To Recipients of the OTUMS Directory:

It is the intent that this directory be of substantial benefit to both the public and private sector in fostering communications between and among individuals interested in the Process, Concepts, Framework and Methodology of Technology Dissemination, Transfer and Utilization. Feedback from possible users therefore, is a vital element for improvement and providing better respond to specific individual needs.

Accordingly, a few minutes of your time spent in completing the attached Document Acknowledgement will contribute significantly to our effort to improve the quality and usefulness of this directory. The page is preaddressed and franked; fold in half, seal with tape and mail.

Your cooperation will be greatly appreciated.

  
James A. Jolly, Ph.D.  
Associate Professor

This information is solicited under the authority of the National Science Foundation Act of 1950, as amended. It will be used to update the contents of the "1975 Technology Transfer Directory of People." Your response is entirely voluntary and failure to provide the information requested will in no way adversely affect you.

# CODE SHEET FOR OTUMS DIRECTORY OF PERSONS INTERESTED IN TECHNOLOGY UTILIZATION AND MOVEMENT

## AREAS OF INTEREST

- Code A Where and how to find available technology.  
 Code B Examples and cases of new uses for existing technology.  
 Code C Research activity concerning methods of increasing the use of technology.  
 Code D Research activity concerning technology movement, dissemination, and/or transfer

## AREAS OF EXPERTISE

Please select the number(s) from the list below to describe your areas of expertise and occupation. For example, if you are a Public Relations Executive of an Insurance Company you select 778 as your expertise area and 309 to identify your occupation. Please note that it may be appropriate to select only one number, as for example 345 (Composer) or 450 (Physician).

## INTRODUCTION

This is a directory of people. One major point learned by most of us working in the area of information transfer is that the process is very much dependent upon the cooperation of individuals.

A few years ago there was a surge of interest within many organizations to attempt to enhance the utilization of available knowledge by establishing better and more efficient information exchange facilities. Documentation, search facilities, and distribution channels are significant elements in the flow of technical information from the source to the user. It seems important, however, to recognize that there are a number of other factors which contribute heavily to the success of the utilization of knowledge by an organization. A number of authors have developed arguments that support the idea that the linking function of individuals may be the catalyst that may finally cause the user to implement an innovation. Various terms have been used by scholars to describe the individual that performs the linking function. Some of these are: Linker, opinion leader, gate keeper, knowledge broker, and innovator. In any event there is a thread of commonality about the person that performs the linking function and that is he tends to take initiative on his own behalf to seek out scientific knowledge and further to expose that scientific knowledge to potential users that might find the scientific knowledge applicable in their current endeavor.

The importance of the linking function in the movement of knowledge has suggested that it would be useful to have a directory of persons that may play this role. It did not appear practical to select these persons by job title or by psychological tests or similar methods. A much more direct approach was selected. The criteria for listing a person was simply his declared interest. That is, each of the persons listed in this directory has taken the time to fill out a card describing his area of interest and area of expertise. Each person listed has given permission to have his (or her) name and address listed in the directory.

What is the good of a directory of persons interested in the processes, concepts, framework, and/or methodology of technology movement, dissemination, transfer, or utilization? For the person who functions as a linker, the answer is intuitively obvious. This directory is intended to be used by such a person in whatever innovative way he sees fit.

As with most ventures, one learns by doing. This is no exception. It is quite clear that the two digit SIC Code is not fully satisfactory

for listing areas of expertise. Because of this a revised expertise code has been made a part of the document acknowledgement. The new listing will be used when a revised issue is published.

Many of you have suggested that a business telephone number should also be included. This suggestion seems reasonable and a business telephone number will also be included when a revised issue is published.

Another suggestion is that a geographic listing would be useful. That too will be considered for the revised issue.

Even though the directory is going to press several months late in terms of the original deadline of July 1975, as many as ten per day signed authorizations are still arriving. This is to be expected and therefore an arbitrary cut off was set as 20 September 1975. Authorizations received after 20 September will have their names published in the revised issue.

A great deal of assistance was received from many helpful persons in terms of additional persons that might be interested in having their names included in the directory. The initial mailing list was less than 1000 names. Through the receipt of suggested names the final mailing list of individuals invited to have their names in the directory exceeded 5000.

This invitation remains open. The revised directory is planned for 1976. Anyone wishing to have his (or her) name in the directory should fill out the Document Acknowledgement Form and return it to Naval Postgraduate School or send a letter requesting an application.

Please send your comments and recommendations.

Sincerely,

James A. Jolly

## ACKNOWLEDGEMENTS

It is appropriate to mention that there was no direct funding from any agency of the U. S. Government to gather the data for this directory. The majority of the work was done by graduate students at the Naval Postgraduate School. In particular credit goes to J. W. Gilroy for initiating the idea, to R. J. Hartinger for the computer programs used and most importantly to J. T. Nededog and Carmen Nededog for processing the more than 5000 names suggested for the directory. The cooperation and encouragement of Professor J. W. Creighton was also a significant factor.

## *Instructions* -- for use of the Directory

1. The names appearing in this Directory are in alphabetical order.
2. To the right of each name appears the person's address.
3. Next under the title "Area of Interest" may appear the letters A, B, C, and/or D. These letters are defined on page v.
4. The last column to the right is the two digit SIC that is used to code the person's area of expertise. The meaning of these codes are shown on page v.
