	
How autophagy is related to programmed cell death during the development of the nervous system Patricia Boya, María Angeles Mellén and Enrique I, de la Rosa	813-817
Regulation of ER-associated degradation via p97/VCP-interacting motif Petek Ballar and Shengyun Fang	818-822
Efficient approaches for characterizing ubiquitinated proteins Roland Hjerpe and Manuel S. Rodríguez	823-827
Strategies for the identification of novel inhibitors of deubiquitinating enzymes Seth J. Goldenberg, Jeffrey L. McDermott, Tauseef R. Butt, Michael R. Mattern and Benjamin Nicholson	828-832
To ubiquitinate or to deubiquitinate: it all depends on the partners Gemma Marfany and Amanda Denuc	833-838
Is there an alternative to the proteasome in cytosolic protein degradation? Luis C. Antón and Eugenia M. Villasevil	839-842
Do F-box proteins with a C-terminal domain homologous with the tobacco lectin play a role in protein degradation in plants? Nausicaä Lannoo, Willy J. Peumans and Els J.M.Van Damme	843-847

Mercedes Vazquez-Chantada, David Fernandez-Ramos, Laura Gomez-Santos, Shelly C. Lu, Jose M. Mato and Maria L. Martinez-Chantar	848-852
Innate link between NF- $\kappa$ B activity and ubiquitin-like modifiers Valérie Lang and Manuel S. Rodríguez	853-857
Fos family protein degradation by the proteasome Tiphanie Gomard, Isabelle Jariel-Encontre, Jihane Basbous, Guillaume Bossis, Gabriel Mocquet-Torcy and Marc Piechaczyk	858-863
Regulation and function of JunB in cell proliferation Marc Piechaczyk and Rosa Farràs	864-867
Functional analysis of the SUMOylation pathway in <i>Drosophila</i> Ana Talamillo, Jonatan Sánchez and Rosa Barrio	868-873
SUMO under stress Denis Tempé, Marc Piechaczyk and Guillaume Bossis	874-878
Remodelling of the ubiquitin–proteasome system in response to interferons <b>Ulrike Seifert and Elke Krüger</b>	879-884
Edited by Tony Corfield (Bristol, U.K.), Mark Holness (Barts and the London School of Medicine an and Philip Newsholme (University College Dublin, Ireland).	ıd Dentistry, U.K.)
Lipscos in the papernatic $\theta$ call, implications for insulin corretion	
Malin Fex and Hindrik Mulder	885-890
Malin Fex and Hindrik Mulder   Role of nuclear receptors in the modulation of insulin secretion in lipid-induced insulin resistance   Mary C. Sugden and Mark J. Holness	885-890 891-900
Malin Fex and Hindrik Mulder   Role of nuclear receptors in the modulation of insulin secretion in lipid-induced insulin resistance   Mary C. Sugden and Mark J. Holness   Glucolipotoxicity of the pancreatic β-cell: myth or reality?   Vincent Poitout	885-890 891-900 901-904
Lipases in the pancreatic $\beta$ -cell: implications for insulin secretionMalin Fex and Hindrik MulderRole of nuclear receptors in the modulation of insulin secretion in lipid-induced insulin resistanceMary C. Sugden and Mark J. HolnessGlucolipotoxicity of the pancreatic $\beta$ -cell: myth or reality?Vincent PoitoutThe cytoprotective actions of long-chain mono-unsaturated fatty acids in pancreatic $\beta$ -cellsNoel G. Morgan, Shalinee Dhaval, Eleftheria Diakogiannaki and Hannah I. Welters	885-890 891-900 901-904 905-908
Lipases in the partreatic $\beta$ -cell: implications for insulin secretionMalin Fex and Hindrik MulderRole of nuclear receptors in the modulation of insulin secretion in lipid-induced insulin resistanceMary C. Sugden and Mark J. HolnessGlucolipotoxicity of the pancreatic $\beta$ -cell: myth or reality?Vincent PoitoutThe cytoprotective actions of long-chain mono-unsaturated fatty acids in pancreatic $\beta$ -cellsNoel G. Morgan, Shalinee Dhayal, Eleftheria Diakogiannaki and Hannah J. WeltersAn update on lipotoxic endoplasmic reticulum stress in pancreatic $\beta$ -cellsMiriam Cnop, Mariana Igoillo-Esteve, Daniel A. Cunha, Laurence Ladrière and Décio L. Eizirik	885-890 891-900 901-904 905-908 909-915
Lipses in the pancreatic $\beta$ -cent implications for insulin secretionMalin Fex and Hindrik MulderRole of nuclear receptors in the modulation of insulin secretion in lipid-induced insulin resistanceMary C. Sugden and Mark J. HolnessGlucolipotoxicity of the pancreatic $\beta$ -cell: myth or reality?Vincent PoitoutThe cytoprotective actions of long-chain mono-unsaturated fatty acids in pancreatic $\beta$ -cellsNoel G. Morgan, Shalinee Dhayal, Eleftheria Diakogiannaki and Hannah J. WeltersAn update on lipotoxic endoplasmic reticulum stress in pancreatic $\beta$ -cellsMiriam Cnop, Mariana Igoillo-Esteve, Daniel A. Cunha, Laurence Ladrière and Décio L. EizirikThe diverse roles of protein kinase C in pancreatic $\beta$ -cell function Trevor J. Biden, Carsten Schmitz-Peiffer, James G. Burchfield, Ebru Gurisik, James Cantley, Christopher J. Mitchell and Lee Carpenter	885-890 891-900 901-904 905-908 909-915 916-919
The particulation procession of the particulation of the particu	885-890 891-900 901-904 905-908 909-915 916-919 920-929

	כר	
÷		
r	-	_
ſ	D	
E	$\Box$	
J	$\sim$	

The sensitivity of pancreatic $\beta$ -cells to mitochondrial injuries triggered by lipotoxicity and oxidative stress	
Ning Li, Francesca Frigerio and Pierre Maechler	930-934
Adipose tissue expandability: the metabolic problems of obesity may arise from the inability to become more obese Chong Yew Tan and Antonio Vidal-Puig	935-940
Regulation and consequences of differential gene expression in diabetic kidney disease Madeline Murphy, John Crean, Derek P. Brazil, Denise Sadlier, Finian Martin	
and Catherine Godson	941-945
Molecular mechanisms of proteinuria in diabetes Luigi Gnudi	946-949
The long-chain fatty acid receptor, GPR40, and glucolipotoxicity: investigations using GPR40-knockout mice <b>Ruth Brownlie, Rachel M. Mayers, Jackie A. Pierce, Anna E. Marley and David M. Smith</b>	950-954
Selected oral communications	
Saturated and unsaturated (including arachidonic acid) non-esterified fatty acid modulation of insulin secretion from pancreatic $\beta$ -cells <b>Deirdre Keane and Philip Newsholme</b>	955-958
Differential regulation of the ER stress response by long-chain fatty acids in the pancreatic $\beta$ -cell Eleftheria Diakogiannaki and Noel G. Morgan	959-962
Lack of TXNIP protects $\beta$ -cells against glucotoxicity Anath Shalev	963-965
Integration of Structures, Spectroscopies and Mechanisms University of Edinburgh, U.K., 2–4 April 2008	
Organized by Ulrich Brandt (Frankfurt, Germany), Steve Chapman (Edinburgh, U.K.), Peter Heathc University of London, U.K.), John Ingledew (St Andrews, U.K.), Mike Jones (Bristol, U.K.), Bernd Lu Germany), Fraser MacMillan (University of East Anglia, Norwich, U.K.), Hartmut Michel (Max-Planc	oate (Queen Mary, dwig (Frankfurt, :k-Institute for

Germany), Fraser MacMillan (University of East Anglia, Norwich, U.K.), Hartmut Michel (Max-Planck-Institute for Biophysics, Frankfurt am Main, Germany), Peter Rich (University College London, U.K.) and John Walker (MRC Dunn Human Nutrition Unit, Cambridge, U.K.). Edited by Ulrich Brandt and Peter Rich.

Significance of protein crowding, order and mobility for photosynthetic<br/>membrane functions967-970Helmut Kirchhoff967-970Nucleotide-induced conformational changes in the Escherichia coli<br/>NADH:ubiquinone oxidoreductase (complex I)<br/>Thomas Pohl, Daniel Schneider, Ruth Hielscher, Stefan Stolpe, Katerina Dörner,<br/>Markus Kohlstädt, Bettina Böttcher, Petra Hellwig and Thorsten Friedrich971-975The production of reactive oxygen species by complex I<br/>Judy Hirst, Martin S. King and Kenneth R. Pryde976-980

A structural analysis of the transient interaction between the cytochrome $bc_1$ complex and its substrate cytochrome $c$ Ajeeta Nyola and Carola Hunte	981-985
Bioenergetics at the gold surface: SEIRAS probes photosynthetic and respiratory reactions at the monolayer level Kenichi Ataka and Joachim Heberle	986-991
<i>Rhodobacter sphaeroides</i> haem protein: a novel cytochrome with nitric oxide dioxygenase activity Bor-Ran Li, J.L. Ross Anderson, Christopher G. Mowat, Caroline S. Miles, Graeme A. Reid and Stephen K. Chapman	992-995
Electroneutral and electrogenic catalysis by dihaem-containing succinate:quinone	
C. Roy D. Lancaster, Elena Herzog, Hanno D. Juhnke, M. Gregor Madej, Florian G. Müller, Rajsekhar Paul and Philipp G. Schleidt	996-1000
<sup>55</sup> Mn-ENDOR of the S <sub>2</sub> -state multiline signal of Photosystem II from Thermosynechococcus elongatus Susanne Pudollek, Friedhelm Lendzian and Robert Bittl	1001-1004
The role of multihaem cytochromes in the respiration of nitrite in <i>Escherichia coli</i> and Fe(III) in <i>Shewanella oneidensis</i> <b>Thomas A. Clarke, Tracey Holley, Robert S. Hartshorne, Jim K. Fredrickson, John M. Zachara,</b> <b>Liang Shi and David J. Richardson</b>	1005-1010
Quinone-reactive proteins devoid of haem <i>b</i> form widespread membrane-bound electron transport modules in bacterial respiration <b>Jörg Simon and Melanie Kern</b>	1011-1016
Quantum dots for single-pair fluorescence resonance energy transfer in membrane-integrated EF <sub>0</sub> F <sub>1</sub> <b>Eva Galvez, Monika Düser, Michael Börsch, Jörg Wrachtrup and Peter Gräber</b>	1017-1021
Further insights into the structure of the alternative oxidase: from plants to parasites	1077-1076
Structural organization of the V-ATPase and its implications for regulatory assembly and disassembly Meikel Diepholz, Michael Börsch and Betting Böttcher	1027-1031
Selected oral communication	1027 1051
Are <i>Escherichia coli</i> OXPHOS complexes concentrated in specialized zones within the plasma membrane?	
Tchern Lenn, Mark C. Leake and Conrad W. Mullineaux	1032-1036
Bioanalysis in Oxidative Stress	

University of Exeter, U.K., 2–3 April 2008

Edited by John Moody (Plymouth, U.K.) and Paul Winyard (Peninsula Medical School, Exeter, U.K.).

# High-resolution mass spectrometry analysis of protein oxidations and resultant loss of function

Stephen Barnes, Erin M. Shonsey, Shannon M. Eliuk, David Stella, Kerri Barrett, Om P. Srivastava, Helen Kim and Matthew B. Renfrow

contents

Dicarbonyls linked to damage in the powerhouse: glycation of mitochondrial proteins and oxidative stress <b>Naila Rabbani and Paul J. Thornalley</b>	1045-1050
Mass spectrometry to detect the site specificity of advanced glycation/ lipoxidation end-product formation on protein: some challenges and solutions Jennifer M. Ames	1051-1054
Analysis of eicosanoids and related lipid mediators using mass spectrometry Benjamin H. Maskrey and Valerie B. O'Donnell	1055-1059
Key issues in F <sub>2</sub> -isoprostane analysis Jaffar Nourooz-Zadeh	1060-1065
Mass spectrometry approaches for vitamin E research John K. Lodge	1066-1070
Biomarkers of oxidative damage to DNA and repair Steffen Loft, Pernille Høgh Danielsen, Lone Mikkelsen, Lotte Risom, Lykke Forchhammer and Peter Møller	1071-1076
Mass spectrometric analysis of HOCl- and free-radical-induced damage to lipids and proteins <b>Andrew R. Pitt and Corinne M. Spickett</b>	1077-1082

## Independent Meeting

### British Yeast Group Meeting 2008

National University of Ireland Maynooth, Maynooth, Co. Kildare, Ireland, 18–20 March 2008

#### Edited by Gary Jones (National University of Ireland Maynooth, Ireland).

Cellular factors important for the <i>de novo</i> formation of yeast prions Mick Tuite, Klement Stojanovski, Frederique Ness, Gloria Merritt and Nadejda Koloteva-Levine	1083-1087
Post-transcriptional regulation of gene expression in response to iron deficiency: co-ordinated metabolic reprogramming by yeast mRNA-binding proteins Sandra V. Vergara and Dennis J. Thiele	1088-1090
Next-generation sequencing: applications beyond genomes Samuel Marguerat, Brian T. Wilhelm and Jürg Bähler	1091-1096
The spindle pole body plays a key role in controlling mitotic commitment in the fission yeast <i>Schizosaccharomyces pombe</i>	1097-1101
