## Innovation in Defense Acquisition Oversight: An Exploration of the AT&L Acquisition Visibility SOA

Presented: May 13, 2010

#### Russell Vogel

Acquisition Resource and Analysis
Office of the Under Secretary of Defense for
Acquisition, Technology and Logistics
(703) 845-6677

Russell.Vogel@osd.mil

#### Robert M. Flowe

Acquisition Visibility – Service Oriented Architecture (AV SOA) Office of the Under Secretary of Defense for Acquisition, Technology and Logistics (703) 699-0183 Robert.Flowe @osd.mil

## **Agenda**

- ▶ Acquisition Visibility Purpose
- ▶ Project History AT&L AV SOA
- Architecture
- ▶ Data Elements and Programs included to date
- ▶ Implications for Academic Research

### **Acquisition Visibility**

- ▶ The Department of Defense and others have noted deficiencies in the Department's ability to manage its \$1.6T portfolio of Major Defense Acquisition Programs.
- Undersecretary of Defense for Acquisition Technology & Logistics is addressing these deficiencies by focusing on Acquisition Visibility (AV)

#### **Acquisition Visibility**

<u>Timely</u> access to <u>accurate</u>, <u>authoritative</u>, and <u>reliable</u> information supporting acquisition oversight, accountability, and decision making throughout the Department for effective and efficient delivery of warfighter capabilities

#### **Project History – AT&L AV SOA**

- ▶ **Demo:** February 2008 demonstration of data governance and Service Oriented Architecture to support major weapons system decision making. Completed in ~45 days.
  - Included 61 data elements (Earned Value Management and Unit Cost) for 12 Major Defense Acquisition Programs (MDAPs)—4 from each Military Service
- ▶ **Pilot:** 2008-2009 pilot to solidify governance and technical approach.
  - In December 2008, provided acquisition oversight decision-making information for 37 MDAPs, totaling ~\$1.2T in program value, ~75% of the FYDP.
  - In fall 2009, provided 103 MDAPs and other major programs totaling ~\$1.6T
  - ~148 data elements (Earned Value Management, Program Administration, Unit Cost, Science and Technology, Milestones, Budget/Current Estimate)

## AT&L AV SOA – Full Implementation Approval March 5, 2009

THE UNDER SECRETARY OF DEFENSE D010 DEFENSE PENTAGON WASHINGTON, DC 20201-2010

MEMORANDUM FOR SERVICE ACQUISITION EXECUTIVES

SUBJECT: Full Implementation of Acquisition Visibility (AV) Service Oriented Architecture (SOA) within DoD Acquisition Community

In my July 25, 2008 memoreandum I direct capability of the Acquisition Visibility Service C to capture and publish subscriptive data for a set the MDAP funding over the FVDP. With your h initial operational capability. Pilot users from sa offices are already registered and testing the capatine all DoD acquisition personnel may establish capability.

We have also re-plumbed the workings of management tools — DAMIR and Kaleidoscope access this new and useful data source. An addit a users' desktop for use by any means desired is covers 37 of our largest MDAPs, and more will! will be included in time to support the FY2011 p

I am now directing we put in place all the provide "coquisition data as a service" to the ent enterprise must be flexible and scalable enough pilot covers, in order to expand current data gove serve other aspects of ATEAL operations such as others. Based on lessons learned from the pilot p industry, leads me to the following decisions for providing a permanent resource besis:

 Governance Forum. The Weapon Sys Storing Group (WSLM SSG) is assigned the reformal data governance decisions related to: (1) in acquisition-related management systems, (2) the standards for making these data visible, and (3) is source of any individual data element. SOA to work requires a separation of the institutions addressing functional data governance from those which operate and maintain the SOA infrastructure. The latter provides the all-important 'utility services' for the data servers to operate for customers.

- Acquisition Enterprise Data Services. Our demo has shown that getting AV

- Functional Data Governance. The initial priority must be to help improve decision-making for MDAP management, and I assign the functional data governance responsibilities for this class of AT&L's operations to the Director. Acquisition Resources and Analysis. This office also retains its responsibilities to operate and expand the utility of pools used in MDAP management, such as DAMIR and Keleidoscope. I fully expect the other functional business areas of AT&L to develop their own needs for regulated data to be provided by this infinanticuter, and each community is expected to develop their own data governance institutions to best exploit this new business model.

• Resources. For the balance of FY09, resources will be provided from within existing Defense-Wide funds. Going forward, I expect the costs of functional data governance to be funded out of the resources from each of the functional areas, but the cost of the SOA infrastructure requires a permanent basis. SOA infrastructure costs amount to approximately \$14 million annually, and I direct each of the Services to identify and make available \$4.7 million per year over the FYDP to be transferred to AT&L to support this infrastructure. My staff will work to make these transfers through approaching the processors as precisable.

By implementing AV SOA as a durable institution, we will be providing the DoD ocquisition community critical management insight that the commercial world achieved a generation ago: timely, coherent data that is reliably and transparently available throughout the acquisition enterprise. The continued cooperation of your organizations is paramount to this success. Careful data governance will not only lower our overall costs, it will promp faster, better, acquisition decisions.

- USD AT&L issued AT&L AV SOA full implementation memo on March 5, 2009
- Directs AT&L to put in place all the elements of a durable solution to provide "acquisition data as a service" to the entire acquisition community.
  - Full Acquisition community access by June 09
  - All Major Defense Acquisition Programs (MDAPs) in time to support the FY 2011 program/budget review
- Separates data governance and SOA infrastructure responsibilities
- Weapon System Lifecycle Management Senior Steering Group to make all formal governance decisions
  - Director of Acquisition Resources and Analysis responsible for functional data governance for MDAP management
  - Other functional business areas to develop functional data governance to meet their decision-making information needs

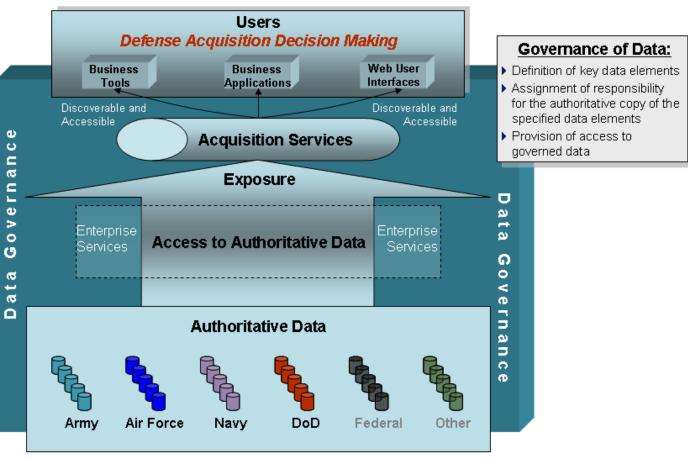

#### Defense Acquisition Visibility via SOA

#### **▶ AV SOA Solution:**

Apply Service Oriented Architecture and data governance to create shared services

#### Results:

- Defense acquisition information transparency across the Department
- Access to up-to-date, reliable data via any authorized application or analysis tool
- An extensible platform available for Department-wide use

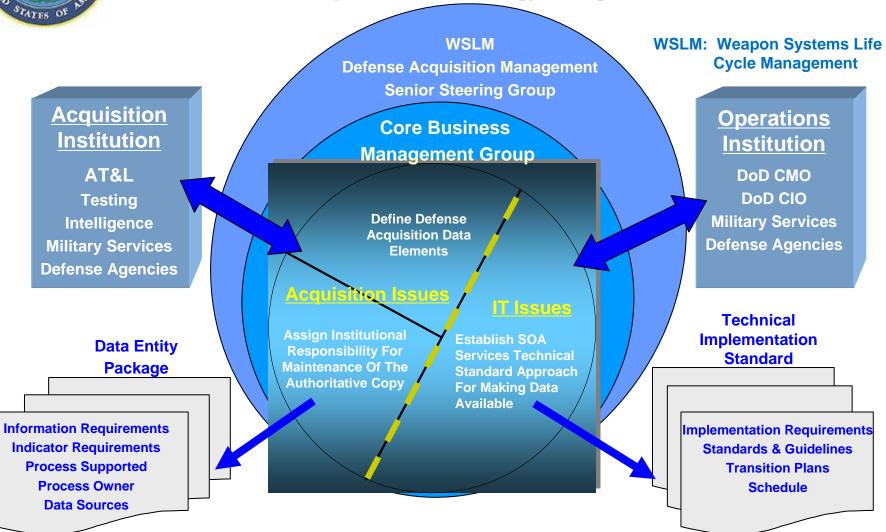

**SOA Separates Data from Application and Tools** 

#### **Balancing Functional and Technical Equities**

#### **Acquisition Technology & Logistics**

### **Definition of Success**

#### **Demonstrating Data Governance**

- Define selected Defense acquisition data elements to be exchanged
- Identification of authoritative sources
- Assign institutional responsibility for maintenance of the authoritative copy of each data element within a system

#### Demonstrating Data Definition Consistency

- Availability of data defined as requested by AT&L
- For the demo, the bar is low: primarily EV- and Nunn-McCurdy-related data
   Demonstrating Data Access
  - Implementing the SOA infrastructure

#### **AV SOA Data Categories**

- ► EVM Contract elements included in DAMIR's "Contract Data Point" and/or reported on the Contract Performance Report (CPR) to track progress
- ▶ Unit Cost Current estimate vs. APB (current and original) at totalappropriation level (RDT&E, Procurement, MILCON, O&M), by fiscal year for comparison, to support risk identification
- ▶ Budget Current President's Budget and POM/BES submission, by appropriation and fiscal year, for identifying changes in budget positions
- Milestone Program milestones as agreed upon in the APB, to provide a reference point for tracking progress
- Science & Technology Compare Key Performance Parameters, thresholds, and objectives to current measurement and to identify critical technologies
- ▶ Program Administration To organize/view information by program, subprogram, budget activity, program element, budget line item, and/or project code

## **AV SOA Data Elements – 148**

| Program Administration  | Unit Cost (cont'd)   |
|---|--|
| Program Name  | Current Estimate - O&M (BY) - Total for all years          |
| Program Number (PNO)  | Current Estimate - Development Quantity                    |
| Program URI (Uniform Resource Identifier)                                 | Current Estimate - Procurement Quantity                    |
| Sub-Program URI   | Original Baseline (APB): Development Quantity              |
| Sub-Program Name  | Original Baseline (APB): Procurement Quantity              |
| Budget Activity Identifier  | Current Baseline (APB): Total RDT&E Cost                   |
| PE (Program Element)  | Budget   |
| Budget Line Item (formerly Procurement Line Item(PLI))                    | Original Quantity  |
| PM Management Reserv e  | Current Quantity   |
| Project Code  | Scheduled Quantity   |
| Unit Cost   | Delivered Quantity   |
| Current Baseline (APB): Total Procurement Cost                            | Budget Fiscal Year   |
| Current Baseline (APB): Total MILCON Cost                                 | OTB (Over Target Baseline) - Date                          |
| Current Baseline (APB): Total O&M Cost                                    | OTB - BAC Adjustment (\$)                                  |
| Current Baseline (APB): Total Development Quantity                        | OTB - SV Adjustment (\$)                                   |
| Current Baseline (APB): Total Procurement Quantity                        | OTB - CV Adjustment (\$)                                   |
| PAUC (Program Acquisition Unit Cost) - Current Estimate                   | NCC - Original   |
| APUC (Average Procurement Unit Cost) - Current Estimate                   | NCC (Negotiated Contract Cost) - Current                   |
| Estimate Type   | Target Price - Current                                     |
| Base Year - Original APB  | Target Price - Original                                    |
| Base Year - Current APB   | Estimated Price - Contractor                               |
| Original APB Date   | Estimated Price - PM                                       |
| Current APB Date  | Ceiling Price - Current                                    |
| Program Completion Year   | Ceiling Price - Original                                   |
| Escalation Index  | Ceiling Price - Contractor's Estimated                     |
| Department Regular Code   | Ceiling Price - PM's Estimated                             |
| Main Account Code   | Completion Date (w hen BCWS = BAC)                         |
| Appropriation FY (Fiscal Year)  | TAB (Total Allocated Budget)                               |
| Current Estimate - Research, Development, Test & Evaluation (RDT&E) costs | ACWP (Actual Cost of Work Performed)                       |
| Current Estimate - Procurement Costs                                      | Current President's Budget RDT&E Submission                |
| Current Estimate - Military Construction (MILCON) Costs                   | Current President's Budget Procurement Submission          |
| Curremt Estimate - Operation & Maintenance (O&M) Costs                    | Current President's Budget MILCON Submission               |
| Current Estimate - Development Quantity                                   | Current President's Budget O&M Submission                  |
| Current Estimate - Procurement Quantity                                   | Current President's Budget Development Quantity Submission |
| Original Baseline (APB): Total RDT&E Cost                                 | Current President's Budget Procurement Quantity Submission |
| Original Baseline (APB): Total Procurement Cost                           | RDT&E POM/BES Submission                                   |
| Original Baseline (APB): MILCON Cost                                      | Procurement POM/BES Submission                             |
| Original Baseline (APB): O&M Cost   | MILCON POWBES Submission                                   |
| Current Estimate - RDT&E (BY) - Total for all years                       | O&M POM/BES Submission                                     |
| Current Estimate - Procurement (BY) - Total for all years                 | POM/BES Development Quantity                               |
| Current Estimate - MILCON (BY) - Total for all years                      | POM/BES Procurement Quantity                               |

## Defense Acquisition Data Governance: Enabling Acquisition Visibility

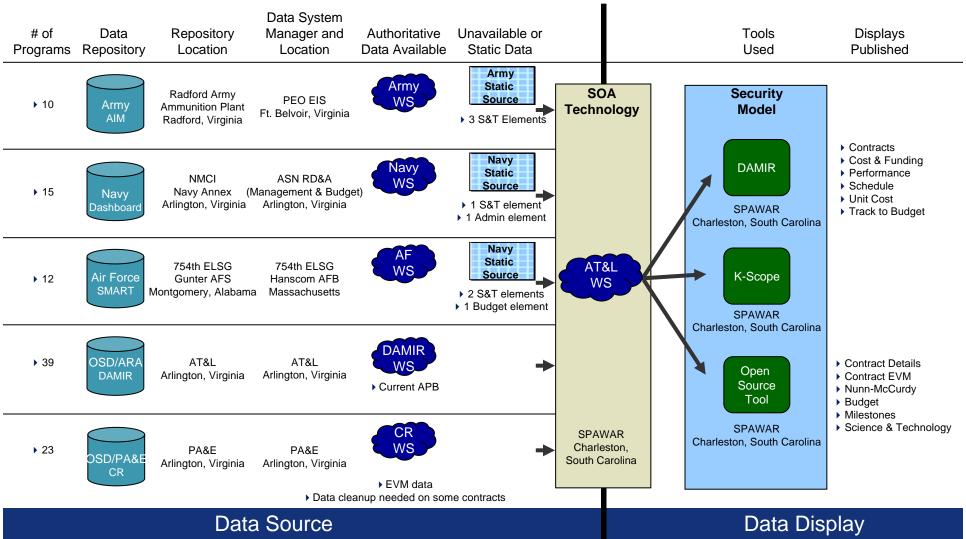

#### **Data Entity Package**

- Acquisition Technology & Logistics created an online tool, the Data Entity Package (DEP), for managing governance of Defense acquisition data
- For each element—by program—DEP specifies the <u>data definition</u>, <u>authoritative source</u>, <u>individual</u> <u>responsible</u> for maintaining the authoritative copy of that data element
- DEP is a 'contract' between players in the SOA environment
- Acquisition Technology & Logistics governance organization is the authority for establishing data priorities
- Having brought a new data element under governance, implementation requires technical integration to be included in the AV SOA

#### **AT&L AV SOA Pilot Architecture**
