## Biochemical Society Focused Meetings

### Ubiquitin-Proteasome System, Dynamics and Targeting

Institut d'Estudis Catalans, Casa de Convalescència, Barcelona, Spain, 27–29 May 2009

**Edited by Bernat Crosas (Institute of Molecular Biology of Barcelona, Spain), Rosa Farràs (Centro de Investigación Príncipe Felipe, Valencia, Spain), Gemma Marfany (University of Barcelona, Spain), Manuel Rodríguez (CIC bioGUNE, Derio, Spain) and Timothy Thomson (Institute of Molecular Biology of Barcelona, Spain).**

Searching for the boundaries: unlimited expansion of ubiquitin and ubiquitin-like signals in multiple cellular functions

**Bernat Crosas, Rosa Farràs, Gemma Marfany, Manuel S. Rodríguez and Timothy M. Thomson**

1–5

Assembly manual for the proteasome regulatory particle: the first draft

**Soyeon Park, Geng Tian, Jeroen Roelofs and Daniel Finley**

6–13

Drug discovery and assay development in the ubiquitin-proteasome system

**Celia R. Berkers and Huib Ovaa**

14–20

### Selected oral communications

A new map to understand deubiquitination

**Elijah J. Katz, Marta Isasa and Bernat Crosas**

21–28

Chaperone-assisted assembly of the proteasome core particle

**Ana C. Matias, Paula C. Ramos and R. Jürgen Dohmen**

29–33

SUMO and ubiquitin paths converge

**Amanda Denuc and Gemma Marfany**

34–39

Properties of natural and artificial proteins displaying multiple ubiquitin-binding domains

**Fernando Lopitz-Otsoa, Manuel S. Rodríguez and Fabienne Aillet**

40–45

SUMO chains: polymeric signals

**Alfred C.O. Vertegaal**

46–49

Antiviral activity of resveratrol

**Michela Campagna and Carmen Rivas**

50–53

SUMO and ubiquitin modifications during steroid hormone synthesis and function

**Ana Talamillo, David Martín, Roland Hjerpe, Jonatan Sánchez and Rosa Barrio**

54–59

Diversity of the SUMOylation machinery in plants

**L. María Lois**

60–64

The anaphase-promoting complex/cyclosome (APC/C): cell-cycle-dependent and -independent functions

**Eusebio Manchado, Manuel Eguren and Marcos Malumbres**

65–71

Cyclin A and Nek2A: APC/C-Cdc20 substrates invisible to the mitotic spindle checkpoint <b>Wouter van Zon and Rob M.F. Wolthuis</b>	<b>72-77</b>
Fifteen years of APC/cyclosome: a short and impressive biography <b>Kobi J. Simpson-Lavy, Yifat S. Oren, Oren Feine, Julia Sajman, Tammy Listovsky and Michael Brandeis</b>	<b>78-82</b>
Acetylation of cyclin A: a new cell cycle regulatory mechanism <b>Francesca Mateo, Miriam Vidal-Laliena, Maria Jesus Pujol and Oriol Bachs</b>	<b>83-86</b>
Role of ubiquitination in the DNA damage response: proteomic analysis to identify new DNA-damage-induced ubiquitinated proteins <b>Jogitha Selvarajah and Abdeladim Moumen</b>	<b>87-91</b>
SUMO in the mammalian response to DNA damage <b>Joanna R. Morris</b>	<b>92-97</b>
Lessons from interconnected ubiquitylation and acetylation of p53: think metastable networks <b>Monsef Benkirane, Claude Sardet and Olivier Coux</b>	<b>98-103</b>
Control of PCNA deubiquitylation in yeast <b>Alfonso Gallego-Sánchez, Francisco Conde, Pedro San Segundo and Avelino Bueno</b>	<b>104-109</b>
Ubiquitin-dependent regulation of translesion polymerases <b>Abel C.S. Chun and Dong-Yan Jin</b>	<b>110-115</b>
Ubiquitin and SUMO signalling in DNA repair <b>Timothy M. Thomson and Marta Guerra-Rebollo</b>	<b>116-131</b>
Strategies for the identification of ubiquitin ligase inhibitors <b>Seth J. Goldenberg, Jeffrey G. Marblestone, Michael R. Mattern and Benjamin Nicholson</b>	<b>132-136</b>
The therapeutic potential of deubiquitinating enzyme inhibitors <b>Frédéric Colland</b>	<b>137-143</b>
Parkin-mediated ubiquitin signalling in aggresome formation and autophagy <b>Lih-Shen Chin, James A. Olzmann and Lian Li</b>	<b>144-149</b>
Emerging role of Alzheimer's disease-associated ubiquilin-1 in protein aggregation <b>Annakaisa Haapasalo, Jayashree Viswanathan, Lars Bertram, Hilkka Soininen, Rudolph E. Tanzi and Mikko Hiltunen</b>	<b>150-155</b>
Control of NF- $\kappa$ B activation by the COP9 signalosome <b>Katrin Schweitzer and Michael Naumann</b>	<b>156-161</b>

---

## **Molecular Mechanisms in Exocytosis and Endocytosis**

University of Edinburgh, Edinburgh, U.K., 5-7 April 2009

**Edited by Rolly Wiegand (Edinburgh, U.K.).**

---

Regulation of SNAP-25 trafficking and function by palmitoylation <b>Jennifer Greaves, Gerald R. Prescott, Oforiwa A. Gorleku and Luke H. Chamberlain</b>	<b>163-166</b>
---	----------------

Synthesis of fusogenic lipids through activation of phospholipase D <sub>1</sub> by GTPases and the kinase RSK2 is required for calcium-regulated exocytosis in neuroendocrine cells <b>Nicolas Vitale</b>	167–171
Presynaptic targets for acute ethanol sensitivity <b>Jeff W. Barclay, Margaret E. Graham, Mark R. Edwards, James R. Johnson, Alan Morgan and Robert D. Burgoyne</b>	172–176
Role of neuronal Ca <sup>2+</sup> -sensor proteins in Golgi–cell-surface membrane traffic <b>Marina Mikhaylova, Pasham Parameshwar Reddy and Michael R. Kreutz</b>	177–180
Intersectin 1: a versatile actor in the synaptic vesicle cycle <b>Arndt Pechstein, Oleg Shupliakov and Volker Haucke</b>	181–186
The Sla2p/HIP1/HIP1R family: similar structure, similar function in endocytosis? <b>Irit Gottfried, Marcelo Ehrlich and Uri Ashery</b>	187–191
Molecular mechanism of secretory vesicle docking <b>Heidi de Wit</b>	192–198
Versatile roles for myosin Va in dense core vesicle biogenesis and function <b>Tanja Kögel, Claudia Margarethe Bittins, Rüdiger Rudolf and Hans-Hermann Gerdes</b>	199–204
Cell-wide analysis of secretory granule dynamics in three dimensions in living pancreatic $\beta$ -cells: evidence against a role for AMPK-dependent phosphorylation of KLC1 at Ser <sup>517</sup> /Ser <sup>520</sup> in glucose-stimulated insulin granule movement <b>Angela McDonald, Sarah Fogarty, Isabelle Leclerc, Elaine V. Hill, D. Grahame Hardie and Guy A. Rutter</b>	205–208
Autoinhibition of SNARE complex assembly by a conformational switch represents a conserved feature of syntaxins <b>Chris MacDonald, Mary Munson and Nia J. Bryant</b>	209–212
Role of C2 domain proteins during synaptic vesicle exocytosis <b>Sascha Martens</b>	213–216

---

## Gene Expression in Development and Disease

University of Glasgow, Glasgow, U.K., 16–17 April 2009

**Edited by Sheila Graham (Glasgow, U.K.).**

---

Regulation of cyclin D1 gene expression <b>Ini-Isabée Witzel, Li Fang Koh and Neil D. Perkins</b>	217–222
The role of p63 in epidermal morphogenesis and neoplasia <b>Simon S. McDade and Dennis J. McCance</b>	223–228
microRNA in erythrocytes <b>Andrew J. Hamilton</b>	229–231
Structure and function of mRNA export adaptors <b>Matthew J. Walsh, Guillaume M. Hautbergue and Stuart A. Wilson</b>	232–236
Coupling genetics and post-genomic approaches to decipher the cellular splicing code at a systems-wide level <b>Yilei Liu and David J. Elliott</b>	237–241

On track with P-bodies  
**Meeta Kulkarni, Sevim Ozgur and Georg Stoecklin**

242-251

---

## **Nuclear Envelope Disease and Chromatin Organization 2009**

University of Durham, Durham, U.K., 22-23 April 2009

**Edited by Chris Hutchison (Durham, U.K.).**

---

- The nuclear envelope from basic biology to therapy  
**Howard J. Worman and Roland Foisner** 253-256
- Genotype-phenotype correlations in laminopathies: how does fate translate?  
**Juergen Scharner, Viola F. Gnocchi, Juliet A. Ellis and Peter S. Zammit** 257-262
- Exploring the relationship between interphase gene positioning, transcriptional regulation and the nuclear matrix  
**Lauren S. Elcock and Joanna M. Bridger** 263-267
- Nuclear envelope influences on genome organization  
**Poonam Malik, Nikolaj Zuleger and Eric C. Schirmer** 268-272
- Nucleocytoplasmic transport in yeast: a few roles for many actors  
**Jindriska Fiserova and Martin W. Goldberg** 273-277
- Nesprin isoforms: are they inside or outside the nucleus?  
**Glenn E. Morris and K. Natalie Randles** 278-280
- Lamin A-linked progerias: is farnesylation the be all and end all?  
**Dawn T. Smallwood and Sue Shackleton** 281-286
- Progeria, the nucleolus and farnesyltransferase inhibitors  
**Ishita S. Mehta, Joanna M. Bridger and Ian R. Kill** 287-291
- HIV protease inhibitors inhibit FACE1/ZMPSTE24: a mechanism for acquired lipodystrophy in patients on highly active antiretroviral therapy?  
**Chris N. Goulbourne and David J. Vaux** 292-296
- Lamins as cancer biomarkers  
**Clare R. Foster, Stefan A. Przyborski, Robert G. Wilson and Christopher J. Hutchison** 297-300
- Lamins: 'structure goes cycling'  
**Mirta Boban, Juliane Braun and Roland Foisner** 301-306
- The plant nuclear envelope in focus  
**Katja Graumann and David E. Evans** 307-311
