Cognitive Informatics and Soft Computing

Proceeding of CISC 2017

Series: Advances in Intelligent Systems and Computing

- Focuses on cognitive computation, learning, and big data systems for the control and modeling of complex systems
- Highlights current technological advances in the area of computational intelligence, as well as hybrid intelligent models and applications
- Offers a valuable basis for pursuing future work

The book presents new approaches and methods for solving real-world problems. It offers, in particular, exploratory research that describes novel approaches in the fields of Cognitive Informatics, Cognitive Computing, Computational Intelligence, Advanced Computing, Hybrid Intelligent Models and Applications. New algorithms and methods in a variety of fields are also presented, together with solution-based approaches. The topics addressed include various theoretical aspects and applications of Computer Science, Artificial Intelligence, Cybernetics, Automation Control Theory and Software Engineering.
