## SISSEJUHATUS

Käesolev aruanne on koostatud COUNTER statistikale tuginedes. **COUNTER Code of Practice** on standard, mille alusel kogutakse statistikat elektrooniliste ressursside kasutamise kohta (Dunkley, s.a). COUNTER on mõeldud **raamatukogudele** ning andmebaaside, platvormide ja/või ajakirjadega seotud olevatele **teenusepakkujatele** (näiteks kirjastajad), kes vajavad usaldusväärset kasutajastatistika ülevaadet. Kui vaadata teemat raamatukogu vaatevinklist, siis kõige lihtsamalt öeldes hõlbustab COUNTER raamatukogudel elektroonilise kasutustatistika registreerimist, vahendamist ja tõlgendamist. Kasutusstatistikat saab rahvusvahelisel tasandil koguda ajakirjade, andmebaaside (sh multimeediaandmebaaside), raamatute ja teatmeteoste kohta ning väljastatud statistikaaruanded on järjepidavad, usaldusväärsed ja üksteisega ühilduvad. Raamatukogud saavad nende andmetele tuginedes oma tegevust paremini planeerida, näiteks teha kaalutletumaid ostuotsuseid. Samade andmete põhjal saavad oma tegevust organiseerida ka need, kes raamatukogudele oma teenuseid pakuvad (General Information, s.a; Usage Reports s.a).

Peaegu kõigis EMÜ andmebaasides oli võimalik tellida COUNTER statistikat ning tundub, et see on andmebaaside enda süsteemid tahaplaanile lükanud. COUNTER on hea vahend, sest võimaldab saada kõikide andmebaaside kohta sarnast informatsiooni, mis omakorda aitab kogutud andmeid võrreldavamasse konteksti paigutada. Statistikaaruannet tellides saab valida konkreetse ajaperioodi, mille kohta andmeid soovitakse saada (General Information, s.a; Usage Reports s.a).

Käesolevas aruandes on esitatud ainult osa kogutud andmetest. Perioodiks on 01.01.2018 – 31.05.2018. Vajadusel on võimalik lisaandmeid juurde vaadata Exceli failist. Näiteks on tabelites välja toodud Top 3 ajakirjad/raamatud, Exceli failis aga Top 10. Vajadusel on võimalik tutvuda ka täielike nimekirjadega. Nende kohta on minu arvutis eraldi kaustad COUNTER algfailidega. Hetkel on aruandest puudu andmebaasi EBSCO ja ajakirja JAAHA andmed, mis on mõlemad riigihankega tellitud. Lisaks puuduvad andmed järgmiste andmebaaside/ajakirjade kohta: Wiley, Top Agrar Ausgabe S-R, TTJ.

## AJAKIRJADE ARUANNE

### Mõisted ja lühendid:

<sup>1</sup> **Journal Report 1** - Tulemuslike päringute arv kuu ja ajakirja lõikes perioodil 01.01.2018 – 31.05.2018 (*Number of Successful Full-Text Article Requests by Month and Journal*).

<sup>2</sup> **Journal Report 2** – Tagasilükatud päringute arv kuu ja ajakirja lõikes perioodil 01.01.2018 – 31.05.2018 (*Access Denied to Full-Text Article Requests by Month, Journal and Page-Type*).

**Tabel 1.** Tulemuslikud (JR1) ja tagasilükatud (JR2) artiklite taotlused perioodil 01.01.2018 – 31.05.2018.

## ANDMEBAASIDE ARUANNE

Tabelites on esitatud EMÜ andmebaasides tehtud otsingute koguarv, tulemuslikud klikid ja kirjete vaatamine perioodil 01.01.2018 -31.05.2018 (*Database Report 1 - Total Searches, Result Clicks and Record Views by Month and Database*).

**Tabelites kasutatavate mõistete definitsioonid** (COUNTER Code of Practice..., 2012) :

*Tavaline otsing - kasutajapoolne lihtpäring, mille võrguteenuse pakkuja vahendab serverile.*

**Federated Search** - A federated search programme allows users to search multiple databases owned by the same or different vendors simultaneously with a single query from a single user interface. The end user is not responsible for selecting the database being searched.

*Liidetud otsing – võimaldab kasutajal ühe päringu ja kasutajaliidese raames otsida mitmest andmebaasist samaaegselt korraga. Andmebaasid, kus otsing tehakse, võivad kuuluda ühele või erinevatele teenusepakkujatele. Lõppkasutajast ei sõltu, millistest andmebaasidest otsing tehakse.*

**Automated search** – A search from a discovery layer or similar technology where multiple databases are searched simultaneously with a single query from the user interface. The end user is not responsible for selecting which databases are being searched.

*Automaatne otsing - Discovery-tüüpi otsing, kus ühe päringu ja kasutajaliidese raames otsitakse tulemusi samaaegselt mitmest andmebaasist korraga. Lõppkasutajast ei sõltu, millistest andmebaasidest otsing tehakse. Sageli käsitletakse eelmisega koos (federated search).*

**Result Click** - A click originating from a set of search results; i.e. the same as a Search Click.

*Kliik, mis on tehtud tulemuslehel peale otsingu sooritamist.*

*Täiendus - (klikk läheb arvesse ka siis, kui see viib infootsija mõnele andmebaasi/platvormi välisele ressursile nagu näiteks OpenURL link findit@mylibrary või document delivery form) (Dunkley, s.a).*

**Record View** - A Successful Request for a database record that has originated from a set of search results, from browsing the database, or from a click on another database record. (Only full database records may be counted, not Previews of Records).

*Kirjete vaatamine - tulemuslik päring andmebaasi kirjele, milleni on jõutud andmebaasi tulemuslehe, andmebaasis sirvimise või mõne teise andmebaasi kirjele vajutamise kaudu (arvesse lähevad ainult täielikud andmebaasi kirjed, mitte kirjete eelvaated).*

*Täiendus - näitab mitu korda klikivad infootsijad tulemuslehel vastete metaandmetele (mitte täistekstile, vaid näiteks abstraktidele ja muud vastet kirjeldavatele andmetele). Infootsija võib kirjeni olla jõudnud andmebaasi tulemuslehe, andmebaasis sirvimise või mõne teise andmebaasi kirjele vajutamise kaudu (Dunkley, s.a).*

**NB! Veerg „User Activity“ näitab seda, mida inimene andmebaasis tegi või mis tema eest tehti. Veerus „Reporting period total“ on esitatud otsingute koguarv. Järgneb väljavõtte kuude kaupa.**
