

# ANALYSIS OF FAMILY INTERVIEWS IN UNCONTROLLED DONORS AFTER CARDIAC DEATH

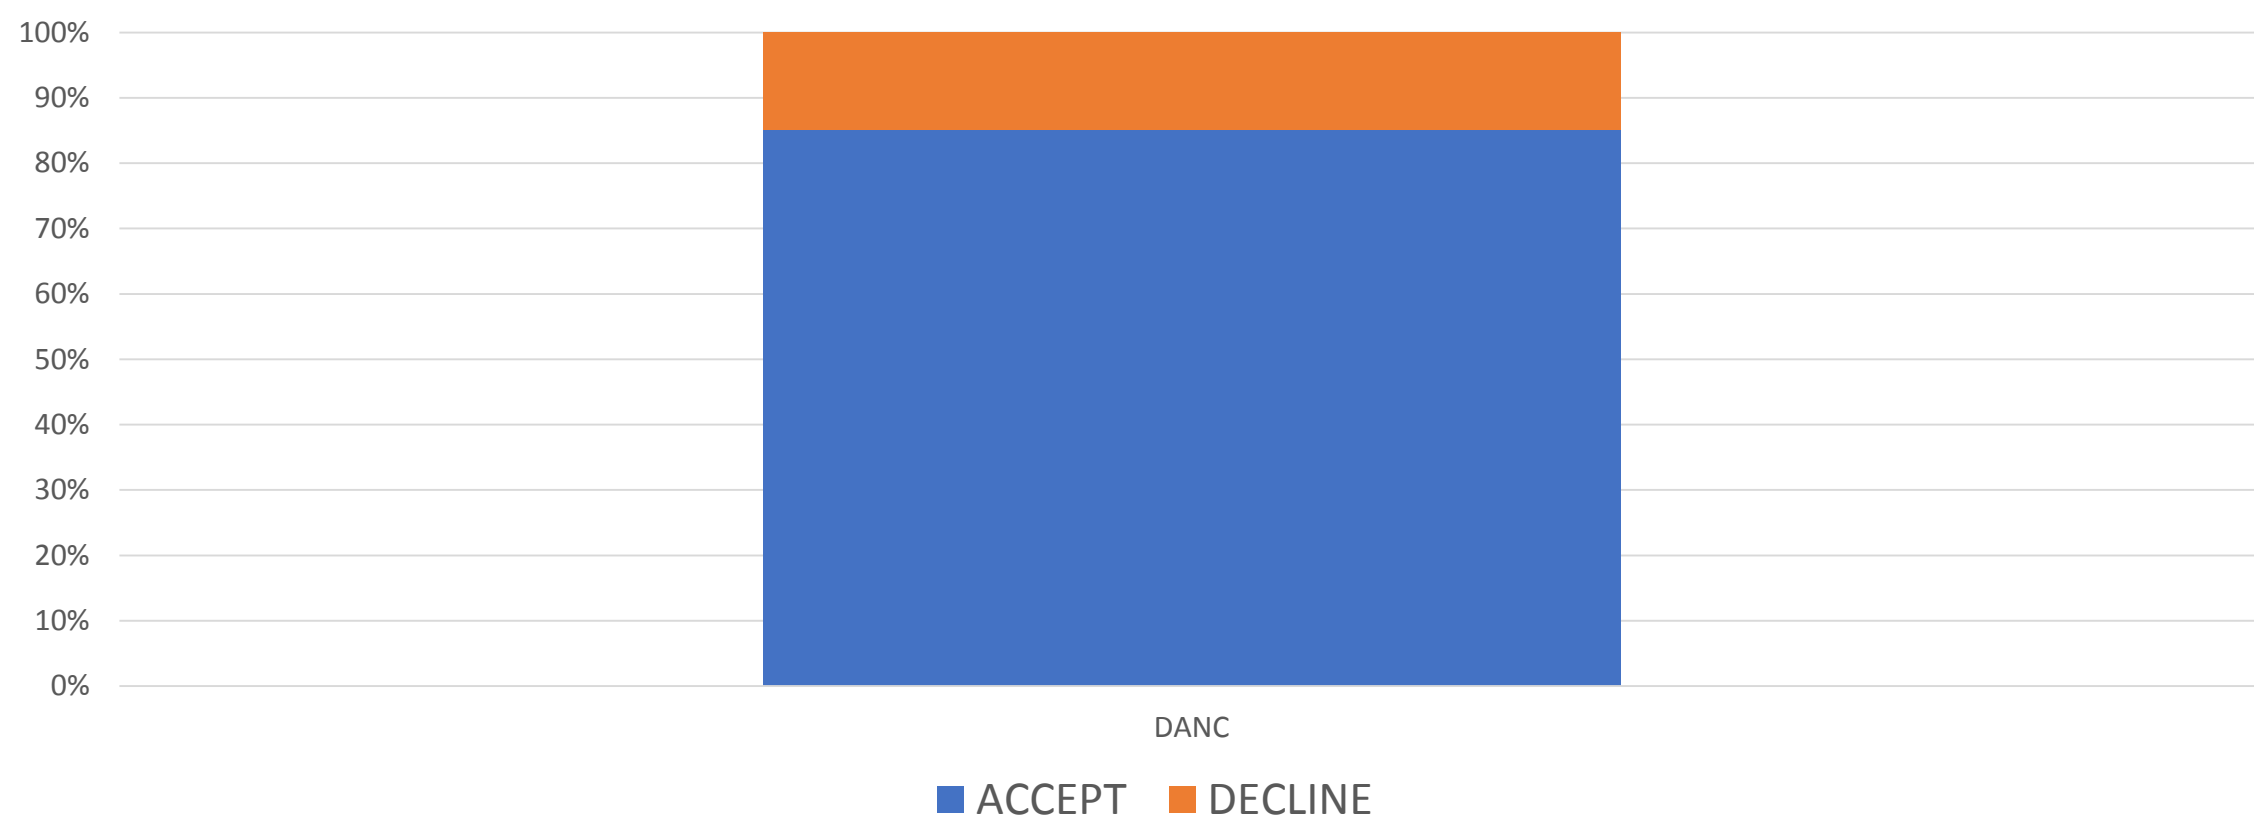

A MATEOS RODRIGUEZ, MC DIEZ COLLAR, M APARICIO MADRE, E MORALES RUIZ, A SORIA GARCIA, FJ DEL RIO GALLEGOS

## Introduction

The objective is to know the details of uncontrolled donors after cardiac death interview family. The data were collected by the transplant coordinator of HU 12 de Octubre and HU Clinico San Carlos. Retrospective collection of information about the donation from 2007 to 2017.

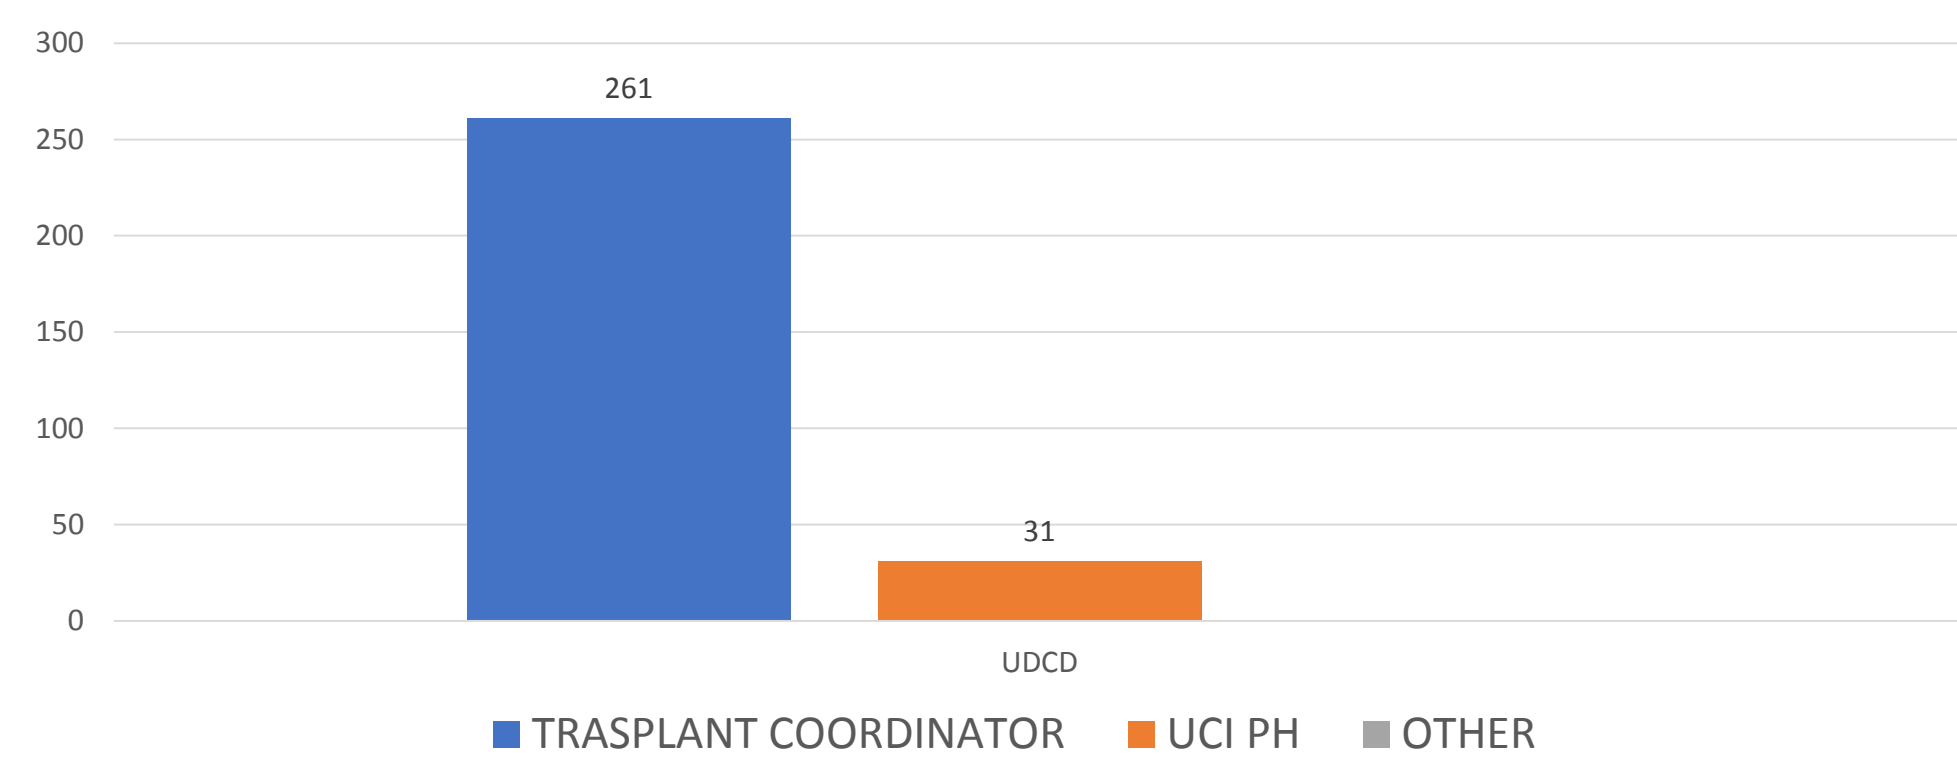

INTERVIEWS RESULTS

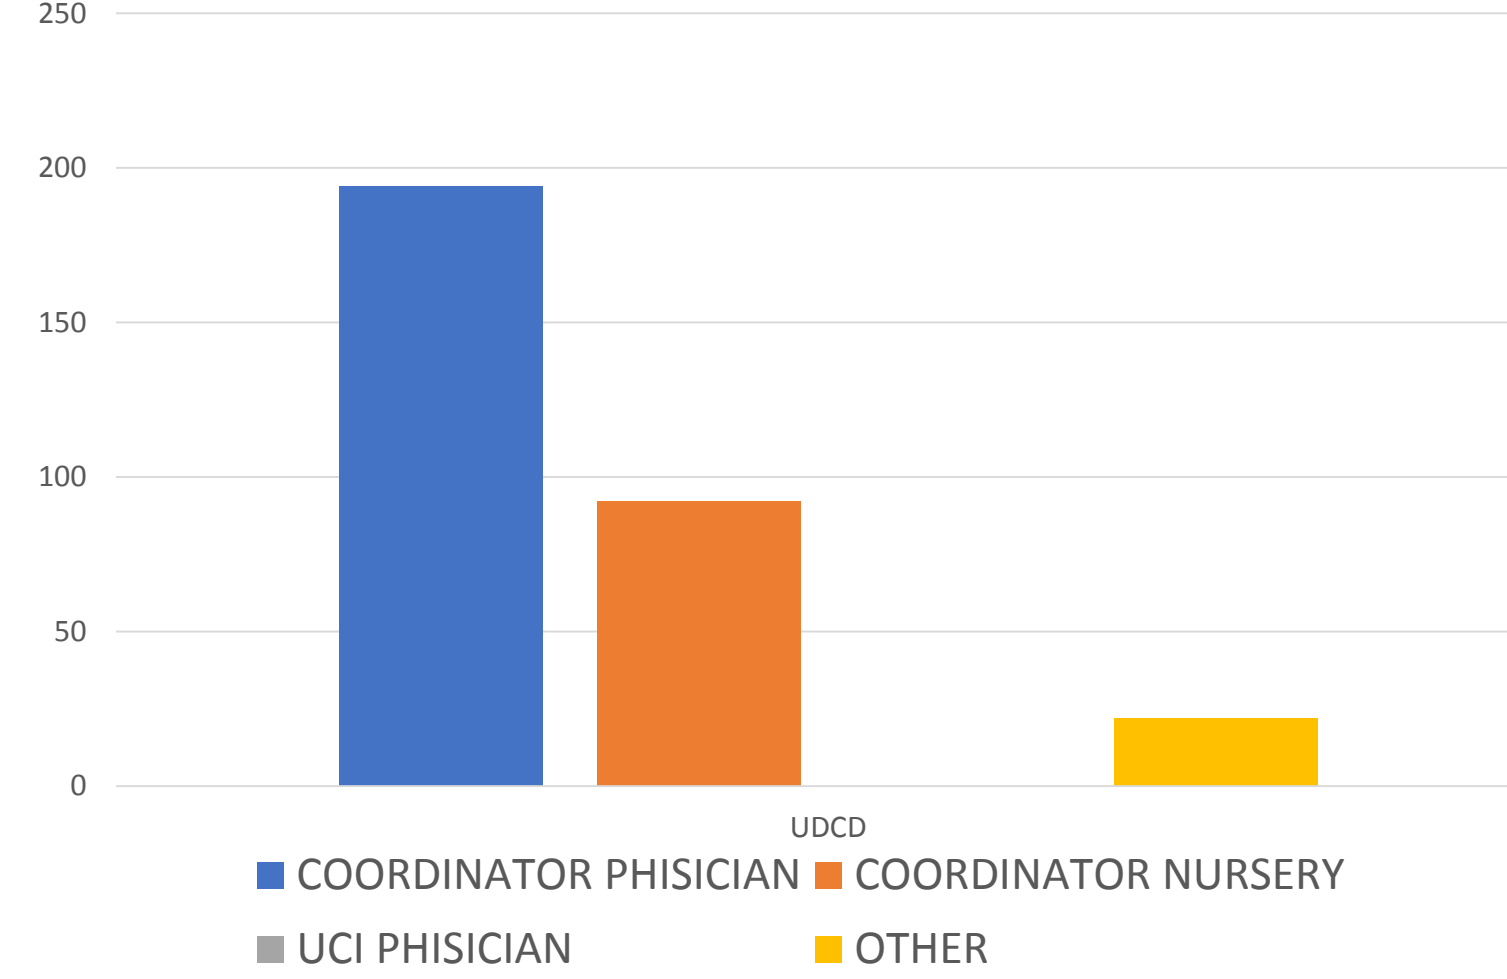

INTERVIEWS NUMBER

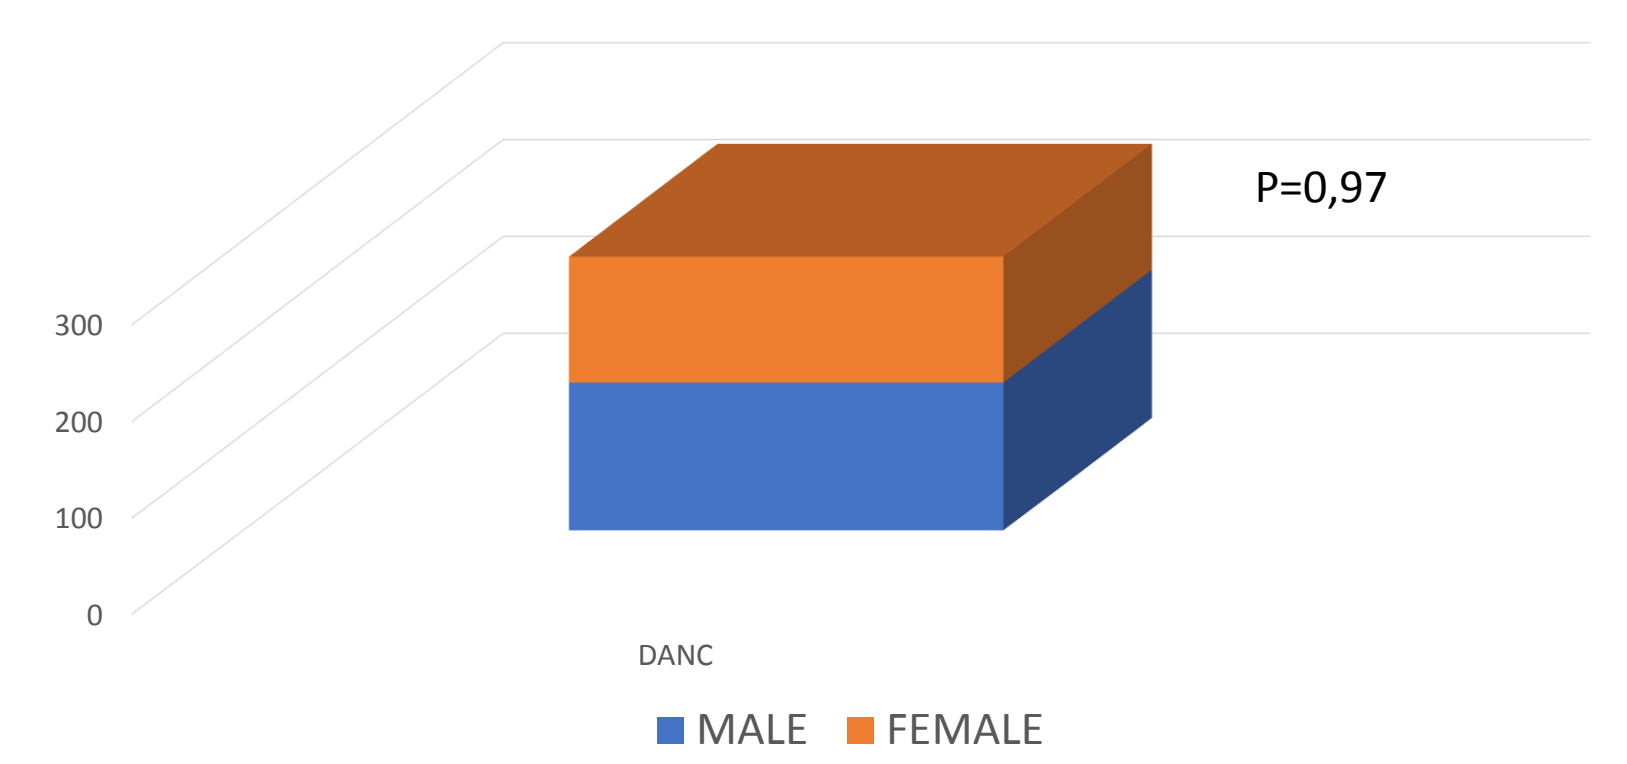

INFORM ABOUT DEATH

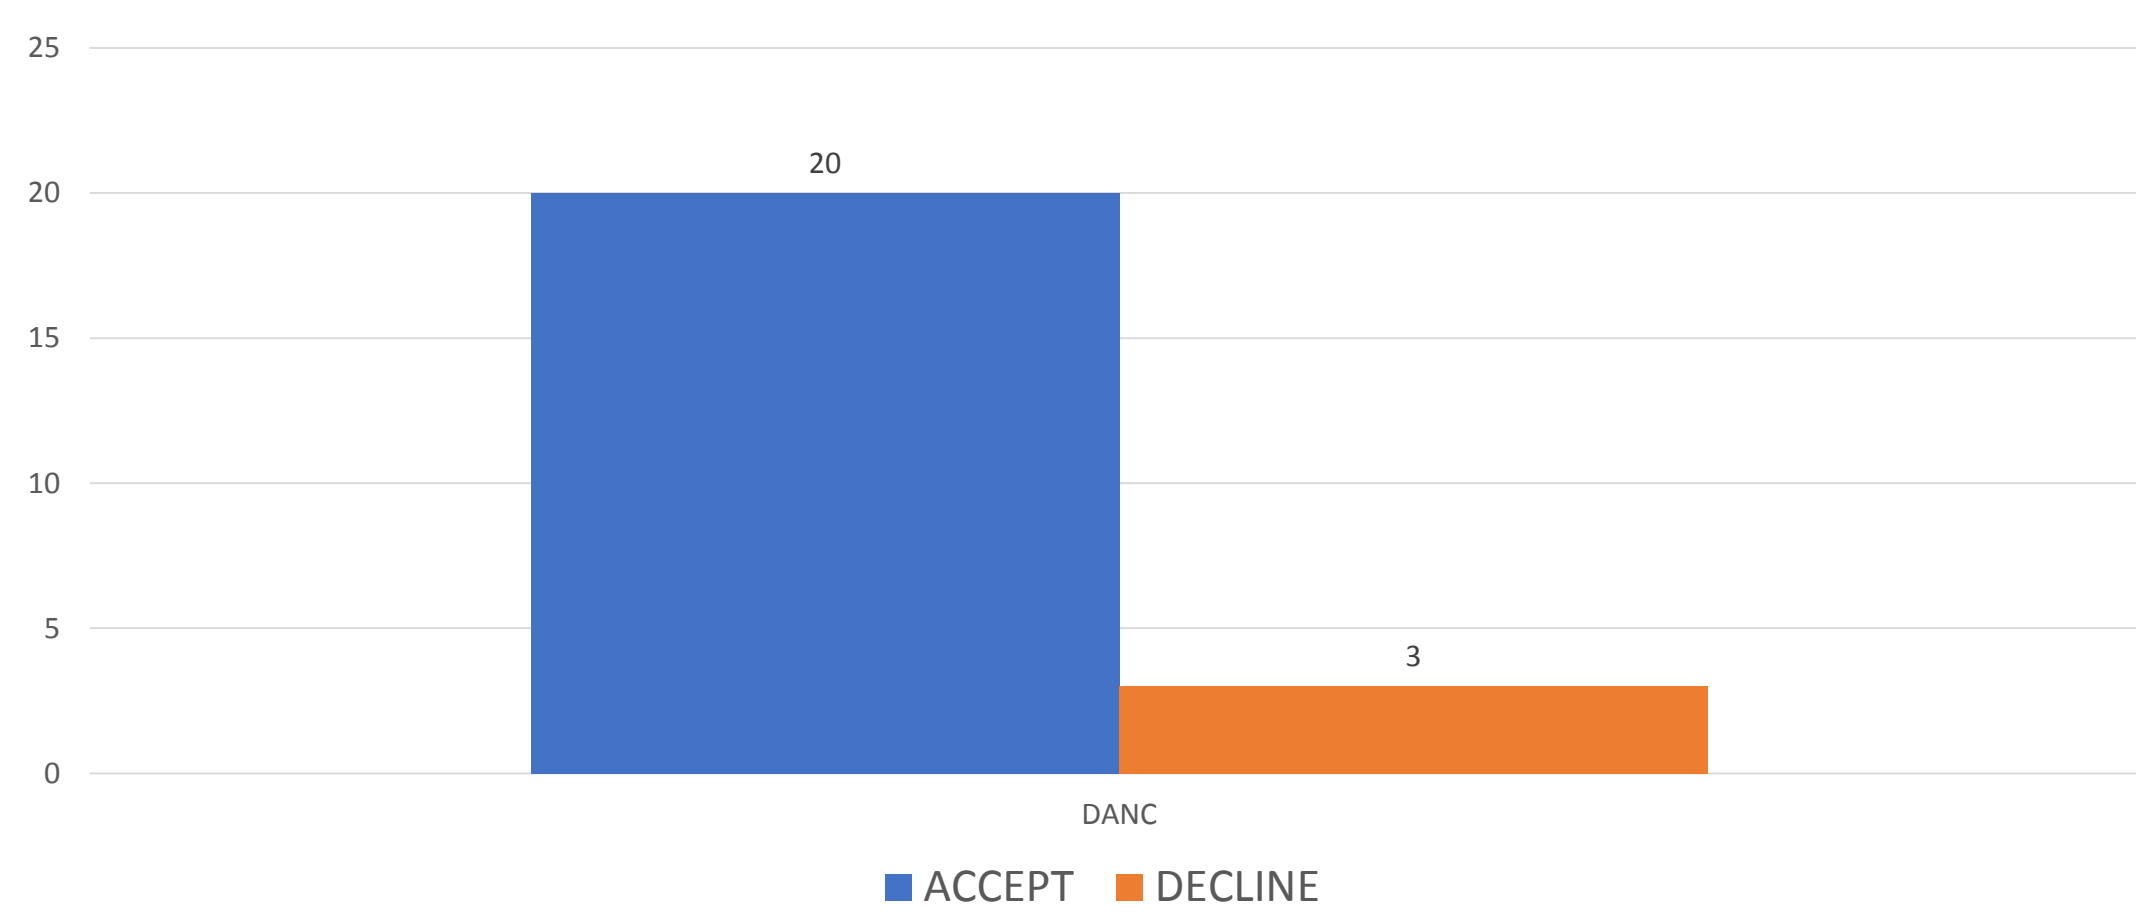

ASK ABOUT DONATION

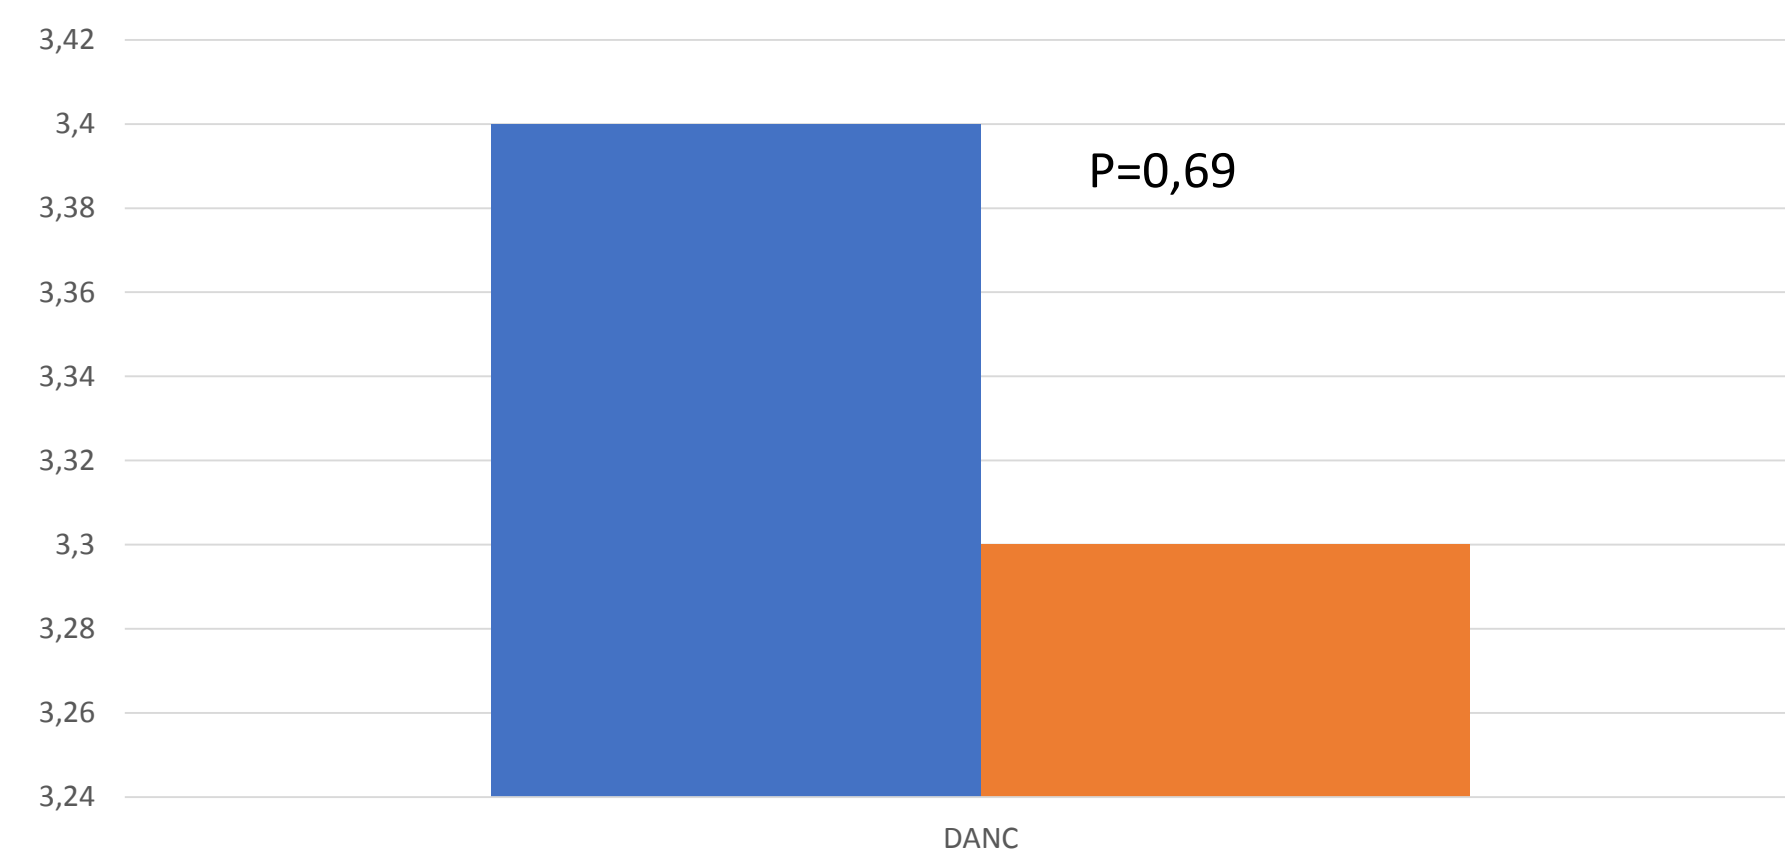

SEX OF INFORMANT

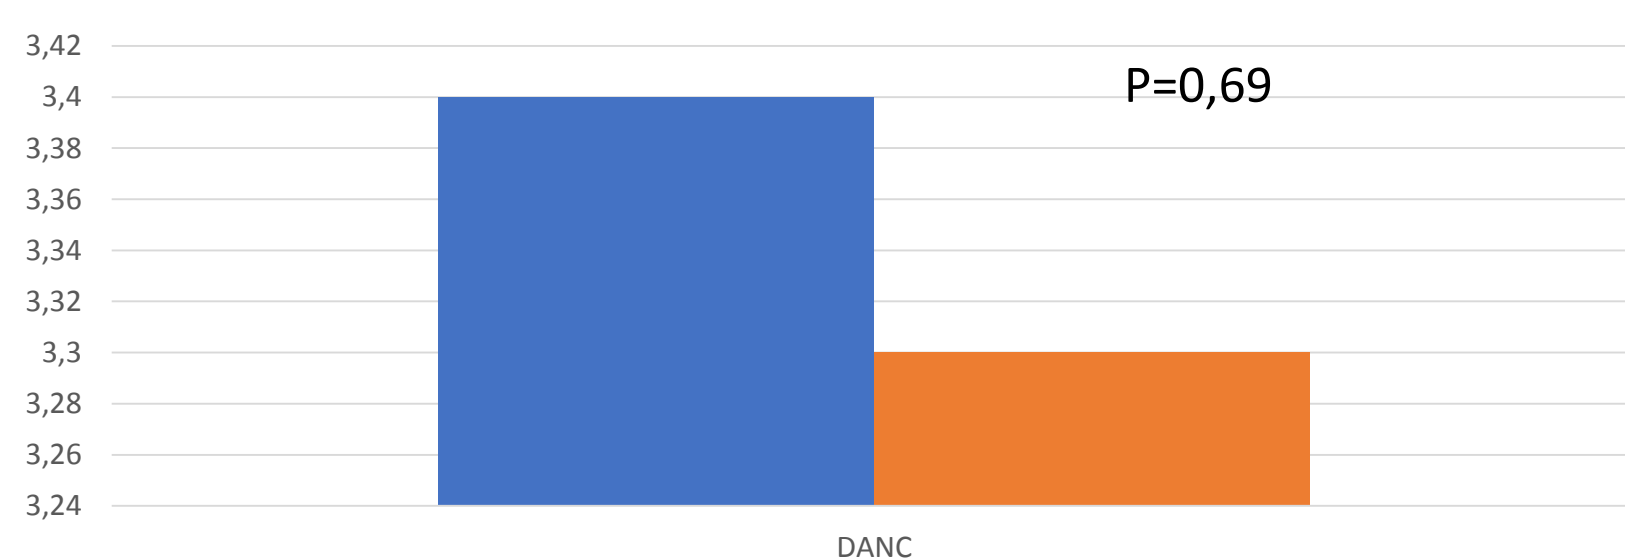

FAMILY HOSPITAL STAFF INFLUENCE

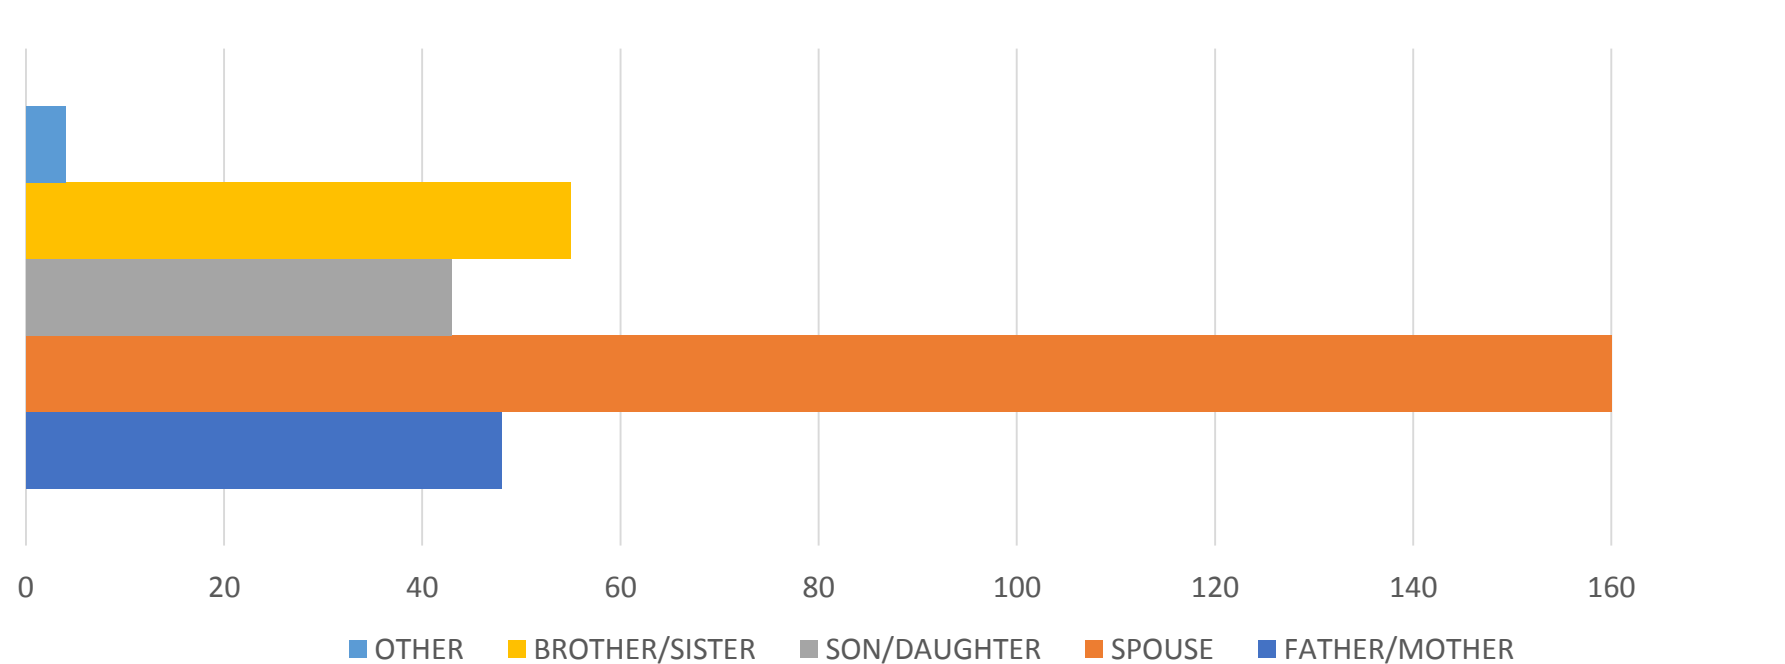

NUMBER OF PERSON IN THE INTERVIEW

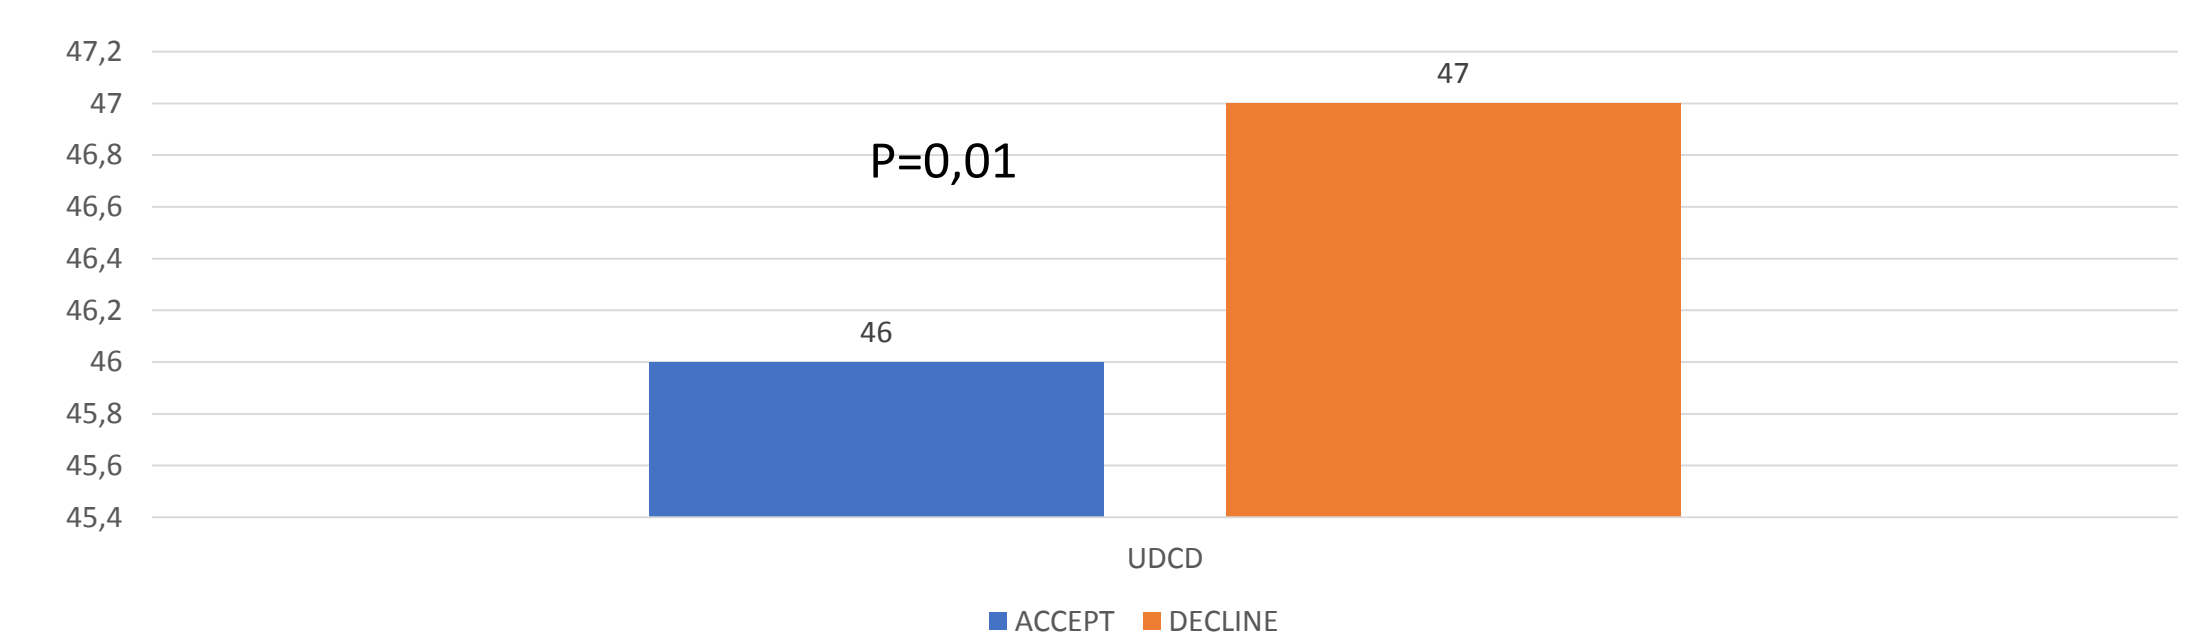

NUMBER OF PERSONS IN THE INTERVIEW

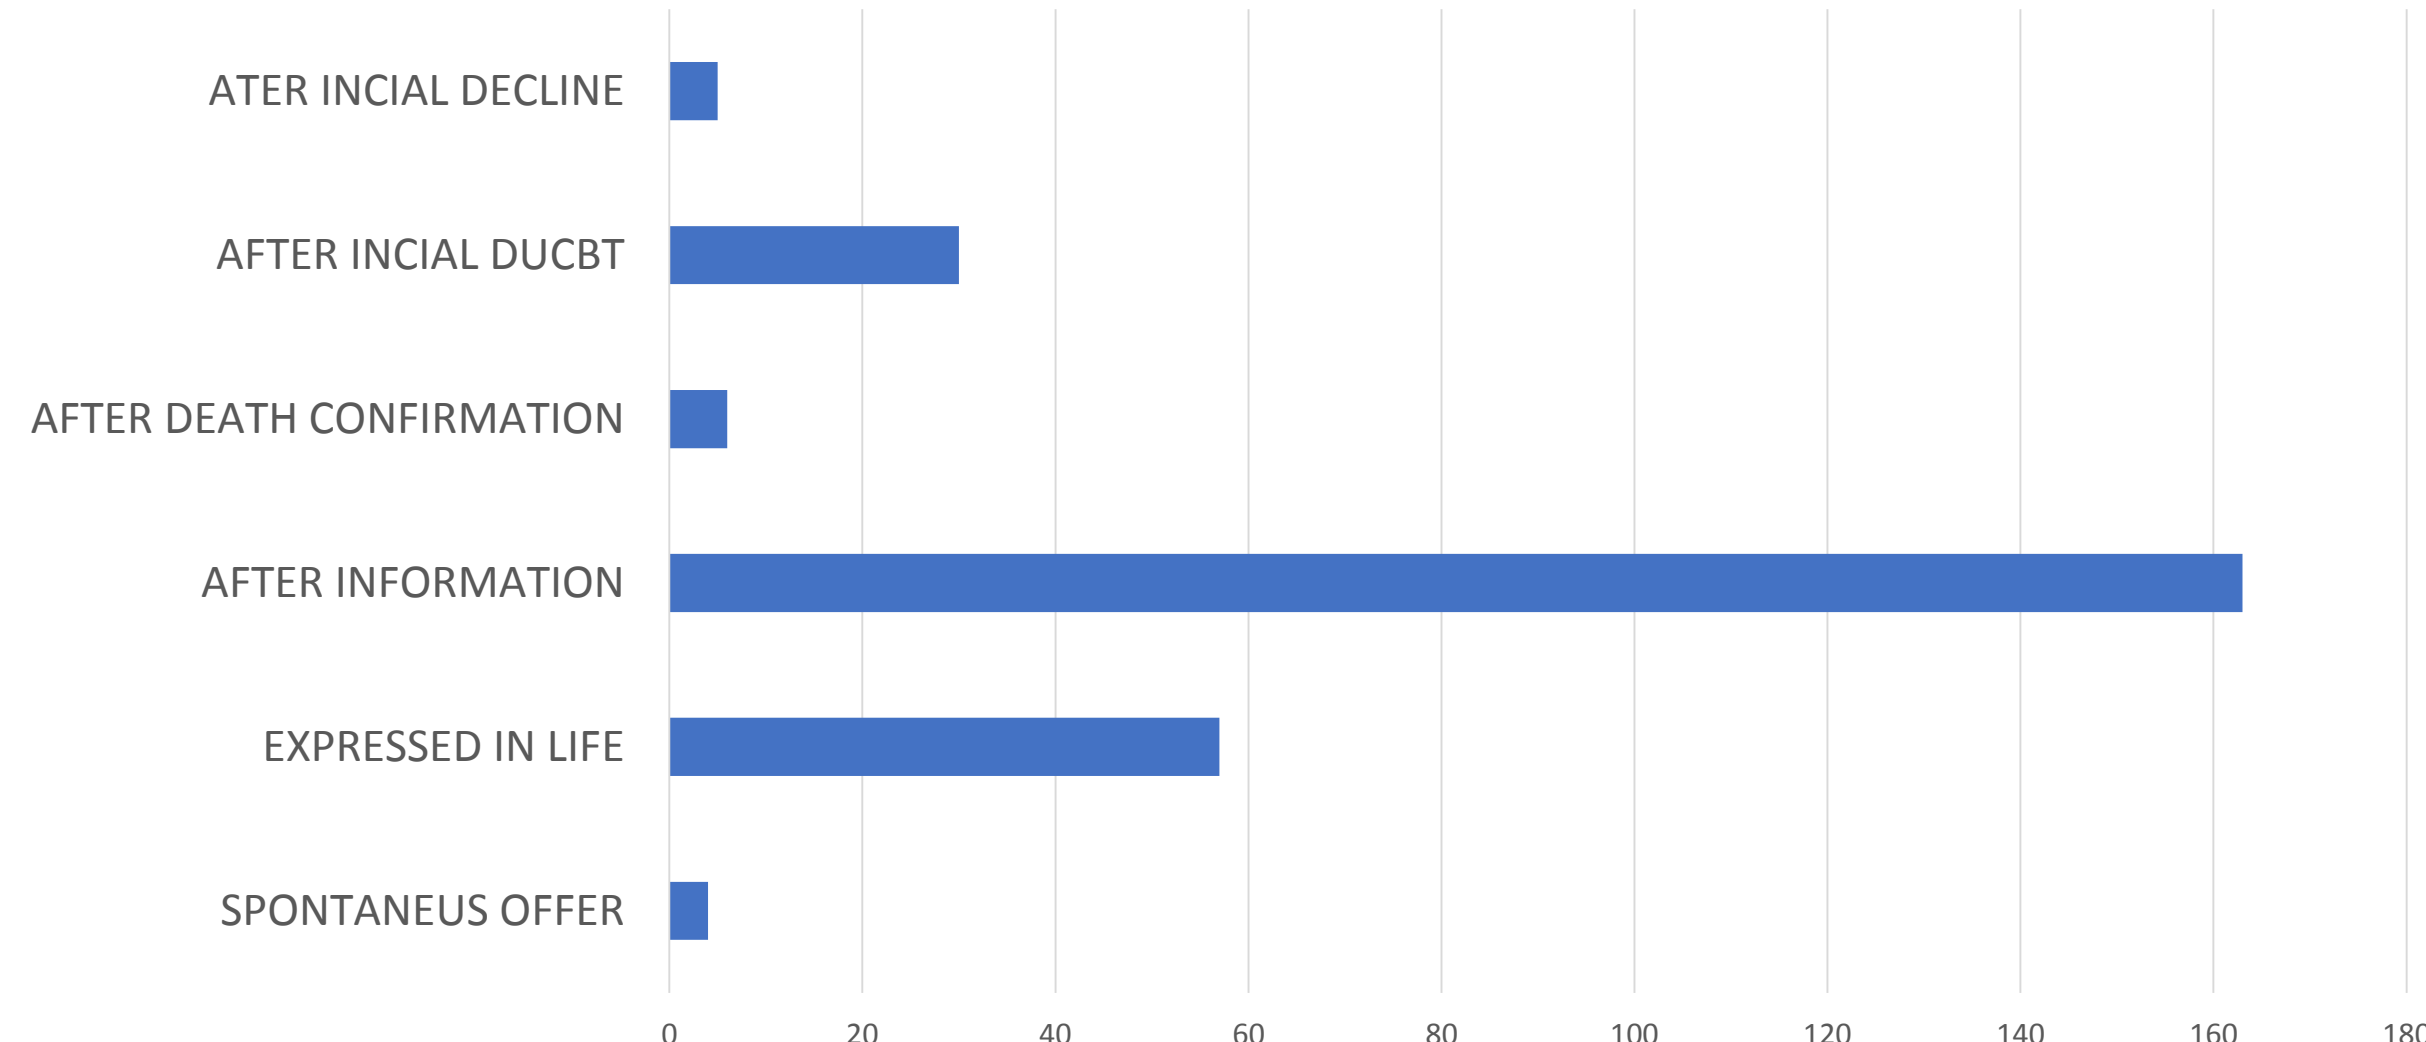

MAIN INTERLOCUTOR

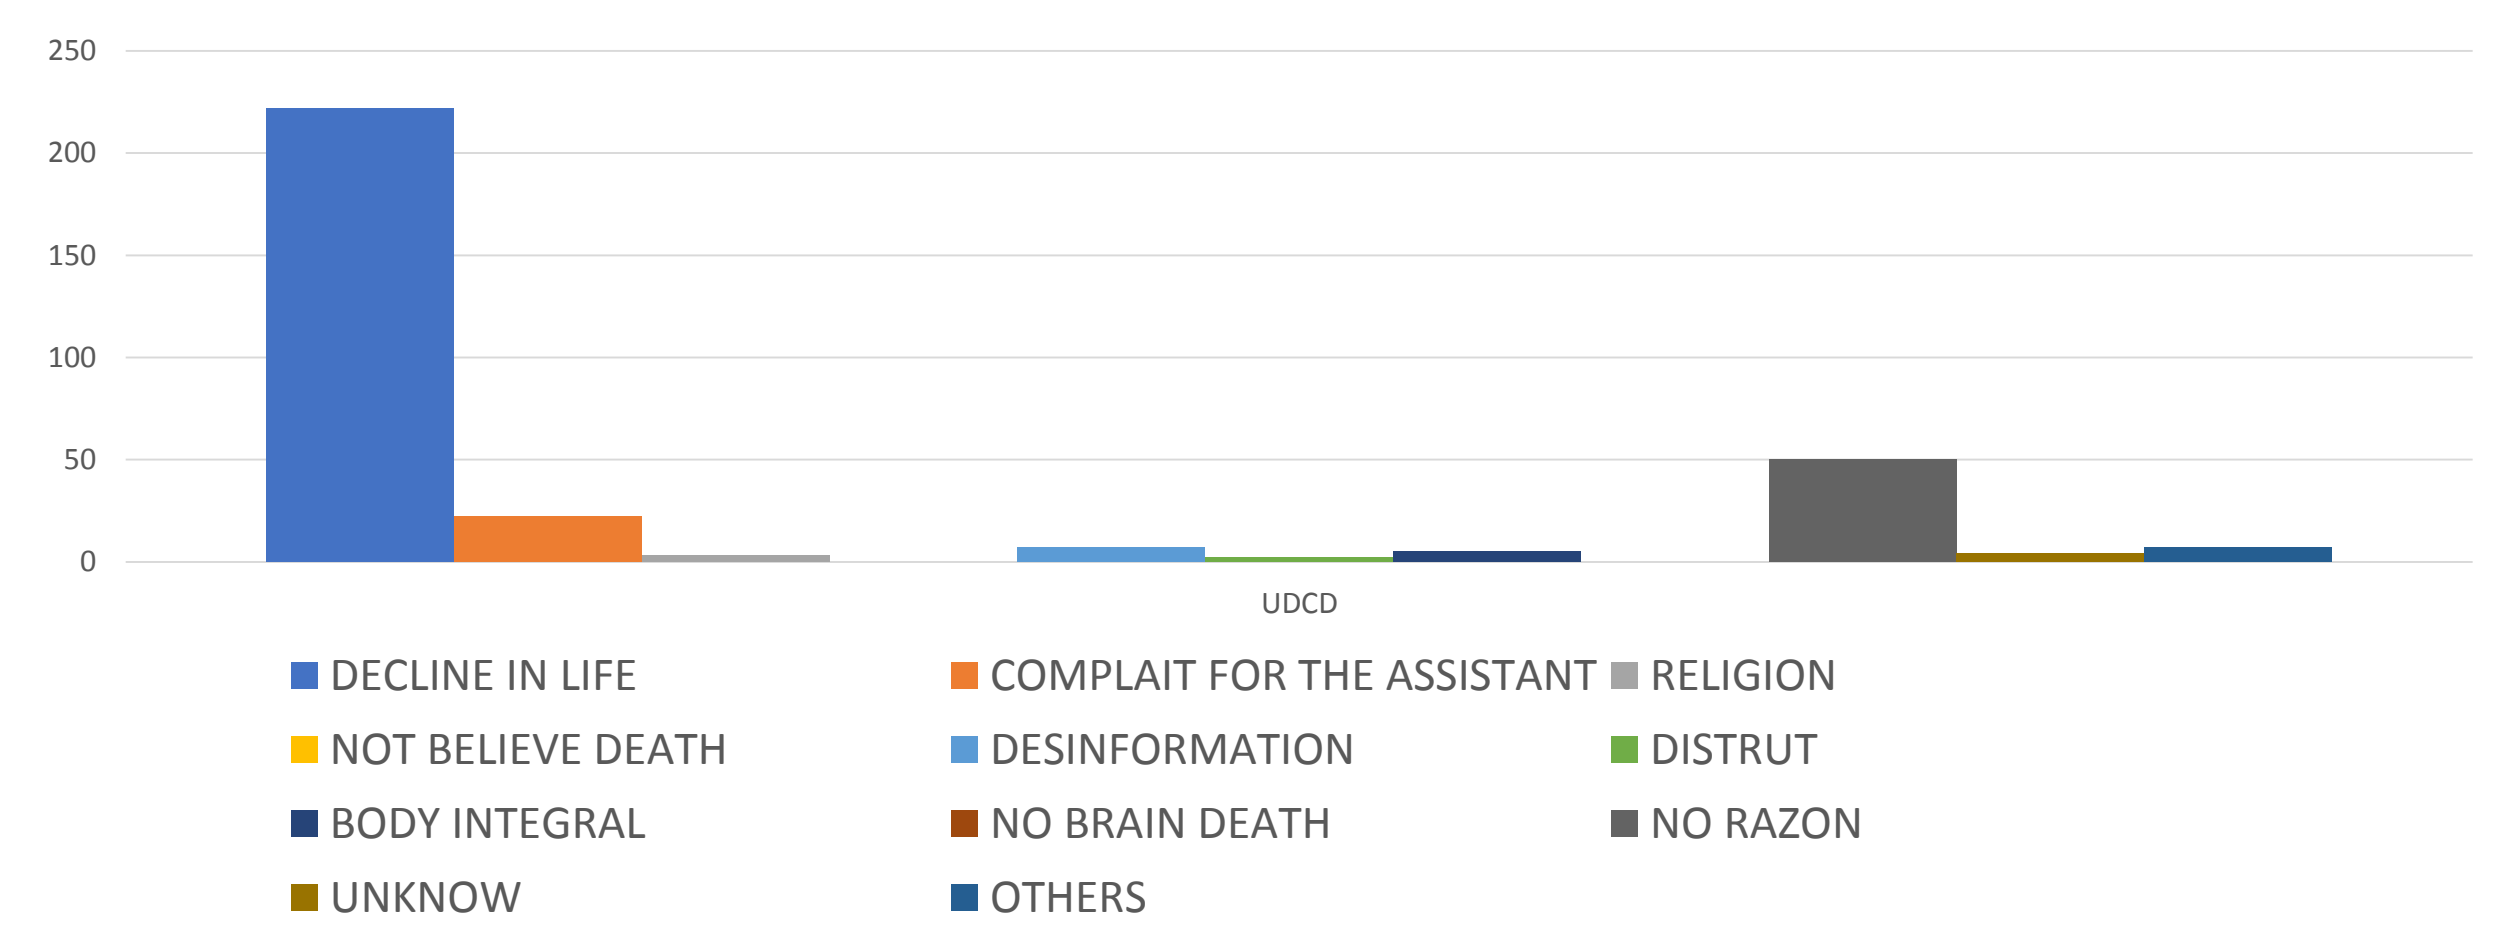

MAIN INTERLOCUTOR AGE

¿WHEN THE FAMILY ACCEPT THE DONATION?

DECLINE REASON

**CONCLUSION:**  
 HABITUALLY INFORMS ON DEATH IN TRANSPLANTATION COORDINATOR.  
 THE MAIN INTERLOCUTOR IS BROTHER OF THE POSSIBLE DONOR AND SOMETHING YOUNGER  
 THE MOMENT OF ACCEPTANCE IS AFTER RECEIVING INITIAL INFORMATION  
 THERE IS A LOW RATE OF FAMILY NEGATIVES IN UDCD  
 THE REASONS FOR THE MOST FREQUENT NEGATIVES ARE NEGATIVE IN LIFE AND NOT REASONED  
 THERE ARE NO RECORDS ABOUT "DO NOT ASSUME THE DEATH"
