SPECIAL SECTION -

Antibodies

INTRODUCTION

1191 The Future Is Now

REVIEWS

- **1192** Antibody Therapeutics in Cancer *M. X. Sliwkowski and I. Mellman*
- 1199 Antibodies in HIV-1 Vaccine Development and Therapy F. Klein et al. >> Science Podcast
- 1205 Diversity Among Memory B Cells: Origin, Consequences, and Utility D. Tarlinton and K. Good-Jacobson

>> Editorial p. 1151; News stories pp. 1164 and 1168

EDITORIAL

1151 Translating Antibody Insights Julie Louise Gerberding >> Antibodies section p. 1191

NEWS OF THE WEEK

1156 A roundup of the week's top stories

NEWS & ANALYSIS

- 1158 It's Official—Voyager Has Left the Solar System >> Science Express Report by D. A. Gurnett et al.; Science Podcast
- 1160 Researchers Wary as DOE Bids to Build Sixth U.S. Climate Model
- 1161 Novel Craft Sets Out to Probe the Mysteries of Moondust
- 1163 Researchers to Explore Promise, Risks of Sequencing Newborns' DNA

NEWS FOCUS

1164 | Alarm Over Autism Test

1168 Bound for Glory A Once-in-a-Lifetime Flu Shot? >> Antibodies section p. 1191

LETTERS

- 1173 Turkey's Biodiversity Funding on the RiseA. Waldron et al.Waiving Concerns About Conflicts
 - of Interest
 - R. Lutter
 - Response
 - S. F. Wood and J. Mador
- 1175 CORRECTIONS AND CLARIFICATIONS 1175 TECHNICAL COMMENT ABSTRACTS

BOOKS ET AL.

- 1176 The Body Economic D. Stuckler and S. Basu, reviewed by J. A. Tapia Granados
- 1177 George Catlin S. Pratt and J. Carpenter Troccoli, curators

POLICY FORUM

1178 DNA Identification After Conflict or Disaster *A. J. London* et al. >> Science Podcast

PERSPECTIVES

- 1181 Toward Lighter, Stiffer Materials *T. A. Schaedler* et al. >> *Report p. 1219*
- 1182 What, Where, and When? S. Knapp
- 1184 Sensing Endotoxins from Within J. C. Kagan >> Reports pp. 1246 and 1250
- 1185 Opportunities Knock with a More Stable Optical Clock H. S. Margolis >> Report p. 1215
- **1186** Circulating Tumor Cells *V. Plaks* et al.
- 1188 Cold Atom Cosmology J. Schmiedmayer and J. Berges >> Report p. 1213

ON THE WEB THIS WEEK

>> Science Podcast

Listen to stories on DNA and disasters, new immunological weapons against HIV, Voyager's latest exit, and more.

>> Find More Online

Check out *Science* Express, our podcast, videos, daily news, our research journals, and *Science* Careers at **www.sciencemag.org**.

COVER

Structural model showing the electron density surface of immunoglobulin G, a major antibody subtype. The human immune system generates a diversity of these Y-shaped antibodies that recognize foreign molecules and directly neutralize the targeted invaders or tag them for destruction. Antibodies that bind one or more specific targets are being harnessed in the treatment of disease and are informing vaccine design. See page 1191.

DEPARTMENTS

1149This Week in Science1153Editors' Choice1154Science Staff1257New Products1258Science Careers

RESEARCH ARTICLE

1212 Quantifying the Influence of Climate on Human Conflict S. M. Hsiang et al. Across disciplinary boundaries, recently published evidence links climate change to increased violent conflict. >> Research Article Summary; for full text: http://dx.doi.org/10.1126/science.1235367

REPORTS

1213 From Cosmology to Cold Atoms: Observation of Sakharov Oscillations in a Quenched Atomic Superfluid *C.-L. Hung* et al.

Abrupt interaction changes in an ultracold gas reveal oscillations analogous to peaks in the cosmic microwave background. >> Perspective p. 1188

1215 An Atomic Clock with 10⁻¹⁸ Instability *N. Hinkley* et al.

An ytterbium-based optical clock exhibits a precision of nearly one part per quintillion. >> *Perspective p. 1185*

1219 Reversibly Assembled Cellular Composite Materials K. C. Cheung and N. Gershenfeld

Reversible assembly of mass-produced composite-material parts created a stiff, ultralight structure. >> Perspective p. 1181

> reispective p. 1101

- 1222 Topotactic Interconversion of Nanoparticle Superlattices *R. J. Macfarlane* et al. DNA-coated nanoparticles can reversibly incorporate a third nanoparticle.
- 1225 Organotextile Catalysis J.-W. Lee et al. Metal-free molecular catalysts can be tethered to nylon to render them recoverable and recyclable.
- 1229 Slow Earthquakes, Preseismic Velocity Changes, and the Origin of Slow Frictional Stick-Slip B. M. Kaproth and C. Marone Slip-stick experiments reveal the evolution of

Slip-stick experiments reveal the evolution of frictional behavior during slow earthquakes. 1233 HONO Emissions from Soil Bacteria as a Major Source of Atmospheric Reactive Nitrogen

R. Oswald et al. Nitrous acid emissions from soil are comparable to those of nitric oxide in arid and arable regions.

1236 Channelized Ice Melting in the Ocean Boundary Layer Beneath Pine Island Glacier, Antarctica *T. P. Stanton* et al.

A complex pattern of channelized melting exists on the underside of the ice shelf of Pine Island Glacier in Antarctica.

1239 Marine Taxa Track Local Climate Velocities M. L. Pinsky et al. Variation in species' responses to climate

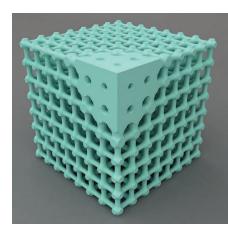

change can be explained by differences in the local rates of climate change.

1243 The Molecular Trigger for High-Speed Wing Beats in a Bee H. Iwamoto and N. Yagi

High-speed x-ray imaging of bee flight muscle reveals that stretch-activated myosin deformation drives high-frequency wing beats.

- 1246 Noncanonical Inflammasome Activation by Intracellular LPS Independent of TLR4 *N. Kayagaki* et al.
- 1250 Cytoplasmic LPS Activates Caspase-11: Implications in TLR4-Independent Endotoxic Shock J. A. Hagar et al. Cytoplasmic lipopolysaccharide from Gram-negative bacteria can activate the innate immune system directly. >> Perspective p. 1184
- 1254 Interacting Gears Synchronize Propulsive Leg Movements in a Jumping Insect *M. Burrows and G. Sutton*

Functional gears are involved in the ballistic jumping movements of the flightless planthopper insect, *Issus*.
