#### INTRODUCTION

The Port of Portland's mission is to provide competitive cargo and passenger access to regional, national and international markets while enhancing the region's quality of life.

For the most part, the Port does not own or control the surrounding transportation system that provides access to its facilities. Good access to Port properties and marine and aviation facilities, is a competitive advantage for the region's businesses and residents. The region's economy depends on efficient movement to and through the marine and aviation gateways. Therefore, improvements to the road, rail, water and transit systems that provide access to Port facilities are of interest to the Port and to the region's and state's businesses.

Freight movement has historically played a large role in the development of the Portland area economy. Due to its location at the confluence of the Willamette and Columbia Rivers with access to the Pacific Ocean, Portland has long served as a major shipment point in the Pacific Northwest. In addition to the navigable waterways, Portland is also served by two Class 1 rail lines, two interstate highways and a network of other major roads. All of these factors contribute to Portland's development as a major distribution center for freight.

Several recent studies have substantiated the importance of investing in the transportation system and linked those investments to the region and state's economic health. The *Cost of Congestion to the Economy of the Portland Region* sponsored by a consortium of public agencies and private businesses confirms the transportation dependency of the region's economy and affirmed that the region's competitiveness is largely dependent upon the role it plays as a gateway and distribution center. The study determined that improvements in the transportation system are an investment and produce a 2:1 return for the economy.

The Commodity Flow Forecast Update produced by DRI/WEFA predicts a doubling of freight volume moving throughout the region in 30 years. This kind of growth will dramatically impact Port facilities and will require significant

NE Airport Way (between I-205 and the Airport terminal), 82<sup>nd</sup> Ave. (north of NE Alderwood Rd.), NE Frontage Rd., NE Mt. Hood Ave. (north of Airport Way), NE AirTrans Way, part of N Time Oil Rd., T-5 access road, T-6 access roads, old Marine Dr. (west of N Portland Rd.), Ramsey St. (west of Rivergate Blvd.) and other misc. access roads.

Page 2

<sup>&</sup>lt;sup>1</sup> Roads owned and maintained by the Port of Portland include:

investments to ensure access to them. The magnitude of regional transportation access investments and their financing are addressed in Metro's Regional Transportation Plan, Metro's Transportation Improvement Program (MTIP) and the State Transportation Improvement Plan (STIP).

Access needs critical to Port facilities are reflected in the Port Transportation Improvement Plan (PTIP).

### **GOAL AND OBJECTIVES**

The Port Transportation Improvement Plan is a multimodal compilation of marine terminal, road, rail, waterway, transit, bicycle, and pedestrian projects, normally identified through transportation and other studies managed by or in coordination with the Port. The plan also identifies a transportation demand management program to be implemented. The plan is designed to organize transportation and transportation-related improvement needs. The goal and objectives of the Port's Transportation Improvement Plan are as follows:

### Goal:

Maintain the strategic advantage provided by the transportation system in this region by addressing the surface access needs of businesses and passengers trying to reach national and international markets via Port facilities.

## Objectives:

- Identify 5, 10, and 20-year surface transportation system investments that provide and maintain access to Port facilities and property developments.
- Develop a long-range vision of the financial implications of transportation system investments, and integrate this long-range planning with the Port's 5-year capital program.
- Increase public awareness of Port access needs on the city, state and private rail carrier systems.
- Facilitate coordination between the Port and appropriate public and private transportation system stakeholders to make improvements and investments that enhance access to national and international markets for the region's businesses and residents.

### **ASSUMPTIONS**

Contained within this document are projects generally developed from transportation studies based on the region's assumptions about population and employment growth. These assumptions, developed by Metro in cooperation with all the jurisdictions in the region, are allocated to the land use designations of locally adopted comprehensive plans. As population and employment assumptions are updated, the needs of the transportation system are updated. The Port and other local governments participate in transportation systems studies to determine what parts of the surface transportation system (road/transit/rail/bicycle/pedestrian) are insufficient to meet the regional assumptions about passenger and freight movement.

This document represents the Port's assessment of the transportation system and the infrastructure necessary in order to achieve its mission. The PTIP helps the Port focus its transportation priorities and lets the public and the Port's partner jurisdictions know which projects will need cooperative efforts.

## PROJECT FUNDING

In recent years, the overall demand for transportation improvements at the local, state and federal levels has exceeded available resources. The PTIP defines Port transportation needs over a 20-year time frame. Some of the transportation improvements are on Port properties and some are on systems that are the legal responsibility of others but serve Port facilities.

Funding for projects in the PTIP is expected from a number of sources, including the jurisdictions that have legal responsibility for the system and private interests that may benefit from the improvement. The project list and project detail sheets identify the funding sources anticipated to implement these projects. Funds attributed to specific jurisdictions reflect specific funding commitments. Funds designated as "Committed Port Share" are in the Port's approved budget. "Forecasted Port Share" indicates funds for which the Port bears ultimate responsibility to obtain, whether from its own revenues or with funding from other sources. Where funds are listed as 'unfunded', either a funding strategy has not yet been defined for the improvement, or changes in the project scope have impacted the existing funding strategy.

#### PORT PRIORITY PROJECTS

Port facilities support an array of transportation modes and present a wide range of project needs: marine and aviation terminal, road, rail, waterway, transit, bicycle and pedestrian improvements. The PTIP maps show surface transportation projects that improve or provide access to marine and aviation terminals. However, the ability of the marine and aviation terminals to provide the region's businesses with access to markets also depends on the transportation system within the terminal facilities themselves.

Many of the Port's priority transportation projects will involve funding from other agencies and/or the private sector. A significant portion of these projects are off Port property on facilities owned and maintained by other jurisdictions and in areas that are significant transportation bottlenecks for access to national and international markets via Port facilities. Due to size, type and use of the facility, a cooperative funding arrangement among the affected parties will be necessary to adequately fund and implement these projects.

For surface transportation projects, the following criteria determine which projects have been considered for cooperative funding:

- 1. The project improves access to Port terminals or properties and is critical to Port strategic development either a) in next ten years, or b) in the next twenty years, but requires that aspects of the project begin within the next ten years.
- 2. The project also serves other city, regional, state or national transportation and/or economic functions.
- 3. The project is included or, prior to construction, will be included in the Regional Transportation Plan (RTP).
- 4. The project meets the eligibility criteria for federal funding.

Port Priority Projects (Non-Rail) Involving Other Funding Sources, off Marine Terminals <sup>1</sup>	Project Cost <sup>2</sup>	Map #	Project Status
Air Cargo Access	\$23,313,000	3,4,5,7,12	In design
Channel Deepening	\$150,573,000	51	Construction
Columbia Blvd. Northbound Ramps on I-5	\$51,000,000	67	In design
Columbia Blvd., Lombard St. Improvements at MLK	\$2,200,000 <sup>3</sup>	60	In design
East Columbia Blvd./Lombard St. Connector	\$36,484,012	61	Construction
Frontage Rd./Marine Dr. Ped/Bike Connection	\$670,000	28	In design
Going St. Rail Overcrossing Improvement	\$3,000,000	58	
I-205 Interchange Improvement (NB On-Ramp)	\$28,000,000	20	In design
I-205 Interchange Improvement (SB Off-Ramp)	\$749,000	21	In design
Intelligent Transportation System (ITS) Improvements	\$4,570,000	1,31,66,80-82	
Kelly Point Park Access Trail/40 Mile Loop Trail	\$101,500	30	
Leadbetter St. Extension/Overcrossing	\$11,323,500	38	In design
257 <sup>th</sup> interchange at I-84 improvement	\$17,400,000	73	
North Lombard St. Improvement	\$3,610,000	32	
238 <sup>th</sup> Ave. Extension Study	\$150,000	77	
223 <sup>rd</sup> Ave. Widening	\$6,200,000	72	

Notes:

- Projects are not listed in order of priority.
   Refer to maps for funding break-out.
   Costs for reconnaissance.

Port Priority Rail Projects Involving Other Funding Sources <sup>1</sup>	Project Cost <sup>2</sup>	Map#	Project Status
Barnes to Terminal 4 Rail	\$3,000,000	46	
Barnes Yard to Bonneville Yard Trackage	$$11,912,000^3$	37	
Kenton Rail Line Upgrade	$$25,382,000^3$	64	
Ramsey Rail Yard Complex	$$13,900,000^3$	33	In design
SRG Rail Yard Expansion Phase I	\$7,090,000	34	In design
Graham Line Connection	\$15,000,000	35	
T-5 Unit Rail Loop #3	\$3,534,000	48	Construction
T-6 Intermodal Third Lead	\$5,627,093	44	Construction
Terminal 6 A + B Yards	\$2,859,000	49	

Notes:

- 1. Projects are not listed in order of priority.
- 2. Refer to maps for funding break-out.
- 3. Project cost shown is per I-5 Rail Capacity Study (2003), not per independent Port estimate.

For priority marine terminal capital projects, the following criteria determine which projects have been considered for cooperative funding:

- 1. The project improves operation of Port terminals and is critical to Port strategic development in next ten years.
- 2. The project provides significant economic benefit to the region and state by a) improving market access for all terminal users, or b) improving the operation of port tenant facilities that provide a significant number of jobs.

These projects are consistent with the Port's adopted budget and long term capital forecast.

Port Priority Marine Terminal Capital Projects Involving Other Funding Sources <sup>1</sup>	Project Cost	Map # <sup>2</sup>
T-6 Container Crane Purchase	\$10,937,000	
T-6 Intermodal Third Lead	\$6,007,093	44
T-6 Optical Character Recognition	\$2,700,000	
T-6 Wireless Network and Mobile Data Units	\$300,000	
T-6 Berth Deepening and Scour Protection	\$3,400,000	
Marine Access Control and Surveillance	\$3,400,000	
T-6 Crane Rail Improvements and Tie Backs	\$4,600,000	
T-6 Container Dock Extension	\$19,400,000	
T-6 Additional Post-Panamax Cranes	\$20,000,000	
T-6 Honda Facility Upgrade	\$10,200,000	
Cathedral Park Quiet Zone	\$3,500,000	53
Mar Com North Facility	\$2,400,000	
T-4 Second Entrance	\$7,000,000	
T-4 Barge Facility Relocation	\$8,000,000	
Berth 503 Dock Rehabilitation	\$4,700,000	

Notes:

- 1. Projects are not listed in order of priority.
- 2. Where no map is referenced, the project is identified in the Marine Terminal project section.

Port Priority Aviation Capital Projects	Project	Map # <sup>2</sup>
Involving Other Funding Sources <sup>1</sup>	Cost	
TTD relocation of Taxiway B, Phase 1 & 2	\$2,200,000	
HIO High Speed Exists	\$2,430,000	
HIO Taxiway A3 extension	\$2,200,000	
PDX North Runway rehabilitation	\$11,200,000	

Notes:

- 1. Projects are not listed in order of priority.
- 2. Where no map is referenced, the project is identified in the Aviation project section.

### COST ESTIMATE RATING

When applicable, the project maps shown in the PTIP contain cost estimate ratings. The purpose of the rating is to provide those using the estimates with a qualitative measure of its precision for a project. Since the precision of an estimate is a function of the clarity of project scope (accuracy) and the level of effort expended to produce the desired estimate (engineering effort), the rating scale is designed to reflect both of these factors. Below are the definitions of each of these categories.

Scope Accuracy

Level 1 **Project scope is defined.** 

Level 2 **Project scope is conceptual.** Scope lacks

detail due to potential permit requirements; unknown project conditions; limited knowledge

of external impacts.

Level 3 **Project scope has limited detail.** 

**Engineering Effort** 

Level A **Preliminary engineering has been** 

**performed.** Technical information is available, engineering calculations have been performed; clear understanding of the materials size and quantity needed to execute the job. Schedule is understood; staff and permitting is fairly clear. Contingency ranges between 15% and

20%.

Level B Conceptual engineering has been

**performed.** Technical information is available, rough engineering calculations may have been performed, or similar information from previous

similar work is compared and used.

Contingency ranges between 20% and 30%.

Level C **No engineering has been performed.** 

Limited technical information is available and/or limited analysis has been performed. Contingency ranges between 40% and 50%.

Note: Projects that are the responsibility of a developer or are the responsibility of another agency generally are not given cost estimate ratings and are identified by N/A in the project list.

## **PROJECT LISTS BY AREA**

## **♣** PDX/PIC

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
1	100680	PDX ITS	Intelligent Transportation Systems in the PDX area.	Improve traveler information and traffic/parking efficiency at PDX.	10	\$3,000,000	\$0	\$3,000,000
2	100827	Airport Way Realignment	Relocate and widen Airport Way northerly at Terminal entrance.	Maintain adequate access and circulation in the terminal area.	5	\$12,818,000	\$0	\$12,818,000
3	810015	Airtrans Way/Cornfoot Rd. Intersection Improvement	Provide channelization, construct new traffic signal.	Retain efficient movement of traffic to PDX properties.	5	\$650,000	\$250,000	\$0
4	810020	Alderwood Rd./Columbia Blvd. Intersection Improvement	Widen and signalize intersection at Alderwood Rd. and Columbia Blvd.	Provide transportation link to the cargo area located within the south airport area.	5	\$1,460,000	\$0	\$0
5	810014, 810016	Alderwood Rd. Intersections Improvement	Improve Alderwood Rd./Cornfoot Rd. and Alderwood Rd./82nd Ave. intersections. Add signals, add turn lanes.	Provide efficient movement of traffic to PDX and PIC properties.	5	\$1,526,000	\$0	\$308,000
6		Sandy Boulevard/105th Ave	Add a southbound left- turn lane	Accommodate projected traffic growth from the development of CS/PIC	5	\$327,000	\$0	\$0
7	810013	47th Ave. (at Columbia Blvd.) Intersection and Roadway Improvements	Widen and channelize NE 47th Ave. intersection at NE Columbia Blvd. to facilitate truck turning movements.	Provide improved traffic flow to air cargo facilities located within the south airport area.	5	\$4,100,000	\$0	\$770,000

# **♣** PDX/PIC (Continued)

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
8		Airport Way/Holman Street	Add a northbound right- turn lane and extent the northbound left-turn lane	Accommodate projected traffic growth from the development of CS/PIC	5	\$440,000	\$0	\$0
9		Alderwood Road/Cascades Parkway	Signalize the intersection	Accommodate projected traffic growth from the development of CS/PIC	5	\$250,000	\$0	\$0
10		Alderwood Road/Holman St.	Install an all-way stop	Accommodate projected traffic growth from the development of CS/PIC	5	\$200,000	\$0	\$0
11		PDX Transportation Demand Management (TDM)	Implement strategies at PDX and PIC properties that reduce auto trips in the airport area. Programs to be undertaken with other area businesses/ developers to maximize effectiveness; possible administration through a transportation management association Costs will be ongoing operational costs, not capital costs.	Fulfill TDM requirements of PDX Master Plan approval. Implement TDM projects and programs recommended in the PDX Alternative Modes Study.	5	No capital cost	\$0	\$0
12	810011	82nd Ave./Columbia Blvd. Intersection Improvement	Construct additional through lane in each direction. Add a new turn lane. Signalize.	Mitigate PDX Growth Impacts.	10	\$3,409,000	\$0	\$3,409,000
13		PIC Ped/Bike Network	Construct bike and pedestrian facilities as shown in the CS/PIC Plan District.	Improve bike/pedestrian circulation in PIC.	10	\$240,000	\$0	\$0

# **♣** PDX/PIC (Continued)

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
14	100619	Airport Way East Terminal Access Link Roadway	Construct Airport Way East Terminal access link roadway.	Facilitates direct East Terminal access, preventing failure of Main Terminal Roadway.	10	\$16,900,000	\$0	\$16,900,000
15	100620	Airport Way Return and Exit Roadways	Realign the existing Terminal Exit Roadway to the north to facilitate the construction of Concourse B and Terminal Expansion East	Maintain adequate access and circulation in the terminal area.	10	\$5,660,000	\$0	\$5,660,000
16	100773	Widen Airport Way West of 82nd	Widen Airport Way from terminal to 82nd Ave.	Provide improved traffic flow to the PDX Terminal and the surrounding PDX properties.	5	\$11,000,000	\$0	\$11,000,000
17	100605	82nd Ave./Airport Way Grade Separation	Construct grade- separated overcrossing.	Provide efficient movement of traffic to PDX properties.	10	\$12,000,000	\$0	\$12,000,000
18		I-205 Auxiliary Lane	New auxiliary lane from I-84 to I-205 NB before Columbia Blvd.	Provide additional capacity for anticipated growth in area traffic.	20	\$5,000,000	\$0	\$0
19		I-205 Auxiliary Lane	New I-205 auxiliary lane from Airport Way to Columbia Blvd.	Provide additional capacity for anticipated growth in I-205 corridor.	20	\$20,000,000	\$0	\$0
20		I-205 Interchange Improvement	New I-205 NB on-ramp at I-205/Airport Way interchange.	Provide additional capacity for anticipated growth in area traffic.	10	\$28,000,000	\$7,000,000	\$0
21		I-205 Interchange Improvement	Widen I-205 SB off-ramp at Airport Way.	Provide additional capacity for anticipated growth at interchange.	5	\$749,000	\$749,000	\$0
22	810017	92nd Ave (Columbia Blvd. to Alderwood Rd.)	Improve NE 92nd Ave. between Columbia and Alderwood to facilitate PIC circulation.	Provide movement of traffic to developing PIC properties.	5	\$2,500,700	\$0	\$1,056,000

# **♣** PDX/PIC (Continued)

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
23	100757	SW Quad Access	Provide street access from 33rd Ave. into SW Quad.	Provide efficient movement of traffic to developing PDX properties.	10	\$1,500,000	\$0	\$1,500,000
24	100662	Light Rail Station/Track Realignment	Realign light rail track into terminal building.	Accommodate terminal expansion plans.	10	\$14,000,000	\$0	\$14,000,000
25		Airport Way Braided Ramps	Construct braided ramps between the I-205 interchange and Cascade Interchange.	Maintain safety and capacity of Airport Way and interchanges.	20	\$30,000,000	\$0	\$0
26		Alternative Fuels Station	Construct a PDX alternative fuels station that will be accessible from both airside and landside.	Provide refueling capabilities for both airside and landside vehicles. Encourage airport businesses to convert to alternative fuels, thereby improving air quality.	5	\$1,000,000	\$0	\$0
28	100561	Frontage Rd./Marine Dr. pedestrian and bicycle connection	Construct a mixed-use path to connect the east end of Frontage Rd. with the Marine Dr. trail at the old Lombard St. location.	Improve pedestrian and bicycle connectivity in vicinity.	5	\$670,000	\$0	\$670,000
29	810010	122nd Ave./Airport Way Intersection Improvement	Add turn lanes, channelization and signal modifications. Acquire additional right-of-way.	Mitigate PDX Growth Impacts.	5	\$895,000	\$0	\$895,000

# Marine Access/Rivergate

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
30	100398	Kelly Point Park Access Trail/40 Mile Loop Trail	Bike/pedestrian trail along the north bank of the Columbia Slough.	Construct portion of 40 Mile Loop Trail in Rivergate.	5	\$101,500	\$0	\$101,500
31		Rivergate ITS	Intelligent Transportation System in Rivergate.	Improve traffic efficiency in Rivergate by connecting information about the roadway system to ODOT's Highway ITC systems.	5	\$770,000	\$0	\$0
32	810027	Widen Lombard- Purdy to Simmons	Widening North Lombard St. from 600 feet south of North Rivergate Blvd. to the Columbia Slough. Add signal at Ramsey St.	Increase road capacity to accommodate growth in surrounding development.	5	\$3,610,000	\$0	\$0
33				See Rail Projects list.				
34				See Rail Projects list.				
35				See Rail Projects list.				
37				See Rail Projects list.				
38	500157	Leadbetter St. Extension/ Overcrossing	Complete Leadbetter St. loop to Marine Dr. (Pacific Gateway/T-6 intersection) and construct road bridge over rail line.	Provide access to developing properties. Eliminate rail/auto conflict at future intersection.	5	\$11,323,500	\$100,000	\$0
39	100324	Honda Overcrossing	Construct a rail overcrossing within the Honda facility	Remove delays to Honda caused by increased rail traffic.	5	\$3,500,000	\$0	\$0

# ♣ Marine Access/Rivergate (Continued)

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
40		Marine Dr. Improvement Phase 2	Construct rail overcrossing on Marine Dr.	Separate rail at-grade crossing.	20	\$18,000,000	\$0	\$0
41		West Hayden Island Bridge and Access Rd.	Construct 4-lane bridge to West Hayden Island, west alignment with 90' clearance and associated ramp infrastructure.	Provide primary access to Port's marine development and secondary access to existing development of Hayden Island.	10	\$49,800,000	\$0	\$0
42				See Rail Projects list.				
43				See Rail Projects list.				
44				See Rail Projects list.

49				See Rail Projects list.				
51	700000 700001	Channel Deepening	Deepening the Columbia River channel to 43 feet between mouth of Columbia River and Portland/Vancouver Harbor.	Serve panamax bulk vessels and post-Panamax container vessels.	5	\$150,573,000	\$0	\$0
52	100470	Terminal 4 Second Access	Regrade hillslope to provide two-lane truck access.	Provide alternative access to Terminal 4.	5	\$7,000,000	\$0	\$0
53				See Rail Projects list.				
54				See Rail Projects list.				
55		Burgard Bridge Replacement	Upgrade structure.	Replace the bridge with a slab on grade.	5	\$1,445,000	\$0	\$0
79		Lombard Street Bridge	Replace or reinforce the structure to support ongoing heavy truck movement.	Protect the connection between north and south Rivergate for heavy trucks.	5	\$2,228,909	\$0	\$0

## ♣ Swan Island/Columbia Corridor

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
56		Columbia Blvd./Portland Rd. Intersection Improvements	Redesign could include realignment of travel lanes, channelization, signalization, signalization, sidewalks and curbs.	Reinforce through truck movements on minor and major truck streets (Portland Rd. and Columbia Blvd. respectively), minimizing neighborhood cut-through traffic.	5	\$600,000	\$0	\$0
57	810019	Marx Dr. Extension	Extend Marx Dr. to 82nd Ave.	Provide efficient movement of traffic to PDX properties.	10	\$315,000	\$0	\$0
58		Going St. Rail- Overcrossing Improvement	Widen intersection and add additional eastbound lane on structure.	Provide through movement capacity for traffic entering and exiting Swan Island.	5	\$3,000,000	\$0	\$0
59		North Willamette Greenway Trail	Pedestrian and bicycle trail from the St. Johns Bridge to the Steel Bridge along the Willamette River.	Improve pedestrian and bicycle connectivity in North Portland.	20	City of Portland project. Scope to be determined.	\$0	\$0
60		Columbia Blvd. and Lombard St. Improvements at MLK	Improve freight movement between Columbia Blvd. and Lombard St.	Improve connectivity and better distribute freight traffic between Columbia Blvd and Lombard St. Improve rail network performance on the Kenton mainline in the vicinity of 11th Avenue.	5	\$16,835,000	\$114,455	\$0
61	810001	East Columbia Blvd./Lombard St. Connector (NE 82nd Ave I-205)	Replace the existing Columbia/Lombard intersection with a safer, more efficient design at 87th. Project to include bike lanes and sidewalks.	Improve safety and connectivity. Efficiently distribute traffic between Columbia Blvd. and NE Portland Hwy. (a.k.a Lombard; Killingsworth). Improve Kenton mainline rail capacity.	5	\$36,484,012	\$2,010,000	\$0

# **♣** Swan Island/Columbia Corridor (Continued)

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
62		I-5 Delta Park Widening	Widen I-5 to 6 lanes (Victory Blvd. to Lombard).	Improve efficiency and safety on I-5 between Victory Blvd. and Lombard.	5	\$68,963,000	\$0	\$0
63				See Rail Projects list.				
64				See Rail Projects list.				
66		Columbia Blvd. Traffic Management	Install signal coordination, closed circuit TV cameras and variable message signs.	Provide efficient movement of traffic along Columbia Blvd.	10	\$800,000	\$0	\$0
67	81009	I-5/Columbia Blvd. Improvement	Construct a full interchange at Columbia Blvd. or the functional equivalent. Conceptual designs are being developed in the I-5 Delta Park widening Environmental Assessment (see Map 62)	Improve connections between Columbia Blvd. and I-5 for trucks.	10	\$51,000,000	\$0	\$0
68		Columbia Blvd. Widening (82nd Ave 60th Ave.)	Widen Columbia Blvd. to five lanes.	Address system bottleneck along Columbia Blvd.	20	\$15,000,000	\$0	\$0

# Swan Island/Columbia Corridor (Continued)

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
70		Reynolds Site Road Access Phase I	Potential road improvements to serve Phase 1 industrial development.	Address off-site transportation impacts.	5	\$1,032,000	\$0	\$0
71		Reynolds Site Road Access Phase 2&3	Placeholder for potential road improvements to serve Phase 2&3 industrial development.  Actual project will be developed in coordination with stakeholders.	Address off-site transportation impacts.	10	\$11,331,000	\$0	\$0
72		223rd Avenue Widening	Widen to three lanes between Halsey St and Marine Drive.	Upgrade the facility to major collector urban street standards.	5	\$6,200,000	\$0	\$0
73		257th interchange at I- 84 improvement	Improve function of split diamond interchange at 257th.	Improve access from north and south of the interchange to I-84.	10	\$17,400,000	\$0	\$0
74		Riverside Dr. Extension	Riverside Dr. Extension (190th to Sandy Blvd.); improve to collector standards.	To serve developing industrial parcels.	5	\$4,500,000	\$0	\$0
75		Sandy Blvd. Widening to 4 lanes	Sandy Blvd. widen to 4 lanes and center turn lane 167th - 203 Rd.	To improve E/W capacity and serve developing industrial property.	5	\$3,900,000	\$0	\$0
76		Sandy Blvd. Widening to 3 lanes	Sandy Blvd. widen to 3 lanes (207th to 238th).	To improve E/W capacity and serve adjacent developing industrial area.	5	\$7,900,000	\$0	\$0

# ♣ Swan Island/Columbia Corridor (Continued)

Map #	JDE Project Number	Project Name	Project Description	Purpose	Time Frame (Yrs)	Total Cost	Committed Port Share	Forecasted Port Share
77		238th Avenue Extension Study	Assess the cost, feasibility and traffic implications of extending 238th Ave. north to connect with Marine Dr. at Sundial Rd.	To improve access from developing industrial areas to the interstate.	10	\$150,000	\$0	\$0
78		I-5 Columbia River Crossing	Increase the number of lanes and add transit capacity across the river.	Increase multi-modal capacity across the Columbia River and relieve congestion.	10	\$1,200,000,000	\$0	\$0
79		Lombard Street Bridge	Replace or reinforce the structure to support ongoing heavy truck movement.	Protect the connection between north and south Rivergate for heavy trucks.	5	\$2,228,909	\$0	\$0
80		PSU ITS Expansion	Expand PSU's existing web based ITS "count sensor" program beyond the freeway to some key arterials throughout the region.	To secure truck data but also flow and congestion info.	5	\$0	\$0	\$0
81		Freight data repository	Create a repository of freight data (primarily truck data) from the region's Freight Data Collection project.	Collect truck counts from jurisdictions in the region using a tool that standardizes reported data and makes it available for use by others.	5	\$0	\$0	\$0

### INDIVIDUAL PTIP PROJECT MAPS

The following pages contain individual maps showing each project along with project information. The project information includes such details as a brief description, purpose, funding information, cost estimate rating, and time frame.

### Acronym Key:

PIC	<ul> <li>Portland International Center</li> </ul>
CS	<ul><li>Cascade Station</li></ul>
PDX	<ul> <li>Portland International Airport</li> </ul>

#### Time Frame:

Projects identified in the PTIP are shown as occurring in the 5-, 10- or 20-year time frame. Project within the 5-year time frame are expected to occur within the next five years. Projects within the 10-year time frame are expected to occur between five and ten years from the time of PTIP adoption. Similarly, projects within the 20-year time frame are expected to occur between 10 and 20 years from the time of PTIP adoption.

The time frames shown are estimates. The listing of a project in a given period does not ensure that it will be constructed in that time frame. Rather, projects will be constructed when transportation/business needs support them and when funding becomes available. For many projects, this need has already been identified. However, others depend on a variety of factors, including development at Port facilities and the changing challenges of the region's transportation system.

Project: PDX ITS

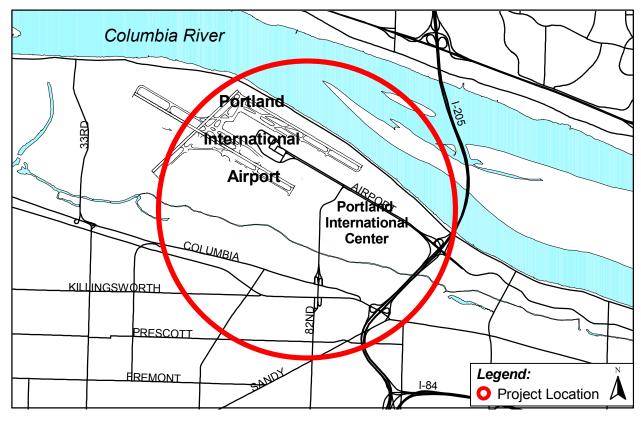

Description: Intelligent Transportation Systems in the PDX area.

Purpose: Improve traveler information and traffic/parking efficiency at PDX.

Total Estimated Cost: \$3,000,000 (2004 estimate)\*

Cost Estimate Rating: 3c

\* Cost estimates will be revised as new information becomes available and to reflect the terms of specific funding applications.

Funding Sources	Conditioned Project	Time Frame: 10 Yrs

Project: Graham Line Connection

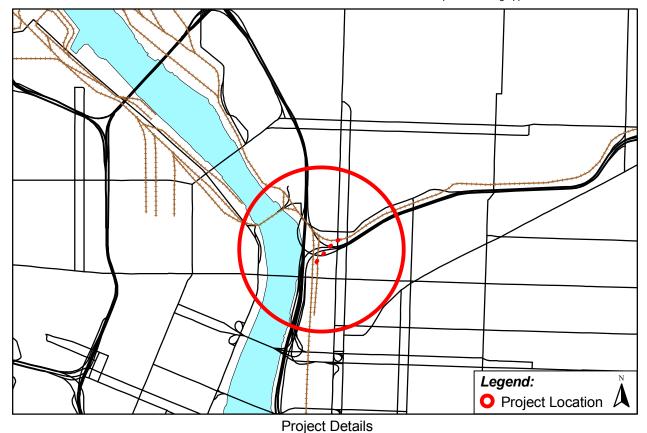

Description: This project will create a new track connection between the Graham Line, which runs parallel with I-84 through Sullivans Gulch and the Brooklyn Sub, UP's north south line through Portland.

Purpose: This connection will allow UP rail traffic entering Portland from the east to turn south onto the Brooklyn Sub from the Graham Line. Currently UP rail traffic entering Portland from the east and intending to head south on the Brooklyn Sub must take the Kenton Line to Peninsula Junction then travel through the Peninsula Tunnel to connect with the Brooklyn Sub north of Albina Yard. This project will eliminate delay and increase system capacity.

Total Estimated Cost: \$15,000,000 (2006 estimate)\*

Cost Estimate Rating: N/A

\* Cost estimates will be revised as new information becomes available and to reflect the terms of specific funding applications.

# **Priority Marine Terminal Capital Project List**

Project	Description	Cost	Readiness	Strategic Impact
Terminal 6 Container Crane Purchase (Crane #6381) Project #(s): 100364, 100841	Purchase of one post-panamax container crane to permit the efficient handling of larger container ships. Includes required electrical upgrades to the dock. This crane will bring the number of post-panamax cranes at Terminal 6 to four.	\$10.9 million	The crane is scheduled for delivery in early 2008. This project has received \$7.5 million in ConnectOregon funding.	Critical to meeting customer requirements.  810 jobs generated per weekly container service.  Direct Portland service saves Oregon shippers more than \$50 million annually.
Terminal 6 Intermodal Third Lead Project #(s): 100272, 810008	Design, permit, and construct a dedicated lead for the Terminal 6 intermodal yard and separation of the intermodal yard from the Hyundai auto facility leads.	\$6.0 million	This project is open and final design is complete.  Construction underway  Construction is scheduled to be completed in July 2007.	Key infrastructure improvement to improve Terminal 6 automobile and container rail operations.  Terminal 6 - container and auto operations combined - generates more than 1,600 direct jobs.
Terminal 6 Optical Character Recognition Project #(s): 100840, 100532	Purchase and install OCR (Optical Character Recognition) software and hardware. Construct two buildings for housing the OCR hardware and associated infrastructure. Install License Plate OCR cameras on gate pedestals and integrate into Terminal Operating System.	\$2.7 million	This project is open and is in the design and RFP phase. Target completion date is July 2007.	This project will automate data capture at the truck gates, increasing operational efficiency.
Terminal 6 Wireless Network and Mobile Data Units Project #(s): 500156	Install a wireless network covering the Terminal 6 facility and provide new mobile data units (MDUs) to send data over that network.	\$300,000	An assessment and alternative study is currently underway and near completion.	This project will improve operational efficiencies associated with day to day activities at Terminal 6.
Terminal 6 Berth Deepening and Scour Protection Project #(s): 100194	Design, permitting, and construction of the scour protection and deepening of Terminal 6 container berths.	\$3.4 million	The installation of scour protection is complete. The berth deepening portion of the project is awaiting permit approvals.	The berth deepening, which is a key component of the Channel Improvement Project, will permit better utilization of vessels calling Terminal 6. The scour protection will protect the Port's investment in the dock structure.

Project	Description	Cost	Readiness	Strategic Impact
Marine Access Control and Surveillance Project #(s): 100344	Install new security gate systems at Terminals 4 and 6; install or upgrade remote access gates, fencing improvements; install or upgrade of CCTV systems, and video analysis/policy management software.	\$3.4 million	The project is open and in the design phase. Project completion is targeted for December 2007.	This project will strengthen entry gate and perimeter access controls and enhance CCTV surveillance capabilities at Terminals 4 and 6.
T-6 Crane Rail Improvements and Tie Backs  Project #(s): 100241	Design, permit, and construct additional crane rail tie-backs to Berth 604 east and Berth 605, and add 100' crane rail to Berth 604 west.	\$4.6 million	This project is in the preliminary engineering phase (see Terminal 6 Berth Improvement Study). Project is scheduled for 2009 and beyond.	This project will improve the strength of the dock and provide the crane rail necessary to handle two post-panamax vessels simultaneously, protecting existing investments and providing long-term access to markets to regional shippers.
Terminal 6 Container Dock Extension Project #(s): 100359	Extension of Berth 605 upstream by 600 feet or more to facilitate handling of longer container vessels. Also includes the extension of the 100-ft gauge crane rail.	\$19.5 million	Design, permitting, and construction for this project would occur over the 2006-2009 period. The predesign for these improvements has been completed as part of the Terminal 6 Berth Improvement Study.	Modern container vessels are not only deeper and wider, they are also longer. This project will lengthen the berths, preserving Terminal 6 as a three-berth facility capable of handling the longer vessels.
Terminal 6 Additional Post- Panamax Cranes Project #(s): 100365, 100366	Acquisition of two additional post-panamax cranes (#6382 and #6382) to make Terminal 6 a two-berth post-panamax facility	\$20.0 million	Purchase of the additional cranes will be phased according to business need and availability of funding.	This project would provide Portland with a two-berth post- panamax vessel capability. It anticipates the eventual need to serve multiple post-panamax vessel strings at Terminal 6.

Project	Description	Cost	Readiness	Strategic Impact
Terminal 6 Honda Facility Upgrade Project #(s): 100304, 100323, 100324	This program will cover three distinct projects: 1) Berth 607 dock modifications; 2) rail ramp expansion; and 3) a type, size, and location study for a rail crossing at Terminal 6.	\$10.2 million	A new lease with Honda was approved by the Port Commission in October 2004. The dock project is currently open and work is underway. The rail crossing study will be over in December 2006.	The project is needed to meet customer requirements.  Approximately 200 direct jobs are generated by the Honda operation. Overall Terminal 6 generates 1,500 direct jobs.
Cathedral Park Quiet Zone Project #(s): 100831	This project addresses rail switching noise related to the Toyota operations at Terminal 4 by improving multiple public rail crossings in the St. Johns Cathedral Park area such that the area can be designated a "Whistle Free Zone" by the FRA and the City of Portland.	\$3.5 million	This project is still in the conceptual design and planning stage. Preliminary design may proceed in CY 2007.	This project is needed to allow auto import operations to continue to grow in North Portland and improve neighborhood livability.  The project will include several important public safety improvements that address existing rail crossings in public right-of-ways.
Mar Com North Facility Project #(s): 100233	Acquisition, design, permitting and development of the 6.54 acre brown field site property adjacent to Terminal 4 on the south.	\$2.4 million	Design for fill and porous pavement underway. Eminent domain proceeding scheduled for trial in Feb. 2007. Port performing environmental remediation on site, awaiting lease and sale of DSL parcel.	The project will provide additional land to meet auto storage capacity needs of Toyota, in furtherance of the Port's automobile import line of business.  Toyota employs 200+ persons.
Terminal 4 Second Entrance Project #(s): 100470	Design and construct a second entrance to Terminal 4.	\$7.0 million	A preliminary design study has been completed. Implementation of this project is contingent upon business needs and funding.	The project would resolve Terminal 4 rail-vehicle conflicts which would be caused by heavy rail traffic associated with the growth of activity at Terminal 4. Terminal 4 generates approximately 400 direct jobs.

Project	Description	Cost	Readiness	Strategic Impact
Terminal 4 Barge Facility Relocation Project #(s): 100472	Design and construct a new barge receiving facility for the Terminal 4 grain facility. Slip 1, the location of the existing barge facility, will be used as a confined disposal facility as part of the Terminal 4 Early Action Sediment Clean-up rendering the existing barge facility unusable.	\$8.0 million	The clean-up project will construct the barge berth in 2007 and 2008. Construction of the barge receiving facility is contingent upon resumption of grain operations at Terminal 4.	Approximately 40 to 50 percent of all wheat and barley exported from the Columbia\Willamette river system is delivered to the export terminal by barge. This includes wheat grown by Oregon grain growers. A barge facility is a critical component to the operations of the Terminal 4 grain elevator.
Berth 503 Dock Rehabilitation Project #(s): 100829	Repair the priority components of the Berth 503 to address advanced corrosion on the girders and beams which support the dock structure.	\$4.7 million	The project is now in final design and construction planning.	This project makes significant and necessary life-extending repairs to Berth 503 to keep the structure serviceable for the next 30 years.

# **Aviation External Funding Project List**

Project	JDE Project#	Description	Cost	Readiness
TTD relocation of Taxiway B, Phase 1 & 2	100282 100281	In order to comply with new FAA requirements for distances between taxiways and runways, Taxiway B at Troutdale airport needs to be relocated 50 feet to the south. If the taxiway is not relocated, the FAA could restrict the size of aircraft that can land and take off at Troutdale or disallow future grants to the airport.	\$2.2M	Design to begin in June 2007 through April 2008. Construction during Summer of 2008 and 2009, May through October.
HIO High Speed Exists	100464	Hillsboro's runway system is currently at 107% capacity. The high speed exits constructed on the airport's longest runway will allow landing aircraft to exit the runway faster. This will help to relieve a portion of the over capacity of the airport system until a third runway is constructed in 2010 and 2011.	\$2.43M	Design underway to be completed in April of 2007. Construction during Summer 2007, May through November.
HIO Taxiway A3 extension	100655	Hillsboro's runway system is currently at 107% capacity. The extension of Taxiway A3 constructed near the airport's longest runway in coordination with the high speed exits will allow aircraft to exit the runway faster. This will help to relieve a portion of the over capacity of the airport system until a third runway is constructed in 2010 and 2011.	\$2.2M	Design to begin in June 2007 through April 2008. Construction during Summer of 2008 and 2009, May through October.

PDX North Runway rehabilitation	100334	Rehabilitation of the north runway in a periodic effort (every 12 years) to keep the runway is safe operating condition for aircraft.	\$11.2M	Design to begin in June of 2008 through April of 2009. Construction during Summer 2009, May through October.
PDX North Runway Extension	100334	In order to preserve international service and domestic long haul routes to the Portland metropolitan region, an extension to the north runway is necessary to accommodate the larger aircraft when the south runway is closed for the summer in 2011. These larger aircraft require a runway longer than the 8000' north runway. Currently these aircraft exclusively use the south runway for take off which is 11,000 feet in length.	\$41M	Design to begin in June of 2009 through April of 2010. Construction during Summer 2010, May through November
